CALIGARI, NOSFERATU, and THE LAST LAUGH (Murnau); METROPOLIS and M (Fritz Lang); and THE JOYLESS STREET and PANDORA'S BOX (Pabst). Some attention will also be given to films made at the ideological extremes of Weimar culture: KUHLE WAMPE (with a screenplay by Brecht), Leni Riefenstahl's THE BLUE LIGHT, and Pabst's THREEPENNY OPERA. Readings will include screenplays, essays, and reviews from the period as well as selected literary works such as Brecht's THREEPENNY OPERA and Irmgard Keun's novel THE ARTIFICIAL SILK GIRL.

FILM355 Newest German (and Austrian) Cinema
This course examines the history and aesthetics of German cinema between the fall of the Wall and the present and also considers work by important Austrian directors of the same period. Topics include the ongoing response to World War II and the Holocaust, reactions to the reunification of Germany, and the problematic integration of German Turks and other minorities. We will look at films by Maren Ade, Fatih Akin, Dorris Dörrie, Michael Haneke, Christian Petzold, Ulrich Seidl, Margarethe von Trotta, and Tom Tykwer.

FILM357 Fassbinder & Sirk: Limitations of Life
The relationship between Hollywood and Germany has always been both uneasy and productive. This course will examine the well-known interaction between the master of the postwar melodrama and the enfant terrible of the New German Cinema. Initially, we will follow the lead of Fassbinder's famous essay, "Imitation of Life: On the Films of Douglas Sirk," and consider the films that ostensibly influenced the young German director most immediately. Special focus will be on FEAR EATS THE SOUL, Fassbinder's provocative remake of ALL THAT HEAVEN ALLOWS, and on the late melodramas of so-called FRG Trilogy, including THE MARRIAGE OF MARIA BRAUN. We may also look at some of Fassbinder's important films before his encounter with Sirk, as well as some of Sirk's German films.

FILM358 Italian Cinema: 1945-1965
The decades just after World War II were a transformational period in the history of Italy--and of Italian cinema. After the traumas of war and fascism, the country underwent social and economic changes that affected every aspect of life, changes that fed the imaginations of the nation's filmmakers. Religion, family, gender relations, class struggle, and regional conflict provided themes for comedy, melodrama, and the characteristically Italian hybrid of fiction and documentary known as neorealism.

In examining some of the great films of this period, the course will explore some of these themes, and it will also emphasize the extraordinary creative power and artistic variety of the films themselves. We will examine the contrasting styles and approaches of some of the great Italian auteurs--including Federico Fellini, Luchino Visconti, Roberto Rossellini, and Vittorio de Sica. We will also attend to the careers of charismatic actors like Marcello Mastroianni, Sophia Loren, and Anna Magnani, whose emergence as global movie stars enhanced the glamour and prestige of a national cinema rooted in local experience.

FILM360 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

FILM362 Calderwood Seminar in Public Writing: The Dark Turn in Television Storytelling
This course, offered in association with the Calderwood Seminars in Public Writing, examines a certain tendency in contemporary television storytelling. Taking the debut of "The Sopranos" in 1999 as a benchmark, we will explore the emergence in dramas and comedies of a dark, uncertain, pessimistic, or disillusioned address within a medium long known for its reassuring tone. We will consider the industrial and social conditions for this tonal shift, as well as the role it has played in elevating public perceptions of television's cultural value.

FILM366 Elia Kazan's Films and Archives
Elia Kazan was one of the most successful and influential cross-platform artists of the 20th century. In the world of theatre, he rose to success with the famed

Group Theatre, he co-founded the Actor's Studio, and he directed the first runs of landmark works by Arthur Miller and Tennessee Williams. Upon moving to cinema, he directed major films such as Gentleman's Agreement, A Streetcar Named Desire, On the Waterfront, East of Eden, and A Face in the Crowd. This course serves as an exploration of Kazan's directorial style in the medium of cinema--how he discovers, defines, and experiments with the form as he goes--and his lasting impact on American filmmaking. Kazan made movies about difficult protagonists and could himself be described as such, earning notoriety for his friendly testimony to the House Un-American Activities Committee as well as his many extramarital dalliances. But his work was also personal and frank, emerging from his own struggles as a Greek immigrant trying to find a place in an American culture defined as much by its hostility as its opportunity. Kazan's films involve audiences in irreconcilable conflicts built around misfits and outcasts, propelled by pain and desire, trying to assert their individuality in the face of social forces. They consider contradictory questions like: When can love be destructive? When can anger be communicative? How can a synthetic art form capture authenticity and truth? This course is designed to combine both analytical and research-based approaches to understanding Kazan and his work. Screenings will encompass selections from Kazan's career as well as the work of influences, acolytes, and other filmmakers whose movies illuminate the distinctiveness of Kazan's approach. Additionally, students will be tasked with performing archival research with the primary documents in the Elia Kazan Collection at Wesleyan University's Reid Cinema Archives.

FILM367 Frank Capra's Films & Archives
"Maybe there really wasn't an America...maybe it was only Frank Capra." -- John Cassavetes

Frank Capra directed, produced, and co-wrote some of Hollywood's most celebrated and enduring films of the 20th century. Amid Depression, war, and corruption, he triumphed the optimism, faith, and humor essential to the American spirit. This course explores Frank Capra's unique directorial style in the context of film history and filmmaking practices of the time, studies Capra as an artist and a person, and investigates the individual "stories" of many of his well-known and lesser-known projects. The Wesleyan Cinema Archives are proud to hold Capra's archive, enabling students to contextualize Capra and his films using original production documents, promotional material, correspondence, press clippings, and other curiosities.

In the latter part of the course, students will consider Capra's influence on later filmmakers, and the enduring idea of the "Capra-esque"

FILM372 Hong Kong Cinema
This course offers an introduction to the dynamic history of Hong Kong cinema from 1960 to the present day. The course will acquaint students with Hong Kong's major films, genres, directors, and industrial trends; explore the factors that enabled the Hong Kong film industry to become a regional and global powerhouse; and consider the reasons behind the contraction of the industry since the mid-1990s and the outlook for Hong Kong cinema's future. Screenings will feature the films of Fruit Chan, Jackie Chan, Peter Chan, Chang Cheh, Mabel Cheung, Tony Ching Siu-tung, Chor Yuen, Stephen Chow, King Hu, Ann Hui, Michael Hui, Stanley Kwan, Andrew Lau & Alan Mak, Li Han-hsiang, Lo Wei, Johnnie To, Cecille Tong, Tsui Hark, Wang Tian-lin, Wong Kar-wai, John Woo, Corey Yeun Kwai, Toe Yuen Kin-to, and others.

FILM379 The Artist on Film
How can we get the essence of a painter, dancer, musician on film? The Artist on Film comes with the aesthetic challenge of translating artistic expression from one medium to another. Part of the problem is that the reason artists interest us in the first place is that they transmitted themselves so effectively into a different shaped box. We will consider what cinema shares with its neighboring arts, how it can evoke other media, and how distinctions between art forms shape our experience. Through creative assignments, this class will look at how filmmakers tackle the challenge of creatively representing artists and transforming their works into a new medium. This course is taught in the Basinger tradition of combining filmmaking with film watching. It is taught by a writer/director and a particularly good course for those interested in screenwriting and/or directing, but all cinephiles are welcome. The course is designed for majors but will consider sophomores who have completed 304 and 307. Assignments are screenplays and the course will not be covering basic screenwriting format, so some coursework or familiarity with screenwriting is recommended. Class will consist of two screenings a week with lecture and discussion.

FILM381 The Films and Influences of Martin Scorsese
Martin Scorsese is a student of the cinema who, for over 60 years, has openly processed his fascination with the medium into strikingly original work. His fiction features--such as Raging Bull and Goodfellas--and documentaries--such as Italianamerican and Rolling Thunder Revue--exhibit the same love for cinema that motivates his parallel efforts as film historian and preservationist. His directorial style has continued to evolve across his career, finding new approaches to form and content that engage and provoke audiences. In this course, students are asked to: - Define Scorsese's film style and its evolution over time. - Make comparisons between Scorsese's work and films from which he drew inspiration and reference. - Navigate the confrontational "push-and-pull" around difficult protagonists in social worlds defined by sexism, racism, and violence. - Develop tools of film analysis and an understanding of cinema that they can, in turn, carry into their own academic and creative work.

FILM383 History and Practice of Television Writing
This course offers a historical/industrial introduction to American television, and uses that as a springboard into analytical and creative exercises. Each unit will involve students viewing TV episodes (outside of class time) that are bound by theme, genre, production context, etc. These will serve as the foundation for in-class lecture and discussion on the industry and the decision-making of television creators. At the end of each unit, students will work on a culminating assignment of either analytical or creative writing. Key learning goals for the course: - An overview of television history: industry, censorship, technology, culture, and storytelling. - Identifying key concerns and parameters that affect creative decision-making, and how TV writers/creators work within them to respond to and reflect the concerns of their era. - Having students generate their own TV writing from imposed prompts/restrictions

FILM384 Documentary Storytelling
This course explores the range of approaches, methods, and techniques employed by documentary filmmakers to tell their stories. After an introduction to elements of creative nonfiction storytelling, we will spend the semester looking at films organized by topical lens. Through close reading of documentary texts, filmmaker statements and academic writing, we will examine how past and current documentaries successfully -- and sometimes unsuccessfully -- have tackled a wide variety of subject areas. During the semester, students also will develop an original documentary film idea based on a book or long magazine article and demonstrate their storytelling knowledge through final verbal pitches and a pitch deck. Industry guests visit to share their insight into documentary storytelling and provide students with additional pitch feedback.

FILM385 Introduction to Documentary
This course provides foundational knowledge for documentary filmmaking introducing students to the history and aesthetics of documentaries and exploring international nonfiction filmmaking from the origins of cinema to the end of the 20th century. The writings of film theorist Bill Nichols, including his influential documentary modes, play a central role in the course. Students learn how documentary has been defined and redefined through the study of how filmmakers were inspired by the concerns and technology of their age. This course also addresses issues of accountability, representation, access, and ethics in documentary filmmaking.

Prereq: **FILM304**

FILM386 Cinematic Language of Documentary
Drawing from documentaries produced since the advent of television, this course deconstructs the cinematic tools employed in the art of documentary filmmaking. We will explore how cinematography, sound, performance, mise-en-scène, and editing as well as archival material, character/subject, and location/place operate to serve filmmakers' storytelling goals. Students will learn how technological changes through to the present have influenced creative and practical filmmaking choices as well as brought forth issues of accountability, representation, access, and ethics. This class provides an opportunity for students to realize that the lines between documentary and fiction film are more porous than typically appreciated.

FILM387 Seminar on Television Series and Aesthetics
Through frequent viewing of episodes, classroom discussion, and written exercises, students will consider television programs over multiple seasons and series as they work to describe and differentiate models of television series construction. Of primary interest is the creative decision making that goes into creating this commercial art form--recognizing patterns of intention, choice, and effect; how these operate on a variety of scales; and what attitudes a program may manifest toward the medium and the viewer. Series viewed may include I LOVE LUCY, ATLANTA, THE X-FILES, RUSSIAN DOLL, and others, including student-generated selections.

FILM388 Global Film Auteurs
This course offers a comparative introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical, cultural, and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion. Screenings will include films directed by Andrea Arnold, Julie Dash, Fernando Eimbcke, Don Hertzfeldt, Krzysztof Kieslowski, Akira Kurosawa, Steve McQueen, Jafar Panahi, Satyajit Ray, Ousmane Sembène, Céline Sciamma, Wong Kar-wai, Agnès Varda, Yim Soon-rye, and Zhang Yimou, among others.

FILM389 Film Genres: The Western
Once the most popular Hollywood genre for decades, the Western still has a palpable impact on the form and content of present-day cinema. This course is devoted to aesthetic and cultural analysis of key films belonging to the Western genre throughout its more than 100-year history. Our aesthetic approaches will include discussions of typical components of the Western, authorship in the Western, narrative structure, and the construction of the West via visual space and sound. Our cultural analysis will place particular emphasis on the myth of the frontier, the relationship between the Western and political rhetoric, and the genre's treatment of race, ethnicity, and gender. Roughly equal weight will be placed on these two approaches. We will also address the historical trajectory of the Western from its early silent days through its decline in the early 1970s to its present-day status.

Prereq: **FILM304 AND FILM307**

FILM390 History of Film Sound
Sound is one of the most powerful tools at a filmmaker's disposal, yet in comparison to visuals, it remains difficult to describe and poorly understood. This course aims to do for the ear what film studies more commonly does for the eye by examining basic sound practices over the course of narrative film history. Focusing especially on U.S. cinema, but also devoting time to sound-conscious auteurs, we will develop an understanding of basic film-sound methods, look at more experimental uses, and track the technological developments of sound from its beginnings to the present day. The focus throughout the course will be on how such elements as music, sound effects, dialogue, and even silence play covert yet vital roles in telling stories and affecting viewers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM391 Sex and Violence: American Film-making Under Censorship
This course examines how US filmmakers have used narrative and stylistic techniques to address censorship requirements in US cinema. Though the course will cover early cinema through recent cinema, a major emphasis will be placed on studio-era filmmaking from 1930 to the 1950s, when censorship was at its tightest. Through close film analysis, we will examine how censorship altered films and how filmmakers manipulated film form and style to convey their intended meanings. Our analysis will serve as a way to reflect broadly on methods for making films within constraints, the range of cinematic techniques available to filmmakers, and how creative decisions can impact viewers.
Offering: **Host**
Grading: **A-F**

FILM392 Cinema Stylists: Sternberg, Ophuls, Sirk, Fellini
This course analyzes the films of four international renowned auteurs--Josef von Sternberg, Max Ophuls, Douglas Sirk, and Federico Fellini--whose work is consistently defined by the use of highly noticeable, expressive, and even dazzling stylistic techniques. The course will cover the major works of all four filmmakers and will examine each director's films in terms of narrative techniques, personal worldview and--especially--a distinct set of stylistic concerns. Relevant film style topics will include, but are not limited to, lighting, set design, costume, camera movement, color, sound, and editing. Studying these four filmmakers will reveal how filmmakers can define cinema in deeply personal terms and employ a flashy--even flamboyant--style to achieve their goals.

FILM394 Afrofuturist Cinema
In Space is the Place, jazz musician and cosmic philosopher Sun Ra states that "the first thing to do is to consider time as officially ended. We work on the other side of time." Afrofuturist narratives tend to unfold in this inverted time, or "after the end of the world." In this class, we will begin our research in the loop of Sun Ra's speculative refrain. We will examine cinematic depictions of hauntings, dystopias, aliens, the surreal, and space travel. We will discuss works by Anisia Uzeyman, Ryan Coogler, Wanuri Kahui, Ngozi Onwurah, Terrance Nance, Jordan Peele, Mati Diop and more.

FILM395 Autobiographical Storytelling
How do filmmakers and writers negotiate memory, identity, and the author's voice to create original work drawn from life? Through analysis of a broad range of autobiographical narratives by experimental, documentary, and fiction filmmakers and writers, we will investigate various modes of working with personal source material, and explore the capacity and complexities of family and individual narratives to showcase diverse perspectives and interrogate assumptions about the self on screen. Inspired by the films and writing we will study, the creative work produced in this course may be drawn from a variety of sources: one's own lived experience, the lived experience of a family or community member, an event, a place, an artistic and/or cultural tradition. Thinking through the fluid nature of autobiography and the vast range of narrative possibilities for representing autobiographical material on screen will be part of class discussions. In this reading- and writing-intensive course, students should expect to spend several hours reading and writing outside of class per week. For most class periods, students will use Perusall to read and annotate either scholarly articles or pieces of autobiographical writing, or to read and comment on their peers' screenplays via Google Drive. Weekly screenings and readings may include work by Pedro Almodovar, Chantal Akerman, Radha Blank, Julie Dash, Mati Diop, Nathalie Léger, Barbara Loden, Lucrecia Martel, Jonas Mekas, Nanni Moretti, Alice Rohrwacher, Céline Sciamma, Agnès Varda, and others. In addition, the course will include screenings and discussions of videographic criticism (e.g., audiovisual work that critically reappropriates existing works of film and media).

FILM396 Black American Cinema
What is Black Cinema? Is it, as Tommy Lott has claimed, a critical form of filmmaking that resists the "Hollywood master narrative"? Or, as Michael Gillespie claims, does it elaborate Black visual and expressive culture without any pressuposed commitment to a "real" Black lifeworld? While these are critical questions that we will encounter in this class, we will not attempt to answer them. The class surveys a wide range of films to tell a conceptual story about the complex relationship between Blackness and cinema. We will discuss works by filmmakers such as Melvin Van Peebles, Oscar Micheaux, Spencer Williams, Kathleen Collins, Charles Burnett, Julie Dash, Ayoka Chenzira, and more.

FILM397 Cinema and City in Asia
This course will look at the representation of the city in Asian cinema. It will explore links between urban and cinematic space across a range of thematic, historical, and cultural concerns. We will watch a wide range of films from China, Hong Kong, Japan, South Korea, Taiwan, India, Philippines, and Singapore--and learn to critically examine the ways in which cinema becomes an innovative and powerful archive of urban life as it engages with the events and experiences that shape the cultural, social, and political realities of the past, present, and future in Asia. The course is open to all sophomores including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required. Among other assignments like videographic criticism, students will also have an opportunity to make short city films using their phone-cameras and readily available editing software as an option for their final class projects.

FILM430 Documentary Production
In this course, documentary history and theory meet production: "What does it take to make different style documentaries -- including observational, poetic, expository, participatory, and reflexive?" Students will explore documentary story elements and film grammar as they learn how to capture sound, record video, edit material, light subjects, conduct an interview, and work with archival materials, graphics, and music. They will learn through practice and by screening and analyzing a wide range of long-form documentaries made by a wide range of filmmakers.

Prereq: **FILM385**

FILM435 Directing the Documentary
Students embark on an intensive journey into the world of short-form documentary filmmaking through a hands-on course designed to help foster the emergence of their cinematic voices. The methods that many documentary filmmakers use to develop and craft their work serve as a model for the coursework. In a supportive environment, students engage in progressive learning to allow each to tackle many of the same key creative, practical, financial, and ethical decisions working researchers, directors, producers, writers, camera operators, sound recordists, and editors make during research and development, pre-production, production, and post. Students screen and analyze documentary shorts throughout the semester. During the first half of the semester, students complete exercises designed to help them to improve

their technical skills while completing research and development and a written proposal for a six-to-eight-minute documentary. In the second half of the course, students direct, shoot, and edit their work. Ongoing feedback during the entire semester is provided. The course includes self-directed online training assignments and in-class workshops. Students enrolled in this course should anticipate heavy and unevenly distributed time demands.

FILM448Z Directing Actors for the Camera
The actor is arguably the most important instrument in the director's arsenal for storytelling. This course aims to give students a set of tools to draw on when facing the actual task of telling a story through a lens with performers. Through discussions and exercises, we'll cover script analysis, casting, rehearsing, staging, framing, editing, and more. Emphasis will be on creating strategies for getting the desired performance. Students will be acting in scenes as well as directing them. The goal throughout is to demystify all elements and for each student to understand better what kind of director they want to be. The instructor has been a member of the Directors Guild of America since 1990 and a member of the Writers Guild of America since 1985. As director, writer, and producer, he has credits on over 500 episodes of television. Smartphones with cameras are strongly recommended and will be used for class exercises.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307**

FILM450 Sight and Sound Workshop
Film 450 explores the elements of cinematic form and style through filmmaking exercises. The focus of this course is to introduce concepts of narrative form and visual audio design in order to create coherent and emotionally engaging experiences for an audience. In other words: visual storytelling. Each exercise will challenge students to address both aesthetic and practical decisions in taking an idea from concept to the screen. Sections one and two provide technical training and practical experience in the 16mm film format, including lighting, cinematography, and editing. Section three (when offered) includes an introduction to digital non-linear editing and examines the differences between film and video. No assignments will have dialogue or synchronous sound recording. However, we will use this sound restriction to deepen our understanding of visual storytelling.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM451 Introduction to Digital Filmmaking
This course is designed for NON-FILM MAJORS to provide a basic understanding of how films are made, providing technical training and practical experience with digital video cameras, sound gear, and lighting equipment. Through a series of exercises, students will refine their critical and aesthetic sensibilities and develop a basic understanding of how to use composition, lighting, sound, and editing to tell a story. No required time demands out of class. The course format is Lecture with Technical Exercises
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **None**

FILM453 The Art and Craft of Film Adaptation
Film adaptations of literary texts have been a staple of cinematic production from the silent era to the present day, and remain both an enduringly popular phenomenon and an occasional source of derision or disbelief: Can the movie ever be as good as the book? In this course we will interrogate the long-held assumption that source materials for adaptations are the authoritative texts while secondary works are necessarily inferior. Adopting a lateral approach that allows us to examine how stories change and are changed by new iterations and new mediums, we will examine the varied modes, motives, and techniques of film adaptations, analyzing how filmmakers transform character, plot, setting, and point of view as they adapt varied source material into feature films. Students will be asked to annotate and analyze literary sources, film scholarship, screenplays, and films, and should expect to spend several hours reading and writing outside of class time per week. In addition to film analysis assignments and in-class writing exercises, students will create an original adapted screenplay treatment and pitch deck.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM454 Screenwriting
This course focuses on writing for the screen, with emphasis on how the camera tells stories. We will be focused exclusively on the screenplay.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307**

FILM455 Writing for Television
This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsize, and pitch a story idea with their "producing partners" to "network executives." Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Identical With: **WRCT256**
Prereq: **None**

FILM456 Advanced Filmmaking
This workshop is designed for senior film majors who, having successfully completed FILM450, are prepared to undertake a thesis film project. Because of space and equipment, the number of projects that can be approved is limited. Students must petition for enrollment by proposal at the end of their junior year. Production costs are borne largely by the student.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM450**

FILM457 Advanced Filmmaking
This workshop is designed for senior film majors who, having successfully completed FILM450, are prepared to undertake an individual or small team project. Because of space and equipment, the number of projects that can be approved is limited. Students must petition for enrollment by proposal at the end of their junior year. Production costs are borne largely by the student.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM450**

FILM458 Screenwriting: The Short Film
This is a writing course and study of the short film that will start from ground zero: separating the screenplay from other forms (e.g., the play and the novel), and grounding students in visual language as the basis of the medium. How do we write in pictures? We will study four feature screenplays, but place particular emphasis on how to scale a project for the short form. We screen 12 short films in class, and perform case studies of previous student films from first draft to finished film. This course is designed for students intending to make a film or write a screenplay for their thesis. The course prioritizes majors, but will consider sophomores who have completed Film 304 and 307 and intend to major.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM 307**

FILM458Z Screenwriting: The Short Film
Since watching movies (good ones) is so easy and pleasurable, screenwriting is a medium that everyone's uncle thinks they can do. But anyone who has had to read an amateur screenplay knows different. This is a writing course that will start from ground zero: separating the screenplay from other forms, e.g., the play and the novel, and grounding students in visual language as the basis of the medium. How do we write in pictures?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM459 Writing for Television II
This advanced course requires that each student act as writer, producer/network executive, and lead discussant on one of the professional scripts we read. Students will be responsible for two meetings with the professor during the semester, two to three meetings with their producing partners, and one meeting with their actors (who will perform a short scene from the student's script at the end of the semester). Each student will conceive of and pitch three story ideas in the first classes, winnowing down to one idea for which they will write a story area, an outline, and a final script (which will go through three major revisions). Students are expected to come to class with a background in creative writing, focusing on character and dialogue as well as having completed one TV screenplay.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

FILM460 TV Writer's Room
This course will introduce television series structure, including both the half-hour and one-hour formats. We will start by analyzing familiar shows and then each student will write original scenes for discussion in class. We will then develop an original series idea in class as a group and function as a "writers room" would on a series. Each student will be required to write equal parts of the outline/beat sheet, develop characters, and write/revise scenes, with the goal of executing a full pilot script in collaboration with one another under the guidance of the instructor. Grading will be based on weekly assignments, as well as regular attendance, class punctuality and attention to deadlines.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM304 AND FILM307**

FILM461 Directing with Nicholas Ray and Robert Bresson
This is a hybrid studies/production course taught by a filmmaker that looks at two iconic filmmakers to learn what directing is beyond talking to the actors. What is it we are directing when we pick up a camera or making a cut? Nicholas Ray and Robert Bresson are two artists who had opposite cinematic approaches to express their deep spiritual struggles. We are going to compare these two seekers as a way to deepen our understanding of film style. Assignments will be screenplays, storyboards, and other pre-production material for your own films. The last section will look at five modern filmmakers influenced by Ray and Bresson to focus on incorporating their influence into your own work.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307 AND FILM304**

FILM465 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

FILM466 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**

FILM467 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **OPT**

FILM469 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

FILM470 Independent Study, Undergraduate
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

FILM480 Senior Film Production: Senior Capstone
This is a project-based class for seniors who have taken FILM 450 (Sight and Sound). Each student will write and direct a six-minute short fiction film to be produced collaboratively by members of the class. We will use a small-crew model with students working on one another's films. Completed films will be screened for the Wesleyan campus at the end of the term.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Prereq: **FILM307 AND FILM304 AND FILM450**

FILM491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

FILM492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

FILM503 Selected Topics, Graduate Sciences
Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.
Offering: **Host**
Grading: **OPT**

FILM504 Selected Topics, Graduate Sciences
Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.

Grading: **OPT**

FILM591 Advanced Research, Graduate
Investigation of special problems leading to a thesis.
Offering: **Host**
Grading: **OPT**

FILM592 Advanced Research, Graduate
Investigation of special problems leading to a thesis.
Offering: **Host**
Grading: **OPT**

COLLEGE OF INTEGRATIVE SCIENCES

The College of Integrative Sciences (CIS) aims to equip students with the creative and quantitative skills needed to address current and emerging global challenges in science and technology. These challenges are multifaceted, requiring problem-solving approaches that integrate expertise from multiple perspectives.

The CIS promotes an interdisciplinary and integrative approach to scholarship and learning across mathematics and the life, physical, and behavioral sciences. By encouraging creative synergies among faculty and students of disparate disciplines, the CIS academic structure complements existing departments and has the flexibility to evolve with the needs of an ever-changing world.

Research is key to the CIS. With a faculty mentor, student researchers pursue inquiry-based learning that explores open questions and provides new perspectives. They develop the necessary problem-solving skills and build expertise at the frontiers of science. Through research, students are transformed from consumers into creators of knowledge.

Students interested in the CIS are advised to follow a course of study that emphasizes a core science background, achieved by pursuing a major in one of the departments or programs in natural science and mathematics (NSM). The linked major offered by the CIS combines the intellectual depth in one area (the major) with breadth achieved through courses and research in the linked major.

Master of Arts in the College of Integrative Sciences (p. 357)

CIS101 Success in STEM Seminar
This weekly seminar series will provide participants with tools and skills helpful in the pursuit of STEM studies, especially with introductory courses in STEM fields (biology, chemistry, physics, and mathematics). In particular, this seminar series is designed to facilitate the transition from high school academics to collegiate-level studies, and it is available only for first-year students.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS115 Experiential Design and Application
This course, co-taught with Director of Physical Plant Operations Mike Conte, will allow students to work directly with Facilities employees to design and

execute modifications and repairs to existing Wesleyan spaces. The specific projects will change from semester to semester, but could include designing and building informal learning spaces, and planning and carrying out repairs and modifications to mechanical and plumbing systems. Students will learn design and engineering by carrying out projects to improve Wesleyan's facilities. Students must be willing to work with tools and machinery with supervision. The grading in this quarter-credit repeatable course will be based primarily on active participation, and the class meetings will be held on location and at times built around participants' schedules.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS121 Wesleyan Mathematics and Science Scholars Colloquium I
This weekly colloquium of participants in the Wesleyan Mathematics and Science Scholars (WesMaSS) Program will provide participants with a framework for taking full advantage of the educational opportunities in the natural sciences and mathematics available at Wesleyan. Class sessions and assignments are designed to help students to develop effective individual and group study skills, to promote cohort-building, and to navigate the "hidden curriculum" in higher education.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS122 Wesleyan Mathematics and Science Scholars Colloquium II
This weekly colloquium of participants in the Wesleyan Mathematics and Science Scholars (WesMaSS) Program will be focused on strategies for success in science and math higher education.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS135 Mindfulness
During this course, students will be introduced to various techniques of mindfulness practice and awareness, including sitting meditation and yoga. These modalities are designed to aid in stress and anxiety reduction and, when practiced diligently, may also offer opportunities for greater self-awareness and personal development. The goal is to give students not only a peer community but also a contemplative and metacognative toolbox that is portable, replicable, and sustainable. Students will gain an understanding of the roles these practices can play in leading a happier, healthier, and more fulfilling life.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-CIS**
Identical With: **CSPL135**
Prereq: **None**

CIS135Z Introduction to Mindfulness
In this retreat-style, experiential course, students delve into a set of practices meant to cultivate self-awareness, alleviate the impact of the stress response, and move attention to the present moment. During this 10-day class on contemplative practices, students will be introduced to various individual and relational techniques developed to cultivate non-judgemental attention and self-awareness in the present moment, as well as metacognitve learning strategies.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-CIS**
Identical With: **CSPL135Z**
Prereq: **None**

CIS154 Working with MATLAB
The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC154, IDEA154**
Prereq: **None**

CIS160 Life in the Oceans in the Anthropocene and Beyond
Little is known about life in the deep sea, the largest habitat on Earth, even about the largest animals living there, such as the giant squid. Humans, however, are severely affecting even these most remote areas of our planet, and wildlife populations in the oceans have been badly damaged by human activity. We will look at the amazing diversity of ocean life and the disparate building plans of its animals, and see how oceanic ecosystems are fundamentally different from land ecosystems. Then we will explore how human actions are affecting oceanic ecosystems directly, for instance by overfishing (especially of large predators and filter feeders), addition of nutrients (eutrophication) and pollutants, and the spread of invasive species, as well as indirectly, through emission of carbon compounds into the atmosphere. Rising atmospheric CO2 levels lead to ocean acidification and global warming, affecting the all-important metabolic rates of ocean life, as well as oceanic oxygen levels and stratification, thus productivity. We will try to predict the composition of future ecosystems by looking at ecosystem changes during periods of rapid warming in the geological past and see whether future ecosystems will become dominated by jellyfish, as they were 600 million years ago.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES160, BIOL160**
Prereq: **None**

CIS170 Introduction to Mechanical Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA170, PHYS205**

Prereq: **None**

CIS170Z Introduction to Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Crosslisting**

Gen Ed Area: **NSM-CIS**
Identical With: **IDEA170Z, PHYS170Z**
Prereq: **None**

CIS173 Introduction to Sensors, Measurement, and Data Analysis
This course is an engineering fundamentals course supporting the Integrated Design, Engineering, and Applied Science (IDEAS) minor. It will involve a sequence of hands-on projects that introduce students to basic measurement devices and data analysis techniques using inexpensive modern sensors, a microprocessing platform (Arduino), and a computational software package (Matlab). The course will provide foundational knowledge of available resources and techniques that allow students to more confidently implement measurement systems in subsequent courses of the IDEAS minor and better understand experimental devices used in scientific research activities.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA173**
Prereq: **None**

CIS175 Introduction to Electrical Design & Engineering
Students will learn about engineering mechanics, electronic control systems, and physical actuators (e.g., for movement) using a microprocessor platform, sensors and motors. The final project will require a student team to ideate, design, analyze, and optimize a mechatronic system. This course will allow students to better understand components, methods, and challenges in mechatronics systems commonly found in automation and robotics.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **IDEA175, PHYS206**
Prereq: **None**

CIS185 Creative Coding
This course provides a practice-driven introduction to design and expression with code. Students will learn elemental procedural programming skills and gain experience with software design and interactive art by developing a portfolio of digital projects of increasing complexity and scale. It is designed to establish fundamental cross-disciplinary intuition and knowledge for future use in the CoDES program as well as to provide a vector of artistic fulfillment. The course uses Processing and the Java programming language to facilitate the creation of visual, interactive digital sketches.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **IDEA185**
Prereq: **None**

CIS185Z Form and Code
This introductory survey explores practices in design and digital media through a sequence of design exercises, workshops, and hands-on projects. Advancing towards an independent final project, participants will hone their skills as makers and thinkers while developing a portfolio of original work for both print and web. While primarily concerned with visual experimentation and expression, this course exposes students to critical topics in media and design through readings, seminars, and student presentations. Techniques surveyed in this course include: digital graphics, creative coding, and digital fabrication (if taught in person).

Students will require access to a personal computer and Adobe Creative Cloud. If the course runs remotely, students are responsible for locating these resources individually.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Identical With: **IDEA185Z**
Prereq: **None**

CIS210 How Things Fail: Mechanics and Materials
This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium, force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will entail design, implementation, and testing of an optimized model of a structure.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **IDEA210, PHYS210**
Prereq: **IDEA170 AND (PHYS111 OR PHYS113)**

CIS213 Informal Science Education for Elementary School Students I
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary-age children in an afterschool program taking place at five local elementary schools. The classroom components include writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B213**
Prereq: **None**

CIS214 Informal Science Education for Elementary School Students II
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary-age children in an afterschool program setting at five local elementary schools. The classroom component includes writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class. This course is a continuation of CHEM241.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CHEM**
Identical With: **MB&B214**
Prereq: **None**

CIS221 Research Frontiers in the Sciences I
This seminar is designed to introduce students to the exciting and cutting-edge research activity at Wesleyan across all the sciences and mathematics, and to introduce faculty with active research labs to students interested in working in a lab. The course showcases what research at the college level actually entails, and which projects Wesleyan faculty are actively researching. CIS 221 is scheduled in the fall, CIS 222 in the spring. Both are gateway classes to admission into the CIS, but also recommended to students broadly interested in the sciences who have not yet decided on a major. There is no overlap in speakers between CIS 221 and CIS 222, and students may take both.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS222 Research Frontiers in the Sciences II
This seminar is designed to introduce students to the exciting and cutting-edge research activity at Wesleyan across all the sciences and mathematics, and to introduce faculty with active research labs to students interested in working in a lab. The course showcases what research at the college level actually entails, and which projects Wesleyan faculty are actively researching. CIS 221 is scheduled in the fall, CIS 222 in the spring. Both are gateway classes to admission into the CIS, but also recommended to students broadly interested in the sciences who have not yet decided on a major. There is no overlap in speakers between CIS 221 and CIS 222, and students may take both.

Credits: **0.50**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS239 Proseminar: Machine Learning Methods for Audio and Video Analysis
In this course, students are introduced to machine learning techniques to analyze image, audio, and video data. The course is organized in three parts, and in each part we will first introduce how these nontraditional data can be converted into appropriate (mathematical) objects suitable for computer processing, and, particularly, for the application of machine learning techniques. Students then will learn and work with a number of machine learning algorithms and deep learning methods that are effective for image and audio analysis. We will also explore major applications of these techniques such as object detection, face recognition, image classification, audio classification, speaker detection, and speech recognition.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC239**
Prereq: **COMP112 OR QAC155 OR QAC156 OR COMP112Z**

CIS241 Introduction to Network Analysis
This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-QAC**
Identical With: **QAC241**
Prereq: **None**

CIS251 Data Visualization: An Introduction
This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC251**
Prereq: **None**

CIS251Z Data Visualization: An Introduction
This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information, and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC251Z**
Prereq: **None**

CIS263 Demystifying Data: Introductory Data Analysis and Modeling
How do scientists make sense of the data they collect, especially as datasets grow in size and complexity? In this course, students will learn fundamental concepts in data collection, statistics, and modeling through hands-on analysis of publicly available datasets from the COVID-19 pandemic. We will cover the effects of biases in data collection, models of epidemic growth and spread, and the principles of studying a rapidly evolving pathogen. While we will use motivating examples from the life sciences, students can expect to learn techniques and ways of thinking that will form a foundation for evaluating and analyzing data across scientific disciplines. Students will learn the basics of using the R programming language to visualize, analyze, and model data, so no previous programming experience is expected.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL263**
Prereq: **None**

CIS265 Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL265, MB&B265, COMP113**
Prereq: **[MB&B181 or BIOL181]**

CIS265Z Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics. MB&B/BIOL181 or POI: Those not meeting the prerequisite should contact the professor directly.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL265Z, COMP113Z, MB&B265Z**
Prereq: **MB&B181 OR BIOL181**

CIS266 Bioinformatics
This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL266, COMP266, MB&B266**
Prereq: **[MB&B181 OR BIOL181]**

CIS270 Systems Biology with Programming
Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology. Students will spend the first part of the course learning how to program in Python in order to model, simulate, and visualize these systems. No previous programming experience is expected.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL270**
Prereq: **BIOL181 OR BIOL181Z AND BIOL182 OR BIOL182Z**

CIS271 Systems Biology with Programming
This course is similar to BIOL270, but only meets in the second half of the semester with BIOL270 and is designed for students with a solid background in programming in Python. Systems--collections of entities that interact to form an interconnected whole--are present at every scale of organization in the life sciences. Biologists can take advantage of computational and mathematical tools to understand how these systems function and predict how they might change over time. This approach is critical in applications ranging from epidemic modeling to evolutionary theory. In this course, students will learn how simple rules and interactions can lead to complex behavior using examples from three main areas: regulatory networks, population genetics, and ecology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL271**
Prereq: **BIOL181 OR BIOL181Z AND BIOL182 OR BIOL182Z**

CIS284 Data, Art, and Visual Communication
This course looks at the ways the digital arts--broadly defined--can be used to explore the intersections of research, data, design, and art. Following a creative software "bootcamp," students will execute projects intended to help them generate, manipulate, and remix data for the purposes of visual communication and art. Students will use Adobe Creative Suite and Processing, an open source programming language, and integrated development environment (IDE) built for electronic arts, new media, and visual design. In addition to working in the studio, seminars, readings, and student presentations will explore the role of data visualization, "big data," and the web in culture and society today. No prior software knowledge or coding skills are required. Students working in STEM, humanities, and social sciences are encouraged to enroll.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST484**
Prereq: **None**

CIS285 Digital Projects Lab
This intermediate course in design engages form and process as vital lineaments in digital images, systems, and objects today. Through a series of short, hands-on, thematic projects, students will move past the basics of digital technique and challenge themselves to articulate how and why things appear as they do. Rather than focus on specific tools or software, assignments will straddle creative platforms and media, incorporating methods such as live signal processing, data moshing, remixing, and interaction design. Early assignments will address narrow thematic concerns while a long-term final project driven by students' own directives will be developed and executed in the second half of term.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **IDEA285**
Prereq: **None**

CIS307 Experimental Design and Causal Inference
The course provides the foundations and statistical thinking to design, collect, and analyze experimental data and introduces appropriate techniques for

observational data when causal inference is the objective of the analysis. Throughout the course, we introduce and compare various experimental designs. We will discuss sample size and power calculations as well as the advantages and disadvantages of each of these designs. With observational data, we will explore difference-in-difference models, propensity score matching techniques, regression discontinuity designs. This course gives students the opportunity to develop further their computational skills as we learn how to describe, interpret, control, and draw inferences from experimental and observational data.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC307**
Prereq: **QAC201 OR PSYC200 OR MATH132 OR ECON300**

CIS310 Genomics Analysis
This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL310, MB&B311**
Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

CIS321 Special Topics in Integrative Sciences
This is a special topics course open to all Wesleyan students to explore subjects that are at the boundaries of the canonical scientific disciplines, that are complex, and that have paramount societal impact (e.g., pandemics and public health, climate change, the search for life in the universe, and artificial intelligence and automation). There are also societal issues that deeply impact and are vital for all the sciences (e.g., diversity, equity and inclusion of our communities, federal funding, and science policy). We will collectively identify one or two topics that we would like to focus on together as a class. With disciplinary humility, we will construct a syllabus that will include readings, classroom discussions, presentations, guest lectures, and writing that will integrate our knowledge, methodologies, and action across the sciences. This course is part of the CIS major, and it is expected that all senior CIS majors will be enrolled.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS322 Senior Colloquium in Integrative Sciences
This is a special colloquium course focused on skills associated with science communication and, in particular, communicating student's own research to various audiences. Given the broad benefits that research has on society, and the federal funding derived from tax-payer dollars, scientists have an ethical obligation to communicate the results of their work to various stakeholders. In addition, scientists find that communicating and discussing their work with others is an invaluable method of idea generation. Finally, sharing our work with others is fun and gratifying, particularly at the end of a large project (e.g., a thesis)! These skills transcend our particular departments and are common across STEM fields. With disciplinary humility, we will engage in skill-building using various resources available to us on campus. There will be an opportunity for students to identify skill sets that they are particularly interested in, so that they can be incorporated into the course. There will be readings, classroom discussions, presentations, guest lectures, and visits to centers on campus. This course is part of the CIS major, and it is expected that all senior CIS majors will be enrolled.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

CIS323 Bayesian Data Analysis: A Primer
This course introduces the applied principles of Bayesian statistical analysis. The Bayesian paradigm is particularly appealing in research where prior research and historical data are available on parameters of interest. This course will teach students appropriate techniques for analyzing data of this nature as well as broaden computational skills in R. The course will lay the foundation for Bayesian data analysis that students can use to further develop skills in decision making.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC323**
Prereq: **MATH132 OR ECON303 OR GOVT367**

CIS327 Evolutionary and Ecological Bioinformatics
Bioinformatic analysis of gene sequences and gene expression patterns has added enormously to our understanding of ecology and evolution. For example, through bioinformatic analysis of gene sequences, we can now reconstruct the evolutionary history of physiology, even though no traces of physiology exist in the fossil record. We can determine the adaptive history of one gene and all the gene's descendants. We can now construct the evolutionary tree of all of life. Bioinformatics is particularly promising for analysis of the ecology and biodiversity of microbial communities, since well over 99 percent of microorganisms cannot be cultured; our only knowledge of these organisms is through analysis of their gene sequences and gene expression patterns. For example, even when we cannot culture most of a microbial community, we can determine which metabolic pathways are of greatest significance through analysis of community-level gene expression. All these research programs are made accessible not only by breakthroughs in molecular technology but also by innovation in the design of computer algorithms. This course, team-taught by an evolutionary biologist and a computer scientist, will present how bioinformatics is revolutionizing evolutionary and ecological investigation and will present the design and construction of bioinformatic computer algorithms underlying the revolution in biology. Students will learn algorithms for reconstructing phylogeny, for sequence alignment, and for analysis of genomes, and students will have an opportunity to create their own algorithms.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL327, COMP327, BIOL527, COMP527**
Prereq: **[BIOL182 or MB&B182] OR [BIOL196 or MBB196] OR COMP112 OR COMP211**

CIS330 Advanced Academic Writing
This course is designed to help students master the skills needed for thesis-level academic writing. The course uses an example-driven approach emphasizing an iterative revision process, with an emphasis on expository writing skills appropriate for publishable literature. Students will be encouraged to focus on their own independent research work as subject matter of writing exercises.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS530**
Prereq: **None**

CIS331 Video Games as/and the Moving Image: Art, Aesthetics, and Design
Video games are a mess. As a relatively new medium available on a range of platforms and in contexts ranging from the living room to the line for the bathroom, video games make new but confusing contributions to the meaning and possibilities of the moving image. We will work to understand what games are, what they can do, and how successful games do what they do best. Students will complete game design exercises, create rapid prototypes, playtest their games, and iteratively improve their games with play and their players in mind. They will complete analyses of games and game design projects both alone and in groups and participate in studio-style critiques of one another's work. Experience with computer programming is helpful but not essential.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-FILM**
Identical With: **FILM331**
Prereq: **None**

CIS340 STEM Equity and Inclusion
This course is open to all students at Wesleyan interested in learning about equity and inclusion in STEM. A weekly seminar will provide an overview of topics related to STEM equity, including the demographics of STEM fields, relevant sociology/psychology research (implicit bias, stereotype threat, impostor syndrome, mindset, etc.), ethics, social justice, and best practices for inclusive departments and programs. Students will be required to develop and evaluate proposals for activities to increase STEM equity and inclusion at Wesleyan, using the information provided during the seminar component of the course.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **CIS540**
Prereq: **None**

CIS350 Computational Media: Videogame Development
This course examines the interplay of art and science in the development of contemporary videogames using the Unity development platform and commercial artistic game tools. Students develop a comprehensive understanding of computational media, including legal and commercial aspects, combined with hands-on experience in a creative process that integrates design, art, and coding. There will be discussions with invited industry leaders in various subject areas. Students will have the opportunity to work as part of development teams and create working prototypes to better understand the challenges and rewards of producing graphic interactive software within a professional context.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **2.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **IDEA350, FILM250, COMP350**
Prereq: **None**

CIS375 Mass Extinctions in the Oceans: Animal Origins to Anthropocene
Geoscientists are debating whether we are living in the Anthropocene, defined as a period during which humans are having a significant effect on atmospheric, geologic, hydrologic, and biospheric earth system processes. There is considerable discussion whether we are indeed affecting the biosphere to such an extent that life on Earth will suffer an extinction similar in magnitude to these that have occurred during earth history. Studies of the fossil record provide unique evidence that is used to evaluate the large extinctions of the past and compare them to ongoing extinction processes, extinctions rates and patterns, and magnitude. Organisms with hard skeletons are most easily and most abundantly preserved in the rock record. Many of these are invertebrates that lived in the oceans (e.g., clams, sea urchins, corals). In the first part of this course, students will become familiar with the nature of the fossil record, the most common marine animals in the fossil record, and their evolution and diversification. Lectures will be combined with studying fossils. In the second part of the course, possible causes for mass extinction will be considered, together with their specific effects on environments and biota, and these predicted effects will be compared to what has been observed. Potential causes include asteroid and comet impacts, large volcanic eruptions, "hypercanes," and "methane ocean eruptions," and more exotic processes. Students will present in class on these topics, and we will compare rates and magnitude of environmental change with severity and patterns of extinction.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES376**
Prereq: **E&ES101 OR E&ES115 OR ASTR155 OR MB&B181**

CIS400 Professional Development and Graduate School Preparation Seminar
The objectives of this course are (1) to build a supportive cohort that will help students sustain their goals when they enter graduate school and (2) to provide students with skills they will need to succeed in graduate school. Students will work on writing, presentation, and discussion skills. This will be done by reading classic books on writing, critiquing the ability of different figures and graphs to convey information, reading and discussing scientific papers, and giving research presentations.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**

IDEA110 Vectors to Volumes: The Fundamentals of Digital Fabrication
This project-based course will cover the fundamentals of digital fabrication in a hands-on introduction to software-driven object making. The central concern will be process rather than concept, with a firm focus on how instead of why, as well as best safety practices. Instruction will be given in four areas sequentially, each building on the last: Vector Design & Execution, 3D Modeling & Printing, CNC Wood Routing, and CNC Metal Milling. Machine setup and best practices will be taught alongside foundational knowledge of applications such as Adobe Illustrator, Adobe Photoshop, Vectric VCarve, Autodesk Fusion360, and Ultimaker Cura. Throughout the course, there will be a consistent emphasis on fabrication methods and finishing techniques.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-IDEA, NSM-IDEA**
Prereq: **None**

IDEA111Z Origami Mechanisms: The Science and Math of Folding
Explore the cutting edge of origami sciences! Origami as a research field is the science of folding materials - not just paper - and has applications in material sciences, space exploration, the biomedical field, protein folding, and many

more! Anytime a material has to be transported in a closed state, transported, and then deployed, origami studies have a relevance. The course will involve folding, lectures, videos, guest video presenters, and time using the equipment of the IDEAS Lab to produce work. There will be one minor and one major project due that will use techniques learned during these class sessions. Course is 40 hours over two weeks (20 hrs/wk or 4 hours per day 5 days/week)

IDEA116 Introduction to Programming and Machine Knitting
Knitting is a fabrication technique with a long history, producing items from everyday garments to e-textiles. Since the invention of the first knitting machine in 1589, knitting technology has evolved significantly, leading to the sophisticated computerized knitting machines we use today. This course serves as an introduction to programming, computer science, and machine knitting, especially for students interested in textile design and making. Students will learn imperative programming using a high-level programming language, covering topics such as data types, control structures, functions, and objects. We will also cover how to program and operate a knitting machine. No prior knowledge in programming or knitting is required. This course provides an equivalent introduction to programming to COMP 112/113/114/115 and will satisfy any requirements or prerequisites that those courses satisfy.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA, NSM-MATH**

Prereq: **None**

IDEA120 Ecological Design I: Being at Home in the World
Being at Home in the World is an introduction to the skills and thinking involved in the ecologically responsible creation of objects. This course is intended to provide a foundational understanding of the language of design, sources of materials, and energy systems. The studio encourages students to develop a rigorous, iterative working method to deeply analyze the nature of land and resources, explore options, and test ideas. This process of making is complemented and supported by an introduction to the history and theory of design, training with techniques and equipment, and active practice in keeping a sketchbook. Early exercises and projects in the course build familiarity and confidence with analytical drawing, making, and modeling techniques, which build toward the creation of a novel piece of design work presented at the final review.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST220, ENVS232**
Prereq: **None**

IDEA154 Working with MATLAB
The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-QAC, SBS-QAC**
Identical With: **QAC154, CIS154**
Prereq: **None**

IDEA160 Fundamentals of Design I
In this introductory product design course, students will experience basic design processes such as problem identification and possible resolutions; the use of design development and communication skills via design observation and research; iterative process and prototyping; and representation and presentation in two and three-dimensional forms. Students will explore how design can play a role in our community and how it can impact our society. Students will work both individually and collaboratively in a studio environment. Field trips to New York City fabricators, galleries, and workshops may be expected as part of this course.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **HA-ART**
Identical With: **ARST270**
Prereq: **None**

IDEA170 Introduction to Mechanical Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS170, PHYS205**
Prereq: **None**

IDEA170F Introduction to Mechanical Design and Engineering (FYS)
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

IDEA170Z Introduction to Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in

identifying which scientific and engineering principles need to be understood to achieve design goals.

Gen Ed Area: **NSM-CIS**
Identical With: **CIS170Z, PHYS170Z**
Prereq: **None**

IDEA173 Introduction to Sensors, Measurement, and Data Analysis
This course is an engineering fundamentals course supporting the Integrated Design, Engineering, and Applied Science (IDEAS) minor. It will involve a sequence of hands-on projects that introduce students to basic measurement devices and data analysis techniques using inexpensive modern sensors, a microprocessing platform (Arduino), and a computational software package (Matlab). The course will provide foundational knowledge of available resources and techniques that allow students to more confidently implement measurement systems in subsequent courses of the IDEAS minor and better understand experimental devices used in scientific research activities.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS173**
Prereq: **None**

IDEA175 Introduction to Electrical Design & Engineering
Students will learn about engineering mechanics, electronic control systems, and physical actuators (e.g., for movement) using a microprocessor platform, sensors and motors. The final project will require a student team to ideate, design, analyze, and optimize a mechatronic system. This course will allow students to better understand components, methods, and challenges in mechatronics systems commonly found in automation and robotics.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS175, PHYS206**
Prereq: **None**

IDEA180 Design Studies
This course examines the human dimensions of engineering and design by looking at the ways artifacts are designed, produced, circulated, and used in context. Rather than a comprehensive survey of movements or paradigms in the history of design, this course employs a thematic approach to understanding the ways objects can articulate and reflect social and cultural concerns. Through a series of readings, projects, lectures, and seminars, we will study the surprising ways everyday objects influence and articulate our identities, desires, biases, and experiences.

This course is intended to support students in developing a critical toolkit for use as designers, users, consumers, and citizens. Throughout the term we will seek to challenge our assumptions about the politics of design and interrogate the ways its products mediate and are changed through human activity. We will write about and visualize these relationships, thinking critically how objects are made, what makes them relevant, and whether things have the power to change our economic, environmental, and social realities.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-IDEA**
Prereq: **None**

IDEA185 Creative Coding
This course provides a practice-driven introduction to design and expression with code. Students will learn elemental procedural programming skills and gain experience with software design and interactive art by developing a portfolio of digital projects of increasing complexity and scale. It is designed to establish fundamental cross-disciplinary intuition and knowledge for future use in the CoDES program as well as to provide a vector of artistic fulfillment. The course uses Processing and the Java programming language to facilitate the creation of visual, interactive digital sketches.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **CIS185**
Prereq: **None**

IDEA185Z Form and Code
This introductory survey explores practices in design and digital media through a sequence of design exercises, workshops, and hands-on projects. Advancing towards an independent final project, participants will hone their skills as makers and thinkers while developing a portfolio of original work for both print and web. While primarily concerned with visual experimentation and expression, this course exposes students to critical topics in media and design through readings, seminars, and student presentations. Techniques surveyed in this course include: digital graphics, creative coding, and digital fabrication (if taught in person).

Students will require access to a personal computer and Adobe Creative Cloud. If the course runs remotely, students are responsible for locating these resources individually.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Identical With: **CIS185Z**
Prereq: **None**

IDEA186 Text & Visual Imagination: Introduction to Eco Design for Performance
Eco-scenography is an introduction to design for performance. In this course, students will learn the core principles of design for performance while exploring sustainability and environmental practices with an emphasis on understanding of materials, such as production cycle and manufacturing process, as well as integrating environmental justice paradigms by analyzing specific case studies. Through three specific project-based assignments--1. object design, 2. garment design, and 3. environmental design--students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.

This course counts towards the Theater Arts category for the THEA major.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA185**
Prereq: **None**

IDEA187 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on

the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.
Offering: **Crosslisting**
Grading: **A-F**

Identical With: **CSPL187, FGSS187, SOC265**
Prereq: **None**

IDEA190 Digital Foundations
This course introduces the foundations of digital art through contemporary artistic practice. Students will research the history of digital art and examine relationships of digital media and contemporary art. The class has a theoretical focus on machine use within the process of art making while building foundational digital skills. Projects will focus on four key areas including: Digital Imaging, 3D Modeling and Virtual Design, Time Based Media, and Digital Fabrication. Building on these four areas the course will culminate in an individualized research based final project and presentation. Through experimentation, critical analysis, critique and peer review; students will generate a unique portfolio of digital art works.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST190**
Prereq: **None**

IDEA190Z Digital Foundations
This introduction to the digital studio engages software and electronic media as an expanded field of creative production in contemporary art and design. Through a sequence of workshops, exercises, and hands-on digital projects, students will develop their critical and creative toolkits and learn to conceive, refine, and present original work. Open to all skill levels, this course prioritizes sustained and rigorous engagement with digital practice as well as conceptual and formal problem-solving.

Workshops in image manipulation, compositing, motion graphics, and visual communication will be led synchronously online by the instructor. This will be complemented with weekly online studio sessions, discussions, screenings, and reviews. Students will be provided access to all course materials using Google Drive and other digital platforms. Access to Adobe Creative Cloud software will be provided by Wesleyan, but individual licensing is also encouraged. Course assistants will offer peer mentoring and technical support in person through the DDS and online through Zoom.
Offering: **Crosslisting**
Grading: **OPT**

IDEA200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

IDEA203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP203, ENVS203, ANTH212, STS203**
Prereq: **None**

IDEA204 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP204, ANTH214, ENVS207**
Prereq: **None**

IDEA205 The Technological Primate: Archaeological Approaches to Ancient Technology
Humans are reliant on technology, in one form or another, for our survival. This obligate use of technology has been a characteristic of our evolutionary history for over 2.5 million years. This course will explore how technology became central to the human way of life. We will discuss both how and why our use of technology has changed through time. This includes considerations of the adaptive roles that technology plays in our evolution, how technology is shared between individuals and cultures, and the role of technology beyond the purely utilitarian. Students will learn about the ways archaeologists analyze and think about ancient technologies. This includes a wide variety of material types, including stone, ceramic, botanicals, bone, metal, and more. In this course students will have an opportunity to handle both actual archaeological materials and replicas.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP210, STS211, ANTH210**
Prereq: **None**

IDEA206 Experimental Archaeology: Material Science and Past Behaviors
The field of archaeology requires practical ways to move beyond modern observations of materials to the invisible behaviors that produced them in the past. Experimental archaeology generates analogical models for archaeological processes by manipulating modern materials under controlled conditions. The principles established during experiments are applied to archaeological data to reconstruct the behaviors that produced the material record. This course will consider experimental design and practice to address issues relevant at different stages of the archaeological process. This is inclusive of replication of past technologies, experimenting with natural and cultural formation processes, and addressing biases inherent in the methods used by archaeologists. The course includes hands on experimental labs with different types of material culture and critical discussions of published experiments. Students will also be tasked with designing, executing, and reporting on an archaeological experiment.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **ARCP360, ANTH360, STS363**
Prereq: **None**

IDEA208 Technologies of Time
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk. This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will research and design speculative timekeeping devices or time machines for worlds otherwise.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS208**
Prereq: **None**

IDEA209 Educational Gaming Lab: Project-Based, Game-Based Pedagogy Approaches
In the past two decades, crowdfunding and renewed interest in games--board games, role-playing games, digital games, and instructional games--have created an increased and diverse gaming production, which has become the subject of several studies, articles, and projects related to all areas of education, from hard sciences to language learning and the arts. In an effort to explore how a game-informed pedagogy can work in various types of courses and to highlight analog and/or digital gaming approaches that have worked inside and outside the language classroom, this course will explore the basics of game-based learning (GBL) and discuss how games of all kinds can inform pedagogical discussions and the creation of learning materials. Educational Gaming Lab is designed as a project-based gaming laboratory that will focus on why and how analog games can be effective tools for pedagogy. Examples will include board games, tabletop role-playing games, escape games, and puzzles. Participants will discuss the application of gaming principles to various subjects and types of classrooms; then, they will engage in a final project in which they will either adapt existing games for specific learning outcomes or create brand new educational games. The course will be conducted in English and games will be created in English.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-EDST**
Identical With: **EDST210**
Prereq: **None**

IDEA210 How Things Fail: Mechanics and Materials
This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium, force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will entail design, implementation, and testing of an optimized model of a structure.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **CIS210, PHYS210**
Prereq: **IDEA170 AND (PHYS111 OR PHYS113)**

IDEA211 Materials and Design Concepts for Structures
This course explores innovations in materials and structural forms at the intersection of design, performance, and engineering. Students will connect the theory of structures with properties of materials to understand fundamental design principles in vaults, buildings, and bridges. Analyses of notable structures will illustrate the evolution of forms in response to natural forces and constraints of technology, economy, and time. Design exercises, discussion of readings, and laboratory experiments will introduce perspectives from ancient cultures to emerging techniques in contemporary works that are laser cut, 3-D printed, and robotically assembled. In course projects, students will pursue research in an area of interest and collaborate in teams to gain hands-on experience with building and testing scaled models of structures.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **None**

IDEA212 Metal Manufacturing Through the Ages: The Science Behind Metal and Impact of Metal in Society
Metal manufacturing has been key to societal change ever since humans first started using it, from the Bronze Age to the Iron Age to the Industrial Revolution

to today. In this course, we will explore the science behind why metal is so important, from the molecular level on up. We will study heating and cooling of metals, learn how the structure of metals affects their material properties, and get hands-on experience shaping metal with a variety of processes. We will follow the lifecycle of metal from ore to raw material to finished parts, as well as how it gets recycled. Students will build engineering skills in reading phase diagrams, analyzing heat transfer setups, and understanding the material properties of a wide range of metals. Students will build machining skills both in shaping metal by hand and with modern metal shaping methods.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170**

IDEA213 Design for Scale: The Nuts and Bolts of Mass Manufacturing
This course builds on the design skills from IDEA170 to give students practice in building not just a prototype, but a repeatable and functional design. The increase in quantity between prototype and production forces us to prioritize reliability and repeatability in our designs, and adds design for assembly, design for manufacturing, and design for inspection considerations. With the increase in scale, communicating design intent precisely through engineering drawings becomes a critical skill. Students will explore these design principles through a semester-long hands-on project designing, manufacturing, and analyzing a multi-part mechanism (figurine, toy, tool, machine, etc) of their own design. Injection molding will be our primary manufacturing technique, with additional use of vacuum forming, 3D printing, waterjetting, and plastic shredding. In addition to the central project, there will be in-class activities and homework on analysis techniques for mass manufacturing and design best practices.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170**

IDEA215 Introduction to Sensors, Measurement, and Data Analysis
This course is an engineering fundamentals course supporting the Integrated Design, Engineering, Arts, and Society (IDEAS) minor. It will involve a sequence of hands-on projects that introduce students to basic measurement devices and data analysis techniques using sensors, a microprocessing platform, and computational software. The course will provide foundational knowledge of available resources and signal processing techniques that allow students to more confidently implement measurement systems in subsequent courses of the IDEAS minor and better understand experimental devices used in scientific research activities. Students will complete a final team project of their choice (with approval) exploring areas of interest in measurement, data analysis, machine learning or other avenues. Some previous programming experience is expected. Prior experience in IDEA175 or with Arduino, Raspberry Pi, or other physical computing platforms are preferred, but not required.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-CIS**
Prereq: **None**

IDEA221 A Thousand Years of Iteration: Design for an Uncertain Future
The climate emergency is a product of design. Centuries worth of aesthetic and industrial innovation have created extractive infrastructure, efficient machines, and disposable products that make it increasingly easy to consume energy and resources on a global scale. As new conversations about just transitions, a circular economy, and a Green New Deal have begun to proliferate among designers, the discipline's troubled relationship to notions of "progress" remains largely unquestioned.

This reading- and research-intensive studio asks students to examine this history of technology and to critically evaluate shifting theoretical perspectives on nature and human development as they relate to design. Topics will include the lifespan of buildings and products, relationships with and obligations to materials and resources, and strategies for de-growth in indigenous and vernacular design precedents. These will be studied through assigned readings and in-class discussion, a series of design exercises, and the production of a final project from materials immediately at hand in Middletown.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST221, ENVS227**
Prereq: **None**

IDEA222 Fluid Mechanics: Theory and Applications
This course focuses on the behavior of fluids under various conditions. Students will develop a framework to analyze situations involving stationary (fluid statics) or moving fluids (fluid dynamics), discover tools used to predict fluid behavior, and learn how to interpret aspects of this behavior. Homework problems and examples reviewed in-class will help students connect theory with real-world applications, particularly in the areas of mechanical, structural/civil, and aerospace engineering. At the end of this course, students should have the ability to solve simple fluid problems and apply those solutions in complex engineering situations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

IDEA228 The Evolution of Audio in Interactive Entertainment; Creating Music with Limiting Technology
In the creative world, introducing limitations demands incredible innovation from an artist. Nowhere has this been truer than in video game audio. An entire generation has grown to hear complex worlds in just a small combination of oscillators and noise generators, and the lengths composers and sound designers went to craft those worlds is nothing short of astounding. In this course we will examine and emulate compositions which used the iconic sound architectures present in home consoles, taking us all the way from the implementation of Beethoven's Sixth Symphony in "Smurfs: Rescue in Gargamel's Castle" (1982), through David Wise's implementation of octave displacement in the NES classic "RC Pro-Am" (1988), the string of composers who all had to create homogeneous yet individualized soundtracks for the "Rockman" game series (starting in 1987), and landing in the nostalgic implementation of these architectures in the practically polar opposite games of SUDA 51: "Killer 7" (2005), "No More Heroes" (2007), and Toby Fox's "Undertale" (2015). Along the way we will cover sound design and emotional impact outside of chiptunes, one big example being the work of Akira Yamaoka in the "Silent Hill" (1999) series. This course will both serve as a survey of these games as well as contain practical projects, where you will be using tools to create work in a similar vein and where you will be presenting and dissecting the sound design of interactive entertainment which carries a particular meaning to you.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**
Identical With: **DDC228**
Prereq: **None**

IDEA229 Creating Audio in Interactive Worlds
Video games have struggled with the issue of audio repetition since their inception. Human existence thrives on entropy: our experience in the world is not defined by easily repeatable sequences, but by interacting with spontaneous behaviors and stimuli. Nothing takes a player out of a virtual world faster than countless NPCs saying "I used to be an adventurer like you, but then I took an arrow to the knee." Likewise, nothing destroys the ambience of a world faster than hearing the same combination of birds and running water over the course of hours. Thankfully, contemporary game design tools can make the process of emulating the natural world both possible and fairly intuitive. In this course we will examine the nature of what it means to create an organic-feeling virtual world and then employ the audio tools in the Unity engine, along with the adaptive sound design middleware FMOD, to craft organic sonic environments which will be both adaptive and varied. We will look at both historical implementations of ambience -- such as the Myst (1994) series -- as well as examine modern implementations of environmental audio. Special attention will also be paid to the theory and scholarship of audio in natural sonic environments outside of the realm of gaming, as these practices thrive when applied to virtual worlds.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DDC**
Identical With: **DDC229**
Prereq: **None**

IDEA230 Video Game Audio Design
In the creative world, introducing limitations demands incredible innovation from an artist. This course serves to develop a foundational approach to designing and composing audio for video games by exploring the historical practices and limitations in game audio, utilizing middleware pipelines to create audio in contemporary game engines, and developing a better understanding of the role sound designers play in a studio environment. We will examine and emulate compositions which employ the iconic sound architectures present in classic home consoles, taking us all the way from the implementation of Beethoven's Sixth Symphony in "Smurfs: Rescue in Gargamel's Castle" (1982), through David Wise's implementation of octave displacement in the NES classic "RC Pro-Am" (1988), on to the string of composers who all had to create homogeneous yet individualized soundtracks for the "Rockman" game series (starting in 1987), and landing in the nostalgic implementation of these architectures in the practically polar opposite games of SUDA 51 ("Killer 7" and "No More Heroes") and Toby Fox's "Undertale" (2015).

The contemporary unit of this course will examine the nature of what it means to create an organic-feeling virtual world and then employ the audio tools in the Godot engine, along with the adaptive sound design middleware FMOD, to craft living sonic environments which are both dynamic and varied. The skills developed in this course include basic music theory as it applies to video games, studio recording techniques (sound, music, and voice-over), knowledge of implementing audio calls and flags, and a general appreciation of sound in games.

Prereq: **None**

IDEA233 Studies in Computer-based Modelling and Digital Fabrication
This course operates at the intersection of design and production, introducing students to digital tools critical to contemporary architecture and design. Throughout the semester, students will develop a series of projects that fluidly transition between design, representation, and fabrication with an emphasis on understanding how conceptual design interfaces with material properties. The course will offer a platform for students to research, experiment, and, ultimately, leverage the potential of digital tools toward a wide array of fields and disciplines. Students will be expected to utilize the Digital Design Studio's resources, including 3D printers, laser cutter, and 4-Axis CNC mill, as well a selection of fabrication equipment housed in the school's metal and wood shops to represent, model, and realize a series of design projects.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST233**
Prereq: **None**

IDEA234 Architecture I
This course is a synthesis of fundamentals of design principles and introduction to design vocabulary, process methodologies, and craft. Emphasis is placed on developing students' ability to examine the relationship between production (the process of creating things) and expression (the conveying of ideas and meaning) involved in the making of architecture. The intent of the course is to develop students' awareness and understanding of the built environment as a result of the investigations, observations, and inquiries generated in the studio.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST235**
Prereq: **None**

IDEA235 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ALLB**
Identical With: **CSPL235, FGSS236, AFAM235**
Prereq: **None**

IDEA236 Fast & Furious
Fast and Furious is a class which explores the power of the multiple through the production of zines, posters, t-shirts, tote bags, pins and more. Beginning in the 1930s, the production of zines mainly in the sci-fi fan world became popular after the advent of the mimeograph--the first widely available duplicating machine. This way of making content was able to circumvent mainstream and institutional publishing models creating channels for more creatives to distribute their work. Today, there are even more technologies that can be used in the production of zeitgeist material. In this class, we will learn how to create with a Xerox machine, silkscreen, letterpress, polymer, and more. In each assignment we will contend with the power of quantity. What does it mean to make five of something? Ten? Fifty? One hundred? We will also experiment with format. How can a message be told through a wearable garment? How does the narrative change when it's a tote bag? And finally, we will explore the poetics of distribution. What are the artistic possibilities of a zine when it can be sent through the mail or left in a pile for the public?
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST236**
Prereq: **None**

IDEA243 Introduction to Graphic Design
This course will open your mind to the world of graphic design, both past and present. You will learn how to analyze and critique design in addition to how to present your work and convey your ideas to others. You'll explore various tools available to a designer including hand skills and computer software. Computers will simply be a possible tool to help complete each project - this is not a software class.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST243**
Prereq: **None**

IDEA246 Graphic Design: Website as Portfolio
Students will focus on the creation of an online portfolio of work as both an extension of their own practice and calling card for the world at large. Emphasis will be placed on the deployment of the site as a space for both interactive and graphic design and the development of writing about/documenting work and projects. Hard coding skills not necessary; focus will be on familiarization with user friendly sketching platforms, research organization systems, and out-of-the-box CMS for website development. Visiting artist talks will also be arranged.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST246**
Prereq: **None**

IDEA247 American Architecture and Urbanism, 1770-1914
This course considers the development of architecture and urbanism in the United States from the late 18th through the early 20th century. Major themes include the relationship of American to European architectures; the varied symbolic functions of architecture in American political, social, and cultural history; and the emergence of American traditions in the design of landscapes and planning for modern cities, especially Boston, New York, Philadelphia, Washington, D.C., Chicago, Los Angeles, and San Francisco. The course considers houses for different sites and social classes, government buildings, churches and synagogues, colleges, and commercial architecture of different kinds includes the origins of the skyscraper. Urban environments include cemeteries, public parks, streets, and civic centers. Discussion will be informed by recent historiography on race and the American built environment. Movements studied include neoclassicism, the Gothic and Romanesque revivals, the Chicago School, the Arts and Crafts movement, and the City Beautiful movement. Major figures studied include Thomas Jefferson, Benjamin Latrobe, Frederick Law Olmsted, Frank Furness, Henry Hobson Richardson, Louis Sullivan, the early work of Frank Lloyd Wright, Greene and Greene, Bernard Maybeck, Julia Morgan, and McKim, Mead and White.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA246**
Prereq: **None**

IDEA248 Frank Lloyd Wright: Myth and Fact
This course considers the architecture of Frank Lloyd Wright in the context of his own life and development as an artist and in the context of the broader history of modern architecture, of which Wright's work was a part and to which it contributed. The seminar also considers the relationship of Wright's achievements to the social, economic, technical, and ideological history of the United States from the mid-19th through the mid-20th centuries. A major theme will be critical reading of Wright's own statements about his life and work in relation to other sources, later accounts, and his buildings and projects themselves. Both Wright's residential and public architecture will be considered in conjunction with his designs for landscapes and urbanism. Architectural drawings will also be examined as a medium in themselves, along with textual and physical evidence, as a means of generating maximal insight into Wright's built and unbuilt works.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Prereq: **None**

IDEA254 Architecture of the 20th Century
The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-aided design from the 1990s, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa. Major movements and architects considered include the Viennese Secession, the Bauhaus, Le Corbusier, Mies van der Rohe, Frank Lloyd Wright, Alvar Aalto, and Louis Kahn, among many others.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA254, ENVS254**
Prereq: **None**

IDEA258 Contemporary World Architecture
This course is a study of architecture and urban design throughout the world from the 1990s to the present. American topics include public and private development in the "neoliberal" city in New York, Chicago, Los Angeles, and post-Katrina New Orleans; contemporary museum architecture; sprawl and New Urbanism; and affordable housing. Major American architects considered include Frank Gehry, Richard Meier, Daniel Libeskind, and Diller Scofidio + Renfro. In Europe, the focus is on contemporary public architecture in Berlin, London, Oslo, Hamburg, Paris, Valencia, Lisbon, Rome, and Athens, with attention to major works of Sir Norman Foster, Zaha Hadid, Jean Nouvel, Santiago Calatrava,

Rem Koolhaas, and Renzo Piano, among others. In China we will study state monuments of the Communist Party in Beijing and issues of preservation and urban development there and in Shanghai. In Japan the recent work of Tadao Ando, Kengo Kuma, and Shigeru Ban is a focus, as are selected projects by other architects in Tokyo, Yokohama, and Osaka. Additional lectures will treat airport architecture in Asia, and sites in India, Jerusalem, Cairo, Abu Dhabi, Guinea, South Africa, Nigeria, Rio di Janeiro, Chile, and Quito, Ecuador. The last quarter of the course focuses on green or sustainable architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling and ventilation, timber and rammed-earth techniques, LEED certification, wind and geo-exchange energy, green skyscrapers, vertical farming, and zero-carbon cities.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA258**
Prereq: **None**

IDEA261 Science Materials For a Malagasy Classroom
Students will design and produce a variety of educational science materials to be used in a fifth grade classroom in Madagascar. These items include a science logo, bookmarks, educational science games, posters, and a comic book with conservation themes for children. Students who are interested in design and natural history as a means through which to communicate science themes on wildlife endemism, evolution, and climate change would be appropriate for this course. All students will need to conduct independent research into science topics, distill down the salient features, and use that information to design elementary school materials. Working both individually and in teams, students will conceive, design, critique, and move into product production (MakerSpace). In addition, prototypes of the materials will be reviewed and rated by fifth graders in a Middletown elementary school for feedback.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL161, ENVS261**
Prereq: **None**

IDEA267 Engineering Biology: Cells and Tissues
This course explores the intersection of biology, medicine, and engineering, where scientists are developing novel platforms to promote understanding, diagnosis, and treatment of human diseases. We cover modern techniques for manipulating biological systems, spanning single molecules to ensembles of cells. We will examine the trajectory of the field from studying cells in a plastic dish to the advent of organ-on-a-chip and organoid models and discuss how this transition from 2D to 3D biology has propelled increased understanding of both normal physiological homeostasis and also the pathophysiology of disease. Topics will include controlling behavior of cells through cell-matrix interactions, learning through building via synthetic biology, and advances in regenerative medicine. These topics will be explored through the thematic lenses of transport processes (supply of nutrients and removal of waste) and mechanoreciprocity (the sensing of and response to the physical properties of the cellular microenvironment). Lectures will review fundamental concepts in cell biology and physiology before delving into topical examples from current literature. Lectures and assessments will include opportunities to develop skill in thinking analytically and critically about using engineering tools to study fundamental questions in human disease, formulating original ideas and experiments, and communicating science through written and oral formats.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL267, BIOL567**
Prereq: **BIOL208 OR BIOL212 OR BIOL218 OR BIOL228 OR PHYS207**

IDEA271 Designing With Living Systems: Soft + Hairy
In this part seminar, part studio course, students will go on field trips and read extensively to develop an understanding of mycelium and how it is explored in design. We will explore temporality in design with particular focus on how biodegradable materials such as mycelium can form our experience of an object. We will study how mycelium can be utilized as a living material to form a built ecology. In particular, we will study how to design for impermanence -- sometimes using waste materials -- and develop an understanding for material recovery. Students will work both individually and collaboratively in a studio environment. Field trips to New York City museums, fabricators, and galleries, as well as around CT may be expected as part of this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST271, ENVS271**
Prereq: **ARST131 OR IDEA110 OR IDEA180**

IDEA275 Introduction to Archaeological Science: Natural Science Approaches to the Human Past
While archaeology is considered by many to be a social science, natural science approaches are increasingly utilized by archaeologists to explore past environments and behaviors. Archaeological science is defined as the application of scientific techniques from biology, chemistry, geology, and other natural sciences to archaeological materials. This course will survey the different scientific techniques employed by archaeologists and highlight their utility for exploring the human past through archaeological case studies. Students will consider how the integration of natural and social science approaches produces a more complete understanding of the archaeological record. This includes the reconstruction of climates, landscapes, diets, migrations, population interactions, production behaviors, chronologies, and more. Students will learn the basics of the archaeological applications of ancient DNA, stable isotopes, sedimentology, geochemistry, chronometric dating, 3D scanning, morphometrics, botany, zoology, and other scientific methods.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP**
Identical With: **ARCP275, ANTH275, STS275**
Prereq: **None**

IDEA283 Drones and Change
Civilian use of unoccupied aerial vehicles or drones to capture data and measure change can enhance our understanding of the natural and built environments. While drones are increasingly available for entry-level to professional level adoption, there remains value in understanding how the infrastructure for their development and deployment have evolved and what is required to ensure their continued safe and ethical utility of these devices. In this class, we will explore the legal and infrastructure elements of drone development and deployment for civilian utility of drones, while working on data collection, analysis, and interpretation that will allow students to better appreciate the value and utility of drones. Over the course of the semester, students will work on understanding and building drones, collecting data with small drones, examining the commercial versus open-source platforms for drones, and preparing to take the Federal Aviation Authority Part 107 license to allow them to fly drones safely.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES283, ENVS269**

Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197**

IDEA285 Digital Projects Lab
This intermediate course in design engages form and process as vital lineaments in digital images, systems, and objects today. Through a series of short, hands-on, thematic projects, students will move past the basics of digital technique and challenge themselves to articulate how and why things appear as they do. Rather than focus on specific tools or software, assignments will straddle creative platforms and media, incorporating methods such as live signal processing, data moshing, remixing, and interaction design. Early assignments will address narrow thematic concerns while a long-term final project driven by students' own directives will be developed and executed in the second half of term.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-CIS**
Identical With: **CIS285**
Prereq: **None**

IDEA286 Introduction to Time-Based Media
This introductory course offers a comprehensive exploration of time-based media in the expanded field, providing a foundational skillset for students interested in fine arts and media practices, yet open to all majors eager to develop their creative and critical voice. A core focus of the course is the act of making, which will be coupled with an investigation into how video can transform our relationship with ourselves, others, and the material world. Through screenings of historical and contemporary video art, we'll investigate theoretical frameworks, asking critical questions such as: What sorts of videos do we consider "art," and how might we use video as a tool for empathy, accountability, and aesthetic inquiry?

Students will build essential practical skills through regular technical exercises and hands-on projects, including camera operation, sound recording and design, lighting techniques, and video and sound editing, utilizing industry-standard software and various capture devices. Each assignment will be contextualized through group discussions and readings, investigating established video art traditions as well as the medium's role in vernacular applications like live-streaming, and social media. By the end of the course, students will gain both technical facility and a sharp critical eye for time-based art and culture.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST286, DDC286**
Prereq: **None**

IDEA287 Video Basics
This introductory course is for students of all majors eager to think critically and creatively about their relationship to video. How many videos do you have on your phone? How does the intimate, often humorous content we create relate to public space and artistic expression? Together, we'll explore the rich tradition of video art, which began in the mid-20th century when new technology was suddenly placed in the hands of everyday people. Artists quickly adopted, subverted, and transformed this specialized equipment beyond its initial commercial intent. Through hands-on projects, you'll learn to use affordable, widely available tools like CapCut and DaVinci Resolve to move beyond commercial aesthetics and create personal works of art. You will also be introduced to the specialized video equipment available on campus, focusing on the fundamental principles that can be applied to any camera you pick up. No prior experience is required: just a willingness to challenge and experiment with the videos you create every day.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST287, DDC208, ARST287**
Prereq: **None**

IDEA289 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CSPL**
Identical With: **CSPL289, FGSS284, SOC279**
Prereq: **None**

IDEA291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ARCP**
Identical With: **ARCP291, ANTH291, CEAS291, ENVS291**
Prereq: **None**

IDEA292 Interdisciplinary Project Lab
Interdisciplinary Project Lab fosters a holistic approach to engineering and design. Inviting students to reconcile vision with precision, hands-on coursework will involve a broad range of fabrication techniques, integration of systems, prototyping, and iterative design methods, culminating in a final project. The theme of this semester will be designing with light. The first half of the semester will focus on developing facility in both modeling and prototyping through digital and analog fabrication practices through short, intensive design and engineering projects. Students will expand their knowledge of materials and fabrication, develop skills for effective communication through visualizations and physical objects, and evaluate the efficacy of their designs. The second half of the semester will focus on an open-ended design project within the scope of the course theme, developed individually or in groups, planned in consultation with the instructor, and developed with feedback from all-lab reviews and individual desk crits. Complementing each of the lab projects, presentations and workshops will introduce the conceptual underpinnings of the course and develop requisite technical skills. IDEA292: Interdisciplinary Project Lab is a required course for all IDEAS linked major tracks in the College of Design & Engineering Studies.

It may also be counted towards the IDEAS minor as an elective in most minor concentrations (see https://www.wesleyan.edu/codes/ for more information).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **IDEA170 OR ARST190 OR IDEA285 OR IDEA175 OR ARST235**

IDEA300 Integrative Learning Project 2: Website Incubator
Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **WRCT300, RL&L350, AFAM320, CSPL300**
Prereq: **None**

IDEA301 Technologies of Time
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk.

This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will research and design speculative timekeeping devices or time machines for worlds otherwise.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **SISP208**
Prereq: **None**

IDEA305 Lighting Design for the Theater
This course will introduce students to the history, basic principles, and practical application of lighting design through lecture, discussion, demonstration, and practical application. Students will develop a deeper understanding of the methodology and applications of light in storytelling, which will help them communicate with collaborators. Students will have the opportunity to develop skills in computer drafting, lighting console programming, and script analysis for design. This course counts towards the Theater Arts category for the THEA major as a design course and towards the concentration category for the IDEAS Performance Design minor.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA305**
Prereq: **THEA105 OR DANC105**

IDEA308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Identical With: **GOVT308, CEAS308, ENVS308**
Prereq: **None**

IDEA311 Media and Environment: In/Sensible Worlds
In this seminar, we will examine the relationship between media technologies, sensory apparatuses, and changing environments. How do various kinds of media shape perceptions and interactions with our surroundings, multispecies ecologies, and planet Earth? How might we study the environment AS media? These seemingly simple questions matter because, like never before, media and environment co-produce who/what becomes sensible or insensible--and, ultimately, available or not available for life. This seminar will include readings from the fields of Critical Media and Communication Studies, Feminist/Postcolonial Science, and Technology Studies, Environmental/Digital Arts, and Humanities. Importantly, we will examine a range of creative media projects that explore ecology, environment, and earthly survival: films, games, sensors, and web projects.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS311, ENVS333**
Prereq: **None**

IDEA320 Ecological Design II: Worn Out/Broken In
This course will function as a design studio that examines the afterlife of material production. While designers have traditionally focused their attention on the creation, distribution, and consumption of new products, this course asks students to carefully consider everything that follows those acts. By scrutinizing the use, care, maintenance, repair, and eventual demise of designed objects, students come to understand the intended and unintended consequences of making. Rigorous observation and research lead to the creation of analytic drawings and models for presentation at project reviews.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST320, ENVS321**

Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA321 Wood: Building with the Forest
This studio introduces students to full-scale design and construction through the production of a single, collaborative project over the course of the semester. Working from land-based research and precedent analysis, students develop a detailed design for a structure on a specific site in Middletown, then build it together in the field. Materials will be sourced from the northern hardwood forest and the design crafted to suit its ecosystem.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **ARST321, ENVS324**
Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA333 Software Engineering
Software engineering is the application of engineering principles to the software development process. Eliciting requirements from stakeholders, designing the architecture of a program, performing usability studies, and testing a codebase are some of the aspects that elevate program development to software engineering. Focusing on web and mobile apps, students in this course will gain expertise in state-of-the-art frontend, backend, and mobile technologies, as well as related tooling. We will also cover the collaborative organization of software projects, software licensing, software business models, and ethical considerations for professional software engineers.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP333**
Prereq: **COMP211 AND COMP212**

IDEA335 Advanced Research and Field Methods: Living on a Damaged Planet
In this seminar, students will learn interdisciplinary methods for conducting focused research and media-based fieldwork to study socioecological collapse and possibilities for more livable, more than human futures on a damaged planet. The course will be structured around two real-world case studies and field trips, including the restoration of chestnut forests in/around CT, and the transformation of a birch forest surrounding a decommissioned power plant in Manresa, CT. Course readings will draw from the fields of Science and Technology Studies (STS), Multispecies Ethnography, Environmental Sciences and Humanities, and Digital Media.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-STS**
Identical With: **STS335**
Prereq: **None**

IDEA336 Architecture II
This course is a second-level architecture studio whose focus will be a single, intensive research and design project. As the semester progresses, additional design, representation, and production tools will be introduced and used for developing work for the project, from graphics software to the laser cutter. Additional information about the architecture studio at Wesleyan and its past projects may be found at: http://www.facebook.com/wesnorthstudio
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-ART**
Identical With: **ARST336**
Prereq: **ARST235**

IDEA338 Building Nothing: Design After Progress
The built environment is responsible for over 40% of humanity's greenhouse gas emissions, but despite attaching words like "sustainable" and "resilient" to their products, design and construction practices remain fundamentally unchanged. This seminar considers the possibility of a design philosophy that doesn't take the goal of creation as a given. Topics include the lifespan of buildings and products, their maintenance and care, the unintended consequences of making, relationships with and obligations to materials and resources, and strategies for degrowth found in indigenous and vernacular design precedents. We read and discuss a key text each week that examines the history of technology and critically evaluates shifting theoretical perspectives on nature and human development as they relate to design.
Offering: **Crosslisting**

IDEA350 Computational Media: Videogame Development
This course examines the interplay of art and science in the development of contemporary videogames using the Unity development platform and commercial artistic game tools. Students develop a comprehensive understanding of computational media, including legal and commercial aspects, combined with hands-on experience in a creative process that integrates design, art, and coding. There will be discussions with invited industry leaders in various subject areas. Students will have the opportunity to work as part of development teams and create working prototypes to better understand the challenges and rewards of producing graphic interactive software within a professional context.
Offering: **Host**
Grading: **A-F**
Credits: **2.00**
Gen Ed Area: **NSM-IDEA**
Identical With: **FILM250, COMP350, CIS350**
Prereq: **None**

IDEA351 Videogame Architecture and Programming in Unity
Game Architecture and Programming in Unity centers around software design efficiencies and their application to real-time simulation and related interactive media. Students develop working prototypes with the Unity game engine, learn C# programming, and learn to appreciate the efficiencies of different software architectures and project structures. This class is intended to strengthen student knowledge and help bridge to classes such as Wesleyan's existing IDEA350/ COMP350 offering each Spring. By offering more comprehensive training in development platforms, as well as practical experience in technologies that accompany base programming when creating interactive media, students will have a deeper understanding of ways to develop ideas by better understanding the creative tools available. Examples of topics to be covered will include: entity-component vs. inheritance systems, singletons and Unity alternatives, and Scene workflows. Digital Artists will learn to integrate visual design programs such as Blender into the Unity platform as well.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-IDEA**
Prereq: **None**

IDEA353 Robotics
Students will use hands-on projects, building and programming Arduino-based robots to learn about the field of robotics. Topics will include perception, locomotion, localization, common programming frameworks for robotics, and ethical considerations. Some background in electronics and mechanical construction may be helpful but is not required.
Offering: **Crosslisting**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP353**
Prereq: **COMP211**

IDEA355 Computational Design and Fabrication
This course introduces students to computational design and fabrication, which is an exciting application of computing and lays the foundation for the future manufacturing industry. We will focus on how computing can support computational design and also working with fabrication technologies such as 3D printing and laser cutting. Lecture topics include hardware abstraction languages, geometry processing fundamentals, physics-based simulation, optimization techniques, and data-driven design methods. Hands-on activities will complement lectures, providing practical experience with fabrication hardware and software tools. No prior knowledge of fabrication is required. Some background in linear algebra (MATH 221 Vectors and Matrices or MATH 223 Linear Algebra) is helpful but not necessary. Students who have not taken one these classes may want to do some reading before the course or be prepared to learn some of that material as the course progresses.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-MATH**
Identical With: **COMP355**
Prereq: **COMP212 AND MATH228**

IDEA359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**

Prereq: **None**

IDEA364 Architecture: Historiography, Theory, Criticism; Traditional and Contemporary Approaches
This seminar -- intended primarily for majors in history of art and architecture, for studio majors concentrating in architecture, and students interested in urban studies -- surveys different methods of studying architecture and its history. Emphasis throughout is on comparison of general theories of interpretation in art history and other disciplines and their application to specific works of art and architecture. Topics include monumentality and collective memory, stylistic analysis, philosophical aesthetics, iconography and semiotics, patronage and ideological expression, structural technology and building process, material culture and consumption, vernacular architecture and cultural landscapes, spatial form, urban landscapes, sociology, and affordable housing. Along with colonial, postcolonial, and decolonial studies of architecture, the seminar incorporates feminist architectural history and theory, energy studies, race and histories of modern architecture, and questions of canon formation and canonicity.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARHA364**
Prereq: **None**

IDEA370 Regenerative Design II
This course builds on the exploration and knowledge learned in Product Design I to discover opportunities for systems thinking in design. Students will study challenges and opportunities related to aging, education, food, and mobility to investigate potential opportunities through the lens of regenerative design. The course will support students in developing digital modeling skills as well as rapid prototyping and fabrication techniques. Students will work both individually and collaboratively in a studio environment. Field trips to New York City design ateliers, fabricators, and workshops may be expected as part of this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ART**
Identical With: **ARST370**
Prereq: **ARST270 OR ARST235 OR ARST220**

IDEA375 Modeling the Earth and Environment
Models can provide insights into Earth systems that are difficult to obtain by direct experimentation or observation. This course will introduce students to the process of translating Earth systems into idealized mathematical models, specific methods for solving the resulting equations, and implementation of models in MATLAB. We will explore cases from a range of topics in the earth and environmental sciences to gain a better appreciation of the insights models can offer. Students should have MATLAB installed on a laptop computer for in-class work.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES375, E&ES575**
Prereq: **MATH120 OR MATH121**

IDEA383 Introduction to Costume Design for Performance
This course is an exploration of costume design concepts for contemporary performance including theater and other genres. The class will include beginning elements of costume design, including character/script analysis, research, costume lists, action charts, visual design concepts and techniques, and collage and drawing skills. This course counts towards the Theater Arts category for the THEA major.

Offering: **Crosslisting**
Grading: **OPT**

Prereq: **THEA105 OR THEA185 OR ARST131 OR ARST445**

IDEA387 Virtual Production: The Music Video
This intensive studio course will explore the breadth and depth of the music video genre. Students will learn advanced post-production, motion capture, and video recording techniques. Class sessions will include technical demonstrations, group discussions, and conversations with practitioners in the field. Readings and screenings will examine the relationship between music videos, technology, contemporary art, and popular culture. Students will learn how to use the 3D motion capture studio and record live musical performances. Software will include Adobe AfterEffects, Blender, and DaVinci Resolve. Through weekly exercises and a final independent project, students will learn to work collaboratively and develop a distinct creative voice. The course will culminate with a final music video project, to be screened at the end of the semester. Previous experience in Adobe Premiere Pro software is required. Preference will be given to students who have successfully completed ARST 286, ARST 386, DDC 108, or DDC 448. All students must be concurrently enrolled in the virtual production lab which meets Fridays 1:20 p.m. - 3:20 p.m. in DDC.
Offering: **Crosslisting**

MASTER OF ARTS IN THE COLLEGE OF INTEGRATIVE SCIENCES

The College of Integrative Sciences (CIS) BA/MA program would enable students involved in interdisciplinary research, either CIS linked-majors or other NSM majors, to participate in a five-year combined BA plus MA program for Wesleyan students. Eligible students who complete their undergraduate requirements can obtain a master’s degree upon successful completion of an additional year of graduate coursework and a thesis.

COURSES

The CIS promotes an interdisciplinary and integrative approach to scholarship and learning across mathematics and the life, physical, and behavioral sciences. Similar to the CIS linked-major, the curricular emphasis is on building a knowledge base spanning multiple departments.

In order to show proficiency across multiple scientific disciplines, a minimum of 6 credits, with grades of B- or better, is required for the MA degree.

- Two credits will be earned for research leading to the MA thesis (CIS549/CIS550, Advanced Research Seminar, 1.0 credit each).
- At least two journal club/seminar courses are required and must be in two different disciplines (0.5-1.0 credits). CIS321 (Special Topics in Integrative Sciences) and/or CIS322 (Senior Colloquium II: Integrative Sciences) may be taken to fulfill up to 1.0 credit. For students that earned a CIS major as part of their BA these courses can be repeated, whereas MA students that were not CIS linked majors are required to take CIS321/CIS322.
- The remaining credits will be earned through lecture or lab courses (200, 300, or 500-level) determined by the student and mentor; a minimum of two of these must be one-credit courses and in two different disciplines. The courses may be driven by the

interdisciplinary research being conducted. The course catalog contains a list of courses identified as interdisciplinary and appropriate for the college. Courses not on this list may potentially be used to fulfill elective requirements, based on consultation with the student's CIS advising committee.

A student in the BA/MA program who earns more than 32 credits during the BA may apply excess credits toward the MA, providing that they are relevant to the research area and they have not been used to fulfill an undergraduate major requirement. All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled in the university.

PROGRESS AND QUALIFYING EXAMS

A 3-member committee comprised of the research mentor and two CIS affiliated faculty will be established upon acceptance in the BA/MA program. The candidate will meet with their committee in early stages of research (summer/fall of fifth year) and meet with them in the second semester of their MA year (around spring break). This committee determines when sufficient experimental work has been completed and must approve the final written document. Students in this program are required to submit a MA thesis describing the research which they have carried out in partial fulfillment of the degree requirements.

TEACHING

BA/MA students are not required to be teaching assistants.

RESEARCH

Research is a cornerstone of the CIS. With a faculty mentor, student researchers pursue inquiry-based learning that explores open questions and provides new perspectives. They develop the necessary problem-solving skills and build expertise at the frontiers of science. Two credits of research during the fifth MA year are required (CIS549/CIS550). The summer prior to the MA year is a valuable period to make significant progress on MA thesis research and summer funding opportunities exist for BA/MA students. Students conduct research and complete a written thesis in partial fulfillment of their MA degree. For the most recent information regarding the research carried out by faculty in the CIS, please visit the CIS website: https://www.wesleyan.edu/cis/.

THESIS AND DEFENSE

Each candidate is required to write a thesis on a piece of original and potentially publishable research carried out under the supervision of a faculty member. A thesis plan, stating the purpose and goals of the research, observational and other materials required, and uncertainties and difficulties that may be encountered, should be presented and discussed in the early meeting with the thesis committee. The thesis, in near-final form, must be submitted to the committee at least one week prior to the scheduled closed-door oral defense. In this examination, the student must defend their work and must demonstrate a high level of understanding in the research area. The oral defense may touch on any aspect of the student's preparation.

ADDITIONAL INFORMATION

BA/MA Program

The College of Integrative Sciences (CIS) BA/MA program enables students involved in interdisciplinary research—either CIS linked-majors or other NSM majors—to participate in a five-year combined BA plus MA program for Wesleyan students. Eligible students who complete their undergraduate requirements can obtain a master's degree upon successful completion of an additional year of graduate coursework and a thesis.
Similar to the CIS linked major, the curricular emphasis is on building a knowledge base spanning multiple departments, and on conducting interdisciplinary research.

Students are advised to begin research by their junior year if they intend to pursue the BA/MA. Admission is competitive and based on GPA, faculty recommendations, and research experience.

COLLEGE OF LETTERS

The College of Letters (COL) is a three-year interdisciplinary major for the study of European literature, history, and philosophy, from antiquity to the present. During these three years, students participate as a cohort in a series of five colloquia in which they read and discuss (in English) major literary, philosophical, and historical texts and concepts drawn from the three disciplinary fields, and also from monotheistic religious traditions. Majors are invited to think critically about texts in relation to their contexts and influences—both European and non-European—and in relation to the disciplines that shape and are shaped by those texts. Majors also become proficient in a foreign language and study abroad to deepen their knowledge of another culture. As a unique college within the University, the COL has its own library and workspace where students can study together, attend talks, and meet informally with their professors, whose offices surround the library.

COL100F History of Math (Is for Everyone!) (FYS)
Mathematics is often taught as an abstract realm of eternal truths. The aim of this course is to "humanize" mathematical thought by re-embedding it in specific cultural contexts, material practices, and the historical transmission of ideas. We will focus on developments in geometry and algebra (and their interaction) in Ancient Greece, Medieval Islam, and Renaissance Europe, culminating in the analytic geometry of René Descartes. The principal aim of the course, however, is not to equip students with specific mathematical skills that they will go on to exercise in other contexts; it is rather to identify and reflect on the distinctive features of culturally specific mathematical practices and why they take the form they do. This will involve doing a good deal of math, but that mathematical study will be wedded to historical and philosophical inquiries. Historically, we will study the relation of particular mathematical practices to other cultural activities (commerce, taxation, the arts, etc.), their dissemination across space and time (through different places, cultures, and generations), and how their reception in different places and ages has led to transformations in the practices themselves. We will make use of Special Collections to consider different ways mathematics has been performed and preserved in writing, the role of mathematical texts in education, and the material transmission of mathematical knowledge: e.g., how a demonstration makes its way from Syracuse in 250 BC into a textbook printed in the United States over 2000 years later. Philosophically, we will interrogate the notion of mathematical proof by considering different methods of demonstration (reductio, construction, exhaustion, induction, analysis) and identifying the principles of adequacy to which they appeal. We will also reflect on the forms in which mathematical knowledge is presented (axiomatic systems,

treatises, problems, theorems, methods) and ask what makes a result significant or generative in a specific tradition or paradigm. No special mathematical background is presupposed, but the class will require significant effort of everyone, regardless of mathematical experience. It is difficult to internalize the intellectual styles of different mathematical paradigms and to appreciate their distinctive methods and results. Some results (such as the Pythagorean theorem) will be familiar, but our approach to them likely will not be. There will be problem sets and tutorial sessions to help us digest the mathematical content. Assignments will include art projects, essays, problem sets, and "explainer" presentations.

COL102F Sex and Sexuality in Islam (FYS)
Islamic societies have long traditions of commentary about the body and sexuality. Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims throughout time. Instead of essentializing the Islamic "viewpoint" on sexuality, we will survey the variety of opinions and ideas about sex from medieval Islam to the modern world. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and modern sex manuals and debates, among other sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct in Islam, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature.

COL109F "Real" Love: Subjects of Unreason
Is love a special kind of madness? Do love and madness lead to kindred encounters with the limits of experience? What are the subjects of unreason that inform our conceptions of the world and the "real"? How might the novel (as a literary genre) help us to reason philosophically about irrational experience?

This course explores love and madness through depictions of reason and unreason in two major prose works by the author of "the first modern novel," Miguel de Cervantes through a close reading of Don Quixote and The Trials of Persiles and Sigismunda. From the adventures of a country gentleman turned knight-errant to the trials and tribulations of two sojourning lovers repeatedly separated and reunited on the road, we will explore the lived and the ideal, the rational and the irrational, the presence and the absence, the mortal and the immortal in the erotic encounter at the outset of the modern literary imagination.

Both texts will be read in contemporary English translation. No foreign language knowledge is required. Recommendations for appropriate critical editions in Spanish will be provided for any student who wishes to read in the original language.

This is a discussion-based close reading seminar.

Prereq: **None**

COL112F The European Novel from Cervantes to Calvino (FYS)
This course provides an introductory survey that tracks the development of the European novel through its major periods--from its origins in DON QUIXOTE through the rise of the novel in 18th-century Britain to romanticism, realism, and modernism.

We will focus on texts that had tremendous impact (and long afterlives) throughout Europe, that inspired responses and imitations in many different languages, and that provided European intellectual culture with archetypal characters and plots through which problems of history, politics, and philosophy were articulated--Voltaire's naïf and Dostoevsky's nihilist; Defoe's heroic bourgeois individualist and Kafka's victim of modern bureaucratic rationality. The readings will also introduce students to some of the European novel's important subgenres (e.g., romance, gothic, grotesque, the philosophical novel) and important narrative forms (e.g., epistolary novel, unreliable narration, free indirect discourse).
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **HA-COL**
Prereq: **None**

COL115F Reading in Slow Motion (FYS)
In "The Return to Philology," Paul de Man wrote: "Mere reading, it turns out, prior to any theory, is able to transform critical discourse in a manner that would appear deeply subversive to those who think of the teaching of literature as a substitute for the teaching of theology, ethics, psychology, or intellectual history. Close reading accomplishes this often in spite of itself because it cannot fail to respond to structures of language which it is the more or less secret aim of literary teaching to keep hidden." This course will introduce students to the theory and practice of reading literary texts closely, in slow motion. Engaging with short works of poetry and prose--including texts translated from languages other than English--students will learn to work with (and perhaps through) their uncertainties, bafflement, and non-understanding of the text and its structures of language. Secondary readings will include theoretical and critical essays drawn chiefly from the New Critics and American versions of deconstruction. While we will gain a basic understanding of key critical concepts such as author, reader, text, closure, and ambiguity, our focus will be on learning from the literary texts themselves rather than from the theoretical readings.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **HA-COL**
Prereq: **None**

COL121F Writing About Social Issues (FYS)
This FYS course will involve close reading of classic journalistic books on complex social issues and opportunities for students to write their own articles on social and political concerns of interest to them. Texts will include William Finnegan's COLD NEW WORLD, Charles Barber's CITIZEN OUTLAW, Bryan Stevenson's JUST MERCY, Rebecca Skloot's THE IMMORTAL LIFE OF HENRIETTA LACKS, Barbara Ehrenreich's NICKEL AND DIMED, and Jennifer Gonnerman's reporting in "The New Yorker." The distinction and tensions between advocacy and "objective" reporting will be an ongoing point of discussion in the course.

Students will produce three feature-style pieces based on their own original research and reporting.

COL122F Magical Creatures & Phantastic Allegories in Spenser's Faerie Queene (FYS)
This course explores the imaginative worlds of magical creatures through a study of phantastic allegory in Edmund Spenser's Faerie Queene. Through a sustained careful reading of this major work of imaginative poetry, we will come to understand the way in which Spenser employs rich and dynamic poetic figurations towards the construction of highly nuanced and complex allegorical meaning which responded to the political, philosophical, and social context of Spenser's own day. This course is open to all readers of any major who have ever wanted to explore Spenser's imaginative poetic fictions, or who have wanted to extend their knowledge of early modern English poetry beyond Shakespeare.

COL123Z Love, Sex, and Marriage in Renaissance Europe
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, the Italian Peninsula, the Low Countries, Portugal, Spain, and Sweden. (N.B. Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about "homosexual" love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how have contemporary (21st-century) writers reimagined Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

COL125F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

COL130F Thinking Animals: An Introduction to Animal Studies (FYS)
In 1789, British philosopher Jeremy Bentham wrote: "The question is not, 'Can they reason?' nor, 'Can they talk?' but, 'Can they suffer?'" This question, which challenged the social and legal norms of the 18th century that denied sentience to non-human animals, has influenced disciplines across the social sciences and humanities to focus on what has more recently become known as, "the question of the animal." Bentham's question has sparked centuries of debate about the sentience of non-human animals and our relationship to them. In this course, we will examine a range of theories and representations of "the animal" to understand the desire to tame or objectify animals (through zoos, factory farming, and taxidermy), as well as why they are often conceived of as guardians of inaccessible experience and knowledge, and how the human and its various gendered, classed, and racial manifestations have been conceived of through and against notions of animality. Readings may include Poe, Kafka, Derrida, Bataille, Haraway, and Coetzee (among others).

COL133F Data-fy That: Theory and Practice of Digital History (FYS)
History is not simple. It is not the past, but a way of talking about the past with a unique claim to authority. For this reason no imperialism ever fails to claim a history, while at the same time every revolution rewrites it. History is an activity, it is a practice. Whether in the analog world of pen and paper or in the digital metaverse, history is its data. To practice history is to select an object of study and to "data-fy" it. In this course you will be empowered to become not only a reader of history, but a creator of historical data, a scholar actively seizing the current digital history moment as an occasion to break down history's myths through the activities of research, datafication, and analysis. We will critique the past as it has been conceived by upending archives through the construction of relational databases: a quiet revolution defying the colonizer and empowering the colonized. History can always be claimed by the powerless. Everywhere, and

out of anything, we seek to democratize the historical present. Join the revenge of the archive.

COL136F Entangled Sounding Objects: The Social Life of Musical Instruments (FYS)
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

COL138 Wesleyan University Collegium Musicum
The Collegium Musicum (literally "company of musicians") is a vocal performance ensemble dedicated to exploring and performing the diverse European repertories of medieval, renaissance, and baroque music. Emphasis is given to the study of musical styles, performance practices, vocal independence, healthy singing, and musicianship. Students investigate various cultural aspects of the production of music, including primary sources, acoustics, and cultural heritage. In spring 2026, we begin our celebration of the Collegium's 25 Years of early music at Wesleyan with a program entitled "Song of Songs, Old and New." Like much Biblical literature, the Song of Songs can be traced back to Sumerian origins. Our program will intersperse ancient Mesopotamian poetry relating to the spiritual marriage of Inanna (Sumerian goddess of love, fertility, and war) and Dumuzi (the shepherd god) with music that reflects the Jewish and Christian understandings of the related mystical union. Biblical language that evokes the fragrance of wine, blossom, fruits, and spices was particularly appealing to European Renaissance composers. We will present a simple Icelandic form of discant, a polytextual French motet, complex polyphony in multiple parts by Palestrina, Lassus, Bouzignac, and Aleotti, and some contemporary responses to these popular texts.

COL138F Masculinities (FYS)
This course offers an interdisciplinary approach to the study of masculinities, focusing on the difficulty of disentangling the (social-) scientific questions of what men are (and how they come to be that way) from the interpretive question of what masculinity means. We will survey a range of perspectives from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, anthropology, feminist studies, and queer theory that describe and attempt to account for masculinities. In order to understand how these scholarly accounts might fit together to form a more comprehensive interpretive framework, we will also be engaging in critical analysis of examples from contemporary television and film that will help us to understand the role that representation plays in our cultural constructions of masculinity.

COL150F Great Books Unbound: Self and Other (FYS)
Where, how, and why do we draw the boundaries of self and other? In this course, we will discover, analyze, and debate how texts from antiquity to the present have generated and questioned ideas of me and you, us and them: from Descartes's philosophical account of the self as a thinking substance (Meditations), to Natalie Zemon Davis's history of appropriated identity (The Return of Martin Guerre), Kafka's allegories of human-animal metamorphoses, and Shelley's story of monstrosity and belonging (Frankenstein). This course equips students with the skills to unbind influential texts from their traditional readings using the collaborative and interdisciplinary approach of the College of Letters. This course combines small FYS discussion sections with weekly lectures by three professors from different disciplines (philosophy, literature, history), and occasional writing workshops. Designed as a gateway course to any of the core humanities disciplines, Great Books Unbound is not a prerequisite for a College of Letters major, but students considering the major are strongly encouraged to enroll.

COL189 Introduction to History: History of the Present
In this course we explore history as a critical endeavor. The aim is twofold: to reflect on the role history plays in making categories of contemporary debate appear inevitable, natural, or culturally necessary; to question underlying assumptions about the relationship between past and present that are so often taken for granted. We will examine both history's influence on politics and the politics of history as a discipline.

COL198F Truth & the Poet: Lyric Subjectivity and Phenomenology for Beginners (FYS)
What is lyric poetry? What is phenomenology? Can poetry think phenomenologically? What can phenomenology tell us about the way lyric poetry communicates experience? What is the nature of poetic experience, and how does it relate to the structure of experience more generally? What is the relationship between subjectivity and objectivity in experience and the meaning that we give to it? This course provides a foundation for (1) ways of reading and discussing lyric poetry, and (2) understanding and engaging with the school of philosophical thought known as phenomenology. We will read poems from a wide variety of periods, languages, and cultures including Sappho, Césaire, Vallejo, Plath, Dickinson, Rilke, Rimbaud, Stevens, Baudelaire, Dylan, and many others. We will build a basic approach to phenomenology through select readings of Husserl, Heidegger, and Levinas. This course is designed for students

with no prior knowledge of philosophy or poetry. By working interdisciplinarily with various thinkers and poets, this course will introduce students to close reading in the College of Letters and other areas of the humanities.

COL199 Time Machines: Bringing the Past to the Present and the Future to the Past
In the course we will explore how ghosts of the past and imaginaries of the future haunt the present. We will do so by looking at the temporal disjuncture in canonical and seemingly concrete evidentiary categories of disciplinary history. In essence, we will see how they serve as time machines to bring the past into the present and the present to the future. The course will be organized around a variety of themes from ghosts, haunting, trauma, and historical injustice, through heritage, memory, and presentism, to technological imaginaries and the Anthropocene. In addition, we will look at the ways such imaginary time travel occurs in seemingly everyday sites as well such as supermarkets, films, and amusement parks.

COL200 The Narratives of Illness and Recovery
This course provides a detailed examination of primarily first-person accounts of illness and recovery. The focus will be on narratives that deal with mental illnesses and trauma or the psychological aspects of physical illnesses. We will explore the relationship of story and narrative to the healing process. Students will analyze across texts the common psychological traits that lead to recovery and generativity, as well as the response to loss and the experience of suffering. Particular emphasis will also be placed on the role of "the wounded healer," those persons who have suffered and then choose to assist others who face similar predicaments.

COL201 Writing Nonfiction
In this creative course, students will address the elements of creative nonfiction, such as narrative, character, voice, tone, conflict, dialogue, process, and argument. The work of nonfiction writers such as James Agee, George Orwell, Joseph Mitchell, Walker Percy, Anne Lamott, Caroline Knapp, and Dave Eggers will serve as models and inspiration. The course will be taught in workshop fashion, with selected students presenting their writing in class each week.

Charles Barber is the author of two works of nonfiction and a novel in progress. He is a lecturer in psychiatry at Yale Medical School and a visiting writer at the College of Letters.

COL202 Sex and Sexuality in Islam
Islamic societies have long traditions of commentary about the body and sexuality. Medieval Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims, both historically and in the contemporary world. Instead of essentializing the Islamic "viewpoint" on the body, we will survey the variety of opinions and ideas about the body that Muslims have held. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and contemporary sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature. While the course primarily focuses on the premodern period, it will also delve into contemporary Islamic discourses.

COL203 World History
Using material culture, visual sources, primary texts, and articles, this course will give students a solid understanding of World History from the River Valley Civilizations, the Classical Period, and the Post-Classical Period, to the Early-Modern Period, the Long 19th Century, and the Contemporary Period. Emphasis will be placed on the development of major cultures around the world -- and there will also be discussion of how the major cultures fail to explain much of World History.

In practical terms, students will learn how to assess a broad range of historical sources from varied places and times; how to debate these works in class discussion; how to produce concise and precise reading notes based on an argument/counter-argument format; and how to work collaboratively on the group project.

COL204 British Literature in the Enlightenment: Individualism, Consumer Culture, and the Public Sphere
England was changing rapidly in the 17th and 18th centuries. Indeed, it is often said that this period was crucial for the emergence of individualism, consumer culture, and the public sphere--for the modern world itself. The period is sometimes described as the Age of Reason, but it was also an age of bawdy laughter, intense emotion, brazen self-promotion, serious faith, and gossip in coffeehouses and magazines. It was an age, too, of flourishing marketplaces, imperial expansion, slavery and abolition. This course will track how literary writers celebrated, condemned, participated in, or simply tried to make sense of their changing moment (and the changing understandings of literature available in it).

COL205 Writing About Healthcare
Writing About Healthcare is a seminar which introduces students to models of writing about illness and health systems designed to address illness. The class will include both physical welfare and behavioral health, and will greatly focus on the cultural, social, and economic systems in which illness and treatment take place. Texts will include the professor's current project, on the commodification of illness by corporations; also Robert Kolker's Hidden Valley Road; Anne Fadiman's The Spirit Catches You and You Fall Down; Rebecca Skloot's The Immortal Life of Henrietta Lacks; Porochista Khakpour's Sick: A Memoir; and excerpts from the work of Thomas Mann (The Magic Mountain), Walker Percy, and Robert Coles.

COL207 Introduction to Postcolonial Theory
The 1978 publication of Edward Said's Orientalism signaled the presence of postcolonial studies, a field of intellectual inquiry that proved influential in the humanities and social sciences. How, from our vantage point, do we understand both the age of imperialism/colonialism, and what happens afterwards? What are the conditions of decolonization and national independences? How do the cultures of the formerly colonized countries use and modify imperial vestiges, and invent themselves anew? Central to our course will be the work of three major theorists in the field of postcolonial studies: Edward Said, Gayatri Spivak, and Homi Bhabha. Among other important ideas, we will discuss Orientalism, subalternity, and mimicry.

COL208 Accessible Writing: Disability, Language, and Media
Journalists (and indeed most writers who want a wide readership) must take the messy, complicated situations and systems the world presents us with -- an economic downturn, a yearslong war, a rapper's career, a new field of science -- and explain them in terms that are faithful to the facts of the situation, rendered in language that remains understandable to a reader who may not have considered the subject before. Writers from Aristotle to the editors of Wesleyan's new website (where all text is now required to be written at a seventh-grade reading level) have worked to apprehend the mechanisms that make a text understandable. But there is one group of thinkers that is perhaps more invested in the problem of "accessibility" than any other: people with disabilities. We tend to think of disability access -- such as captions on a film, or image descriptions for the blind -- in terms of legal compliance: you'd better make your project accessible or you'll get sued. But in recent years, a range of disabled artists, thinkers, and activists have expanded the field of accessibility beyond compliance into the realm of imagination and interpretation. This course adopts these emerging practices as creative-writing prompts, exploring them with a view toward sharpening our own practice as writers (and journalists, screenwriters, artists, and poets). Course materials will include work by writers engaged in the problem of literary accessibility (Strunk & White, Dr. Seuss, Garielle Lutz), disability-studies scholars (Mara Mills, Mel Y. Chen), activists (Alice Wong, Leah Lakshmi Piepzna-Samarasinha), artists (Christine Sun Kim, Finnegan Shannon, Joseph Grigley), poets (Jjjjjerome Ellis, Latif Askia Ba), and institutions (ProPublica, the New York Times, Harvard's Digital Accessibility initiative). The course will encourage students to pull their writing out of the classroom, with an emphasis on publication, from newspapers and magazines to collaborative projects with Wesleyan's College of Film and Moving Image, Digital Design Commons, Davidson Art Center, and elsewhere.

COL209 Appearing Acts: Visual Histories and Identity Construction Through Photography in Spain
In her reading of Plato's "Allegory of the Cave," Susan Sontag finds a close bond between photography and the world, our cave. Photography, she says, shows us a new visual code that constructs narratives that "alter and enlarge our notion of what is worth looking at," and in doing so can influence, guide, and condition our knowledge of the world. Keeping this in mind, when it comes to Spain, what kind of world does photography construct? How does the visual field influence and guide our knowledge of modern Spain? In this seminar, we will reflect on how photography has conceptualized social and national identities in Spain from the 19th century to the present, asking how images create, shape, and question the cultural and social archive. Through the examination of photographs, theories, and methods, we will draw a contextualized history of photography that will help us to consider its role in the interdisciplinary construction of Spanish identity.

COL210 Living a Good Life
For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world? This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. For details about the structure of the course and a syllabus of class meetings, along with the locations of plenary lecture sessions, breakout sessions, and dialogue sessions, please see this year's course website and past versions of the course at the following link: https://livingagoodlife.com. Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.50-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WesMaps for more information.

COL211 Art Criticism
As a young critic, the art historian Hal Foster wrote: "I do not demystify the work which I discuss so much as I am demystified by it." Beyond criticism's primary object -- the artwork to be judged, rejuvenated, revealed -- what does it let slip about its own function as a social and cultural practice? This course will introduce students to art criticism while also attempting to understand the rapidly changing economic conditions that make it possible (or not). Students will be invited to write pieces of criticism on a range of media -- sculpture, photography, painting, print, video, and performance -- with assignments modeled on different genres of art writing (e.g., the exhibition review, the "critic's pick," the single artwork study, and the "hybrid" review-essay). The course will give students a chance to work closely with the Davison Art Collection and the Zilkha Gallery.

COL213 Enlightenment and Science
This course will examine the positive and negative ways that 21st-century science and technology have been impacted by the Enlightenment. In this earlier time, without government or private sources of funding for science, the emphasis on immediate outcomes became common. Practitioners of science often had to be showmen to attract attention in order to get funding. Through the study of contemporary news articles, this class will also consider such ethical choices, many of them to do with resource allocation, that we are facing in science, medicine, and technology today. It has been assumed that the modern age was drawn from the scientific method and the scientific advances of the Enlightenment. It was Émilie du Châtelet and Voltaire, both strong supporters of Isaac Newton, who, in the mid-18th century, chose the rational, scientific method as the marker of their intellectual age, the Enlightenment. This choice was adopted by their intellectual cohort, and in turn it was slowly accepted as the standard by European society overall. Thus Enlightenment science did not only lead to modern, 21st-century science, it also directly shaped modern attitudes toward the proper running of society and this continues until today. Yet, little work has been done on what it means to organize a society along scientific principles, especially given that this represented a sharp shift away from traditional decision-making on the state level, and a move towards secularization. How did this new, rational approach shift the priorities of European societies, particularly in terms of the distribution of resources? In the 18th century, there was also a desire by educated readers who were not themselves practicing science to learn more about both the history of science and contemporary scientific discoveries. In this century, emerging modern science was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans as well as privileged practitioners of science. Talented young men from less privileged backgrounds were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also active in scientific circles, perhaps most notably Margaret Cavendish, Émilie du Châtelet, and Caroline Herschel. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In both cases, science was discussed as a normal topic of discussion, not just a subject for specialists. However, the professionalization and specialization of the sciences in the 19th century led to mixed results--it certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly established manner. It also resulted in the end of educated people outside of the sciences considering science to be an area that they should know in order to be proper citizens, not just intellectuals. For centuries it was assumed that the modern age was drawn from the scientific advances of the European Enlightenment in the 18th century. Then, in the last few decades, many scholars started to attack what has been called the Enlightenment Project with its wholesale emphasis on science and rationality. Others have found that there were also valuable nonscientific achievements in Europe during the Enlightenment. However, there is a need to bring the scientific method and the technological advances of the 18th century back into the conversation about the science of that time and then of our own time. Given that we now live in an age both bettered and dominated by science and technology, it is of paramount importance to understand the origins of modern science and technology.

COL214 The Modern and the Postmodern
In this course we will examine how the idea of "the modern" develops at the end of the 18th century and how being modern (or progressive, or hip) became one of the crucial criteria for understanding and evaluating cultural change during the last 200 years. Our readings will be drawn from a variety of areas--philosophy, novels, music, painting, and photography--and we will be concerned with the relations between culture and historical change. Finally, we shall try to determine what it means to be modern today and whether it makes sense to go beyond the modern to the postmodern.

COL215 Fact into Fiction
Although we think of literature as the realm of the imagination, many works of fiction are inspired by facts. A Kentucky slave's attempt to murder her child rather than let it grow up in bondage; a bombing in Saigon that ushered the U.S. invasion of Vietnam; the transformation of the Congo in the years after its independence from Belgium; and the epic journey of the bank robber Ned Kelly in Australia: all these are true events that have inspired the novels we might read in this seminar. How do novelists take history and turn it into story? How do they fashion characters out of real people? And how do they create fully realized worlds none of us who are alive have seen? We will examine aspects of characterization, point of view, plot, narrative time, setting, dialogue, language, structure, themes, imagery, and subtext. We will also read some theoretical texts to help us expand the language we use to describe and discuss novels. The goal of this seminar is to teach you to read like a writer.

COL219 Defiant Echoes: Resistance and Reinvention in the Spanish Canon
Can the literary canon be both a tool of oppression and a space for rebellion? In this course, we will challenge traditional notions of the Spanish canon, exploring how voices of dissent have reshaped it from the 18th century to today. Through literature, comics, memoirs, theater, and essays, we will uncover how writers and artists have resisted imposed identities and fought for a more inclusive cultural landscape. From the groundbreaking works of Emilia Pardo Bazán and Federico García Lorca to contemporary creators like Quan Zhou Wu, Ana Penyas, and Desiree Bela-Lobedde, we will analyze how these voices question authority, identity, and belonging. Through engaging discussions and critical analysis, students will examine the evolving definition of Spanish identity and consider how narratives of power, exclusion, and resistance continue to shape the literary world. Whether you are interested in literature, history, cultural studies, or activism, this course will give you new perspectives on the power of storytelling as a force for change.

COL220 Catabasis/Anabasis: Journey to the Underworld and Other Worlds in Dante's Divine Comedy
With Virgil as our guide and Dante as our alter-ego, we will journey to the underworld of the Inferno as well as the other worlds of the Purgatorio and the Paradiso. From the initial poetry of decent (catabasis) in that 'selva oscura' to the ineffable ascent (anabasis) to Beatrice, this course sustains a close reading in English translation of one of the most significant works in the history of poetry. In addition to the Divine Comedy, we will explore the political, cosmological, and theological context of Dante's own period alongside some of his smaller works such as the Vita Nuova and the De Vulgari. This course is open to all readers of any major who have ever wanted to explore Dante's imaginative poetic fictions. We will read the Divine Comedy in a bilingual translation for any student who prefers to read in the Italian.

COL221 Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity
Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, begging collectives, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

COL222 Ruin and Redemption: Narrating Twentieth-Century Italy
When fugitive far-left terrorist Cesare Battisti was extradited to Italy in January 2019 to serve out a life sentence for crimes committed in the late 1970s, he provided fresh evidence for the way that 20th-century events still cast long shadows into contemporary Italy. The events, their narration and re-narration over time tell the story of unresolved conflicts and overturned verdicts in a context characterized by repression, revisionism, and rehabilitation. In this course we study three historical events of the past century that continue to haunt contemporary Italian society, culture, and politics: fascism; civil war and resistance; and the political violence of terrorism in the 1970s and 80s. We approach these events by examining the ever-changing narratives about them. For each narrative we focus on specific issues (e.g., for fascism: the rise of fascism, racism and anti-Semitism, colonialism, Mussolini's cult of personality, the exaltation of war, fascist intellectuals, the art of the regime, etc.), but we use these as an entry point to articulate contradictions and complexity. We explore these narratives through various media and forms of expression: from films to novels, from landmarks to newspaper articles, from poems to billboards. By exploring how the polarizations of these narratives flow into the 21st century, we unveil the fractures and conflicting agents at the core of contemporary Italy.

The course is conducted in Italian. Authors include: Gianni Amelio, Marco Bellocchio, Italo Calvino, Liliana Cavani, Umberto Eco, Beppe Fenoglio, Dario Fo, Natalia Ginzburg, Helena Janaczek, Primo Levi, Pier Paolo Pasolini, Luisa Passerini, Cesare Pavese, Rossana Rossanda, Roberto Rossellini.

COL223 Home Movies: Italian "Families" on Film
What is "the family" in an Italian social and cultural context? How has it changed over time? How has it responded to the transformations of Italian society since the time of the postwar economic miracle until today? Have its contours changed to adapt to new values? Has it fossilized existing values? Are families limited to flesh-and-blood kinship or are they constructed along lines of shared values and loyalty? This course seeks some answers to these questions through a sustained exploration of a variety of types of families as they are presented in Italian cinema from roughly 1950 until today. We will take stock of representations of the "traditional" family and the related social values, seeking to understand how Italian filmmakers, through their focus on the family, enter into the debate concerning tradition and change within Italian society, culture, and history. To that end, we will examine family dynamics along a broad spectrum of relative and intersecting aspects including affiliation, love, and rivalry; elective families (organized around crime syndicates, families constituted according to affinity); "failed" and "challenged" families and what that means; and examples of single-parent and same-sex families that seek to challenge conventional heteronormative paradigms. Along the way, we will recur to some critical readings (in sociology, history, and anthropology) that will help us frame our inquiry. This course is conducted in Italian. ITAL 223 is an appropriate course for anyone seeking an advanced class after ITAL112.

We will screen one primary film each week, which will anchor our discussions and serve as the basis for that week's activities. Students will also make 10-15 minute presentations on a secondary film that will serve as a "companion" to the primary text and will thicken our understanding of that week's themes.

COL224 Humans and Other Animals
How have humans imagined the inner lives of other animals over time? What categories and roles have human societies assigned other animals, and how have we understood our responsibilities to them? This course presents readings from the earliest examples of world literature to contemporary theory and philosophy to explore human-animal relations across cultures and historical periods. How might these narratives and ideas inform our own relationships to other animals and our place in the planet's ecosystem? This co-taught course offers an interdisciplinary introduction to literature, animal studies, and environmental humanities, with a focus on close reading and effective academic writing.

Exemplary texts: the Sumerian epic Gilgamesh; selections from Homer's Odyssey and Vergil's Georgics; selections from the Sanskrit Ramayana; readings from Marie de France, Rilke, Kafka and J.M. Coetzee; readings on animal ethology, philosophy, and the legal status of non-human persons.

COL225 Death and the Limits of Representation
The disciplines of history, philosophy, and literature all hinge on the issue of representation. The ability to communicate ideas, visions, or arguments all depend on the ability to represent these abstract notions in a concrete and recognizable form. In this course we will problematize the basis of all three disciplines by exploring death as the limit of representation -- as that which is ultimately unknowable (or knowable only secondhand) and thus beyond representation. Indeed, what is the concept of the ghost but an attempt to represent someone who is dead in the recognizable form of the body that once lived. Yet, the ghost appears and disappears, is not bound by the laws of time or space, and is largely present in its absence. By exploring texts by such authors as Plato, Shakespeare, Poe, and Levinas and by studying historical events such as the Black Death and the Shoah, we will attempt to understand the project of representation and its limits.

COL226 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America
This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

COL227 Life Writing: Writing About the Self and from Experience
This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.

COL229 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History
This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic EL CID (12th-13th century); the bawdy and highly theatrical prose dialogue known as LA CELESTINA (1499); the anonymous LAZARILLO (1554), the first picaresque novel; and María de Zayas's proto-feminist novella THE WAGES OF VICE (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

COL230 Longform Narrative
This course will explore techniques and theories that sustain multifaceted and long narratives in fiction and nonfiction. Students will read texts that transpire over many pages, over long periods of time, and which involve deep explorations of character, setting, and theme. Readings will draw on various genres: classics ("Crime and Punishment" and Thomas Mann's "The Magic Mountain"), crime fiction (Donna Tartt's "The Secret History"), and narrative nonfiction (Rebecca Skloot's "The Immortal Life of Henrietta Lacks" and Gay Talese's "Honor Thy Father"). We will examine and explore the elements that sustain long and complex stories. Students will write one very long (50-page) essay or piece of fiction over the course of the semester.

COL232 Truth & the Poet: Introduction to Phenomenology and Lyric Thinking
What is lyric poetry? What is phenomenology? Can poetry think phenomenologically? What can phenomenology tell us about the way lyric poetry communicates experience? What is the nature of poetic experience, and how does it relate to the structure of experience more generally? What is the relationship between subjectivity and objectivity in experience and the meaning that we give to it? This course provides a foundation for (1) ways of reading and discussing lyric poetry, and (2) understanding and engaging with the school of philosophical thought known as phenomenology. We will read poems from a wide variety of periods, languages, and cultures including Sappho, Césaire, Vallejo, Plath, Dickinson, Rilke, Rimbaud, Stevens, Baudelaire, Dylan, and many others. We will build a basic approach to phenomenology through select readings of Husserl and Heidegger. This course is designed for students with no prior knowledge of philosophy or poetry. By working interdisciplinarily with various thinkers and poets, this course will introduce or continue familiarity with close reading in the College of Letters and other areas of the humanities. This course is recommended but not required prior to taking COL 309 (The Poet & Truth).

COL233 Visual Sounds: Exploring the Landscape and Architecture of Musical Notation
This course examines a diverse range of musical works seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the ninth century? How do 1960s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater. One of the reasons composers started to experiment with open scores in the 1950s and 60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students. No prior knowledge of musical notation or instrumental expertise is required. Meetings will involve discussion of a wide range of readings with

the goal of expanding understanding of multiple relationships between music and visual materials. Learning Objectives: To gain familiarity with the diversity of forms of musical notation. To recognize the variable relationships between inspiration, transcription, performance, and recordings. To consider musical notation as a form of design, a language code, and a form of translation. To develop creative processes and understand the creative processes of others.

COL235 Re-imagining Dante's Inferno: Social Justice and the Arts
Sentenced to death for crimes he did not commit, Dante Alighieri wrote his epic poem about a journey from hell to heaven in an impoverished state of exile. Drawing on innovative techniques of music, dance, painting, and theater Dante denounced political corruption and social injustice in a story that has inspired artists throughout the world to create new work about the search for freedom, including the Russian dissident poet Osip Mandelstam, Black revolutionary playwright Amiri Baraka, the Chinese artist/activist Wei Wei, and 17th century prisoners of the Inquisition. Students will read selected cantos from Dante's "Commedia," consider contemporary news accounts of modern equivalents to medieval injustices, examine previous adaptations of the poem, and devise their own responses to Dante in the art form of their choice (theater, dance, poetry, playwriting, rap, music, spoken-word, visual arts).

COL236 Don Quixote: How to Read the Ultimate Novel
No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

COL237 Reporting for Narrative
Narrative nonfiction--a.k.a. feature writing, or literary journalism--deploys exhaustive reporting and research in a form that draws on the tools and traditions of literature: character, plot, and scene, along with essayistic inquiry and lyric attention to the line. This course, structured as a weekly writing seminar, will provide an editorial and critical scaffolding for students to produce a final work of long-form nonfiction of their own, which will go through a rigorous process of development and revision. Workshopped peer critique of writing in progress will be supplemented by discussions of readings in the craft of nonfiction, the theory of narrative, and classic and contemporary examples of the form, from magazine features to book-length dispatches.

Gen Ed Area: **HA-WRCT**
Identical With: **WRCT217, ENGL227**
Prereq: **None**

COL238 Animal Theories/Human Fictions
The question of "the animal" has become a recent focus of theory, although depictions of nonhuman animals can be traced to the very origins of representation. This course will move among literature, philosophy, art, and theory in an effort to trace the changing conceptions of human-animal difference and human-animal relations from 18th-century fictions of savage men and wild children to current theories of the posthuman. We will consider the ways that the representation of "the animal" intersects with theories of gender and race as it also contests the grounds of representation itself. Authors may include Rousseau, Poe, Sewell, Mann, Colette, Coetzee, Heidegger, Agamben, Derrida, and Harway.

COL239 Rebels and Rebellions in Early Modern Spain
What does it mean to be a rebel? This course examines literary, visual, and historiographical representations of rebels and rebellions in early modern Spain. Students will examine the uprisings of aggrieved comuneros (proto-bourgeois revolutionaries) in Castile and of outraged moriscos (Muslims converts to Christianity) in Granada and Aragon, the covert spiritual rebellions

of crypto-Jewish conversas (Jewish converts to Christianity) and crypto-Muslim moriscas, as well as texts composed by women writers who rebelled against gender norms and Spain's most famous playwright's classic rebellion play. We will analyze the scathing testimonies of expelled moriscos and paintings that reimagine the pre-expulsion revolts of Valencian moriscos alongside gripping examples of local resistance to the moriscos' banishment, an astonishing and unprecedented tragedy in Spanish history. The seminar will introduce students to a critical framework for analyzing visual and multilingual texts. Close readings of "rebellious" texts will acquaint students with both known and nameless rebels of Spain, as well as with the unresolved legacies they left behind.

COL247 The Fall of Rome and Other Stories
The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with selections from a range of authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea, and many others--to connect the fall of Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

Prereq: **None**

COL248 Foundations of Critical Theory: Marx, Nietzsche, and Freud
This course serves as an introduction to the main ideas of Marx, Nietzsche, and Freud, and their distinct yet similar techniques of interpretation. Michel Foucault once claimed that Marx, Nietzsche, and Freud "have changed the nature of the sign and modified the fashion in which the sign can in general be interpreted" -- which means that they changed the way in which we interpret and make sense of the world and of ourselves. Marx did so by leading his readers, in Capital, to "the hidden abode of production" where "the secret of profit-making must at last be laid bare;" Nietzsche did so by inviting his readers, in his Genealogy of Morality, to "go down and take a little look into the secret of how they fabricate ideals on earth;" Freud did so by teaching that we cannot know ourselves and are hence "not the master in our own house."

This course is designed to make critical theory and contemporary discourses in the humanities and social sciences more accessible by providing the modern historical and philosophical foundations for key critical concepts such as interpretation, subject/agency, history, origin, society and social power, value, modernity, capitalism, socialism, and religion/morality. We will explore some of the most influential writings of the respective authors in a comparative manner and, thus, come to a better understanding of the genesis of critical modern thinking.

COL249 Thinking By Analogy: The Philosophical Use of a Literary Form
"Juliet is the sun!" So says Romeo, but what does it mean to say someone is the sun? Presumably, Juliet is the sun in being the source of warmth, life, and light in Romeo's world. Yet Juliet is of course not the sun in being an object of astrophysical study, or a giant ball of burning gas. Romeo's claim works, it seems, through a curious interweaving of being and not-being; of sameness and difference. Analogical thinking serves as a source of illumination in all human cultures, and is a pivotal method of comparative and critical inquiry across a range of diverse fields. It facilitates the exploration of abstract themes in literature, aids in drawing insightful inferences in scientific discovery, navigates the complexities of case precedents in legal reasoning, and supports the crafting of compelling ethical arguments. This course will examine the art of analogy as a tool for philosophical understanding and creative thought, tracing its development in the history of philosophy through to its contemporary applications. Roughly half of the semester will focus on premodern perspectives on analogical thinking and verbal image-making, with an emphasis on the contributions of Plato and Aristotle. The remaining half will focus on later works of philosophy and literature that theorize about or employ analogical methods. Our interest throughout will be in how such thinking helps address issues surrounding the nature of reality, representation, and interpretation.

COL250 The Renaissance Woman
This course takes seriously the socioeconomic, cultural, religious, and physical restrictions placed on women writing in the 16th and 17th centuries. Through a selection of literary works, we will examine the ways in which early modern women exercised considerable authorial agency in the poetic-fashioning of the literary tropes, genres, and forms of thought that they inherited. Often re-forming, reinventing, revising, and re-imagining poetic spaces, these women developed their own styles of critique and creation from within their historically specific concerns. This course recovers works that were frequently written out of the study of the early modern during the 18th, 19th, and 20th centuries in order to grapple with the imaginative voices of women writing under the constraints of their time.

COL251 Kafka: Literature, Law, and Power
Elias Canetti claimed that among all writers, Kafka was "the greatest expert on power." In this course we will focus on Kafka's narratives of power relations. We will read and discuss Kafka's sometimes painfully precise descriptions of how power is exerted in the family and in personal relationships and how scrutiny and discipline are exercised over the body. We will also consider Kafka's depictions of physical violence and of apparatuses and institutions of power and the ethical and political implications of these depictions. The working hypothesis of this course is that Kafka not only tells stories about power, but that his stories also contain an implicit theory of how power works in modern society.

COL252 Writing Love: Articulations of Passion, Genres of Intimacy
What is love? How do we understand the amorous? How do we write the erotic? Is the passionate necessarily opposed to the intimate? Can the prosaic be poetic? This course investigates literary works that depict, problematize, immortalize, and give expression to the varied and nuanced forms of erotic love in human relationships. We will examine and employ the art of verbal language in articulations of passion and genres of intimacy found in philosophical discourse, lyric verse, epistolary exchanges, prose fiction, and dramaturgical and cinematic representations. By working through a liminal space between the sensible and the intelligible, desire and devotion, ineffability and fidelity, absence and presence, mortality and immortality, we will posit and discuss the perennial question: What is love?

Students will be given the opportunity to write analytically and creatively in response to the assigned readings.

COL253 Journey to the Divine: Islamic Mysticism in Thought and Practice
This course will explore the history, practice, and theory of Sufism, typically understood as the expression of mysticism in Islam. By carefully reading classics of the genre, we will aim to get a deeper understanding of key Sufi principles and priorities. Our survey will extend to Sufi classics such as al-Ghazali's Deliverance from Error, mystical poetry by greats like Jalal al-Din Rumi, and modern Sufi compilations by such diverse figures as the Pakistani thinker Muhammad Iqbal and the British mystic and scholar Martin Lings. We will also delve into philosophical Sufism, with a focus on the insights of the preeminent Andalusian mystic Muhyiddin Ibn 'Arabi, renowned as the "Greatest Master" of the Sufi path (al-Shaykh al-Akbar). Beyond textual analysis, the course incorporates an experiential dimension by delving into Sufi art, including various musical genres such as qawwali. Themes to be explored include divine love, spiritual purification, and truth according to the Sufi way. While our focus will be on reading the greats of Sufi literature, we will also incorporate history in order to give a historically situated understanding of the development of Sufi thought.

COL254 Folly & Enlightenment: Madness Before and After the Mind/Body Split
This course examines a variety of ways in which madness has been conceptualized in literary and philosophical texts. Through close readings of classical, early modern, and modern works we will consider forms of human disquiet which have been framed as amorous rapture, poetic furor, the wisdom of folly, visionary experience, satiric subversion, apotheosis, and enlightenment. We will reconsider Foucault's observation that madness is contingent on society by exploring the ways in which perceivably mad characters interact with the limits of their social restrictions and the boundaries of consciousness in order to reveal truths and manifest new outcomes. Special attention will be paid to relationship between insanity and intellect. What is madness? What does it reveal to us about ourselves and our worlds? How does the history of madness inform our understanding of contemporary discourse on mental health and psychic well-being?

COL255 Entangled Sounding Objects: The Social Life of Musical Instruments
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they serve as both tangible and symbolic objects that hold significant meanings for the communities they serve. This course examines the social lives of musical instruments worldwide, focusing on Central Asia, a region that extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south. Students explore theories and concepts derived from interdisciplinary literature on material and sound culture and apply them to case studies of a variety of musical instruments -- lutes, flutes, zithers, harps, and drums -- in Central Asia and beyond. Through these case studies, students learn about the historical trajectories and cultural significance of individual instruments in various societies; consider how instrument making and performance are influenced by indigenous religious beliefs and cosmology, political ideology, ecology, and economy; and interrogate the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

COL256 European Realist Novels
The realist novel has a strangely ambivalent legacy. On the one hand, like other literary forms, it is repeatedly consigned, sometimes dismissively, to an earlier moment in literary history: surpassed by modernism, reimagined by postmodernism, and replaced by film, television, and whatever forms of new media might soon emerge. Yet it has also clearly endured--in the popular imagination as well as in the academy--as a pervasive norm, continually setting the standard against which popular narratives may be judged to be successful and (more importantly) serious. Reading these novels, then, does not just teach about an important period in literary history (though it does that, too); it gives us a better understanding of what we continue to expect from the fictional stories that claim to represent the world around us.

We will spend the first six weeks on an overview of the influential tradition of French realism, reading representative texts by Stendhal, Balzac, and Zola. In the second half of the semester, we will delve into two longer novels that have often been regarded as exemplary (even paradigmatic) works of realist fiction: Eliot's Middlemarch and Tolstoy's Anna Karenina. While the emphasis will be on the novels themselves--what they do and how they work--we will also read a small selection of secondary texts (variously critical, historical, and theoretical) on realism, narrative, and the novel as genre.

COL258 The Word for World is Information: Ideologies of Language in Science Fiction & Film
By the middle of the 20th century, it had begun to seem possible to produce a grand theory of communication that would use language as a basis for understanding all of human thought, behavior, and culture. As competing versions of such a theory circulated through academic disciplines as disparate as anthropology, neurophysiology, and the emerging field of computer science, they also filtered out--sometimes in strangely warped or oversimplified forms--into popular culture.

This course will examine the most interesting and influential of these theories, both in their scholarly origins and in their most puzzling and promising elaborations in works of literary and filmic science fiction. We will be particularly attentive to the ways that the narrative logic of science fiction texts can gloss over certain logical and philosophical inconsistencies in these theories while revealing others.

COL259 The Human Condition: Arendt, Nietzsche, Marx
"God is dead," the philosopher Friedrich Nietzsche wrote at the close of the 19th century, "and we have killed him!" Nietzsche presents these words as being proclaimed by "a madman who in the bright morning lit a lantern and ran around the marketplace crying incessantly." Both the content of this famous quotation and its setting express a concern with the internal and external conditions under which modern humans live and make sense of their lives: without the certainty of divine guidance and order (internally), encountering one another only as impersonal buyers and sellers on the marketplace (externally). In this seminar, we will study three strikingly unique yet nonetheless intersecting ways of addressing the human condition after the death of god. We will start with Hannah Arendt's magisterial "The Human Condition" (1958), in which she presents the history of how in the Western philosophical tradition the active life (the vita activa, as distinguished from the vita contemplativa, the life of the mind) has been conceptualized. Drawing on Nietzsche's genealogical method, Arendt traces the genesis of concepts from their Greek, Latin, and Biblical origins to modernity. In doing so, she focuses on the activities of labor, work, and action: Labor is the "metabolism between humans and nature" (Marx), the process through which we appropriate the earth for our survival as a species; work is the transformation of the earth into a durable world; and plurality is the sharing of this world with others.

From Arendt's comprehensive conceptual history of the human condition, we will proceed in reverse chronological order to contextualize and challenge her claims. Arendt singles out Nietzsche and Marx as the paradigmatic modern "life and labor philosophers" and foremost representatives of philosophical "naturalism," and we will first examine Nietzsche's account of the devolution of European morality to nihilism and his critique of Western metaphysics as a "life-denying" death-cult, and will then, in the final third of the semester, investigate Marx's attempts to historicize and rethink the interdependence of humans and their natural environment in terms of an alienation of practice and the transformation (necessitated by the capitalist "law of value") of human labor into an abstract power of domination over humans and, eventually, the whole planet.

COL260 Detective Fiction: Procedure and Paranoia in Spanish Narrative
The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective--a person who is generally outside the law and sometimes crazy or paranoid--help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

COL262 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

COL264 Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond
The Holocaust, Germany's STASI terror, resistance to dictatorships, debates about Germany's war memorials, and colonial history come to mind when we think of 20th-century Germany. In this seminar we will pursue the questions: What do we remember? How do we remember? What are places of remembrance, how are they created, and what functions do they have in our society and for us personally? The term "places of remembrance" comes from the French (lieux de mémoire, literally, places of memory). This term was coined by the French historian Pierre Nora. For him, places of remembrance are not only material places, but also the so-called 'immaterial' places such as people, data and concepts that are anchored in people's collective memory and have an identity-forming function. In relation to Germany, places of remembrance can be specific places (like Weimar) or memorial sites (the Auschwitz concentration camp), but also buildings (Kaiser Wilhelm Memorial Church in Berlin), monuments (Bismarck Monument in Hamburg), people (e.g., names of people on street signs), events (Fall of the Wall), customs (Christmas) or symbols. The French sociologist Maurice Halbwachs, who was murdered at Buchenwald, described memories as a connective structure. They connect people socially and temporally. But not only individuals, also societies, nations and cultures remember (= collective memory). According to Halbwachs, crystallization points or places of memory are needed for this process. Like pieces in a mosaic, these form the identity of a culture, a nation, or a society. Their meaning and their perception can change over time. Some things can also be forgotten, but places of remembrance can help us avoid forgetting. With this caveat in mind, we want--among other things--to explore, discuss, and present "places of remembrance" and the role of memory culture in Germany and beyond.

COL265 Frankfurt School Critical Theory, Then and Now
This course serves as an introduction to Critical Theory as first envisioned and practiced in the 1930s and 1940s by a group of European refugee scholars in New York and Los Angeles associated with the "Institute for Social Research," which later became known as the "Frankfurt School" (the city of Frankfurt being the location of its European origin and post-WW2 abode). Drawing on the German philosophical (Kant and Hegel), sociological (Weber and Simmel), psychological (Nietzsche and Freud), and Marxist (Engels, Marx, and Lukacs in particular) intellectual traditions, "Critical Theory" was intended to shed light on the genesis of capitalist class societies' inherently antagonistic and irrational makeup. Uncompromisingly interdisciplinary, the critical theorists explored phenomena such as authoritarian movements, mass media, propaganda, and the culture industry, and in doing so championed the significance of art and radical thought for the prospects of liberation from authoritarianism and alienated social relations. For the first generation of Critical Theorists (who must be distinguished from their less radical heirs, such as Habermas and Honneth), critique was not a purely academic exercise, but was pursued for the sake of radical social transformation and thus was sparked by a utopian impulse.

COL266 History and Limits of Aesthetic Theory
This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

COL267 Practical Criticism
In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called "practical criticism." Each week, he distributed a single poem to his students without revealing the poem's title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards's experiment for the twenty-first century. We will follow Richards's protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students' judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanuel Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

COL268 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

COL269 Modern Aesthetic Theory
As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebility of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

COL270 Modernist City-Texts
Since the 19th century, the city has been both a privileged and a problematic object of representation for narrative realism: privileged because urban spaces have increasingly been seen as shaping or producing the very social relations and individual experiences that realism wants to describe; problematic because the city itself, as a coherent totality that might explain those relations and experiences, is too vast, heterogeneous, and complex to be represented through the traditional techniques of realism. This course will approach the problems and possibilities of the city for realism through a close reading of two large, ambitious texts that attempt to represent the city as a totality: James Joyce's novel ULYSSES (1922) and David Simon's television series THE WIRE (2002-2008). We will be particularly concerned with two techniques, pioneered by Joyce, for representing the city: stream of consciousness, which creates a tour of the city from the perspective of a single, mobile flâneur; and montage, which creates a map of the city by juxtaposing various cross-sections of social life or various institutions central to the city's functioning.

COL271 The Sonnet: Forms of Love, Death, and Beyond
This course explores motifs of love, death, and beyond through a single poetic form: the sonnet. We will read transhistorically from the "invention" of the sonnet in the 13th-century Sicilian School to its use in contemporary American poetry, touching on poets in a variety of languages and time periods. From individual poems to sonnet sequences, we will explore the way in which lyric poetry engages non-narrative modes of meaning-making within the formal expectations of the sonnet. Are sonnets uniquely adapted to types of experience which defy easy articulation? In what ways does the form of the sonnet make it possible to give literary representation to the ineffable? This course pays close attention to the relationship between form and content in a variety of poetic works. Poets to be read include Dante, Labé, Shakespeare, Inés de la Cruz, Barrett Browning, Yeats, Millay, Rilke, and Stallings. Writing assignments will include both creative and analytic writing.

COL272 Theories of Fascism
Fascism came out of the horrors of the First World War and drove the world into the even greater horrors of the Second World War. Arguably, however, fascism is more ubiquitous and elusive than historical dates suggest: it was prefigured in how early-modern authoritarian leaders agitated the masses (as analyzed by Max Horkheimer), in France's Second Empire Bonapartism (as analyzed by Karl Marx), and in Richard Wagner's intoxicating spectacle of the total work of art (as analyzed by Friedrich Nietzsche, Charles Baudelaire, Theodor Adorno, and many more). After fascism as a political movement was largely defeated, its theoretical value for understanding race, class, gender, and sexual domination in late-capitalist societies only increased, albeit in a fractured and often hazy way. Over the decades, the body of theoretical thought on fascism has grown to encompass not only its program, tactics, rhetoric, and organization, but also its aesthetics, psychology, and political economy. Because fascism, as Alberto Toscano observed, "is a matter of returns and repetitions," this course will study theories of fascism in thematic units rather than chronologically. Our focus will

be on fascism's transatlantic dimension, and it will include the writings of fascist agitators (Mussolini, Hitler), intellectuals (Evola, Schmitt, Heidegger), and artists (Wagner, Marinetti, Riefenstahl, Jünger). In addition, the course will draw on the traditions of anti-fascist Critical Theory (from Zetkin and Lukács to the Frankfurt School to Žižek and Theweleit), French post-war thought (Lacoue-Labarthe, Guattari), and Black Radicalism (Césaire). We will also study reevaluations of fascism in the context of its political, cultural, and intellectual resurgence over the last decade (Marasco, Herzog, Massumi, Traverso, Toscano).

COL275 Moral Complexity in Islam: Origins to the Present
Ethics seem straightforward, until you need to explain your choices. How do you judge actions of truth and deception, love and hate, wealth and poverty, pain and punishment, freedom and slavery? Over the long history of Islamic cultures, how did people describe a good, full life? Is there a unique Islamic ethos of action? Do Islamic thinkers tie values and decisions to divine revelation, or to reason? How do we determine the nature of good and evil? Can God do evil, and what would that even mean? In confronting these questions along with Islamic philosophers and thinkers we will find a surprising range and diversity, and some of history's most compelling answers. Diverse and creative, these answers from the Islamic past compel us to rethink some of our basic presuppositions. Blending theory with case studies from the Islamic past and present, we will approach some of the hard ethical questions that Muslims across the world have had to deal with historically and continue to address today.

COL276 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

COL277 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

COL279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm

collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

COL280 Image/Word: Narrative and Photography in Contemporary Spain
The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization; that is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar, where students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life. In this seminar we will work with Cuban artist and writer Jacqueline Herranz-Brooks, who will work with students in their creative project.

COL281 Histories of Race: Science and Slavery in an Age of Enlightenment
The concept of race was first "invented" during the 18th century by anatomists, natural historians, and, ultimately, the century's classifiers. This class will come to grips with the birth of this concept in two ways. First, we will read excerpts from travelogues to Africa and the Caribbean (as well as short excerpts from natural history) in order to chart the slow and halting creation of the concept of race as it crystallized in European thought during the 18th century. Having studied this "proto-raciology," the class will then examine 16 unpublished manuscripts that were submitted to a contest on the source of "blackness" organized by the Bordeaux Royal Academy of Sciences in 1739. These include essays submitted by priests, anatomists, and partisans of climate theory. Students in this class will actively engage with these materials by producing glossary definitions that will be published along with the entire collection of essays. The ultimate goal of this course is to provide students with an understanding of the concept of race that will inform their reactions to this question as both a historical concept . . . and an ongoing problem that affects all of us in the present.

COL282 Death and the Limits of Representation
The disciplines of history, philosophy, and literature all hinge on the issue of representation. The ability to communicate ideas, visions, or arguments all depend on the ability to represent these abstract notions in a concrete and recognizable form. In this course we will problematize the basis of all three disciplines by exploring Death as the limit of representation: as that which is ultimately unknowable (or knowable only second-hand) and thus beyond representation. Indeed, what is the concept of the "ghost" but an attempt to represent someone who is dead in the recognizable form of the body that once lived. Yet, the ghost appears and disappears, is not bound by the laws of time or space, and is largely present in its absence. By exploring texts by such authors as Plato, Shakespeare, Poe, Derrida, Levinas, Mbembe, and Hartman, and studying historical events such as the "black death," the Middle Passage, and the Shoah, we will attempt to understand the project of representation and its limits.

COL283 The Rationalist Tradition in Early Modern European Philosophy
This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

COL285 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will

include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

COL287 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

COL288 Introduction to Journalism: Constructing the News
Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea -- or ideology -- these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work.

Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro¿s anthology Shaking the Foundations: 200 Years of Investigative Journalism in America. These include readings from early Black press pioneers (Ida B. Wells; Marvel Cooke); muckrakers and investigative journalists (Lincoln Steffens; Vera Connolly); and pathbreaking science journalism (Rachel Carson¿s Silent Spring). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace¿s The View from Somewhere: Undoing the Myth of Journalistic Objectivity and Ben Smith¿s, Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral.

COL288Z Solitude, Society and Loneliness in Romanticism and Modern Culture
We are now living in an age of constant connection to anybody, anywhere, at any time. An indirect result of this is that individual privacy and solitude are being sacrificed (sometimes consciously, sometimes not) for the pleasures as well as the risks of interconnection. The recent COVID-19 pandemic has, however, highlighted the risks of extended solitude, which has made reconnection a newly relevant theme in our lives. We thus find ourselves at a moment in history when we think of both solitude and connection with deep feelings of ambivalence. How can literature, sociology, art, and film about solitude and connection help us to think clearly and deeply about their roles in our lives?

We will read and discuss authors who consider the risks and pleasures both of solitude and interconnection, from early Romantic writers such as Mary Shelley, to American Romantics such as Henry David Thoreau and Emily Dickinson, to modern European writers such as Franz Kafka and Dino Buzzati. We will also examine non-fiction works such as Sherry Turkle's Reclaiming Conversation: The Power of Talk in the Digital Age and Virginia Woolf's A Room of One's Own. We will use these works ultimately to consider our own culture of interconnectivity. What place and meaning do the solitude and privacy so prominent in Romantic literature have in a modern culture that makes them virtually obsolete? What can films such as Kieslowki's A Short Film about Love and Hitchcock's Rear Window show us about the relationship of solitude and privacy? More generally, what can these books and films tell us about solitude and interconnection in and since the nineteenth century?

COL289 Italian Filmmaking by the Book: Adaptations, Texts, and Contexts
This course explores the adaptations and transformations of Italian literary texts into their cinematic and televisual counterparts. We will principally study Italian narratives from the 20th and 21st centuries and their screen adaptations as a way of uncovering the modes and means by which Italian screen culture borrows from literary antecedents. Is the relation between literary texts and their screen adaptations a love story or bad romance? Is it characterized by a "faithfulness" to the text or a "betrayal"? Throughout the semester, students will acquire an enriched understanding of the assorted texts and their contexts

by studying varied genres (short fiction, novels, nonfiction, detective stories), a variety of themes (crimes both real and imagined, petty and powerful; historical revisionism; personal and political dilemmas), and diverse geographical settings focusing principally on Southern Italy (including cities and islands reaching from the Mediterranean to the Adriatic).

All students in the course will study a common core of five author/director pairs. The core consists of "Il Gattopardo" (di Lampedusa/Visconti); "Io non ho paura" (Ammaniti/Salvatores); "L'amica geniale" (Ferrante/Costanzo); "Gomorra" (Saviano/Garrone/Sollima); and "Novelle per un anno/Caos" (Pirandello/Taviani). Additionally, students will, in consultation with the instructor, choose a sixth pairing from the list of the following titles, which will serve as the basis of their end-semester presentation as well as an element of the oral final exam: "Il giorno della civetta" (Sciascia/Damiani); "Il contesto/Cadaveri eccellenti" (Sciascia/ Rosi); "I Malavoglia/La terra trema" (Verga/Visconti); "Padre Padrone" (Ledda/Taviani); "Quo vadis, baby?" (Verasani/Salvatores); "Acciaio" (Avallone/Mordini); "Il conformista" (Moravia/Bertolucci); "Todo modo" (Sciascia/Petri); "Minchia di re/Viola di mare" (Pilati/Maiorca); "Benzina" (Stancanelli/Stambrini); "Il padrino" (Puzo/Coppola); "La tregua" (Levi/Rosi); and "Le forme dell'acqua" (Camilleri/Sironi). Students may also care to consider literary texts from earlier historical periods: Basile's 16th-century "Il cunto de li cunti/Il racconto dei racconti" (Garrone) and Collodi's 19th-century "Pinnochio" (with adaptations by Disney, Benigni, and Garrone). This course will be conducted in Italian. This course is appropriate for all students who have completed ITAL 112 or whose placement exam indicated a course numbered ITAL 221 or higher.

Students are encouraged to put the lengthened winter break to good purpose. All students are expected to read the first book of Ferrante's Neapolitan quartet, "L'amica geniale," during the winter break. It is a long novel, but students will find that the Italian is not challenging. Any edition in Italian will be fine (e.g., electronic, print, used, etc.). Reading in advance of the semester will facilitate students' workload as well as keep Italian flowing during the lengthy pause. It is further greatly recommended that students read di Lampedusa's "Il Gattopardo" in advance of the semester. If students have already taken an Italian course numbered 221 or higher, or have already studied in Italian, it is recommended that they read "Il Gattopardo" in Italian. Any edition will serve.

COL290 Nietzsche - Science, Psychology, Genealogy
This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

COL291 Forward, Without Forgetting: The GDR in Literature and Film
In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include short stories, songs, and excerpts by and among others: Wolf Biermann, Johannes Becher, Günther de Bryn, Stefan Heim, Rainer Kunze, Brigitte Reimann, Claudia Rusch, Susanne Schädlich, Maxi Wander, Christa Wolf. Participants will view and discuss films and TV series produced before and after unification.

COL292 Reason and Its Limits
This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness--but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

COL293 Words and Sex: Storytelling, Censorship, and Boccaccio's Decameron
We will explore literary genres and representations of sex and gender in Boccaccio's Decameron. Through close readings of selected tales and cultural analyses of their trans-historical and transnational reception, we take the Decameron's words as point of departure for the study of storytelling and the politics of readership. As modern readers of Boccaccio's renowned and classic Medieval collection of short tales, we investigate the text's notions of love, gender, and sexuality by comparing and contrasting the Decameron with various other texts across varying media, from the works of Petrarch and Chaucer to the modern readings of D. H. Lawrence and Pier Paolo Pasolini, and from visual arts to digital humanities. Students are invited to creatively engage with these and other texts of their choice (and with approval of the instructor) in order to produce, by the end of the course, either a) an analytic blog post that may be published on the H-Net of the Transnational Italian Studies working group; or b) an individual or collective project inspired by Boccaccio's Decameron.

COL294 Soundscapes of Islam
From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

COL295 Rome After Rome: Culture and Empire of Constantinople
Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capitol to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.

In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (https://arcg.is/0e4Lb4). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

COL298 Music of Central Asia: From Throat-singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal, and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

COL299 Palestina: Another Middle Ages
The historical region of Greater Palestine (the Near East region located along the eastern Mediterranean coast) was a universal crossroads throughout the Middle Ages: maps drawn in the Anglian wilderness made Jerusalem the center of the world; Caesarea Maritima boasted a library second only to Alexandria; Damascus, Mecca, Cairo, and Antioch funneled and ferried capital and commodities to and from China, India, Africa, Europe, and (yes) North America. These diverse and overlapping networks shaped Greater Palestine into a key locus of global history. From the backdrop of Alexander the Great & the Hellenistic Era, our course will trace the region's history from the establishment of Roman governance, from Judaism's split between the messianic Hellenized followers of Jesus of Nazareth and diasporic Talmudic Rabbinism, to the Persian Wars, the rise of Islam, the Crusades, and finally conclude with the Mongol invasions -- halted in Gaza and repelled toward Syria. Relying on a dialogue-across-difference pedagogy we will combine translated sources with innovative historiographical methods, and highlight the interconnectedness of Jewish, Christian, and Muslim experiences across the region known broadly as Bilad al-Sham or Palaestina. In this work we will make an Other's Middle Age.

COL300 Infinity and the Mathematization of Nature: Early Modern Perspectives
The "mathematization of nature" is a hallmark of the so-called "scientific revolution" in sixteenth- and seventeenth-century Europe. By privileging quantitative methods for measuring and explaining natural phenomena, thinkers broke with the largely "qualitative" forms of explanation typical of the Aristotelian tradition. Especially with the development of new mathematical methods--notably, advances in algebra, analytical geometry, and the development of infinitesimal calculus--the scope and explanatory power of

natural philosophy was considerably extended. At the same time, however, new puzzles arose about how the pristine models of abstract mathematics could apply to the messy reality of concrete nature. This question was especially pressing in connection with new mathematics' exploitation the notion of infinity: infinite series, infinite extensions, infinitesimally small quantities, and even infinities greater than other infinities. Should we take the successful application of such infinitary mathematics to natural phenomena to imply that nature itself harbors an infinity of infinities? And how must we reconceive the cognitive powers of the human mind to make room for the fact that infinity has ceased to signify the unknowable as such and has instead become a primary tool for producing scientific knowledge?

In this seminar, we will examine some of the most prominent Early Modern applications of infinitary mathematical methods in the study of natural phenomena as well as central debates about what sense, if any, can be made of these procedures and their apparent success.

COL301 Researching and Writing Historical Narrative Nonfiction: A Workshop
Historical Nonfiction will be a workshop-based course. Students will have the opportunity to work on a project led by Charles Barber, a book-in-progress of historical narrative nonfiction based in Palm Beach, Florida in the 1920s. The project involves a decade-longs conflict between a gang and two father and son sheriffs, set against the explosive (and often corrupt) growth of Palm Beach as a resort in the early 19th century. Students will work with court and governmental records, as well as archival materials of all sorts. Students will receive professional credit for their contributions. A focus of the first part of the course will be historical methodology and evaluation of records; the second half of the course will address the question of transforming historical materials into compelling narratives. Readings will include models of historically based nonfiction, such as David Grann's Killer of the Flower Moon and Patrick Radden Keefe's Say Nothing.

COL302 Cultural Criticism and Aesthetic Theory: Walter Benjamin and Theodor Adorno
This seminar introduces and explores the cultural criticisms and aesthetic theories of Walter Benjamin and Theodor Adorno, two of the 20th century's most notable Marxist thinkers and critics. Our aim will be to illuminate the intimate interconnections between cultural criticism and aesthetic theory taking place concurrently with the rise of the artistic avant-gardes (with which both thinkers felt deep affinities). We will study the intellectual origins, cultural contexts, methods, and critical aims of Benjamin's and Adorno's uniquely individual yet also closely related practices of cultural criticism. Further, we will examine the assumptions underlying their aesthetic writings and seek to reconstruct their respective contributions to aesthetics.

Over the course of the semester, we will study the works of our protagonists both on their own terms and in comparison to each other. Major thematic units will include (but are not limited to) their writings on literary aesthetics, narrative, and translation; architecture and the city (Naples, Moscow, Paris, Berlin); landscape and nature; mass culture and aesthetic autonomy. Our starting point will be Georg Lukács's Theory of the Novel, a work to which both Benjamin and Adorno were much indebted. On occasion, we will supplement our explorations with asides from the 1920s and 1930s (by Alfred Sohn-Rethel, Siegfried Kracauer, Bertolt Brecht, Asja Lachs, Ernst Bloch) as well as scholarship for optional reading (by Susan Sontag, Hannah Arendt, Fredric Jameson, Susan Buck-Morss, Miriam Bratu Hansen, Susan Ingram, Judith Butler, Esther Leslie).

COL303 Radical Self-Care
This is a higher-level seminar on philosophy as a way of life that will explore how the notion of self-care has been developed and deployed throughout history by several political theorists and activists, including Mohandas Gandhi, MLK Jr., Nelson Mandela, Audre Lorde, Angela Davis, bell hooks, and Sara Ahmed.

When conducted in the present day, reflection on how one should live naturally requires attending to matters of sociopolitical concern, such as healthcare inequities, environmental degradation, wealth disparities, and prison reform. An investigation into the links between personal and social well-being has so far been something of a lacuna in the field of philosophy as a way of life, though in a variety of formulations and across several traditions, practices of self-care and self-formation have typically been seen as continuous with (and even a prerequisite for) a robust engagement with others and the pursuit of social justice causes. We will explore the connection between these two domains in this course. As a project during the semester, students will be asked to engage in a cause that matters to them by implementing selected ideas from the thinkers and activists that we'll be studying.

COL304 The Formation of the Modern Self: German Romanticism
The 18th century in Europe saw tremendous changes in the ways people thought about and saw the world. In the process, old certainties, assumptions, and authorities collapsed, requiring new conceptions of self and world. In the decades around 1800, it became increasingly clear that the Enlightenment's optimistic view of progress was hiding some deeper concerns about unsettling and urgent problems, such as the reintegration of the newly "liberated" individual into society, the disconnect between scientific hypothesis and a more holistic view of the world, the role of language as the main mediator of human experience, or the sorting and ordering of the sheer mass of knowledge and information that the Enlightenment produced. It was German authors and thinkers, in particular, who started asking and answering such questions, creating some of the lasting conceptualizations of the modern self in literature (Goethe), aesthetics (Kant), and anthropology (Herder), but also exploring roads not pursued any further, such as Goethe's theory of color. Later authors explored even more troubling questions about communal cohesion (Hölderlin), the dangers of misinformation and misconceptions (Kleist), and the disruption wrought by new technology (E.T.A. Hoffmann), topics of as much urgency then as they are today. By reading authors from this German "Romanticism," we will historicize, evaluate, and critique notions of the modern individual, just as

this very self is starting to dissolve under the pressure of new technology and accelerating social and political processes.

COL305 The Critic and Her Publics
The critic and her public are difficult concepts to define or fix. The critic is not a creative writer, an academic, a journalist, or a reporter, yet criticism borrows from the protocols of all four professions. The critic's publics are not made up exclusively of scholars, specialists, artists, or lay readers, but span these divisions. The aim of this course is to trace the evolution of the critic, her function, her style, and her publics from the seventeenth century to the present. Readings will include essays by Jane Anger, Margaret Cavendish, Joseph Addison, Richard Steele, Eliza Haywood, John Dryden, Samuel Johnson, Matthew Arnold, Henry James, T.S. Eliot, Virginia Woolf, Walter Benjamin, José Ortega y Gasset, Jorge Luis Borges, Clement Greenberg, James Baldwin, Mary McCarthy, Roland Barthes, Susan Sontag, Elizabeth Hardwick, Edward Said, Toni Morrison, Renata Adler, Michael Warner, Anne Carson, Margo Jefferson, and Elif Batuman. The class will be linked with the Shapiro Center talk series, "The Critic and Her Publics," and the Shapiro Center Master Classes.

COL306 Spectacles of Violence in Early Modern French Tragedy
The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

COL307 Negotiating French Identity: Migration and Identity in Contemporary France
With the largest minority in France being of Maghrebi origin, Islam has become the second largest religion in France today. What are the repercussions of this phenomenon for French identity? How did French society understand its identity and regard foreigners in the past? What do members of the growing Franco-Maghrebi community add to the ongoing dialogue surrounding France's republican and secular identity? This course will analyze the recent attempts at redefining French identity through a study of literary texts, films, and media coverage of important societal debates (e.g., the Scarf Affair, French immigration laws, the Algerian war). Readings, discussions, and papers will be in French.

COL308 Translation in Theory and Practice
This seminar is a workshop devoted to helping students from a range of disciplines and departments hone their practices of translation. Translation is part of a wide range of academic, publishing, and creative activities: humanities and social science scholars read texts in translation, translate while doing field work and archival research, and include translations in their articles and books; translation is an engine of creativity for many writers, bilingual or not. This course will begin by looking at various alternate translations of the same texts, to expand our sense of options and possibilities. The next five weeks of reading will introduce students to some of the main debates, theories, and practices of translation into English.

The second half of the course will focus on students' own translation projects. While you are welcome to pursue a project you already have in mind, most students will be choosing and starting a new project, guided by the discussions and topics in the first half of the course. The scope can be small (a single short story, a chapter of a novel or biography, a few poems or song lyrics), or you can have an eye to a bigger project you want to pursue after the end of the semester (a senior thesis, a short-story submission for publication, a book pitch). Week by week, all students will respond in class and in writing to translations-in-progress. In the last week, we will get to see and respond to everyone's revisions.

Facility in a language other than English is required; perfect fluency is not required.

COL308Z Contemporary Short Stories in Translation
This course will introduce students to a wide range of contemporary short stories from around the world, translated into English. We will read fiction from four geographical clusters--Nordic Europe, Latin America, East Asia, Western Europe--as well as from outside these relatively well-defined categories. Along with exploring the fiction itself, we will consider how the English-language publishing industry treats these different zones, as we acknowledge the risk of ending up with national or regional stereotypes. We will also keep in mind the translator's role as an active creator of the works we are reading. In week two, we will pay special attention to the crucial professional role of the translator in getting these authors published and recognized, and there will be in-class visits from one translator in each cluster. The objective of the course is to get a basic overview of different contemporary trends and traditions, and their various paths to publication in English, as well as hopefully finding one or two new favorite writers.

COL309 The Poet and Truth: Lyric Subjectivity, Phenomenology, and the Structure of Experience
Who is the poet? What is subjectivity? How is the "lyric I" located and articulated? How do lyric poems conceive of their own claims to truth? Is there a role for the poet in philosophy? What is phenomenology, and how did this particular branch of thought come about in the history of philosophy? Taking a key term for the exploration of the structure of experience in phenomenology, how might lyric poetry contribute to our understanding of 'intentionality'? Because phenomenology is not often taught, this course assumes no prior knowledge of phenomenological works. Some experience with close reading texts and prior familiarity with Descartes' Meditations will be useful but is not required. This course focuses on providing a foundation in phenomenology through the work of Edmund Husserl. Further developments in phenomenology will then be explored in Heidegger, Sartre, Levinas, Derrida, and Merleau-Ponty. Weekly selections of poetry will be taken from various time periods, cultures, and languages from antiquity to the present.

COL310 More-Than-Human-Worlds: Theories and Fictions
How do we imagine the worlds of other life forms: what they know, what is meaningful to them, their ways of communicating? Which senses must we use and what forms of translation are necessary (if impossible) to turn their languages, their thoughts, their desires into our fictions or poetry or theory? What stories have been told and what stories could or should we tell in order to inspire more responsive and responsible relations between the diverse yet enmeshed worlds of human and non-human lives? These are some of the questions we will be asking as we move through a diverse range of writings about relations to other animals and to other worlds that are both within and beyond our own.

COL311 Translation Workshop in Early Modern Spain: Topographies of Love, Arcadia, and History
This course takes a practical approach to the translation of early modern Spanish literature. We will begin by consulting various comments on the art and craft of translation made by 16th-century Spanish translators in their own works before we encounter the curious case of the "pastoral prosimetrum," a type of narrative fiction that reimagined the author and their contemporaries under literary pseudonyms in an updated version of an idyllic Arcadian landscape. From Spanish to English, from experience to poiesis, we'll recontextualize these topographies of love in their own literary and historical moment in order to translate those imaginaries into contemporary English. Readings will be in English and Spanish. Discussions and translations will be in English. There are no prerequisites, but reading knowledge of Spanish is required. Please consult the instructor if you have questions about your language ability.

COL312 Love and Other Useless Pursuits
What is love? Is it an emotion? A judgment? A way of coming to know ourselves or others? What is the point of love? Does it have a defined object, a purpose, or an end? Does it have a logic or does it defy logic? What good or evil can it do in the world? "Love and Other Useless Pursuits" is an upper level seminar that approaches these questions through a comparative history of literature, literary theory, and philosophical aesthetics. The authors we read will likely include Plato, Andreas Capellanus, Tullia d'Aragona, Margaret Cavendish, Immanuel Kant, Stendhal, Johann Wolfgang von Goethe, Ralph Waldo Emerson, Marcel Proust, Djuna Barnes, James Baldwin, Simone de Beauvoir, bell hooks, and Lauren Berlant.

COL313 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage
From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation. This counts as a Theater Method course for the Theater Major.

COL314 Cuban Literature and Film: Imagination, Revolt, and Melancholia
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism

and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

COL315 German Romanticism: Disenchantment and Re-enchantment
Famously, the sociologist Max Weber described the rational, enlightened age as "disenchanted": Unlike "the savage," he claimed, who uses "magical means" for manipulating "mysterious incalculable powers," the denizens of capitalist modernity use "technical means and calculation" to master "all things." At the same time, Weber indicated that the "process of disenchantment, which has been under way for millennia in Western culture," birthed abstract new enchantments: "Having lost their magic, the multiple gods of the past rise up from their graves in the form of impersonal forces, fighting for power over our lives and thus beginning anew their eternal struggle against one another." Against the backdrop of Weber's dialectic of disenchantment and re-enchantment, this course offers a representative overview of some of the key ideas, works, and authors of German Romanticism, a term that designates both a period that extends from about 1795 to 1848 and a style of creative and intellectual production that encompasses a remarkable diversity of phenomena, including the proto-avant-garde experiments with communal "sympoetry" and "symphilosophy" in the Early Romantic circles and the rise of "Dark Romanticism" that fuses a fascination with science and new technologies with a turn to the occult and demonic. In tracing the tensions between disenchantment and re-enchantment, we will consider works of literature, criticism, art, and music, including works by some of the key figures in the German intellectual and artistic tradition, such as Heinrich Heine, the Brothers Schlegel and the Brothers Grimm, E. T. A. Hoffmann, Ludwig Tieck, Caspar David Friedrich, Robert and Clara Schumann, Franz Schubert, Karoline von Günderrode, Bettina von Arnim, Novalis, Annette von Droste-Hülshoff, and the young Karl Marx.

COL316 The Corpse as Critique
From Ancient Greece to present-day Sri Lanka and Palestine, literary works have turned to the figure of the corpse in order to articulate critiques of domination and authority. In these texts, the dead human body, despite or perhaps because of its inertness, poses potent problems to the exercise of statist and racist violence, the depredations of plantation slavery and industrial capitalism, and the abuses of empire. What is this strange form of critique, rooted in mere matter that, itself, does nothing but decompose? And what might it teach us as we attempt to survive and thrive in a world defined by spiraling inequality, rising authoritarianism, and environmental catastrophe? In this course, we will begin to answer these questions by examining literary texts from authors including Sophocles, Nadine Gordimer, and Michael Ondaatje, as well as works of philosophy, history, anthropology, political theory, and literary theory from thinkers such as Walter Benjamin, Georges Bataille, and Katherine Verdery. In tracking invocations of the corpse at various historical junctures and in various literary genres, we will investigate what makes the dead human body such a compelling figure with which to expose and subvert the exercise of coercive power and violence. At the same time, we will attend to the unique affordances and limitations of literature, drama, and film in expressing this critical potential.

COL318 French Renaissance Theater Lab
In this seminar students will explore a variety of dramatic texts written and performed during the French Renaissance (c. 1500-1610). The first two-thirds of the semester will provide an overview of the poetics, rhetoric, and performance of early French theater, followed by discussions about gender, religion, politics, violence, and other topics as they arise within each play. Authors will include Marguerite de Navarre, Jean de La Péruse, Étienne Jodelle, François d'Amboise, Louise Labé, Robert Garnier, and Catherine Des Roches. During the last third of the semester, students will participate in a collaborative digital (online) critical edition of one of the plays studied. Emerging technologies in the field of digital humanities will be integrated into this lab portion of the seminar, as well as more conventional methods of establishing critical editions. Readings, written assignments, and class discussions will be in French.

COL320 Places of Remembrance: Historical Consciousness in Germany
Memorial days and monuments: every nation recalls its history. Antisemitism, the Holocaust, East Germany's STASI terror and the resistance to dictatorships, and the more recent debates about Germany's colonial history come to mind when we think of 20th century Germany. In this seminar, we will explore the culture of remembrance (Erinnerungskultur) and visit places of remembrance (Erinnerungsorte) virtually. We will discuss how and what we do--and do not--remember, based on selected readings, documentaries, and memorial sites. Speakers from Germany will be invited via Zoom to talk about specific places and activities of remembrance. We will develop online projects, for example, one's own family history or that of others, or geo-mapping memorial sites.

COL321 Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

COL323 Gender and History: Global Feminist Theories and Narratives of the Past (FGSS Gateway)
What is a female husband? In the 1980s an increasing number of feminist scholars posed questions about the relationship between biological sex and gender roles. The African scholar Ifi Amadiume, who studied the history of female husbands in West Africa, asserted that such relationships between sex and gender needed to be studied in a global context. More than two decades after Amadiume's influential book "Male Daughters, Female Husbands: Gender and Sex in an African Society" (1987) was published, the scholarship on global gender and sexuality is vibrant and dynamic. These works have shown gender to be central to understanding society at different periods and geographical locations, but it is far from a universally understood category.

This seminar will introduce first- and second-year students to the history of gender, sex, labor, and feminist activism from a global and comparative perspective with readings from the history of Africa, the Americas, Asia, and Europe. We will also cover the development of influential theories in the field and how they apply to the writing of history. This course is especially appropriate for prospective history and feminist, gender and sexuality majors, though all students interested in using gender as category of historical analysis for their scholarly work in other fields are welcome.

COL326 Literary Movements: Conceptual and Experimental Fiction
The course seeks to examine the modern novel by focusing on fiction structured around a concept ("conceptual fiction") and fiction which deviates from the traditional modes of storytelling in a coherent enough way ("experimental fiction"). Together, we will examine novels and short stories in which an idea, an image, or metaphor directly informs the structure, plot, characterization, or all of the above of the work. We will also look at works of formal invention and/or subtle experimentation as far as they are constructed around a discernible and coherent pattern. There have been countless such works in the modern/contemporary period and some of the notable practitioners include Virginia Woolf, Moshin Hamid, George Saunders, Cormac McCarthy, Carlos Fuentes, Toni Morrison, and John McGregor, amongst others have work in this "movement." We will also look at critical essays around these books including from David Lodge, James Baldwin, and Victor Schlovsky, amongst others.

We will study texts from some of these writers (Woolf, Hamid, Saunders, McCarthy) closely and try to determine what it means to create fiction around a "concept." Implicit in this inquiry would be the broader question of form, formal invention, and the vagaries of experimentation. What makes a novel unique? What new grounds does this novel or story break? Does the experimental mode help or hinder meaning? What makes a novel unique? How does structure distinguish a novel rather than plot or characterization, or, for that matter, ideas? What are the ways by which a novel can subvert the traditional form of the novel? What are the strictures of genre and how do they constrain or help expand the art of storytelling?

COL327 Cervantes
Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON

QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

COL328 Constructing the Past: Theories of Historical Knowledge
This seminar will explore how we "make history" by exploring issues and debates in contemporary theory of history. Wesleyan is known as the epicenter for theory of history because of the academic journal "History and Theory," owned and edited by Wesleyan University faculty for the past 60 years. We will discuss such topics as the nature of historical truth; time and temporality; fiction and fact; history as a science with laws vs history as an art, with style; gender history; agency and causation; history of the emotions; of animals, and history's moral imperatives. We will give special attention to recent arguments about the theory of history, and how we construct the past. Key figures are likely to include Walter Benjamin, R. G. Collingwood, Michel Foucault, Hayden White, Frank Ankersmit, Nancy Partner, Joan Scott, and Reinhart Koselleck as well as publications by Wesleyan faculty past and present.

COL329 Madness and Its Others: The Ethics of Intelligibility
What does it mean to make madness speak? In his 1961 "History of Madness," Foucault took a critical view of the history of censure and confinement which relegated madness to the periphery of the social whole. Within this view, Foucault historicized four phases (or epistemes) of madness: Antiquity, Renaissance, Classical, and Modern. But, as Derrida asked in his rejoinder essay, "Cogito and the History of Madness," is the historicization of madness not itself a kind of censure and confinement? This course takes up the question of madness and otherness at the intersection of ethics and intelligibility. In addition to the Foucault/Derrida debate on madness and reason in Descartes's "Meditations," we will consider the ethics of dialectic, understanding, and the sovereignty of reason in Shakespeare's King Lear, Truffaut's L'enfant sauvage, selections from Plato's Phaedrus, and Levinas's "Philosophy and the Idea of Infinity." Where intelligibility marks the boundary between reason and unreason--where what can be spoken, what can be thought, and the possibility of articulation and of being understood are contingent on the relation to the other--we will explore the ethics of reason and unreason, self and other, and the spaces in between.

COL330 The Craft of Criticism
This seminar will explore the craft of writing criticism for magazines and newspapers. Over the course of the semester, we will look at different genres of the form--the book review and the "briefly noted," the 4,000-word review-essay and the blurb, memorial essays and "braided" criticism--to consider the protocols of writing for different publications and publics. Students will be assigned to write four works of criticism of varying lengths and will be asked to select a different object for each assignment (e.g. novel, film, album, exhibition). A series of shorter reflections will also be assigned on questions of rhetoric, affect, and style in response to weekly readings. The course will be offered in conjunction with the Shapiro Center's "The Art of Editing" series and its master classes on editing and fact-checking taught by members of The New Yorker staff.

COL331 Love, Madness, & Politics
Is love a private or a public matter? What role does the madness of love play in a well-governed society? Love is the singular and personal experience par excellence. And yet by virtue of connection with another, it is also the experience that pulls us out of ourselves into linguistic, corporeal, and social worlds. Does our conception of erotic love directly inform our understanding of the social and political whole? Or does our conception of the social and political whole inform our understanding of erotic love? Are questions of hospitality a public or a private matter? What is the role of intimacy in a well-governed society? This course begins by engaging three of Plato's Socratic dialogues -- the Republic, the Symposium, and the Phaedrus -- that link eros to questions of governance, language, and enlightenment. Turning from eros, we then examine the personal and public features of friendship (philia) in Aristotle's Nicomachean Ethics, before exploring Plotinus On Beauty and its role in the overlapping of eros and philia in Abravanel's Dialogues of Love. Turning to modernity, we closely engage Rousseau's positioning of the love relationship at the center of society in Emile and Arendt's deep critical engagement with our classical inheritance in The Human Condition. This philosophical exploration will be grounded in a reading of Ishiguro's novel, Never Let Me Go.

COL333 Do We Truly Choose? Free Will in Philosophy and Theology
Free will has been a central pillar of philosophical inquiry throughout history. While contemporary debates often focus on issues of consciousness, mechanics, neurobiology, and physics, premodern discussions frequently revolved around the role of God in defining the boundaries of human freedom. This seminar will delve into diverse perspectives on free will, drawing from philosophical traditions across time and place -- both past and present, East and West -- with particular emphasis on the Islamic context. Through a close reading of key sources, the course examines how different thinkers have conceptualized human agency and the extent to which it determines action. Ultimately, the seminar will grapple with the vexed question: do human agents actually enable their acts, or, in the final analysis, truly "do nothing"?

COL334 History of Spanish Cinema
This course explores the development of Spanish cinema from the early 20th century to the present. We will evaluate how social, political, and economic circumstances condition Spanish cinematography at key junctures of Spanish cultural history in terms of the production and distribution of films, cinematographic style, and thematics. The course will also highlight key facets of the Spanish star system as well as the auteurism of those directors who have achieved international acclaim by reworking a national film idiom within international frames of reference.

For a detailed description of the objectives, materials, viewing requirements and modes of assessments, please visit the course web site at: https://span301.site.wesleyan.edu/

COL336 Theories of Translation
This course will examine a range of predominately 20th-century theoretical approaches to literary translation in the fields of philosophy, linguistics, literary criticism, and translation studies. In an effort to derive a definition of literary translation, we will focus on two questions. First: What is literal (or word-for-word) translation? How does it differ from other kinds of translation; how does it conceptualize meaning; what are its purposes; and what oppositions (e.g., literal vs. figurative) can we use to make sense of it? Second: What is the relationship between language and culture? Can translation give us access to an unfamiliar culture; can literary translation affect the culture in which it is produced; or does translation simply colonize foreign texts by transforming them into something legible to a domestic culture?

COL337 What is (a) Language?
Scholarly inquiries into language have always faced the distinctive (though not unique) problem of how to define their object of study. What is language? Language in general, human language, a particular language, language as opposed to dialect or idiolect, etc.

This course will not answer these questions. It will, however, examine the most important and influential ways that they have been formulated and answered throughout the Western tradition of linguistic inquiry. Our survey will be organized around two main tendencies that are sometimes distinct but often complementary. First, the question of origins: Where does (a) language come from, and what does this tell us about its nature? We'll look at etymology and theories of language change alongside thought experiments and evolutionary theories that try to narrate the emergence of language from nonhuman forms of animal communication. Second, the questions of structure and function: How does (a) language work; what do we use it to do? We'll look at the medieval trivium of grammar, logic, and rhetoric, alongside the (approximate!) modern analogues of morphosyntax, semantics, and pragmatics. Our goal will be to get a sense of the major theoretical issues that have run through scholarly inquiries into language(s) across disciplines ranging from linguistics and philosophy through anthropology, sociology, and literary theory, to cognitive studies and evolutionary biology.

While our scope is large, our method will be narrow, focusing on close readings of important primary texts in the history of Western linguistic thought. Since our emphasis will be on the coherence of theoretical positions rather the coherence of historical narratives, we'll focus especially on works that have exerted the strongest influence on contemporary understandings of language, particularly those from the 20th and 21st centuries.

COL338 Utter Nonsense: Modernist Experiments with Meaning
In "The Use of Poetry and The Use of Criticism" (1933) T.S. Eliot wrote," The chief use of the 'meaning' of a poem, in the ordinary sense, may be [...] to satisfy one habit of the reader, to keep his mind diverted and quiet, while the poem does its work upon him: much as the imaginary burglar is always provided with a bit of nice meat for the house-dog."

To extend this analogy: this course will look at texts by meatless burglars, writers who set out not to sedate but to conscript the sense-sniffing house-dog as they pillage the house for things of value.

This course will survey some of literary modernism's most defamiliarizing texts, ones that challenge interpreters by withholding or avoiding that digestible (and perhaps soporific) "meaning" Eliot referred to. We will look at modernist formal experiments from Gertrude Stein and Guillaume Apollinaire through Dada, surrealism, the French New Novel, and the theater of the absurd, alongside the less prominent but equally influential exploration of aleatory, procedural, and machine-generated poetry by writers such as Jackson Mac Low and the Oulipo. Working with authors' manifestos and critics' interpretations alongside the primary texts, we'll pay special attention to the varied relationships to meaning that can be found at work in texts that a casual reader might lump together as simply meaningless or nonsensical.

As the semester progresses and we get a clearer sense of what these texts require from their readers, we'll begin to ask (with the help of some basic readings in semiotic and psychoanalytic literary theory) how our interpretive behavior when confronted with seeming nonsense might relate to the various things we do when we read normal or typical texts--ones that strike us as already or obviously meaningful. Is making sense something that a text can ever do on its own or something that we must always do to (or for) the text?

COL340 Daemons, Enigmas, and the Cosmic Image: Classical and Modern Allegory
Allegories are everywhere--from novels, art, and philosophy to news, political rhetoric and the law. They confront us as something strange, as overly baroque or disappointingly simplistic, as a symbolic mystery that becomes blandly prosaic once the proper interpretive key has been found. Allegories can be abstract and ethereal (e.g. Dante traveling through the heavenly spheres), but they can also make abstract ideas concrete: the idea of justice becomes the Roman goddess Iustitia, blindfolded, holding a sword and a set of scales, a statue in front of a courthouse. They try to explain life's complexities, but the stories they tell are much stranger than the lives that we live: the insatiable longing for our significant other is really the search for our other true half, since once we were round creatures rolling happily around but were cut in half by Zeus for our transgressions. What are these allegorical texts doing for us, and why are they doing it in such bewildering ways?

This course looks at the persistence of allegory. We will inquire into its origins in the Classical world, and we will try to understand how it has been found (or made) useful by writers and literary theorists in the 20th and 21st centuries.

The texts that interest us will make simple things mysterious and mysterious things simple, transforming the imaginable into the visible and the visible into the imaginary. And we will try to find our way through this mode of writing and of reading that insistently brings opposites together, connecting different realms of experience, knowledge, and language in ways that both produce and defy sense.

COL341 Plato's REPUBLIC
"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

COL350 The First Female Historian: The Crusade-Era Epic History of Anna Komnena
Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena -- a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire -- to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with The Alexiad through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

COL351 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

COL352 Coming Out/Coming of Age: Narratives of Becoming in Italian Culture
By examining narratives of "becoming" in Italian literary and screen texts, we will work to read against a dominant "master" narrative of Italian culture that is cis-male, patriarchal, and "white." The literary and screen texts we will explore in depth include some "classic" narratives of coming of age in the Italian cultural tradition which we will lay alongside Italian cultural "coming out" narratives, some "classic," others less so. What can we learn from such adjacencies? What does one "come out" of with regard to either strand of inquiry? Is adolescence a "closet" out of which one emerges with a sexual identity? Does one come of age as an artist or "come out" as a practitioner of a particular artistic genre (filmmaker, poet, novelist)? How do artistic choices of practice subtend and inform sexual identity? What gets left behind in this "progress" of "becoming"? These are some of the questions we will address in this course, conducted in Italian.

COL354 Classical Islamic Theology and Philosophy
This course is a close-reading seminar on major debates in classical Islamic theology (kalam) and philosophy (falsafa). Instead of surveying Islamic civilization broadly, we will focus on key philosophical and theological problems that shaped disagreements among Muslim thinkers between the ninth and thirteenth centuries.

What can human beings truly know, and what are the limits of reason? Can truths about God, the soul, and the universe be demonstrated philosophically, or do they depend on revelation? Is philosophy an independent path to truth, or must it answer to theology? Is the world necessary or contingent? How should causation be understood? What counts as a legitimate method in theology or philosophy?

We will examine these questions through sustained engagement with Islamic sources in English translation. Readings include works by al-Farabi, Avicenna, al-Ghazali, and Averroes, alongside theological writings from major Islamic traditions. Particular attention will be given to tensions between philosophical and theological approaches, and to later efforts within theology to challenge, refine, or defend philosophical reasoning.

Although we will situate these debates historically, the primary emphasis of the course is on close reading, careful reconstruction of arguments, and philosophical analysis. Our aim is to understand what Islamic theologians and philosophers themselves took to be at stake in engaging these debates within their own intellectual traditions.

An associated Arabic CLAC (Cultures and Languages Across the Curriculum) section will be offered alongside this course. While not required, students at any level of Arabic who wish to engage our sources in their original language are welcome to enroll.

COL354Z Self and Text in Roman North Africa: Augustine's Confessions
The native North African Augustine of Hippo wrote the most influential autobiographical text in (so-called) Western literature. It remains the most brilliant text I have ever read: a mind-bendingly complex and yet fully coherent literary self. Let's read it together. Set between Carthage and Rome in 400, Augustine wrote just 10 years before the Eternal City would be sacked by the disaffected former legions of the empire (the Goths). Split between conqueror and conquered, civilization and apocalypse, Augustine wove humanity's existential and epistemological questions into a literary tapestry for the ages: Who am I? How do you speak? Who are you? How do I listen? Who are we? How do we know? At once memoir, critique of empire, philosophy, psychology, theology, personal history, criticism, and a letter, these Confessions require close, careful, focused, attentive readings from a diverse group of interpreters. Join our learning community and spend two snowbound weeks at Wesleyan with a book you will never forget.

COL359 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

COL360 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant
Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' MEDITATIONS, Locke's ESSAY CONCERNING HUMAN UNDERSTANDING, Hume's ENQUIRY CONCERNING HUMAN UNDERSTANDING, and Kant's CRITIQUE OF PURE REASON.

COL363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library

of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

COL364 Body Politics: Desire, Sexualities, and Gender, Past and Present
Sexuality as a category to define, construct, and control the "self" has been seen as a product of the 18th and 19th century. This course turns to ancient Greek society to look at body politics before sexuality and to examine the different ways in which sex and gender are experienced and constructed.

We will approach sex and gender roles as organizing principles of private and public life. Using literary, scientific, historical, legal, and philosophical sources as well as material evidence, we will address issues including the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution, adultery); and ideas regarding desire, self-control, masculinity and femininity, and their cultivation in social and political contexts. How ancient approaches to gender and sexuality are in dialogue or have informed recent debates will be a question throughout the course by looking at theoretical approaches and contemporary movements and debates. We will end by looking at how ideas about sexuality in classical antiquity were used in Romer v. Evans, otherwise known as the 1993 Colorado Gay Rights Case.

For CLST Major requirements, this course counts toward the concentrations of Literature and Performance and History, Politics, and Social Justice.

COL367 Female Dicks: Police, Detectives, and Private Investigators in Contemporary Italian Culture
Through the act of detection and "solution" of a crime, classic detective stories and police procedurals often serve as consoling narratives, knitting up the unraveled social fabric and seeing that justice will either be served or promised. In solving the crime, the detective--sometimes called a "dick" in the classic American hard-boiled detective literature--often restores order to social chaos. What changes when women--female dicks--conduct the investigation? Do women investigators, as agents of detection, uphold existing (patriarchal) power structures, dynamics, and epistemologies? Challenge them? Transform them? These are some of the themes we will contemplate as we study Italian "gialli" published since 1995.

We will concentrate on three different types of female dicks: la Deferente (the deferential), la Scomoda (the disquieting, uneasy), and la Vendicatrice (the vindicator). We will read novels in several different book series privileging Bologna as a location; further, we will also explore films and television series, trying to plumb the relationship of these Italian screen texts to the phenomenon of global and transnational noir.

This course is conducted through the medium of Italian and is suitable for anyone who has already taken a fifth-semester course (or one that is more advanced) on the Middletown campus or who has participated on the ECCO Program in Bologna. If you have questions about whether this is the course for you, please contact the instructor.

COL368 Nabokov
Vladimir Nabokov--brilliant writer, outrageous literary gamesman, and cosmopolitan exile--is a towering figure of 20th-century literature. His most famous novel, "Lolita," propelled him to international stardom and changed the transnational literary landscape. Child of a turbulent century, Nabokov wrote exquisite and at times disturbing prose in Russian and English, balancing between imaginary worlds and harsh realities. This seminar offers a sustained exploration of Nabokov's major Russian and American writings as well as film adaptations of his "Despair" (Rainer Werner Fassbinder) and "Lolita" (Stanley Kubrick). We will consider memory, exile, trauma, nostalgia, and identity as we read Nabokov, who saw existence as a "series of footnotes to a vast, obscure, unfinished masterpiece."

COL369 Law, Personhood, and Democracy, Ancient & Modern
Legal texts -- law codes, decrees, and edicts, juristic discussions, law court cases -- help us understand the history of legal thinking and strategy, and the construction of constitutional frameworks. Yet Greek legal sources offer something more than a history: Although these texts in many ways served as the foundation for European legal systems, they nonetheless offer radically different ways of thinking about concepts such as private and public, personhood in law and ethics, rights versus responsibilities, and the possibility of freedom and happiness -- some more progressive than our own. In an era when many of our democratic institutions and conventions are challenged, the classical sources offer alternate legal and social ways of thinking, and new tools for rethinking our own time. This course will provide an introduction to legal thinking in classical antiquity and, drawing from a range of sources, will speak to the intersection of constitutional frameworks with political theory. Through narratives and case studies, we will examine Greek approaches to thorny legal issues that are still contested today: women's rights, freedom of gender and sexual expression, the right to trial, torture and coerced confession, immigration and the right to citizenship, foundational "myths" (and lies), and conspiracy theories, among others. The ancient sources will be brought into dialogue with US supreme court opinions and debates on these issues. We will also explore how constitutional frameworks are constructed and deployed alongside religious and moral beliefs -- whether that be overtly or covertly --0 to cultivate "civic thinking." For CLST

Major requirements, this course falls under the History, Politics, and Social Justice track.

COL370 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

COL373 "Real" Love: Subjects of Unreason
Is love a special kind of madness? Do love and madness lead to kindred encounters with the limits of experience? What are the subjects of unreason that inform our conceptions of the world and the "real"? How might the novel (as a literary genre) help us to reason philosophically about irrational experience?

This course explores love and madness through depictions of reason and unreason in two major prose works by the author of "the first modern novel," Miguel de Cervantes through a close reading of Don Quixote and The Trials of Persiles and Sigismunda. From the adventures of a country gentleman turned knight-errant to the trials and tribulations of two sojourning lovers repeatedly separated and reunited on the road, we will explore the lived and the ideal, the rational and the irrational, the presence and the absence, the mortal and the immortal in the erotic encounter at the outset of the modern literary imagination.

Both texts will be read in contemporary English translation. No foreign language knowledge is required. Recommendations for appropriate critical editions in Spanish will be provided for any student who wishes to read in the original language.

This is a discussion-based close reading seminar.

COL375 Advanced Research in Digital History
The digital age has changed everything and nothing about the practice of historical research. After being equipped with core concepts, terminology, and practices of historical research, students will engage and explore various applications: across moth-eaten archives, curated library collections, optical scans, and digital-born objects. We will then immediately apply this work to collectively setting up an archival relational database through the digital tool Nodegoat. Students will finish the semester by curating their own historical archive and codifying it as a relational database. Depending on the specific project and student abilities, students will also connect this work to utilizing and/or learning skills in translation, GIS, database creation, database management, and digital visualization. Successful students will be connected to the Travelers' Lab international network: an opportunity to connect, receive feedback from, and collaborate with professors at higher education institutions in the United States and around the world. Depending on the year students may also be offered conference presentation and publication opportunities.

COL375Z Building a Relational Database: Introduction to Historical Research Data
This course empowers students to become not only readers of history but creators of historical data, new scholars actively seizing the current digital history moment as an occasion to break down history's myths through the activities of research, datafication, and analysis. The digital age -- even the advent of GenAI -- has changed nothing fundamental about the practice of historical research. But it could: the digital age is an opportunity for scholars to act as agents of change. This winter course focuses on the role of data in existing historical practices. Our series of focused workshops and targeted research investigations will enact and enable new methods and practices of history. Targeted readings address current theories and methods for working with the range of historical source materials: moth-eaten archives, curated library collections, digitizations, and digital-born objects. We will then get right to work on practices and your own research projects. Students will set up an archival relational database through the web-based tool Nodegoat. They will finish the session by curating their own historical archive, which they will codify as a relational database, and then explore development through further research or publication.

COL382 Narrative Nonfiction and the Archive
Journalists, narrative historians, and biographers all work to reconstruct past events from interviews, archives, and in-person investigation before writing up their findings in an immersive and engaging form. This series of practical writing workshops with Distinguished Writer in Residence Cal Flyn will challenge its participants to produce nonfiction accounts of past events from decades ago, right into the present day -- and to grapple with the technical difficulties that come with uncertain histories, gaps in documentary evidence, and unreliable memories. We will also undertake close reading of carefully selected extracts from writers including Katherine Boo, Sadiya Hartman, Truman Capote, and

Patrick Radden Keefe, and practice our research skills using Wesleyan's own archives.

COL384 How to Write about Pop Music and Why
What does it mean to write critically about a pop song or album at a time when anyone can listen to it with minimal effort? What is the value of an artist profile when artists' careers and lives are so publicly intertwined? How does a critic derive the aesthetic or moral authority to comment on music made by performers with dissimilar backgrounds, lifestyles, and values? In this class we'll look at the way the critical discourse around popular music has evolved in terms of immediacy, accessibility, scope, and purpose, paying attention to both "classical" pop journalism and ways of engaging with music that, while not quite reviews, nonetheless contribute significantly to the discourse around it. Most of all we'll listen to music together and explore different forms of interpreting and making sense of it.

COL385 Die Grenzen meiner Sprache bedeuten die Grenzen meiner Welt (CLAC .5)
This CLAC will explore the practice of translating philosophical German by focusing on Wittgenstein's Tractatus, its recent translations, and its (often unnamed) sources and influences -- including writings by Gottlob Frege and Immanuel Kant as well as by various Viennese intellectuals such as Karl Kraus and Otto Weininger. The Tractatus is a particularly productive focal point because it advances a theory of language and meaning that has immediate relevance for conceptualizing what is involved in translating from one language into another. In practicing translation, students will be testing the theory that they are attempting to translate. This will provide them an additional dimension in which to wrestle with the content of the text. Enrollment in the associated seminar, PHIL389/COL386, is encouraged but not required. The course is open to students at all levels of German study. Discussions will be conducted in a mixture of English and German, since we will be discussing the nuances of words and phrases in both languages. By preparing (and discussing) their own translations of texts, students will become familiar with the sorts of challenges that arise in rendering philosophical German into English and will develop strategies for negotiating these challenges. Students will also be encouraged to consider translations into other languages in which they are competent.

COL386 A Book of Nonsense: Wittgenstein's Tractatus
Wittgenstein's Tractatus Logic-Philosophicus is one of the most enigmatic and yet influential texts of 20th-century European philosophy. In this seminar we will explore its major themes in depth. In the Tractatus, Wittgenstein advances a conception of the nature of all representation. This conception invokes, on the one hand, the making of pictures, and, on the other, the uses of language. Central to the conception is the idea that representation and represented necessarily share a common form. So if language represents reality, then reality has the form of language. Wittgenstein thus declares, "The limits of my language signify the limits of my world." The pre-eminent place of language in the Tractatus is one of its most impactful legacies, contributing to the "linguistic turn" that can be observed in analytic philosophy around the turn of the twentieth century. Via this linguistic turn, Wittgenstein transforms the Kantian idea of the bounds of sense into a doctrine of meaningful linguistic use: distinguishing significant linguistic representations from signs that merely seem to make sense -- i.e., nonsense masquerading as sense. The Tractatus rejects "traditional" metaphysical philosophy as at bottom nonsense which says nothing true or false. But Wittgenstein also advances a distinction between what can be said by means of language, and what shows itself in our uses of language. And it turns out that what can be shown cannot be said. The twin ideas of nonsense and of showing lead to the deepest mysteries of the Tractatus: some seemingly "metaphysical" positions, such as solipsism and mysticism, in spite of being nonsense, nevertheless show what are, in some sense, truths. Most paradoxically, the words of the Tractatus themselves turn out to be nonsense and say nothing. Our final aim is an elucidation of what and how one is to learn from such a book of nonsense.

COL387 Beyond Growth: Agrarian Visions
The era of endless growth has reached a point of crisis. In the face of climate catastrophe and widening inequality, of the proliferation of pointless work and spiraling burnout, it has become increasingly common to question the idea that human progress comprises ever-increasing levels of production and consumption. And yet in spite of a slew of attempts to transform the situation, from the Occupy movement to the recent mainstreaming of degrowth economics, it seems that things are only intensifying. How did we come to inhabit this world in which labor and economic growth are seen as ends in themselves? And how might we begin not just to refuse such understandings of labor and growth, but to imagine different forms that they might take? In this course we will confront these questions, exploring the relationship between labor, production, and human flourishing. We will begin by studying foundational articulations of this relationship from thinkers like Max Weber, Karl Marx, and Hannah Arendt, looking as well at the unique place that agricultural production, cultivation, has been understood to occupy therein. We will then turn to the agrarian realm as a particularly potent site from which to trouble and extend our conceptions of labor and growth, examining visions of spiritual labor, anticolonial resistance, and more-than-human entanglement in theoretical and literary texts from Leo Tolstoy, M.K. Gandhi, Mahasweta Devi, J.M. Coetzee, and others. Through our readings and discussions, we will learn to identify and critique the normative claims on which our current energy-intensive, exhaustion-inducting circumstances are based. At the same time, we will cultivate the skills required to seek out and imagine alternative forms of work, community, and the good life.

COL388 Weimar Modernism and the City of Berlin
One of the most fascinating aspects of Weimar modernism is the emergence of new forms of perception and consumption, reflected in a new urban consumer culture that generated an ever-changing array of visual and aural stimulations. This changed reality was perhaps best captured by the young medium of film, but older media like literature and painting also responded to this modernist challenge. This course will examine not only exemplary works of literary and visual production from the Weimar period, but also other aspects of Weimar

modernism, such as the development of radio, design, fashion, advertising, and architecture, emphasizing analyses of the new mass culture of entertainment, distraction, and "pure exteriority" (Kracauer) in combination with left-wing cultural and political criticism. The city of Berlin, then the third largest in the world and in many ways the international capital of modernism, will provide the main locus of investigation. All course readings, discussions, and assignments will be in German.

COL391 Diderot: An Encyclopedic Mind
In this class we will come to know the most progressive and often radical thinker of the French Enlightenment, Denis Diderot (1713-1784). We will begin this seminar with an examination of how this country abbot grew into the most well known atheist of his generation. We will then move onto his famous 74,000 article Encyclopédie, a book that not only dragged sacrilege and freethinking out into the open, but triggered a decades-long scandal that involved the Sorbonne, the Paris Parliament, the King, and the Pope. (During this portion of the class, students will undertake translations of select entries [from French to English] of the "dictionnaire" for possible publication.) In the second half of the semester, we will also study the writer's freewheeling art criticism. Finally, we will read two groundbreaking novels. The first of these, "La Religieuse", is a gripping pseudo-memoir of a nun who suffers unspeakably cruel abuse after she announces that she wants to leave her convent. The second, "Jacques le Fataliste", is a freewheeling anti-novel where Diderot used fiction to take up the problem of free will. In the final portion of the class, we will also read selections from his anticolonial and antislavery writings.

COL392 Empire, Memory, Translation: A Seminar on the Rings of Saturn
In this seminar, we will explore three themes: The lasting effects of European imperialism and colonialism in (mostly but not exclusively) Europe and their literary representations; the relationship between historical memory and fiction in these representations; and the role of translation in shaping the relationship between historical memory and fiction.

At the center of this course is W. G. Sebald's travelogue "The Rings of Saturn" ("Die Ringe des Saturn"), a work we will read in both its German original and its congenial English translation. Sebald's genre-defying narrative recounts the historical traces of empire, war, and colonialism in the observations and reminiscences of the protagonist's wandering through the de-industrializing landscape of England's Suffolk County during the early 1990s. Obsessively associating phenomena near and far in an almost paranoid fashion, Sebald's first-person narrator leads the reader to the devastations wrought in China during the Opium Wars and in the Congo during Belgian rule; the local and global effects of cycles of capital accumulation, resource exploitation, and climate change; and the challenges and pitfalls of memory's attempts to find an adequate narrative form for how the globally disparate effects of capitalist modernity are interlinked.
All discussions and papers will be in German, and readings will be in German and English, with a consistent focus on theoretical and practical questions of translating from German to English. We will proceed at a slow pace, with plenty of time to grant our superb primary text the time and attention it deserves. This course is designed for students who have taken GRST 213 or have spent a semester studying abroad in a German-speaking country. We will focus on developing critical writing, reading, interpretation, and translation skills in German. Since the quantity of reading is fairly modest, we will put much emphasis on regular writing and rewriting.

COL393 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

COL398 Marxism and Climate Crisis
Since the Communist Manifesto of 1848, the notion of "crisis" has played a prominent role in Marxist theorizing. Today's intensifying climate crisis is lending new theoretical and political weight to the Marxist critique of extractive, productive, and consumptive practices that transform nature into a means of production for ensuring ceaseless economic growth through the accumulation of capital. The consequences of this are not only the exhaustion of human labor-power and human sociality but also of non-human nature (fossilized carbon, wild animal biomass, topsoil, clean water, forests, etc.). Our perspective for studying and understanding this destructive transformation of nature will primarily be informed by a set of recent "eco Marxist" writings that oppose eco-modernist technocracy and instead reconceptualize capitalism as "a way of organizing nature" (J. Moore); extend the notion of social alienation to a "metabolic rift" between the labor process and the natural environment (Saito's "degrowth communism"); and explore the economic and ideological drivers behind the current expansion of fossil fuel extraction (Malm and the Zetkin collective).
In light of the Center's semester theme of Energy and Exhaustion, we will ask three kinds of questions: historical (about the origins of the "Capitalocene" and of "fossil capital"); theoretical (how is Marx's "general law of accumulation" also a law of environmental depletion and planetary limits?); and political (traditional "Promethean" Marxism envisioned revolution as the full actualization of productive forces -- what is the meaning of social revolution in our age of emerging fascism and overshooting climate limits?).

COL399 Burnout
Moderns have excelled at exhausting themselves, their others, and the planet. In this seminar we will explore the disposition toward depletion as a constitutive problem of life and thought in the twentieth and twenty-first centuries. Why do we wear the world out and who do we become in so doing? We will examine "burnout" as a condition connecting psychic, political, aesthetic, and ecological distress in the simultaneously listless and overexcited present. Convening resources from philosophy, history, anthropology, political theory, literary studies, and contemporary art, we will consider, among other things: fossil fuels, neoliberal economic thought, enervation and nervous over-animation, stimulants, thermodynamics, empty calories, extravagant gift-giving, geological science, secular finitude, the "End of History," the loss of utopias, and deficits of attention.

COLLEGE OF SOCIAL STUDIES

The College of Social Studies (**CSS**) offers a distinctive blend of teaching methods, subject matter, and educational structure. Its collegial organization combines tutorials and courses in social theory within the college with individually selected courses from other departments and programs in the University to achieve an integrated education in the social sciences. Founded in 1959, the **CSS** has provided an unusual educational opportunity for many Wesleyan students whose

careers upon graduation have ranged from medicine to law, forestry to college teaching, international business to screenwriting.

CSS220 Sophomore Economics Tutorial: Markets, Welfare & the State
This tutorial takes a topical approach to studying economic ideas and policy. We start with writers who drew either the admiration or ire of Adam Smith. These include the scholastics, mercantilists, and physiocrats. Next, we compare the classical school with competing schools of economic thought from Marxian, utilitarian, and Austrian to neoclassical and Keynesian. Throughout the course, we read radical critiques from the political right and left, touching upon monetarist theory, supply-side economics, institutional, behavioral and evolutionist schools. We see how the policy and economic debates reflect the socio-economic struggles of their time and shed light on the controversies of our own.

Grading: **Cr/U**
Credits: **1.50**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

CSS230 Sophomore Government Tutorial: State and Society in the Modern Age
This tutorial examines the rise and evolution of the modern state. While many of the readings focus on Western Europe and the United States, the course draws on cross-regional comparisons to tease out theoretical propositions, compare historical processes across different parts of the world, and consider different understandings of the body politic. We start by exploring what factors account for the rise and consolidation of the nation state in the Western context, after which we consider how the process of state-building occurred in the Middle East and North Africa and explore some of the challenges the sovereign state model faces outside the European context. We then move on to discuss the emergence of different systems of governance and some of the challenges to the state. We will consider whether there are certain paths that lead to democracy and whether there is something unique about American democracy. We will take into account the challenges posed by modernization and evaluate what factors best explain the rise of communism and fascism. We will then consider how the communist and fascist past impacted the rise of the social democratic model in Europe and compare the European and Japanese approaches to welfare provisions. We conclude by considering yet another model for organizing the political community--the religious state. We will examine when, how, and why the notion of the Islamic state emerged, reflect on the extent to which the concept of an Islamic state challenges Western notions of the nation-state and investigate how the discourse on Islam and the state has changed over time in Indonesia, the largest Muslim majority country.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

CSS240 Sophomore History Tutorial: The Emergence of Modern Europe
CSS Sophomore History is an intensive survey of European History from the French Revolution to the present. European history will be considered in terms of many types of history, often from conflicting perspectives -- including political history, economic history, social history, women's history, intellectual history, and psychohistory. Throughout the History Tutorial, emphasis will be placed on developing the students' skills in reading, writing, and debating. One of the astonishing benefits of the CSS sophomore year is that the students' academic skills develop as rapidly as if they were in a beginning language course. The History Tutorial is designed to ground the students in modern European history and also to develop the students' ability and confidence to master related materials in the future.

CSS330 Junior Government Tutorial: Uprisings and Revolutions in the Middle East: The Arab Spring in Context
The course examines the dynamics of uprisings and revolutions in the Middle East, with a primary focus on the "Arab Spring" and its historical antecedents. Drawing from theories of revolutions, contentious politics, and democratization, the readings examine both general patterns across the region and the political dynamics of individual cases. We will start with a discussion of the nationalist uprisings of the 1950s and the 1979 Iranian Revolution, after which we will examine the deep roots and major explanations of the Arab Spring. We will consider what explains the variation in protests and in government responses, what role different actors played during the uprisings, and what effects historical legacies had on the dynamics of the uprising. We will also attempt to understand what factors led to the militarization of the protests and the descent into civil

war in Syria. The course concludes with a discussion of the aftermath, exploring what factors led to the democratic breakdown in Tunisia a decade after the uprising.

CSS340 Junior History Tutorial: The Historian as Detective
Whodunnit? In many ways, the craft of history is much like the art of detection. Historians arrive on the scene after the "crime" was committed. They look for traces, or clues, left behind. They try not to contaminate the crime scene. They pore over the evidence. They consider both motive and opportunity. They take note of silences. They keep an open mind. They seek the truth. And, as it happens, the professional historian and the professional detective -- in fact as well as fiction -- emerged roughly around the same time. They are like twins separated at birth. Perhaps, if the two are reacquainted, they will learn something useful about each other, and themselves. This course will draw upon classic (and not-so-classic) works of historical reflection, crime detection, and detective fiction to better understand the importance of forensics and method in the discipline of history, the role of history in the art of detection, and how both history and detection shape the emergence of the nation.

CSS371 Junior Colloquium: The Global Authoritarian Turn
This course provides a global history of the rise of political authoritarianism. It does so first by looking at numerous explanations for the crisis that liberalism has experienced since the mid-2010s as demonstrated by Trump's presidency, Brexit and the success of authoritarian movements throughout South America, continental Europe, and Asia. It traces the origins of today's authoritarian turn back to the 1990s, and specifically to the end of the Cold War and the rise of globalization that exploded in myriad sectarian reactions around the world.

CSS391 Senior Colloquium: Visions of World Order in the Modern Era
This course offers a survey of how social scientists, philosophers, and statesmen have understood and imagined global order from the late 18th century until the present. The course first examines interpretations of global order that emerged during the late 18th and 19th centuries: Cosmopolitanism (Immanuel Kant), Positivism (August Comte, Saint Simon), Nationalism (Giuseppe Mazzini), and Marxism. The course then turns to the first half of the 20th century by examining the international thought of W.E.B. Dubois, Marcus Garvey, Rosa Luxemburg, and Gandhi, while also discussing fascist and liberal internationalist views of world order that emerged after World War I. The third part of the course discusses visions of Cold War order connected to American modernization theory (W.W. Rostow), neoliberalism (Friedrich Hayek), post-colonialism (Franz Fanon), Third Worldism, Neoconservatism (Jeane Kirkpatrick), and Systems Theory. The course concludes with the Post-Cold War period and how it has been imagined by such thinkers as Francis Fukuyama and Samuel Huntington along with a discussion of such topics as the global turn to nationalism, the Green New Deal, and the "New Cold War with China."

COLLEGE OF THE ENVIRONMENT

The Bailey College of the Environment at Wesleyan University was created with a belief in the resilience of the human spirit and a desire to develop a long-term vision of human and ecosystem health. There are four parts to the College of the Environment: the environmental studies (ENVS) linked major or a minor, an annual think tank, research opportunities, and community outreach. Our mission, simply stated: to change the world.

The l (p. 1068)inked-major program (p. 1068) in environmental studies (ENVS) is the secondary major to a primary major (see Undergraduate tab, at top right, for details). Students cannot obtain the BA degree with ENVS as their only major. Students must complete all the requirements for graduation from their primary major in addition to those of ENVS as their linked major. Each student will work closely with an ENVS advisor to develop an individual course of study. From the class of 2025 forward, ENVS requires an introductory course, seven elective courses, the senior colloquium, and a senior capstone project (thesis, essay, performance, etc.) on an environmental topic that is researched, mentored, and credited in the primary major program, although other options are possible. Students are strongly encouraged to take at least one course, in any subject, with intensive writing; also, students are strongly encouraged to take at least one course that deals with data analysis or interpretation.

A minor in environmental studies is also offered (see Undergraduate tab, at top right, for details).

More information about the Bailey College of Environment can be found here. (https://www.wesleyan.edu/coe/)

DEPARTMENTAL ADVISING EXPERTS

- Undergraduate Environmental Studies Minor (https://catalog.wesleyan.edu/minors/ugrd-envs-mn/)

ENVS105Z Plant Communities of New England
Students will become familiar with the fundamentals of plant structure, physiology, reproduction, adaptation and evolution. We will also explore community interactions, the role and impact of disturbance, invasive species and strategies in conservation. Four New England terrestrial plant communities will be used as case studies and exemplars: the northern mountains of New Hampshire, temperate deciduous forests of southern New England, the various terrestrial communities of outer Cape Cod, and natural and managed early succession habitats throughout. Our class periods will include discussions and other activities. While there is no formal lab component, students will have independent activities to provide hands-on observation and application of information. These include winter identification of native species and seed germination and growth observations which students will begin over break with seeds provided by the end of fall term. In addition to individual work, there is one group project.

Credits: **1.00**
Gen Ed Area: **NSM-ENVS**
Prereq: **None**

ENVS125F Community Gardening (FYS)
This course will provide students with skills and hands-on training so they can garden and grow food for themselves and their community.

Students will participate in UConn's Master Gardener Program, which has been offered to members of the community for 40 years and is well-respected in the gardening and farming community. Course topics will include: "botany, plant pathology, soils, entomology, pesticide safety, integrated pest management (IPM), woody ornamentals, herbaceous ornamentals, vegetables, trees and small fruits, turf grass, invasive plants, weeds, water quality, environmental factors affecting plant growth, and diagnostic techniques for the home gardener."

Hands-on training and application of the skills learned from the UConn Master Gardner Program will take place at Long Lane Farm on Wesleyan University's campus or at home for students learning remotely.

Students who complete this course will receive a certificate and name badge designating them as a University of Connecticut Certified Master Gardener.

This course is offered in partnership by the College of the Environment, Allbritton Center for the Study of Public Life, and UConn Extension Master Gardener Program.

ENVS130F Thinking Animals: An Introduction to Animal Studies (FYS)
In 1789, British philosopher Jeremy Bentham wrote: "The question is not, 'Can they reason?' nor, 'Can they talk?' but, 'Can they suffer?'" This question, which challenged the social and legal norms of the 18th century that denied sentience to non-human animals, has influenced disciplines across the social sciences and humanities to focus on what has more recently become known as, "the question of the animal." Bentham's question has sparked centuries of debate about the sentience of non-human animals and our relationship to them. In this course, we will examine a range of theories and representations of "the animal" to understand the desire to tame or objectify animals (through zoos, factory farming, and taxidermy), as well as why they are often conceived of as guardians of inaccessible experience and knowledge, and how the human and its various gendered, classed, and racial manifestations have been conceived of through and against notions of animality. Readings may include Poe, Kafka, Derrida, Bataille, Haraway, and Coetzee (among others).

ENVS186 Justifying Space: The History and Future of Space Exploration Visions
This will be a seminar class about the changing visions and motivations for space exploration, historically and to the present day. Readings will include historical perspectives such as those of K. Tsiolkovsky, H.G. Wells, Arthur C. Clarke, Gerard O'Neil, and Carl Sagan, the poetry of Diane Ackerman, the newsletters of space enthusiast organizations such as the National Space Society, the L5 society, and the Planetary Society, as well as more current readings from the popular and space policy literature. Perspectives will also include other cultural reference frames through readings from the literatures of Afrofuturism and Chinese science fiction. Through selected readings from both the fiction and nonfiction literature, students will become familiar with the history of space advocacy, and the various idealistic and utopian predictions and visions that have been associated over time with ideas of human crewed and uncrewed space exploration. We will look critically at how past visions and promises have measured up against the reality of space exploration and also, through this lens, critically examine the visions and motivations being espoused by today's range of government and corporate space organizations and enthusiasts.

ENVS188 Neotropical Acuatic Ecosystems: Their Importance, Sustainable Use, and Conservation (CLAC 1.0)
(English translation below Spanish text) El curso de Ecosistemas Acuáticos Neotropicales permitirá a los estudiantes buscar información y discusión sobre la diversidad y complejidad de los ambientes acuáticos en la América tropical. Comenzaremos a aprender definiciones, características, distribución y ejemplos de humedales, lagos, ríos y muchos otros hábitats acuáticos en todo el neotrópico. El origen del sistema hidrológico. Evolución de las principales cuencas: Amazonas, Magdalena, Orinoco y Paraná. El Paleo Orinoco-Amazonía: Importancia geológica y biótica. Dinámica geológica. Evidencia geológica y biológica. Hipótesis evolutivas de la fauna piscícola. Evolución del paisaje amazónico como parte del conocimiento para comprender los diversos procesos y patrones de riqueza y distribución de la biodiversidad. Los humedales (sabanas inundadas) de Colombia-Venezuela como ejemplo de humedales neotropicales. El Pantanal brasileño y las llanuras colombo-venezolanas como "áreas de criadero" para la biota acuática y terrestre y su importancia para el mantenimiento de la biodiversidad. Los estudiantes también leerán y buscarán información sobre el Sistema Fluvial Orinoco como ejemplo de estudio. La importancia biótica, el desarrollo sostenible y la conservación. Identificar los factores antrópicos que afectan al sistema. El desarrollo social y económico, y las contribuciones a través de los Programas de Evaluaciones Acuáticas Rápidas (RAP's) como metodología para producir información que permitió proponer áreas para la conservación de la biodiversidad. Terminamos con un análisis de los recursos y la importancia pesquera de las principales cuencas neotropicales: Amazonas, Orinoco y Paraná-Paraguay. Seguridad alimentaria. Ejemplos de ríos en riesgo.

This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemicity, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

ENVS195 Environment and Society: Introduction to Environmental Studies through the Social Sciences
The environmental social sciences (ESS) examines how humans interact with their surroundings and the contexts for their behaviors that have impacts across local, regional, and global scales. ESS draws from multiple disciplines that address various aspects of environmental experience including, but not limited to anthropology, geography, psychology, public health, and sociology. This course utilizes ESS as a framework to explore the interdisciplinary field of environmental studies to better understand the characteristics of human interaction with, and dependence on, the environment and the causes and consequences of environmental degradation at local and global scales. We will explore the disciplinary frameworks in ESS, as well as touch on key elements of related research approaches commonly utilized across this interdisciplinary field. This is a fundamental, introductory, survey course. In addition to providing the opportunity to apply and synthesize material, the course will likely fill in knowledge gaps. Many students will find that some information will be a review--but what that information is, will vary with the student!

ENVS201 Body and Earth: Emergent Strategies for Reimagining the Human-Environment Relationship
We live in a world in which humans are inextricably connected to nature, humanity's life support system. Yet at the same time we live on a planet in peril, in which environmentalists across the globe are working to catalyze societal transformation for sustainable living on Earth. This course explores these themes by 1) analyzing how social and ecological systems are intertwined, 2) exploring diverse ways of knowing nature through movement and mindfulness exercises, and 3) investigating and communicating mechanisms of sustainable environmental practice. The course will introduce conceptual frameworks and methodologies to explore the embeddedness of humans in nature--a task that remains critical for addressing today's environmental challenges. Students will engage with interdisciplinary frameworks engaging in environmental problem solving, as well as movement and place-based approaches for experiential learning. Through case studies and individual storytelling projects, we will examine how embeddedness in nature, interdisciplinary perspectives, and human agency provide sustainable pathways for both people and planet.

ENVS202 Constructing the Human: Humans and Animals in the Hebrew Bible
How do we define "humanness" and what assumptions do we make about our own distinctions between "humans" and "animals" through this definition? This course will look at the process of constructing the human category in the ancient world and Hebrew Bible and then compare that process to our own modern conceptions of humanness. In what ways are they similar and in what ways are they different? How can ancient examples of the human category inform our own ethical understandings of what it means to be human?

Prereq: **None**

ENVS203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.

ENVS206 Public Policy
"Public policy" describes the actions employed by the government to achieve a variety of social goals. Some of these actions may be of great consequence (e.g., incarcerating prisoners, providing income maintenance to the poor, preventing deaths from pollution or workplace hazards). This course provides a survey of several key public policies in the U.S. It will begin with an exploration of the policy-making process, policy design, and policy evaluation. The remainder of the course will be devoted to the examination of several key policy areas including criminal justice, education, social welfare, economic management, health care, and environmental protection regulation. In each case, the current Trump administration has made significant changes that we will place in the larger historical context. By integrating theoretical debates and the historical evolution of core public policies, the course aims to develop analytical skills as well as an appreciation for the technical and political complexities of policy-making.

Identical With: **GOVT206**
Prereq: **None**

ENVS207 Introduction to Archaeology
What can fragments of pottery, stones, and bones reveal about the lives of people who lived thousands or even millions of years ago? What does the archaeological record reveal about human evolution, past human diets and health, ancient socioeconomic systems, and the emergence of early cities? And how can we preserve archaeological sites and artifacts for future generations? This course will introduce students to the interdisciplinary field of archaeology. We will discuss key methods and principles that archaeologists use to study the

human past while covering a survey of world prehistory from the earliest stone tools to the archaeology of contemporary material culture. Students will have the opportunity to examine real archaeological artifacts -- including artifacts excavated from historic Middletown -- and will be encouraged to think critically about the ways that archaeology informs our understanding of both the past and the present.

ENVS208 System Mapping for Social and Environmental Impact
In recent years, growing interest in social entrepreneurship has pushed students to "solve" complex social and environmental problems with new ventures of their own design. Unfortunately, this approach often overlooks a critical foundation of social change: understanding the root causes of problems and the contexts that surround them before seeking solutions.

In this six-week, half-credit class, students will study a problem and the systems that surround it. By the end of the course, students will create a "systems map" that documents the economic, political, and cultural factors behind their problem, as well as the current "solutions landscape."

ENVS209F Interrogating Sustainability (FYS)
In 1987, the United Nations' publication "Our Common Future" -- also known as the "Brundtland Report" -- elevated sustainability as a central concern in international policymaking. The report focused on sustainable development as an essential method for achieving sustainability, defining it as development that "meets the needs of the present without compromising the ability of future generations to meet their own needs." Since then, sustainable development and other methods for fostering sustainability have played an important role in debates related to environmental, economic, and social policies at multiple scales around the world. In this course, we will interrogate the concept of sustainability, examining its history, its impact on environmental policies and social and economic development, critiques of the sustainability concept, and alternative visions for securing equity between current and future inhabitants of the earth. As a first year seminar, the course will use a variety of scaffolded writing assignments along with readings, discussions, and films to explore concepts including the commons, climate change, water scarcity, petrochemical and plastic pollution, land use, biodiversity loss, industrial agriculture, One Health, degrowth, ethical consumers, and circular economies.

ENVS210 Evolution in Human-Altered Environments
Human activities have altered natural environments and, indeed, have created entirely novel ecosystems such as cities and high-input farms. This course examines how these human alterations to the environment affect the evolution and coevolution of diverse organisms. Starting with an intensive overview of microevolutionary processes, we will consider a number of contemporary scenarios: evolutionary response to environmental contaminants, exploitation of natural populations, and global climate change; evolution in urban and agricultural ecosystems; and the evolutionary impact of nonnative, invasive, and genetically modified organisms.

Identical With: **BIOL215, BIOL515**
Prereq: **[BIOL182 or MB&B182]**

ENVS210Z Evolution in a Changing World
Human activities have dramatically altered natural environments, and have even created entirely novel ecosystems such as farms and cities. How do these changes affect the evolution of animal and plant populations? In contrast to the traditional view that evolution takes place over millions of years, 21st-century scientists have been astonished to observe that rapid, human-caused environmental changes can lead to evolution in just a few short generations. Can the process of adaptive evolution keep up with the rapid pace of human-caused environmental change and allow species to cope with new conditions? What factors can promote "evolutionary rescue," and what may constrain it in different types of organism?
Offering: **Crosslisting**

Identical With: **BIOL215Z**
Prereq: **MB&B182 OR BIOL182**

ENVS211 History of Ecology
The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

ENVS212 Introduction to Ethics
This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness. Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and

moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience. The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence? Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

ENVS213 Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies
Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, environmental legal frameworks, and a subtle mainstreaming of neopagan ritual practices and goddess worship in the Americas. This seminar will explore the social, legal and metaphysical aspects of myriad eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, pantheist, monist, and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Erndl 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S folks? Engaging emerging podcasts, shamanic documentaries, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke the gods to self-regulate the ecologically destructive practices of our late-stage capitalism? Who invokes who, how and when, shared where? To whom do we tend to listen on these matters, and why are they quaked to speak?

ENVS216 Ecology
Ecology is the scientific study of interactions between organisms and their environment, both biotic and abiotic. We will look at how these interactions shape fundamental characteristics of populations, communities, and ecosystems. Topics will include predation, competition, symbioses, and effects of stress and resource limitation in diverse environments. We will cover important consequences of interactions such as coevolution, population outbreaks, ecological coexistence, patterns of biodiversity, ecological succession, species invasions, food web dynamics, nutrient and energy cycling, variation in ecosystem goods and services, and global change.

This course emphasizes several learning goals in biology, including skill in formulating original ideas and experiments, using quantitative and graphical tools and interpreting quantitative information, and scientific writing.

ENVS217 The Environment, The Bible, and Moral Debate
The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular "biblical" view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

ENVS218 Nature/Culture
In this course, we are going to explore--and problematize--the boundary between the so-called "natural" world and human social and cultural life. Rather than assuming that "nature" is something that already exists in the world that humans have systematically excoriated and transformed, we consider instead the idea that nature and culture are fundamentally co-constitutive concepts--

that is to say, that one cannot exist without the other. As we go, we will explore pressing concerns such as the boundaries between human and non-human, the nature of the Anthropocene, the question of what it means to be "modern," and the power of ecological politics in our contemporary orders of global capitalism.

ENVS219 Hydrology
This course is an overview of the hydrologic cycle and man's impact on this fundamental resource. Topics include aspects of surface-water and ground-water hydrology as well as discussion about the scientific management of water resources. Students will become familiar with the basic concepts of hydrology and their application to problems of the environment.

ENVS219F Knowing the Natural World (FYS)
As humans we interact with the natural world through a wide array of perspectives. Nature is an adversary, a food pantry and medicine cabinet, a force to be reckoned with, mimicked, managed and revered. This course will explore various ways that humans experience and understand the natural world through a series of sensory, scientific, intellectual and creative investigations (some outdoors), and reflection and synthesis. Topics include the human biology that shapes our views (e.g., sensory systems), ecological interactions, land development and conservation, environmental assessment, biomimicry, food production and diversity, wildlife interactions, aesthetic and spiritual appreciation, and sustainability.

Gen Ed Area: **NSM-ENVS**
Prereq: **None**

ENVS220 Conservation Biology
This course will focus on the biology of conservation rather than cultural aspects of conservation. However, conservation issues will be placed in the context of ethics, economics, and politics. We will cover the fundamental processes that threaten wild populations, structure ecological communities, and determine the functioning of ecosystems. From this basis, we will explore important conservation issues such as habitat loss and alteration, overharvesting, food web alteration, invasive species, and climate change. We will use readings from the primary literature and field projects to learn about current research methods used in conservation biology. This course emphasizes reading and interpreting primary scientific literature and quantitative information, thinking critically about morals and ethics in society, and includes some hands-on research methods.

ENVS221 Environmental Policy
Arguably, environmental protection is the most complex and fascinating regulatory policy area. This course explores U.S. environmental regulation. We will examine the key features of policy and administration in each major area of environmental policy. Moreover, we will place regulation in a larger context and examine the factors that shape the environmental decisions of various economic actors. Although the course focuses primarily on domestic policy, at various points in the course we will draw both on comparative examples and the challenges associated with coordinating national policies and practices on an international level.

Gen Ed Area: **SBS-GOVT**
Identical With: **GOVT221**
Prereq: **None**

ENVS222 Metabolism and Technoscience
This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

ENVS223 Chinese Eco-Civilization: History, Experience, and Myths
The course traces the historical roots of the ideas of eco-civilization, a policy platform that appeared in the twenty-first century by examining how Chinese agrarian civilizations and their nomadic neighbors transformed the bio-physical environment over the course of 3,000 years of history. We will draw on translations of Chinese literary texts including poetry, classical prose, and novels to explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the modern period. How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice? Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs?

ENVS224 Intro to History: Biodiversity and its Histories
Biodiversity loss may portend the next mass extinction, but what is biodiversity? Euro-American concepts of biodiversity have become a category of policy and politics at local, regional, national, and international levels. This course will

track the development of these concepts from the 18th century to the present, paying special attention to the growth of natural history collections to document taxonomy, evolution, biogeography and ecology of species. How does the idea of living variation in genes, traits, species, and ecosystems relate to human and non-human beings?
Offering: **Crosslisting**
Grading: **A-F**

ENVS225 Liminal Animals: Animals in Urban Spaces
This course examines the major ways in which nonhuman animals influence and are influenced by human-built environments, with specific attention to the ethical, political, and social dimensions of human-animal interactions in these spaces. Discussions, films, readings, and an independent research project will introduce students to key concepts related to urban/suburban animal life. Specifically, it will focus on topics including the use of animals for food, the use of animals as spectacle or entertainment, animals as human companions, urban wildlife, "invasive" species, "vermin" and "problem" animals, animals and the law, ecological webs, and human encroachment in animal spaces.

Prereq: **None**

ENVS227 A Thousand Years of Iteration: Design for an Uncertain Future
The climate emergency is a product of design. Centuries worth of aesthetic and industrial innovation have created extractive infrastructure, efficient machines, and disposable products that make it increasingly easy to consume energy and resources on a global scale. As new conversations about just transitions, a circular economy, and a Green New Deal have begun to proliferate among designers, the discipline's troubled relationship to notions of "progress" remains largely unquestioned.

This reading- and research-intensive studio asks students to examine this history of technology and to critically evaluate shifting theoretical perspectives on nature and human development as they relate to design. Topics will include the lifespan of buildings and products, relationships with and obligations to materials and resources, and strategies for de-growth in indigenous and vernacular design precedents. These will be studied through assigned readings and in-class discussion, a series of design exercises, and the production of a final project from materials immediately at hand in Middletown.

ENVS229 What Can the Middle Ages Teach Us About Nature?
Today nature is at the center of our preoccupations. This course will go back to a time before human beings thought they were the masters of nature, when nature was at the same time teaching and allegory, metaphor and science. We will explore the different functions of nature in bestiaries, poems, romances, and herbaria from the Middle Ages to the beginning of the Early-Modern period (in modern French translation). We will be able to see a real herbarium in the Special Collections & Archives. Students will also visit the Davison Center for the Arts and the Joe Webb Peoples Museum to explore visual representations of nature as well as scientific displays. During the semester, students will put together a herbarium that will be displayed in an exhibition at the end of the semester.

ENVS230 Startup Incubator: The Art and Science of Launching Your Idea
The Startup Incubator is a one-semester, experiential learning program designed to teach and enable student entrepreneurs to develop sustainable business models from their ideas. The program will bring together an ambitious, committed, and diverse group of individuals from all classes and majors who are passionate about developing successful solutions to challenges; identify as entrepreneurs, disruptors, and thought leaders; and have the tenacity, work ethic, and ability to succeed. All participating students should have a promising business idea and take the course with the intention of launching or running their own venture. Student Incubator students actively participate in one cohort meeting a week: most are "classes" that take the form of lectures or workshops, and some are "practice days" that provide time to practice theories and methods necessary for success. Students also dedicate at least 10 additional hours per week to assignments, self-directed work, customer discovery, networking, and mentoring sessions. This course will feel like a combination of a college class and a rigorous startup incubator program. Success is a student using theories learned in class to validate their ideas by developing and accurately testing business assumptions, identifying and researching their target market, and pivoting to develop a sustainable business model. By enrolling, students make a commitment to themselves, the instructor, and the other members of the class. Note: This course is offered by the Patricelli Center for Social Entrepreneurship (wesleyan.edu/patricelli/) in partnership with the MEWS+ (themewsplus.co/).

ENVS230F The Simple Life (FYS)
As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

ENVS231 Irrigation
Irrigation is the artificial application of water to support crop growth, playing a crucial role in ensuring sustainable agricultural production and global food security. This course provides students with a comprehensive understanding of irrigation techniques, systems, and management practices essential for optimizing water use efficiency and enhancing crop productivity. Students will explore various irrigation methods, including surface, sprinkler, and drip irrigation, analyzing their advantages, limitations, and suitability for different crops and environments. Key topics include soil-water relationships, crop water requirements, irrigation system components, irrigation scheduling techniques, and sustainable water management strategies. Through a combination of theoretical learning and hands-on activities, students will gain the skills needed to design, implement, and manage efficient irrigation systems.

ENVS232 Ecological Design I: Being at Home in the World
Being at Home in the World is an introduction to the skills and thinking involved in the ecologically responsible creation of objects. This course is intended to provide a foundational understanding of the language of design, sources of materials, and energy systems. The studio encourages students to develop a rigorous, iterative working method to deeply analyze the nature of land and resources, explore options, and test ideas. This process of making is complemented and supported by an introduction to the history and theory of design, training with techniques and equipment, and active practice in keeping a sketchbook. Early exercises and projects in the course build familiarity and confidence with analytical drawing, making, and modeling techniques, which build toward the creation of a novel piece of design work presented at the final review.

ENVS233 Geobiology
Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology). Typically, this involves studying fossils within the context of their sedimentary setting. In this course, we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on the climate.

ENVS234 A Tale of Three Food Systems: Accessing Food in the US
The US food system is complex and characterized by both abundance and scarcity. In this course we will investigate the three main streams of the food system (conventional, alternative, and emergency) to understand the various ways food is procured in everyday life. We will utilize interdisciplinary food studies and health equity approach to explore the social, ecological, and health implications of these various streams and the impacts on different communities, with a focus on populations experiencing food insecurity. The course is intended as an introductory foundation in food systems and will include historical background and ongoing policies that have shaped the current food landscape, access, and inequities. We will also explore alternatives and actions in the ongoing struggle for food justice. We will use a range of texts from a variety of disciplines, as well as materials from popular culture including films, TV, and podcasts.

ENVS235 Calderwood Seminar in Public Writing: Radical Sustainability
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

ENVS237 Introduction to History: Environment
Humans have profoundly altered the character of Earth's environment since the advent of agriculture and settled societies some 10,000 years ago. This course is a study of the historical relationship between human beings and their habitats, with additional attention to arid lands as places of settlement, cultivation, and development. We explore how global problems such as climate change, biodiversity attenuation, and depletion of fossil soils, fuels, and water are linked to social problems such as economic inequality, food insecurity, conflict, and declining public health. The course reviews evidence of major environmental problems; considers how varied academic disciplines address them; and models a historical approach to understanding environmental change.

The course is divided into two parts: "Environmental Concepts," and "Case Studies." In Spring 2022, the case studies will be devoted to biodiversity.
Offering: **Crosslisting**
Grading: **OPT**

Prereq: **None**

ENVS237Z Forests: Ecology, Conservation and Futures
Forests are critical to the survival of humans and their fauna. Tropical and temperate forests, by their structure and composition, contain extraordinarily high biological diversity and provide critical ecosystem services with complex interactions with humans. This course will examine the structure, function, and diversity of tropical and temperate forests, with an emphasis on the ecological processes that shape plant and animal communities within these unique and diverse ecosystems. The class will examine major threats to the global forests and measures that may be put in place to allow for their recovery post disturbance. The course will be delivered though lectures, student-led discussions and debates and other in-class activities.

Identical With: **E&ES237Z**
Prereq: **None**

ENVS238 Bioethics and the Animal/Human Boundary
In this course, we will explore the construction of the animal/human boundary through the lens of bioethics. We will define bioethics as the study of the ethical consideration of medical, scientific, and technological advances and their effects on living beings. At the same time, we will pay close attention to the cultural contexts in which these advances emerge, imagining the realms of scientific progress and popular culture as mutually constitutive. We will consider topics such as cloning, organ transplantation, pharmaceutical testing, and gestational surrogacy, with a focus on the late 20th and early 21st centuries. We will begin by interrogating how ideas of the "animal" and the "human" are constructed through biomedical and cultural discourses. We will ask, How is the human defined? By intelligence or consciousness levels? By physical capabilities or esoteric qualities? Similarly, how has the human been defined against ideas of the animal? Or, what ethical justifications have been cited in the use of animals in biomedicine? What makes certain species "proper" research subjects and others not? What do these formulations tell us about our valuation of animal and human life, and what kinds of relationships exist between the two? To answer these questions, we will consult a wide range of interdisciplinary scholarship, from authors in the fields of animal/ity studies, bioethics and medicine/science history, sociology, anthropology, and philosophy. Students will also be exposed to the basics of biopolitical theory.

ENVS239 Renewable Energy
This course is an introduction to renewable energy from an Earth science perspective, covering the physical principles of power generation from natural energy flows and the transformation, transmission, and storage of energy on the electrical grid, as well as topics from energy markets and utilization. We focus on hydroelectric, wind, solar, geothermal, wave, and tidal energy, along with modern bioenergy. For comparison, we also briefly cover the conventional energy technology of fossil fuels and nuclear power. We discuss each renewable-energy resource, including the advantages, disadvantages, and environmental impacts of its accompanying technology. The course is quantitative with bi-weekly problem sets. Students are expected to gain theoretical and practical knowledge of renewable energy.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **NSM-EES**
Identical With: **E&ES254**
Prereq: **None**

ENVS240 Abolition Geographies
"Space always matters, and what we make of it in thought and practice determines, and it is determined by, how we mix our creativity with the external word to change it and ourselves in the process. In other words, one need not be a nationalist nor imagine self-determination to be fixed in modern definitions of states and sovereignty, to conclude that at the end of the day, freedom is a place. How do we find the place of freedom? More precisely, how do we make such a place over and over again?" --Ruth Wilson Gilmore, "Abolition Geographies" This course is not only an introduction to the burgeoning field of abolition geographies, introduced through the work of Ruth Wilson Gilmore, but invites students to engage with abolition geography as an intellectual and political practice. In this seminar, we will consider the relationship between freedom and place-making (the production of places) by examining Ruth Wilson Gilmore's analytics and by also engaging in a range of geographic struggles. For example, students will consider the extent to which enslaved rebellions, not limited to the Haitian Revolution, remade what we envision today as the Atlantic. Students will also have the opportunity to apply an abolitionist framework to their own research.

Identical With: **CSPL249**
Prereq: **CSPL239**

ENVS242 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL242, BIOL542, E&ES270, E&ES570**
Prereq: **None**

ENVS243 Averting Catastrophe: Public Policy and Risk Management
The U.S. faces several significant risks that, if poorly managed, could have significant implications for the economy, the environment, and public health. This course focuses on the government's role as risk manager. We will explore how public policies can be used to manage risk, mitigate the extent of damages to the environment, the economy, and public health, and avert catastrophic outcomes. After examining the concept of risk, decision-making under conditions of uncertainty, and competing policy instruments, we will turn to a series of case studies, including offshore oil spills, nuclear accidents, financial crises, the COVID-19 pandemic, and climate change. In each case, we will seek to better understand the factors that shape performance and consider the implications for strengthening the government's role as risk manager. We will conclude with an examination of an emerging issue: the regulation of artificial intelligence, a technology that even its strongest advocates admit could result in unprecedented dislocations and risks.

ENVS244 Strategies in Conservation and Environmental Action
This course is only open to Wesleyan sophomores and above, with permission of instructor during pre-registration. This course provides students with a framework for better understanding how environmental policy, programs, and change goals are developed and actions are taken. Content will provide students with information from different disciplines in order to better understand the context, challenges, and intent of a specific environmental project to be addressed by the class over the course of the semester. The class project will have a land or material management focus and be developed with an environmental partner. Content topics may include logistics and impacts of various management systems; ecosystem function and landscape ecology; environmental policy and stakeholder dynamics; data collection and analysis; and communications and education. Project work will include research, meetings, and field work, including service work that contributes to short-term goals and tests protocol. Time required may vary by week. Class periods, assessments, and readings will be right-sized to facilitate this time commitment. Students will be assigned project tasks according to their major and skills. The class will collectively produce and present finished products to the environmental partner. Projects change with each semester and vary in emphasis and ecological vs. social components.

ENVS246 People and Places: An Introduction to Environmental Psychology
This course explores human-environment interactions and the relationships between natural, social, and built environments in shaping people as individuals, and in turn, how people shape their environment(s). This course will critically explore theories and research that serve as the foundation of the field, as well as examine applications to real-world problems. This course will incorporate inquiry-based approaches to environmental psychology including the methods of participant observation and PhotoVoice. This course will engage ecological approaches and multi-level concepts in understanding human-environment dynamics and interactions from the home/personal space, community, and urban life, among others, as well as reflect on students' experience of their physical and social environments. As a survey course, this course will cover myriad topics with consideration to social justice, and varying conceptualizations and experiences addressing gender, race, class, age and people with disabilities. Considering the COVID-19 pandemic, this course will give special consideration to public space and home environments. As a discussion-based seminar, topics will ultimately be driven by student interest. Several films and podcasts may be incorporated into class. This course counts as an elective towards the psychology major.

ENVS247 Ecologies of Attention: Biosemiosis, Attunement, and Ethics
We consider variants on biosemiotic accounts of meaning, following one thread through Emerson to Nietzsche, another from Peirce and James to Bateson (Ecology of Mind, 1972) and Gibson (Ecological Approch to Visual Perception, 1979), and a third through contemporary indigenous thinkers and anthropologists attempting to bridge scientific ecology and animist panpsychism--Kimmerer, Whyte, Kohn, Ingold, Strathern. While most of the texts here focus on the nature of meaning as a living process, they are also in constant dialogue with normative concerns, being both motivated by subversive or non-humanist ecological values and inspiring distinctive insights about how to lead meaningfully connected lives.

ENVS249 Energy Legacies and Ecological Futures
Manresa Island, on the coast of South Norwalk, Connecticut, was the site of an NRG coal-fired power plant (and later oil). The plant, slated for decommission, was shuttered overnight after heavy flooding during Hurricane Sandy. Its planned transformation, funded by a 501(c)3 non-profit corporation, includes the remaking of its massive turbine hall as a community space and the remediation of the entire peninsula for use as a public park. The 125-acre site includes a birch forest on a coal ash dump, salt marsh, and other coastal wetland habitats that currently harbor populations turkey, osprey, and deer. Casual observers liken Manresa's abandoned spaces to those of Chernobyl, with the detritus of human settlement engulfed by resurgent vegetation and wildlife. This flawed analogy obscures as much as it reveals, conjuring ethically compromised aesthetics of post-industrial ruin photography and associated practices of dark tourism. But there is a parallel history of energy, hazard, and aftermath with which we have yet to reckon locally or globally. The objective of this course is to produce histories of energy transition calling on (1) records of Manresa Island recently acquired by the 501(c)3, and (2) the testimonies of NRG workers present during Hurricane Sandy. The course will train students in modalities of archival and oral history with reference to these untapped resources. This course will require 2-4 field site visits to Manresa Island, to be scheduled 12-5 p.m. Thursday or Friday.

Multiple scheduling options will be available, and students should be able to commit to at least two field trips per semester. Transportation will be provided.

ENVS250 Capitalism and the Politics of Climate Change: When an Unstoppable Force Meets an Immovable Object
This course explores the complex relationship between capitalism and climate change. In the first part of the course, taking a comparative approach with a primary focus on the US, we begin by examining how capitalism has evolved since the Industrial Revolution, and how various capitalist models have developed worldwide, depending on the role of the state. In the second part, we question the "hegemony of growth" -- how growth has been perceived as an indicator of progress and distributive justice -- and explore competing visions of green growth and degrowth. In the third part, the course shifts to the political economy of decarbonization. We discuss the history and current realities of carbon dependency, examine cross-national variations in decarbonization efforts, consider the challenging trade-offs, and explore the economic and political factors underlying the struggle over climate policies. Our discussion will also focus on the role of economists and other experts in shaping mitigation efforts.

ENVS250Z Pandemic and the Environment
The COVID-19 pandemic is a global disturbance with important environmental causes, effects, and interactions. We will explore four key topics, evaluating what occurred and implications for future policy and practice. Wildlife: SARS-CoV-2 is a zoonotic disease, facilitated by "bush meat" markets and development of habitat that bring wildlife in close proximity to each other and humans. Stay-at-home orders, and temporary abandonment of human spaces released wildlife from constraints, while exposing the nature of our interdependence. Air pollution: Rates of hospitalization and mortality are greatest for those living with chronically high levels of air pollution, particularly PM

We will examine these themes through readings and apply our understanding of scientific process, peer-review, sources of data, context, voice, and audience.

ENVS254 Architecture of the 20th Century
The course considers influential works in architecture, its theory and criticism, and ideas for urbanism, mostly in Europe and the United States, from about 1900 to the present. Early parts of the semester focus on the origin and development of the modern movement in Europe to 1940, with attention given to selected American developments before World War II. Later parts of the course deal with Western architecture from 1945 to the present, including later modernist, postmodernist, and deconstructivist work, urbanism and housing, computer-aided design from the 1990s, green buildings, and postwar architecture in Latin America and Japan and in postcolonial India and Africa. Major movements and architects considered include the Viennese Secession, the Bauhaus, Le Corbusier, Mies van der Rohe, Frank Lloyd Wright, Alvar Aalto, and Louis Kahn, among many others.

ENVS255 The Flooded Savannahs of the Orinoco River: Biodiversity, Aquatic Ecology and Sustainable Use
The flooded savannahs, known as Llanos (pronounced Yan-nos), are the largest ecotype in the world extending more than 570,000 km2. During the peak rainy season of May through July, more than 106,000 km2 are flooded. The rains are torrential, and a vast wetland emerges. The ecology of the llanos changes dramatically from a principally terrestrial savannah ecotone to one of a water-dominated wetland. With the inundation of the llanos, the biomass and species richness of the fishes increases dramatically to be among the richest of the planet, exceeding all estuaries in richness and biodiversity. In this course we will discuss the aquatic ecology principally of the fishes to learn about their diversity and the historic evolution of the habitat. Other species such as birds, amphibians, reptiles and mammals will also be discussed. The course will include analyses of the intersection of human use and the ecology of the fishes, which provide sustenance for hundreds of thousands of people. Through seminars and discussions this course will allow an analysis of the importance of the fish as natural resource. The evolution, ecological adaptations and natural history will be examined with an emphasis to understanding how sustainable use can be achieved.

ENVS256 A Celebration of Women in Jazz: A Critical Analysis of Gender
How can we take the lessons of Jazz with us into other spaces? In this course, students will study Women in Jazz and examine the broad impact of our social structures and power systems to consider how the lessons of Jazz can help us navigate our future. How can we take the values of Jazz, such as improvisation, listening skills, democracy, a celebration of diversity, and equity work, and use our agency to effect change for the better in our communities? This course will examine the traditionally male-dominated nature of Jazz, its history of misogyny, and underrepresentation of women and other gender expressions. Students will learn in general about the musical art form of Jazz, its history as Black American music, and its unique qualities including improvisation, the blues, and swing. There will be a strong focus on listening to music from women musicians, and students will learn how to actively listen to jazz and all music. Together, we will look at case studies of successful women musicians and composers from the history of Jazz through the present, reading biographical information and reviewing their performance and compositional contributions. Musicians may include Mary Lou Williams, Carla Bley, Terri Lynn Carrington, esperanza spalding, Nina Simone, Billie Holiday, Ella Fitzgerald, Melba Liston, Lil' Hardin Armstrong, Dinah Washington, Abbey Lincoln, Toshiko Akiyoshi, and Marian McPartland.

ENVS257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants,

animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.

ENVS258 Remote Sensing for Natural Hazards
This course explores the role of remote sensing in monitoring and mitigating natural hazards. Students will learn how to acquire, process, and analyze remote sensing data, with a specific focus on both optical and radar satellite data. These technologies will be applied to assess the spatial extent, severity, and risk of natural hazards such as earthquakes, landslides, floods, hurricanes, wildfires, and volcanic activity. Emphasis will be placed on understanding how different types of remotely sensed data interact with various environmental features, such as landforms, vegetation, and water bodies. Through a combination of lectures, data analysis exercises, and practical applications, students will gain hands-on experience in using remote sensing tools to develop hazard models and response strategies. Case studies from recent natural disasters will be used to illustrate key concepts. Prior knowledge of GIS or geospatial analysis is recommended.

ENVS259 Development, Disasters, and Beyond: The Global Politics of Aid
Development is one of the most important ideas of our times. It is a powerful way of reorganizing the world into the Global South and the Global North (or the Third and First Worlds) and promising modernity to "backward" places and people. It is an equally powerful way of intervening in "underdeveloped" regions in the name of progress and beneficence through aid programs. Our purpose in this course is to use the spy lens of anthropology to critically examine the global politics of development aid, whether given for poverty alleviation, infrastructure projects, disease and healthcare, or disaster relief. While development aid is certainly a potent way to exert power over and regulate Third World Others, it is also a fiercely contested space of struggle. This course approaches it as a "problematic"--an unsettled, contentious, and unpredictable formation.

ENVS260 Global Change and Infectious Disease
This course will cover how human demands upon the environment have come back to bite us through infectious diseases. The most devastating infections, now and in the past, have spilled into humanity from other animals through our quest for food, either through hunting and trade of wild animals (COVID-19 and HIV) or through agriculture (smallpox and measles). Additionally, taking over huge swaths of land has fragmented natural habitats, with the result that some pathogens have increased in abundance (Lyme disease) and some pathogens have moved closer to humanity when humans have encroached on natural lands (Ebola). Living at high density in interconnected cities has sustained the severe infections that became humanity's childhood diseases (mumps, measles, smallpox); high densities have also brought us diseases brought by fecally contaminated water, as well as those diseases brought by the animals that cohabit our cities and suburbs (rats, robins). Our demand on energy has brought us global warming, which is transporting tropical diseases, such as malaria, poleward from the tropics; the extreme weather events of a changed world are leading to outbreaks of zoonotic diseases (hantaviruses). Moreover, our penchant for transporting wild animals and ourselves has had the potential to spread any local flare-up of any novel disease to the whole world (plague, COVID-19). We will discuss how, even if we mitigate every existing human infection, we should expect an unending stream of new pathogens. We will discuss technological solutions to infectious diseases, as well as how changes in our ethics might help contain existing pathogens and avoid future spillovers. Lectures will cover these and other topics. There will be two 65-minute lectures each week, with frequent opportunities for students to break out into smaller sections to figure out interesting biological challenges. There will also be a 30-minute discussion each week for each of 11 discussion sections (probably about 15 students each). These discussions will focus mostly on how policy changes might best mitigate the environmental disturbances that are bringing us infections. The course has no formal prerequisites and will introduce material from ecology and microbiology, as needed, to allow students to read and interpret the recent literature on global change and infectious disease.

ENVS261 Science Materials For a Malagasy Classroom
Students will design and produce a variety of educational science materials to be used in a fifth grade classroom in Madagascar. These items include a science logo, bookmarks, educational science games, posters, and a comic book with conservation themes for children. Students who are interested in design and natural history as a means through which to communicate science themes on wildlife endemism, evolution, and climate change would be appropriate for this course. All students will need to conduct independent research into science topics, distill down the salient features, and use that information to design elementary school materials. Working both individually and in teams, students will conceive, design, critique, and move into product production (MakerSpace). In addition, prototypes of the materials will be reviewed and rated by fifth graders in a Middletown elementary school for feedback.

ENVS262 Archaeology of Food, Trade, and Power in South India
This course examines patterns of life in premodern South India, focusing on the millennium from about AD 600 to 1600. It explores the persistent practices and institutions that structured social life--agricultural regimes of food production, patterns of local and long-distance trade, and elite discourses of power and authority--as well as historical events and processes that brought change to those patterns. The course capitalizes on South India's rich array of archaeological evidence, from surface remains and excavated finds to standing architectural monuments, donative inscriptions on stone and copper plates, and various forms of coinage and coin hoards informing on economic life. Specific topics investigated include the articulation of cultural space and landscapes; food, subsistence, and modes of agricultural production; domestic architecture and habitation; trade, markets, and monetary systems; and the roles of religion

and ritual in legitimating political power. There is an explicit emphasis on methods and their application, including those of epigraphy (the analysis of inscriptions), numismatics (the materially based study of coinage and monetary systems), surface archaeology (survey, documentation, and analysis of exposed surface remains), and the archaeology of buildings. Many class sessions will be devoted to active discussion and analysis of data.

ENVS263 Botanizing Worlds
What can plants tell us about the human condition, and more broadly about the rapidly changing conditions on Earth? In recent years, scholars, writers, and artists have been calling for new ways to address "plant blindness"; finally, it appears that plants are having a moment. Plants are crucial to the survival of human life. From the food we eat to the air we breathe to the clothes we wear, plant bodies are used to build homes, cure our ailments, and feed our addictions. Putting plants to use is tantamount to survival, but this course aims for a less extractive relationship with plants. This course explores what we might gain by learning from plants -- to know them, think with them, and attune our senses to their liveliness -- raising fundamental questions about human-plant relations to reconsider what it means to be human. This course aims to gather the lively energies surrounding plants today and the expertise of scholars and regional collaborators, and direct them toward the development of a cutting-edge, interdisciplinary curriculum by bringing together researchers, artists, and curators from multiple institutions to read and discuss key works in the botanical humanities and connect with related sites (botanic gardens, greenhouses, laboratories, archives, special collections, etc.) at our campuses. This course will showcase exercises, assignments, and reading lists that can promote humanistic research and thinking with and about plants.

ENVS263B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870
This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.
The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

ENVS264 Waterways: Maritime World History
Human history has been shaped by the sea. Whether as a source of food, a frontier, a boundary, or a bridge, the sea has represented a site of both opportunity and danger. This course will examine the way humans have responded to their marine and maritime environments, both in terms of the technologies they have developed to navigate and exploit them but also insofar as the sea has shaped the way humans think about themselves. While our inquiry will extend into the deep past and the early development of human culture and civilization, we will focus on maritime history over the past millennium, the development of oceanic worlds, the rise of the "age of sail" between the 16th and 19th centuries, and the transformation of global navigation and politics with the rise of steam, diesel, and nuclear power.

ENVS265 Environmental Justice & Health Equity
The environmental justice movement (EJM) has evolved over the last several decades, both in the US and globally. The EJM seeks to respond to environmental inequalities that directly impact human health and safety, particularly among people who live or work in settings that put them at higher risk of exposure to environmental hazards. The Agency for Toxic Substances and Disease Registry (ATSDR, part of the Centers for Disease Control and Prevention) describes the goal of environmental justice as "...when everyone enjoys the same degree of protection from environmental and health hazards, and equal access to the decision-making process to live, learn, and work in a healthy environment." In this course we recognize the current environmental crisis as rooted in systemic inequities that are implicated in social determinants of health (SDOH) and have major implications for health outcomes of affected populations. Therefore, we will explore the EJM from a health equity lens, including racial capitalism, intersectionality, and other forms of structural violence that serve as SDOH, to explore the implications of environmental injustices on health equity. In addition, we will examine how academics, nonprofit/community-based organizations, community members, and government agencies collaborate to address environmental justice-related health equity. Finally, we will look at the notion of "just sustainabilities" to investigate and imagine solutions to these ongoing challenges that build community power to advance sustainable communities and health equity.

ENVS266 Free the Land: Histories of Environmental Racism
This course will introduce students to the study and discussion of environmental racism and environmental justice in the United States that centers the histories and experiences of communities of color. Environmental racism is defined by Dr. Robert Bullard ("the Father of Environmental Justice'') as "any policy, practice or directive that differentially affects or disadvantages (where intended or unintended) individuals, groups or communities based on race." This course expands and illuminates this definition through examinations of watershed moments--from the Transatlantic Slave Trade to struggles in the greater Connecticut River Valley today--in which communities of color in the United States bear the deadly brunt of toxic fumes, poisoned groundwater, nuclear waste, perilous disaster work, land theft, and the slow violence of biological extermination. Throughout the semester, we will read scholarly texts, engage primary sources, analyze popular and independent media, and study testimony and self-published materials from activists and eyewitnesses.

Prereq: **None**

ENVS267 Development in Question: Conservation in Africa
"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, scientists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international and governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine game park politics, the history of resource extraction, climate change, and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

ENVS268 Environmental and Industrial History of the Long Island Sound
This course is a history of the Long Island Sound, the body of water which stretches from the East River in New York City to Block Island in Rhode Island and connects the eastern seaboard states of New York and Connecticut to the Atlantic Ocean. After a brief account of the sound's glacial history and riverine geography, we will focus on the environmental, social, and economic history of the region from the 18th to 21st centuries, with a focus on exploitation for textiles, metal production, fishing, and oystering. We will dedicate special attention to industrial pollution and federal, state, and local efforts to assess environmental impacts and restrict dumping in the sound. Field trips will include a visit to Manresa Island, the site of a coal-fired power plant (and later, oil), shuttered amid heavy flooding during Hurricane Sandy (2012). Topics discussed include the regulation and remediation of dumped sediment in Norwalk Harbor and Manresa Island containing heavy metals and coal ash.

ENVS268Z Environmental Justice Advocacy: Assessing Law, Community-Based Engagement, and More
ONLINE COURSE: Synchronous class meetings via Zoom,10am-noon and 2-5pm. Classes held Jan 4, 6, 8, 10, 12, 14, 16, 18. (Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings.) The concept of "environmental justice" focuses on the equitable distribution of pollution and health burdens--such as the siting of fossil fuel infrastructure and pollution-emitting facilities--as well as benefits such as clean air and clean water. Procedural justice and restorative justice are also key demands of the environmental justice movement. In addition, as communities of color and low-income communities disproportionately bear the burdens of climate change and resulting "climate gentrification," the overlap between environmental injustice and climate change is becoming increasingly apparent. After a brief introduction to the concept of environmental justice, this course will focus on advocacy efforts to promote environmental justice and, in particular, the benefits and limitations of various tools including the law, grassroots organizing, and policy work. For their final project, students will use what they learn in the course to design and propose their own environmental justice intervention. By the end of the course, students will understand the history, foundational theory, and key case studies of environmental justice as well as the tools and strategies that environmental justice advocates use. Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

ENVS269 Drones and Change
Civilian use of unoccupied aerial vehicles or drones to capture data and measure change can enhance our understanding of the natural and built environments. While drones are increasingly available for entry-level to professional level adoption, there remains value in understanding how the infrastructure for their development and deployment have evolved and what is required to ensure their continued safe and ethical utility of these devices. In this class, we will explore the legal and infrastructure elements of drone development and deployment for civilian utility of drones, while working on data collection, analysis, and interpretation that will allow students to better appreciate the value and utility of drones. Over the course of the semester, students will work on understanding and building drones, collecting data with small drones, examining the commercial versus open-source platforms for drones, and preparing to take the Federal Aviation Authority Part 107 license to allow them to fly drones safely.

ENVS270 Environmental Philosophy
This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition--human-centered and individualist accounts of existence, agency, knowledge, and value. Shared questions may include: Is there a coherent way of distinguishing "nature" from the non-natural? What can we understand about non-human experience and value? How do people become motivated

to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies? How do concepts of moral responsibility apply to climate change? How does environmentally directed action relate to social justice? When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another? Despite near consensus about our times being rife with environmental crises, concepts like "environment" and "nature" defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainability, they may not share any clear positive account of justice or of sustainability. Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique--each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics). Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

ENVS271 Designing With Living Systems: Soft + Hairy
In this part seminar, part studio course, students will go on field trips and read extensively to develop an understanding of mycelium and how it is explored in design. We will explore temporality in design with particular focus on how biodegradable materials such as mycelium can form our experience of an object. We will study how mycelium can be utilized as a living material to form a built ecology. In particular, we will study how to design for impermanence -- sometimes using waste materials -- and develop an understanding for material recovery. Students will work both individually and collaboratively in a studio environment. Field trips to New York City museums, fabricators, and galleries, as well as around CT may be expected as part of this course.

ENVS272 Knowing Their Place: Two Centuries of Women Generating Wonder in the Natural World
This seminar will examine the intersection of natural science, women's history, and poetic prose through the writings of Rachel Carson and the female nature writers who both preceded and succeeded her, including Mary Treat, Anna Botsford Comstock, Mabel Osgood Wright, Annie Dillard, Terry Tempest Williams, Robin Wall Kimmerer, Camille Dungy, and others. These women looked closely at the natural world and wrote intimately on botany, birdwatching, and the ecology of their local landscapes, teaching their readers to feel wonder and a sense of connection with place. What does it mean to know a landscape or an ecosystem intimately? How does a sense of place become political? How does gender affect perspective on the natural world and environmental stewardship? Each student will put these ideas into play in a portfolio of place-based personal essays.
Offering: **Host**

ENVS273 Environmental Politics in East Asia
This is an upper-division course on the environmental politics of East Asia. It will focus on the major environmental issues of our time (pollution, conservation, energy, waste, environmental justice, etc.), and how East Asian countries are coping with them from both policy and politics perspectives. It will cover both transnational and international efforts, as well as national and local initiatives. The course will require that students "do" environmental politics as well as study environmental politics through a civic engagement component.

ENVS274 Narratives of the Latin American Jungle
This course is a critical exploration of the ways in which forests and its plurality of beings, and particularly the tropical territories marked as jungle or rainforest in South America (the Amazon, the Darién), have been narrated, imagined, and contested in cultural production and in indigenous and peasant ontologies and place-based practices for more than a century. We will investigate the construction of jungle as a territory of dwelling shaped by the relational condition between human and other-than-human beings (plants, animals, water) and as a place where diverse anxieties about sovereignty, politics, race, development, gender, and subversion collide. We will examine this cultural geography in relation to diverse histories of modernization, development and extractivism, the global angst over the environment and its destruction, local processes of (cosmopolitical) resistance, and the various political and environmental conflicts that have shaped the region over the past century. Attending to Amazonian indigenous thought and to political ecology and other intellectual practices emerging from Latin America, as well as to literature, film, popular culture and visual art, we will discuss the potential to disavow modern/colonial binaries like nature-culture, human-nonhuman and civilization-barbarism, in a place that has been central to the way in which Latin America has been imagined for centuries.

ENVS276 Law and Policy of Natural Resources: Water, Air, Biodiversity, and Climate Change
How do we protect our environmental and natural resources, and why have we chosen this path? When and how do the public, NGOs, and regulated industries have a voice? When is an environmental impact statement required and which alternatives must be considered? When and how are environmental considerations part of the decision-making process? Is there a path forward to better address greenhouse gases and climate change? How can we protect endangered and threatened species and preserve their habitats? Where do we go from here as we confront the more complex issues associated with greenhouse gases/climate? How do our energy sources impact our environment? This highly interactive course will examine the source of environmental and natural resource law, its evolution, and boundaries. It will explore how and when we have access to the process and then turn attention to the programs most central to natural resource and environmental protection: the National Environmental Policy Act, The Clean Water Act, The Clean Air Act, as well as certain land-focused state and municipal programs. Given renewed

commitments to alternative energy and environmental justice (EJ), the course devotes time to considering both through the lens of environmental law and policy. The course concludes with a capstone project in which students are assigned to a team as either proponent or opponent. Each team is then provided an information packet setting a scenario, setting, certain facts, and any legal information beyond course coverage. Following this, each team prepares for and advances technical, legal, and policy arguments in support of its goals and is afforded the opportunity to cross-examine the opposition.

Prereq: **ENVS195 OR ENVS197 OR ENVS219F OR EES199 OR E&ES155**

ENVS277 Law and Policy of Contamination, Cleanups, Communities (Environmental Justice), and Chemicals
How do we protect our environment and ourselves from wastes and chemicals? Why have we chosen this path? When and how do the public, NGOs, and regulated industries have a voice? When is something that is not used considered waste, and when is that waste a hazardous waste? When does someone need to clean up the contaminated environment? Who is that someone? How clean is clean? How have chemicals ended up in commerce? When and under what circumstances can new chemicals enter our lives? When and how are environmental and health considerations part of the decision-making process? How do we avoid environmental disasters? What is required in terms of thinking about and planning for the "unthinkable"? What drives sustainability initiatives, beneficial reuse, and life cycle analysis? This highly interactive course will examine the source of environmental law, its evolution, and boundaries. Students will explore how and when we have access to the process and examine: (i) the Resource Conservation Recovery Act, Superfund, and related brownfield initiatives; (ii) the Toxic Substances Control Act and international counterparts; (iii) the Emergency Planning and Community Right To Know Act; (iv) environmental justice in the context of waste and chemical management; and (v) sustainability, product stewardship, and related initiatives. The course concludes with a capstone project in which students are assigned to a team as either proponent or opponent. Each team is then provided an information packet setting a scenario, setting, certain facts, and any legal information beyond course coverage. Following this, each team prepares for and advances technical, legal, and policy arguments in support of its goals and is afforded the opportunity to cross-examine the opposition.

ENVS278 Introduction to GIS
Geographical information systems (GIS) are powerful tools for organizing, analyzing, and displaying spatial data. GIS has applications in a wide variety of fields including the natural sciences, public policy, business, and the humanities; literally any field that uses spatially distributed information. In this course, we will explore the fundamentals of GIS with an emphasis on practical application of GIS to problems from a range of disciplines. The course will cover the basic theory of GIS, data collection and input, data management, spatial analysis, visualization, and map preparation. Coursework will include lectures, discussions, and hands-on activities.

Gen Ed Area: **NSM-EES**
Identical With: **E&ES280, E&ES580**
Prereq: **None**

ENVS279 Eating Others: Histories and Cultures of Animal Edibility
For many people, animals form a significant and cherished part of their diet. Indeed, humans have used other animals as sources of nutrients for hundreds of thousands of years. What can these animal-based dietary practices tell us about humans and their relationships with other animals? Of course, these inter-species relationships have varied as radically across time and cultures as the dietary practices that have shaped them. To better understand some of these practices and the relationships they generate, this course will explore the following questions: How did animal-based food practices develop from pre-domestication to the contemporary era of industrialized animal agriculture? How have cultural categories of "edibility" developed in different cultural contexts? What is meat, and how does it differ from inedible flesh? How have gender, class, race, sexuality, and other categories of difference intersected with and shaped animal consumption practices in different times and contexts? How has animal consumption shaped and been shaped by animal ethics, philosophy, and scientific knowledge production? How has large-scale animal consumption contributed to the ecological crises of the Anthropocene, and how have these in turn affected animal consumption practices? What is the future of animal-based food? This course will use ethnographies, historical and legal analyses, and philosophical inquiries to examine the histories and cultures of animal edibility. Specifically, it will focus on topics including human evolution, animal domestication, slaughter practices, industrialized animal agriculture, indigenous ecological ontologies, hunting, dairy and egg consumption, cannibalism, cultural conflicts over the edibility of specific species, and recent technological innovations that can produce animal products without animals.

Identical With: **STS266, ANTH279**
Prereq: **None**

ENVS280 Environmental Geochemistry
This course is a qualitative and quantitative treatment of chemical processes in natural systems such as lakes, rivers, groundwater, oceans, and the atmosphere. General topics include equilibrium thermodynamics, acid-base equilibria, the carbonic acid system, oxidation-reduction reactions in nature, and isotope geochemistry. The associated lab course (E&ES 251) must be taken concurrently if offered. The lab course will be a service-learning course in which students work with a community organization to solve an environmental problem or a semester-long research project. There are no official prerequisite classes, but students should be comfortable with chemical concepts or should have taken introductory college chemistry or advanced high school chemistry courses.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES250**
Prereq: **None**

ENVS281 Environmental Geochemistry Laboratory
This course will supplement E&ES 250 by providing students with hands-on experience of the concepts taught in E&ES 250. Students must enroll in E&ES 250 at the same time. This course will emphasize the field collection, chemical analysis, and data analysis of environmental water, air, and rock samples. This course will be taught as a service-learning course where the class works with a community organization to solve an environmental problem or will work on a semester-long research project. The subject of this class will be announced on the first day of class.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**

Identical With: **E&ES251**
Prereq: **None**

ENVS282 Sustainable Agriculture and Food Systems
This course explores strategies to create a sustainable agriculture and food system. The course will begin with an overview of the environmental issues associated with our agriculture and food system along with current production and consumption trends. Other topics covered in the course will include: environmental certification, starting and managing a farm, organic versus conventional farming, and the impact of diet choice on the environment.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ENVS**
Prereq: **None**

ENVS283 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy (CLAC 1.0)
(English translation follows below) Este curso examinará los factores clave que han afectado el desarrollo de Venezuela y su entorno desde el período precolonial hasta el presente. Dividiremos la historia de Venezuela en dos períodos críticos: antes y después del descubrimiento de petróleo. Haremos preguntas sobre la naturaleza y las interacciones de los factores y agentes clave que transformaron a Venezuela de una colonia a la de un país económicamente independiente. Al examinar los períodos económicos anteriores y posteriores al petróleo por separado, aprenderemos que los factores clave, como la agricultura, el uso de la tierra y la influencia colonial europea, cambiaron drásticamente, transformando así muchas instituciones sociopolíticas. Los contrastes incluirán la resiliencia y la erradicación de enfermedades, los derechos humanos y la esclavitud, la propiedad de la tierra, la salud humana, los impactos en la biodiversidad y la salud humana, y la protección de las culturas indígenas. En última instancia, examinaremos los factores que han llevado al colapso de la democracia. Leeremos una literatura interdisciplinaria que incluye antropología, religión, sociología, ciencias ambientales, derecho e historia. El curso se presenta en un formato de lectura / discusión en el que todas las lecturas, escritos y discusiones serán en español. This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

Identical With: **LAST383, CGST283**
Prereq: **SPAN221**

ENVS284 Animal Law and Policy
This course will provide an overview of law and public policy as they apply to non-human animals. The course will explore the historical and philosophical treatment of animals; discuss how such treatment impacts the way judges, policymakers, lawyers, legal scholars, and lay people see, speak about, and use animals; survey current animal protection laws and regulations, including overlap with such policy issues as food and agriculture, climate change, and biodiversity protection; consider recent political and legal campaigns to reform animal protection laws; examine the concept of "standing" and the problems of litigating on behalf of animals; interrogate the current classification of animals as "property" and the impacts of that classification; and debate the carceral turn in animal legal advocacy.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS293, PHIL283**
Prereq: **None**

ENVS285 Environmental Law and Policy
If you are interested in the environment and want some perspective on where our environmental law and policy came from, how it works, where it has succeeded and failed, what the unresolved issues have been and which remain, where the emerging topics (e.g. climate, PFAS, Environmental Justice) may take us, and a sense of the past and present battlegrounds of environmental law, then Environmental Law and Policy is for you. This course is taught using the Socratic (highly interactive) method, includes a "brownfield" negotiation, and culminates in student run hearings in which you will prepare, present, and argue about issues from what is a "water" of the U.S. to recycling and reclamation to what is solid and hazardous waste?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ENVS**
Prereq: **[ENVS197 or BIOL197 or E&ES197] OR EES199**

ENVS286 Plant Form and Diversity
The course begins with an overview of plant evolutionary history, then covers the basic structure and function of the plant body, the plant life cycle in nature, including interactions with animals, and ecological diversity of plants in contrasting habitats. Special events include a field trip to the Smith College Botanic Garden, two hands-on days for working with living specimens, and a special guest lecture by a local plant biologist.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL290, BIOL590**
Prereq: **BIOL182 OR MB&B182 OR BIOL182Z**

ENVS288 Community Paleoecology
The study of community paleoecology seeks to derive ecological meaning from the reconstruction of ancient ecosystems. From this vantage point, fossil assemblages are used to observe long-term patterns in biogeography, evolution, and organism-environment interactions. The overarching themes in this course will emphasize theoretical frameworks in community ecology and stratigraphic paleobiology that advance the collective understanding of how to read and interpret the fossil record to document ecosystem interactions over geologic history. Case studies from across Earth's history will underscore the necessity of examining past ecosystems to contextualize modern and future ecosystem structure. We will accomplish these aims with lectures, readings and discussion of the primary literature, and student presentations. Pre/co-requisites: BIOL182, E&ES101, E&ES115, E&ES155, E&ES197, or E&ES199.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES258**

Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR ENVS197 OR EES199 OR BIOL182**

ENVS289 Introductory Ecological Methods in R
This lab class is required of students enrolled in the accompanying lecture (EES 258). We will learn to use R to analyze paleontological records with multivariate methods and specifically become familiar with the vegan package for interpreting large ecological datasets such as species abundance data. Prior knowledge of or experience with R is not a prerequisite and beginners are especially encouraged to enroll in this course. Students with intermediate and advanced R skills are still welcome to enroll, but should recognize that much of this course will focus on the beginner experience. Assignments and projects will be collaborative, such that students across experience levels will work together to complete the course material. Pre/co-requisites: BIOL181/BIOL182, E&ES101, E&ES115, E&ES155, E&ES197, or E&ES199.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **E&ES259**
Prereq: **E&ES101 OR E&ES115 OR EES155OR ENVS197 OR EES199 OR BIOL182**

ENVS290 Oceans and Climate
Earth's climate is not static. Even without human intervention, the climate has changed, but mostly at a slower rate. In this course we will study the major properties of the ocean and its circulation and changes in climate during the Cenozoic Era (the past 66 million years). We will examine the effects of variations in greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. Once a basic understanding of the climate system is attained, the focus will be on how we know about past climates. Through reading and in-class exercises students will look at data from sediment cores, ice cores, and tree rings to learn about past climates. The final project will investigate measures humans can take to slow the rate of climate change. It is possible and must be done. Although this course is offered pass/fail, participants are expected to maintain a grade of B- or better to pass.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES260, E&ES560**

ENVS291 East Asian Archaeology
This course will introduce students to remarkable archaeological discoveries from East Asia, focusing on the archaeology of ancient China, but also including finds from Japan, Korea, and Mongolia. Beginning with "Peking Man" and Asia's earliest hominin inhabitants, we will explore the lives of Paleolithic hunter gatherers, the origins of domestic rice and pigs, the emergence of early villages and cities, the origins of writing, ancient ritual systems, long-distance interactions through land and maritime Silk Roads, and the archaeology of Chinese diaspora populations living in the 19th-century United States. We will also consider the current state of archaeological research in East Asia, focusing on site preservation, cultural heritage management, and the political roles of archaeology.

Identical With: **ARCP291, ANTH291, CEAS291, IDEA291**
Prereq: **None**

ENVS292 Techniques in Ocean and Climate Investigations
Weekly field trips, computer and/or laboratory exercises will allow us to see how climate and oceans function today and in the past. We will use data sets from international organizations to examine what we know about past climates. There may be an opportunity to use a climate model, En-ROADS, with a community group to investigate what can be done to reduce greenhouse gases input to the atmosphere. Although this course is offered pass/fail, participants are expected to maintain a grade of B- or better to pass.
Offering: **Crosslisting**
Grading: **A-F**

ENVS293 Environmental Justice: Community-based Participatory Research
This course provides a foundation for addressing environmental and food justice through community-based participatory research (CBPR). Students will develop competencies to prepare them to work with communities to identify and understand environmental, food security, health, and social conditions that impact their communities and organizations. We will be drawing on theoretical and practical approaches from across the environmental social sciences (ESS) including psychology, anthropology, sociology, community health, and geography to help us frame ways of looking at critical community issues. Specifically, we will discuss a wide range of mixed methods with an emphasis on participatory approaches to developing research questions and hypotheses, community-engaged evaluation planning, needs assessments, and landscape scans. Students will also learn about ethical issues in research, particularly as pertaining to working with community stakeholders. Over the course of the semester, students complete a variety of practical exercises designed to gain experience with qualitative and quantitative data collection, analysis, and community learning.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Prereq: **BIOL197 OR E&ES197 OR ENVS197 OR ENVS219F OR E&ES155 OR EES199**

ENVS294 Current Environmental Issues in Latin America (CLAC 1.0)
(English translation below Spanish text) Este curso proporcionará información histórica y actual sobre el desarrollo de temas ambientales en América Latina. La información se dividirá en la evaluación del uso del medio ambiente durante los períodos precolombino y colonial (a); y b) período moderno. Se discutirá la organización, estructura y gobernanza del medio ambiente. El desarrollo de políticas públicas, planes de gestión, factores que se deterioran y los posibles usos sostenibles del medio ambiente y sus recursos. Leeremos literatura interdisciplinaria incluyendo: académica, informes, documentos oficiales gubernamentales y proyectos de ONG dedicados al diagnóstico, desarrollo y uso o nuestros recursos en América Latina. Por último, se estudiarán casos particulares de países latinoamericanos como Argentina, Brasil, México, Costa Rica, Perú y Venezuela. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs' projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

ENVS295 Saving Animals: The Politics of Rescue, Captivity, and Care
This course examines the major issues related to captive animal care and rescue across a wide variety of contexts, especially the current global extinction crisis, with specific attention to the ethical, political, and social dimensions of human-animal interactions. Discussions, films, readings, and an independent research project will introduce students to key concepts related to animal care and rescue. Specifically, the course will focus on topics including the ethical dilemmas of care, the politics of extinction and conservation, animal trafficking, wildlife rehabilitation efforts, wildlife refuges, captive animal sanctuaries, and zoos.

ENVS296 Environmental Art: Research through Art/Art through Research
How can communities understand the conditions wrought by fossil fuel infrastructure and anthropogenic climate change? How should they confront environmental crisis and imagine ecological futures? What can we know about our environment, and what eludes us? Co-taught with visiting artist-composer Ari Benjamin Meyers, this class is a practical experiment in "Research through Art," and "Art through Research" (Dombois, 2009) focusing on the site of coal and oil-fired power plant shuttered amid heavy flooding during Hurricane Sandy. The landscapes of Manresa Island (South Norwalk, CT) include an abandoned turbine hall, a birch forest on a coal ash dump, and an array of wetland and coastal habitats. Participants will use practice-based research methods to develop works of art engaging with the site in its past, present, and future conditions. The course models artistic research methods with reference to a specific site and set of environmental conditions, bringing together students from arts/performance, sciences, humanities, and social sciences to produce site-specific works in a coastal ecosystem transformed by fossil fuel infrastructure.

At the heart of this course is a concern with what it means to be uncertain. The sciences provide tools to address problems of uncertainty. Practices of research, within and beyond the sciences, gather varied approaches to not knowing. Artists employ methods drawn from multiple academic disciplines (ethnography, sociology, history, the sciences), media (technoscience, video, audio, installation, multimedia), and sites of research (archive, laboratory, biome, habitat). While artists may engage many of the same practices as academic researchers, their works break the analytic frame. Art may be prescriptive or descriptive, didactic or agnostic, pointed or indeterminate; it may delight, frustrate, provoke, agitate, or inspire. Art may be curious or inquire; it may also make space for the experience of uncertainty. How does uncertainty make us feel? How should we respond?

Students across disciplines -- performance, visual arts, music, ecology, biology, geochemistry, history, religion, sociology, psychology, anthropology, economics, government, etc. -- are encouraged to submit a statement of interest for permission of instructor (POI). The purpose of the POI is to secure a collaborative balance of students across disciplines, toward the production of environmental art that engages a broad public.

This course will require 4-6 scheduled site visits to Manresa Island in South Norwalk, CT, requiring students to leave campus by 12 p.m. Friday and return by 5 p.m. Transportation will be provided.

ENVS297 Food Security and Environmental Conservation (CLAC 1.0)
(English translation below Spanish text) En este curso los estudiantes investigarán información y discusión sobre la seguridad alimentaria y el uso del medio ambiente en una selección de países de América Latina. Haremos preguntas sobre la base de la producción y disponibilidad de alimentos. También examinaremos la información disponible de las agencias públicas y privadas sobre los programas establecidos por los países para garantizar la seguridad alimentaria de sus habitantes y el uso sostenible y la conservación del medio ambiente. Discutiremos conceptos como: La soberanía alimentaria y la seguridad como un sistema alimentario en el que las personas que producen, distribuyen y consumen alimentos también controlan los mecanismos y políticas de producción y distribución de alimentos; La nutrición como normas mundiales y particulares de consumo de alimentos; La Justicia social relacionada con la accesibilidad de los alimentos; y el derecho humano a una alimentación adecuada y a la libertad del hambre como uno de los objetivos del milenio de las Naciones Unidas. El estudiante revisará casos particulares en América Latina. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. In this course students will research and discuss food security and the use of the environment in a selection of Latin American countries. We will ask questions about the basis of food production and availability. We will also examine the available information from public and private agencies about programs established by countries to ensure the food security of their inhabitants and the sustainable use and conservation of the environment. We will discuss concepts such as: food sovereignty and security as a food system in which the people who produce, distribute, and consume food also control the mechanisms and policies of food production and distribution; nutrition as a global and particular standard of food consumption; social justice related to the accessibility of food; and the human right to adequate food and freedom from hunger as one of the United Nations' objectives of the millennium. Students will look at particular cases in Latin America. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

ENVS298 Earthwatch: Satellite Data Storytelling for Science Communication
The fingerprint of human activity on planet Earth continues to magnify as we move deeper and deeper into the Anthropocene. Satellite remote sensing is a rapidly developing field for monitoring and visualizing planetary change in real time. Vast amounts of satellite data are now freely available for documenting, mapping, and communicating the impacts of natural and human disturbances on the Earth system. Students in this course will learn how to 1) analyze remotely sensed imagery using open-source software, 2) make high-quality maps documenting planetary change, and 3) communicate satellite data patterns to broad audiences using data storytelling. Students will master a wide range of techniques for detecting and articulating the stories behind satellite images and

data sets through visual, oral, and written assignments aimed at diverse public audiences.

Identical With: **E&ES282**
Prereq: **E&ES115 OR E&ES101 OR E&ES155 OR E&ES197 OR ENVS197**

ENVS299 Drones and Change Lab
Civilian use of unoccupied aerial vehicles or drones to capture data and measure change can enhance our understanding of the natural and built environments. While drones are increasingly available for entry-level to professional level adoption, there remains value in understanding how the infrastructure for their development and deployment have evolved and what is required to ensure their continued safe and ethical utility of these devices. In this class, we will explore the legal and infrastructure elements of drone development and deployment for civilian utility of drones, while working on data collection, analysis, and interpretation that will allow students to better appreciate the value and utility of drones. Over the course of the semester, students will work on understanding and building drones, collecting data with small drones, examining the commercial versus open-source platforms for drones, and preparing to take the Federal Aviation Authority Part 107 license to allow them to fly drones safely.

ENVS301 The Art of Narrative Science
There is neither conflict nor antagonism between the realms of art and science. Indeed, the two infinitely complement and complete one another in ways so intimate, intricate, and oft-times invisible that only great storytelling, artful narrative, can fully reveal them. A poet, through metaphor, builds bridges from entangled inscapes of thought and emotion to a place of shared understanding. A good narrative science writer must do the equivalent with the often recondite minutia of modern scientific exploration, and do so with ever-increasing urgency as new discoveries and insights mount daily across a broad array of disciplines.

As we'll be highlighting in our course readings, writing assignments, and class discussion, all the key tenets of good storytelling are at play in effective narrative science writing: voice, point of view, narrative arc, dramatic tension, setting and scenes, characters, action, and dialogue. Science, in this sense, is incidental to this course's primary concern. The singular challenge that science does pose to writers, however, is how not to be cowed and/or overwhelmed by the daunting complexities of the subject matter; how to, through your own powers of observation, accrued research, and fearless, persistent questioning, own the material in such a way that frees you to imaginatively represent it again to the lay reader as story.

In this course students will learn:

1) How to read effective creative nonfiction about scientific subjects and understand what techniques different writers use to achieve both clear and compelling narratives.

2) How to choose the subjects they'd like to write a story about and how to compose a proposal describing that story to prospective editors at a variety of different publications.

3) How to compile research and conduct interviews for their stories.

4) How to construct the story itself using all the techniques of effective storytelling in feature-length narratives.

ENVS302 Extinction/Rebellion: Christianity and the Climate Crisis
Although this course is not devoted specifically to the subject of "XR"--the decentralized environmental activist organization and global campaign of civil disobedience--it borrows the movement's self-designation as a point of departure for an exploration of the historical, conceptual, and geopolitical significance of Christianity to the "Anthropocene." How is Christianity entangled among the "historical roots of our ecologic crisis"? What is "eco-theology"? How do ancient narratives of creation and traditional Christian teachings regarding the origin of humankind continue to shape modern, scientific, and popular assumptions about the natural world and our place in it? What does the book of Genesis have to say about commercial agriculture, ethical veganism, and the relation of divinity with the more-than-human, animal-vegetal-mineral web of life? Whence this "planet of slums" and whither Paradise or the Promised Land? Which elements of the Christian imagination enabled colonization of the New World, indigenous displacement and genocide, the transatlantic slave trade, and capitalist globalization? Is another world still possible, and could Christian thought and practice play a pivotal part in actualizing an alternative planetarity today? We will pursue these questions together by way of readings in theology, philosophy, critical science studies, ecology, geography, political economy, Black feminism, queer theory, and Indigenous studies. Ultimately, the course analyzes aspects of Christianity's intimate involvement in the history of climate change and considers how critical attention to this history may contribute to collective acts of rebellion against mass extinction.

ENVS303 Ukraine and Its Environment
International perspectives on environmental issues are critical in order to address the challenges facing the world. Developing an international perspective requires more than learning from printed literature--it requires in-country experience and the desire to be able to view issues through different cultural lenses. This course will provide such experience by learning about the diversity of Ukrainian environments, people, and cultures both in the classroom at Wesleyan and by traveling to Ukraine during Spring Break. During our time in Ukraine we will receive lectures in English from noted scholars, politicians, professors and scientists on topics such as environmental law, global environmental security, urban environment, environmental policy in developing states, and sustainable development for the developing world. We will travel and learn from scientists at Chernobyl about the regeneration of forest ecosystems, learn from agronomists about agriculture on the steppes, and learn from politicians and scholars about Ukrainian environmental policy and their views of U.S. policies. We will also enter into round table discussions with university students to exchange ideas about potential international solutions and approaches to environmental problems.

These are just some of the experiences that are planned for our visit. Ukraine, as a pivotal democracy of the former Soviet Bloc, is an amazing place to witness how a nation wrestles with dramatic changes in policy. At the same time Ukraine is culturally diverse, which presents interesting challenges to formulating fair and cohesive policies.

ENVS304 The History of Global Warming
Our planet is now hotter than at the beginning of modern industrialization, and more places on earth are on the brink of becoming uninhabitable due to extreme heat. There is little prospect that the steady rise of global surface temperatures is going to stop or revert anytime soon. We are only beginning to see the dangerous ecological and social consequences of this planetary heating up. With the collective failure to meet the Paris climate goals, the planet has entered a period described by Wim Carton and Andreas Malm as "The Long Heat." Drawing on their and the work of other historians and critical theorists, we will explore the past and future history of global warming, from the mass adoptions of first coal and later oil as the "prime movers" of industrial production, to the politically embattled introduction of alternative energy sources. We will ask why there has not been a large-scale transition to green energy, and why the proposed technological solutions to planetary overheating are so inadequate. Throughout the semester, we will pay close attention to the political, social, economic, and cultural causes that have shaped both high- and low-carbon technologies.

ENVS306 Ecology and Natural History of Freshwater Fishes of South America
South America has the highest diversity of freshwater fishes anywhere in the world. In fact, there are more than twice the number of mammals and about the same number of birds in the world. Why has this remarkable radiation occurred in a relatively short period of time? How can so many fishes coexist in the same rivers, utilizing the same resources? In this intensive course, we will travel to Colombia during spring break (March 7-21) in order to gain firsthand knowledge about the ecology and natural history of freshwater fishes in South America. We will learn about the ecological and environmental factors that contribute to perhaps the largest biological radiation on the planet.

Students will obtain firsthand experience with the South American tropics, freshwater fishes, and with doing experiments in the field. Each day there will be a combination of lectures and field or laboratory exercises. We will travel to and explore fish ecology in different types of rivers at different elevations. Students will gather and analyze data about biological, physical, and environmental issues that are covered in the lectures. The habitats that we explore will be both terrestrial and freshwater rivers. Our base will be at the Instituto Humboldt in Villa de Leyva, Colombia. We will interact with Colombian students who are studying ecology and biodiversity at the Institute in order to exchange ideas about current environmental issues.

All the costs of travel, lodging, and meals will be covered by the course.

ENVS307 The Economy of Nature and Nations
On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek oikos, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the oikos over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

ENVS308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.

ENVS309 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions
Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other powerful "other-than-human persons" who must be respected, who can protect, but who are also feared. In the eyes of early Christians and often in contemporary popular culture, these animate and agentive landscapes can seem monstrous. We will explore medieval ideas about the Wild Man of the Forest, Indigenous and Feminist theory, and draw on case studies from North America, Siberia, Mongolia, and the instructor's fieldwork materials with landscape beings in Buryatia. The class will explore the different relationships human beings

have with animate and sacred landscapes, think about the ramifications these relationships have for sovereignty over and in the "natural" world and why the idea that land is alive might be threatening. The course includes a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during Fall Break. The trip will be fully funded with no cost to the students). The trip is required, and in order to take the class you must be available to participate in this travel during Fall Break (10/24-10/27).

ENVS311 Global Change Biogeography
On our home planet, Earth, the current geologic epoch is characterized by rapid changes to the environment due to human behavior. Biogeography examines the spatiotemporal distribution of life on Earth, from species to ecosystems and from landscapes to continents. How is anthropogenic climate change modifying the distribution and function of organisms and ecosystems? What can we learn from the evolutionary history of the life-planet system that can help us understand the possible impacts of future climates on the biosphere? To address these questions rigorously, we will explore primary literature from a wide range of theoretical and empirical studies. The course emphasizes inquiry, contact with primary literature, discussion, statistical and spatial coding, learning to obtain data, and visualization. The beginning of the semester provides an overview of physical geography and the Earth System, with field and data experiences that build remote sensing and spatial analysis skills. The second half of the semester is focused on the exploration of relevant scientific literature based on student interests and recent papers, as well as independent research projects.

ENVS312 Economics of the Environment and Climate
This course introduces environmental economics: we begin with the theory, including cost-benefit analysis, externalities, and concepts of economic efficiency that combine standard economic consumption with environmental benefits. We then turn to practical applications of the theory to policy questions: for example, in the contexts of air and water pollution, energy use, the economics of the climate, and sustainability. These topics will be treated mathematically using formal economic models and also acknowledge that the the field is heavily influenced by the natural sciences and policy constraints.

ENVS314 The Environmental Crisis and Nuclear Testing Narratives in Global Francophone and Arabic Cultures
This interdisciplinary course examines nuclear themes, with a particular focus on nuclear testing as depicted in novels, film documentaries, and poetry within Francophone and Arabic cultures. It emphasizes the profound impact of nuclear testing on human life and the environment. The course analyzes literature in French and English as well as visual materials (photography and films), archival materials, political writings, news articles, and websites. Students must possess reading ability in French and an interest in North African culture.

ENVS315 Eat, Grow, Heal: The Anthropology of Food and Justice
This course uses the lens of justice to examine the politics of food. We will look at the cultural and political-economic dynamics of food production and consumption, considering questions of taste, class, labor, marketing, and food sovereignty. We will also examine the environmental and social impact of food production and the consumption choices we make, from organic, to vegan, to animal proteins, to foraging and hunting. We will use a range of texts, including ethnographies, theory, film/documentary/TV shows, creative nonfiction, fiction, cookbooks, blogs, and magazine articles.

ENVS317 Colonizing Space: Exploration, Extraction, and Inhabitation
In his 2025 Inauguration Address, the US President promised that the nation "will pursue our manifest destiny into the stars, launching American astronauts to plant the Stars and Stripes on the planet Mars." What is "manifest destiny," and what does it have to do with outer space? Would planting a flag on Mars amount to claiming it as territory? And why is this administration setting its highest hopes on Mars? This course will track the ideological and colonial history of the Apollo era before approaching the scientific, economic, and legislative landscape of the corporate sector known as "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of Earth, the Moon, asteroids, and Mars. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.
Offering: **Crosslisting**

ENVS317F Colonizing Space: Exploration, Extraction, and Inhabitation (FYS)
Under its "Artemis Mission," NASA plans to put "the first woman and first person of color" on the Moon to build a permanent outpost. This lunar base will allow NASA to mine the Moon, extract precious metals from asteroids, and eventually colonize Mars--hopefully before China and Russia do the same. Thanks to recent legislation, NASA will rely throughout this mission on the rocket and extractive technologies of private corporations like SpaceX, Blue Origin, Moon Express, and Deep Space Industries, whose CEOs proclaim they are saving the human race by

expanding it into space. It will also rely on the backing of the newly-created sixth branch of the U.S. military: the Space Force.

This course will track the ideological and colonial history of the Apollo era before approaching the scientific, corporate, and legislative landscape of "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of the Earth and its cosmic neighbors. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

ENVS318 The Politics of Death: The Living, the Dead, and the State
This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

ENVS319 Animals in Film
Some of the oldest known visual art--the paintings on the walls of Chauvet Cave--appear to depict animals in motion. Today, 36,000 years later, humans are still deeply fascinated with depictions of animals and their actions, from television documentaries to animated films to viral Internet videos. John Berger argues in his famous essay "Why Look at Animals?," "animals are always the observed," while the "fact that they can observe us has lost all significance. They are the objects of our ever-extending knowledge." The history of film provides many examples to support Berger's claim. But can film also help us understand how animals see us, or the rest of the world? And what can film tell us about how we see and attempt to understand other animals? Through an examination of the history of animal depictions in documentary, animated, and live-action fictional films, this course will explore these questions and provide a deeper understanding of how the cinematic medium shapes our relationships with other species. Films may include Electrocuting an Elephant, The Hunters, Babe, The Bear, White God, Kedi, Stray, Gunda, and Zootopia.

Readings will include: John Berger, "Why Look at Animals?"; Andre Bazin, "What is Cinema?"; Anat Pick, "Vegan Cinema"; Anat Pick and Guinevere Narraway, "Screening Nature: Cinema Beyond the Human"; Gregg Mitman, "Reel Nature: America's Romance with Wildlife on Film"; Cynthia Chris, "Watching Wildlife"; Helen Hughes, "The Contemplative Response"; and Akira Mizuta Lippit, "Electric Animal: Toward A Rhetoric of Wildlife."

Examination and Assignments: A final project, film review paper, and weekly reflection papers.

Consent: No special consent required.

ENVS320 More-Than-Human-Worlds: Theories and Fictions
How do we imagine the worlds of other life forms: what they know, what is meaningful to them, their ways of communicating? Which senses must we use and what forms of translation are necessary (if impossible) to turn their languages, their thoughts, their desires into our fictions or poetry or theory? What stories have been told and what stories could or should we tell in order to inspire more responsive and responsible relations between the diverse yet enmeshed worlds of human and non-human lives? These are some of the questions we will be asking as we move through a diverse range of writings about relations to other animals and to other worlds that are both within and beyond our own.

ENVS321 Ecological Design II: Worn Out/Broken In
This course will function as a design studio that examines the afterlife of material production. While designers have traditionally focused their attention on the creation, distribution, and consumption of new products, this course asks students to carefully consider everything that follows those acts. By scrutinizing the use, care, maintenance, repair, and eventual demise of designed objects, students come to understand the intended and unintended consequences of making. Rigorous observation and research lead to the creation of analytic drawings and models for presentation at project reviews.

Identical With: **ARST320, IDEA320**
Prereq: **ARST270 OR ARST235 OR ARST220**

ENVS322 Polycrisis: Investigating Our World Crisis of Ecology, Economics, Empire
Our world crisis of ecology, economics, and empire continues to interact and metastasize in surprising ways. It is shaking confidence in all of our established worldviews and in ruling elites everywhere. People are searching for big, urgent, powerful frames of analysis. This course will explore the interdisciplinary frame of polycrisis to characterize the newness, unprecedented scale, and pace of our planetary predicament. What is new and what is old about this polycrisis? Why is there no money for some things and plenty for others? Why is there a return of war? Why are people so angry? What should be done about the escalating ecological and climate crisis? And why, oh why is everyone talking about supply chains and industrial policy? In exploring these questions, we will pick up the lens of different academic disciplines, emphasizing their interconnections, with a focus on global political economy, namely the politics of who wins and who loses and how people and nations make justice. The four thematic units of this course will introduce students to: (1) Finance, analyzing distinct causes of recent financial crises and their unequal impacts on people and countries, spanning the 2008 global financial crisis, the 2010s eurozone crisis, the 2020s Covid Crisis, and the Global South debt crisis still unfolding today; (2) commodities (markets of energy, food, metals), trade, and the return of Industrial policy; (3) geopolitics, the return of war, (nuclear) arms races, the end of unipolarity, and the rise of multipolarity; and (4) the escalating climate and ecological crisis. Students will be expected to write a weekly blog post of 250-500 words responding to course material, and a final paper or collaborative media project. Grades will be based on in-class participation, assigned discussion leading, two written papers, or a final collaborative media project.

ENVS323 It's All Happening in the Cafeteria: The (In)Justice of School Food
The National School Lunch Program (NSLP) is a federally-assisted meal program operating in public and nonprofit private schools across the US. In FY 2022, the NSLP provided nearly 5 billion meals to children in preK-12th grade. Given the scale of this operation, school food serves as an important lever for food systems change and a window into food justice through examining production, procurement, distribution, and consumption. This course will look at school feeding programs to explore a variety of facets of the food system including school food policy (with state-level advocacy for universal free meals), farm-to-school, food service workers, and child and household food security. This course is intended as an advanced seminar for students with a background and interest in the related areas of food systems and social justice.

ENVS325 Biocapital and the Commodification of Life
Karl Marx described capital as "dead labour, that, vampire-like, only lives by sucking living labour." But what happens when capital itself is alive? Biotechnological and scientific advancements have enabled the commodification and exploitation of living organisms and tissue at a scale barely imaginable in Marx's time, opening new global markets for the circulation of "biocapital." What is biocapital, and how might it transform our understandings of labor, value, property, and even life itself? Drawing on a variety of course material -- including critical theory, ethnography, literature, and films -- the seminar seeks to answer these questions by exploring the historical, socio-cultural, and political-economic dimensions of biocapital and the technoscientific processes employed to extract value from living things.

ENVS328 Human Rights and Spiritual Ecologies of Indigenous Peoples
This seminar will explore the social, legal, and metaphysical aspects of indigenous spiritual ecologies and their relation to United Nations discourses, indigenous community media production, and land rights movements. We will consider how indigenous peoples both respond to legal frameworks and press their positions into national and international human rights standards, on issues ranging from governance to cultural survival, from environmental management to language policy.

A particular emphasis will be put on the Andean and Amazonian regions of South America, the Mesoamerican highlands (Chiapas, Guatemala), the United States, and the United Nations Permanent Forum on Indigenous Issues, but students are encouraged to pursue their research projects across Abya Yala (the Americas).

This course focuses on developing critical thinking skills and places a special emphasis on writing and thoughtfully responding to the materials presented in class. Classes will not only consist of framework lectures and discussion questions, but also a combination of student panel presentations and writing in a collaborative environment. Participation in these activities is crucial to success in this course. Opportunities for student engagement in Manhattan at

the April 2024 United Permanent Forum on Indigenous Issues are currently in development.

ENVS329 Fire Ecology and Management
Fire is a fundamental ecological disturbance process that regulates the structure and function of plant communities worldwide. However, increasing aridity under climate change and shifting human land use in recent centuries have altered fire behavior, imperiling many species. This course explores the ecological and social aspects of fire and sustainable fire management on planet Earth. Students examine shifting fire regimes over time, from indigenous use of fire prior to European colonization of the globe, to contemporary fire management. Class participants study the effects of global climate change on fire regimes and how such changes influence contemporary fire regimes and human livelihoods. The course format consists of a mixture of lectures, field exercises, active class discussions, student presentations, and research papers.

ENVS330 Special Topics: Ecopoetics - Experimental Poetry in the Anthropocene
How do poets speak for and from a world in flux and crisis? How do poets register and attempt to restore the degradation of the planet through language? How might altering the boundaries of conventional language use "through poetry" alter the bounds of conventional thinking and behaving, thus leading to more engaged and sustainable modes of living? This course, in part, will serve as a tour of contemporary eco-poets invested in looking at and caring for the current state of our planet through poetry. We will read poems that reflect the most critical environmental concerns of our time, and we will learn to see how these poems resist closure and are instead guided by exploration and interrogation in an attempt at reorienting our attention and intention as inheritors of this planet.

This is an advanced workshop for students committed to developing an understanding of eco-poetry's place in the more-than-literary world, as well as developing a personal eco-poetics from which to write. Students will choose an environmental topic to research and write in service of for the semester and, by the end of the semester, will have a project-centered collection of poems. There will be bi-weekly presentations on the poetry collections we read, in-class writing experiments, in-the-field experiments, and intensive workshops of participants' work. The class will culminate in an eco-book arts project and a reflective essay.

Special attention will also be given to cultivating community and the benefits of sustaining an embodied artistic practice during extreme times and how doing so may benefit the health of the whole artist.
Offering: **Crosslisting**

ENVS332 Botanical STS: Plants as Nature, Capital, Empire
Interest in the social and technoscientific lives of plants has been rising. Described as the Plant Turn or Critical/Transnational Plant Studies, this multidisciplinary field of study encompasses the social and environmental sciences, experimental humanities, and visual/sonic/literary arts. In this course, we will delve into contemporary works that situate the relationship between plants and botanical studies at the center of critical analysis and creative practice. What happens to notions of agency/intelligence, property/exchange, and power/knowledge when we think with and about plants? We will explore answers to these questions by engaging in three types of activities: readings and film screenings, field visits to botanical collections and agricultural stations, and online use of global plant databases.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS310**

ENVS333 Media and Environment: In/Sensible Worlds
In this seminar, we will examine the relationship between media technologies, sensory apparatuses, and changing environments. How do various kinds of media shape perceptions and interactions with our surroundings, multispecies ecologies, and planet Earth? How might we study the environment AS media? These seemingly simple questions matter because, like never before, media and environment co-produce who/what becomes sensible or insensible--and, ultimately, available or not available for life. This seminar will include readings from the fields of Critical Media and Communication Studies, Feminist/Postcolonial Science, and Technology Studies, Environmental/Digital Arts, and Humanities. Importantly, we will examine a range of creative media projects that explore ecology, environment, and earthly survival: films, games, sensors, and web projects.

ENVS334 Pacific Ecologies
From the Whanganui River of the Whanganui Maori in Aotearoa (New Zealand) to Litekyan of the CHamoru people in Guåhan (Guam), Pacific Indigenous peoples' conception of the environment challenges the Western dichotomy that separates humans from nature. Grounded in islands and flowing with

oceanic currents, this upper-level seminar will engage with Indigenous and migrant histories of what constitutes the "natural world," including attention to more-than-human relations. We will also examine the effects of militarism, imperialism, and climate change in shaping human-to-environment relations; and engage with how Pacific Indigenous peoples have led environmental movements rooted in Pacific genealogies, motivations, and worldviews. In doing so, we will examine how different perspectives of the environment and ecologies can influence notions of time and temporality in historical narration and writing.

Prereq: **None**

ENVS337 The Origins of Bacterial Diversity
Wherever there is life, there are bacteria. Free-living bacteria are found in every environment that supports eukaryotes, and no animal or plant is known to be free of bacteria. There are most likely a billion or more species of bacteria, each living in its unique ecological niche. This course will explore the origins of bacterial biodiversity: how bacteria evolve to form new species that inhabit new ecological niches. We will focus on how the peculiarities of bacterial sex and genetics facilitate bacterial speciation. Topics will include the characteristics of bacterial sex, why barriers to genetic exchange are not necessary for speciation in bacteria, the great potential for formation of new bacterial species, the evolutionary role of genetic gifts from other species, and the use of genomics to identify ecologically distinct populations of bacteria.

ENVS338 Nature and Nurture: The Interplay of Genes and Environment
Ever since Watson and Crick proposed the DNA molecule as a heritable genetic "code," biology has emphasized genes ("nature") rather than environmental influences ("nurture") as the primary agents of biological causation. This genetic determinism continues to shape perspectives beyond research, including such critical concerns as public health and human diversity. Recent insights to environmental and inherited epigenetic factors demand that we rethink this established view to build a more integrated understanding. In this advanced seminar, we consider how genetic and environmental factors jointly determine the development and behavior of organisms, including ourselves. After an initial series of lecture/discussion sessions on foundational concepts, this seminar course will consist of student-led discussions of scientific articles on genetic and environmental causes of specific diseases, capacities, and behaviors. Subject to class choice, possible topics will include: causes of lung cancer and of asthma; variation in IQ; the Human Genome Project; and "personalized medicine."
Any 200-level course in genetics, development, or neuroscience can fulfill the required prereq; interested COE or other students without this background are encouraged to directly contact Prof Sultan to request a prerequisite override.
Students gain understanding of scientific inquiry and interpretation, as well as specific knowledge of a range of human health issues and behavioral capacities. Through reading recent data papers, participating actively in small-class discussions, and giving short oral presentations, students will build their skills in critical thinking about biological and environmental questions and related ethical issues, scientific scholarship, and oral communication of scientific information.

ENVS344 Renewable Energy and Negative Emission Technologies
This course explores renewable energy solutions society must transition to in order to mitigate global climate change. The course will focus on renewable energy technologies such as solar, wind (onshore and offshore), geothermal, biofuels, hydro, and wave power. It will also cover negative emission technologies including soil carbon sequestration, reforestation, and carbon capture and storage (CCS).

ENVS347 Ethics, Ecology, and Moral Change
People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

ENVS348 Animals in Archaeology
This laboratory course will explore how zooarchaeological methods for analyzing animal bones and teeth excavated from archaeological sites allow us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and techniques, including hands-on sessions for the identification and quantification of faunal remains. By the end of the course, students will be able to identify every bone in the mammalian skeleton and distinguish between the bones of common non-mammalian taxa. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice.

ENVS350 Environmental Justice and Sustainability
The US Environmental Protection Agency defines environmental justice as "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies." Although we still have a long way to go in achieving this goal, over the last fifty years a vibrant environmental justice movement of racially-diverse activists and international coalitions has struggled to create a more equitable and sustainable world. Specifically, they have worked to expose and end the vastly disproportionate impacts of environmental degradation, climate change, air and water pollution, waste disposal, draught, wild fires, and famine on Black communities, Indigenous communities, and other communities of color around the globe. In this course, students will examine the environmental justice movement, its historical development, its strategies and tactics, and the many contemporary environmental harms it strives to eliminate. Discussions, films, readings, and an independent research project will introduce students to topics including environmental racism, environmental health, (un)natural disasters, climate refugees, agricultural and industrial pollution, international waste export, seed imperialism, food sovereignty, water contamination, reproductive justice, environmental reparations, the extinction crisis, and just forms of sustainability.

ENVS352 Energy and Modern Architecture, 1850-2020
This seminar explores the evolution of mechanical systems for heating, ventilating, and cooling in modern architecture from the mid-19th century to the present. The aim is to show how architects, engineers, fabricators, and urban governments worked to develop modern systems of environmental controls, including lighting, as means of improving both the habitability of buildings and health of their occupants. The course will trace the adaptation of technical innovations in these fields to the built environment and how those responsible for it sought to manage energy and other resources, such as funds and labor, to create optimal solutions for different building types, such as factories, theaters, assembly halls, office buildings, laboratories, art museums, libraries, and housing of various kinds, including apartment buildings for higher- and lower-income residents. An important theme will be the relationship of energy systems for individual buildings and urban infrastructure, including water systems, electrical, and other utilities. The last part of the course focuses on contemporary green, or sustainable, architecture, including passive and active solar heating, photovoltaics, energy-efficient cooling, LEED certification, wind and geo-exchange energy, green skyscrapers, net-zero energy buildings, vertical farming, and zero-carbon cities in the United States, Europe, and Asia.

ENVS357 AI, Algorithms, & Power
This seminar offers an interdisciplinary approach to the study of artificial intelligence, cybernetics, and robotics. Students will critically engage with "generativity" as a social theoretical concept: as a structural effect of capitalist accumulation, as a metaphor for creativity, and as an ethos for futures of care. The course begins with texts in the history of technology that examine the extraction of labor and environmental resources to power artificial systems under racial capitalism. Students will engage with feminist cyborg studies to consider how categories and classifications of humanity and intelligence have organized techniques of resource extraction. The seminar continues with contemporary scholarship on the constructions of intimacy and affect in social robotics and care infrastructures.

Prereq: **None**

ENVS358 Post-Animal Agriculture: Biotechnology, Alternative Proteins, and the Future of Food
The burgeoning alternative protein industry seeks to use biotechnological innovations to produce animal products outside the bodies of animals. With the long-term potential to entirely remove animals from the industrial food system, the successful implementation of these new technologies could ameliorate many of the negative impacts of animal agriculture on the environment, human health, and animal welfare. But what are the social, political-economic, and

ontological implications of a post-animal food system, and how might they transform human relations with animals currently used for agriculture? How might these innovations transform understandings of food categories like meat and dairy, and how likely is their commercial success? This seminar will draw on ethnographies, legal analyses, design theory, media coverage, techno-economic analyses, and speculative fiction to examine the recent historical development of the alternative protein industry and its potential impacts on the futures of both food production and interspecies relations.

ENVS359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.

ENVS360 Art and Ecology, 1960s to the Present
This seminar examines the place of ecological thinking in modern and contemporary art since the 1960s. Through a series of case studies, we will explore a range of approaches, from works investigating systems of interconnecting flows binding the living and non-living, to interventions that more directly confront ecological destruction and climate emergency. Projects of activist immediacy will be considered alongside works of more distanced aesthetic experimentation, across a range of modalities including lens-based media, performance, painting, site-specificity, and sculpture.

ENVS361 Living in a Polluted World
This course treats the occurrences and origins, natural pathways, toxicologies, and histories of the major environmental contaminants. We all know about lead and its effects on humans, but how about cadmium and hexachromium, or the many unpronounceable organic contaminants, usually referred to by some acronym (e.g., DDT, POPs)? We also deal with the larger topics of CO2/climate change, the environmental nitrogen-oxide balance, and eutrophication of coastal waters (the "dead zones"). To be effective in this course, students will need basic high school/college-level proficiency in chemistry and math as we will delve into aspects of geochemistry, geology, toxicology, environmental law, and some simple modeling. The class consists of lectures, one problem set, one Hg-in-hair class study, and a class project on lead in drinking water in the Middletown area. This is also a service-learning course, providing environmental outreach to the larger Middletown community on local pollution.

ENVS365Z Writing 21st Century Science
Twenty-five years ago, the landscape of biology looked very different. As the century began, the "rough draft" of the Human Genome was nearly complete, a year ahead of schedule. Biomedical scientists envisioned an era of unparalleled progress, leading in a straight line from the new DNA sequence data to human health and behavior. At the same time, new technologies were expected to produce genetically modified crops that would end global hunger. Any evolutionary impacts of climate change on animals and plants in nature were thought to be far in the future. Instead, molecular insights have uncovered unexpected factors in development and disease including epigenetics and the microbiome. Genetically modified crops have led to unforeseen threats to their wild relatives, while constructed ecosystems are providing completely new ways of farming. For natural populations, twenty-first century biologists are scrambling to understand the human-caused evolutionary changes taking place within our lifetimes. Tools are available not just to decode genes but to edit them, at once raising new possibilities and urgent ethical questions.

This course invites students to grow as writers by engaging with these new areas of scientific investigation in an intensive workshop format. Drawing on common content from recent journal articles, Q&A sessions with guest researchers, and a virtual field trip to an innovative farm, students will unpack contemporary biology by explaining the basic science in their own voices, while considering the science in larger societal contexts through connections to their own knowledge and experience. Through science journalism pieces, blogposts, Powerpoint slideshows and researcher profiles, students will learn to communicate cutting-edge scientific findings in clear, non-specialist language. The course will build strengths in communication and collaboration through individual writing and revising, active peer editing, and in-class workshopping of each piece, in a collective student-led format. In place of a final exam, students submit a final essay reflecting on their experience in the course.

ENVS369 Ecological Resilience: The Good, the Bad, and the Mindful
This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.

ENVS374 Food Security: History of an Idea
The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

ENVS376 The Artist in the Community: Civic Engagement and Collaborative Dancemaking
Through both theoretical analysis and practical application, students will grow their understanding of community-based performance and collaborative art-making. Grounded in readings and seminar discussions about the practice and process of community-based art, students will apply their learning through community-engaged research. Through direct practice, students in the course will explore how collaborative performance can address local issues, spark community dialogue, and encourage civic participation--whether on a college campus, in a neighborhood, or across a city.

Class meetings will take place virtually during the semester. Student research and project development will be conducted in person. Note: This course includes required Spring Break travel to work on a Forklift Danceworks project. Travel expenses for the trip are paid by the University.

ENVS382 Physical Chemistry for the Life Sciences
The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

ENVS383 Anthropocene as Modern Grand Narrative
The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's systems, where the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism versus uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale--one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

ENVS388 Beyond Growth: Agrarian Visions
The era of endless growth has reached a point of crisis. In the face of climate catastrophe and widening inequality, of the proliferation of pointless work and spiraling burnout, it has become increasingly common to question the idea that human progress comprises ever-increasing levels of production

and consumption. And yet in spite of a slew of attempts to transform the situation, from the Occupy movement to the recent mainstreaming of degrowth economics, it seems that things are only intensifying. How did we come to inhabit this world in which labor and economic growth are seen as ends in themselves? And how might we begin not just to refuse such understandings of labor and growth, but to imagine different forms that they might take? In this course we will confront these questions, exploring the relationship between labor, production, and human flourishing. We will begin by studying foundational articulations of this relationship from thinkers like Max Weber, Karl Marx, and Hannah Arendt, looking as well at the unique place that agricultural production, cultivation, has been understood to occupy therein. We will then turn to the agrarian realm as a particularly potent site from which to trouble and extend our conceptions of labor and growth, examining visions of spiritual labor, anticolonial resistance, and more-than-human entanglement in theoretical and literary texts from Leo Tolstoy, M.K. Gandhi, Mahasweta Devi, J.M. Coetzee, and others. Through our readings and discussions, we will learn to identify and critique the normative claims on which our current energy-intensive, exhaustion-inducting circumstances are based. At the same time, we will cultivate the skills required to seek out and imagine alternative forms of work, community, and the good life.

ENVS398 Burnout
Moderns have excelled at exhausting themselves, their others, and the planet. In this seminar we will explore the disposition toward depletion as a constitutive problem of life and thought in the twentieth and twenty-first centuries. Why do we wear the world out and who do we become in so doing? We will examine "burnout" as a condition connecting psychic, political, aesthetic, and ecological distress in the simultaneously listless and overexcited present. Convening resources from philosophy, history, anthropology, political theory, literary studies, and contemporary art, we will consider, among other things: fossil fuels, neoliberal economic thought, enervation and nervous over-animation, stimulants, thermodynamics, empty calories, extravagant gift-giving, geological science, secular finitude, the "End of History," the loss of utopias, and deficits of attention.

ENVS427 Central Asian Music Ensemble
The Central Asian Music Ensemble is dedicated to the study and performance of music from a region at the crossroads of Eurasia, encompassing the post-Soviet states of Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan. Established in Fall 2023, the ensemble currently comprises Kazakh and Kyrgyz plucked and bowed lutes, plucked zithers, end-blown flutes, clay ocarinas, jaw harps, frame drums, and other percussion instruments. Students learn the basic techniques of playing the instruments and singing in a variety of regional styles while exploring the history and cultural significance of music in nomadic and sedentary Central Asian societies through individual tutorials, group rehearsals, and engagement with visiting artists from Central Asia. In addition to playing traditional and contemporary repertoires from the region, students are encouraged to compose and improvise with ensemble instruments. Previous experience with string or wind instruments such as the guitar, violin, cello, or flute is desirable but not required. Students from diverse backgrounds are welcome to participate.
Offering: **Crosslisting**

Grading: **A-F**

ENVS467 Independent Study, Undergraduate
Credit may be earned for an independent study during a summer or authorized leave of absence provided that (1) plans have been approved in advance, and (2) all specified requirements have been satisfied.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ENVS469 Education in the Field, Undergraduate
Students must consult with the department and class dean in advance of undertaking education in the field for approval of the nature of the responsibilities and method of evaluation.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

ENVS491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

ENVS492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

ENVS493Z Summer Research Fellowship
This course is open to students engaged in summer research fellowships and receive .25 credit upon successful completion of a summer research educational experience. Summer Research Fellows conduct independent research with faculty mentors in one or more departments. Students must satisfy the requirements of the fellowship and complete the course assignments in order to receive credit. Requirements are specific to the program students are sorted into (CIS, COE, QAC, or Other). Please see your program's webpage for details. Please email scienceresearch@wesleyan.edu with any questions.

DANCE

Dance deepens one’s knowledge and expression of human experience.
We believe in the creative and intellectual potential of each person.
Dance can change the world.

The Dance Department at Wesleyan is a contemporary program with a global perspective. The curriculum centers on the creative act – imagining, making and doing. Our program is interdisciplinary, embodied, collaborative, physically and intellectually rigorous, and fosters personal and social transformation.

CHAIR

Katja Kolcio
MA, University of Georgia Athens; PHD, Ohio State University; MA, Ohio State University

Chair, Dance; Associate Professor of Dance; Affiliated Member; Associate Professor, Environmental Studies; Associate Professor, Russian, East European, and Eurasian Studies

EMERITI

- Undergraduate Dance Major (p. 1060)

DANC102F Perspectives: Dance as Cultural Knowledge (FYS)
This FYS course--a writing intensive and introduction to Wesleyan's culture--investigates the various social, political, and historical contexts that have contributed to the explosive evolution of dance since the nineteenth century, and conversely, explores the ways that performers and choreographers have utilized the medium of dance to reflect their personal concerns back to society in powerful ways. Dynamic artistic movements, choreographers, and dancers examined will include Imperial Russian Ballet, Gesamtkunstwerk of Diaghilev's Les Ballets Russes, gender manipulation in the roles of Nijinsky; WWI and II and its aftermath in the German Ausdruckstanz of Mary Wigman and Kurt Jooss; Modernism's effect on seminal choreographers in America such as Martha Graham; politics, race, class, and the Harlem Renaissance; the anthropological research in dance of Black choreographers Katherine Dunham and Pearl Primus; experimentations of Merce Cunningham; exploration of Postmodern rebellion of the Judson Dance Theater; and the response of choreographers and performance artists to Civil Rights and the AIDS crisis. Students will view performance videos and documentaries, pursue extended research, and be expected to speak and write about dance in a way that will prepare them for academic writing at Wesleyan.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC103 Dancing Bodies
This course introduces students to basic dance literacy by viewing dances on film and video, making movement studies, and practicing writing in different modes about bodies in motion. The utopian ideal of "the natural" dancing body will guide our investigation of dance as art and culture, from Isadora Duncan to the postmoderns. We seek answers to such questions as, What do performance codes about the natural body feel and look like? How do dance traditions

preserve, transmit, and reconfigure eco-utopian desires? No dance experience is necessary. The desire and confidence to create and move collaboratively with others is expected.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC104F Introduction to Contemporary Dance from Global Perspectives (FYS)
This interdisciplinary course aims to understand contemporary dance and the moving body from global perspectives. It draws from a range of approaches to aesthetics and choreography, politics, and understandings of culture-at-large. It examines an eclectic array of movement and choreographic styles from North America to Europe to Asia. The course is divided into 6 units: 1. Old and New Definitions of Contemporary Dance 2. "East Meets West" -- Global-Cultural Flows in Contemporary Dance 3. Social Justice and Contemporary Dance 4. Queering Contemporary Dance 5. Special Topics -- Stillness and Silence 6. Traditional Dance/Contemporary Dance -- Deconstruction and Reconstruction

Identical With: **GSAS108**
Prereq: **None**

DANC105 Dance Tech Lab: Lights, Screen, Projection
This class includes the practicum and experimentation of lighting design and production with use of projection, video-screen technology, stage management, costume and scene design, and set construction.

The practical experience in the Dance Department's production season is emphasized in the course.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC107 Writing Is Dancing, Dancing Is Writing
We watch dance and then we write about it. Dance needs writing to be understood and to endure. Or maybe not. Maybe dance needs no help. Then, what do we write? Writing as dance, in dance, of, from, alongside... As readers, writers, and performers, we will explore established and experimental modes of writing and choreography and look for ways that each form can stretch and challenge the other.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC111 Introduction to Dance
This is an introduction to dance as an educational, technical, and creative discipline for students with no previous formal dance training. Classes will introduce the basic components of dance technique--stretching, strengthening, aligning the body, and developing coordination in the execution of rhythmic movement patterns. Through improvisation, composition, and performing, students will develop a solid framework applicable to all forms of dance.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC202 Ballet I: Practice and Theory
This elementary level ballet course is a mix of practice and theory. Ballet terminology and stylistic concepts will be introduced with emphasis on correct alignment, musicality, and movement flow. In addition to learning the basics of ballet technique, various ways that ballet choreographers have addressed issues of politics, race, and class are examined through films, readings, and discussions. Traditional ballets will be juxtaposed with iterations from contemporary choreographers who have created unique and powerful works addressing issues from the eighteenth century to today.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC203 Body and Earth: Emergent Strategies for Reimagining the Human-Environment Relationship
We live in a world in which humans are inextricably connected to nature, humanity's life support system. Yet at the same time we live on a planet in peril, in which environmentalists across the globe are working to catalyze societal transformation for sustainable living on Earth. This course explores these themes by 1) analyzing how social and ecological systems are intertwined, 2) exploring diverse ways of knowing nature through movement and mindfulness exercises, and 3) investigating and communicating mechanisms of sustainable environmental practice. The course will introduce conceptual frameworks and methodologies to explore the embeddedness of humans in nature--a task that remains critical for addressing today's environmental challenges. Students will engage with interdisciplinary frameworks engaging in environmental problem solving, as well as movement and place-based approaches for experiential learning. Through case studies and individual storytelling projects, we will examine how embeddedness in nature, interdisciplinary perspectives, and human agency provide sustainable pathways for both people and planet.

DANC204 Spicy and Sweet-Bollywood Dance
Get ready to move, groove, and tell stories through dance! This intro-level Bollywood Dance course dives into the vibrant, high-energy world of Indian film choreography -- where classical roots, folk traditions, and global dance styles collide. You'll learn signature Indian cinematic dance moves, explore their cultural history, and build confidence performing dynamic routines set to iconic film music.

Designed for students of all experience levels, the course emphasizes joyful movement, musicality, and expression over perfection. Along the way, you'll develop rhythm, coordination, and stage presence while collaborating with classmates in a supportive, inclusive environment. Expect lots of sweat, smiles, and a deeper appreciation for how dance functions as storytelling in popular culture.

By the end of the course, students will be able to:

-Perform foundational Bollywood dance techniques and choreography

-Understand the cultural, historical, and cinematic contexts of Bollywood dance

-Express emotion and narrative through movement and music

-Collaborate in group performances and reflect on dance as a global art form

No prior dance experience required -- just curiosity, energy, and a willingness to have fun!

DANC205 Afro-Brazilian Dance I
Dance is a nexus between Africa and Brazil. It holds ancestral knowledge, and demonstrates a clear evolution of form, function, and tradition. This course will examine the study of embodied practices of the African diaspora as it relates to Brazilian life and culture. It will introduce various religious, social, and contemporary dance forms through a historical perspective of African identity in Brazil. Students will dive into the vibrant Afro-Brazilian culture and history through rigorous physical explorations, which will be complemented with lectures, readings, discussions, and video. Topics will include, yet are not limited to: the symbolic aspects of the body, historical context of movement behavior, the sociopolitical aspects of the dances, the derivation of the movement techniques, as well as connection of mind, body, and spirit in culture and dance.

Prereq: **None**

DANC210 Afro-Brazilian Dance II
This level II course will bring deeper experience of embodied practices of the African diaspora as it relates to Brazilian life and culture. Level II will continue to explore various religious, social, and contemporary dance forms through a historical perspective of African identity in Brazil. Students will learn a greater perspective into the vibrant Afro-Brazilian culture and history through rigorous physical explorations, which will be complemented with lectures, readings, discussions, and video. Topics will include, yet are not limited to: the symbolic aspects of the body, historical context of movement behavior, the sociopolitical aspects of the dances, the derivation of the movement techniques, as well as connection of mind, body, and spirit in culture and dance.

DANC211 Contemporary Technique I: Partnering and Social Dance - The Athletics of Intimacy
ATHLETICS: involving the use of physical skills or capabilities, such as strength, agility, stamina and a sense of play; INTIMACY: closeness of observation or knowledge of a subject. These classes will combine skills and applications based on decades of movement research (martial arts Capoeira and Aikido, low acrobatics, partnering/social dancing, dynamic games, contact improvisation, somatic training). We will start with floorwork skills training (falls, rolling, quadrupedal crawling patterns, cartwheeling, inversion/upside-down arm balancing, etc). We will then move into strong investigations into partnering with one another and ensemble dancing. You will safely learn these skills through progressively scaled movement challenges in our class! Then our class will focus will be on the physical, sensorial, and imaginative challenges and risks with partnering movement practices using mutual touch, balancing, and weight sharing skills with one another. We will connect with our own bodies and to each other through playful focused interaction with our fellow group members/classmates. This class will honor the individual within the group. Each student brings their own unique history and movement experiences into the shared experience of creating duet and ensemble movement scores together. No previous partnering experience is necessary. All who are curious about connection and partnering are welcome!

DANC212 Composition Across the Arts: Theory And Practice of Interdisciplinary Curating
Wesleyan's Center for the Arts (CFA) opened in 1972 with an understanding that throughout the 20th century, the arts have continued to move away from "tightly bound categories" once defined by medium or genre--and with the goal of providing "[a] complex in which the exploration of the role of the arts in society, their interrelationships and new forms may ... stimulate the student and provide a vital cultural force in the community." In short, the CFA's mission was (and remains) to foster interdisciplinarity both within and beyond the field of artistic practice. This course will explore both the theory and practice of interdisciplinary art curating and making. We will read texts that situate our keyword ("interdisciplinary") within the context of social, political, and pedagogical struggles from the 1950s to the present. Simultaneously, we'll look at how different artists, critics, and scholars have attempted to frame definitions of contemporary art in which the older discipline-specific criteria no longer apply. Throughout the course, we'll consider how the turn towards interdisciplinarity places pressure not only on artists but curators, while we work to envision what a liberatory, contemporary institution might be both aesthetically and politically.

Course readings relate to contemporary curating within the global arts ecosystem. Course work, however, will be derive directly from the skill sets most often sought in entry-level job postings for arts organizations--research, writing, project development, and management. Through this process, we will rethink the underlying assumptions and values reproduced by these skills and field-wide practices. Ultimately, students will be invited to experiment with day-to-day operations of the CFA and given a chance to have a direct impact on future programming for the CFA. One way we will do this is to invite enrolled students to help assemble and participate in a director's council that will impact the future of the Center for the Arts. If a director's council is traditionally populated with executive leaders, this student-led director's council will convene representatives from the largest and most impactful population of the Wesleyan community: the students.

DANC214 Hip Hop
This studio practice course introduces students to urban dance practices, aiming to broaden students' understanding of hip hop culture beyond the commercialized representations prevalent in the media today. This class will explore the history and practice of different forms of hip hop: b-boying/b-girling (breaking/breakdancing), uprocking, popping, waving, and locking. We will also look at hip hop's connection to other club forms such as house dance and house-ballroom forms, waacking, and voguing. Students will view video performances of cultural practice (battles and "cyphers"), as well as media- and theatrically-influenced forms of hip hop, to identify significant commonalities and differences within hip hop practices. Our classes will be conducted to hip hop, house, and dance music from the past four decades, and will begin with a set warm-up and follow with stretching and conditioning exercises. Class will always conclude with a combination that incorporates that week's dance form, and it will be compared to other hip hop dance forms we will be studying. Required readings will explore these forms through the lens of historical context and critical theory perspectives on urban dance, supporting an immersive studio practice.

DANC216 Contemporary Dance Technique: Dancing During Pandemic
This combined-level dance class draws on multiple approaches to dance technique and the moving body in an outdoor, site-specific, pandemic-specific context. We will focus on large group ensemble movement as well as on individual movement specificity, and developing awareness of space, time, energy, technical precision, and dynamic variation. Course content will draw on modern dance techniques, contemporary/release techniques, and improvisational forms, as well as somatic practices.

During any major social transformation or crisis, like this pandemic, movement practice is essential. Our world and our rules of engagement are changing before our eyes. Creative physical movement is integral to our physical and psycho-social well-being, and through it we learn how to navigate the new context. On a basic level, we move our bodies to stimulate circulation of blood, breath, and digestive tract. But, equally important, and more central to higher education, we also need to move in ways that help us adjust to and make sense of our new circumstances--to orient ourselves to this new environment. This is the overarching purpose of this course: to collectively find new ways of being, understanding, moving, and creating our new world.

Classes will be held outside, and students will be expected to dress for the weather, and with freedom of movement in mind--in other words, wear safe footwear and clothing that does not constrict range of motion. Classes will only be canceled in the case of severe weather (i.e., hurricane). In those cases, hybrid practice-based assignments will be given to supplement in-class material.

This course is intended as an alternative to our regular Contemporary Technique course DANC300, which is being taught in an online format. Students are invited to choose the format that they feel most comfortable with. Both courses count toward major and minor requirements.
Offering: **Host**

Credits: **0.50**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC220 Performing Indonesia
This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

DANC236Z Writing the Body
How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Melissa Febos, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

DANC237 Performance Art
This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-THEA**
Identical With: **THEA237**
Prereq: **None**

DANC244 Delicious Movement: Time Is Not Even, Space Is Not Empty
This course contemplates massive violence and bodily experiences of time and space through interdisciplinary discourse. Taught by NYC-based movement artist Eiko Otake, students will examine how being or becoming a mover reflects and alters each person's relationships with the environment, history, and other beings. Topics of study and discussion include war, atomic bomb literature, postwar Japan, and environmental violence such as the Fukushima nuclear explosions. A key concept of study will be metaphorical nakedness and how distance is malleable. Please note that homework load is heavy with weekly assignments and journals. Seeking collective learning, the course will culminate with a final project sharing. The class is fiercely non-competitive and non-technical. No previous dance training is necessary, but willingness to move with and in front of others is important. Please visit eikootake.org to learn about this instructor.

Fall 2026 schedule:

First Class: Monday, September 7 (on Labor Day)

Sundays: 2:30 - 6:00 pm and

Mondays: 6:30 - 9:30 pm

Last Class: Sunday, November 1

DANC249 Making Dances I: Solo Work
This course is a practical lab in body-based performance making with a focus on the solo form. Students will work towards developing and honing their personal artistic interests and goals, and supporting those of their peers. We will experiment with various modes of composition, viewing and researching a broad range of artistic work and ideas, expanding our notions of what constitutes a dance. Students will explore performance in public space, collaboration, and work across artistic disciplines, engagement with technology, awareness of cultural context and appropriation, and social practice/participatory/community engaged art. Finally, we will develop methods for peer critique, working towards finding a challenging and supportive approach that pushes each artist forward. NOTE: This is a laboratory course for students interested in diving deeply into body-based artistic practice. It is appropriate to students with a background in any artistic discipline. An interest in rigorous (and playful) experimentation and research is key.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC250 Dance Composition: Choreography Workshop
This course in creating and performing choreography emphasizes the diversity of techniques, methods, and aesthetic approaches available to the choreographer. Assignments will revolve around inventing, organizing, and evaluating movement styles and on solving composition tasks that are drawn from various art mediums. This class will focus on the process of making a dance in a theatrical

setting. Skills in organizing and leading rehearsals, creative decision-making, and movement observation will be developed within the context of individual students honing their approach and style as choreographers. Practical and theoretical issues raised by the works in progress will frame in-class discussions and all necessary technical aspects of producing the dances will be addressed.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC251 Javanese Dance I
Instruction in the court dance of Central Java will begin with the basic movement vocabulary and proceed to the study of dance repertoires. Emphasis will be on the female and refined male court dance of the Kasultanan court of Yogyakarta. At the end of the semester, a recital will be arranged with the accompaniment of live gamelan music and as part of the Worlds of Dance concert.

Prereq: **None**

DANC260 West African Dance I
West African dance is a gateway to the cultures and ways of life of its people. It is the medium on which the very existence of the people is reinforced and celebrated. In this introductory course, students will learn the fundamental principles and aesthetics of West African dance through learning to embody basic movement vocabulary and selected traditional dances from Ghana. The physical embodiment of these cultures will be complemented with videos, lectures, readings, and discussions to give students an in-depth perspective on the people and cultures of Ghana. Students will also learn dances from other West Africa countries periodically.
Offering: **Host**

Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC261 Bharata Natyam I: Introduction of South Indian Classical Dance
This course is designed to introduce students to the fundamental aesthetic, social, and technical principles underscoring the culture of Bharata Natyam dance in its both indigenous and modern contexts. The course introduces students to Bharata Natyam largely through classroom practice (in the form of rhythmic and interpretive exercises), supplemented by brief lectures outlining the sociohistorical and cultural contexts of the form. Class lectures will also include video presentations. Occasionally, the class could include a guest lecture given by either a visiting scholar, dancer, or choreographer respected in the field of South Asian dance internationally.

DANC300 Contemporary Dance Technique II/III
This course is an exploration of contemporary and modern dance techniques. Classical modern dance, contemporary release, somatics, improvisation, country line dance, Cunningham, and yoga will all inform our time together. Over the course of the semester, we will develop several set warm up sequences and utilize repetition as a way of getting deeper inside of our physical and intellectual work. We will spend each day warming the body from the inside; moving collectively and specifically; developing a sense of weighted momentum; and practicing technical skills and alignment. We will spend time on rigorous phrase material and improvisational methods together, with additional practice viewing dance, reading about dance, and writing our own scores.
Offering: **Host**

DANC301 Anatomy and Kinesiology
This course is designed to develop understandings of anatomy and biomechanical principles of movement from both scientific and experiential perspectives. Studies include musculoskeletal and nervous systems, concepts for re-patterning and realigning the body, and prevention and care for common dance/sports injuries. Daily practice is based in embodied movement explorations and exercises in dialogue with scientific study and discussion of the mechanical/functional, poetic, and social context of our bodies.

Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC307 Mobilizing Dance: Cinema, the Body, and Culture in South Asia
This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

DANC309 Modern Dance III
This advanced-level class draws on multiple approaches to dance technique and the moving body. Some of these include modern dance techniques, contemporary/release techniques, contact and other improvisational forms, as well as somatic practices. Modern III focuses on the exploration of complex dance movement sequences, cultivating a specific and personal engagement with movement material, along with heightened attention to the subtleties of phrasing, initiation, and musicality. The course's primary aim is each individual's

continued development as a strong, well-rounded, creative, and thoughtful dancer.

Gen Ed Area: **HA-DANC**
Prereq: **DANC215**

DANC310 Afro-Brazilian III
This advanced technique-based Afro-Brazilian course will build upon embodied knowledge gained in Afro-Brazilian I (DANC205) and Afro-Brazilian II (DANC210). Students who have prior experience in Afro-Brazilian dance, or West African dance may also consider this course. Evaluation for the course will be based on class participation, participation in the Worlds of Dance Concert, and a short journal due at the end of semester. Students will also be responsible for learning basic Portuguese words and phrases, learning contemporary choreographic investigations created by the instructor and will be guided through processes of improvisation in creating their own phrases. This advanced course is designed to continue students' knowledge and understanding of the technique, culture, and history of Afro-Brazilian dance as a means for preserving cultural legacy. As an advanced course, it will move rapidly.

DANC311 Immersive Theater: Experimental Design, Material Culture and Audience-Centered Performance
This course offers a comprehensive exploration of Third Rail Projects' approach to crafting and performing in immersive performance formats. Students will work closely alongside Co-Artistic Director Tom Pearson to explore Third Rail's toolbox of techniques, including:

- Developing presence and clarity around audience engagement

- Remaining spontaneous and responsive to the changing landscape of an active audience

- Generating game play for crafting immersive scenes

- Understanding ritual, narrative, and audience initiation through the study of a scene from one of our immersive productions

DANC320 Theatre for Social Change - Taught from Ecuador with Local Participants
This course is taught in Spanish. Students should have Spanish proficiency equivalent to SPAN 112 or higher. This course is designed to lead Wesleyan students and Ecuadorian community counterparts through the process of creating social change by practicing social change. Using exercises and activities that pull from the areas of Theatre of the Oppressed and Performance Activism, as well as traditional theatre tools such as movement and mask-making, we engage challenging concepts and conflicts by dialoguing via our performative work. Our exploration stretches from the theoretical foundations of structural and symbolic oppression to ongoing real-life events related to themes that are selected by the course participants (examples include cultural identity, systemic racism, privilege, power, environmental justice, and gender equality/equity). Each course participant chooses a thematic area and joins a small group with which they will apply learned methods to exploring their theme. Together, Wesleyan students with local counterparts create short virtual theatrical projects to be presented to the whole cohort. Readings cover theory and methods in Applied Theatre, community-based case studies, and articles related to the chosen themes. The readings are contextualized to the diverse lived realities of the course's participants as well as to our globalized society.

Identical With: **CGST321**
Prereq: **None**

DANC322 Storying and Re-Storying (Storytelling for Social Change) - Taught from Ecuador w Local Participants
This course is taught in Spanish. Students must have proficiency in Spanish equivalent to SPAN 112. When we consciously appropriate the power of stories to collectively reimagine our world, we turn the word story into a verb. We "story" our world. When our "storying" seeks to transform a system founded on unjust stories, we are "restorying" our world. This course begins with our human ability, and need, to tell stories, examining how we use them for communication, as well as how we become empowered or disenfranchised by them. Based on the realities present in our communities (our local community of place, college campuses, cities, neighborhoods, spiritual communities, etc.), students work with their counterparts, combining theory with practice, to create and tell stories with the goal of identifying shared conflicts and inspiring change. Since stories are told in many ways, the course engages the "telling" through various methods: writing stories and poems, Spoken Word, coloring/drawing, mapmaking, and moving our bodies. In each project, we implement the elements of storytelling, balancing distinct narrative traditions, such as myth and legend, with influences of the modern world. Readings look at a wide array of narrative theory and methods, focusing on storytelling as a form of creating and expressing knowledge. The course concludes with the interweaving of local and international stories into "our stories."

DANC341 Dance Teaching Workshop
Whether you are interested in teaching a traditional dance class (like jazz, salsa, choreography), OR integrating movement into other classes (like 'science choreography' or 'poetry through movement') this class is for you!

Leap, spin, fall, and reach! Dance Teaching Workshop familiarizes students with methods and practices for teaching dance and movement to children and adults. Combining theoretical perspectives on education, dance, embodiment, and creativity together with hands-on practice teaching dance, students will gain practical skill in syllabus design and methods of teaching while developing a "teaching statement" reflecting on the role of dance/movement in education.

Prior dance training is not required; however, students should have an interest and some experience in either dance, arts, or education. It is highly encouraged that you take any dance or movement class concurrently with Dance Teaching Workshop. This can be a Wesleyan course, or an extracurricular club or movement practice. It is important to be engaged in a regular physical practice when teaching movement. Please email Katja at kkolcio@wesleyan.edu with a paragraph describing your interest and your experience in either dance or education (or both).

DANC354 Improvisation: Diasporic Modalities
Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/music, the environment, and our community? How do we honor the self in collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.

Prereq: **None**

DANC357Z Space and Materiality: Performing Place
Scenography explores and shapes the material world in and through the performative event. In site-specific performances, it transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and direct understanding of the material potential and limitations of the four key elements involved in the scenographic project -- artistic design, the actor's body, local architecture, and time.

This course is divided into three units: (1) site-specific; (2) street performance; and (3) immersive theater. Each unit includes scholarly readings, assignments in performance and scenography, and specific showings. There will be two written responses for the course (5-to-7-page papers) on two of the works experienced at the festival that demonstrate the student's cumulative grasp of site specificity, scenography, and materiality. There will also be a final media journal showing.

Identical With: **THEA357Z**
Prereq: **None**

DANC359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting. In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements. Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software. This course counts towards the Theater Arts category for the THEA major.

DANC360 West African Dance II
This intermediate-level course is intended for students who have had some previous training in West African dance. In this course students will learn more complex and physically challenging dances drawn from several cultures in Ghana. In addition, students will be presented with a rich pallet of general West African movement vocabulary and will continue to engage in the discussion of the cultural context in which the dances occur, through reading, writing, video, and lecture.

DANC362 Bharata Natyam II: Embracing the Traditional and the Modern
This advanced course is designed to further students' understanding of the technique, history, and changing nature of Bharata Natyam dance and of Indian classical dance in general. The primary aim of the course is to foster an understanding of the role, function, and imaging of Bharata Natyam dance vis-à-vis ideas about tradition and modernity. Although the course assumes no prior knowledge of Bharata Natyam, we will move rapidly through the material. We will focus mainly on more complex studio work, extensive readings, and video presentations. In preparation for this course, students should have movement experience in other dance tradition(s). Occasionally, the class could include a guest lecture given by either a visiting scholar, dancer, or choreographer respected in the field of South Asian dance internationally.

Prereq: **None**

DANC363 Dancing Bodies, Cultures and Environments
This course will look at the intersections and common spaces between body/self, community/culture, and environment/place. To do this we will employ several research methods. Students will be asked to complete readings, participate in discussions, view relevant media, and participate in movement master

classes. We will also create solo and group performance works that explore our individual and communal experiences of body/community/environment. Students will be asked to complete readings, participate in discussions, participate in improvisational movement sessions, and work in a collaborative context. Each student will develop a final project that contains both a written and a performative component.
Offering: **Host**

Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC366 Queering the Dancing Body: Critical Perspectives on LGBTQ Representation
This course focuses on questions of "queering" dance as a historical, cultural, social, and political enterprise. Focusing on both historical and postmodern dance contexts, the course explores key issues around gender and identity, with special reference to the concepts of performativity, impersonation, sexuality, and transformation. The course places the notion of "flows of gender and transformation" at its center, and examines historical, social, and aesthetic shifts in these ideas over the past 50 years. It draws on case studies ranging from female/male dance traditions of impersonation in India, China, Japan, and Indonesia, to postmodern shifts of "classical" dance (such as the all-male cast of Matthew Bourne's "Swan Lake") and more popular forms such as voguing and "RuPaul's Drag Race."

DANC370 Choreography Workshop/Proscenium
This class will focus on the process of making a dance. Skills in organizing and leading rehearsals, creative decision making, and movement observation will be developed within the context of individual students' honing their approach and style as choreographers. Practical and theoretical issues raised by the works in progress will frame in-class discussions, and all necessary technical aspects of producing the dances will be addressed. Students will prepare to present for proscenium theater/audience.
Offering: **Host**
Grading: **A-F**
Credits: **2.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC371 Site-Specific Choreography
This course addresses the construction of contemporary performance in alternative, nontheatrical spaces. Students will create, design, and structure movement and image metaphors; design and realize scenic objects; and integrate technologies that enhance performance at large. Daily practice will focus on developing compositional tools to trigger events, to set off the performance space, and to create optimal conditions for audience and performer participation. Skills in movement observation, critical reading, and video analysis will inform the course's practical and historical frameworks.

DANC372 Choreography and Performance Art Perspectives
This course considers theories and methods of dance scholarship and takes a comparative approach to dance as research, research as choreography. This is a research methods course in which we will consider ways that knowledge is constructed and legitimated, focusing on the role of physical/somatic engagement, creativity, and performance in research. Problems and issues central to research pertaining representation, authority, validity, rigor, reliability, and ethics will be addressed in the context of dance studies and critical qualitative research studies. A final research project will be required.

Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC374 Perspectives in Dance as Culture: Black Praxis
In this project-based course we are shedding light on the magic of praxis. Our focus will be rooted in the work of Black artists and dance makers, tuning into the choreographic seeds of their processes. Most Black artists go unrecognized for their contributions and tools they have shared in the field of dance--how they do what they do. Together we will uplift the rigor, complex methodologies, embodied research practices, tools, devices, recipes, and alchemy that is present in crafting works. We will engage in the art of archive through research, witnessing, writing, interviews, multimedia, and embodied practice, disrupting a Eurocentric lens on documented compositional methods.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**

DANC375 Dance History: Why Dance Matters
Dance History: Why Dance Matters investigates myriad social, political, and historical events that have impelled performers and choreographers to create dances that broadcast their personal concerns to society in powerful ways. Artistic movements, choreographers, and dancers examined will include the aristocratic Imperial Russian Ballet; gender fluidity in Nijinsky's roles in

Diaghilev's Les Ballets Russes; the microcosm of immigrant and black performers in vaudeville; dance and the Harlem Renaissance; the rejection of ballet by Löie Fuller, Isadora Duncan, and Ruth St. Denis; the political work of early modern dancers Martha Graham, Doris Humphrey, and Charles Weidman; war's aftermath in the German Ausdruckstanz of Mary Wigman and Kurt Jooss and Japanese butoh; the anthropological research of black choreographers Katherine Dunham and Pearl Primus; the psychological dance-theater of Antony Tudor and Pina Bausch; democracy within the postmodern rebellion of the Judson Dance Theater; Civil Rights-era social activist choreographers; and the response of choreographers and performance artists to the culture wars of the 1990s and the AIDS crisis. Students will pursue extended research, view performance videos and documentaries, and be expected to write and talk about dance.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC376 The Artist in the Community: Civic Engagement and Collaborative Dancemaking
Through both theoretical analysis and practical application, students will grow their understanding of community-based performance and collaborative art-making. Grounded in readings and seminar discussions about the practice and process of community-based art, students will apply their learning through community-engaged research. Through direct practice, students in the course will explore how collaborative performance can address local issues, spark community dialogue, and encourage civic participation--whether on a college campus, in a neighborhood, or across a city.

Class meetings will take place virtually during the semester. Student research and project development will be conducted in person. Note: This course includes required Spring Break travel to work on a Forklift Danceworks project. Travel expenses for the trip are paid by the University.

DANC377 Perspectives in Arts as Culture: Dancing With the Machine
Perspectives: Dancing With the Machine is an intensive studio course exploring the breadth and depth of dance and technology. Students will learn advanced post-production, motion capture, and video recording techniques, and be introduced to historical examples of dancing with early modes of technology as well as to contemporary cutting-edge works. Class sessions will include viewings of dance works, technical demonstrations, group discussions, and conversations with practitioners in the field. Readings and screenings will examine the relationship between dance, technology, contemporary art, and popular culture. Students will learn how to use the 3D motion capture studio and record live dance performances. Software will include Adobe Premiere, AfterEffects, Blender, and DaVinci Resolve. Through weekly exercises and a final independent project, students will learn to work collaboratively and develop a distinct creative voice. The course will culminate with a final dance video project, to be screened at the end of the semester. Previous experience in Adobe Premiere Pro software is required. Preference will be given to students who have successfully completed ARST 286, ARST 386, DDC 108, or DDC 448. All students must be concurrently enrolled in the virtual production lab which meets Fridays 1:20 p.m.-2:50 p.m. in DDC 100.
Offering: **Host**

DANC378 Repertory and Performance: The Jewel Thief: A Ballet of the Mind
In this permission of instructor repertory course, we will weave the past with the present in order to create a Neo-Baroque drama based on Alfred Hitchcock's thriller, To Catch a Thief that is studded with heiresses, thugs, and other underworld characters. Students will have the opportunity to learn 18th century French Baroque dance, the aristocratic entertainment that evolved at the court of Louis XIV. Once this foundation is laid, we will incorporate period dances and more contemporary movement into a lavish spectacle that draws inspiration from Madame Sevigny's reminiscences of the fêtes of Louis XIV's court, the 1920s modernist costume parties of the Bauhaus, and Truman Capote's infamous Black and White Ball of 1966. The course will culminate in a performance in the CFA theater December 6th and 7th, 2024, and is a collaboration with Wesleyan Music Professor Neely Bruce, composer of the score. Attendance is absolutely required. Three short reflections on your progression will be submitted over the span of the course. During performance week from Monday through Wednesday, students are required to be at all technical rehearsals in the CFA theater from 7:00 p.m. until 10:00 p.m. Dress rehearsal is Thursday, December 5th at 7:00, and the performances are on December 6th and 7th. This class is Permission of Instructor (POI). Students should have at least reached the level of Ballet II or Modern II at Wesleyan, however, movement ability of athletes and actors who have not taken those courses may all request permission of the instructor, and will be taken into consideration. Note: This narrative requires not only dancing, but the development of a character--students must be willing to abandon their comfort zone and go out on a limb! Sensational masks will be fashioned by students, and worn in performance. Please contact Professor (pbeaman@wesleyan.edu) if you have questions about the course.
Offering: **Host**

DANC378A Repertory and Performance: Storied Places
Grounded in the experiences of the multiple African American migrations of the late-19th and early-20th centuries, this course will explore the ideas of migration, displacement, home, and place writ large. As a community, we will collaboratively develop a performance that will utilize movement, text, and objects as research tools and creative processes as our methodology to engage these themes.

Our process in creating this work will include improvisation, development of set materials, readings, discussion, and writing. Students will have the opportunity to work alongside professional dancers as well as Wesleyan faculty and their peers in preparation for an interdisciplinary performance in the spring.

DANC379 Dance as Activism
How does art effect change? Why does the phrase "social movements," include the action word - movement? In what ways does dance instigate action as a means of resistance? This course is an investigation into these questions through both lecture/discussion and embodied practices. It will look at various choreographers whose work is rooted in grappling social justice issues, choreographic and community engagement tools, as well as protests as

choreographed performance art. All course work and inquiry will lead up to a final project wherein students create their own choreographic sketch/community engagement using the language of dance/performance art, as the foundation for addressing a particular historical or present social issue of their choice.
Offering: **Host**

DANC380 Transforming Bodies: Movement and Agency in West Africa
Dancers in West Africa embody human agency and transform historical worlds. As one elder farmer proclaimed: "Our ciwara have power[!]" Masked ciwara dancers on the Mande Pleateau call upon the collective labor of farmers to produce rural life, and more recently, have responded to transformations of the agricultural landscape. They emphasize the power of the human body over agricultural machines. Elsewhere in West Africa, the Atsiagbekor dance energized and celebrated Ewe male soldiers by acting out scenes from the battlefield. The dance movements were also secret codes used during battle to give instructions. How and when to fight, defend, or retreat depended on this embodied communication. The accompanying loud drum music served an added purpose of instilling fear in enemy ranks because it created the impression of a mighty army on the march. Still performed, the dance now symbolizes Ghanaian cultural heritage and helps to shape local historical memory.

In this course we will examine the body as an active agent in West African social and political life. We will study the historical and contemporary meanings of laboring bodies through dance and everyday movement, such as women's pounding of fufu or stirring of toh daily meals. We will also reflect on the ritual enactment of enslavement or colonial rule as a means to subvert old power structures. The body in these cases was a tool for resistance. We will also unpack multiple interpretations for specific women's embodied protests such as "sitting on a man." Collective body movement was powerful, but individual bodies might also enact healing or express religious devotion. Spirit possession, for example, marked the body as a site for human interaction with the supernatural. In this and other examples, the body is an archive in motion and subject to social renewal. By taking the body and movement as a lens, we will explore shifting histories of labor, performance, gender, politics, aesthetics, and religion from the pre-colonial era to the contemporary moment. We will also learn new ways to creatively move and narrate the African past and present.

DANC382 Bharata Natyam III
This is an advanced technique-based Bharatanatyam course. Students are required to have taken both Bharata Natyam I (DANC261) and Bharata Natyam II (DANC362). This is to ensure that students have a foundation in both the practical and theoretical study of Bharata Natyam prior to enrolling in this course. Evaluation for the course will be based on class participation, a full-length studio performance of Bharatanatyam compositions and a short journal due at the end of semester. We will focus mainly on advanced studio work. Students will also perform one repertory piece at the Worlds of Dance concert. This advanced course is designed to further students understanding of the technique, history and changing nature of Bharatanatyam dance. The primary aim of the course is to foster an understanding of the role, function, and imaging of Bharatanatyam dance vis-à-vis ideas about tradition and modernity. The course will be moving rapidly through the material.

DANC398 Senior Colloquium in Dance Research
This course focuses on workshopping senior capstone research projects/theses, critically analyzing and situating their work within the larger fields of dance and dance research. In addition to sharing senior capstone research in progress, the course incorporates opportunities to interact and study with successful dance artists/scholars, including but not limited to, CFA visiting artists and current faculty, and to thereby encounter the most current shifts happening in the field of dance and dance research. Issues concerning dance/research that will be addressed include the following: relevance, validity, rigor, diversity and globalization, interdisciplinarity, citizenship, and social justice as they pertain to dance and dance research and to the senior capstone projects/theses specifically. This is an opportunity for our students to delve deeper into their own research while expanding their focus to better understand and frame their work in a larger context.

DANC412 Group Tutorial, Undergraduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

DANC419 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Host**
Grading: **Cr/U**

DANC420 Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Host**
Grading: **Cr/U**

DANC420A Student Forum
Student-run group tutorial, sponsored by a faculty member and approved by the chair of a department or program.
Offering: **Crosslisting**
Grading: **Cr/U**

DANC435 Advanced Dance Practice A
Participation as a dancer in faculty- or student-choreographed dance concerts. Course entails 30 hours of rehearsal and performance time.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC444 Applied Tech Practice
Students have been required to practice technical crew work as long as we have had a major. In other departments, this work is acknowledged through the allocation of credit. Offering credit for this curricular experience brings us in line with practice in the Theater Department, and acknowledges the value we attribute to learning about production aspects of dance. Students will work under the guidance of faculty member Chelsie McPhilimy.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC445 Advanced Dance Practice B
Identical with DANC435. Entails 60 hours of rehearsal and performance time.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC447 Dance Teaching Practicum
This course is an exploration and practice of creating programs/projects that are relevant and inspiring for specific communities. The practicum will involve engaging with a community beyond the Wesleyan campus through dance/movement.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **None**
Prereq: **None**

DANC450 Senior Dance Colloquium
This colloquium is for all senior dance majors who intend to complete honors theses or senior projects. It is designed to enable students to pursue individual research projects in a group context, with attention to bridging creative practice with theoretical inquiry. The colloquium is structured as a workshop: each student will present their proposals and their work in progress, exchange writing, and discuss the process moving between stage and page; equally important is engaging with and offering constructive criticism of the projects presented by others. Thesis and Project students will participate in a public presentation of work-in-progress in mid-November.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **HA-DANC**
Prereq: **None**

DANC491 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**

DANC492 Teaching Apprentice Tutorial
The teaching apprentice program offers undergraduate students the opportunity to assist in teaching a faculty member's course for academic credit.
Offering: **Host**
Grading: **OPT**

DANC501 Individual Tutorial, Graduate
Offering: **Host**
Grading: **OPT**

DIGITAL DESIGN COMMONS

The Digital Design Commons is a newly formed multimedia center on Wesleyan's campus, currently in its second phase of construction. Formerly home to the Davison Art Center, the DDC engages students in creative research and artistic practice across a range of disciplines. Once completed, the DDC will feature a series of production spaces, including a motion capture studio, and several video editing and sound recording suites. Courses offered within the DDC deepen conceptual and technical knowledge of multimedia approaches within a variety of artistic practices. The DDC also offers student-led training and workshops, along with a growing inventory of multimedia equipment.

EARTH AND ENVIRONMENTAL SCIENCES

The Earth and Environmental Sciences Department (E&ES) at Wesleyan University covers many aspects of the natural world, on Earth and on other planets. Course topics range from active volcanoes to climate change to eco-conservation. The E&ES major is designed to prepare students for graduate

school, as well as provide a basis for a variety of careers in the private or public sectors. Courses in geology, environmental science/environmental chemistry, environmental science/ecology, and planetary geology lead to different areas of specialization and career options.

Many E&ES students work with faculty on research projects that range from climate studies to active volcanoes in the Andes, from the structure of the Grand Canyon to the structure of the planet Venus, from nearby coastal areas (Long Island Sound) to faraway lagoons (Vieques Island, Puerto Rico). The culmination of the major is a capstone course where students perform independent research in the field (Puerto Rico, Death Valley, the Connecticut River Valley, or Hawaii).

- Master of Arts in Environmental Sciences (p. 461)

E&ES101 Dynamic Earth!
The earth is a dynamic planet, as tsunamis, hurricanes, earthquakes, and volcanic eruptions make tragically clear. The very processes that lead to these natural disasters, however, also make life itself possible and create things of beauty and wonder. In this course, we will study the forces and processes that shape our natural environment, as well as the effect we have on this world. Topics range in scale from the global pattern of mountain ranges to the atomic structure of minerals, and they range in time from billions of years of Earth history to the few seconds it takes for a fault to slip during an earthquake. Hands-on activities and short field trips complement lectures to bring the material to life. So put on your hiking boots and get ready to explore our planet.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES102 Dynamic Earth! Lab
Connecticut is rich with geologic features that can be reached by a short van ride from the Wesleyan campus! This course explores the Earth and environmental sciences through field trips that provide the opportunity to examine evidence for volcanoes, dinosaurs, glaciers, and rifting continents right here in Connecticut. This course is required for students enrolled in EES 101.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES102Z Natural History of the Connecticut River Valley
Please note: Readings and assignments will be due during winter break, prior to arriving on campus for Winter Session. Please visit the Winter Session website for the full syllabus -- http://www.wesleyan.edu/wintersession.

What did Middletown look like 200 million years ago? What about 20,000 years ago, or 200 years ago? The natural history of Middletown and the broader Connecticut River valley is a rich tapestry. In this course, we will explore some of its major threads, including the geologic, glacial, Native American, early European, and industrial histories. The primary goal of the course is to deepen your sense of place for this valley that you call home during your four years at Wesleyan. The majority of the class time will be spent visiting sites in the valley, both indoor and outdoor. You must be prepared to spend multiple hours outside, including walking up to two miles. The presence of snow may cause some trips to be postponed or cancelled. To remain flexible for these possible contingencies, students should keep the entire January 7-21 block open in their schedules.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES111F As the World Turns - Earth History, with Life's Ups and Downs (FYS)
An introduction to the major events that shaped our modern Earth over the 4.5-billion-year history of our planet. We discuss the composition of the early atmosphere devoid of oxygen, the great oxygenation event related to the emergence of cyanobacteria, snowball Earth, origin and evolution of life prior to 500 million years ago, and then a treatment of the major asteroid impacts, mega-volcanic periods, and other disasters that catastrophically modified the Earth and influenced all that lived on it. We close with possibly the biggest disaster of them all: the human era, with the climate crisis, pollution, and possibly the largest extinction event ever? We use the Earth and environmental sciences, astronomy, and the basic sciences to introduce and explain the processes that ultimately shaped our modern world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES115 Introduction to Planetary Geology
This course will examine the workings of Earth and what we can learn from examining Earth in the context of the solar system. Comparative planetology will be used to explore such topics as the origin and fate of Earth, the importance of water in the solar system, the formation and maintenance of planetary lithospheres and atmospheres, and the evolution of life. Exercises will utilize data from past and present planetary missions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES115F Introduction to Planetary Geology
This first-year seminar course will examine the workings of Earth and what we can learn from examining Earth in the context of the solar system. Comparative planetology will be used to explore such topics as the origin and fate of Earth, the importance of water in the solar system, the formation and maintenance of planetary lithospheres and atmospheres, and the evolution of life. Exercises will utilize data from past and present planetary missions.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES125 Black Speculative Fictions and the Anthropocene
The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Gen Ed Area: **HA-CHUM**
Identical With: **AFAM312, FGSS301**
Prereq: **None**

E&ES130F Digital Storytelling with Maps: Science Stories (FYS)
Digital storytelling describes the practice of using digital tools to tell a 'story' in an engaging and compelling format. A story map is a digital storytelling tool that combines maps with multimedia content (e.g., images, video, text) to convey geographic information as a narrative. In this course, students will employ elements of cartographic design, spatial analysis, and data visualization within story maps as a means for creating interactive 'stories' about empirical scientific data. (No prior experience with web maps or story maps is required.) Students will explore multiple story map formats and their utility in the effective communication of science to scientists, the public, and policy makers.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **None**
Prereq: **None**

E&ES141F Out of Ice: Exploration of the Impact of Melting Glaciers, Esp. Mountain Glaciers on Humans (FYS)
Exploring the impact of melting glaciers.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES142F Astrogeochemistry: The Search for Life in the Solar System and Beyond (FYS)
This course will examine the role that geochemistry plays in our search for life in the Solar System as well as exoplanetary systems. We will examine the habitability of different environments on different bodies (Venus, Mars, Europa, Enceladus), and compare them to the environments of the ancient and modern Earth. We will consider what would constitute geochemical evidence of life in these different systems, and how this can aid us to interpret chemical signals from exoplanets. We will also critically evaluate past and recent claims of extraterrestrial life.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES151 The Planets
More than 100 planets are now known in the universe, eight of which circle the sun. NASA missions and improved telescopes and techniques have greatly increased our knowledge of them and our understanding of their structure and evolution. In this course, we study those eight planets, beginning with the pivotal role that they played in the Copernican revolution, during which the true nature of the Earth as a planet was first recognized. We will study the geology of the Earth in some detail and apply this knowledge to our closest planetary neighbors--the moon, Venus, and Mars. This is followed by a discussion of the giant planets and their moons and rings. We will finish the discussion of the solar system with an examination of planetary building blocks--the meteorites, comets, and asteroids. Additional topics covered in the course include spacecraft exploration, extrasolar planetary systems, the formation of planets, life in the universe, and the search for extraterrestrial intelligence.
Offering: **Host**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-EES**
Identical With: **ASTR103**
Prereq: **None**

E&ES154F Volcanoes of the World (FYS)
In this First Year Seminar, we will discuss how volcanology was historically a descriptive science: people watched eruptions, looked at the deposits, and then tried to relate older rocks to the newly-erupted analogs. However, the science has evolved as the theory behind volcanic processes has been developed and researchers pursue investigations in the field, lab, and via numerical modeling. In this class, we will explore the nature and composition of the Earth and how plate tectonics controls the global distribution of volcanoes. We will discuss volcano types, magmas, minerals and rocks, and the complex interplay of chemistry and physics that shapes volcanic eruptions via nine case studies. Moreover, we will consider the effects these eruptions have had on human history, politics, and art.

Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES155 Earth System Science
An introduction to Earth system science intended for students pursuing the Earth and environmental sciences major and others with good high school math and science preparation. Earth system science integrates chemistry, physics, biology and geology to understand the Earth as an integrated planetary whole. The course will focus on the four major earth systems: land, water, air, and life and how their interactions determine past, current and future global changes. Required laboratory sections will meet every other week and include a combination of lab and field exercises.
Offering: **Host**
Grading: **OPT**
Credits: **1.25**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES160 Life in the Oceans in the Anthropocene and Beyond
Little is known about life in the deep sea, the largest habitat on Earth, even about the largest animals living there, such as the giant squid. Humans, however, are severely affecting even these most remote areas of our planet, and wildlife populations in the oceans have been badly damaged by human activity. We will look at the amazing diversity of ocean life and the disparate building plans of its animals, and see how oceanic ecosystems are fundamentally different from land ecosystems. Then we will explore how human actions are affecting oceanic ecosystems directly, for instance by overfishing (especially of large predators and filter feeders), addition of nutrients (eutrophication) and pollutants, and the spread of invasive species, as well as indirectly, through emission of carbon compounds into the atmosphere. Rising atmospheric CO2 levels lead to ocean acidification and global warming, affecting the all-important metabolic rates of ocean life, as well as oceanic oxygen levels and stratification, thus productivity. We will try to predict the composition of future ecosystems by looking at ecosystem changes during periods of rapid warming in the geological past and see whether future ecosystems will become dominated by jellyfish, as they were 600 million years ago.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **CIS160, BIOL160**
Prereq: **None**

E&ES195 Sophomore Field Course
This course is designed for sophomores who have declared a major in earth and environmental sciences. The course will give students a common experience and a more in-depth exposure to the department curriculum prior to their junior

year. Students will be exposed to the wide variety of geological terrains and ecological environments of southern New England.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES197 Introduction to Environmental Studies
This course explores the interdisciplinary field of environmental studies to better understand the characteristics of human interaction with and dependence on the environment, and the causes and consequences of environmental degradation at local and global scales. We will explore key processes, characteristics, and phenomena of the natural world, and relevant human system and social dynamics. We will apply this information to identifying important issues and trends of global climate change and sustainability. Projects facilitate synthesis and application, skill development, reflection, and independent exploration.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS197, BIOL197**
Prereq: **None**

E&ES201 Geology of Connecticut
The geology of Connecticut offers a unique opportunity to study the formation and deformation of rocks dating back more than a billion years. These rocks occur in belts that each record the arrival of exotic (plate tectonic) terranes that together built and rebuilt the Appalachian mountain belt. Few states in the nation possess a similar diversity of exposed rock and mineral occurrences. The course consists of weekly Friday afternoon field trips to key localities. Students will learn how to recognize and classify different rock types and distinguish their formational and deformational histories. Emphasis will be on learning (1) to recognize the clues to identifying the origin and evolution of the large variety of sedimentary, volcanic, metamorphic, and igneous rocks in Connecticut and (2) to use them to reconstruct their plate tectonic context. We will include visits to historic sites that influenced our socioeconomic development such as the brownstone quarries and "copper" mines in the Connecticut Valley, and the granite quarries in the southeastern part of the state. A one-day required Saturday field trip will be scheduled during the first class meeting. Student co-enrollment in EE&S 213 or 223 or 230 is encouraged.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES213 OR E&ES223 OR E&ES230**

E&ES205 The Shaping of a Landscape: Exploring the Geology of Western North America
In this course, students will explore the geologic history that formed the western margin of the North American continent over more than 600 million years. The first half of the course will review fundamental solid earth processes, including plate tectonics, sedimentology, and volcanology in the context of the geology of western North America, in preparation for a mandatory one-week field trip to the region during the first week of spring break. In the second half of the course, students will interpret their observations from the field in the context of the ongoing study of the geology of western North America.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES213 Mineralogy
Most rocks and sediments are made up of a variety of minerals. Identifying and understanding these minerals are initial steps toward an understanding of the genesis and chemistry of Earth materials. Crystallography is elegant in its own right. In this course, we will study the crystal structure and composition of minerals, how they grow, their physical properties, and the principal methods used to examine them, including polarized-light microscopy and x-ray diffraction.

Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES214 Laboratory Study of Minerals
This lab course presents practical aspects of the recognition and study of the common minerals in the lab and in the field. It includes morphologic crystallography and hand specimen identification, the use of the polarizing microscope, and x-ray powder diffractometry.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES215 Earth Materials
This course introduces students to the solid, natural, and nonbiological materials that make up our world. We will cover the fundamentals of mineralogy and the petrology of igneous, metamorphic, and sedimentary rocks. We will also discuss materials that are used by humans and form the basis of societies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES216 Earth Materials Laboratory
This course will introduce students to laboratory techniques used in identifying and understanding rocks, minerals, and other Earth materials.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES220 Geomorphology
This inquiry into the evolution of the landscape emphasizes the interdependence of climate, geology, and physical processes in shaping the land. Topics include weathering and soil formation, fluvial processes, and landform development in cold and arid regions on Earth and other planets. Applications of geomorphic research and quantitative theories of landform development are introduced throughout the course where appropriate. This course must be taken concurrently with E&ES 221: Geomorphology Laboratory.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197 OR EES199**

E&ES221 Geomorphology Laboratory
This course will introduce various methods of measuring landforms in the field, including stream measurement, hazard assessment, and the classification of glacial, volcanic, coastal, and tectonic features. The course includes laboratory exercises in the utilization of topographic maps, aerial photographs, and various remote-sensing techniques. This will include field trips to various

locations in CT. This laboratory class must be taken concurrently with E&ES 220: Geomorphology.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197 OR EES199**

E&ES223 Structural Geology
Structural geology is the study of the physical evidence and processes of rock deformation, including jointing, faulting, folding, and flow. Geologic structures can be used to interpret tectonic history and understand physical process responsible for geologic hazards such as earthquakes, volcanoes, and landslides. Many structures also exert a primary control on fluid flow in the earth's crust and thus play an important role in determining the distribution of natural resources and environmental contaminants. In this course students will learn the theoretical foundations, observational techniques, and analytical methods used in modern structural geology. Case studies are drawn from local field work (see description of E&ES224) and published data sets from around the world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES523**
Prereq: **E&ES101 OR EES199 OR E&ES115 OR [ENVS197 or BIOL197 or E&ES197]**

E&ES224 Field Geology
This course is designed to provide students with a basic understanding of geological principles in the field. Emphasis will be on describing, measuring, and mapping bedrock geology and structures with applications to tectonics, mountain building, earthquake science, volcanology, and groundwater hydrology.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR EES199 OR E&ES115 OR [ENVS197 or BIOL197 or E&ES197]**

E&ES230 Sedimentology
Sedimentary geology impacts many aspects of modern life. It includes the study of sediment formation, erosion, transport, deposition, and the chemical changes that occur thereafter. It is the basis for finding fossil fuels, industrial aggregate, and other resources. The sedimentary record provides a long-term history of biological evolution and of processes such as uplift, subsidence, sea-level fluctuations, climate change, and the frequency and magnitude of earthquakes, storms, floods, and other catastrophic events. This class will examine the origin and interpretation of sediments, sedimentary rocks, fossils, and trace fossils. Students must take E&ES231 Sedimentology Laboratory concurrently. There may be optional weekend field trips.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES197 OR ENVS197 OR E&ES155**

E&ES231 Sedimentology Laboratory
This course provides macroscopic and microscopic inspection of sedimentary rocks. It will include laboratory analyses and field trips. There may be optional weekend field trips. E&ES230 must be taken concurrently.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197**

E&ES234 Geobiology
Fossils provide a glimpse into the form and structure of ancient ecosystems. Geobiology is the study of the two-way interactions between life (biology) and rocks (geology). Typically, this involves studying fossils within the context of their sedimentary setting. In this course, we will explore the geologic record of these interactions, including the fundamentals of evolutionary patterns, the origins and evolution of early life, mass extinctions, and the history of the impact of life on the climate.
Offering: **Host**
Grading: **OPT**

E&ES235 Geobiology Laboratory
This laboratory course will explore more deeply some of the concepts introduced in E&ES234. Both the fundamental patterns and practical applications of the fossil record will be emphasized.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **BIOL229**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR EES199 OR [ENVS197 or BIOL197 or E&ES197]**

E&ES237Z Forests: Ecology, Conservation and Futures
Forests are critical to the survival of humans and their fauna. Tropical and temperate forests, by their structure and composition, contain extraordinarily high biological diversity and provide critical ecosystem services with complex interactions with humans. This course will examine the structure, function, and diversity of tropical and temperate forests, with an emphasis on the ecological processes that shape plant and animal communities within these unique and diverse ecosystems. The class will examine major threats to the global forests and measures that may be put in place to allow for their recovery post disturbance. The course will be delivered though lectures, student-led discussions and debates and other in-class activities.
Offering: **Host**
Grading: **OPT**

E&ES238 The Forest Ecosystem
This course examines basic ecological principles through the lens of forest ecosystems, exploring the theory and practice of forest ecology at various levels of organization from individuals to populations, communities, and ecosystems. Lectures, lab exercises, and writing-intensive assignments will emphasize the quantification of spatial and temporal patterns of forest change at stand, landscape, and global scales.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL346, BIOL546, E&ES538, ENVS340**
Prereq: **[BIOL182 or MB&B182] OR [ENVS197 or BIOL197 or E&ES197] OR EES199**

E&ES242 Irrigation
Irrigation is the artificial application of water to support crop growth, playing a crucial role in ensuring sustainable agricultural production and global food

security. This course provides students with a comprehensive understanding of irrigation techniques, systems, and management practices essential for optimizing water use efficiency and enhancing crop productivity. Students will explore various irrigation methods, including surface, sprinkler, and drip irrigation, analyzing their advantages, limitations, and suitability for different crops and environments. Key topics include soil-water relationships, crop water requirements, irrigation system components, irrigation scheduling techniques, and sustainable water management strategies. Through a combination of theoretical learning and hands-on activities, students will gain the skills needed to design, implement, and manage efficient irrigation systems.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES542, ENVS231**
Prereq: **E&ES101 OR E&ES115 OR E&ES197 OR BIOL197 OR ENVS197 OR EES199**

E&ES244 Soils
Soils represent a critical component of the world's natural capital and lie at the heart of many environmental issues. In this course we will explore many aspects of soil science, including the formation, description, and systematic classification of soils; the biogeochemical cycling of nutrients through soil systems; and the issues of soil erosion and contamination.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197 OR EES199 OR BIOL182**

E&ES245 Soils Laboratory
This course will explore more deeply the concepts introduced in E&ES244 in a laboratory setting. Emphasis will be placed on the analysis of soil profiles both in the field and in the laboratory.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197 OR EES199 OR BIOL182**

E&ES246 Hydrology
This course is an overview of the hydrologic cycle and man's impact on this fundamental resource. Topics include aspects of surface-water and ground-water hydrology as well as discussion about the scientific management of water resources. Students will become familiar with the basic concepts of hydrology and their application to problems of the environment.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES546, ENVS219**
Prereq: **E&ES101 OR E&ES115 OR E&ES197 OR BIOL197 OR ENVS197 OR EES199**

E&ES248 Environmental Investigation and Remediation
This course will cover environmental investigation and remediation methods in varying geologic settings and how they have changed over time due to regulatory changes and advances in technology. An introduction to various aspects of environmental consulting will be incorporated throughout the term using case studies, guest lecturers, and emerging trends and research from online sources.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS248**

E&ES250 Environmental Geochemistry
This course is a qualitative and quantitative treatment of chemical processes in natural systems such as lakes, rivers, groundwater, oceans, and the atmosphere. General topics include equilibrium thermodynamics, acid-base equilibria, the carbonic acid system, oxidation-reduction reactions in nature, and isotope geochemistry. The associated lab course (E&ES 251) must be taken concurrently if offered. The lab course will be a service-learning course in which students work with a community organization to solve an environmental problem or a semester-long research project. There are no official prerequisite classes, but students should be comfortable with chemical concepts or should have taken introductory college chemistry or advanced high school chemistry courses.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS280**
Prereq: **None**

E&ES251 Environmental Geochemistry Laboratory
This course will supplement E&ES 250 by providing students with hands-on experience of the concepts taught in E&ES 250. Students must enroll in E&ES 250 at the same time. This course will emphasize the field collection, chemical analysis, and data analysis of environmental water, air, and rock samples. This course will be taught as a service-learning course where the class works with a community organization to solve an environmental problem or will work on a semester-long research project. The subject of this class will be announced on the first day of class.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS281**
Prereq: **None**

E&ES254 Renewable Energy
This course is an introduction to renewable energy from an Earth science perspective, covering the physical principles of power generation from natural energy flows and the transformation, transmission, and storage of energy on the electrical grid, as well as topics from energy markets and utilization. We focus on hydroelectric, wind, solar, geothermal, wave, and tidal energy, along with modern bioenergy. For comparison, we also briefly cover the conventional energy technology of fossil fuels and nuclear power. We discuss each renewable-energy resource, including the advantages, disadvantages, and environmental impacts of its accompanying technology. The course is quantitative with bi-weekly problem sets. Students are expected to gain theoretical and practical knowledge of renewable energy.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS239**
Prereq: **None**

E&ES255 The Changing Ocean
The Earth is always changing, and we're currently experiencing some of the most rapid changes to have occurred within the history of life. This course presents a topical approach to major oceanographic concepts, particularly those impacted by an anthropogenic change, by linking core concepts in modern oceanography with paleoceanographic proxies and the fossil record. We will integrate geological, chemical, physical, and biological oceanography across multiple timescales to build a conceptual understanding of not only how the ocean works but how we can understand the past, present, and future of the world's ocean.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES257 Environmental Archaeology
Archaeological materials provide long-term records of how humans have modified past environments and how human societies respond to environmental change. In this course, students will learn how data from ancient plants, animals, and soils can be analyzed in order to draw interpretations about past human-environmental interactions. We will also discuss key topics in environmental archaeology, including the long-term environmental impacts of plant and animal domestication and debates over environmental causes for the "collapse" of civilizations such as the ancient Maya. The course will involve hands-on preparation and cataloging of plant and animal specimens to add to the Wesleyan Environmental Archaeology Laboratory comparative collections. Students must be available for one weekend class meeting to complete the first stage of animal skeleton preparation.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP, SBS-ARCP**
Identical With: **ARCP257, ENVS257, ANTH257**
Prereq: **None**

E&ES258 Community Paleoecology
The study of community paleoecology seeks to derive ecological meaning from the reconstruction of ancient ecosystems. From this vantage point, fossil assemblages are used to observe long-term patterns in biogeography, evolution, and organism-environment interactions. The overarching themes in this course will emphasize theoretical frameworks in community ecology and stratigraphic paleobiology that advance the collective understanding of how to read and interpret the fossil record to document ecosystem interactions over geologic history. Case studies from across Earth's history will underscore the necessity of examining past ecosystems to contextualize modern and future ecosystem structure. We will accomplish these aims with lectures, readings and discussion of the primary literature, and student presentations. Pre/co-requisites: BIOL182, E&ES101, E&ES115, E&ES155, E&ES197, or E&ES199.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS288**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR ENVS197 OR EES199 OR BIOL182**

E&ES259 Introductory Ecological Methods in R
This lab class is required of students enrolled in the accompanying lecture (EES 258). We will learn to use R to analyze paleontological records with multivariate methods and specifically become familiar with the vegan package for interpreting large ecological datasets such as species abundance data. Prior knowledge of or experience with R is not a prerequisite and beginners are especially encouraged to enroll in this course. Students with intermediate and advanced R skills are still welcome to enroll, but should recognize that much of this course will focus on the beginner experience. Assignments and projects will be collaborative, such that students across experience levels will work together to complete the course material. Pre/co-requisites: BIOL181/BIOL182, E&ES101, E&ES115, E&ES155, E&ES197, or E&ES199.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **None**
Identical With: **ENVS289**
Prereq: **E&ES101 OR E&ES115 OR EES155OR ENVS197 OR EES199 OR BIOL182**

E&ES260 Oceans and Climate
Earth's climate is not static. Even without human intervention, the climate has changed, but mostly at a slower rate. In this course we will study the major properties of the ocean and its circulation and changes in climate during the Cenozoic Era (the past 66 million years). We will examine the effects of variations in greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. Once a basic understanding of the climate system is attained, the focus will be on how we know about past climates. Through reading and in-class exercises students will look at data from sediment cores, ice cores, and tree rings to learn about past climates. The final project will investigate measures humans can take to slow the rate of climate change. It is possible and must be done. Although this course is offered pass/fail, participants are expected to maintain a grade of B- or better to pass.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS290, E&ES560**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197**

E&ES261 Techniques in Ocean and Climate Investigations
Weekly field trips, computer and/or laboratory exercises will allow us to see how climate and oceans function today and in the past. We will use data sets from international organizations to examine what we know about past climates. There may be an opportunity to use a climate model, En-ROADS, with a community group to investigate what can be done to reduce greenhouse gases input to the atmosphere. Although this course is offered pass/fail, participants are expected to maintain a grade of B- or better to pass.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **NSM-EES**
Identical With: **ENVS292**
Prereq: **E&ES101 OR E&ES115 OR [ENVS197 or BIOL197 or E&ES197] OR EES199**

E&ES262 An Inspection of Human-Wildlife Interactions
Humans adore their animals, but only some types of animals. Do animals adore humans? Do all animals care about humans? While this class does not set out to specifically answer these questions, it will explore the complex relationship between humans and animals, in particular how humans view and approach wild animals. The class will take a historical view of humans and their interactions with wildlife and move through to the more modern tools and strategies used to better appreciate the value of wild animals in both terrestrial and marine settings. Through a series of lectures, data analysis sessions, and data collection exercises, the class will examine how humans perceive wild animals, in particular, and seek to understand how human wildlife-interactions scenarios may impact the survivability of both humans and wildlife alike. Students will analyze data on human-wildlife conflict, and develop projects aimed at understanding how people perceive various species of wild animals.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR EES 197 OR EES199**

E&ES270 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on

data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Crosslisting**
Grading: **A-F**

Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL242, BIOL542, E&ES570, ENVS242**
Prereq: **None**

E&ES271Z Mapping the Pandemic
The COVID-19 pandemic has altered the global community's daily relationship with space and movement, both at a hyperlocal scale of social distancing to a global scale of disease spread. Spatiotemporal visualizations in the form of maps and apps have allowed us to watch the worldwide spread of COVID-19 and keep tabs on local case counts in our own spaces. Geographic information systems (GIS) provide citizens, researchers, health care providers, and policy makers with a powerful analytical framework for visualization, data exploration, spatial pattern recognition, response planning, and decision making within our life in the time of COVID-19. This course is designed to develop spatial thinking and visualization skills relevant to COVID-19. Students will look at (and critically evaluate) existing maps and apps related to the current pandemic, create their own maps and apps, and critically evaluate their classmates' maps and apps. Class meetings will consist of case study lectures/discussions, instructor-led skill-building workshops, studio work sessions, and presentation/critique sessions. Spatial data collection, management, analysis, and visualization will occur within a cloud-based GIS (ArcGIS Online). Readings prior to the first class will establish a baseline for student comprehension of the breadth of applied geospatial thinking in today's research arena. The course is aimed at students with limited or no prior GIS experience.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **QAC232Z**
Prereq: **None**

E&ES274 Strategies in Conservation and Environmental Action
This course is only open to Wesleyan sophomores and above, with permission of instructor during pre-registration. This course provides students with a framework for better understanding how environmental policy, programs, and change goals are developed and actions are taken. Content will provide students with information from different disciplines in order to better understand the context, challenges, and intent of a specific environmental project to be addressed by the class over the course of the semester. The class project will have a land or material management focus and be developed with an environmental partner. Content topics may include logistics and impacts of various management systems; ecosystem function and landscape ecology; environmental policy and stakeholder dynamics; data collection and analysis; and communications and education. Project work will include research, meetings, and field work, including service work that contributes to short-term goals and tests protocol. Time required may vary by week. Class periods, assessments, and readings will be right-sized to facilitate this time commitment. Students will be assigned project tasks according to their major and skills. The class will collectively produce and present finished products to the environmental partner. Projects change with each semester and vary in emphasis and ecological vs. social components.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ENVS**
Identical With: **ENVS244**
Prereq: **None**

E&ES275 Remote Sensing for Natural Hazards
This course explores the role of remote sensing in monitoring and mitigating natural hazards. Students will learn how to acquire, process, and analyze remote sensing data, with a specific focus on both optical and radar satellite data. These technologies will be applied to assess the spatial extent, severity, and risk of natural hazards such as earthquakes, landslides, floods, hurricanes, wildfires, and volcanic activity. Emphasis will be placed on understanding how different types of remotely sensed data interact with various environmental features, such as landforms, vegetation, and water bodies. Through a combination of lectures, data analysis exercises, and practical applications, students will gain hands-on experience in using remote sensing tools to develop hazard models and response strategies. Case studies from recent natural disasters will be used to illustrate key concepts. Prior knowledge of GIS or geospatial analysis is recommended.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **ENVS258**
Prereq: **None**

E&ES280 Introduction to GIS
Geographical information systems (GIS) are powerful tools for organizing, analyzing, and displaying spatial data. GIS has applications in a wide variety of fields including the natural sciences, public policy, business, and the humanities; literally any field that uses spatially distributed information. In this course, we will explore the fundamentals of GIS with an emphasis on practical application of GIS to problems from a range of disciplines. The course will cover the basic theory of GIS, data collection and input, data management, spatial analysis, visualization, and map preparation. Coursework will include lectures, discussions, and hands-on activities.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES580, ENVS278**
Prereq: **None**

E&ES281 GIS Service-Learning Laboratory
This course supplements E&ES280 by providing students the opportunity to apply GIS concepts and skills to solve local problems in environmental sciences. Small groups of students will work closely with community groups to design a GIS, collect and analyze data, and draft a professional-quality report to the community.
Offering: **Host**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES581**
Prereq: **None**

E&ES282 Earthwatch: Satellite Data Storytelling for Science Communication
The fingerprint of human activity on planet Earth continues to magnify as we move deeper and deeper into the Anthropocene. Satellite remote sensing is a rapidly developing field for monitoring and visualizing planetary change in real time. Vast amounts of satellite data are now freely available for documenting, mapping, and communicating the impacts of natural and human disturbances on the Earth system. Students in this course will learn how to 1) analyze remotely sensed imagery using open-source software, 2) make high-quality maps documenting planetary change, and 3) communicate satellite data patterns to broad audiences using data storytelling. Students will master a wide range of techniques for detecting and articulating the stories behind satellite images and data sets through visual, oral, and written assignments aimed at diverse public audiences.
Offering: **Host**

E&ES283 Drones and Change
Civilian use of unoccupied aerial vehicles or drones to capture data and measure change can enhance our understanding of the natural and built environments. While drones are increasingly available for entry-level to professional level adoption, there remains value in understanding how the infrastructure for their development and deployment have evolved and what is required to ensure their continued safe and ethical utility of these devices. In this class, we will explore the legal and infrastructure elements of drone development and deployment for civilian utility of drones, while working on data collection, analysis, and interpretation that will allow students to better appreciate the value and utility of drones. Over the course of the semester, students will work on understanding and building drones, collecting data with small drones, examining the commercial versus open-source platforms for drones, and preparing to take the Federal Aviation Authority Part 107 license to allow them to fly drones safely.
Offering: **Host**
Grading: **A-F**

E&ES301 New England Geology
For more than a century, students and professionals interested in the geology of New England have gathered at the annual meeting of the New England Intercollegiate Geologic Conference (NEIGC), a weekend of field-based education. In this seminar, we will choose three NEIGC fieldtrips to attend, study the appropriate background material in preparation for the trips, and compile our own guide to the trips that summarizes the appropriate background material. The class will culminate in attendance at the annual NEIGC meeting on the weekend of October 12-14, 2018 in the Lake George region of Upstate New York and Vermont. At the end of this course, you will not only know a lot more about New England geology and have met many current and future field geologists, but you will also have learned to synthesize the literature to assess the current state of knowledge and evaluate how field studies can advance our understanding of regional geology and environmental issues.
Offering: **Host**

E&ES306 Ecology and Natural History of Freshwater Fishes of South America
South America has the highest diversity of freshwater fishes anywhere in the world. In fact, there are more than twice the number of mammals and about the same number of birds in the world. Why has this remarkable radiation occurred in a relatively short period of time? How can so many fishes coexist in the same rivers, utilizing the same resources? In this intensive course, we will travel to Colombia during spring break (March 7-21) in order to gain firsthand knowledge about the ecology and natural history of freshwater fishes in South America. We will learn about the ecological and environmental factors that contribute to perhaps the largest biological radiation on the planet.

Students will obtain firsthand experience with the South American tropics, freshwater fishes, and with doing experiments in the field. Each day there will be a combination of lectures and field or laboratory exercises. We will travel to and explore fish ecology in different types of rivers at different elevations. Students will gather and analyze data about biological, physical, and environmental issues that are covered in the lectures. The habitats that we explore will be both terrestrial and freshwater rivers. Our base will be at the Instituto Humboldt in Villa de Leyva, Colombia. We will interact with Colombian students who are studying ecology and biodiversity at the Institute in order to exchange ideas about current environmental issues.

All the costs of travel, lodging, and meals will be covered by the course.
Offering: **Crosslisting**

E&ES312 Global Change Biogeography
On our home planet, Earth, the current geologic epoch is characterized by rapid changes to the environment due to human behavior. Biogeography examines the spatiotemporal distribution of life on Earth, from species to ecosystems and from landscapes to continents. How is anthropogenic climate change modifying the distribution and function of organisms and ecosystems? What can we learn from the evolutionary history of the life-planet system that can help us understand the possible impacts of future climates on the biosphere? To address these questions rigorously, we will explore primary literature from a wide range of theoretical and empirical studies. The course emphasizes inquiry, contact with primary literature, discussion, statistical and spatial coding, learning to obtain data, and visualization. The beginning of the semester provides an overview of physical geography and the Earth System, with field and data experiences that build remote sensing and spatial analysis skills. The second half of the semester is focused on the exploration of relevant scientific literature based on student interests and recent papers, as well as independent research projects.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**

Identical With: **BIOL312, ENVS311**
Prereq: **None**

E&ES313 Petrogenesis of Igneous and Metamorphic Rocks
This course studies the occurrence and origin of volcanic, plutonic, and metamorphic rocks and how to read the record they contain. Topics will include the classification of igneous and metamorphic rocks, but emphasis will be on the geological, chemical, and physical processes taking place at and beneath volcanoes, in the Earth's mantle, and within active orogenic belts.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES513**
Prereq: **E&ES213 OR E&ES215**

E&ES314 Laboratory Study of Igneous and Metamorphic Rocks
This lab course focuses on the recognition and study of volcanic, plutonic, and metamorphic rocks in hand specimen and in thin section.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **(E&ES213 AND E&ES215)**

E&ES317 Volcanology
Volcanic eruptions, among the most impressive natural phenomena, have been described throughout history. In this course, we will look at the physical and chemical processes that control volcanic eruptions and their environmental impacts. We also examine the direct impact on humanity, ranging from destructive ashfalls to climate change, and the benefits of volcanoes for society (e.g., geothermal energy, ore deposits).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES517**
Prereq: **E&ES101 OR E&ES213 OR E&ES215**

E&ES319 Meteorites and Cosmochemistry
This course will focus on the materials in the world's collection of extraterrestrial samples and what they tell us about Earth, our nearest planetary neighbors, and the origin of our solar system. Planetary geochemical processes will be discussed through the examination of samples from comets, asteroids, Mars, the moon, Vesta, and Earth. Other topics covered will be impact cratering and the delivery of meteorites to Earth. Meteorites teach us about the earliest history of planet formation in this solar system, and we will compare this to what is observed in other solar systems. The course is intended for majors and graduate students in Wesleyan's Natural Science and Mathematics (NSM) division.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES519**
Prereq: **None**

E&ES320 Meteorites Laboratory
This will be the lab component of E&ES319 Meteorites and Cosmochemistry and must be taken concurrently. This class will be primarily hands-on learning using extraterrestrial materials and their terrestrial analogs.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES520**
Prereq: **None**

E&ES321 Planetary Evolution
Why are we the only planet in the solar system with oceans, plate tectonics, and life? This course examines how fundamental geologic processes operate under the unique conditions that exist on each planet. Emphasis is placed on the mechanisms that control the different evolutionary histories of the planets. Much of the course will utilize recent data from spacecraft. Readings of the primary literature will focus on planetary topics that constrain our understanding of geology as well as the history and fate of our home, the Earth.

E&ES325 Geologic Field Mapping
In this project-based service learning course students will learn to construct accurate large-scale (>1:24000) geologic maps (2D) and photo-realistic outcrop models (3D). They will apply these skills to make maps and models of local open-spaces to enhance recreational use and environmental education. The specific mapping technologies learned and applied will depend on the project and be determined in consultation with community partners. Methods may include GPS and/or total station surveying, structure from motion (photogrammetric) ranging, lidar data processing and analysis, drone imaging, and GIS synthesis. The instructor will introduce the theory and practice for each method used.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES201 OR E&ES213 OR E&ES215 OR E&ES220 OR E&ES223 OR E&ES230**

E&ES327 The Microbial Fossil Record
This course invites students to investigate the fossil record of microbial life to reveal the outsized impact microbes have on Earth and environmental systems. We will explore topics such as the origin of life, micropaleontology, marine biogeochemistry, biological oceanography, environmental microbiology, and astrobiology. This course will present students with the opportunity to engage with primary literature, write integrative narratives, and craft microbially inspired creative works.

Prereq: **None**

E&ES329 Fire Ecology and Management
Fire is a fundamental ecological disturbance process that regulates the structure and function of plant communities worldwide. However, increasing aridity under climate change and shifting human land use in recent centuries have altered fire behavior, imperiling many species. This course explores the ecological and social aspects of fire and sustainable fire management on planet Earth. Students examine shifting fire regimes over time, from indigenous use of fire prior to European colonization of the globe, to contemporary fire management. Class participants study the effects of global climate change on fire regimes and how such changes influence contemporary fire regimes and human livelihoods.
The course format consists of a mixture of lectures, field exercises, active class discussions, student presentations, and research papers.

Offering: **Crosslisting**
Grading: **A-F**

E&ES336 Global Change Biogeography
On our home planet, Earth, the current geologic epoch is characterized by rapid changes to the environment due to human behavior. Biogeography examines the spatiotemporal distribution of life on Earth, from species to ecosystems and from landscapes to continents. How is anthropogenic climate change modifying the distribution and function of organisms and ecosystems? What can we learn from the evolutionary history of the life-planet system that can help us understand the possible impacts of future climates on the biosphere? To address these questions rigorously, we will explore primary literature from a wide range of theoretical and empirical studies. The course emphasizes inquiry, contact with primary literature, discussion, statistical and spatial coding, learning to obtain data, and visualization. The beginning of the semester provides an overview of physical geography and the Earth System, with field and data experiences that build remote sensing and spatial analysis skills. The second half of the semester is focused on the exploration of relevant scientific literature based on student interests and recent papers, as well as independent research projects.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES342 Ecological Resilience: The Good, the Bad, and the Mindful
This course will examine the concepts of resilience, fragility, and adaptive cycles in the context of ecosystem and social-ecological-system (SES) structures. These concepts have been developed to explain abrupt and often surprising changes in complex ecosystems and SES that are prone to disturbances. We will also include nonhierarchical interactions among components of systems (termed panarchy) to compare the interactions and dependencies of ecological and human community systems. A systems approach will be applied to thinking about restoration ecology, community reconstruction, and adaptive management theory.

All of the terms--resilience, fragility, adaptation, restoration, reconstruction--are fraught with subjectivity and valuation. We will use mindfulness and meditation techniques (including breathing and yoga) to more objectively and dynamically engage in the subject matter, leaving behind prejudice or bias. Students will be expected to approach these techniques with an open mind and practice them throughout the semester. The objective is to provide students with a more comprehensive framework with which to gain deeper understanding and integration of the science with the social issues.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ENVS**
Identical With: **ENVS369, BIOL368**
Prereq: **[E&ES197 or BIOL197] OR [BIOL182 or MB&B182]**

E&ES350 Animals in Archaeology
This laboratory course will explore how zooarchaeological methods for analyzing animal bones and teeth excavated from archaeological sites allow us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and techniques, including hands-on sessions for the identification and quantification of faunal remains. By the end of the course, students will be able to identify every bone in the mammalian skeleton and distinguish between the bones of common non-mammalian taxa. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice.

Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-ARCP, SBS-ARCP**
Identical With: **ARCP350, ENVS348**
Prereq: **None**

E&ES359 Global Climate Change
The climate of the earth has been changing over the course of earth history. Over the last few decades, we have come to realize that humans may be the strongest driver of climate change in the 20th century and near future. In this class we evaluate that hypothesis in some depth, using the basic physical foundations of climate science with a focus on radiative principles. We study the details of the short carbon cycle and the empirical climate record of the last 1000 years, with data from the instrumental record, historical indicators, and physical (pollen, geochemical/isotopic temperature indicators) records. Besides the principles of fundamental climate science, we will deal with some of the results of climate change, mainly sea-level rise and feedbacks on the biosphere. We look at the impact of humans on atmospheric chemistry and how human civilization has caused changes in the carbon cycle, possibly as early as the transition period from hunter-gatherers to agricultural society. The final part of the lecture section is on future climate, using economic scenarios, mitigation and adaptation efforts, and climate/economics models. Parallel to the lectures, several experimental projects are done by groups of students: studies with our experimental "analog earth" climate model; monitoring CO2 in Middletown air for a semester; working with data from the Wesleyan weather station to calculate theoretical climate fluctuations; experimental work on the absorption of CO2 into water for the geochemically inclined; the impact of increased CO2 levels on plant growth for the biologically inclined; and a social-economic global assessment on carbon policies for the environmental studies types. In other years, students built solar ovens and a basic infrared spectrometer among projects.

Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES360 An Inspection of Human-Wildlife Interactions
Humans adore their animals, but only some types of animals. Do animals adore humans? Do all animals care about humans? While this class does not set out to specifically answer these questions, it will explore the complex relationship between humans and animals, in particular how humans view and approach wild animals. The class will take a historical view of humans and their interactions with wildlife and move through to the more modern tools and strategies used to better appreciate the value of wild animals in both terrestrial and marine settings. Through a series of lectures, data analysis sessions, and data collection exercises, the class will examine how humans perceive wild animals, in particular, and seek to understand how human wildlife-interactions scenarios may impact the survivability of both humans and wildlife alike. Students will analyze data on human-wildlife conflict, and develop projects aimed at understanding how people perceive various species of wild animals.

E&ES361 Living in a Polluted World
This course treats the occurrences and origins, natural pathways, toxicologies, and histories of the major environmental contaminants. We all know about lead and its effects on humans, but how about cadmium and hexachromium, or the many unpronounceable organic contaminants, usually referred to by some acronym (e.g., DDT, POPs)? We also deal with the larger topics of CO2/climate change, the environmental nitrogen-oxide balance, and eutrophication of coastal waters (the "dead zones"). To be effective in this course, students will need basic high school/college-level proficiency in chemistry and math as we will delve into aspects of geochemistry, geology, toxicology, environmental law, and some simple modeling. The class consists of lectures, one problem set, one Hg-in-hair class study, and a class project on lead in drinking water in the Middletown area. This is also a service-learning course, providing environmental outreach to the larger Middletown community on local pollution.

E&ES375 Modeling the Earth and Environment
Models can provide insights into Earth systems that are difficult to obtain by direct experimentation or observation. This course will introduce students to the process of translating Earth systems into idealized mathematical models, specific methods for solving the resulting equations, and implementation of models in MATLAB. We will explore cases from a range of topics in the earth and environmental sciences to gain a better appreciation of the insights models can offer. Students should have MATLAB installed on a laptop computer for in-class work.

Prereq: **MATH120 OR MATH121**

E&ES376 Mass Extinctions in the Oceans: Animal Origins to Anthropocene
Geoscientists are debating whether we are living in the Anthropocene, defined as a period during which humans are having a significant effect on atmospheric, geologic, hydrologic, and biospheric earth system processes. There is considerable discussion whether we are indeed affecting the biosphere to such an extent that life on Earth will suffer an extinction similar in magnitude to these that have occurred during earth history. Studies of the fossil record provide unique evidence that is used to evaluate the large extinctions of the past and compare them to ongoing extinction processes, extinctions rates and patterns, and magnitude. Organisms with hard skeletons are most easily and most abundantly preserved in the rock record. Many of these are invertebrates that lived in the oceans (e.g., clams, sea urchins, corals). In the first part of this course, students will become familiar with the nature of the fossil record, the most common marine animals in the fossil record, and their evolution and diversification. Lectures will be combined with studying fossils. In the second part of the course, possible causes for mass extinction will be considered, together with their specific effects on environments and biota, and these predicted effects will be compared to what has been observed. Potential causes include asteroid and comet impacts, large volcanic eruptions, "hypercanes," and "methane ocean eruptions," and more exotic processes. Students will present in class on these topics, and we will compare rates and magnitude of environmental change with severity and patterns of extinction.

Grading: **A-F**

Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **MATH120 OR MATH121**

E&ES395 Quantitative Chemical Analysis
Measurement and chemical analysis are at the very heart of the chemical sciences. Practicing chemists depend heavily on chemical analysis, as do medical professionals, environmental scientists, and many others. Quantitative chemical analysis is the science of determining "how much" -- as in, "how much toxic lead is in your drinking water?" In this course, you will first learn how to treat measured chemical data to extract meaningful information, and then we will proceed to study classical methods of chemical analysis, expanding upon your knowledge of general chemistry. A practical laboratory experience will reinforce the curriculum and build your skills as a chemist. This course is part of the required curriculum listed in the American Chemical Society Guidelines for Bachelor's Degree Programs, and this course is highly recommended for students who intend to pursue graduate studies and/or employment in a chemical discipline.
Offering: **Crosslisting**
Grading: **A-F**

Prereq: **(CHEM142 OR CHEM142Z OR CHEM144 OR CHEM145) AND (CHEM152 OR CHEM152Z)**

E&ES395L Quantitative Chemical Analysis Laboratory
This laboratory course is designed to accompany Quantitative Chemical Analysis (CHEM 317) and provides hands-on experience with the techniques and principles covered in the lecture. This course is a required component of CHEM 317, and only students concurrently enrolled in CHEM 317 may register for this course.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **None**
Identical With: **CHEM317L**
Prereq: **CHEM152**

E&ES396 Instrumental Analysis
Chemical analysis has kept pace with the advent of modern technology through the development of instruments capable of ever-improving levels of detection for both qualitative and quantitative analysis. Many students are exposed to the use and interpretation of these modern methods of chemical analysis, but this experience typically comes with little understanding of how and why these instruments work. This course will investigate instrumentation across three broad categories of analysis: electrochemical, spectrochemical, and separations. The lecture course will be supplemented with a practical laboratory experience. Instrumental analysis is part of the required curriculum listed in the American Chemical Society Guidelines for Bachelor's Degree Programs, and this course is highly recommended for students who intend to pursue graduate studies and/or employment in a chemical discipline.

E&ES399 Calderwood Seminar in Public Writing: Environmental Science Journalism
This is a seminar for science majors who want to develop skills in communicating science to non-scientists, by writing about environmental science topics. The course will concentrate on writing, public presentations and interviews. Students will read scholarly articles, interview scientists, and/or conduct independent research to write articles, essays and op-eds. Each week students will take alternating roles as writers and editors. The course is only open to science majors.

Grading: **OPT**

E&ES497 Senior Seminar
This seminar-style capstone course for E&ES seniors focuses on career-building and improving scientific research skills by completing an original research project. In groups, students will develop original, field-based research projects, write a proposal, and complete the project. The goal of the course is to help students transition to independent, professional scientists. This year's trip is to Puerto Rico in mid-January 2025 for approximately one week. The department will cover the costs of airfare, food, and lodging. Students need to be comfortable being outside for hours with moderate hiking. Participation in the trip and the spring course (E&ES 498) is required to receive credit. In contrast to previous years, the course is not required for the E&ES major, but still counts toward major requirements as an elective. This class requires the approval of the instructor (POI). To register for this class, please complete the Google Form that will be emailed to all current EES junior majors once pre-registration opens on April 2, 2024. POI decisions will be handled promptly.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES497A Introduction to Portuguese and the Azores (CLAC .25)
This course will be an introduction to Portuguese/Azorean history and geography. It will include an introduction to Portuguese pronunciation, greetings, basic expressions, food, weather, and vocabulary related to the geology and culture of the islands.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Identical With: **CGST497A**
Prereq: **E&ES497**

E&ES498 Senior Field Research Project
This course is a continuation of the E&ES 497 Senior Seminar and focuses on improving scientific research skills for E&ES Seniors. The class includes a research field trip to Puerto Rico in January 2025 and will conclude with student group presentations and reports before spring break in March.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Prereq: **E&ES497**

E&ES500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop before the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **None**

Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

E&ES502 Individual Tutorial, Graduate
Topic to be arranged in consultation with the tutor.
Offering: **Host**
Grading: **OPT**

E&ES503 Selected Topics, Graduate Sciences
Topic to be arranged in consultation with the tutor. A seminar primarily concerned with papers taken from current research publications designed for, and required of, graduate students.
Offering: **Host**
Grading: **OPT**

E&ES513 Petrogenesis of Igneous and Metamorphic Rocks
This course studies the occurrence and origin of volcanic, plutonic, and metamorphic rocks and how to read the record they contain. Topics will include the classification of igneous and metamorphic rocks, but emphasis will be on the geological, chemical, and physical processes taking place at and beneath volcanoes, in the Earth's mantle, and within active orogenic belts.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES313**
Prereq: **E&ES213 OR E&ES215**

E&ES517 Volcanology
Volcanic eruptions, among the most impressive natural phenomena, have been described throughout history. In this course, we will look at the physical and chemical processes that control volcanic eruptions and their environmental impacts. We also examine the direct impact on humanity, ranging from destructive ashfalls to climate change, and the benefits of volcanoes for society (e.g., geothermal energy, ore deposits).
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES317**
Prereq: **E&ES101 OR E&ES213 OR E&ES215**

E&ES518 E&ES Colloquium I
This course includes presentations by outside experts and discussion of material at the forefront of the discipline. The course is open to graduate students and undergraduate majors and potential majors. Attendance at all meetings required. Undergraduates may take this course up to four times for credit towards graduation.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

E&ES519 Meteorites and Cosmochemistry
This course will focus on the materials in the world's collection of extraterrestrial samples and what they tell us about Earth, our nearest planetary neighbors, and the origin of our solar system. Planetary geochemical processes will be discussed through the examination of samples from comets, asteroids, Mars, the moon, Vesta, and Earth. Other topics covered will be impact cratering and the delivery of meteorites to Earth. Meteorites teach us about the earliest history of planet formation in this solar system, and we will compare this to what is observed in other solar systems. The course is intended for majors and graduate students in Wesleyan's Natural Science and Mathematics (NSM) division.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES319**
Prereq: **None**

E&ES520 Meteorites Laboratory
This will be the lab component of E&ES319 Meteorites and Cosmochemistry and must be taken concurrently. This class will be primarily hands-on learning using extraterrestrial materials and their terrestrial analogs.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES320**
Prereq: **None**

E&ES521 Planetary Evolution
Why are we the only planet in the solar system with oceans, plate tectonics, and life? This course examines how fundamental geologic processes operate under the unique conditions that exist on each planet. Emphasis is placed on the mechanisms that control the different evolutionary histories of the planets. Much of the course will utilize recent data from spacecraft. Readings of the primary literature will focus on planetary topics that constrain our understanding of geology as well as the history and fate of our home, the Earth.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES321**
Prereq: **E&ES213 OR E&ES220 OR [E&ES223 or E&ES523] OR [E&ES250 or ENVS280]**

E&ES523 Structural Geology
Structural geology is the study of the physical evidence and processes of rock deformation, including jointing, faulting, folding, and flow. Geologic structures can be used to interpret tectonic history and understand physical process responsible for geologic hazards such as earthquakes, volcanoes, and landslides. Many structures also exert a primary control on fluid flow in the earth's crust and thus play an important role in determining the distribution of natural resources and environmental contaminants. In this course students will learn the theoretical foundations, observational techniques, and analytical methods used in modern structural geology. Case studies are drawn from local field work (see description of E&ES224) and published data sets from around the world.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES223**
Prereq: **E&ES101 OR EES199 OR E&ES115 OR [ENVS197 or BIOL197 or E&ES197]**

E&ES527 The Microbial Fossil Record
This course invites students to investigate the fossil record of microbial life to reveal the outsized impact microbes have on Earth and environmental systems. We will explore topics such as the origin of life, micropaleontology, marine biogeochemistry, biological oceanography, environmental microbiology, and astrobiology. This course will present students with the opportunity to engage with primary literature, write integrative narratives, and craft microbially inspired creative works.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES327, ENVS327**
Prereq: **None**

E&ES528 E&ES Colloquium II
This course includes presentations by outside experts and discussion of material at the forefront of the discipline. The course is open to graduate students and undergraduate majors and potential majors. Attendance at all meetings

required. Undergraduates may take this course up to four times for credit towards graduation.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**

E&ES542 Irrigation
Irrigation is the artificial application of water to support crop growth, playing a crucial role in ensuring sustainable agricultural production and global food security. This course provides students with a comprehensive understanding of irrigation techniques, systems, and management practices essential for optimizing water use efficiency and enhancing crop productivity. Students will explore various irrigation methods, including surface, sprinkler, and drip irrigation, analyzing their advantages, limitations, and suitability for different crops and environments. Key topics include soil-water relationships, crop water requirements, irrigation system components, irrigation scheduling techniques, and sustainable water management strategies. Through a combination of theoretical learning and hands-on activities, students will gain the skills needed to design, implement, and manage efficient irrigation systems.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES242, ENVS231**
Prereq: **E&ES101 OR E&ES115 OR E&ES197 OR BIOL197 OR ENVS197 OR EES199**

E&ES546 Hydrology
This course is an overview of the hydrologic cycle and man's impact on this fundamental resource. Topics include aspects of surface-water and ground-water hydrology as well as discussion about the scientific management of water resources. Students will become familiar with the basic concepts of hydrology and their application to problems of the environment.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES246, ENVS219**
Prereq: **E&ES101 OR E&ES115 OR E&ES197 OR BIOL197 OR ENVS197 OR EES199**

E&ES547 Environmental Biology Journal Club
Presentation and discussion of current research articles in the field of environmental biology.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL547**
Prereq: **BIOL182 OR E&ES197**

E&ES548 Environmental Biology Journal Club II
Presentation and discussion of current research articles in the field of environmental biology.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL548**
Prereq: **BIOL182 OR E&ES197**

E&ES549 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

E&ES550 Advanced Research Seminar, Graduate
Advanced research tutorial; project to be arranged in consultation with the tutor.

Offering: **Host**
Grading: **OPT**

E&ES555 Planetary Science Seminar
This course will examine topics and methods in the interdisciplinary field of planetary science. Students will join several faculty members in the planetary science group to discuss the origin, evolution, and habitability of planets in this and other solar systems. This class is intended for graduate students who are pursuing or who intend to pursue the planetary science concentration. Other graduate and undergraduate students may request admission to the course.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Identical With: **ASTR555**
Prereq: **None**

E&ES557 Research Discussion in Earth & Environmental Sciences
This course focuses on the specific research projects of individual graduate students in the E&ES department, and it comprises student presentations and discussion, including the department faculty and graduate students. The course offers a forum for presenting new results and exploring new ideas, as well as for providing researchers with feedback and suggestions for solving methodological problems. It also provides an opportunity for graduate students in the program to become familiar with the wide range of research taking place in the department. This course may be repeated for credit.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **None**
Prereq: **None**

E&ES558 Research in Progress in Earth & Environmental Sciences
This course focuses on the discussion of research projects, strategies and challenges between the department faculty, postdocs, graduate and undergraduate students. The course offers a forum for presenting new results and exploring new directions, as well as for providing researchers with

collaborative feedback and suggestions for solving methodological and analytical problems. It also provides an opportunity for students in the program to become familiar with the wide range of research taking place in the department. This course may be repeated for credit.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**
Gen Ed Area: **NSM-EES**
Prereq: **None**

E&ES560 Oceans and Climate
Earth's climate is not static. Even without human intervention, the climate has changed, but mostly at a slower rate. In this course we will study the major properties of the ocean and its circulation and changes in climate during the Cenozoic Era (the past 66 million years). We will examine the effects of variations in greenhouse gas concentrations, the locations of continents, and the circulation patterns of oceans and atmosphere. Once a basic understanding of the climate system is attained, the focus will be on how we know about past climates. Through reading and in-class exercises students will look at data from sediment cores, ice cores, and tree rings to learn about past climates. The final project will investigate measures humans can take to slow the rate of climate change. It is possible and must be done. Although this course is offered pass/fail, participants are expected to maintain a grade of B- or better to pass.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES260, ENVS290**
Prereq: **E&ES101 OR E&ES115 OR E&ES155 OR E&ES197**

E&ES568 Isotope Geochemistry
This class introduces the theory and application of the main radiogenic (Rb-Sr, Sm-Nd, U-Th-Pb, and K-Ar) and stable (O, H, C, N, S) isotopic techniques used in environmental geochemistry and geology. Applications include geochronology, earth evolution, provenance, biogeochemical cycles, paleoenvironments, paleoclimate, hydrology, paleontology, ecology, and archaeology.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES368**
Prereq: **None**

E&ES570 Quantitative Methods for the Biological and Environmental Sciences
This course offers an applied approach to statistics used in the biological, environmental, and earth sciences. Statistics will be taught from a geometric perspective so that students can more easily understand the derivations of formulae. We will learn about deduction and hypothesis testing as well as the assumptions that methods make and how violations affect applied outcomes. Emphasis will be on analysis of data, and there will be many problem sets to solve to help students become fluent with the methods. The course will focus on data and methods for continuous variables. In addition to basic statistics, we will cover regression, ANOVA, and contingency tables.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL242, BIOL542, E&ES270, ENVS242**
Prereq: **None**

E&ES575 Modeling the Earth and Environment
Models can provide insights into Earth systems that are difficult to obtain by direct experimentation or observation. This course will introduce students to the process of translating Earth systems into idealized mathematical models, specific methods for solving the resulting equations, and implementation of models in MATLAB. We will explore cases from a range of topics in the earth and environmental sciences to gain a better appreciation of the insights models can offer. Students should have MATLAB installed on a laptop computer for in-class work.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES375, IDEA375**
Prereq: **MATH120 OR MATH121**

E&ES580 Introduction to GIS
Geographical information systems (GIS) are powerful tools for organizing, analyzing, and displaying spatial data. GIS has applications in a wide variety of fields including the natural sciences, public policy, business, and the humanities; literally any field that uses spatially distributed information. In this course, we will explore the fundamentals of GIS with an emphasis on practical application of GIS to problems from a range of disciplines. The course will cover the basic theory of GIS, data collection and input, data management, spatial analysis, visualization, and map preparation. Coursework will include lectures, discussions, and hands-on activities.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES280, ENVS278**
Prereq: **None**

E&ES581 GIS Service-Learning Laboratory
This course supplements E&ES280 by providing students the opportunity to apply GIS concepts and skills to solve local problems in environmental sciences. Small groups of students will work closely with community groups to design a GIS, collect and analyze data, and draft a professional-quality report to the community.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES281**
Prereq: **None**

E&ES585 Remote Sensing
This course studies the acquisition, processing, and interpretation of remotely sensed images and their application to geologic and environmental problems. Emphasis is on understanding the composition and evolution of the Earth and planetary surfaces using a variety of remote-sensing techniques. This course will discuss the theory and technology behind a number of remote sensing platforms and how data at different wavelengths interacts with rocks, soils, water and vegetation.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-EES**
Identical With: **E&ES385**
Prereq: **[E&ES234 or BIOL233 or ENVS233] OR E&ES213 OR E&ES220 OR [E&ES223 or E&ES523] OR [E&ES250 or ENVS280] OR [E&ES260 or ENVS290 or E&ES560] OR E&ES215**

EARTH AND ENVIRONMENTAL SCIENCES MAJOR

MAJOR DESCRIPTION

The Major in Earth and Environmental Sciences (E&ES) provides students with a broad base of knowledge of the natural world. Topics of study range from planetary evolution to climate change to ecosystem conservation. Courses in geology, environmental science, environmental chemistry, ecology, and how the Earth's spheres—geosphere, hydrosphere, atmosphere, biosphere—interact with each other prepare students to choose their own areas of specialization. E&ES majors work with faculty on research projects that range from research into past climates using terrestrial and ocean proxies to the geological makeup of the planet Venus, and from nearby coastal areas to faraway lagoons. The major culminates in a capstone course where students perform independent research in the field.

Students drawn to this major may have a passion for environmental awareness and responsibility, understanding natural systems, or an orientation toward problem-solving. They may enjoy spending time in nature doing fieldwork as well as working in the lab and communicating complex concepts to diverse audiences.

Earth and Environmental Sciences majors are equipped with the knowledge and skills to decipher the structure, composition, and dynamics of the Earth system, conduct research, analyze data, evaluate scientific claims, and communicate their findings. They are well prepared to pursue advanced post-graduate opportunities or various careers in fields like education, environmental consulting, conservation science, planetary science, sustainability, urban planning, renewable energy, and climate analysis.

ADMISSION TO THE MAJOR

GATEWAY COURSES FOR THE MAJOR

To declare E&ES as a major, students are required to have completed an E&ES gateway course (E&ES101, E&ES115, E&ES155, E&ES197), and to have completed (or be currently taking) two gateway courses (or higher) in biology, chemistry, mathematics, or physics.

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES197	Introduction to Environmental Studies	1

SOPHOMORE SEMINAR

Code	Title	Hours
E&ES195	Sophomore Field Course	0.5

MAJOR REQUIREMENTS

The Department of E&ES does not require completion of Wesleyan's General Education Requirements to complete the major. Honors students are required to complete Wesleyan's General Education Requirements through stage II.

The following is a list of required courses for the major (**14 credits total)**:

Code	Title	Hours
E&ES Gateway Course		
E&ES101	Dynamic Earth!	1.25
or E&ES115	Introduction to Planetary Geology	
or E&ES155	Earth System Science	
or E&ES197	Introduction to Environmental Studies	
Natural Science Courses & Mathematics *		
BIOL181 & BIOL182	Principles of Biology I: Cell Biology and Molecular Basis of Heredity and Principles of Biology II	4
or CHEM145	Honors General Chemistry	
or PHYS111 & PHYS112	Introductory Physics I and Introductory Physics II	
or PHYS113 & PHYS116	General Physics I and General Physics II	
or MATH121 & MATH122	Calculus I and Calculus II	
Upper-Level Requirements **		**7**
E&ES195	Sophomore Field Course ***	.5
E&ES497	Senior Seminar #	1

* E&ES majors are required to take one year (two semesters) of gateway courses from two of these disciplines for a total of four courses.

**Students must complete seven upper-level courses and senior seminar/capstone.

***This course is typically taken during the spring semester of the sophomore year.

\# This course is typically taken during the senior year.

We require a capstone experience in EES. The options are:

--Senior Seminar (EES 497 and 498) OR

--Senior Thesis (EES 409 and 410) OR

--Two full credits of Advanced Research Tutorial with the same faculty member (EES 423 and 424) in senior year OR

--Capstones with significant EES components in other majors (by petition)

NATURAL SCIENCE COURSES

Upper-level courses in these disciplines can be substituted, as can statistics courses for mathematics. Students are urged to complete these introductory courses within their first two years. Students considering professional work in the sciences are encouraged to take gateways in more than two disciplines, including any associated lab courses, as well as upper-level coursework in other natural science and mathematics disciplines.

UPPER-LEVEL ELECTIVES

Students must complete seven upper-level courses. Five of these courses must cover the following thematic areas: two from "Earth and Planets" (numbered 201-233 and 301-333), two from "Hydrosphere, Biosphere, and Atmosphere" (numbered 234-266 and 334-366), and one from

"Methods" (numbered 267-299 and 367-399). Lab courses associated with the primary courses are required. The remaining two courses may come from any thematic area. Also, the following can be used: up to two upper-level natural science or math courses taken in other departments, and up to two pre-approved courses from study-abroad programs. At least four of the upper-level courses must be Wesleyan E&ES courses. Tutorials and the senior thesis do not count towards the requirement.

THEMATIC AREAS

EARTH AND PLANET COURSES

Code	Title	Hours
E&ES201	Geology of Connecticut	1
E&ES205	The Shaping of a Landscape: Exploring the Geology of Western North America	1.5
E&ES215 & E&ES216	Earth Materials and Earth Materials Laboratory	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES230 & E&ES231	Sedimentology and Sedimentology Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES319 & E&ES320	Meteorites and Cosmochemistry and Meteorites Laboratory	1.5
E&ES321	Planetary Evolution	1
E&ES325	Geologic Field Mapping	1
E&ES327	The Microbial Fossil Record	1

ECOSYSTEM AND ENVIRONMENT COURSES

Code	Title	Hours
E&ES234 & E&ES235	Geobiology and Geobiology Laboratory	1.5
E&ES238	The Forest Ecosystem	1
E&ES240		1
E&ES242	Irrigation	1
E&ES244 & E&ES245	Soils and Soils Laboratory	1.5
E&ES246	Hydrology	1
E&ES250 & E&ES251	Environmental Geochemistry and Environmental Geochemistry Laboratory	1.5
E&ES257	Environmental Archaeology	1
E&ES258	Community Paleoecology	1
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES312	Global Change Biogeography	1
E&ES327	The Microbial Fossil Record	1
E&ES329	Fire Ecology and Management	1
E&ES342	Ecological Resilience: The Good, the Bad, and the Mindful	1.25
E&ES350	Animals in Archaeology	1

METHOD COURSES

Code	Title	Hours
E&ES270	Quantitative Methods for the Biological and Environmental Sciences	1
E&ES275	Remote Sensing for Natural Hazards	1
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES368	Isotope Geochemistry	1
E&ES375	Modeling the Earth and Environment	1
E&ES380	Advanced GIS and Spatial Analyses	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5
E&ES399	Calderwood Seminar in Public Writing: Environmental Science Journalism	1
E&ES568	Isotope Geochemistry	1

CAREER OPTIONS AND THE E&ES MAJOR

Earth and environmental sciences majors go on to pursue a wide range of careers, limited only by their own imaginations. **E&ES** courses can be selected to help prepare for a student's long-term interests. The course listings below are not requirements, but suggested guidelines. Students interested in academic or research careers should consider involvement in research or producing a senior thesis.

Geology. These courses can help prepare students for academic careers or jobs in industry or government in natural resource or geohazard management (e.g., USGS, water resources, mining and energy industries).

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES201	Geology of Connecticut	1
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES230 & E&ES231	Sedimentology and Sedimentology Laboratory	1.5
E&ES246	Hydrology	1
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES321	Planetary Evolution	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5
E&ES497	Senior Seminar	1

Environmental Science/Environmental Chemistry. These courses can help prepare students for jobs in consulting, government, or nonprofit organizations (e.g., EPA, NOAA, USGS, state agencies), or for academic careers in climate science and water resources.

Code	Title	Hours
E&ES155	Earth System Science	1.25
E&ES197	Introduction to Environmental Studies	1
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES234 & E&ES235	Geobiology and Geobiology Laboratory	1.5
E&ES244 & E&ES245	Soils and Soils Laboratory	1.5
E&ES248	Environmental Investigation and Remediation	1
E&ES250 & E&ES251	Environmental Geochemistry and Environmental Geochemistry Laboratory	1.5
E&ES260 & E&ES261	Oceans and Climate and Techniques in Ocean and Climate Investigations	1.5
E&ES270	Quantitative Methods for the Biological and Environmental Sciences	1
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES380		1
E&ES368	Isotope Geochemistry	1
E&ES497	Senior Seminar	1
BIOL216	Ecology	1

Planetary Geology. These courses can help prepare students for jobs in government and industry (e.g., NASA, remote sensing, and GIS contractors) or for academic careers in space science and remote sensing.

Code	Title	Hours
E&ES101	Dynamic Earth!	1.25
E&ES115	Introduction to Planetary Geology	1
E&ES155	Earth System Science	1.25
E&ES213 & E&ES214	Mineralogy and Laboratory Study of Minerals	1.5
E&ES220 & E&ES221	Geomorphology and Geomorphology Laboratory	1.5
E&ES223 & E&ES224	Structural Geology and Field Geology	1.5
E&ES280 & E&ES281	Introduction to GIS and GIS Service-Learning Laboratory	1.5
E&ES313 & E&ES314	Petrogenesis of Igneous and Metamorphic Rocks and Laboratory Study of Igneous and Metamorphic Rocks	1.5
E&ES321	Planetary Evolution	1
E&ES385 & E&ES386	Remote Sensing and Remote-Sensing Laboratory	1.5

GENERAL EDUCATION

Candidates for honors in E&ES are required to complete the University's General Education Expectations through stage II.

STUDENT LEARNING GOALS

Students graduating with a BA degree in Earth and environmental sciences should be able to:

- **Decipher the structure, composition, and dynamics of the Earth system.** The student should understand the structure and composition of Earth's spheres (geosphere, hydrosphere, atmosphere, biosphere), and how these spheres interact with one another and change over time.
- **Apply the scientific method.** The student should be able to develop and test scientific hypotheses.
- **Understand data.** The student should understand how earth and environmental sciences data are produced, interpreted, and applied.
- **Apply quantitative tools.** The student should be able to select and apply appropriate quantitative techniques to Earth and environmental sciences questions (e.g., calculus, statistics, spatial analysis).
- **Use the primary literature.** The student should be able to search for and understand publications from the primary scientific literature.
- **Critically evaluate scientific claims.** The student should be able to critique arguments made in the Earth and environmental sciences literature.
- **Communicate.** The student should be able to present Earth and environmental sciences data and their interpretation in a variety of written, visual, and oral formats.
- **Conduct research.** The student should be able to carry out an original research project, including: the identification of a research problem; the formulation of a hypothesis; the design of the methodology; the collection, processing, and interpretation of data; and the presentation of findings in written, visual, and oral formats.

RELATED PROGRAMS OR CERTIFICATES

- **The College of the Environment,** which includes the environmental studies-linked major and Environmental Studies Certificate, provides a linkage between the sciences, public policy, economics, and the arts and provides a wide variety of career options.
- **The Planetary Science Group and the Planetary Science Course Cluster** seek to understand the origin and evolution of the solar system in which we live and the other solar systems that we have identified in our galaxy.
- **The Service-Learning Center and Service-Learning Course Cluster** seek to broaden students' understanding of course content through activities that are, at the same time, of service to the community.

BA/MA PROGRAM

Wesleyan offers a BA/MA program for exceptional Wesleyan students. The E&ES Department requirements for the BA/MA degree are the same as those of the MA degree outlined above, however please note the expectations for BA/MA students in the timeline.

For details about the BA/MA program see: https://www.wesleyan.edu/grad/graduate-programs/bama_program.html

For additional information, please visit wesleyan.edu/ees/graduate (https://wesleyan.edu/ees/graduate)

HONORS

Candidates for honors in E&ES are required to complete the University's General Education Expectations through stage II.

CAPSTONE EXPERIENCE

Code	Title	Hours
E&ES409	Senior Thesis Tutorial	1
E&ES410	Senior Thesis Tutorial	1
E&ES497	Senior Seminar	1
E&ES498	Senior Field Research Project	.5

MASTER OF ARTS IN EARTH AND ENVIRONMENTAL SCIENCES

The Earth and Environmental Sciences Department (E&ES) at Wesleyan University covers many aspects of the natural world, on Earth and on other planets. Course topics range from active volcanoes to climate change to eco-conservation.

The Department of Earth and Environmental Sciences offers a program leading to the degree of Master of Arts in Earth and Environmental Sciences. This program is designed for students who desire further training prior to initiation of a doctoral program at another university or for whom the master's degree will be the terminal degree. Wesleyan also offers a BA/MA program for exceptional undergraduate students. Graduate students are offered a unique opportunity for accelerated and personal instruction in a small department setting with strengths in geology, paleoclimate, ocean sciences, planetary science, and environmental science. MA or BA/MA students may elect a course of study resulting in the planetary science concentration.

MA candidates typically take six upper-level science or math course credits and two MA thesis research credits. All students are expected to enroll in a graduate pedagogy course in the first semester of enrollment and the Research Discussion in Earth and Environmental Sciences course. Conducting original research is an important component of graduate studies. Students should identify a project and advisor in the course of their first semester so that they can start their research as soon as possible. The E&ES Department requirements for the BA/MA degree are the same as those for the MA degree.

All admitted MA students are offered a full tuition waiver, stipend, and benefits for this two-year program. Graduate students are typically offered one 9-month and one 12-month stipend. Teaching assistants are assigned specific duties by their supervising faculty. Duties may include supervising laboratories, assisting the faculty in lecture preparation, providing help sessions, and grading.

To complete their MA degree, students will submit a written thesis describing their research, give a public oral presentation and defend the results before the faculty.

COURSES

Students typically take six upper-level science or math course credits (of which at least four must be in E&ES) and two MA thesis research credits (E&ES549 and E&ES550). Based on a student's background and research interests, the thesis committee will decide on the program of study, which may include increasing or decreasing the number of required courses. Students who enter the MA program with greater than eight upper-level science or math courses (the minimum necessary for a Wesleyan E&ES BA) may use those courses in place of Wesleyan MA credits. Students must earn a minimum of six credits (including the two MA thesis research credits) at Wesleyan. All students are expected to enroll in a graduate pedagogy course in the first semester of enrollment and E&ES557, Research Discussion in Earth and Environmental Sciences, each semester it is offered.

Full-time graduate students are expected to complete all courses with a grade of B- or better. Failure to achieve these minimal expectations may result in dismissal from the program. All degree-seeking graduate students are required to register for at least one credit in each semester that they are enrolled in the university.

LANGUAGE REQUIREMENT

There is no language requirement for the MA in Earth and Environmental Sciences.

PROGRESS AND QUALIFYING EXAMS

Qualifying Exam. Competence in general knowledge about the Earth and environmental sciences will be assessed by a written examination taken after the end of the second semester. The thesis advisor, in concert with the E&ES faculty, will construct several questions. The student will then have two days to answer these questions. The student can use any written source for guidance ("open book" format), and each answer should not exceed one page (single-spaced). The committee and any interested E&ES faculty will then meet with the student to have a 30-minute conversation about the questions and answers. Based on the outcome of the exam, the committee may suggest coursework or independent study on particular topics.

TEACHING

FUNDING

Upon admission, graduate students are typically offered one 9-month and one 12-month stipend. The terms of the teaching stipend require that the student devote approximately 10 hours per week on departmental responsibilities, such as driving the departmental vans, assisting in laboratory maintenance, or teaching assistantships. Teaching assistants are assigned specific duties by their supervising faculty. Duties may include the supervision of laboratories, assisting the faculty in lecture preparation, providing help sessions, and grading.

Instructional holidays and university breaks apply to academic course meetings, but not necessarily to research. Be aware that the faculty uses much of these breaks to perform research as they have other commitments during the academic year. As a student's research often involves close collaboration with the faculty, graduate students will commonly devote university breaks to research. Students' vacations should be planned with the faculty advisor to ensure continuity of research.

Graduate students are expected to fully participate in the scholarly activities in the department, including teaching opportunities, attending departmental seminars, and presenting their own work to the Wesleyan and scientific communities.

PRACTICAL INFORMATION

Graduate Office. Each student has access to the shared graduate student office (SC 307). A telephone is available there for local calls. Some students may have their desk in one of the laboratories, depending on their research topic.

RESEARCH

Conducting original research is an important component of graduate studies. Upon arrival, students are expected to discuss their research interests with the E&ES faculty. Students should identify a project and advisor in the course of their first semester so that they can start their research as soon as possible. Students must realize that they will spend much of their time on the chosen research project, so they should ensure that the topic indeed represents their interests.

Areas of faculty specialization (also check faculty webpages):

- Raquel Bryant (starting Fall 2022): Ancient earth-ocean interactions, paleoceanography and paleoenvironmental reconstructions, quantitative paleoecology, and marine micropaleontology
- Barry Chernoff: Systematics and biogeography of freshwater fishes of Latin America; morphological evolution; conservation of aquatic ecosystems
- Kim Diver: Island biogeography, Geographic Information Systems (GIS)
- Martha S. Gilmore: Planetary geomorphology; remote sensing of Mars, Venus, southwest U.S., and Long Island Sound
- James Greenwood: Cosmochemistry, hydrogen, oxygen and sulfur isotopic systematics of lunar rocks, chondrites and martian meteorites, Mars analogue studies in St. Lucia
- Tim Ku: Aqueous geochemistry; isotope geochemistry; the biogeochemistry of marine and terrestrial sediments of the tropics (Panama, St. Lucia) and North America
- Suzanne O'Connell: Sedimentology; marine geology, paleoceanography/ climate change, continental margin sedimentology in the North Atlantic and Southern Oceans
- Helen Poulos: Forest and fire ecology, plant ecophysiology, forest disturbance dynamics
- Phil Resor: Structural geology and crustal deformation, Geographic Information Systems (GIS)
- Dana Royer: Terrestrial paleoclimatology and paleoecology, paleobotany, carbon cycle, plant physiology

MA or BA/MA students in the natural sciences and mathematics may elect a course of study resulting in the planetary science concentration. Details may be found here: http://www.wesleyan.edu/planetary/Graduate.html.

THESIS AND DEFENSE

Thesis Proposal

Upon admission to the program, the student will meet with the E&ES Graduate Program committee to discuss the general requirements and goals of graduate study. Students should select an advisor, thesis topic, and thesis committee by the end of the first semester. After students have made a choice of faculty advisor and thesis committee, they must, in cooperation with the advisor, write a 1-2 page thesis proposal, in which they provide an outline of the proposed research. The thesis committee will read the proposal, and discuss it with the student before acceptance of the research project.

Meetings with the Thesis Committee

At the beginning of each semester, and at the beginning of the summer, each graduate student will be asked to prepare a written summary (2-3 pages) of his or her progress and accomplishments and meet with their thesis committee. This summary will be reviewed by the thesis committee and used to discuss and evaluate the student's progress; failure to make adequate progress can be grounds for dismissal from the program. The discussion of the committee will be summarized by the student's advisor and relayed to the student in writing. Typical topics of discussion by the committee include:

1. Review of objectives and status of research and plans for future work.
2. Review of performance in course work taken. Outline of courses planned for the future, and their relationship to research and career goals.
3. Review of other accomplishments (i.e., department assistance, teaching).
4. General progress and comfort in the program.

In addition to a written statement of progress, the student is required during the 3rd semester to deliver an oral presentation about their research to the department (typically as part of EES 557). The purpose of this exercise is to give the student an opportunity to organize and present their work in a semi-formal setting and receive direct feedback.

An ideal timeline of student responsibilities is:

Beginning of first semester: Orientation meeting with E&ES graduate program committee.

Beginning of second semester (BA/MA last semester of senior year): Identification of and meeting with advisor and thesis committee. Submission of thesis proposal.

End of second semester/Beginning of summer: Written statement of progress/ meeting with thesis committee.

Early Summer: Qualifying exam.

End of Summer/Beginning of third semester: Written statement of progress/ meeting with thesis committee.

Early third semester (BA/MA first semester MA year): Oral presentation of results to date.

Beginning of fourth semester (BA/MA last semester MA year): Written statement of progress/meeting with thesis committee.

End of program: Thesis and Defense.

Thesis and Defense

Competence in research will be assessed by a written thesis and an oral presentation of research results before the faculty. The format of the written work is to be discussed and agreed upon with the student's advisor and committee.

The advisor and thesis committee in consultation with the student will agree upon the schedule of the defense. All members of the thesis committee must have read and must approve, in writing, a complete thesis before a defense can be scheduled. Practically, this requires that a thesis draft, already vetted by the advisor, be made available to the remainder of the thesis committee at least one month before any proposed defense date. Once the committee has agreed that the thesis is ready to defend, the form for scheduling the defense can be obtained from the E&ES department.

There are three readers on a thesis, including the thesis advisor. The thesis advisor gives the research grade; the two readers determine the quality of work with an emphasis on the thesis as a written document. One reader from outside Wesleyan University or from another department within Wesleyan University is allowed. The defense is attended by the readers plus other members of the E&ES faculty.

The oral defense typically consists of:

- A 30-minute presentation of the research results by the student.
- A 30-minute question and answer period about the thesis.

Directly after the defense the faculty meets to decide whether to award the Master of Arts degree.

Please consult Wesleyan's Office of Graduate Student Services.

Graduation Requirements for the MA https://www.wesleyan.edu/grad/academics/graduationrequirementsma.html for information about the format of the thesis, scheduling of the defense, exit appointments and due dates for participating in Commencement.The student is responsible for following all University requirements.

CONCENTRATIONS

Planetary science is an emerging interdisciplinary field at the intersection of geology and astronomy with substantial contributions from physics, chemistry, and biology. The subject matter is planets, including those around other stars (exosolar systems). The science questions include the most important of our times: How do planets (including Earth) form? How common are they in the universe? What is their range of properties and how do they evolve? Is there or was there ever life on other planets? Certainly, the discovery of even microbial life beyond Earth would rank as one of the greatest human achievements of all time, and this quest lies squarely within the purview of planetary science.

Program of Study. MA or BA/MA students in the natural sciences and mathematics may elect a course of study resulting in the planetary science concentration. The concentration is designed to engage students in the research results, skills, and methods of planetary science. The planetary science concentration requires:

- **Completion of a minimum of four courses from the list below with a grade of B- of better.** At least one of these courses must be from a department outside the student's home department.
- **Students are also required to attend the Planetary Science Seminar,** ASTR555/E&ES555.
- **All students must complete a written thesis on a topic relevant to planetary science.** A member of the student's thesis committee will be from the planetary science concentration committee. The planetary science concentration will be designated on the student's transcript upon the successful completion of this program of study and MA requirements of the student's home department. For more information, please contact the any of the members of the planetary science concentration committee or the graduate school.

Planetary Science Concentration Committee: Martha Gilmore, *Earth and Environmental Sciences;* James Greenwood, *Earth and Environmental Sciences;* William Herbst, *Astronomy;* Meredith Hughes, *Astronomy;* Seth Redfield, *Astronomy*

PLANETARY SCIENCE COURSES

Code	Title	Hours
Planetary Science Courses		
Select at least 4 of the following (one from outside the home department):		4
ASTR524	Exoplanets: Formation, Detection, and Characterization	
ASTR531	Stellar Structure and Evolution	
ASTR532	Galaxies, Quasars, and Cosmology	
BIOL214	MacroEvolution, Pattern and Process	
BIOL231	Microbiology	
CHEM337 & CHEM338	Physical Chemistry I and Physical Chemistry II	
CHEM361	Advanced Inorganic Chemistry	
CHEM383	Biochemistry	
E&ES513	Petrogenesis of Igneous and Metamorphic Rocks	
E&ES517	Volcanology	
E&ES519	Meteorites and Cosmochemistry	
E&ES521	Planetary Evolution	
E&ES575	Modeling the Earth and Environment	
E&ES580	Introduction to GIS	
PHYS213	Waves and Oscillations	
MATH AND COMP courses as appropriate in consultation with advisor		
Seminar		
ASTR/E&ES555	Planetary Science Seminar (offered each semester; take a minimum of three semesters)	0.75
Thesis		
The MA degree program requires a thesis that demonstrates the student's ability to perform original, independent research in planetary science. The specific guidelines for the thesis are those of the student's home department.		

ADDITIONAL INFORMATION

THE BA/MA PROGRAM

Wesleyan offers a BA/MA program for exceptional Wesleyan students. The E&ES Department requirements for the BA/MA degree are the same as those of the MA degree outlined above, however please note the expectations for BA/MA students in the timeline.

For details about the BA/MA program see: https://www.wesleyan.edu/grad/graduate-programs/bama_program.html

For additional information, please visit wesleyan.edu/ees/graduate (https://wesleyan.edu/ees/graduate)

ECONOMICS

Economics involves the study of social relationships pertaining to the production and allocation of the means of life. One branch, macroeconomics, addresses issues relating to the performance of the economy as a whole, such as economic growth, unemployment, and inflation, while the other, microeconomics, studies the relationships that make up an economy, addressing problems of income and wealth inequality, corporate power, industrial performance and global trade, and financial flows. Students majoring in economics find that they acquire an excellent preparation for careers in academics, business, consulting, law, or government.

AFFILIATED FACULTY

DEPARTMENTAL ADVISING EXPERT

Christiaan Hogendorn

- Undergraduate Economics Major (p. 1064)
- Undergraduate Economics Minor (p. 1122)

ECON101 Introduction to Economics
A general introduction to the principles of economic analysis and their implications for public policy, covering concepts and issues in both microeconomics (concerning the function and performance of individual markets, organizations, or institutions) and macroeconomics (concerning the function and performance of the economy as a whole). This course is intended primarily for students without significant prior study in the discipline, and it satisfies the prerequisites for most 200-level economics electives.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON102 Mathematical Tools for Economic Analysis
This course will cover the basic mathematical tools students will need to understand and apply in ECON 110, the gateway introductory course for the economics major. Topics covered include basic arithmetic and algebraic calculations; analysis of functions, including the properties of specific functional forms; graphing of single-variable functions; basic single-variable differentiation and integration; and optimization of univariate functions. This course is not recommended for students who have taken two or more semesters of calculus or who have placed out of MATH 121
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON103 Introduction to Probability and Statistics for Economic Analysis
This course studies the mathematical concepts of probability and statistics as needed for ECON 300 and upper-level economics electives. Topics include sampling, descriptive statistics, probability distributions, estimation, and hypothesis testing. Students who received a 4 or 5 on the AP Statistics exam or have completed a course equivalent to MATH 132 or 231 are not allowed to take this course.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON108F Race, Ethnicity, and Economic Disparity (FYS)
This seminar explores the following questions: (1) How do economists explain economic disparity by race, ethnicity, and gender? (2) What policies follow from those explanations? The course devotes particular attention to the interplay among market forces, institutional structures, and the social constructs of race. Market outcomes by ethnicity, gender, and gender identity form another central line of inquiry. In the process of studying these topics, students investigate markets for labor, housing, and financial assets. Students will learn economists' methods for analyzing these markets. The seminar includes a strong writing component with assignments that emphasize writing for the social sciences. While exploring approaches used by economists, the seminar also introduces students to central debates within the discipline.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON110 Introduction to Economic Theory
An introduction to the principles of micro- and macroeconomic theory, this course is intended for prospective majors and students wishing to prepare themselves for a broad range of upper-level elective courses in economics. Mathematical tools essential for further study in economics are introduced throughout the course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **MATH120 OR MATH121 OR MATH122 OR MATH221 OR ECON102**

ECON124F Political Economy (FYS)
Economic and political processes are intertwined in that political institutions have an impact on economic outcomes and vice versa. This course is a survey of some of the important topics in political economy. Some of the questions that will be addressed with the help of country-studies are: Do democratic institutions and greater political freedom result in higher economic growth? Is the size of

government determined by political decentralization and federalism? What is the role played by the different constituents in shaping societies' economic priorities? Do interest groups weigh economic outcomes in their favor?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON127 Introduction to Financial Accounting
In this course, no prior accounting knowledge is required or assumed. Students learn how accountants define assets, liabilities, revenues, and expenses and where those items appear in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting choices allowed to firms for reporting to stockholders and creditors and learn how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Later assignments focus on ratio analysis of actual firms' financial statements, including techniques to identify firms in financial trouble.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Identical With: **CSPL127**
Prereq: **ECON101 OR ECON110**

ECON127Z Introduction to Financial Accounting
In this course, no prior accounting knowledge is required or assumed. Students learn how accountants define assets, liabilities, revenues, and expenses and where those items appear in firms' balance sheets and income statements. The purposes and limitations of these two financial statements as well as the statement of cash flows are considered. Students gain an understanding of the accounting choices allowed to firms for reporting to stockholders and creditors and learn how the use of different accounting methods for similar economic events creates challenges for analysts. Instances of questionable financial reporting and strategies that can aid in their discovery are addressed. Later assignments focus on ratio analysis of actual firms' financial statements, including techniques to identify firms in financial trouble.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Identical With: **CSPL127Z**
Prereq: **ECON101 OR ECON110**

ECON129 Selected Problems in American Criminal Law
Crime and punishment are constantly in the news, and lay observers of the American system of criminal justice are often puzzled by its procedures and outcomes. What exactly is the criminal law trying to do? Why does it seem so difficult to convict criminals? What are the governing principles of American criminal justice, and how are they actually applied in the courts? This First-Year-Initiative course is intended to address these questions through a close analysis of cases and related materials concerned with the substantive criminal law and, at the same time, to introduce students to the legal method itself and the close-case-analysis characteristic of legal argument. It is thus not a course in law and economics, or law and philosophy, or law and government, but a course in law itself, much as it is taught to law students. Topics include the legal definition of criminal acts, causation, the mental element of crime, basic principles of justification, criminal responsibility and mental abnormality, and the law of homicide. Readings consist entirely of judicial opinions and related materials, and in class we will analyze these readings in detail to expose their logic and consider their practical implications. These readings are dense and intensive, and students will be asked in class to address difficult issues and defend their answers against rigorous critical questioning.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON145 Culture, Commerce, and Context
In this course, students will learn the importance of "culture" in a commercial and economic context. More precisely, students will have the opportunity to examine the nexus between individual interactions and broader structure, market, and particularly business. Students will read business and organizational ethnographic works only to be reinforced with empirical research from the field of business economics. Moreover, given the study of business organizations is inherently multidisciplinary and interdisciplinary, we will leverage the principles and wisdom of anthropology (i.e., business anthropology, business archaeology, design anthropology). Principles of futurity, precarity, "studying up," and "financescapes" and "economicscapes" will be explored. Students will also learn the craft of business and organizational ethnography, which is critical to the fields of entrepreneurship, engineering, marketing, and design studies -- covering the entire research process which includes designing a project, ethical considerations, and fieldwork (e.g., participant observation and interviews). In the end, students will learn why it is fundamental for current and rising leaders to understand culture and the material impacts different cultural values and preferences have on the success or failure of business.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON168F Globalization and Development (FYS)
This class aims to provide first year students with a set of critical skills to succeed through their undergraduate studies while also introducing them to classic and contemporary discussions on development and globalization. Before getting into the core topics of the class, we will start by discussing the contemporary disciplinary fragmentation in social science, while reading about integrative approaches introduced to the discussion about the past, present, and future of social science. Additionally, the class will discuss the contributions of classic authors such as Karl Marx and Max Weber, who presented the founding theories about the interconnections between development and social change. Later, issues on modernization and development will be studied, as well as critiques on these issues coming from the Latin American Dependency School. This intellectual debate will set the ground to discuss contemporary approaches to development and globalization considering insights coming from the rise of East Asia and feminist approaches to development theory. Finally, the class will discuss what globalization is and how to approach development and social change in the current globalization era.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON206 Race and Education Policy
This course will provide a broad introduction to contemporary education policy centered on issues of race/ethnicity. This course introduces the application of economic analysis to education policy. The course will analyze major education policy debates such as school desegregation, school finance, school resources, school choice, student tracking, accountability, educator policies (diversity, certification), special education, college entrance, and the current policy landscape.
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Identical With: **EDST206**
Prereq: **ECON110**

ECON207 Demographic Economics
This course explores topics in demographic economics. It is divided into three main modules: macroeconomic effects of demographics, human migration, and family economics. In the first module, we explore issues such as population aging, population distribution across the globe, the Demographic Transition and the Industrial Revolution, and the environmental effects of population growth. In the second module, we discuss the costs and benefits of human migration from the point of view of both sending and receiving countries. Finally, in the third module, we investigate how economic incentives shape family formation and family decision-making.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON208 Healthcare Economics Policy
This course introduces the economic principles underlying health and medical care and public policies. Students will analyze how economic forces shape health behaviors, healthcare delivery, and policy decisions. Emphasis is placed on understanding the structure of the healthcare system, the role of incentives, and the impact of policy interventions on health outcomes and equity.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON210 Environmental Economics
This course introduces students to the role of applied economics in climate change policy and analysis. Students will learn how economists view climate change causes, mitigation, adaptation, and policy challenges. Key topics include: economics of market failures, socially optimal greenhouse gas emissions, overview of theoretical and real-world policies to reduce emissions, evaluating the relative abatement costs of command and control versus market-based policies, valuing climate change impacts, evidence of adaptation strategies in the economy, discounting costs and benefits across multiple generations, impacts of uncertainty on optimal policy design, the role of international cooperation and consequences of unilateral action, and distributional effects.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Identical With: **ENVS214**
Prereq: **ECON110 OR ECON101**

ECON211 Introduction to Behavioral and Experimental Economics
This course compares what economic theory predicts with what economic agents actually do when faced with decisions. A number of in-class experiments will be conducted to identify systematic deviations or to confirm theoretical models. Students will learn new material both by participating in experiments and by studying related economic theory. This course will investigate some of the major subject areas that have been addressed by laboratory and field experiments: market behavior, decisions under risk, self-control issues, bargaining, auctions, public goods, cooperation, trust, and gender effects.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON213 Economics of Wealth and Poverty
Who are the very wealthy and how do they acquire their wealth? Why is poverty still with us after almost 50 years of antipoverty programs? What explains rising inequality in the distribution of income and wealth? These are just a few of the questions that we address in this course. The problem of scarcity and the question of production for whom are basic to the study of economics. Virtually all courses in economics give some attention to this topic, yet few study the distribution of income in depth. This course takes a close look at evidence on the existing distribution of income and examines the market and nonmarket forces behind the allocation process. Our investigation makes use of U.S. economic history, cross-country comparisons, and fundamental tools of economic analysis. Topics include normative debates surrounding the notions of equality and inequality, analytic tools for measuring and explaining income inequality, determinants of wage income and property income, the importance of inheritance, the feminization of poverty, and the economic analysis of racial discrimination. A central subject throughout the course is the role of policy in altering the level of poverty and inequality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON214 Introduction to Economic Networks
This course will serve as an introduction to networks and discrete structures as they're used in economics, sociology, and computer science. In this course, we will study the relationship between economic incentives and the structure of connections that are inherent in collections of individuals.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON215 Labor Economics
This course will introduce topics, theories, institutions, and policy issues relating to the functioning of labor markets. The topics we will cover include labor supply decisions, investments in human capital, compensating wage differentials, firms' labor demand decisions, compensation programs, the economics of unemployment, and labor market discrimination. We will begin the course by analyzing the neo-classical labor supply, demand, and equilibrium. Then, we will explore the possible reasons why labor market outcomes may deviate from what the perfectly competitive neo-classical model predicts: factors such as human capital accumulation choices, productivity heterogeneity, institutional rigidities (e.g., minimum wage, unions), labor mobility, and discrimination.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON220 Alliances, Commons, and Shared Resources
Some resources are only useful in large units and therefore need to be shared by multiple users. Examples include agricultural and forest land, fisheries, streaming video and music services, highways, computer platforms, and news reporting. This course studies methods of sharing resources including common property, formal and informal alliances, clubs, open source, and government regulation and ownership. Students interested in the environment, rural development, news and entertainment media, transportation, and communications should consider this course, as we will cover all of those topics and see their economic similarities.

Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON221 Economic Topics in Sports
This course intends to provide students with a new perspective on both sports and economics. It will not only shed light on the business components of professional sports, but also lead students through analyses of other aspects of sports such as the nature of the game on the field, how leagues are organized, how playing rules are formulated and enforced, and how owners and coaches make personnel decisions. The goal of this course is to reveal the persuasiveness of economic reasoning underlying such decision-making in the world of sports.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON222 Public Economics
In this course, we examine the economic roles of government and the tools that governments use to fulfill these roles. We will start with the questions, Under what circumstances is it possible for governments to improve on the outcomes that would occur in their absence? And how do we decide whether one outcome is better than another? The course will continue with an examination of the performance of governments in the United States. The primary questions addressed will be, What policies do governments pursue? How do they spend money to achieve the goals of these policies? How do they raise the money that they spend? And what sorts of undesired side effects might result from taxation and expenditure policies?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON223 Finance, Regulation, and the Economy
With recent financial scandals and crises, it is important to ask whether the finance industry should be regulated and should undergo further policy reforms. Many scholars and policy experts contend that the current system is simply not designed to make policy choices on behalf of the public. In this course we will explore current financial innovations (e.g., mutual funds, hedge funds, securitizations, cryptocurrencies) and potential policy options in order to protect "Main Street" from "Wall Street." Additionally, we will explore the manner in which modern finance has grown out of powerful theories, both mathematical and psychological.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON224 Regulation and Antitrust: Government and the Market
Firms and the public sector interact via regulation and antitrust. Firms use (or fail to use) the regulatory process for competitive advantage, and agencies and legislators use (or misuse) regulation to accomplish their policy objectives. Topics covered in this course include the analysis of market power, predation and discrimination, mergers, regulation of infrastructure industries, and health and safety regulation. Case studies include railroads; telephone, cable, and broadband; the energy industry; differences between the EU and United States in merger reviews; and cybersecurity.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON225 Economic Analysis and the Law
This course uses economic analysis as a way of understanding the structure and evolution of the legal system from an economic perspective. Selected rules and institutional forms are drawn from the common law of tort, contract, property, and crimes. Students will be able to apply microeconomic theories (and thus develop economic intuition) by learning how legal rules evolve to handle imperfect information and especially moral hazard, which lead to disputes and lawsuits.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON227 Introduction to Financial Analysis
The course introduces students to the primary sources of information and data used in equity and debt valuation and portfolio management. Both corporate finance and investment finance topics will be covered: financial statement analysis, micro- and macroeconomic analyses of how industry trends and economic growth impact corporate performance, discounted cash flow analysis, asset pricing models (bonds, DDM, CAPM, APT), portfolio theory, and, time permitting, capital structure. This will be a very intense, inquiry-based course with significant hands-on work analyzing data of publicly traded companies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON228 Investment Finance Principles
The course aims to develop an understanding of the application of the principles of economics to the study of financial markets, instruments, and regulations. The course emphasizes major financial institutions and methods: insurance, portfolio management, corporate management of dividends and debt, forwards and futures, options, and swaps. We will discuss the importance of human psychology in developing and utilizing financial tools as well as the difficulty of battling moral hazard. Students will work with financial data and case studies to explore the potential and limitations of financial theory in dealing with real-world problems.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON229 Alternative Investments
A study of alternative investment vehicles and their economic impacts. Students will learn how fast-growing investment strategies such as private equity, private credit, venture capital, and hedge funds impact capital flows, risk assessment, and corporate strategy in today's complex economy. Regulation, conflicts of interest, and systemic risks associated with alternative investment vehicles will also be explored, along with current trends.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON231 Corporate Finance Principles
The course aims to develop an understanding of the application of the principles of economics to the study of the theory of corporate finance. Topics that will be

covered include financial statement analysis, project valuation, and asset pricing (equity and debt). Students will work with financial data to explore the potential and limitations of financial theory in dealing with real-world problems
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON233 Economics of Discrimination
This is an applied economics course that introduces students to intuitions and concepts relating to race and gender discrimination in the labor market. It will provide an overview of the historical context, important economic models, and empirical research on this issue. While we will not delve into intensive analyses of the techniques used in these papers, we will discuss and present the findings and implications. The exams and assignments will focus on being able to explain the causes and consequences of gender and racial disparities and discuss the possible impacts of hypothetical polices.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON234 Economics of Religion
This class explores how economic ideas and statistical tools can be used to look at the role of religion in society. This course examines both the application of economic techniques to the study of religion and the relationship between economic and religious behaviors. Course topics may include: the demand for religion, religious supply, giving behavior, religion-based terrorism/extremism, and religion and economic development.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON237 Financial Crises: Beginning to End
This course provides an introduction to the economics of financial crises. Using introductory economics we will examine banking, security, and currency crises in order to illuminate the role of financial crises more generally in the archetypical life cycle of financial systems. By the end of the course, students will be able to define what causes financial crises, how they lead to contractions in economic activity, why they reoccur, and what policy measures can be used to promote financial stability.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 or ECON110**

ECON238 Gender Economics
Gender Economics (200-level) explores gender issues from an economic perspective within diverse societies. This course investigates theoretical frameworks and empirical analyses to examine the changes in labor force participation, the gender gap in pay, workplace discrimination, social norms, household decision-making, and human capital. Through a multidisciplinary approach drawing from economics, sociology, and feminist theory, students critically assess topics such as the gender wage gap, occupational segregation, caregiving responsibilities, and the impact of policy interventions on gender equality. By engaging with contemporary research and real-world case studies, students will develop a nuanced understanding of the intersections between gender, economics, and social justice, preparing them to navigate complex issues in both academic and professional spheres.

ECON241 Money, Banking, and Financial Markets
This course provides an introduction to money, banking, and financial markets, from both a theoretical and policy perspective. The class will emphasize the evolution of banking and financial market institutions--both in the United States and in other developed countries.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110 OR ECON101**

ECON242 Banking and Financial Fragility
Why are banks susceptible to financial crises? This course studies the mechanisms behind banking crises as an introduction to the microeconomics of banking. Motivated by a survey on historical and empirical evidence on banking crises, we will study why an economy needs financial intermediation and why such intermediaries face crises. Based on these analyses, the last part of the course will discuss optimal design of financial regulation on banking systems. This course will also discuss topics such as recent developments in shadow banking and digital currencies.
Offering: **Host**

Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON245 Global Markets and Financial Institutions
With the advent of globalization and financial innovation, the financial markets and financial institutions are more globally integrated than ever. This course is designed to help students understand the structure and evolution of financial markets, financial instruments, and financial institutions, all through a global lens. The course covers financial intermediaries in detail, particularly new entrants on the global scene, and central banks. Finally, the course will delve into the most recent global financial crisis to understand its causes and lessons.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON251 Economics of Alexander Hamilton's America
What was Alexander Hamilton's contribution to the early American republic? This course combines concepts and models from introductory economics with a mix of primary sources and modern-day scholarship. After a survey of the colonial American economy, we will focus on the role of economics in the American Revolution, the movement from the Articles of Confederation to the Constitution, and major economic policy debates of the early republic. Throughout, students will encounter the views and influence of the first U.S. Treasury Secretary, Alexander Hamilton. By the end of the course, students will be equipped to assess Hamilton's economic legacy.

Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON254 State and Economy in Industrial America, 1870--1940
This course considers the transformation of the political and economic institutions of the United States in the 70 years ending in 1940 and the revolution in political ideology that occurred alongside this transformation and helped bring it about. We begin by examining the growth of large corporations after 1870, the new techniques of management they called forth, and the antitrust movement that arose in response to them. We then turn to the many changes in American government brought by the Fourteenth Amendment, the granting of constitutional personality to business corporations, and the attempt of Progressives before World War I to analogize the administrative state to business firms and bring the newly developing techniques of management science to bear in politics and policy, an effort with profound effects on American life. Finally, the role played by war in these changes, the creation of the modern American economy in the 1920s, and the New Deal's attempt to adapt the nation's political and legal institutions to the economic and ideological realities of the 20th century are considered. Along the way, the course addresses a range of theoretical issues, including the contrast between markets and central planning as ways of organizing economic activity, the tension between the individual and the collective in complex societies, technocracy and social engineering, and the impact of war on economic and political institutions.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 or ECON110**

ECON255 Introduction to Open-Economy Macroeconomics
The course will explore current issues, models, and debates in the international finance and open-economy macroeconomics literature. Topics to be covered include international financial transactions and the determination of the current account balance, models of exchange-rate determination, monetary and fiscal policy in open economies, optimal currency areas, currency crises, and the international financial architecture. There may be scope for student input into the topics covered. Theoretical and empirical approaches will be explored.

Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON258 History of Economic Thought
In this course, we will explore the conceptual foundations of economics and political economy through original source materials. By viewing economists as 'worldly philosophers,' we will examine how they developed analytical frameworks to study the social world while simultaneously shaping it with their ideas. We will begin with the classical political economy school, represented by Adam Smith and David Ricardo. Next, we will analyze Karl Marx's work, which provides one of the major critiques of capitalism and economic theory. Finally, we will explore more contemporary paradigms, focusing on the 19th-century neoclassical school of economics--today's dominant theory--and Keynes' innovations in economic thought. Throughout this journey, we will assess the impact of these ideas on the development of economic theory and policy design.

Prereq: **ECON101 OR ECON110**

ECON261 Latin American Economic Development-Macro
In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

ECON263 China's Economic Transformation
China is a country that is both transitioning to a market-oriented economy and developing rapidly into a global economic power. As such, it has characteristics of both an emerging market economy and a developing country. China is large enough to create its own institutional infrastructure to support a third way between capitalism and socialism. This course examines in detail China's great economic transformation beginning in 1978 in what is often described as a "gradualist" transition to market economy. In the past three decades, the speed of China's development and its growth rates of GDP are without precedent in history. The course concludes by addressing the incompleteness of China's transition to a mature, developed market economy and by probing the issue of what is left to be done to create a harmonious society.

ECON266 The Economics of Developing Countries-Lower Level
This course provides students with the foundations of the study of development economics. It begins by reviewing how economists think about and measure income, poverty, and inequality, and then explores how these outcomes shape and are shaped by human development (including, e.g., education and health), institutions, and markets.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON268 Economic History of Latin America Since Bretton Woods
In most historical accounts, Latin America has been cited as an example of underdevelopment, institutional instability, and external dependence. However, these perspectives often oversimplify its complex political economy. This course aims to examine the key institutional and structural elements that have shaped Latin American economies. To begin, we will explore the response to the Great Depression, which influenced Latin American positions on the Bretton Woods agreements. In the second part, we will review the region's macroeconomic, financial, and institutional evolution during the Golden Age of capitalism (1950-1970), noting the divergence between agricultural and industrialized economies. In the third part, the course will cover the impact of the Latin American Lost Decade, characterized by debt and currency crises. Afterwards, we

will study the stabilization period of the 1980s-1990s, known as the Washington Consensus. Finally, we will analyze the commodities boom period of the 2000s.
Offering: **Host**

Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON270 International Economics
This class examines the economic interactions between countries in the world economy and recent international economic events. The first part of the course will focus on explaining trade patterns between countries and the gains and losses associated with international trade. Trade policies such as tariffs and the institutional arrangements governing them (e.g., the World Trade Organization) will also be analyzed. The second part of the course covers international finance topics including the balance of payments, exchange rates, and the history of the international monetary system. We will also discuss how international linkages between countries affect economic development. Economics majors who want to be exposed to a more advanced treatment of international trade and international finance topics are encouraged to take ECON371 and/or ECON331.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON272 Macroeconomics: Selected Topics
The course aims to explore select topics in macroeconomics that may have been introduced loosely in Econ 110 or may not have been covered at all. It covers a variety of topics in macroeconomics, including the determinants of economic growth, inflation, the role of central banks, exchange rates, cross-border capital flows, and more. Students will use Matlab and be instructed in the software.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Prereq: **ECON110**

ECON273 Economic Growth and Development in Sub-Saharan Africa
This course will focus on macroeconomic theories and practices of growth and development by using the Sub-Saharan African economies as case studies. The course will be both a retrospective and prospective analysis of the Sub-Saharan African economies. In particular, it will attempt to provide some answers to various questions such as:

What are the determinants of long-run growth? Why has Sub-Saharan Africa lagged behind the rest of the world in terms of economic growth and development? What are the economic explanations and implications of some of the conflicts in Sub-Saharan Africa? What are the long run growth implications of foreign aid, remittances, and immigration?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON281 Introduction to Game Theory
This course is a quantitative introduction to game theory and its applications to economics. This means the application of algebra and logic to solving formal models of strategic situations. Topics will include strategic and extensive form games, pure and mixed strategies, Nash equilibrium, subgame perfect equilibrium, games of incomplete information, formation of expectations, collective action games, evolutionary games, and the suitability of equilibrium concepts. Examples will be drawn from bargaining, auctions, market competition, employment markets, voting and collective choice, and other areas. In-class experiments as time permits.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON101 OR ECON110**

ECON301 Microeconomic Analysis
This course develops the analytical tools of microeconomic theory; studies market equilibrium under conditions of perfect and imperfect competition; and considers welfare economics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110**

ECON302 Macroeconomic Analysis
This course focuses on the study of economic aggregates such as employment and inflation and on the public policies (monetary and fiscal) aimed at controlling these aggregates. The first half of the course will concentrate on short-run issues: aggregate demand and supply in closed and open economies, business cycles, and stabilization policies. The second half of the course will focus on long-run issues: economic growth and microfoundations of unemployment and consumption. Upon completion of this course, students should be capable of an informed analysis of recent macroeconomic debates and should be prepared for upper-level electives on a variety of macroeconomic subjects.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON110 AND (ECON103 OR PSYC200 OR MATH132)**

ECON303 Introductory Econometrics
This course is an introduction to econometric techniques widely used by economists. The weekly lab sections are required; labs explore issues relating to the nature and sources of economics data and introduce appropriate statistical computing tools. This class will meet three times each week: twice with an economics professor, and once with a Quantitative Analysis Center (QAC) instructor.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 AND ECON302**

ECON306 Economics of Education
This course introduces the application of economic analysis to education policy. The theoretical basis for private and public investment in education is examined. Additionally, the tools of empirical analysis are used to evaluate research. Topics covered include the returns to education, the importance of school resources, teacher labor market, school financing, school choice, and accountability among other education economics topics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON308 Healthcare Economics
In this course, we examine the United States healthcare system in some detail, with some attention to useful international comparisons. We will start with the questions: What makes healthcare provision different from that of other goods and services? And How are these differences reflected in the structure of the

healthcare industry in the United States? We will use our new understanding of the U.S. health system to evaluate various reforms that have been proposed. Other questions that we will address include, What is health? How is it measured and valued? What do we get for the money that we spend on health care? And How do we decide whether what we get is a "good value" or not?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON310 Economics of the Environment and Climate
This course introduces environmental economics: we begin with the theory, including cost-benefit analysis, externalities, and concepts of economic efficiency that combine standard economic consumption with environmental benefits. We then turn to practical applications of the theory to policy questions: for example, in the contexts of air and water pollution, energy use, the economics of the climate, and sustainability. These topics will be treated mathematically using formal economic models and also acknowledge that the the field is heavily influenced by the natural sciences and policy constraints.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Identical With: **ENVS312**
Prereq: **ECON301**

ECON311 Behavioral Economics
This course is an advanced undergraduate treatment of behavioral economics. Behavioral economics is the study of human behavior that falls outside of the standard model of perfect rationality, pure selfishness, and exponential discounting. The objectives of this course include the following: (1) review the standard economic model; (2) show empirical evidence (both experimental and observational) that deviates from the standard model; (3) discover new models of decision making that better explain behavior in certain areas; and (4) learn about best practices in data collection and analysis. Course work will include readings of economics research papers as well as textbooks, along with problem sets with both theoretical and empirical aspects. Students will participate in classroom experiments and, as part of a final project, will write a behavioral economics research proposal.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON301**

ECON313 Economic Inequality
This course examines the determinants and consequences of income and wealth inequality. We study how economic growth, technological change, globalization, discrimination, and public policies -- such as taxation, welfare programs, and labor market regulations -- shape the distribution of resources within and across countries. The course is divided into three parts: (1) measurement and empirical trends in inequality; (2) theoretical frameworks explaining inequality in labor income, capital income, and wealth; and (3) policy analysis, evaluating the effectiveness and trade-offs of redistributive and inclusive growth policies. By the end of the course, students will understand key concepts, models, and policy debates surrounding economic inequality in modern economies.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON302**

ECON314 Comparative Economics of Child and Family Policy in Postindustrial Countries
This course uses tools of economic analysis and measures of child well-being to make cross-country comparisons of policies and outcomes. Children rank high on the list of a country's most valuable resources. Yet equally rich nations differ dramatically in funding investments for children and providing support for the people who raise them. These differences in investment persist despite a growing body of research that shows costly negative consequences for early child development of both absolute and relative deprivation. With these observations in mind, this course investigates the following questions: Why do equally wealthy nations differ so profoundly when evaluated by these fundamental indicators of economic success? What factors and policies explain the differences? What are the economic consequences? How might the research on international comparisons inform the construction of more successful child and family policy?
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **(ECON300 AND ECON301) OR (ECON300 AND ECON302)**

ECON315 Labor Economics
This course will survey the economics of labor markets with a focus on the determinants of labor supply and labor demand. Other topics will include the returns to education, globalization, automation, pay gaps, and the minimum wage.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON301**

ECON316 Urban Economics
This course uses economic methods and perspectives to analyze urban issues. The first half of the course has a more theoretical focus; the second half, a more applied and empirical focus. Topics covered include how and why cities arise and develop and how their growth or decline is affected by various events. Policy areas studied in the second half of the course include regional development and zoning, housing programs and regulations, antipoverty programs, local public finance, development of transportation systems, education, and crime.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON317 Low-Wage Labor Markets: A Data-Driven Exploration
Students will read journal articles on low-wage labor markets and will be introduced to several data sets that are useful for exploring such markets. Throughout the course, students will work on their own empirical projects and will be guided in carrying out these individual investigations.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **(ECON300 AND ECON301)**

ECON318 Economics of Science and Technology
This course examines technology and technological change using the tools of microeconomics. We will study the historical evolution of technology and compares it with modern developments. Then we will analyze the interaction of technology with industrial market structure and public policy. Particular emphasis is given to transportation, communications and the Internet, big data, and blockchains, .
Offering: **Host**

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON319 Low-wage Labor Markets - A Data-driven Exploration
This course is a data-driven exploration of low-wage labor markets providing students with the skills to work independently on a major project of their own design. In the first half of the course, students will be introduced to several data sets including the Panel Survey of Income Dynamics, the Current Population Survey, and the National Longitudinal Studies of Young Men and Women. During that time, students will also be introduced to useful resources for exploring research topics and will begin to craft research questions. In the second half of the course, students will design and complete their own research papers using the data sets and research resources introduced in the first half of the course.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 OR ECON302**

ECON321 Industrial Organization
This course focuses on game-theoretic models of oligopoly, investment and preemption, and vertical interaction. Extensive use is made of Mathematica.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON322 Public Finance
This course analyzes the government's influence on economic efficiency, resource allocation, income distribution, and economic growth. The course covers government spending, regulation, and tax policy. Concepts discussed include tax incidence, public goods, market imperfections, and externalities. Reference is made to issues of health care and environmental issues, welfare reform, the U.S. tax system, the federal budget, and the Congressional budget process.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON323 Media Economics
This course covers the economics of entertainment and news both in their traditional forms (newspapers, magazines, radio, television) and their social media manifestations (social networks, media sharing, discussion forums, blogging). It uses economic analysis to understand the structure of media industries, the characteristics of media products, the effects of regulation in media markets, and changes brought about by digital technology.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON301**

ECON324 Regulation and Antitrust - Upper Level
Firms and the public sector interact via regulation and antitrust. Firms use (or fail to use) the regulatory process for competitive advantage, and agencies and legislators use (or misuse) regulation to accomplish their policy objectives. Topics covered in this course include the analysis of market power, predation and discrimination, mergers, regulation of infrastructure industries, and health and safety regulation. Case studies include railroads; telephone, cable, and broadband; the energy industry; differences between the EU and United States in merger reviews; and cybersecurity. Microeconomic models will be used to understand each topic.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON325 Law and Economics
This course examines the efficacy of alternative legal arrangements using microeconomics as the basic investigative tool. The core of the course consists of a thorough analysis of the common law, with emphasis on the areas of tort, contract, property, and criminal law.

To analyze tort law, a microeconomic model of accidents is developed; using this model, the rules of caveat emptor, strict liability, negligence, and contributory negligence are compared for determination of causation, damages, activity levels, and accident risk. With a discussion on product liability, we will shift the topic to contract law, in which we will study the contracting process as well as the rational conditions for breach of contracts. Viewing the relationship between the government and its people as a social contract, we will study cases of eminent domain and discuss whether the government performs land acquisitions with "just compensation." Lastly, we will analyze criminal law under a framework assuming that crime is a rational act (in some contexts). If time permits, we will study how different cost allocation rules influence litigation and settlement.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON326 Empirical Political Economy
This upper-level elective brings politics and political institutions into economics. In standard micro and macro classes, politics are absent from agents' decisions. In this class, we will study how states emerge, how dictators manage to remain in power, why countries democratize and what are the benefits of democratization, how electoral institutions affect policy outcomes, why people vote, what motivates politicians, and why groups engage in costly conflicts and war. By the end of this course you should have gained a deeper understanding of political processes both in the developed world and in developing countries, and how important it is the think about political power to understand economic policy. In terms of methodology, we will focus on empirical approaches and on how to critically read and understand academic articles in the field.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 AND ECON300**

ECON327 The Global Firm: A Calderwood Public Writing Seminar
Students will combine their knowledge of economics, including macro, micro, and quantitative methodologies, with their skills at exposition in a journalistic format, in order to address current economic issues related to firm-level decisions (e.g., where to locate production) and the economic consequences of these decisions at home and abroad for different shareholders. Students will conduct independent research to produce weekly articles. Assignments may include coverage of journal articles, book reviews, and interviews with academic economists. Class sessions will be organized as workshops devoted to critiquing the economic content of student work.
Offering: **Host**
Grading: **A-F**

Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 OR ECON302**

ECON328 Investment Finance
This course explores theoretical and empirical aspects of investment finance. Topics include portfolio theory, portfolio evaluation, and asset pricing models for equities, bonds, and options.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 AND ECON300**

ECON329 Corporate Finance
The course aims to develop an understanding of the applications of the principles of economics to the study of financial markets, instruments, and regulations. The objective is to provide an understanding of the theory of corporate finance and how it applies to the real world. Students will work with financial data and case studies to explore the potential and limitations of financial theory in dealing with real-world problems.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301 AND ECON 300**

ECON330 The Multinational Enterprise
An examination of the economic consequences of the globalization of markets and industries will be used as the foundation for discussion of firm-level responses, focusing on foreign direct investment and corporate strategy.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302 OR ECON301**

ECON331 Open-Economy Macroeconomics
This course will consist of three broad modules all relating to international finance/open-economy macroeconomics. First, we begin by a discussion of national income accounting, and we will discuss concepts such as the balance of payments, current account, financial and capital accounts, and their interrelations. Second, we discuss how exchange rates are determined, and their role in shaping countries' macroeconomic trajectories. We will cover important concepts such as interest rate parity, purchasing power parity, and real exchange rates. Third, we will apply what we learned to discuss topics such as fixed versus flexible exchange rate regimes, how the international monetary system works and its history, optimum currency areas and the eurozone, and other relevant case studies.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302**

ECON332 Economics of Firms, Market Power, and Competition
In this course, we study firm decision-making by exploring the fundamentals of demand and identifying categories of costs that firms must consider like pricing, exit, or market entry. We learn about market power, antitrust, and how the interplay between cost and demand fundamentals of various industries (e.g., healthcare, fintech/blockchain, social media, retail, fine arts, entertainment, and financial services to name a few) determines profit-maximizing decisions for firms. Lastly, we will explore strategic interactions between firms by way of games and "tactics." Specific, industrial organization frameworks such as holdouts, switch costs, multi-sided markets, network effects, and economies of scope will assist in deciphering firm behavior. Case studies will be used to sharpen and reinforce the principles of the course.

Prereq: **ECON 110**

ECON333 Financial Intermediation and Crises
This course applies economic theory to understand the functions and fragility of financial intermediation. The main focus of this course is to learn theoretical models of strategic interactions among economic agents to examine the causes and amplification mechanisms of banking crises. Through the lens of the models, we will discuss how to interpret the recent episodes of banking crises. We will then use the models to evaluate the effectiveness of various government policies in decreasing fragility. These concepts apply not only to traditional depository institutions but also to shadow banks and digitization.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON341 Money, Banking, and Financial Markets
This course applies macroeconomic theory and econometric tools to selected topics in money, banking, and financial markets. The course will cover monetary policy, financial crisis, financial regulation, and the role of financial development in economic growth. Students will replicate the key empirical results in the literature throughout the semester and, toward the end of the semester, write an empirical paper of their own. Proficiency in statistical softwares (e.g., Eviews or Stata) is required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302**

ECON342 Finance and Economic Growth
This course studies the role of financial systems in long-run economic growth. We examine how banks, financial markets, and institutions affect capital allocation, innovation, productivity, and macroeconomic stability. Topics include financial development, credit constraints, misallocation, financial crises, and the interaction between finance and technological change. The course combines theoretical models with empirical evidence from cross-country, historical, and firm-level data.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON303**

ECON347 Transmission Mechanisms of Monetary Policy
This course applies macroeconomic theory and econometric tools to evaluate the empirical evidence on the timing and effect of monetary policy decisions on the economy. The course will explore several transmission channels of monetary policy, such as the interest rate, asset price, credit, and unconventional channels. Students will read about and evaluate key empirical results in the current literature throughout the semester and, toward the end of the semester, write a research paper of their own.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON302**

ECON348 Equilibrium Macroeconomics
Since the 1970s, macroeconomics has witnessed a methodological shift away from models based on relationships among aggregate variables in favor of models based on optimizing individual behavior in multiperiod settings. This course will develop skills and introduce concepts and techniques necessary to understand these models. Likely topics include the Solow growth model, dynamic consumption theory, the equity-premium puzzle, and real-business-cycle theory. This course introduces some graduate-level material and makes intensive use of mathematics.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302**

ECON349 Economic Growth
This course examines the causes and consequences of cross-country differences in economic performance. We will investigate why some nations are much wealthier than others. Using the neoclassical growth model as a starting point, we will explore the fundamental determinants of per-capita income and growth. In addition to the use of a standard textbook, we will work through a number of journal articles and policy papers to obtain a deeper understanding of the long-run drivers of economic development. Over the course of the semester, we will discuss numerous controversial issues with regard to economic growth. Examples include the importance of openness for the development process as well as the long-run impacts of colonialism.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302 AND ECON300**

ECON351 Introduction to Income and Wealth Inequality: Theory and Empirics
This course is an introduction to the research on income and wealth inequality. The first part of the course presents the main statistical and mathematical concepts applied to the study of income and wealth distribution. In the second part, we will deal with the conceptualization of income distribution from the time of the pre-classical and classical political economists (Petty, Quesnay, Ricardo, Marx) to the 20th-century economists (Pareto, Kuznets, Atkinson, Taylor, Milanovic, Piketty). In the third part, we will explore the methods for reconstructing income and wealth data and the main results exposed in several databases such as the World Inequality Database (WID), the LIS Database, and the Estimated Household Income Inequality Data Set (EHII). Finally, we will discuss the literature on the determinants and consequences of income and wealth inequality from a critical perspective. That literature review includes discussions about race, gender, class, and global inequality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON301 AND ECON302**

ECON352 Political Economy
This course introduces the tools of rational-choice and evolutionary game theory and applies them to the study of social interactions with both political and economic elements. This study concerns the distinction between public and private elements of social life. Topics covered include the economics of lawlessness and the emergence of property rights, the economic nature of the state, effects of political structure on economic development, and the economic determinants of democracy and dictatorship.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON353 American Economic History
This course focuses on 19th- and 20th-century U.S. economic history. The course emphasizes the application of economic tools to the analysis of U.S. history. In addition, it aims to provide students with a sense of the historical dynamics that have shaped the contemporary economic system. Rather than providing a general survey of the economic history of the entire period, the course will focus on topics including cyclical fluctuations, the evolution of the monetary and financial systems, immigration, labor markets, and the role of government policy.

Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **(ECON303 AND ECON301) OR (ECON303 AND ECON302)**

ECON354 Institutions
Neoclassical economic theory has relatively little to say about the problem of economic organization, how the economic activity of individuals is structured and governed by a complex network of social institutions that includes the law of property and liability, informal codes of morality and fair dealing, and formal organizations. This course attempts to address this imbalance by examining the origins and historical development of two of the most important of these institutions, firms and states. Why do firms and states exist? What functions do they perform in economic systems? How do they arise, and how do they change over time? In considering these questions, students will be introduced to several contemporary alternatives to neoclassical analysis, including the institutional, Austrian, public-choice, and constitutional approaches to the problem of economic organization. All of these traditions have both a rich history and an active research community, and readings will include both classic texts and modern scholarship in each of them.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON355 Financial History
This course will focus on the evolution of financial institutions and markets from the ancient world until today. Topics covered will include contracts and property rights, the emergence of money and payments mechanisms, the beginnings of public debt and central banks, the development of joint stock commercial banking and banking regulation, debt and equity markets, and financial crises. The course will emphasize the application of the tools of economic analysis to financial history.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **None**

ECON356 American Macroeconomic Policy
What can history teach us about macroeconomic policy? This course will use American macroeconomic history from 1870 to the present to explore key issues in macroeconomic policy which remain relevant today. We will both extend the theoretical frameworks presented in ECON302 and delve into the empirical literature on both historical and contemporary monetary and fiscal policy. Students will produce an original, independent research paper on a topic relating to macroeconomics. Previous completion of or concurrent enrollment in ECON385 is useful though not required.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON302**

ECON357 Topics in European Economic History
This course emphasizes the application of economic tools to the analysis of European history since the Industrial Revolution. Much of the course will center on Britain, although the experiences of France, Germany, Scandinavia, and other countries will also be discussed. Rather than providing a survey of all of modern European economic history, the course will focus on topics such as industrialization, demography, the evolution of money and capital markets, and cyclical fluctuations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **(ECON303 AND ECON301) OR (ECON303 AND ECON302)**

ECON358 History of Economic Thought
This course explores the major ideas of the classical school of political economy as developed by its central figures and traces the unfolding legacy of these ideas in the history of economic thought. For each author studied, the goals will be to understand the arguments presented on their own terms, interpret those arguments in the terms of modern economic theory, and consider their contemporary empirical relevance.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302 OR ECON301**

ECON361 Latin American Economic Development-Micro
This upper-level elective course will look specifically at the literature of labor markets and related human capital accumulation, mostly in the context of Latin America, which has emerged as an entirely separate area of research in recent years. Readings about other regions will be used to better develop a framework for studies of Latin America. In this course, students will read recent economic research papers, drawing on journal articles and policy papers in this area, and discuss the theoretical and empirical results from research and its implication for economic policy. Students are expected to actively present and discuss them and work on individual or group projects, and also have to produce their own research paper. Basic quantitative methods will be taught throughout the course, relating to the economic research papers, and the course will also draw on the resources provided by the Quantitative Analysis Center (QAC).
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **[ECON 300 AND ECON 301]**

ECON362 Financial Markets, Policy, and Crisis: Insights from Japan
This course will use modern macroeconomics and economic history of Japan to shed some light on important questions in macroeconomics. Students will read empirical macroeconomics research not only on the Japanese economy but also on the United States and other countries to develop a sense of empirical research in macroeconomics. The course will also emphasize the major developments of macroeconomic policy in Japan since the Meiji Restoration to appreciate the role of history in understanding contemporary macroeconomic policy debates.
Offering: **Host**
Grading: **OPT**

Gen Ed Area: **SBS-ECON**
Identical With: **CEAS251**
Prereq: **ECON301 OR ECON302**

ECON363 Microfoundations of Growth in China
The rise of China is one of the most remarkable, if not miraculous, economic events in recent history. The course seeks to present a comprehensive overview of the transition challenges China faces as it continues to move from a centrally planned economy to adopting a greater reliance on market-based mechanisms. By reviewing the microeconomic literature on China's recent economic and institutional transformation, the class hopes to provide a general analytical framework for understanding the economic implications of the process.

Gen Ed Area: **SBS-ECON**
Identical With: **CEAS363**
Prereq: **ECON301 AND ECON300**

ECON366 The Economics of Developing Countries
This course presents an examination of the characteristics of developing economies and an evaluation of various policies to foster development. Specific topics include health, education, savings and credit, microfinance, insurance, and institutions, with particular emphasis on experimental and quasi-experimental methods of rigorous evaluation.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON300 AND ECON301**

ECON371 International Trade
This course examines the causes and consequences of cross-border flows of goods and services. We will investigate various theories of international trade and discuss the empirical validity of their predictions. Particular emphasis will also be placed on the motives for countries to restrict or regulate trade and the institutional arrangements governing the world trading system. Moreover, we will discuss how trade between countries can shape economic development. Over the course of the semester, we will also address numerous controversial issues with regard to international trade. Examples include the impact of trade on the environment, labor standards, wages, jobs, and inequality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON380 Mathematical Economics
The uses of mathematical argument in extending the range, depth, and precision of economic analysis are explored. The central goal of the course is to promote sophistication in translating the logic of economic problems into tractable and fruitful mathematical models. Particular attention is paid to the analysis of optimization and strategic interaction.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

Prereq: **(ECON301 AND MATH221 AND MATH222) OR (ECON301 AND MATH223 AND MATH222)**

ECON381 Advanced Game Theory
This course is a quantitative introduction to game theory. This means the application of algebra and logic to solving formal models of strategic situations. Topics will include dominance and rationality, pure and mixed strategies, Nash equilibrium, collective action problems, subgame perfect equilibrium, strategic moves, credibility, repeated interactions, asymmetrical information, adverse selection, signaling, and the suitability of equilibrium concepts. Wide applications

of game theory in everyday life, economics, politics, international relations, management, sociology, and sports will be discussed in class.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON301**

ECON385 Advanced Econometrics
Econometrics is the study of statistical techniques for analyzing economic data. This course reviews multiple regression and develops several more advanced estimation techniques. Students work on individual research projects and learn to use econometric software.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **(ECON301 OR ECON302) AND (MATH221 OR MATH223 OR QAC220)**

ECON386 Introduction to Forecasting in Economics and Finance
This course is an introduction to forecasting widely used by economists; forecasts are constantly made in business, finance, economics, government, and many other fields, and they guide many important decisions. The course focuses on core modeling and forecasting methods that are very widely applicable. We first introduce several fundamental issues relevant to any forecasting exercise, and then treats the construction, use, and evaluation of modern forecasting models.

Students work on individual research projects and learn how to build and use forecasting models.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-ECON**
Prereq: **ECON302**

ECON387 Causal Inference in Applied Economics
Learn modern tools economists use to identify cause-and-effect relationships in real-world data. The course emphasizes research design, credible identification, and hands-on empirical work through replications and original projects.

ENGLISH

The English Department offers courses that foster critical thinking about the relationships among literature, culture, and history. Students of English become adept critics of poetry, novels, essays, and plays. They develop knowledge of the history of literary culture and about the evolving genres, forms, and ideologies of literary expression. They study the relation of literary texts to their historical contexts, and they learn to read both literary and non-literary texts critically. As they develop their knowledge, students of English hone their skills as critical writers and explore their potential as creative voices.

ENGL111F 21st Century American Literature (FYS)
This course will explore American literature of the 21st century and in so doing, we will consider the portrayals of race, class, ethnicity, religion, trauma, citizenship, migration and sexuality. We will approach these portrayals in engaged class discussion as well as in writing, both analytical and creative. We will also discuss the ways in which these authors conceptualize and problematize American identity.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL112F Reading Black Culture (FYS)
Blackness is the lifeblood of the culture industry. U.S. popular culture--which traverses national boundaries due to the workings of imperialism and global capital--has a predominantly Black face, at the same time that Black people, in

the United States and across the globe, are made to live in unrelenting proximity to death and destitution. This introductory course aims to tackle this seemingly contradictory state of things by considering the manifold ways Blackness circulates in the global cultural landscape. With the ultimate aim of increasing cultural literacy, we will engage with key questions such as: What makes a Black text? What, if any, political duty does the Black cultural worker have to the larger "Black community"? How does a critique of capital figure into Black culture? How might we conceptualize intellectual work as central to Black cultural traditions? This course traces these questions through the analytic of "reading"--as a mode of critical engagement that exceeds the textual. We will contend with Blackness in its varying permutations and figurations across the domains of literature, music, film, sport, visual art, and performance.

ENGL121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

ENGL122F Magical Creatures & Phantastic Allegories in Spenser's Faerie Queene (FYS)
This course explores the imaginative worlds of magical creatures through a study of phantastic allegory in Edmund Spenser's Faerie Queene. Through a sustained careful reading of this major work of imaginative poetry, we will come to understand the way in which Spenser employs rich and dynamic poetic figurations towards the construction of highly nuanced and complex allegorical meaning which responded to the political, philosophical, and social context of Spenser's own day. This course is open to all readers of any major who have ever wanted to explore Spenser's imaginative poetic fictions, or who have wanted to extend their knowledge of early modern English poetry beyond Shakespeare.
Offering: **Crosslisting**

Identical With: **CGST131B**
Prereq: **None**

ENGL132F The Library (FYS)
The library is not just a physical repository of texts. Rather, it is an institution organized around the fear of oblivion. It has developed all sorts of protocols and systems to save ideas, texts, and people from being lost to history. But fantasies of the infinite library and the pursuit of the perfect cataloguing system have, in turn, disciplined knowledge, produced new categories, and rendered entire traditions and histories unfindable via its organizing logics. In this course, we will approach the library as both a space for democratizing knowledge and a locus of exclusion too -- a lifeline and a tomb all at once. While we will read and write about different libraries across time and space, we will also ground many of our discussions in the holdings, spaces, and history of our very own Olin Library. One of the aims of this course, beyond introducing students to the intellectual history of the library as such, is to familiarize students with Wesleyan's libraries so that they can learn how to navigate its many resources in future courses and intellectual pursuits. To this end, we will spend a considerable amount of time in the stacks, in Special Collections, and learning from our librarians.

ENGL135 Writing about Research: U.S. Style
This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of

language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

ENGL141F The Revolutionary Rupture: Slavery, Latifundio & Rev. in Caribbean & Lat. Amer. Lit. & Cinema (FYS)
The word "Revolution" often evokes a vertical and/or eruptive image: a standing militant who was once a "premodern," non-European figure; a bottom-to-top explosion of imperial and colonial disorder and normative violence; a rising and world-overturning wind or "natural event." Does the eruption of an "event" worthy of the name "Revolution" begin on the imagined x-axis, say, of the earth's surface? Or does it point beyond that plane of seemingly commonly shared life? Or to that notion itself--i.e., commonly shared life--as a question? How do configurations of hell, heaven, God, Satan, the dead--what's below, what's above--come to bear in representations of "Revolutions"?

In this course, we will slow down, read, and work through these and other questions and figurations on the verge, in the midst, and/or seemingly on the other side of revolutionary ruptures--ruptures which are also returns. We will read select literatures and cinemas of Haiti, The Dominican Republic, Mexico, Guatemala, Puerto Rico, and Cuba that convey refusals of "given" life and death and that render different imperial, colonial, and neo-liberal systems of oppression and their attendant philosophies of the human, non-human, animal, native, enslaved, and blackened. The Haitian Revolution of the late 18th and early 19th century, insurrections in Chiapas before and after the Mexican Revolution of 1910, and 20th-21st century armed movements against U.S. economic and military invasions of the Caribbean and Central American regions would be the historical "flashpoints" of the course. While de-romanticizing the commercialized Che-t-shirt notion of "Revolution" in the U.S., we will, more importantly, encounter and deconstruct discourses of hetero-masculinity, modernization, mestizaje, whitening, and "development" that sometimes appear radical and/or revolutionary.

ENGL143L Introduction to TESOL
This Community-Engaged Learning course will explore social issues, classroom management, and current debates related to Teaching English to Speakers of Other Languages (TESOL), as well as learning languages in general. The course introduces the "best practices" of TESOL through current research, practical assignments, and students' reflection on their experience teaching English over the course of the semester. Students will critique existing materials, create their own lesson plans and activities, and conduct teaching demonstrations for our class. Working with community partners, students will also complete 20 hours of teaching/tutoring English Language Learners. This course fulfills both the pedagogy and practicum requirements for the Education Studies major and minor.

ENGL150F American Crazy: Four Myths of Violence and National Identity (FYS)
Among the industrialized nations of the world, the United States has long had unusually high levels of crime, violence, and imprisonment. This course will explore five especially prominent cultural explanations for American violence. We will consider the origins of these explanations in American myth and history, and we will investigate their appearance in literary expression, journalistic reporting, popular culture, and social science.

ENGL152F The Armchair Adventurer (FYS)
At the turn of the 20th century, stories of travel, action, and adventure enjoyed enormous market success and cultural prominence. This course examines the interaction between the adventure stories told in popular genre fiction--science fiction, historical romance, detective novels, children's literature, stories of overseas adventure, etc.--and their "high" literary cousins. We will read classic works of genre fiction in order to understand the appeal of these stories and storytelling modes, for both writers and readers, and to identify their generic structures, plots, and premises. And we will examine how prestige-oriented fiction drew from, adapted, and altered these conventions.

ENGL156F Contemporary American Literature (FYS)
This course will explore contemporary American literature by focusing on novels written by Jhumpa Lahiri, Colson Whitehead, Junot Diaz, Tommy Orange, Ocean Vuong, Mbue Imbolo, Edwige Danticat, and a play by Lynn Nottage. Extra readings will include poems and short stories. We will consider the portrayals of race, class, ethnicity, religion, trauma, citizenship, migration, and sexuality in these works, as well as the ways in which these authors conceptualize and problematize American identity.

ENGL161F Captive and Confined: Literatures of Imprisonment (FYS)
Is it more than just a metaphorical turn of phrase that causes us to speak of being held captive by works of literature and art? Or are there links between writing, reading, and being imprisoned that are as material as they are psychological? Our class will consider the relationship between spaces of confinement and writing to explore how various writers have used writing to respond to various states of captivity. Is carceral writing particularly captivating

to readers, and if so, why? We will read texts about prisons (physical and psychological), as well as texts written in prisons, to explore relationships among writing, power, literacy, and freedom.

ENGL162 Poetry Lab
The Poetry Lab is intended for first-year students interested in literature or creative writing. Come join us for a semester of hands-on experiments with the stuff of poetry -- interpreting and translating but also taking apart, writing over, scrambling, collaging. We will ask big questions: What is poetry, anyway? How and why do we read it? We will read some of the most powerful poems in the English tradition and explore how modern poets speak back to them or make new poems from their pieces. We will engage with important scholarly debates and encounter various theoretical and methodological approaches, inviting us to approach poetry as a self-enclosed artifact, as historical evidence, as a kind of thinking, or as political action. And we will also constantly tinker with poems, imitate them, and creatively play as we investigate the fundamental workings of language and meaning.

ENGL162F The Past and Present of American Journalism (FYS)
This course will expose students to the history of print culture in the United States and familiarize students with the current state of affairs in American journalism. Each week we will read historical and contemporary texts alongside one another, seeing how recent journalism continues in the tradition of older forms of public writing but also deviates from and altogether abandons them. Some of the assignments for the course will be critical, asking students to describe, explain, and make arguments about the texts they encounter; others will be creative, asking students to generate their own journalistic practices informed and inspired by the assigned readings.

ENGL163F Literature of London (FYS)
This first-year seminar examines the role of London in the literary imagination of nineteenth-century Britain. A vibrant multi-class and multi-ethnic jigsaw puzzle, London was a "world city" at the center of the empire, the seat of crown and Parliament, and a place of both danger and opportunity. In addition to being the economic and political center of Great Britain, some authors viewed London as the nation's narrative center as well. Together, we will explore how writers depicted the city, how they envisioned the relationship between urban living and modern life, how they understood London's inhabitants and their plots, and how they placed the city in networks of stories reaching around the world.

ENGL165F Querying the Nation: American Literature and Ethnic Studies (FYS)
This course poses the study of American literature as a way to explore issues of race and ethnicity in the United States. From 1960s student strikes demanding ethnic studies courses in California to recent dismantlings of the field in some high schools and colleges, the role of ethnic studies in education has been a topic of heated debate. We will examine a range of multiethnic texts to understand how they have generated critical frameworks for cultural study that are attuned to the contradictions of various American ideals. Toward the end of the course, we will direct some of our energies to investigating how ethnic studies has circulated at Wesleyan.

ENGL175F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

ENGL190F Place, Character, and Design: Techniques in Writing Nonfiction and Fiction (FYS)
We begin this writing course with questions central to students' work in both nonfiction and fiction: how to establish characters and a narrator's voice and how to frame the spatial and emotional world of the piece. The course encourages students to explore questions of design and structure while focusing also on style and technique at the sentence level. This creative writing course explores features of narrative and design that are central to work in fiction and creative nonfiction. We will also compare the design of college papers, written for academic courses, with pieces written for general readers. Readings include works by writers interested in these questions, including, in fiction, Andre Aciman, Vladimir Nabokov, Henry James, Robert Stone, Deborah Eisenberg, and Edward P. Jones, and, in nonfiction, Brian Doyle, Junichiro Tanizaki, Joan Didion, Charles Bowden, Mark Doty, Linh Dinh, Dubravka Ugresic, and George Orwell.

ENGL200 The Narratives of Illness and Recovery
This course provides a detailed examination of primarily first-person accounts of illness and recovery. The focus will be on narratives that deal with mental illnesses and trauma or the psychological aspects of physical illnesses. We will explore the relationship of story and narrative to the healing process. Students will analyze across texts the common psychological traits that lead to recovery and generativity, as well as the response to loss and the experience of suffering. Particular emphasis will also be placed on the role of "the wounded healer," those persons who have suffered and then choose to assist others who face similar predicaments.

ENGL201A Ways of Reading: Originality and Its Opposites
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL 201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

Believe it or not, the idea that a work of art should be unique, new, and inventive has a history, and it's a fairly recent one. In this section we will read novels, poems, and plays that embody or somehow resist the ideal of originality. We will start with theories of originality that emerged at the end of the 18th and beginning of the 19th century, and with contemporaneous texts that exemplify that aesthetic philosophy. Then we will turn to originality's many opposites: translations, collaborations, adaptations, forgeries and hoaxes, parodies, hymns and vernacular songs, and works that are so conventional or derivative as to fail the originality test. Throughout, since this is a section of "Ways of Reading," we'll pay attention to our expectations, experiences, and strategies as readers as well as to developing skills in discussing and writing about literature.

ENGL201B Ways of Reading: Unreliability
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. In this "Ways of Reading" course we will examine how notions of unreliability and indeterminacy shape literary writing and interpretation alike. We see this most obviously in the figure of the unreliable narrator in fiction, but we also grapple with the (un)reliability of poetic speakers in lyric poems. In fact, unreliability might as well be another way of naming and representing subjectivity. Learning to recognize and parse signs of subjective and/or unreliable accounts is a keystone of literary analysis because it helps us make sense of--and take pleasure in--how the story is told in addition to the content of story. Conversely, some literary texts turn the mirror on us (the readers); that is, they prompt us to reevaluate how our own assumptions, biases, and blind spots figure in our interpretations of texts and dynamics. In this course, students will read and write about a wide range of literary genres including novellas, short stories, lyric poems, and plays that thematize unreliability, confusion, and misprision. In so doing, they will learn to develop their own interpretations of literary texts and craft compelling and nuanced arguments.

ENGL201C Ways of Reading: Texts and Territories
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life. This is a course on reading and writing about literary works from a variety of genres and historical periods. We will focus on how these texts describe and define territory -- land, space, nature, environment, and sovereignty. Over the course of the semester, we will work toward an understanding of how our texts function both formally and historically, as documents of their respective eras -- from the Middle Ages to the present day. Together with each text, we will engage with critical articles that show how other scholarly readers approach literature using a wide range of methodologies.

Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL201D Ways of Reading: Stories and Storytelling
In this course we will read literary, philosophical, and scholarly works that explore stories and storytelling. Some of the questions we will consider are: what makes a story a story? What are its building blocks? How does it matter if a story is told in verse or prose, in a book or onstage, orally or in print? What human, personal, and societal needs are served by telling and consuming stories? How do literary texts incorporate or represent the activities of telling stories and of listening to, reading, and watching them? We will define and examine foundational aspects of literary narration, including first-person and third-person narrators, events, plot, voice, and setting and worldbuilding. We will also practice and develop skills in literary analysis and interpretive, scholarly writing.

ENGL201E Ways of Reading: Gifts, Debts, and Promises
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

This course will offer an introduction to the formal study of literature. Our discussion will be oriented by a consideration of poems, plays, and novels that address the bonds created among people by the exchange of gifts, promises, and debts. We will consider the way changing ideas about such bonds have been represented in literary texts and the way such ideas have affected our understanding of literature.

ENGL201G Ways of Reading: Contact Zones
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.

Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life.

In this course, our studies of 20th- and 21st-century works will focus on how various forms of "contact"--interracial encounters, travel and migration, genre mixing, etc.--produce literary tensions that comment on broader social and political worlds. In addition to analyzing texts from a range of genres, we will situate them in their historical contexts, approach them from a variety of critical perspectives, and examine how literary expressions of "contact" shape perceptions of the contemporary world.

ENGL201H Ways of Reading: Influence, Imitation, Invention
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit.
Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life. This "Ways of Reading" course will consider how works of literature respond to one another, imitating and departing from what has come before. We will learn to identify a writer's stylistic, rhetorical, and generic commitments, and we will develop a set of technical and conceptual approaches to reading to generate a facility and ease with the practice of close reading. At the same time, we will remain alert to the influence of historical, geographic, and social contexts on the production and reception of works of literature. As responsible readers, we will combine attention to a text's formal properties with an awareness of its situatedness within worlds--and literary histories--outside the text.

ENGL201K Ways of Reading: Borrowing and Stealing: Authorship and Originality in Literature
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life. This course will explore the meaning of authorship and originality in literary study. What does it mean to be original within a literary tradition? How do genres retain their coherence while also enabling originality? When does inspiration become plagiarism? Where do we draw the line between borrowing and stealing in literature? What legal, ethical, and historical frameworks help us to distinguish between them? How do such norms vary across genres and media? This course will focus on the different ways that poetry, fiction, and drama foster the recirculation of particular plots, figures, and formal structures while still maintaining the value of originality. We will pay particular attention to the crises of authorship that mark what Walter Benjamin famously called the "Age of Mechanical Reproduction." But we will also look at the central role that borrowing and rewriting has played in the very constitution of the idea of a literary tradition.

ENGL201N Ways of Reading: Adaptations: From Page to Stage
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. Ways of Reading courses develop strategies for careful and close reading, techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular

culture, and in the discourses that shape everyday life. This course investigates Black dramatic adaptations that have originated from poetry, short stories, novels, and historical events. Through multiple modes of inquiry, we interrogate form, genre, narrative, aesthetic, and intended audience as well as the social, political, gender, sexuality, and/or racial context of each literary piece. Within these various "page to stage" adaptation processes, we track the evolution of our source texts and chart the longevity and changeable dynamics of elements, such as character, theme, plot, point of view, setting, and time, as they appear within each dramatic iteration.

ENGL201P Ways of Reading: Autobiography
"Ways of Reading" introduces students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major, and only one of the ENGL201 series may be taken for credit.

"Ways of Reading" courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry, drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays; but also in political speech, in popular culture, and in the discourses that shape everyday life.

This "Ways of Reading" course will explore autobiography as an elusive and multifaceted literary form. We will ask: Who or what is the subject of autobiography? Who besides the author is implicated in the acts of writing and reading autobiography? How elastic are the distinctions between fiction and fact, self-reportage and self-fabrication within autobiography? What kinds of narratives and artistic forms count as autobiographical? To pose these questions, we will explore hybrid texts that splice together varying genres and forms under the umbrella of autobiography, including poems, memoirs, graphic memoirs, personal essays, metafictional novels, documentary films, performance pieces, and biomythographies.

ENGL201Q Ways of Reading: The Pleasures of the Text
Ways of Reading courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. Ways of Reading courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, in popular culture, and in the discourses that shape everyday life. This course introduces the bundle of characteristics we think of as "literary" and the methods for studying them, with an eye toward pleasure: What spurs us to read, and what spurs us to return to certain texts? We will develop strategies for careful and close reading and techniques for the analysis of poetic and narrative forms; we will examine the idea of literature as a social institution and explore ways of making connections between textual details and the world beyond the text.

ENGL201R Ways of Reading: Strange Inheritance
Language precedes us. Nay, writing does. What do "we" do with this inheritance? What is the relationship between language, writing, speech, technology, and violence in the "strange inheritance" configured in this course? And what specific insights into that relationship does this uncanny thing called "English" reveal? This foray into the English major weaves together Caribbean and British literature with literary and critical theory that meditate sometimes literally on each other and always on "shared" linguistic and colonial heritages--ones alternately preserved, cursed, and/or set on fire. We will reckon with "inheritance" as a figure and unravel what is destructive, desirous, and gothic in it by reading: Jamaica Kincaid's Annie John and Lucy; Jean Rhys' Wide Sargasso Sea; Charlotte Bronte's Jane Eyre; and parts of Gayatri Spivak's A Critique of Postcolonial Reason: Towards a History of the Vanishing Present. All of these texts structure and deconstruct themselves via unruly "feminine" figures who happen, also, to be damningly good readers. Supplemental to our readings of the aforementioned are select poems by Aimé Césaire, Derek Walcott, and William Wordsworth; selections from Frantz Fanon's Black Skin, White Masks; key works of structural linguistics and deconstruction; and some cinema. The framework and assignments are designed with both the literary and creative writing tracks of the major in mind.

ENGL201S Ways of Reading: Imitation and the Real Thing
Are artworks imitations of "the real world," or are they "real things" in themselves? And what happens when one artwork imitates another? This Ways of Reading course explores the relationship between artistic representation and the reality it tries to capture, paying particular attention to what happens when literature engages with other kinds of art. We'll read variations of the Pygmalion myth--in which an artist falls in love with his creation and it comes to life--across a range of genres: poems, short fiction, novels, plays, and film. We'll also turn to various forms of literary critical inquiry, from close reading to psychoanalytic theory, and various kinds of historicism to ask how these depictions imagine the act of artistic creation and the kind of truth-claims that literature makes. Along the way, we'll think about the ways that these meditations on the mediated nature of literature--depictions of the relationship between the art objects and the world, the act of reflection, copying, or imitation--are used to imagine social difference, including questions of class, gender, race, and national identity. Throughout the course, we'll be paying attention to the ways that texts construct and convey meaning.

ENGL201T Ways of Reading: Literature About Literature
"Ways of Reading" courses introduce students to the characteristics thought of as literary and the methods for studying them. This is a gateway course into the English major, and only one of the ENGL201 series may be taken for credit. "Ways of Reading" courses develop strategies for careful and close reading, and techniques for the analysis of literary forms such as poetry, drama, and prose narratives like novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. So while students will become adept literary critics, they also will learn quickly that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays; but also in political speech, in popular culture, and in the discourses that shape everyday life. This "Ways of Reading" course will ask: What is literature? We will read literature written by authors in their most playfully self-aware, self-interrogating moods: William Shakespeare raising questions about the nature and limits of imagination, Jane Austen dramatizing the perils of novel reading, and Tyehimba Jess celebrating the history of Black expression. Throughout, we will reckon with literary texts on their own terms but also with the ways they have been read at different moments in history. What is literature and what was it? How do we read it? What methods and theories have been ascendant at different moments? And *why* do we read it? What are its pleasures, problems, and possibilities? How did we end up with an English Department organized like this anyway?

ENGL201Z Ways of Reading: Gifts, Debts and Obligations
Ways of Reading courses introduce students to the characteristics thought of as literary, and the methods for studying them. This is a gateway course into the English major. Only one of the ENGL201 series may be taken for credit. Ways of Reading courses develop strategies for careful and close reading as well as techniques for the analysis of literary forms such as poetry and drama, and prose narratives such as novels and short stories. They familiarize students with some of the protocols of the literary-critical essay, examine the idea of literature as a social institution, and explore ways of connecting textual details and the world beyond the text. The ways of reading learned in the course are powerful tools for critically assessing discourses that expand far beyond the realm of literature. While students will become adept literary critics, they also will learn that to be a literary critic is to read critically and carefully all the time: in poems, novels, and plays, but also in political speech, popular culture, and the discourses that shape everyday life.

This course will offer an introduction to the formal study of literature. Our discussion will be oriented by a consideration of poems, plays, and novels that address the bonds created among people by the exchange of gifts, promises, and debts. We will consider the way changing ideas about such bonds have been represented in literary texts and the way such ideas have affected our understanding of literature.

ENGL202 Investigative Storytelling
This creative writing workshop is designed for students who aim to craft new narrative work through investigative or documentary research. Students might create a play, a screenplay, poetry, fiction, creative nonfiction, a digitally driven project, or something else. We will study some existing investigative artworks--dramatic pieces by Moises Kaufman, nonfiction by Leslie Jamison, poetry by Robin Coste Lewis, documentary film by the Maysles brothers, long-form journalism by Nikole Hannah-Jones, and podcasts by Brian Reed. We will cover interview techniques, research strategies, issues of rights and intellectual property use, and structure/dramaturgy as we plan, research, write, and workshop material together. Class members will regularly share work-in-progress and offer feedback to one another. By the end of the semester, students will be well acquainted with best practices for crafting investigation-based pieces and will have completed full or partial drafts of their projects, depending on project scope. Students are expected to have some workshop experience.

ENGL202Z Contemporary Short Stories in Translation
This course will introduce students to a wide range of contemporary short stories from around the world, translated into English. We will read fiction from four geographical clusters--Nordic Europe, Latin America, East Asia, Western Europe--as well as from outside these relatively well-defined categories. Along with exploring the fiction itself, we will consider how the English-language publishing industry treats these different zones, as we acknowledge the risk of ending up with national or regional stereotypes. We will also keep in mind the translator's role as an active creator of the works we are reading. In week two, we will pay special attention to the crucial professional role of the translator in getting these authors published and recognized, and there will be in-class visits from one translator in each cluster. The objective of the course is to get a basic overview of different contemporary trends and traditions, and their various paths to publication in English, as well as hopefully finding one or two new favorite writers.

ENGL203 American Literature to 1865
This lecture course charts a selective path through the English-language literatures of conflict in North America. Our optic will be double: one eye on history, the other on literary form, and we will experiment with ways of dialectically combining these two lines of vision. The scope of the course is wide, but we will proceed in the style of an anti-survey. Rather than unifying America through a gathering of textual parts, we will attempt to understand how literary forms supply an important index of historical evidence even as their pleasures and contradictions refuse the stabilities of the evidentiary.

ENGL203A American Literature on Fire: Conquest, Capitalism, Resistance: 1492-1865
We begin with a 1938 Langston Hughes poem, a north star shining light on American unexceptionalism and then move back in time: from Columbus's dismemberment and enslavement of the Arawaks when demanding gold; to Cabeza de Vaca's feel-good handbook for the conquest of indigenous peoples; to Puritan inventions of a "God" that pulls the trigger; to Franklin's blowing the whistle on a mercantile capitalism he supercharged with a secular work ethic; to a Declaration of "Independence" in 1776 that provoked alternative declarations written by workers, women, and formerly enslaved persons in the 19th century; to Poe's readings of a Divided States of America (race, gender, domesticity) as gothic; to Douglass's representations of the tactical artfulness and subversions of "slave" culture; to Hawthorne's deconstruction of the Americanization of power; to Thoreau's entwining of collective protest and what he hoped would be an individualized escape route; to Melville's attacks on imperialism, racism, and class domination; to Elizabeth Stuart Phelps's critique of domestic slavery; to Stowe's socially transformative antislavery novel (whose sentimentalization recirculated stereotypes). Along the way, we will draw on Howard Zinn's classic A PEOPLE'S HISTORY OF THE UNITED STATES to help historicize the Americanization of inequality. During our literary-intellectual time travel, we will engage some of America's most "on fire" writers who make possible insights into the ideological foundations of American cultures, identities, and hegemonies that provocatively illuminate America's situation today (and offer some lessons for how to change it). And, not least of all, we will have critical fun throughout.

ENGL204 American Literature, 1865-1945: The Americanization of Power
Together we'll explore not only the complexities of American literature from the 1860s to 1940s, but also how this literature is usable today and excels as critical equipment that can advance our understanding of the modern Americanization of power (put narrowly, we'll develop insights into a "democratic" capitalism, what some called a "Robber Baron" plutocracy, that pulled off and contrived to maintain systemic class, gender, and ethnoracial hierarchies to reproduce its power). As we unpack the relationship of literary form and social form, we'll trace connections between historical developments such as the gothic genre and gender ideologies, domestic romance and the social reproduction of labor, realism and mass-urbanism, naturalism and immigration, modernism and imperialism, and narrative experimentation and anti-racism. The creative works of Emily Dickinson, Mark Twain, Stephen Crane, Henry James, Charlotte Perkins Gilman, Charles Chesnutt, F. Scott Fitzgerald, Langston Hughes, Ernest Hemingway, Eugene O'Neill, Nathanael West, William Faulkner, Richard Wright, and Zora Neale Hurston will help teach us to be more imaginative readers of literature, ourselves, and what America was, is, and might be. While pooling ideas about this, we'll savor the pleasures of reading inspiring and transformative writing. This is very much a thinking-intensive course.

ENGL204A American Literature, 1865--1945
This course considers the way a large range of American writers responded to the industrial transformation of the United States. We will look at the way writers conceived and understood the rise of the corporation, the growth of the metropolis, the surge of migration, and the expansion of American power through war and settlement, and we will consider the way such visions related to the writers' understanding of the nature of American culture and the significance of literary expression. Among the authors discussed will be William Dean Howells, Charles Chesnutt, Henry James, Mark Twain, Stephen Crane, Sarah Orne Jewett, Mary Wilkins Freeman, Kate Chopin, Edith Wharton, Frank Norris, T. S. Eliot, Willa Cather, F. Scott Fitzgerald, Langston Hughes, Ernest Hemingway, Jean Toomer, and Richard Wright.

ENGL205 Shakespeare
This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

ENGL206 British Literature in the Enlightenment: Individualism, Consumer Culture, and the Public Sphere
England was changing rapidly in the 17th and 18th centuries. Indeed, it is often said that this period was crucial for the emergence of individualism, consumer culture, and the public sphere--for the modern world itself. The period is sometimes described as the Age of Reason, but it was also an age of bawdy laughter, intense emotion, brazen self-promotion, serious faith, and gossip in coffeehouses and magazines. It was an age, too, of flourishing marketplaces, imperial expansion, slavery and abolition. This course will track how literary writers celebrated, condemned, participated in, or simply tried to make sense of

their changing moment (and the changing understandings of literature available in it).

ENGL207 Chaucer and His World
In this course, we will read Chaucer's fascinating dream-visions, The BOOK OF THE DUCHESS and THE HOUSE OF FAME and his best-known work, THE CANTERBURY TALES. We will also read selections from Chaucer's sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer's poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer's reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

ENGL209 From Seduction to Civil War: The Early U.S. Novel
This course examines the relationship between nation and narrative: the collective fantasies that incited reading and writing into the 19th century. We will study the novel as a field of literary production both in dialogue with European models and expressive of changes in national culture, a form that both undermined and reinforced dominant ideologies of racial, gender, and class inequality during this turbulent period of national formation and imperial expansion. We will consider the ways the pleasure of novel-reading depends upon, even as it often disavows, the world outside the story. Throughout our reading, we will trace the ways these novels both reflect and participate in the historical development of the United States during a period that spans national founding, the consolidation of northern capitalism and an exacerbated North/South division, expansion into Mexico and the Pacific, and civil war. Through close attention to literary form, we will continually pose the question, What is the relationship between literary culture and historical change? We will examine who was writing, for whom they wrote, and the situation--political, commercial--in which the American novel was produced and consumed. We will begin with the novel of sentiment and seduction and conclude with reflections on slavery and racial revolution on the eve of the Civil War, all the time asking about the ways the novel might seduce us into either tolerating or resisting the way of the world.

ENGL210 The Rise of the Novel
What is a novel? And where did this literary form come from? This course will explore some of the complexities of the "rise of the novel," one of the most important and oft-told tales of literary history. As we read fictions full of criminals, love letters, scandals, and satirical self-referentiality, we will think about the differences between early novels and the not-quite novels that preceded them. We will focus on how novels work through plot, character, and realist prose, as we also explore the ideological work that the form does. We will ask, too, about the workings of scholarly narratives like "the rise of the novel": how do these critical narratives help us, as novel readers, understand our relationship to the past and to the novel as a form? What do we get from thinking about novels as, say, first written by white men to express the attitudes and capitalize on the reading practices of an emergent middle class? Or as evolving from a less respectable, altogether sexier tradition of romance writing by and for women? What's at stake in our tendency today to keep continually returning -- and trying to remake as our own -- the world of early English novels, in Jane Austen fan fiction and shows like Bridgerton?

ENGL211 Calderwood Seminar in Public Writing: Writing Science, Writing Science Studies
This Calderwood Seminar in Public Writing will give students practice writing about science, technology, and medical studies for general audiences. It will also function as a capstone experience for SISP majors: students will have a chance to reflect on the methodologies and theories they have learned during their time in the program, while also using those methodologies and theories to analyze issues and texts in our world today. Students will work collaboratively, editing each other's work, and significant class time will be spent workshopping student writing. The aim will be to produce publishable pieces of cultural analysis for the popular press.

ENGL212 Too Much to Know: Nineteenth-Century British Fiction in the Age of Information
This course will investigate the relationship between literary production and new models of scientific evidence during the heyday of Britain's global power. We'll ask how novels grappled with new scientific paradigms and forms of evidence, the invention of anthropological fieldwork, the police archive, the geological and fossil record, the statistical average and explore how those developments were reimagined through British fiction between 1830 and 1900. We'll focus on the theories of self and other that accompanied new scientific methods the categories of primitive, deviant, minor, pathological, everyday and the relation of this research to the construction of evidence, the scientific self, labor, and gender as social, historic, and economic processes. We will read fiction by Gaskell, Eliot, and Carroll, alongside social theory by foundational thinkers of the nineteenth century (Marx, Simmel, Martineau) and our own (Barthes, Said, Steedman). As a part of the course, we will also extend the conceptual questions raised by research to our own work, as we explore a range of scholarly tools and methods -- from special collections archives to digital databases -- in reflecting on the practices and infrastructures of research. The class will include trips to Wesleyan Special Collections.

ENGL213 Literature and Black Feminism: The Dramas of Black Capital
This class explores Black women's fiction as a mode of critique and intervention into Black Americans' complicated relationships with social and economic capital in the wake of US chattel slavery. How do Black people negotiate the transition from being to owning property? How does the persistence of capital, even in the absence of the system of racial slavery that ushered it into being, continue to shape Black institutional access and Black intramural relations? How are white, Western regimes of value--constructed as they are through the production of racial-sexual difference in dominant habits of thought and representation--contested and, at times, recapitulated in Black social life? How does Black women's literature take up these questions, and what about Black women's literature uniquely equips it to meet this challenge? Ultimately, the course takes seriously Black women's literature as Black feminist thought, exploring how it indicts and imagines beyond the violence of modern racial capitalism.

ENGL216 Techniques of Poetry: Self, Self Divided, Self Revised
One difference between poetry and the other arts is the reader never asks of a poet "how did they do this," because the only possible answer is both poet and reader arrive to language simultaneously. No one really questions the why of a poem because language is already communion. After all, we use language every day to get by. But in those moments of extreme feeling, there is an overwhelming desire -- to borrow George Eliot -- to roar on the other side of silence. So, why and what is poetry? In this introductory course, we'll read variously from a breadth of traditions, exploring poems of the self, the self no longer possible as it lives, and the self revised and revived to an ever-shifting world.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL216A Techniques of Poetry: Hidden Histories
Through a series of immersive reading and writing experiments, we will work toward uncovering and preserving histories that might otherwise be forgotten. In order to do this, we will study the documentary and investigative techniques poets have employed while attempting to write about hard-to-articulate events like grief, secrecy, unrecorded events, ecological disasters and environmental concerns, traumas, racism, gender politics, bright-but-fleeting moments of existence, and hauntings of all kinds. We will read and record accounts that cannot be told but must be told. We will work to uncover--and possibly heal--areas of historical numbness. We will explore poetry's relationship to preservation and the dynamic bonds between representation and reparation. And we will rewire history through history, making use of archival materials, public testimony, newspaper accounts, photographs, family documents, and more.

Guided by critical and creative investigations, in-class writing experiments, and extended projects, students will compose poems inspired by their own research. There will be presentations on the literature we read, as well as class discussions and workshops of one another's creative work. The class will culminate in a book arts project and a reflective essay.

Special attention will also be given to cultivating community and the benefits of sustaining an embodied artistic practice during extreme times and how doing so may benefit the health of the whole artist.

ENGL218 "The History that Hurts": Reading Saidiya Hartman
This course will introduce students to the major works of the Black literary theorist and cultural historian Saidiya Valarie Hartman (b. June 25, 1961), who was named a 2019 MacArthur "Genius" Fellow in Literary History and Criticism and American History. After graduating from Wesleyan in 1984, Hartman earned her PhD in American Studies from Yale in 1992; she is currently a professor in the Department of English and Comparative Literature at Columbia University. Students enrolled in this course will read and write about Hartman's trilogy of scholarly monographs: "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (Oxford University Press, 1997); "Lose Your Mother: A Journey Along the Atlantic Slave Route" (Farrar, Straus and Giroux, 2007); and "Wayward Lives, Beautiful Experiments: Intimate Histories of Riotous Black Girls, Troublesome Women, and Queer Radicals" (W. W. Norton, 2019). Finally, if her new book project is published before the syllabus is finalized, then students enrolled in this course will also read and write about Hartman's fourth scholarly monograph (tentatively titled "N Folio: An Essay on Slavery and the Archive"").

ENGL219Z Homer and the Epic
IN-PERSON COURSE: 10:00am-noon and 1:00pm-3:00pm, Monday through Friday. Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings.

In this course we will read both the Iliad and the Odyssey (in English translation). These two great epics are recognized as the first major texts of the Western literary tradition, and they have had an incalculable influence on everything from literature, to history, to the visual arts. Through a close reading of both epics, we will consider issues such as Homeric composition and poetic practice, heroes and the heroic code, the relation between humans and gods, the role of fate, and the structure of Homeric society (e.g., the status of women; clan and community). We will also read a number of contemporary critical essays to help us frame our discussions.

Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

Prereq: **None**

ENGL220 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

ENGL221 The African Novel
This class considers several canonical novels from sub-Saharan Africa. Our focus will be on their aesthetic and thematic properties; the novels are not meant as introductions to African histories, cultures, peoples, or practices. We will explore instead the specific subjects and styles of each work in the context of wider debates about orality, language, colonialism, gender, and the novel. To fathom the political and aesthetic stakes of African literary canon formation, we will also attempt to identify what makes a work canonical.

Prereq: **None**

ENGL222 Poetics of Blackness
This course brings together Black critical theory and contemporary Black poetry in order to think through key sites of conflict in the theorization of Blackness. Rather than offer a literary history of Black poetry, this course is interested in approaching poetry as a crucial node of Black critical thought. Throughout this course we will pay particular attention to questions of form, genre, archive, queerness, gender, affect, visuality, ontology, and temporality as they approach and are undone by Blackness.

Prereq: **None**

ENGL223 The African Novel II: After Achebe
Chimamanda Ngozi Adichie's 2003 novel, Purple Hibiscus, summons Chinua Achebe, the "grandfather of African literature," in its opening line: "Things started to fall apart at home when my brother, Jaja, did not go to communion." While Achebe is a formative influence on Adichie and on many other contemporary African writers, the central preoccupations of African literature have shifted considerably in recent years. This class will consider recent topics animating the field. These include debates about Afropolitanism, the role of publication houses and prize committees in the canonization and circulation of texts, queer African literature, African-language literature, and the position of African literature vis-à-vis world literature. Readings will be chosen from among the newest novels and short stories in publication.

ENGL224 Special Topics: Merging Forms
In this workshop for first- and second-year students, we will explore works that unsettle, cross, merge, hybridize, and otherwise play with genres--fiction, poetry, nonfiction--and with readers' expectations of such boundaries and conventions. We will look closely at how a range of writers both depend on and interrogate definitions of genre, while keeping in mind that such definitions are themselves historical constructs. Students will experiment with various forms in their own work, in shorter exercises, and in longer assignments.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL225 Transpacific Ecologies: Race, Literature, Environment
Although our climate emergency is undoubtedly planetary, the writer Amitav Ghosh has argued that the continent of Asia is in fact "conceptually critical to every aspect of global warming." This course explores how writers from both sides of the Pacific confront the Anthropocene and its related disasters of climate change, species extinction, deforestation, chemical pollution, and oceanic waste. Theoretical readings will address the challenges that the Anthropocene poses to literary representation, the literary innovations and strategies that have emerged in response to environmental crisis, and the question of what a specifically Asian/American (or transpacific) perspective on the environment introduces to ecocriticism. Fictional works will address specific ecological crises such as the 2011 Tohoku earthquake and tsunami and also attend to less punctual conundrums, including: recognizing nonhuman interests and assemblages; envisioning collective human agency; representing vast and complex planetary systems; coordinating human and geological histories; and assimilating scientific models and perspectives. In all cases, we will be particularly attuned to the question of how ecological problems impact literary form, asking which tools writers use to capture the new realities of today's climate emergency?

ENGL226 Sublimity, Visions, and the Self in British Literature, 1789-1830
This course is an introduction to British literature from the 1790s to the 1820s. We will trace three central thematic and formal preoccupations through the poetry, fiction, and philosophical prose of the era: (1) sublimity and the Gothic; (2) the imagination, dreams, and visions; and (3) individualism and interiority.

No experience with philosophy, history, or British literature is expected; the course functions as an introduction to all of them and, in this sense, to the interdisciplinary study of literature.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL227 Reporting for Narrative
Narrative nonfiction--a.k.a. feature writing, or literary journalism--deploys exhaustive reporting and research in a form that draws on the tools and traditions of literature: character, plot, and scene, along with essayistic inquiry and lyric attention to the line. This course, structured as a weekly writing seminar, will provide an editorial and critical scaffolding for students to produce a final work of long-form nonfiction of their own, which will go through a rigorous process of development and revision. Workshopped peer critique of writing in progress will be supplemented by discussions of readings in the craft of nonfiction, the theory of narrative, and classic and contemporary examples of the form, from magazine features to book-length dispatches.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**

Prereq: **None**

ENGL228 Life Writing: Writing About the Self and from Experience
This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include Shadd Maruna, William Styron, Mary Karr, Donna Tartt, James Joyce, and many others.
Offering: **Crosslisting**

ENGL230 Introduction to Asian American Literature
This course introduces students to Asian American literature, culture, and literary criticism. In addition to exploring narratives concerning Asian American migration, exclusion, citizenship, and intersectionality, we will also focus on newer critical trajectories. These include Asian Americans and the U.S. and Global South, genealogies of violence, recent trends in Asian American and diasporic popular culture, climate change, and critical refugee studies. By examining a range of genres and critical methods, this course will advance understanding of how Asian America has shaped the making of American culture and history.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL231 Foundations: Nation, South Asia, Diaspora
This course examines the relationships between the central narratives of South Asia and those of the global diaspora. What stories have been central to the idea of South Asian identity, experience of imperialism and colonialism, and nationhood? How have those stories been useful in navigating going to and living in global diasporic locations? Beginning with The Ramayana, our class will see its characters, plots, and messages adapted to diaspora, in such works as Life Isn't All Ha Ha Hee Hee, and Sita Sings the Blues. Salman Rushdie's Midnight's Children and The Satanic Verses respond to fairy tales and even the Koran, as they circulate globally. India's much loved R.K. Narayan's The Guide serves to direct us to the worldwide phenomenon of Bollywood films, particularly those considering what it means to be South Asian in diaspora, such as Dilwale Dulhania Le Jayenge or Swadesh.

ENGL232 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100--1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

Prereq: **None**

ENGL233 All Ah We: Contemporary Afro-Caribbean Drama & Performance
What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

ENGL234 Introduction to Postcolonial Theory
The 1978 publication of Edward Said's Orientalism signaled the presence of postcolonial studies, a field of intellectual inquiry that proved influential in the humanities and social sciences. How, from our vantage point, do we understand both the age of imperialism/colonialism, and what happens afterwards? What are the conditions of decolonization and national independences? How do the cultures of the formerly colonized countries use and modify imperial vestiges, and invent themselves anew? Central to our course will be the work of three major theorists in the field of postcolonial studies: Edward Said, Gayatri Spivak, and Homi Bhabha. Among other important ideas, we will discuss Orientalism, subalternity, and mimicry.
Offering: **Crosslisting**

Credits: **1.00**
Gen Ed Area: **HA-EDST, SBS-EDST**
Identical With: **EDST241**
Prereq: **None**

ENGL235Z Children's Literature
Probably the first literature we fall in love with, children's literature shapes individuals and cultures in profound ways, giving us ways of seeing and understanding the world, investing us with important mythologies, and guiding our identities and behaviors. But who or what is a child? Who creates "children's literature" and what is a child's relationship with it? "Literature," in this case, is often pictorial as much as literate. Our intensive Winter session class will begin with definitions of the child, using images as well as historical and scholarly discussions, then move to an examination of picture books. Illustrations and fairy tales both guide lessons in literacy and language skills, and illuminate the world the child is entering. Next, we examine three authors from the golden age of children's literature in the U.S.: Louisa May Alcott, Mark Twain, and Frances Hodgson Burnett. The course moves into the twentieth century with Laura Ingalls Wilder's creation of the American frontier mythology -- and Louise Erdrich's answer to it. We conclude with Christopher Curtis's The Watsons Go to Birmingham and J.K. Rowling's Harry Potter: a specific history of the U.S., and the allure of historical nostalgia.

Identical With: **EDST241Z**
Prereq: **None**

ENGL236 British Modernist Fiction
This course will introduce students to British novels from the modernist period of 1900-1945, a time of massive formal innovation. We will explore the formal, thematic, and philosophical features of British modernist fiction through close readings of novels and through occasional readings in essays of the period and more recent criticism. This course will provide a broad, if necessarily selective, picture of modernist fiction in all its considerable variety. In addition to some iconic examples of high modernism, we will read some arguably minor novels as well. Much of our attention will be on modernism's recurrent concern with the meaning of modernity itself. Are modernism and modernity identical, antagonistic, or mutually dependent? How is modernism implicated in Britain's waning imperial fortunes? Is modernism avant-garde or canonical, elitist or engaged with popular culture?
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL237 The Sonnet: Forms of Love, Death, and Beyond
This course explores motifs of love, death, and beyond through a single poetic form: the sonnet. We will read transhistorically from the "invention" of the sonnet in the 13th-century Sicilian School to its use in contemporary American poetry, touching on poets in a variety of languages and time periods. From individual poems to sonnet sequences, we will explore the way in which lyric poetry engages non-narrative modes of meaning-making within the formal expectations of the sonnet. Are sonnets uniquely adapted to types of experience which defy easy articulation? In what ways does the form of the sonnet make it possible to give literary representation to the ineffable? This course pays close attention to the relationship between form and content in a variety of poetic works. Poets to be read include Dante, Labé, Shakespeare, Inés de la Cruz, Barrett Browning, Yeats, Millay, Rilke, and Stallings. Writing assignments will include both creative and analytic writing.
Offering: **Crosslisting**

Prereq: **None**

ENGL238 ST: Nest, Wave, Spiral, Bloom: A Cross-Genre Workshop
With Gaston Bachelard's classic The Poetics of Space and Jane Alison's Meander, Spiral, Explode: Design and Pattern in Narrative as our guides, we will examine a series of natural forms to deepen our writing practice and to discover new narrative possibilities. What can the spirals of nautilus shells and galaxies reveal to us about how to map a timeline of events for our poems or stories? What can the horizon teach us about consciousness? What can the effects of tidal patterns help us understand about trauma's effect on epigenetic inheritance and how to best represent that complexity on the page syntactically and visually? What can the silkworm teach us about poetic structure? What can a glacial moraine teach us about time in the sentence? What can a river teach us about narrative voice? In the company of writers like Mei-Mei Berssenbrugge, M. Nourbe, Se Philip, Jamaica Kincaid, Anne Carson, Inger Christensen, Jen Bervin, Clarice Lispector, Cecilia Vicuña, Angela Rawlings, and others, we will discover what becomes possible when we write in collaboration with (re)generative forms.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL238Z Jane Austen and Her World
In this course we will explore Jane Austen's unique approach to the realist novel and her distinctive engagement in contemporaneous debates about art, personhood, and politics. Austen was a sharp, subtle, and principled writer who tended to explore competing arguments and assumptions rather than render explicit judgments. She weighed in on aesthetic controversies involving beauty and the picturesque, the appropriate language for literature, the ethics of readers' identification with characters, and the truth claims inherent in realism. She considered philosophical questions about how individuals come to know the world and themselves, and the value and danger of a complex inner life of emotion and imagination. She examined the competing claims her contemporaries made for the primacy of the individual, the family, and the community, and for local rootedness and cosmopolitan independence. Our course reading will consist of three novels by Austen as well as works of painting, literature, and nonfiction prose. Students will complete frequent exercises designed to open up new ways of encountering and investigating a literary text. Curiosity and a willingness to experiment are the only prerequisites.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**

ENGL239 Anticolonial/Decolonial: Literature and Film
This course examines how histories of twentieth century anti-imperialist writing and cinema are relevant for contemporary decolonizing agendas. We will compare works by colonial and postcolonial theorists, writers and filmmakers, to examine how literature and film address processes of colonization, anti-imperialist struggle, decolonization, and neo-colonization. Readings will be drawn from a range of countries in both the Global North and South and films include Ousmane Sembène's La Noire de.../Black Girl (1966), Gillo Pontecorvo's The Battle of Algiers (1966), Sarah Maldoror's Léon G. Damas (1994), Stephanie Black's Life & Debt (2001), and Ciro Guerra's Waiting for the Barbarians (2019).

Prereq: **None**

ENGL240 Introduction to African American Literature
This course will introduce students to African American literature. It will be divided into two parts. The first will pay particular attention to the experience of enslavement by focusing on several unique primary and secondary textual couplings, including (but not limited to): Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) and Saidiya Hartman's "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (1997); and Harriet Jacobs's "Incidents in the Life of a Slave Girl" (1861) together with Hortense Spillers's "Mama's Baby, Papa's Maybe: An American Grammar Book" (1987). In addition to these classic 19th-century slave narratives and contemporary sources, then, the first part will also include supplementary readings by Kenneth Warren, David Blight, Angela Davis, Alexander Weheliye, Spillers, Hartman, Farah Jasmine Griffin, Shelly Eversley, Jennifer Morgan, and Frank Wilderson. The second part will focus on 20th- and 21st-century African American literature and literary criticism. It will bring together a wide range of readings from across genres and disciplines, attempting to sketch out the major aesthetic and political features of the black literary project. Authors here will include W. E. B. Du Bois, Booker T. Washington, Michael Rudolph West, Hazel Carby, Cheryl Townsend Gilkes, Alain Locke, Shane Vogel, Alice Walker, Zora Neale Hurston, Richard Wright, Ralph Ellison, Asia Leeds, Roderick Ferguson, Claude McKay, Amiri Baraka, James Baldwin, Toni Morrison, Samuel Delany, Octavia Butler, Teju Cole, Ta-Nehisi Coates, Cornel West, Claudia Rankine, Warren, and Fred Moten.

ENGL242 Longform Narrative
This course will explore techniques and theories that sustain multifaceted and long narratives in fiction and nonfiction. Students will read texts that transpire over many pages, over long periods of time, and which involve deep explorations of character, setting, and theme. Readings will draw on various genres: classics ("Crime and Punishment" and Thomas Mann's "The Magic Mountain"), crime fiction (Donna Tartt's "The Secret History"), and narrative nonfiction (Rebecca Skloot's "The Immortal Life of Henrietta Lacks" and Gay Talese's "Honor Thy Father"). We will examine and explore the elements that sustain long and complex stories. Students will write one very long (50-page) essay or piece of fiction over the course of the semester.

ENGL244 Kill Anything That Moves: The Vietnam War in Literature and Film
This course examines various forms of literature and film to understand the legacies of one of the most transformative events in American culture and history: the Vietnam War. "Kill anything that moves" was the order that American soldiers reportedly received while on the ground in Vietnam, yet, to a large extent, the historical focus on the American experience of the conflict has overshadowed other perspectives. Thus, this class will take a comparative approach, exploring works by canonical and noncanonical American, Southeast Asian, and Southeast Asian American authors and directors. Among the diverse genres we will study are prose, poetry, graphic narrative, and narrative and documentary film. To think about the Vietnam War's broader relevance, we will situate the works under study within current debates concerning refugees, genocide, human rights, and the complex politics and aesthetics of war representation. Students will have the opportunity to investigate an under-studied aspect of the Vietnam War toward the end of the semester.

ENGL245 Introduction to Literary Theory: Suspicion, Ideology, Deconstruction
There are ways of reading concerned with fixing, policing, and reifying assumed meanings, as well as the violent, normative structures that ground them, and there are ways of reading to the limits of what is (un)certain yet articulatable--reading that renders visible so as to destabilize antiblack, colonial, sometimes literalist and other times deceptively metaphorical constraints on language and invention. This course is devoted to the latter, as it is to disturbing normativity's self-entrenched truths, for normativity's colonial and imperial impunity and sedimentation are not the same things as eternal. While some approaches to language, and the ideologies they shroud and animate, might promise the seeming comforts of sudden breaks with history and complicity, or safekeep status quo notions of prophetic fulfillments of history as it was allegedly supposed to be, the texts of this course are less pious, and move more slowly, suspiciously, and "weirdly" with the linguistic structures of being and time. The reading modes featured in the course (i.e., deconstruction, black critical theory, Afro-Caribbean negative thought, speculative theories, and mysticism) would compel ideologically gnarly forces to tremble--exposing their violence and suspending any swift retrenchment to the very mechanisms that made such possible. And they ask us: what transformations might be necessary to not restore power to the very juggernauts we, as readers, have worked to possibly make tremble? In other words, how do we read literature and theory to learn how to read any use of language for ideology and not only locate, say, representations of sovereign violence in such, but even--dare we think it?--initiate depositions of power, and invent?

ENGL247 Imperial Education: Colonial Template
Where, how, and for what reasons did our modern structures of education originate? Beginning with the sketching out of an educational model in the British Raj, we will examine the dissemination of that model globally, in the British and French colonies of Asia, Africa, the Americas, and among immigrants and the proletariat. How and where does that model change, and to what effect? History will provide the context for our major subject matter: literature focussing on the educational experience. Among our historical and theoretical readings will be Macaulay's Minute on Indian Education, Viswanathan's The Beginnings of English literary study in British India, Wa Thiong'o's Decolonizing the Mind, Freire's Pedagogy of the Oppressed, and José Marti's On Education. We will also analyze literary texts and films, including Narayan's The English Teacher, Beti's Mission to Kala, Dangarembga's Nervous Conditions, Adichie's Purple Hibiscus, the film Sugar Cane Alley, and others.

ENGL248 Shakespearean Revolutions
Shakespeare's works emerged during a period of revolutionary social, political, religious, economic, and cultural change, including the Protestant Reformation, the rise of print culture, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the emergence of the first, purpose-built, commercial playhouses. Innovations in dramatic form and genre, which Shakespeare helped craft, sought in varying ways to make sense of these momentous shifts for diverse theater publics. Revivals and adaptations of his works on stage and screen during times of revolutionary change have rendered the Shakespearean canon a site of subsequent social and cultural contestation. This class considers the "revolutionary" dimension of four Shakespeare plays both in their own time and place, and in later theatrical and filmic productions and adaptations. We will trace first-, second-, and third-wave feminist reimaginings of "The Taming of the Shrew"; Second World War- and Vietnam War-era renderings of "Henry V"; civil rights and anti-apartheid era restagings of "Othello"; and attempts to decolonize "The Tempest."

ENGL249 Data and Culture
What does the mass digitization of the print cultural record mean for the making and study of literature, art, and culture? This course introduces students to the critical and cultural study of data by introducing key debates around the meaning of data in the humanities. Like "slow food"--a movement where diners, farmers, and chefs rethink what and how we produce and consume--we will explore data as local, embedded, and requiring careful critical reflection. How can computational tools help us to understand art and literature? What do digital archives reveal (or obscure) about the people who make them? What kinds of writing have, historically, been seen as "uncreative" or automatable and what might this reveal about ideas of labor, gender, race, class, and computation? We will explore the foundations of this field while also discussing concerns that emerge when accessing and maintaining digital cultural artifacts in time and across global and local contexts. Weekly readings will introduce concepts for understanding the cultures (and cultural artifacts) that produce and are produced by data and key techniques that humanities researchers use to organize, mediate, and analyze digital sources. This course will draw on a range of critical traditions, including history of the book, media studies, science & technology studies, computational literary studies, and critical data studies. Students will explore these methods through reflection papers, short code assignments, exercises in data curation and critique, and final projects. Course meetings will alternate between discussions and workshops with data from local libraries and special collections, including Olin Library Special Collections & Archives.

ENGL250 Technologies of the Self
Where does the idea of an authentic self come from? The desire to represent the authentic self informs the narrative genres of the confession and memoir and visual ones of the selfie and self-portrait alike. Yet both the memoir and the selfie "self" are mediated, first, via the technologies of print and screen, and second, via the conventions of particular genres that make these legible as a memoir and selfie, as opposed to, for example, an interview or a portrait. In this course, we will examine how different technologies not only represent but produce the self. These technologies include "writing" technologies: print and digital; genre and medium (autobiography, the slave narrative, memoir, self-portraits, and selfies); and technologies of the state, which produce citizens, subjects, and humans.

ENGL252 Animal Theories/Human Fictions
The question of "the animal" has become a recent focus of theory, although depictions of nonhuman animals can be traced to the very origins of representation. This course will move among literature, philosophy, art, and theory in an effort to trace the changing conceptions of human-animal difference and human-animal relations from 18th-century fictions of savage men and wild children to current theories of the posthuman. We will consider the ways that the representation of "the animal" intersects with theories of gender and race as it also contests the grounds of representation itself. Authors may include Rousseau, Poe, Sewell, Mann, Colette, Coetzee, Heidegger, Agamben, Derrida, and Harway.

ENGL253 Science and/as Literature in Early Modern England
Seventeenth- and 18th-century Britain saw the development and popularization of the "new science." Microscopes, telescopes, air pumps, automata, and experiments captured the popular imagination. The first important scientific societies and journals were founded, and the public learned about new discoveries through sermons and coffeehouse lectures. British science was brought to its colonies across the globe, and it was shaped, in turn, by the different natural products and the brutal realities of slavery there. This course will trace the literary reaction to these cultural changes. A woman natural philosopher wrote utopian science fiction, and satirists skewered mathematicians and experimenters. While the best of early 18th-century nature poetry takes Newton quite seriously as it depicts the way light glimmers off objects, by the century's end William Blake villainized Newtonian thought as reductive and deadening. We will try to understand what writers found exhilarating, scary, confusing, hilarious, or important about science at this key moment of its development. At the same time, we will read this science as literature--considering, say, Francis Bacon's symbolically fraught "idols" and Robert Boyle's "literary technology," the role of poetry in spreading scientific ideas and the importance of analogy and metaphor to the very logics that structured scientific thought. The disciplines of science and literature were not as cleanly separated in this period as they are now, and we can better understand both by exploring their intersections.

ENGL254 India: Identity, Globalization, and Empire
In this course, we will read literature and watch films that shed light on how various socio-economic and political trends have impacted India and its inhabitants during the twentieth and twenty-first centuries. We will begin our study in the early 2000s, when the country made international headlines for being a "globalization" success story and a new global superpower, and then move backwards in time to the post-colonial and colonial eras. We will discuss various questions: What exactly is globalization, and is it something new and

inevitable? How is it related to empire, and how do entities like globalization and empire impact the evolution of both individuals and communities? We will watch Bollywood and Hollywood films and closely examine the literature of Partition. We will discuss the undying presence of communal violence in modern India, and the rise of the Hindu Right. We will read English-language texts, and also texts translated from Urdu, Hindi, Kannada, Malayalam, and Bengali. English/GSAS 254 fulfills the gateway requirement for the GSAS major and minor

ENGL255 The Comic Novel in the Long Nineteenth Century
This course examines the tradition of the comic novel from the origins of the novel itself to the early twentieth century. We will begin by examining the two models for the comic novel that emerged at the beginning of our period, Fielding's TOM JONES and Austen's PRIDE AND PREJUDICE: a narrator who is colloquial and digressive or reclusive and ironic; a plot that is episodic and fragmentary or unified and spare; an ethical scheme that relies on satire and social commentary or on poetic justice and the implications of theme. We will then trace the ways later writers drew on and rebelled against those two modes. While enjoying these very funny books on their own terms, we will also take seriously their experiments with narrative form; their complicated relationship to the categories of "the novel," comedy, realism, and modernism; and their engagement with the social, economic, and political tensions of the world they depict, however hilariously.

ENGL255Z Writing the Body
How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Melissa Febos, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

ENGL256 Comedy and the Comic Spirit in the Long 19th Century
This course follows the Comic Spirit (as novelist George Meredith called it) as it frolics through nineteenth-century literature and popular culture. We will examine how writers experimented with traditional elements of comedy such as courtship plots, playful language, and eccentric characters as well as with universal aspects of storytelling such as the narrator's voice and the ethical implications of poetic justice. While enjoying these hilarious works on their own terms, we will also take seriously their experiments with narrative form; their complex relationship to the categories of the novel, comedy, and realism; and the ways humor created links between literature and the visual and musical arts. This course fulfills the English Department's Literary History II, Theory, and British Literature requirements.

ENGL257 Introduction to Detective Fiction
This seminar introduces two intertwined genres: detective fiction and crime fiction. Surveying a range of British, American, as well as postcolonial writers from Kenya and India, we'll explore how novelists and short story writers imagined the operations (and failures) of law, justice, and truth in different historical moments, and towards different ends. We'll learn some techniques for analyzing detective fiction--from its form, to its format in early periodicals, to its social and historical and political subtexts. We will pay particular attention to the ways of knowing the genre enables--from the early colonial detective fictions and constructions of race to the later-day crime fiction that uses the genre to stage problems of adjudicating and redressing imperial harms. Along the way, we'll use these at-times pulpy mysteries to think through the status of genre fiction in the university canon and the relationship of art, entertainment, and commodity.

ENGL258 New World Poetics
God and money, love and beauty, slavery and freedom, war and death, nation and empire: The themes of early American poetry will carry us from London coffeehouses to Quaker meetinghouses, from Philadelphia drawing rooms to Caribbean plantation fields. Our texts will range from pristine salon couplets to mud-bespattered street ballads, from sweetest love poems to bitterest satire. Digging deeply into the English-language poetry written, read, and circulated after the first English settlement in North America, we will trace the sometimes secret connections between history and poetic form, and we will listen to what these links can tell us about poetry and politics, life and literature in our own time. Our poets ignored false divisions between art and society, and so will we.

ENGL259 Fact into Fiction
Although we think of literature as the realm of the imagination, many works of fiction are inspired by facts. A Kentucky slave's attempt to murder her child rather than let it grow up in bondage; a bombing in Saigon that ushered the U.S. invasion of Vietnam; the transformation of the Congo in the years after its independence from Belgium; and the epic journey of the bank robber Ned Kelly in Australia: all these are true events that have inspired the novels we might read in this seminar. How do novelists take history and turn it into story? How do they fashion characters out of real people? And how do they create fully realized worlds none of us who are alive have seen? We will examine aspects of characterization, point of view, plot, narrative time, setting, dialogue, language, structure, themes, imagery, and subtext. We will also read some theoretical texts to help us expand the language we use to describe and discuss novels. The goal of this seminar is to teach you to read like a writer.

ENGL259Z The Art of the Personal Essay
We all have stories to tell. But there is hard work in the act of transforming our intimate experiences into meaningful and captivating stories. This course dives into this labor by focusing on the craft of essay writing. Quite specifically, students will practice a variety of creative nonfiction writing techniques as a means of critically reflecting and analyzing personal experiences in order to produce essays that speak to readers in and outside of our immediate communities and contexts. Course assignments will include a writer's journal, workshop letters to classmates, two micro/flash essays, a longer essay whose subject and style is decided by the writer, and a reflective collage essay. Readings will include essays published notable essayists and memoirists such as (but not limited to) Kiese Laymon, Jose Antonio Vargas, Zadie Smith, and Gloria Anzaldúa. We will also read chapters from Mary Karr's book on writing craft, The Art of Memoir.

ENGL260 The Word for World is Information: Ideologies of Language in Science Fiction & Film
By the middle of the 20th century, it had begun to seem possible to produce a grand theory of communication that would use language as a basis for understanding all of human thought, behavior, and culture. As competing versions of such a theory circulated through academic disciplines as disparate as anthropology, neurophysiology, and the emerging field of computer science, they also filtered out--sometimes in strangely warped or oversimplified forms--into popular culture.

This course will examine the most interesting and influential of these theories, both in their scholarly origins and in their most puzzling and promising elaborations in works of literary and filmic science fiction. We will be particularly attentive to the ways that the narrative logic of science fiction texts can gloss over certain logical and philosophical inconsistencies in these theories while revealing others.

ENGL261 "Before the 'Body' there is the 'Flesh'": Reading Hortense Spillers
This course will introduce students to the major works of the black feminist theorist and literary critic Hortense J. Spillers (b. April 24, 1942), one of the greatest essayists and most gifted intellectuals of our times. While her published writings are legion, Spillers is perhaps best known for her scholarly article titled "Mama's Baby, Papa's Maybe: An American Grammar Book" (originally published by Diacritics in 1987). In addition to "Mama's Baby," then, together we will read and engage at close range with the essays collected in "Black, White, and in Color" (published by the University of Chicago Press in 2003) in order to reveal the extraordinary complexity and clarity of her thought.

ENGL262 Beyond the Talking Book: Reading African American Literature in the Newspapers
The majority of late-nineteenth and early twentieth century African American writers, such as Frances Harper, Martin Delany, Pauline Hopkins, W.E.B. Du Bois, and Langston Hughes, published their work in African American periodicals. In this course, we will examine the works of these canonical authors (as well as some lesser known ones) in their original publication context, the magazine archives of The Christian Recorder; The Anglo-African Magazine; The Colored American Magazine; The Crisis; Opportunity; and Fire!! The guiding question in our readings is this: how does our understanding of African American Literary History change when we spotlight the original magazine and newspaper contexts of its key texts? We will thus examine the serial installments of novels like Blake and Hagar's Daughter in relation to the various texts and images alongside which they were published and read. In addition to honing students' literary close-readings skills, this course aims to teach students how to do original research and critically engage with multi-genre, mixed forms like the magazine. Learning how to read a newspaper as both a historical document and a literary one will require you to navigate between multiple different texts on the same page, in the process of which you will acquire a new reading practice. Students will write five (5) 200-250-word blog posts and four (4) short papers, including a creative assignment, a paper on reading literature in newspaper formats, an essay on illustrations and visual culture in African American Magazines, and an essay that tells the story a literary text's significance through a discussion of its different reprints and editions.

ENGL263 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

ENGL264 Outsiders in European Literature
Modern literature is replete with protagonists who represent a position or identity that is outside an accepted mainstream; they are different, peculiar and/or attractive, and potentially dangerous. This course will focus on the experience of being or being made into such an outsider, or other, and on the moral, cultural, racial, gendered, sexual, or national norms or boundaries such an outsider establishes for the inside. Reading both fiction and theory, we will ask how the terms of inside and outside are culturally and historically constructed

as we also look for proposals for dealing with outsiders and their otherness. Authors may include Kafka, Mann, Camus, Colette, Fanon, Sartre, Beauvoir, Duras.
Offering: **Crosslisting**

ENGL267 Pessimism, Nihilism, and Black Literature
This course considers Black literature's interventions into philosophical discourses of pessimism and nihilism. In contrast to the pathologization and dismissal with which they are often met, we will take both seriously as schools of thought. How are pessimism and nihilism distinct from each other? What do they offer as interpretative lenses for and approaches to Black art and Black existence? How are they reflected in literary form? We will closely consider these, and related, questions, looking to the work of authors such as Percival Everett, Jesmyn Ward, Dambudzo Marechera, Frank B. Wilderson III, and Gayl Jones.

ENGL268Z Solitude, Society and Loneliness in Romanticism and Modern Culture
We are now living in an age of constant connection to anybody, anywhere, at any time. An indirect result of this is that individual privacy and solitude are being sacrificed (sometimes consciously, sometimes not) for the pleasures as well as the risks of interconnection. The recent COVID-19 pandemic has, however, highlighted the risks of extended solitude, which has made reconnection a newly relevant theme in our lives. We thus find ourselves at a moment in history when we think of both solitude and connection with deep feelings of ambivalence. How can literature, sociology, art, and film about solitude and connection help us to think clearly and deeply about their roles in our lives?

We will read and discuss authors who consider the risks and pleasures both of solitude and interconnection, from early Romantic writers such as Mary Shelley, to American Romantics such as Henry David Thoreau and Emily Dickinson, to modern European writers such as Franz Kafka and Dino Buzzati. We will also examine non-fiction works such as Sherry Turkle's Reclaiming Conversation: The Power of Talk in the Digital Age and Virginia Woolf's A Room of One's Own. We will use these works ultimately to consider our own culture of interconnectivity. What place and meaning do the solitude and privacy so prominent in Romantic literature have in a modern culture that makes them virtually obsolete? What can films such as Kieslowki's A Short Film about Love and Hitchcock's Rear Window show us about the relationship of solitude and privacy? More generally, what can these books and films tell us about solitude and interconnection in and since the nineteenth century?

Prereq: **None**

ENGL270 Introduction to Translation
Literary translation is popularly misunderstood to be the mechanical transfer of words from one language into the words of another. However, literary translators must also bring to life in a new language the intangibles of a text, such as the culture, the mood, the aesthetics, and the vibes. Our modern word vibes derives from an instrument often used in jazz performances called the vibraphone, a percussive instrument that produces a resonant, vibrato effect. In Sanskrit, this vibrato effect is defined by the versatile word dhwani, which is used to describe reverberations and echoes in music, poetry, and theater. In this class (taught by Distinguished Writer in Residence, Daisy Rockwell), we will try our hands at translating not just the words, but the dhwani of texts. This will help us explore what translation has entailed in various eras and cultures, and what we can learn from intermodal translation, when text is brought alive through non-linguistic media, such as sound, visual imagery, and dramatization. Students will formulate a final project halfway through the semester, such as the translation of a short story, a chapter of a book, or a set of poems.

ENGL271 Distinguished Writers/New Voices
Students will read a range of nonfiction and fiction as well as works by writers visiting Wesleyan for our reading series. The class will survey past and

contemporary American authors who have successfully captured the artistic, social, and political stakes of the world they inhabit. We will juxtapose literary generations ("distinguished writers" and "new voices"), examine their legacies and ruptures, and explore topics such as the voice, positionality, identity, gender, and the archive. Readings include pieces by well-known writers ranging from Virginia Woolf, James Baldwin, George Orwell, Joan Didion, Claudia Rankine, Cathy Park Hong, Teju Cole, Anne Boyer, Valeria Luiselli, Robin Wall Kimmerer. On several Wednesdays throughout the semester, critically acclaimed and award-winning authors will be reading on campus. You are required to attend and respond to these readings. We will prepare for these authors' visits by reading selections of their work.

ENGL272 Modernist City-Texts
Since the 19th century, the city has been both a privileged and a problematic object of representation for narrative realism: privileged because urban spaces have increasingly been seen as shaping or producing the very social relations and individual experiences that realism wants to describe; problematic because the city itself, as a coherent totality that might explain those relations and experiences, is too vast, heterogeneous, and complex to be represented through the traditional techniques of realism. This course will approach the problems and possibilities of the city for realism through a close reading of two large, ambitious texts that attempt to represent the city as a totality: James Joyce's novel ULYSSES (1922) and David Simon's television series THE WIRE (2002-2008). We will be particularly concerned with two techniques, pioneered by Joyce, for representing the city: stream of consciousness, which creates a tour of the city from the perspective of a single, mobile flâneur; and montage, which creates a map of the city by juxtaposing various cross-sections of social life or various institutions central to the city's functioning.

ENGL273 Translation in Theory and Practice
This seminar is a workshop devoted to helping students from a range of disciplines and departments hone their practices of translation. Translation is part of a wide range of academic, publishing, and creative activities: humanities and social science scholars read texts in translation, translate while doing field work and archival research, and include translations in their articles and books; translation is an engine of creativity for many writers, bilingual or not. This course will begin by looking at various alternate translations of the same texts, to expand our sense of options and possibilities. The next five weeks of reading will introduce students to some of the main debates, theories, and practices of translation into English.

The second half of the course will focus on students' own translation projects. While you are welcome to pursue a project you already have in mind, most students will be choosing and starting a new project, guided by the discussions and topics in the first half of the course. The scope can be small (a single short story, a chapter of a novel or biography, a few poems or song lyrics), or you can have an eye to a bigger project you want to pursue after the end of the semester (a senior thesis, a short-story submission for publication, a book pitch). Week by week, all students will respond in class and in writing to translations-in-progress. In the last week, we will get to see and respond to everyone's revisions.

Facility in a language other than English is required; perfect fluency is not required.

ENGL274 Caribbean Poetry and Cinema: "Fields of Islands" in an Open Sea
In this course, we will consider poetry and cinema that make radical images, sounds, and shapes of the Caribbean as a "field of islands"--islands that presume other islands, islands of foraging, convening, gathering, and concentrating on the small, in the words of Édouard Glissant--in an open, relational sea.

We will trace how the Enlightenment installs itself in the longstanding colonial tropes that render the Caribbean as a space outside of time, outside of history, perpetually under the sun, and, were it not for machetes, filled with redundantly bursting vegetation. This course will present an array of 20th-21st century Caribbean poetics and cinemas that deviate from, challenge, escape, and mangle these tropes and their spatio-temporal unimaginativeness. And we will investigate the ways that these texts and forms make use of the figures of sea, plantation, slavery, indigeneities, uprising, marronage, desire, revolution, apocalypse, vengeance, and imagination. Concerns of nationalism, development, humanism, capitalism, and subjectivity will manifest.

ENGL275 Introduction to Writing Fiction
Fiction is a lie--a beautiful lie that holds inside it a human truth. In this class, we will explore this apparent contradiction and learn how to craft truthful lies. Over the course of the semester, we will read selected contemporary fiction, with a special emphasis on the craft of writing. We'll discuss characterization, point of view, plot, structure, dialogue, fictional time, and fictional space. You'll write one short story and bring it to class for your peers to critique, in a format commonly known as the "workshop." You will also revise this story, using techniques discussed in class. The aims of this course are: (a) to refine your understanding of the attributes, techniques, and styles of fiction; and (b) to help you improve your own writing through effective use of reader feedback and revision strategies. Readings may include work by Franz Kafka, Alifa Rifaat, J.M. Coetzee, Louise Erdrich, Julie Otsuka, Gabriel García Márquez, and others.

ENGL276 South Asian American Literature
The South Asian diaspora spans the world; communities are located in Africa, the Middle East, England, North and South America, and the Caribbean, as well as Southeast Asia. Using novels, poems, short stories, and film, as well as scholarship on history, this course will focus upon the literary and cultural production of the South Asian diaspora in the Americas, focusing especially on the United States. We will examine the conditions of historical arrival and

identity-making under shifting regimes of politics, economics, and culture. What does being in the United States mean for the claiming of "Indian" and "American" identities, and how is this inflected by relationships with other ethnic or racial communities? The relationship with an often romanticized "India" is a central question, expressed through the concepts of diaspora, exile, and transnationalism. Consequently, what are the conditions of "authenticity," and of cultural authority? What aesthetic forms, questions, and issues express or preoccupy the artists of the South Asian American community?

ENGL277 Writing Fiction
Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

ENGL278 Writing on and as Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and staging live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Toni Morrison, Lidia Yuknavitch, Oliver Baez Bendorf, Glenn Ligon, Eve Sedgwick, Fred Moten, and Billy Ray Belcourt, this course will challenge students to craft ideas and arguments by enhancing critical and creative writing skills. We will experiment with style and form from academic arguments, to performance lectures, artist interviews, and free-form creative prose essays. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. Students will also be asked to complete hybrid creative writing assignments in response to prompts that imagine writing as always in conversation with performance. More specifically, students will write pieces about embodiment, sound, and the visual. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten) and "listening in detail" (Vazquez).

This course encourages students to experiment with their writing practices. Over the course of the semester students will be asked to write four separate creative/critical pieces, all of which will be workshopped in the space of the classroom.

ENGL278Z Writing On and As Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and doing live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Glenn Ligon, Claudia Rankine, Eve Sedgwick, Fred Moten, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading skills, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, artist interviews, and free-form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten), "gaps, overlaps, dissonances" (Sedgwick), and "listening in detail" (Vazquez). Online course. Special schedule: 11am - 4pm (EST) January 10-13, 16-19.

ENGL279 Introduction to Latina/o/x Literature and Art
We will study Latina/o/x aesthetics and poetics to ask questions about the history, sociality, and semiotics of Latinidad, as well as the formation of Latina/o/x studies in the U.S. university. The course understands Latinidad as an assimilable disturbance, around which specific ethical questions may emerge. We will study modes of "ethnic," aesthetic, poetic, theoretical, and geographic disturbance--assimilated and unruly--specific to the semiotics of Latinidad and Latinx studies, as well as their relationship to Blackness, anti-Blackness, whiteness, form, language, ontology, race, gender, and assumptions of futurity. Readings, viewings, and listenings focus on the 20th century, but that temporal provision will surely be shot through by reference points from 1500 to 2020.

ENGL280 On the Essay
This course is a sustained meditation on the literary and cinematic genre of the essay. What makes an essay an essay? How do we understand the sign "essay," which holds within it the French (le essai) for "attempt" (which, by implication, can fail) and the Latin (exagium) for "weigh" and "measure" (which, by implication, reckons with imbalance) -- and how does one write a really "good" one? Is a really "good" one, given the contradictions at play, a "bad" one? What's the relationship between the essay as mode and genre and the representationally unwieldy, destructive, mysterious, and unresolvable? This course will be a sustained essay-writing experience, one thematized, partly but not only, via the metaphorical and figurative uses of cats in 20th-century Western literatures, experimental cinema, continental philosophy, and legal studies. We will consider various representations and rhetorical positions of cats, sometimes by looking at them directly (though one risks their disdain or indifference with direct engagement) in select essays and essay films by Jacques

Derrida, Agnès Varda, Chris Marker, José Lezama Lima, Beatriz Santiago Muñoz, and others, and sometimes indirectly -- through juxtaposition in a bestiary of animals that seem to generate other kinds of metaphors, such as dogs, pigs, possums, and snakes. But we will start out in our readings and screenings by tracking certain tendencies that accumulate around cats or, perhaps, that they set off, such as the uncontrollable, peripatetic, esoteric, mysterious, luciferian, blackened, feminine -- that which understands and perhaps even has speech, but will not lower itself to mirror or mime the limits of "civilized language." And we will draw direct connections between some of those signs and what it means to write an essay -- to suspend the arrogance of knowing for the exacting and risky attempt at saying -- in the letter. The assigned readings and viewings for this class engage Caribbean, southern U.S., and "World" literatures, continental philosophy and specifically deconstruction, black critical theory, French "New Wave" cinema, and experimental Caribbean cinema.

ENGL281 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

ENGL283 Old Poetics for New Poets
We today tend to assume that poetry is lyrical, personal, emotional, and short. These assumptions are not universal truths but products of a specific historical moment; they were popularized by Romantic poets such as William Wordsworth at the turn of the 19th century. This class will explore poetry and poetics before Romanticism, when poems were as often public and political as personal, as often philosophical and scientific as emotional, as often book-length as quite short. These are poems in which metaphors are stretched to their furthest limits, and passions pop to life to figure in allegorical plots. In them, the lyric "I" is less important than the didactic "you," the narrative "he"/"she," or the satirical persona. We will explore the workings of different forms and figures in this old poetics, including meter, rhymes, couplets, personas, personifications, periphrases, and conceits. Wonderfully, some of these old techniques are in the ascendant again today: hip hop privileges rhyme, and post-humanism raises new questions about personification.

Students in this course will read poetry, but they will also write it. We will think about how older poetic techniques and tropes offer resources to new poets. Both trained and amateur poets are welcome!

ENGL284 Literary Perversions: Revolution, Democracy, Identity
The Federalist Papers wrote under the strong impression that the American Revolution was imperiled by an overwhelming debt and the lack of a national authority and identity to bind the States together. Public fear of moral degeneration via the replacement of the "Old World" symbolic order with a "New World" order under the aegis of "representative democracy" loomed over the republic.

Taking these concerns and the dissemination of The Federalist Papers as our point of departure, this course will examine how representations of "non-normative" identities in several major 19th-century works relate to the problems of representing democracy in the aftermath of the American Revolution. Many of the most famous canonical literary texts in the United States during the 19th century write about "non-normative" topics such as maternity, slavery, bestiality, and gender inequality in the context of narratives that attempt to rewrite the legacy of the American Revolution. By focusing on the literary treatment of these "perverse" topics, we shall attempt to understand whether the authors we will undertake close readings of in this course were successful in their endeavors to not only amend the shortcomings of the Revolution, but also to think more rigorously about the history of slavery and gender inequality.

ENGL285 Victorian Modes and Moods
This course offers an introduction to British literature from the 1830s to the 1870s, with an emphasis on the main artistic modes of the era such as realism, gothic, "sensation," scientific essays, and religious meditations. Each half of the course will center on a big novel that incorporates these storytelling styles:

Wilkie Collins's *The Woman in White* and George Eliot's *Middlemarch.* We will also examine poetry, nonfiction prose, and paintings to explore how these modes opened up cross-genre and cross-media conversations. Central themes include changing concepts of personhood; relations between science, nature, and faith; the experience of embodiment; the languages of everyday life and of literature; and the role of art in the modern world. Throughout, we will investigate how artists used these modes to capture moods they saw as distinctively modern, from pessimism to optimism, from alienation to friendship and love.

ENGL285Z Fantasy And Speculation
Please note: Students should expect some readings and assignments to be due during winter break, prior to beginning Winter Session. Please visit the Winter Session website for the full syllabus -- http://www.wesleyan.edu/wintersession.

In this class we will read fantasy written by multi-ethnic authors in a variety of genres, mostly in the United States in the long nineteenth century (1770-1920). Our readings include texts that feature supernatural beings and events in imaginary settings -- but also texts that take on well-known myths and legends, create fictional characters to participate in historical events, fold time and space to place historical characters in the midst of fictional events, or gesture toward radically different futures. This broad understanding of fantasy will challenge us to redefine its constitutive features. The choice of readings draws on the work of scholars committed to the recovery of little-known texts, especially by African American authors.

ENGL286 Harlem Renaissance Literature
During this course, students will read canonical and popular literary works by early 20th-century African American authors in tandem with the vibrant body of literary criticism that emerged from this cultural moment in order to arrive at a richer understanding of how the early 20th-century African American canon was curated and proliferated. To this end, we will pay special attention to the role of anthologies and literary magazines (such as "The Crisis," "Opportunity," and "Fire!!") in collating an emergent modern African American literary tradition. At the end of this course, students will be familiar with not only the key authors and works of the Harlem Renaissance, but also with the central debates about the direction and uses of African American literature in the early 20th century. These discussions of the uses and selection criteria of the book-form anthology on the one hand, and the serial literary magazine on the other will prepare students for one of the main assignments: curating a new syllabus entry for future versions of this course. The aim of this assignment is to alert students to the politics of knowledge production that determine which texts get taught, anthologized, and studied. Finally, the differing lengths and types of course assignments will require students to learn how to present their ideas across a variety of genres (syllabus proposal, annotated bibliography, research paper, short close-reading paper).

ENGL286Z "Writing Should Do Something": The Essays of James Baldwin
Baldwin's essays, both deeply personal and political, speak of a divided self in a divided country. As a Black man, he saw himself as a problem for America; as a gay man, he was a problem for many; and as a self-described "maverick," he resisted any identification other than "writer." He wrote frankly of hating, and being hated, while insisting that without love and compassion, even for those who hated him, a decent life was unattainable. In this course, we will consider Baldwin as one of the greatest essayists of his century, a social critic who believed that "writing should do something," in the words of a letter he wrote to his brother.

Baldwin began publishing to acclaim in the 1950s; he was a celebrated public figure in the fight for racial equality in the 1960s. By the mid-1970s, however, his complicated relationship both with white liberals and leaders of the Black Power movement diminished his political stature. With the Obama presidency and the emergence of the Black Lives Matter movement, his work experienced a renaissance: almost 30 years after Baldwin's death, Ta-Nehisi Coates acknowledged "The Fire Next Time," published in 1962, as the inspiration for "Between the World and Me."

This is not a theory course, either social or literary. While our supplementary material will place Baldwin's essays within their historical and social context, our focus will be on the narrative nonfiction techniques Baldwin used to such startling and timeless effect. We will read Baldwin's most famous essays, and some that are less well known. Our supplementary readings and viewings will explore his continuing influence, and the influence of Black music on Baldwin.

ENGL287 Class and Contemporary Literature
On one account, the political and cultural conflicts that have roiled the US in recent decades are rooted in a widening gulf between people who are employed in information, media, and technology industries and people working in extractive, construction, and service industries. The former are typically people whose careers depend on college and, often, post-graduate education and who value expertise. The latter are often people who have some or no years of college education and who in some cases express skepticism or hostility toward technical expertise and institutional authority. In this seminar, we will consider the way literary artists have responded to these developments and the way in which their work may be influenced by the close association between contemporary literary expression and university education.

ENGL288 Poets, Radicals, and Reactionaries: Romantic Poetry in Conversation
This course provides an introduction to major poets of late eighteenth- and early nineteenth-century Britain -- Blake, Wordsworth, Coleridge, Byron, and Keats -- and to questions central to the study of Romanticism as an artistic movement. These questions include: how do people experience nature? What is poetry's relationship to music, storytelling, and visual arts? How did Romantic poets

respond to the French Revolution and the social and economic change that mark the period? What new ideas about originality and literary experimentation did they promote? Why do their works continue to resonate today? No experience with poetry or with British literature is expected; the course functions as an introduction to both.

ENGL290 Place, Character, and Design: Techniques in Writing Nonfiction and Fiction
The distinction between creative nonfiction and fiction is that nonfiction professes to tell the truth with very little embellishment. Rather than present reality as a series of raw facts, CNF writers borrow techniques of fiction writing--description, anecdote, scene construction, characterization, and dialogue--to tell dynamic and compelling true stories. In this course we will investigate craft aspects that are relevant in nonfiction and fiction such as establishing characters and a narrator's voice, building the spatial world and emotional tone of the narrative, and using structure to communicate what we want to say with the story or essay. This course will explore topics to help writers mine their lives and experiences for material in both genres. We will emphasize reading, writing, and critical thinking about narrative craft, operating on the philosophy that you must become a skilled critical reader to become a better writer. Students will study the work of a diverse range of established writers, respond to weekly writing prompts and exercises, and participate in several small group workshops leading to a longer narrative along with developing a writing habit founded on the knowledge that, as with any skill, good writing requires consistent practice and revision.

Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL292 Techniques of Nonfiction
In this introductory workshop on nonfiction writing -- which has also been termed the literature of fact -- we will read personal essays and profiles, writing about place and experimental prose. The writers you will study join a compulsion to bear witness to a commitment to style. They also, invariably, investigate the status of the facts they are documenting or representing. Reading these texts, we will ask: How do they ask us to understand nonfiction writing? What strategies do they use to assert and/or undermine their own authority? What is the relationship between fact and imagination in this work? How might we articulate an ethics of nonfiction writing? Over the semester, you will work on exercises, experiments, and longer essays, and build a critical vocabulary for analyzing your own and one another's writing. Lydia Davis has said: "You need at least two brains to write. You need to ... [work] intuitively and at the same time remain in some kind of control." This semester, you will learn to follow your best intuitions and to develop a more controlled editorial eye.

ENGL292A Techniques of Nonfiction: Memory and Memoir
Taking the shifting nature of memory--sometimes fluid, often repressed, shape-shifting, nonlinear, occasionally contradictory--as our starting point, we will read and write memoirs, personal essays, and experiments. We will examine how writers convey not only remembered events but also the events' lasting emotional and symbolic significance, almost invisibly, within the technical aspects of their texts. As we read and write, we will consider the relationship between content and form in personal nonfiction, and we will explore the various ways writers employ narrative and anti-narrative structures when writing about oneself and one's own life. In other words, this semester, you--everything that composes who you are as an individual--will be your primary subject matter as we think about memory, consciousness, the (un)reliability of linearity and "truth," and language's relationship with time, presence, and place. We will look deeply into the complexities of what it means to be a person in the world with language alive inside of us. We will walk into the rooms of our memories and heritages. We will question our relationships with temporality and language, and we will dredge up--in order to write through--our most impossible thoughts. We will divide our time between reading contemporary investigations into nonfiction forms--the memoir and anti-memoir, experimental fictions that cull from one's life and heritage, the lyric essay, and hybrid essay forms--and writing our own nonfiction texts in response. There will be biweekly presentations, in-class writing experiments, and intensive workshops of one another's work. The class will culminate in a book arts project and a reflective essay.

ENGL293 Afro-Asian Intersections in the Americas
This course explores a range of historical, cultural, and political intersections between African and Asian diasporic people in the Americas from the late 19th century to the present. Taking an interdisciplinary approach, we will examine key moments in the history of Afro-Asian encounters in the Americas, including the importation of slave and coolie labor in the 19th century, the formation of anticolonial and antiracist "Third World" movements in the United States and abroad, and the 1992 Los Angeles uprising. We will also study forms of cultural interracialism, from African Americans' mania for kung fu in the 1970s, to interracial buddy films like Rush Hour (1998), to the contemporary fiction of writers such as Patricia Powell and Charles Johnson.

ENGL294 Edith Wharton and the Art and Science of Fiction
Edith Wharton's prolific literary career coincided with two major developments in the history of fiction: the emergence (associated with Flaubert and Henry James) of the novel as a form of high art, and the rise (associated with Zola and Frank Norris) of the "naturalist" novel and its claim to represent a newly scientific depiction of human life. Although these new schools of fiction have often been thought of as antagonists, Wharton participated enthusiastically in both. In this research seminar, we will consider the ways that Wharton responded to both aestheticism and naturalism and the reasons she considered them appropriate to her depiction of contemporary life--especially in relation to the issues crucial to her fiction of gender, marriage, and sexuality.

ENGL296 Techniques of Fiction
This introduction to the elements of fiction and a range of authors is for students who want to write and, through writing, increase their understanding and appreciation of a variety of short stories. In this course, we will learn how to write and revise short pieces of fiction. To achieve this goal, we will constantly be working on creating and editing our own fiction, and we will perform various writing exercises. Moreover, we will read our colleagues' short stories and offer them thoughtful, generous, and rigorous feedback. Finally, we will scrutinize stories by veteran authors in order to understand some integral elements of fiction writing. Upon completing this course, students will have a deeper understanding of the process-oriented nature of crafting successful prose. They should also have a more profound knowledge of concepts like plot, dialogue, character, and interiority.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

ENGL296Z Techniques of Fiction
ONLINE COURSE: Synchronous class meetings via Zoom 1:00pm-4:30pm, Classes held on Jan 4, 5, 6, 8, 9, 10, 12, 13, 14, 16, 17. Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings. ENGL 296 is an introduction to fiction course that emphasizes reading, writing, and critical thinking about story. This workshop operates on the philosophy that you must become a skilled critical reader of fiction to become a better writer and to articulate your impressions and criticisms when we workshop the stories of your peers. We will read selected stories to facilitate our craft discussion, supplemented by the textbook readings. You will write a story of approximately 4000 words, and we'll use the techniques of fiction and feedback from workshop to take it from rough first draft to a polished story. Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

ENGL297 Practical Criticism
In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called "practical criticism." Each week, he distributed a single poem to his students without revealing the poem's title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards's experiment for the twenty-first century. We will follow Richards's protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students' judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanuel Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

ENGL297Z Creating Children's Books
The goal of the course is to introduce and begin to develop the skills necessary to create stories and sequential art specifically aimed at young readers, and produce a written story and small dummy book that could eventually be developed into a picture book submission to a publisher if the student chooses to pursue publication of their story idea. In an industry that welcomes unique voices and styles, there are underlying guidelines that inform children's literature and typically apply to most picture books. The course will cover specific considerations for writing manuscripts for children as well as the creation, style, layout, and pacing of sequential art for picture books. By looking at, reading, and analyzing picture books -- both current titles and classics from the past -- and reading about the work process of published authors and illustrators, students will examine the elements that help create compelling narratives, engaging characters, and memorable themes. In addition to studying the craft of effective storytelling, we'll look at how imagery reinforces and expands the narrative through the use of dynamic elements like scale, perspective, texture, line, color, lighting and pattern. We'll also take a look at the business of publishing. There will be a visit, in person or virtual, by a publishing professional -- an editor or literary agent -- to discuss what expectations are for manuscript and dummy book submissions, current trends in book proposals being bought by publishing houses, the business of publishing, and what their jobs entail beyond editing books for young readers. The class will operate in a workshop format with group feedback and support on story concepts and development, thumbnail sketches demonstrating the pacing of the written and visual narrative, and book dummies with text and sketches in place.

ENGL298 Richard Wright and Company
This course offers an in-depth consideration of the work and career of Richard Wright, a defining figure in 20th-century African American literature, and seeks to understand Wright's interactions with a wide array of mentors, proteges, and enemies. By placing Wright amid the network of supporters, admirers, and detractors who surrounded him, we will gain a deepened understanding

of Wright's development and a useful map of 20th-century African American literary expression and American literary history more broadly. Writers to be covered in the course may include, along with Wright, Hannah Arendt, James Baldwin, Gwendolyn Brooks, Horace Cayton, Ralph Ellison, James T. Farrell, Dorothy Canfield Fisher, Chester Himes, Langston Hughes, Zora Neale Hurston, Alain Locke, Gertrude Stein, Margaret Walker, John Williams, and Frank Yerby.

ENGL299 Introduction to Fiction
This course introduces students to the craft of short-story writing. In the first half of the course, we'll read and discuss stories by Joyce Carol Oates, Edward P. Jones, Kazuo Ishiguro, Akhil Sharma, and other successful writers as a means of exploring the conventions (and contentions) of the short-story form. In the second half of the course, students will use their newly filled "writer's toolbox" to plan, draft, and ultimately share their own stories with the rest of the class, while also learning to provide focused, supportive feedback for each other along the way.

ENGL300A Creative Writing Workshop: Multi-Genre: Writing Ecologies
How can environmental literatures wake us up to the more-than-human world, re-wild our senses and syntaxes, realign our perspectives, and call forth an awakened sense of belonging? How do the lenses of culture, gender, and class affect how we observe and describe the world in which we live? How might thinking, synergistically, as an ecosystem forge new lenses, new emotional and intellectual centers?

In this open-genre workshop, we will read and write texts that honor a wider ecological consciousness, that celebrate the interconnectedness of the biota, and that are a call to action. We will keep field notebooks, perform site-specific writing experiments, apply permacultural perspectives to the ways we language and read our environments, take steps toward bioregional literacy, consider interspecies encounters, climate change, sustainability, environmental justice, geologic time, artistic-practice-as-research, and bear witness as acts of remediation.

We will divide our time between reading environmental literatures in nonfiction, fiction, poetry, and hybrid forms and writing our own texts in conversation. There will be weekly presentations, writing experiments, suggested field trips, and workshops of one another's work. The class will culminate in a book arts project and reflective essay.

ENGL301 1492: States of War
This course approaches 1492 as a signifier and time-stamp of modernity. It signifies an ongoing "war" against people of African descent -- one that goes beyond the terrestrial plane. It anchors systems of representation, racialization, colonization, and religion with which we must reckon -- ones that preceded it and that we continue to inherit. The course uses the specific historical frame of 1440 into the late 18th century. This frame holds with reference to Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically" and Sara E. Johnson's notion of "slavery in the plantation Americas as a 'veritable state of war.'" Thus, we will read symptomatic, primary historical documents and fiction about "blood," race, African slavery, and geography and being (including 15th and 16th century Castilian law, sundry genres that represent early Spanish colonial Mexico, Santo Domingo (contemporary Dominican Republic), Cuba, and French Saint Domingue (contemporary Haiti)), as well as contemporary fiction, cinema, and theory that configure historicity via the Caribbean. We will read sometimes for imperial notions of sovereignty, selfhood, force, indigeneity, (anti)blackness, property, labor, and the relation between conceptions of the heavens and "just wars" on earth, and other times for Caribbean notions and narratives that are at war with said Western theological and onto-epistemological schemata. Conceptually, the course thinks from and/or about Caribbean literary studies, black critical theory, demonology, scholasticism, mysticism, the functions and tropes of (anti)blackness in the discursive formation of the New World, Vodou(n) in the Haitian Revolution, colonialism and international law, and deconstruction.

ENGL302 Special Topics: Environmental Fiction
In this course, we will study contemporary fiction that grapples with our changing environment alongside critical texts that contextualize environmental literature through the lenses of race, sexuality, and place, as well as post-coloniality, decolonization, and tourism, with a view to understanding what this means for fiction writers interested in writing about such topics. Some questions we might ask include: What do we mean by terms such as 'wilderness' or 'nature'? To whom does 'nature' belong, and what are the differing or contradictory ways in which different groups of individuals interpret and navigate it? How do we, as creative writers, write about the environment, especially in the current moment, in a manner that is urgent, ethical and fresh? If we believe in the power of fiction to change the world around us, what tools of craft do we have at our disposal to imagine a future we want to live in? This course is a seminar-workshop hybrid, i.e. the first half of the semester will be spent reading and discussing assigned books, the second half of the semester will be a workshop in which students write and discuss their own stories.

ENGL303 Narrative Theory
Narrative, one great critic suggests, may be the central function of the human mind. It is, as another once wrote, "simply there, like life itself." As these claims

indicate, narrative gives form to our collective experience: from the shadow of history and the shape of the future to the very texture and meaning of time itself. This course provides an introduction to the tradition of narrative theory -- the theory of how stories work and of how we make them work -- through a sustained engagement with three core narrative-theoretical concepts: structure, text, and time. A single book will anchor and orient each of the course's units: for structure, Vladimir Propp's Morphology of the Folktale; for text, Roland Barthes's S/Z; for time, Gérard Genette's Narrative Discourse. Herman Melville's novella Benito Cereno will supply our "control text," a narrative to which we will return as we study the theory and through which we will test the powers and the limits, both analytical and historical, of our theorists. In each of our units, we will begin with a careful reading of our main theorist, move on to consider work that elaborates on the theory, and then turn to robust approaches -- Marxist, historicist, queer, psychoanalytic, sociological -- that challenge or modify the theoretical terms with which we started.

ENGL304 Lyric Poetry and Music: The Color and Politics of Cry, Sound, and Voice
Lyric poetry may be the most musical of literary forms. In one of its basic definitions, the lyric poem begins after the overhearing of a sound. This sound may be familiar and pleasant, like the timbre and cadence of a lover's voice. Or it may be unrecognizable and terrifying. It may be imbricated with other senses and feelings, provoking a memory that stimulates a sense of touch or smell. Or it may stimulate a sense of horror at the inevitability of death. In any of these cases, sound is thought to reveal an attachment, a memory, and to give rise to composition in the poet's effort to reshape memory and feeling in lyric form. But such articulations do not always come out as evenly as this description may imply. Indeed, moans, screams, stutters, cries, and the madness of possession by the Muses are part of lyric's history and practice. In this course, we will read from African American, African diasporic, Caribbean, Latina/o/x, and Indigenous poetics, and we will consider their relation to myth and musical forms, such as the blues, son, bomba, biguine, jazz, reggae, hip-hop, salsa, among others. The dynamics between lyric speakers and musicians, sound and story, seen and voiced language will play out.

ENGL305 Shakespeare's Macbeth: From Saga to Screen
A close reading of Shakespeare's play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare's "sources," then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare's contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of MACBETH from 1948 to the present.

ENGL306 Asian American Posthumanisms: Biopolitics, Ecopoetics, and Literature
From 19th-century anxieties concerning subhuman coolies to 21st-century celebrations of suprahuman cyborgs, United States discourses have always figured people of Asian descent as peripheral to the category of the human. While Asian Americanist scholarship has often responded by asserting the humanity of Asian Americans, a number of scholars and writers have begun to explore and even embrace the inhuman character of the Asian American. Drawing from recent scholarship in science studies, political ecology, anthropology, and literary studies, this course will consider what it looks like to shift the scale of analysis from the individual, organismal human to the social logics, biopolitical infrastructures, and ecological entanglements that supersede the human, or conversely, to the bodily fragments, molecular processes, and fragments that subtend the scale of the human. We will pay particular attention to the question of what consequences decentering the human has for the ethnic novel, a genre often valued for its ability to affirm the humanity of racialized subjects. For instance, what kinds of aesthetics and politics emerge from an imaginary centered not on the human individual but on systems, landscapes, entanglements, and other imaginative forms and social practices? What does a novel centered not on a human protagonist but on an object, a clone, or an ecosystem look like?

To explore these non-human centered logics and forms, we will read theoretical texts by Anne Cheng, Rey Chow, Donna Haraway, Aihwa Ong, Rachel Lee, Nikolas Rose, Anna Tsing, and others, alongside a selection of contemporary (and capaciously defined) Asian/American novels by writers such as Kazuo Ishiguro, Larissa Lai, Chang-rae Lee, Ruth Ozeki, and others.

ENGL307 Literature, Laughter, Philosophy: Tristram Shandy
Laurence Sterne's novel, The Life and Opinions of Tristram Shandy, Gentleman (1759-67) has been described as a literary masterpiece, a hilarious satire, a sentimental tear-jerker, and a pornographic abomination. It was a favorite of Karl Marx and Friedrich Neitzsche, and it was heralded (in a recent film adaptation) as "a postmodern classic written before there was any modernism to be post about." The book is deeply learned -- engaging texts from skeptical philosophy to 18th-century science and from Hamlet to early novels. It is also, indisputably, very odd. Though Tristram is trying to tell the story of his life, he fails to get himself born in the first hundred pages, and the text is full of doodles, blank pages, madcap digressions, and missing chapters. In this course, we will read Tristram Shandy alongside the many, many texts it references, borrows from, and mocks, as well as the many, many texts it has influenced. Throughout, we will take Tristram Shandy as our rich test case for some fundamental questions: What is literature, and why do we tell stories anyway? How is literature related to philosophy? How do our minds work? What is the meaning of human life -- of laughter, learning, love, and death?

This course is a research seminar that will prepare students to write an English thesis (though it will be valuable even for students who don't plan on thesis writing). Students will cultivate their skills in writing and research, in engaging thoughtfully and confidently with theoretical and critical secondary sources. The course will culminate in a major research paper.

ENGL309 Entertaining Social Change
"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially true of "entertainment." Power that may not seem like power -- only, say, like "fun" or "amusement" -- can be especially powerful. A thread that connects all of our texts will be: how has the systemic critique of social contradictions been popularized as compelling and fascinating in modern times? A related concern: what are the seductions and violence built into "enjoyment" -- "enjoyment" that reproduces "Americans"? We will "entertain" the diverse strategies that progressive moviemakers have developed to entertain Americans -- to teach, persuade, seduce, provoke, upset, anger, and move them through laughter, tears, and, not least of all, ideas -- so that Americans will be more inclined to "entertain" social critique that inspires and envisions social change. Our critical focus will be on the popularizing (and sometimes the selling) of social critique in movies including Straight Outta Compton, Malcolm X, Medium Cool, Network, El Norte, Smoke Signals, Before the Flood, The Black Panthers: Vanguard of the Revolution, Salt of the Earth, Matewan, and The Big Short. We will place special emphasis on self-reflexive movies about "entertainment" and about labor/social movement organizing. Entertainment, we will see, plays a key role in organizing and reorganizing Americans. In doing so, it can place limits on our vision of what -- and who -- needs to be changed. By putting our movies in conceptual dialogue and making these limits more visible, we will help one another think, see, and feel beyond these limits. As we are "entertained" (and we will be) we will consider the stakes of being "entertained."

ENGL310 The Medieval Beast
How did medieval writers think about the distinction between human and animal? This course will begin with the categories of soul and body, ruler and ruled, speech and noise--among others. We will also read about human-animal hybrids like werewolves and bird-men in order to think through some of these binaries. Texts will include bestiaries (encyclopedias of animals), treatises on hunting, beast-fables from Christian, Muslim, and Jewish traditions, Marie de France's "Lais" and "Fables," Chrétien de Troyes's "Knight of the Lion," "Sir Gawain and the Green Knight," and Chaucer's "Parliament of Fowls."

ENGL312 Vitalism and Black Aesthetics
What is the relationship between Black art and Black life? Does Black art, broadly construed, serve a mimetic function-merely re-presenting reality-or is it a vital expression of the essence of Blackness? These questions are at the root of Black Cultural Studies' engagements with the problem of the aesthetic. In the current conjuncture, reacting to the theorization of Black social death, many theorists have (re)turned to the aesthetic as "proof" of the mattering of Black life and "evidence" of a vibrant sociality. This course will consider the connection between (the theorization of) Black aesthetics and (the affirmation of) Black life. In so doing, we will question the political stakes of Black aesthetics, as well as the value placed upon the concept of life as such, in and through the aesthetic encounter. Additionally, we will explore ways of thinking of the aesthetic that challenge presumptions of its innate liveliness. Readings will include canonical texts in aesthetic theory and vitalist philosophy, as well as more contemporary engagements with these questions from the perspective of Black performance theory, literary theory, and Afro-pessimism.

ENGL313 Literatures of Empire
This seminar will reexamine the literary and cultural history of Britain by tracing the emergence of "English literature" from the same transatlantic crucible as the racial categories of Enlightenment empire. Through readings from English literature's early origins in the Anglo-American transatlantic to its consolidation during the apex of the British empire, we will look at how the genres most frequently associated with liberal individualism (novels, lyric poetry) run parallel to the emergence of visual and rhetorical categories for imagining the boundaries and limits of the human and the individual. We'll focus on the techniques of literary form--and literary study--that helped construct and make sense of empire. Over the course of the semester, we will consider how the conceptual crises and contradictions in the production of British imperial power through the tangled nexus of capitalism, colonialism, and slavery spurred on new genres (the historical novel, the colonial anti-bildungsroman, the imperial gothic), and how novelists wrestled with the period's key categories of race, gender, class, sexuality, and nationality. Along the way, we'll trace how an archive of imperial writings have been taken up by anti- and decolonial theorists and writers.

ENGL314 Circulating Bodies: Commodification, Sex Work, and Enslavement in Eighteenth Century England
In the newly booming consumer culture of Enlightenment England, people were constantly buying and selling things--bespoke suits and manufactured trinkets as well as human bodies. Sex workers used their bodies to enter into trade agreements, and the imperial economy was built on the enslavement of African people. This course will explore how people and things were turned into circulating objects, and it will trace these as they were passed from hand to hand, valued and revalued, used, abused, and discarded. We will listen as the "things" themselves tell ethically and socially urgent stories. In the period, consumer objects, sex workers, and enslaved peoples all wrote memoirs (or had ones imagined for them). We will read these texts alongside contemporary debates about economics, labor, race, abolition, and women's rights, and we will return again and again to fundamental questions about personal identity,

individual agency and passivity, commodification, objectification, and the very limits of the human.

ENGL315 Close, Distant, Archival, Experimental: New Methods of Literary Study
What does it mean to craft a "new" approach to literary study? And why is it that since at least the early twentieth century literary critics have insisted on the need for "new" methods? This course examines the different moments in literary history when literary critics developed "new" methods to read literature--particularly efforts to understand literature at scale and in context. We will look at theoretical approaches to literature, ranging from Edith Rickert's obscure 1927 New Methods for the Study of Literature through mid-century New Criticism, up to the movements and methods of the late twentieth century and present day, alongside the archives of everyday sites where literature is constituted and practiced--such as colonial lending library records and course syllabi--in order to examine what's at stake in determining the object, scope, and ends of literary study.

ENGL316 Rethinking World Literature
Globalization has changed the speed at which people, goods, information, and ideas circulate in space, altering how we read and write and what we read and write about. This course examines the resurgence of the category "world literature" to explore how globalization affects practices of writing and reading in the 21st century. What does the "world" in "world literature" mean, and who writes world literature? To better understand how economic, environmental, technological, and political transformations affect our understanding of world literature, we will read pivotal theoretical works in the expansive field of world literature alongside several recent novels that thematize these scales of global comparison.

Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL317 Gothic Bodies
This seminar examines the Gothic mode and its literary afterlives in the texts of the British empire. During the nineteenth-century, the Gothic mode--darkened old houses, discoverable family secrets, mysterious moving objects, threatened bodies--migrated to a wide range of narrative forms. We will read some of this range, exploring early political fiction, science fiction, slave narratives, domestic fiction, and the ghost story. We'll think about how the Gothic mode was used to imagine different kinds of harm to bodies. We'll explore how these formal conventions involving unseen terrors, old family houses, and threatened bodies intersected with some of the key formations of the period: the rise of individualism, industrial and racial capitalism, Orientalism, automation, changes in property and inheritance law, theories of freedom and slavery and sexual consent. Along the way, we'll read key theorists who write about the Gothic as we develop our own theories of how to read the ways this genre still haunts our present.

ENGL318 Black Literary Theory
This course will bring together readings both literary and critical/theoretical, beginning with Frantz Fanon's "Black Skin, White Masks" (1952). Taking Fanon as its point of departure, then, this course will necessarily turn to a discussion of the recent discourse on Afro-pessimism and Black optimism, attempting to introduce students to important issues and questions of race, race relations, anti-Black racism, Black sociality, the universality of whiteness and white supremacy, the fungibility of the Black body, and the vulnerability and precarity of Black life; and together we will think more closely about how the complex and "unthinkable" histories and afterlives of chattel slavery, racial capitalism, settler colonialism, and the Middle Passage, for examples, continue to challenge the representational limits and potentialities of traditional literary genres and modes of emplotment. In addition to Fanon, authors will include Orlando Patterson, Toni Morrison, Hortense Spillers, Saidiya Hartman, Achille Mbembe, Frank Wilderson, Jared Sexton, Fred Moten, and others.

ENGL320 The Senses and the Subject in Cinema and Poetry
In this course, we will study a mixture of emotionally stimulating and structurally difficult contemporary cinema and lyric poetry, as well as select philosophical and theoretical approaches to the senses and the subject. Do theories and notions of the senses assume the subject, and/or subjectivity? If so, then how? What is the relationship between embodiment, the senses, the world, racialization, blackness, and being? How do select Western theoretical, aesthetic, and poetic frameworks represent and think as such? While cinema and lyric poetry might seem like strange neighbors, this course specifically foregrounds them as "repositor[ies] of synesthesia," where not only the reconstitution of the

subject after some disturbance (i.e., sensorial, physiological, social, historical, etc.) will be relevant to how we read, but also when that either does not happen or constitutively cannot happen. (Note that some short fiction may also be part of the course readings.)

ENGL323 Staging the Real in Early Modern England
The stage in Shakespeare's time was by modern standards "relatively bare," lacking illusionistic sets that would later be relied upon to conjure the reality of a particular time and place onstage. What, then, defined the "real" prior to the emergence of modern theatrical realism and the illusionistic conventions associated with it? What representational strategies (of text, costume, props, sound, stage machinery, etc.) were used to convey "realness" onstage at the Globe and other early English theaters, which lacked the "fourth wall" of the proscenium arch that separated the realities of the play-world from those of everyday life?

This course explores the dramaturgy of the "real" in early modern England in conjunction with the Center for the Humanities Spring 2024 theme of "Get Real," in plays by Shakespeare and his contemporaries that experimented with new ways of bringing to life the realities of war, true crime, sex and gender "deviance," street life and lingo in London's underworld, serendipitous wealth gleaned from capitalistic enterprise, and other sensational news ripped from the headlines.

ENGL325 Intermediate Nonfiction Workshop
This workshop is designed for experienced writers looking to deepen their practice in narrative nonfiction. Students will explore a range of forms -- including memoir, criticism, interviews, travel writing, and autofiction -- while engaging with core elements such as plot, structure, character, and place. Together, we'll grapple with questions like: How do we write about the self in conversation with broader social and political realities? How can we depict others with both acuity and empathy? And how might we write about art and literature in ways that are both intellectually rigorous and emotionally resonant? The course will include local field trips and visits to author readings. By semester's end, students will have crafted and refined several original works of nonfiction and developed greater confidence as both writers and editors.

ENGL326 Advanced Nonfiction Workshop
In this upper-level nonfiction workshop, we will read texts that investigate the meanings of place, particularly as they concern intersecting intimacies and violences of home, of migration, of colonial settlement, of environmental racism, and of climate crisis. Being from, leaving, and returning to both actual and imagined spaces are often at stake in these texts, as are forms of enclosure, naming, and mapping. Questions about how language moves on a page are inextricable from these concerns. Your own writing will include short exercises and experiments, a longer essay, revision, and responses to the published work, and throughout the semester, we will attend collectively to your work, as well as to these published texts. This course is part of the Sustainability and Environmental Justice Pedagogical Initiative.

ENGL327 Criticism and Psychoanalysis
This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

ENGL328 Researching and Writing Historical Narrative Nonfiction: A Workshop
Historical Nonfiction will be a workshop-based course. Students will have the opportunity to work on a project led by Charles Barber, a book-in-progress of historical narrative nonfiction based in Palm Beach, Florida in the 1920s. The project involves a decade-longs conflict between a gang and two father and son sheriffs, set against the explosive (and often corrupt) growth of Palm Beach as a resort in the early 19th century. Students will work with court and governmental records, as well as archival materials of all sorts. Students will receive professional credit for their contributions. A focus of the first part of the course will be historical methodology and evaluation of records; the second half of the course will address the question of transforming historical materials into compelling narratives. Readings will include models of historically based nonfiction, such as David Grann's Killer of the Flower Moon and Patrick Radden Keefe's Say Nothing.

ENGL330 Facts, Counterfactualisms, and the Historical Novel
The aim of this course is to explore "the fact" as the site of contradictory desires and investments in nineteenth-century fiction. Charting two paths through both foundational examples of historical novel and through early counterfactual work (Uchronie, Aristopia: A Romance History of the New World), this course will trace the versions of historical thinking made possible within these traditions. As part of the course, we will explore some of the ephemera materials novelist's working notebooks, research sources, and unpublished manuscripts. Seminar work will include both theoretical readings on historical fiction, philosophy of history, and critical archival studies. We will read novels and narrative fiction from the Brontë siblings, George Eliot, Walter Scott, Maria Edgeworth, Charles Renouvier, and Thomas Hardy, alongside critical work by Georg Lukács, Catherine Gallager, Roland Barthes, Frederic Jameson, Michel Foucault, Saidiya Hartman, Hayden White, Dipesh Chakrabartky, Paul Ricouer, Carolyn Steedman, Natalie Zemon Davis, Kumkum Sangari, Elaine Freedgood, and Michel-Rolph Trouillot.

ENGL332 About Clothes: Styles, Histories, Activisms, Poetics
What kinds of work go into the making and wearing of clothes, and what kinds of work do clothes do? This course is a chance to think together about how a range scholars, journalists, curators, and others have written about, handled, studied, preserved, and displayed clothing. At the same time, we will pay close attention to what it means for you to live in relation with your clothes. In conversation with works of literature, historical and curatorial scholarship, visual art, reporting, activism, and more, we will investigate clothes as objects of imagination and resistance, as well as elements of material culture. As we think about the global circuits that have informed various fashion systems, we will consider how particular textiles and textures, cuts of cloth, and racialized, gendered, and sexualized ideas of style emerged in conjunction with particular forms of labor -- and will also note how sustained attention to this multi-billion-dollar business has been devalued historically. Over the semester, you will conduct your own writing experiments at the intersections of language, image, identities, and the materiality-ephemerality of clothing.

ENGL333 Special Topic: Novel Forms
In this special topics course, we will undertake a study and writing in long-form prose work. While our primary examples might most easily be classified "fiction," we may also engage periodically in complicating such designation. Engagement with the reading list will be based upon arising concerns within current and more historical pieces. Classroom discussion will help us develop a series of theories and practices beyond the pale of the standardized.

Prereq: **ENGL216 OR ENGL292 OR ENGL296**

ENGL334 Beyond Growth: Agrarian Visions
The era of endless growth has reached a point of crisis. In the face of climate catastrophe and widening inequality, of the proliferation of pointless work and spiraling burnout, it has become increasingly common to question the idea that human progress comprises ever-increasing levels of production and consumption. And yet in spite of a slew of attempts to transform the situation, from the Occupy movement to the recent mainstreaming of degrowth economics, it seems that things are only intensifying. How did we come to inhabit this world in which labor and economic growth are seen as ends in themselves? And how might we begin not just to refuse such understandings of

labor and growth, but to imagine different forms that they might take? In this course we will confront these questions, exploring the relationship between labor, production, and human flourishing. We will begin by studying foundational articulations of this relationship from thinkers like Max Weber, Karl Marx, and Hannah Arendt, looking as well at the unique place that agricultural production, cultivation, has been understood to occupy therein. We will then turn to the agrarian realm as a particularly potent site from which to trouble and extend our conceptions of labor and growth, examining visions of spiritual labor, anticolonial resistance, and more-than-human entanglement in theoretical and literary texts from Leo Tolstoy, M.K. Gandhi, Mahasweta Devi, J.M. Coetzee, and others. Through our readings and discussions, we will learn to identify and critique the normative claims on which our current energy-intensive, exhaustion-inducting circumstances are based. At the same time, we will cultivate the skills required to seek out and imagine alternative forms of work, community, and the good life.

ENGL335 Wordsworth and Blake
This course examines the long, parallel careers of the two greatest poets of their generation writing in English: William Wordsworth and William Blake. Although they exerted little or no influence upon one another, their writing developed along strikingly similar paths as it responded to--and shaped--the rapidly changing, often disorienting literary, political, and cultural world of late 18th- and early 19th-century Britain. We will examine the artists and events that inspired them, from John Milton to Robert Burns to the French Revolution. We will bring into conversation their songs, autobiographical poems, aesthetic manifestos, and prophetic and visionary works. Throughout, we will pay attention to how they approached traditional and experimental literary forms, engaged with visual arts and with music, and developed a theory and practice of literary and everyday language.

ENGL336 Intermediate Poetry Workshop: Music and the Poet
There may be no greater compliment than "your poem is musical." Then a problem presents itself -- what does that really mean? "Musical" -- used synonymously with that other adjectival nightmare, "beautiful" -- corners the poem and the poet to the mercy of one kind of sound. But just as we have various notions of beauty, poetry also occupies multiplicity -- every poet has their own set of voices. Whether in the variety of languages generating its own sound sensibilities -- to borrow from the pianist Rudolf Serkin who was, in his day, accused of the occasional "ugly sound," his response is "music isn't just about la la la tra la la" -- even ugliness is a repertoire of personal sound, or voice. In this intermediate class, we will identify and perform the voices your poems inhabit, and work to recognize the voices of others troubling the neutral voice.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Prereq: **None**

ENGL337A Advanced Poetry Workshop: Radical Revision
"Poetry," writes Yusef Komunyakaa in his essay collection Blue Notes, "is an act of meditation and improvisation. And need is the motor that propels the words down the silent white space." In this intermediate poetry workshop, students will consider various perspectives on the revision process and explore strategies for redrafting poems-in-progress. While this class is open to any poetry student with previous workshop experience, those who stand to gain the most are those who've already amassed a sizable body of work--poems, drafts, notes--with which they are, for the most part, dissatisfied and eager to improve. It is imperative that students come with an open mind and a willingness to surprise themselves and one another.

Prereq: **ENGL216 OR ENGL336 OR ENGL337**

ENGL338 Serial Sensations
Regardless of their medium or period, serial texts are often associated with sensationalism. Not only do they frequently feature sensational plots, but by virtue of producing intense fan cultures the texts themselves become public sensations. From Bleak House to Marvel comics, and from Game of Thrones to the podcast Serial, serials have produced vibrant if not fanatical fan forums and fan cultures. This course will examine the aesthetics and politics of serial texts ranging from didactic novels to gory and racy ones, and from television shows to podcasts and audio books. Throughout the course of the semester, students will engage in forms of serial reading, listening, and writing, and will discuss the effect of the serial format on plot, characterization, and genre. Moreover, they will examine the ways in which the serial format shapes narrative desire, and the ways in which it molds reading and viewing habits -- that is, the mechanisms and logics through which a serial reader, listener, or viewer is produced. This course asks you to engage with the long history of serial forms from the nineteenth century to the present, and in so doing, examine the continuities between Victorian reading practices and our reading and viewing habits today. Contributes to fulfillment of ENGL major requirements: American Literature, British Literature, Literary History 2, Theory, elective.

Prereq: **ENGL296**

ENGL340 Special Topics: Ecopoetics - Experimental Poetry in the Anthropocene
How do poets speak for and from a world in flux and crisis? How do poets register and attempt to restore the degradation of the planet through language? How might altering the boundaries of conventional language use "through poetry" alter the bounds of conventional thinking and behaving, thus leading to more engaged and sustainable modes of living? This course, in part, will serve as a tour of contemporary eco-poets invested in looking at and caring for the current state of our planet through poetry. We will read poems that reflect the most critical environmental concerns of our time, and we will learn to see how these poems resist closure and are instead guided by exploration and interrogation in an attempt at reorienting our attention and intention as inheritors of this planet.

This is an advanced workshop for students committed to developing an understanding of eco-poetry's place in the more-than-literary world, as well as developing a personal eco-poetics from which to write. Students will choose an environmental topic to research and write in service of for the semester and, by the end of the semester, will have a project-centered collection of poems. There will be bi-weekly presentations on the poetry collections we read, in-class writing experiments, in-the-field experiments, and intensive workshops of participants' work. The class will culminate in an eco-book arts project and a reflective essay.

Special attention will also be given to cultivating community and the benefits of sustaining an embodied artistic practice during extreme times and how doing so may benefit the health of the whole artist.

ENGL341 Writing the War on Terror: Literature and Film after 9/11
September 2026 marks the twenty-five year anniversary of the tragic 9/11 terrorist attacks at the World Trade Center and Pentagon. In this interdisciplinary seminar, we will explore how contemporary literature, film, and television have depicted 9/11 and the ensuing War on Terror, while considering the historical roots of these events. We will examine the ethical implications and underlying biases of stories about violence, warfare, and torture, and study the techniques artists use to craft meaningful narratives that shape our understanding of justice, power, and human experience. This course will include a significant workshop component, in which students will create essays and fictional stories that engage critically with our course material. By the end of the seminar, students will have a deeper understanding of how 9/11 and the War on Terror have influenced literature, film, and society, and they will develop stronger skills in writing thoughtfully about historical and political issues.

ENGL343 The Library: Its Past, Present, and Future
The library is both a repository and a site for disciplining information. It is, at once, a space for democratizing knowledge and a locus of exclusion. A lifeline and a tomb. A place of radicalization and community, but also the handmaiden of state power. Indeed, the library's vexed role in the history of Western colonization has prompted scholars of African and postcolonial literature like Simon Gikandi to ask whether one can be a revolutionary in the library. This question has shaped the archiving sensibilities of African American collectors and librarians like Arthur Schomburg and Dorothy Porter Wesley as well as those of contemporary Black librarians and artists. This will be one of the central questions we explore in this course, too. We will examine artistic and literary representations of libraries, archives, and museums ("The Library of Babel," The Shadow Book, Lote, The Name of the Rose, Voyage of the Sable Venus, Yinka Shonibare's "The British Museum"), paying special attention to the fantasies, nightmares, and cultural narratives that cohere around the idea of the library. We will pay special attention to the place of the library in the Black literary imagination and to the theoretical and political interventions that Black librarians and bibliophiles brought into systems for categorizing and recovering knowledge.

ENGL344 Women's Lib, Women's Lit
The social movement known as second-wave feminism, but often referred to at the time as "Women's Lib," took center stage in much of the best-selling fiction of the 1970s. This course will look at popular fiction that concerned itself with women's issues and the way it popularized, memorialized, complicated, and contested feminism in the popular imagination. We will look at a range of novels that focused attention on the nature of and possible solutions to women's political, material, and sexual subjection by men. Although our focus will be on the 1970s, we will look at both some important pretexts, and some later responses to the ongoing crises of gendered inequality in the 1980s. We will pay particular attention the gendering of publishing and reception, exploring the contexts in which these books were produced, marketed, reviewed, and read.

ENGL345 Plague and Care-Work in Shakespeare's England
Plague exerted an enormous influence on the plays of Shakespeare and his contemporaries, and indeed on theater as a commercial enterprise. Pandemic theater closures and quarantines were frequent throughout his career, and it is likely that his son Hamnet died of plague. This seminar examines four Shakespeare plays (Romeo and Juliet, Hamlet, King Lear, The Winter's Tale) and their preoccupations with time, temporality, belatedness, mortality and ephemerality (of theater and the world-as-stage) and with an ethics and recognition of the work of care, as these are shaped by the recurrence of plague-

a perspective that will allow us to draw connections and discern differences between Shakespeare's time and our own.

ENGL346 Utter Nonsense: Modernist Experiments with Meaning
In "The Use of Poetry and The Use of Criticism" (1933) T.S. Eliot wrote," The chief use of the 'meaning' of a poem, in the ordinary sense, may be [...] to satisfy one habit of the reader, to keep his mind diverted and quiet, while the poem does its work upon him: much as the imaginary burglar is always provided with a bit of nice meat for the house-dog."

To extend this analogy: this course will look at texts by meatless burglars, writers who set out not to sedate but to conscript the sense-sniffing house-dog as they pillage the house for things of value.

This course will survey some of literary modernism's most defamiliarizing texts, ones that challenge interpreters by withholding or avoiding that digestible (and perhaps soporific) "meaning" Eliot referred to. We will look at modernist formal experiments from Gertrude Stein and Guillaume Apollinaire through Dada, surrealism, the French New Novel, and the theater of the absurd, alongside the less prominent but equally influential exploration of aleatory, procedural, and machine-generated poetry by writers such as Jackson Mac Low and the Oulipo. Working with authors' manifestos and critics' interpretations alongside the primary texts, we'll pay special attention to the varied relationships to meaning that can be found at work in texts that a casual reader might lump together as simply meaningless or nonsensical.

As the semester progresses and we get a clearer sense of what these texts require from their readers, we'll begin to ask (with the help of some basic readings in semiotic and psychoanalytic literary theory) how our interpretive behavior when confronted with seeming nonsense might relate to the various things we do when we read normal or typical texts--ones that strike us as already or obviously meaningful. Is making sense something that a text can ever do on its own or something that we must always do to (or for) the text?

ENGL347 Black Grammars
In her text In the Wake: On Blackness and Being, Christina Sharpe argues that Blackness, due its rearrangement of and resistance to hegemonic modes of meaning making, is "anagrammatical." As a concept, anagrammatical Blackness points to "the failure of words and concepts to hold in and on Black flesh." Taking this provocation as a point of departure, this course will consider the relationship between Blackness and the grammatical, with a particular focus on rhetoric and poetics. Each week will focus on a particular rhetorical figure or grammatical concept: subject, metaphor, metonymy, apostrophe, tense, irony, catachresis, parataxis, etc., considering how Blackness shifts our understandings of their operations. Readings will include Ronald Judy, Barbara Johnson, Jacques Derrida, Zakiyyah Iman Jackson, Fred Moten, and Paul de Man, among others.

ENGL348 Special Topics: Conversations with Writers
What is a writer like, beyond their book(s)? How might they discuss the preoccupations and questions that inform their work? Structured as a seminar that extends on select days to include the Russell House Reading Series, this course will give students the opportunity to speak with some of the writers whose books we will read in class. In addition to this, we will read/watch interviews of those other writers assigned in class. Together, we will discuss how writers grapple with complex questions about being alive today. We will analyze structure, content, idea, and writerly intent. We will attend the Russell House Reading series prepared to engage in informed conversations with the guest. What we bring back to class will be an understanding of some aspect of literature that will help us frame our ongoing readings. This course will be dynamic and expansive in how it imagines (and reimagines) the ideas resting within a text, and those complicated further by having a conversation with its author.

ENGL349 Historicizing Early Modern Sexualities
This course will examine recent historical and theoretical approaches to the history of sexuality in early modern English literature (ca. 1580-1680). Our focus will be the historical construction of sexuality in relation to categories of gender, race, religion, and social status in a variety of sources, both literary and nonliterary, verbal and visual, including poetry, plays, masques, medical treatises, travel narratives, and visual media. Topics covered include intersecting constructions of the sexed/gendered/racialized body; diverse sexual practices; sexual identities prior to the homo/hetero divide; and the histories of pornography and masturbation.

ENGL350 The Law, the Citizen, and the Literary and Cinematic Imaginations
What gives the law its authority? (Can it remember?) Does it have rational or mystical foundations? What are the functions of the categories of slave, savage, scapegoat, stranger, other, family, and citizen in and for the law? How do we apprehend the relationship between the extensively legalized violations of the earth, the black, and the feminine? What gives the ongoing event of the Middle Passage so much force, and on a planetary scale? If laws of hospitality are sacred, then what are the implications of their prolific sacrilege? And what, for we can trace it, do such laws' selective "application" have buried within them? This course will attune us to who/what may be incorporated into the body politic and who/what cannot be borne in the letter, by design, and on safeguarded, terrorizing terms -- legal, historical, and metaphysical, yes, and harboring those, ontological. We will read and analyze how literary and cinematic texts represent, critique, as well as reproduce the rhetorical and psychic effects of the law.
To echo Calvin Warren, "[Our] concern is not a particular law, but that all the laws are subordinate to a Law." Thus, while we will look at the language and aesthetic configurations of specific legal events and echoes -- the Zong Case, partus sequitir ventrem, Jim Crow, Nuremberg Laws, The Code of Native Status

(in French-occupied Algeria), and so on -- we will not do so "comparatively" nor to inadvertently idolize encoded violence, but to apprehend what is buried and stirs beneath the law's foundations.

ENGL352 Flaunting: Extreme Fashion on the Early Modern Stage
Frilly ruffs and cuffs, bulging codpieces, towering "chopines" (platform shoes) -- oh my! This course considers the early modern stage as an engine of fashion and the forms of sartorial ostentation to which it gave rise. How did fashion contribute the rise of the commercial theater? How did clothing shape gender, sexuality, class, and race in plays by Shakespeare and his contemporaries, which were performed by adult men and gender-fluid, "boy" actors? How did sartorial excess and the sumptuary laws that sought to control it affect social status and mobility during the rise of capitalism? And how were early modern fashion trends updated in later productions of these plays?
Offering: **Host**

Gen Ed Area: **HA-CHUM**
Prereq: **None**

ENGL353 Race, Ethnicity, and Religion in Medieval Literature
Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question and related issues by considering the emergence of medieval ideas of race, ethnicity and religious difference. We will also think through the meaning of these categories and recent controversies about locating "race" in medieval studies. Our focus will be on a selection of texts dealing with encounters -- real and imaginary -- of Western European Christians with cultures ranging from the Mongol Empire to the Jewish communities in their own territories. The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts, and romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasies.
Offering: **Host**

ENGL354 Why Literary History?
Why should poems, novels, and plays written centuries ago engage our attention? Why should we care? And how have answers to these questions themselves changed over the course of literary history? We will dwell, in particular, on two key historical turning points: eighteenth-century Britain, when influential canonizing projects in print worked to define a native "English" tradition at the same time as the country pursued imperial expansion, and mid-twentieth-century America, when New Criticism institutionalized certain modes of reading historical literature just as English as a discipline was taking something like its modern shape. And, of course, we will grapple with the purposes, the pleasures, and the possibilities of literary history now. Throughout, we will also be attending to the practical work of doing literary history. Students will work in Special Collections to produce their own edition of a historical text.

Prereq: **None**

ENGL356 Theories of Translation
This course will examine a range of predominately 20th-century theoretical approaches to literary translation in the fields of philosophy, linguistics, literary criticism, and translation studies. In an effort to derive a definition of literary translation, we will focus on two questions. First: What is literal (or word-for-word) translation? How does it differ from other kinds of translation; how does it conceptualize meaning; what are its purposes; and what oppositions (e.g., literal vs. figurative) can we use to make sense of it? Second: What is the relationship between language and culture? Can translation give us access to an unfamiliar culture; can literary translation affect the culture in which it is produced; or does translation simply colonize foreign texts by transforming them into something legible to a domestic culture?

ENGL357 Black Texts, Lost and Found
This course examines histories of loss and recovery of black texts in the US and the Atlantic world more broadly. We will bring a three-pronged approach to our subject matter. We will analyze first the constitutive silences of the archive: epistemic and material neglect, or what Michel Trouillot has termed the "silencing of the past"; second, the preservation efforts of black newspaper editors, librarians, and bibliophiles; and third, the "counter-archiving" work of Afro-diasporic historical and speculative fiction. As we traverse different periods and empires we will consider what the concepts of the "black archive" and "black ephemera" mean to different disciplines. We will study the repressions of black Arabic writing practices in the US South and our fragmentary recovery of them in the late 20th century, unfinished novels about Black Atlantic revolutions such as Martin Delany's "Blake," incomplete runs of historic black newspapers, debates about the illusions and desires of "recovery," and the criteria that determine what counts as ephemeral and when.

We will move across different media, from print--"I, Tituba," "M Archive," "Blake," "(Dis)forming the American Canon: African-Arabic Slave Narratives and the Vernacular"--to films--"The Watermelon Woman," "Looking for Langston," "The Last Angel of History"--and from digitized databases of photographs at the ongoing archiving project The Missing Chapter: Black Chronicles to digitized newspaper archives.

ENGL358 The Corpse as Critique
From Ancient Greece to present-day Sri Lanka and Palestine, literary works have turned to the figure of the corpse in order to articulate critiques of domination

and authority. In these texts, the dead human body, despite or perhaps because of its inertness, poses potent problems to the exercise of statist and racist violence, the depredations of plantation slavery and industrial capitalism, and the abuses of empire. What is this strange form of critique, rooted in mere matter that, itself, does nothing but decompose? And what might it teach us as we attempt to survive and thrive in a world defined by spiraling inequality, rising authoritarianism, and environmental catastrophe? In this course, we will begin to answer these questions by examining literary texts from authors including Sophocles, Nadine Gordimer, and Michael Ondaatje, as well as works of philosophy, history, anthropology, political theory, and literary theory from thinkers such as Walter Benjamin, Georges Bataille, and Katherine Verdery. In tracking invocations of the corpse at various historical junctures and in various literary genres, we will investigate what makes the dead human body such a compelling figure with which to expose and subvert the exercise of coercive power and violence. At the same time, we will attend to the unique affordances and limitations of literature, drama, and film in expressing this critical potential.

ENGL359 Criticism and Marxism
This course introduces students to the Marxist (or historical-materialist) tradition, with an accent on its centrality to interpretative methods in literary studies and to related fields in the human sciences. We will study foundations, beginning with Marx and Engels, and our reading will carry us through the range of Marxisms that inform contemporary critical practice. We will focus on historical materialism as a style of dialectical thought, uniquely equipped to grasp both our immediate objects of study (literary texts and other cultural productions) and the social forces through which those objects are determined. In the same dialectical mode, we will reflect often on the relation between our work in the classroom and our contemporary social and historical situation. Students with an interest in literary and social theory will benefit from the course, as will students who know a little bit about Marxism but want to understand the logic of this crucial body of thought.

ENGL360 Special Topics: Writing Lives
In this course, students will read profiles, biographies, and theories of biography, texts that focus on the stakes of writing the lives of women, people of color, people with disabilities, and queer subjects. As we analyze these attempts to capture a life, to define the problems of this form, and to expand its possibilities, students will work on their own biographical writing. Throughout the semester, we will ask: Whose lives get written, and by whom? What constitutes evidence of a life, according to whom--and what gets left out? What kinds of research are necessary? How does a writer's relationship to her subject inform such a portrait, and what are the ethics of that relationship?

ENGL361 After Orientalism: Asian American Literature and Theory After 2000
From early articulations of cultural nationalist pride to today's transnational, intersectional, deconstructive, feminist, and queer critiques, Asian American studies is a field that has radically expanded and transformed since its original emergence out of the Third World and student strikes of the late 1960s. Fifty years after the field's inception, this course seeks to take the temperature of Asian America today by exploring a range of contemporary works published after the millennium. Alongside a selection of novels, poetry, short stories, and essays by some of the most acclaimed contemporary writers in America, we will also consider critical and theoretical texts that offer different perspectives on our contemporary historical moment, as ways of situating contemporary Asian America's aesthetic innovations. Though not required, it is strongly recommended that students have taken ENGL230 Introduction to Asian American Literature or a comparable substitute prior to enrolling. *Students may wish to read Ed Park's Same Bed Different Dreams in advance due to the length of the novel and the timing of the author's campus visit early in the semester.*

ENGL362 Friendship and Collaboration: In Theory, In Practice
How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, Black thought, and Indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

ENGL364 Destroying the Audience: Limits of Performance and Representation in the Theater of (Non) Being
Young Jean Lee's Theatre Company, active between 2003 and 2016, is most known for a series of "racial-identity plays," written and directed by Lee, which adopt an experimental approach to the critique of racial politics, driven by the motto "destroy the audience." On the one hand, this course will explore literary and artistic works that express an ambivalent, if not antagonistic, relationship to the presence of an audience. On the other hand, this course will consider the role and function of the audience as a social category by considering how the concept of audience (broadly understood) contributes to cultural production about race and gender as a potentially active element in the creative process. Students can expect to read and/or view drama, visual art, performance, film, and self-writing (autobiography and memoir) which, explicitly or implicitly, address the presence of the audience as a way of tackling larger social and cultural problems related to race and ethnicity. The goal will be to foster an understanding of the politics of gender, sexuality, ability, language, and class that determine how these issues are conceptualized and articulated. This course will employ an interdisciplinary approach to the discussion of primary and secondary texts, engaging audience studies, performance studies, ethnic studies, and disability studies, in addition to queer/trans of color, postcolonial, and

legal theory, to historically contextualize and theoretically ground a cultural understanding of the relation between audience and racial performance.

ENGL365 Ethics and Literature
P.B. Shelley's claim that "the great instrument of moral good is the imagination" lacks the twentieth-century pessimism of his inheritor, W.H. Auden, who wrote that "poetry makes nothing happen." Beginning from this disagreement about the influence of creative work on social and material relations, this course explores the ethical effects of aesthetic production. Drawing on a historically broad set of readings, from the Enlightenment and Romantic period through the twenty-first century, we will look at how writers and philosophers address the relationship between literature and moral transformation. These works help us examine Wittgenstein's assertion that "words are also deeds."

ENGL366 Dangerous Realisms
The aim of this course is to explore realism's ideological possibilities, past and present. We will begin with an introduction to realism as the preeminent formal technique for narrating novels and proceed by looking at other genres that either adapt, or respond to, realist writing. Readings will be drawn from 19th-century Europe and 20th-century Africa and will include works of realism, naturalism, and modernism. These will be considered alongside theories of realism and the novel. Theorists may include Aristotle, Armstrong, Barthes, Hartman, Jameson, Lukács, and Watt. We will read novels by Chinua Achebe, Buchi Emecheta, J.M. Coetzee, Daniel Defoe, and Gustave Flaubert.

ENGL367 Nature Description: Literature and Theory
What happens to the world when we describe it using language? What happens to language? How much can we really know about nature as it is, in itself, outside of our representational strategies? In what ways do different kinds of description -- and the often unexamined assumptions that structure them -- limit what we can see? Do different modes of description and figurative language do different things to the world? And what do they do *in* the world -- what ideological or political work? How, in short, does language reflect, touch, and transform the material world? This course will grapple with big questions about nature, language, race, class, history, science, literary form, and human minds, as well as the complex interactions between and among these. We will seek answers by attending closely to literary, scientific, and theoretical texts.

ENGL369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire's A Tempest (1969), a bold postcolonial adaptation of Shakespeare's Tempest, to Winsome Pinnock's Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

ENGL370 The Novel as History
Ever since the historical novel's appearance in the early 19th century, the genre has flourished as a way to describe and invent the past. But historical novels tend to narrate history differently than traditional historiography, supplementing historical records, attending to overlooked psychic and material experiences, reimagining past lives and events to do work in the present. This course will examine the historical novel to explore how its formal strategies amend or improve upon conventional modes of writing history. Each week we will read historical novels paired with theoretical readings. Together this will allow us to think about how fiction might be uniquely positioned to address a range of topics including, but surely exceeding: memory, utopia, nationalism, romance, trauma, commemoration, objectivity, war, archives, realism, speculation, and the everyday.

ENGL371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

ENGL372 Special Topics: Poets in Translation
In this craft seminar, students will read texts on the challenges of translation, then dive into the close readings of poems in various translations. What inclinations might we observe of poets of different regions and times, which break the customary "rules" of the American workshop poem? What new possibilities might we glimpse--and "translate" into our own work? In turn, we will read contemporary poets who exercise their own form of translation out of the English language elsewhere. Students will be invited to translate poems into English, as well as experiment with the techniques they have observed in poems in translation.

ENGL373 From Courtly Love to Cannibalism: Medieval Romances
Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist switches genders, skin color changes with religion, and a dog might be the hero of a narrative. In this course, we will begin with texts that date from the Romance's origins in 12th-century France and continue with the form's development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur's court. Some of the topics we will consider are Romance's engagement with "chivalry," the religious and racial conflicts of the Crusades, and of course, Christian mysticism and the Holy Grail.

ENGL374 Literature in the Age of Social Media
What does it mean to write, and to read, when the predominant form of self-expression for many of us resides in social media? What does it mean to construct a digital self, separate and apart from the selves that exist IRL? To interact primarily through the mediation of screens? In what ways do we commodify ourselves, and are we commodified? What risks do we run in revealing our inner most thoughts and feelings in an age of autocratic and capitalist surveillance, in which algorithms direct the attention once guided by more organic social forces? And how do all these issues affect the core mission of literature, which is to tell stories that reflect both the public self and the private one? We'll examine all these questions through a collection of texts, ranging from novels (Megha Majumdar's A Burning, Patricia Lockwood's No One Is Talking About This, Tao Lin's Taipei), essays (Jia Tolentino's Trick Mirror, Samantha Irby's wow, no thank you), and poems (Emily Berry's "Paris," Tommy Pico's "Junk"). We'll also consider these questions through some short writing assignments that ask students to engage in the creative act through the lens of social media.

ENGL375 Black Global Cities
In this course, we will analyze representations of cities and Black urban modernity in Afro- diasporic literature of the twentieth and twenty-first century. Placing special emphasis on the global hubs of London, Cape Town, Kinshasa Lagos, New York, Marseilles, and Kingston, we will ask what makes these former imperial sites Black global cities? We will read literary works on and from Black Global Cities alongside sociological texts on urbanization, globalization and discuss the extent to which literary representations either collude with or challenge dominant national and transnational narratives about Black urban modernity. Although each week's readings will focus on a different location, we will approach these locales as nodes in larger global networks of people, texts, and goods rather than as discreet, bounded places. To this end, we will trace how histories of racial formation move across borders and are transposed onto different spaces, and to what effect. Authors we will read include: Claude McKay, James Baldwin, Gabeba Baderoon, Petina Gappah, Kei Miller, and Teju Cole. We will also watch films such as Girlhood (2014), Black Panther (2018), The Harder They Come (1972), Bad Friday: Rastafari After Coral Gardens (2011), Welcome to Nollywood (2007).

ENGL376 Negativity in Black Critical Thought
Lack, nothingness, negation, the void, the abyssal, absence, wretchedness these and other corollary terms are omnipresent grammars within Black critical thought's attempts to explicate the singularity of Blackness. Conversant with philosophical genealogies of pessimism, nihilism, and negativity, this course will examine various theorizations of the relationship between Blackness and the negative. Rather than framing negativity as essentially apolitical or unproductive, this course will consider what a fidelity to the negative portends for questions of Black politics, Black theorizing, and revolutionary action. In so doing we will pay particular attention to questions of affect, gender, sexuality, aesthetics, and psycho-politics.

ENGL377 Shakespeare's Islands
How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripherality and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.

ENGL378 Creative Writing, Post-Modernism, and Future Theories
Two main lines of inquiry will guide this class. First, what historically has been the place of creative writing workshops and the products they have galvanized? Second, how has post-modernism been defined in the past and how is it defined now? With various strategies and daily practice alongside long-term goals, we will think and write to create assemblages of compositions that go beyond traditional expectations, and potential exhaustion with generic form, towards renewed inspiration and commitments.

ENGL379 American Modernism in a Time of Crisis
The heyday of modernist literature in the United States, the 1920s, was also a time of severe political and cultural conflict. In the wake of global war and a global pandemic, the US experienced multiple sources of social discord: renewed conflict between labor and capital; ascendent nativist politics and, in the Ku Klux Klan, a populist movement for authoritarian ethnic nationalism; and an intense culture war pitting cultural traditionalism against the emerging liberalization of norms about sex, gender, family, and race. All these conflicts were compounded by disruptive new media and technologies (movies, radio, the automobile) and a febrile consumer culture. In this seminar, we will consider the way literary artists responded to these conflicts and the possible comparison between their time and ours.

ENGL380 Ecstatic Grief
In this hybrid forms workshop, we will devote ourselves to the study of the grieving body and composing hybrid texts as rituals of care. In the company of writers like Prageeta Sharma, Carolina Ebeid, Dawn Lundy Martin, dg okpik, Divya Victor, Christina Sharpe, angela rawlings, Heather Christle, Ilya Kaminsky, Mathias Svalina, Kristin Prevallet, Anne Carson, and Diana Khoi Nguyen, we will explore new elegiac forms and the many ways grief's dysregulation can reshape our syntactical tendencies. In part, this course is about learning to develop a writing practice that supports the grieving body as we consider the physiological effects of grief, the voice's connection to breath, lung health, epigenetic inheritance, and grieving rituals across the world. Special attention will also be given to cultivating community and the benefits of sustaining an embodied artistic practice during extreme times and how doing so may benefit the health of the whole artist. There will be presentations on assigned readings, in-class writing experiments, and intensive workshops of one another's work. The class will culminate in a book arts project and a poetics statement.

ENGL381 The Gothic and the Sentimental
The gothic and the sentimental are hallmarks of modern literary imagination. Since the late 18th century, storytellers have returned time and again to tales of obsession and horror and to narratives of emotional affiliation, continually reinventing the trappings of the genres while seeming nevertheless to preserve their core concerns. Why did these two imaginative modes spring up contemporaneously, and why have they proven to be so durable? In this course we will examine classic texts in the gothic and sentimental traditions while reading them alongside influential theoretical texts that seek to explain the force of their preoccupations. Students will evaluate a range of critical approaches and develop a research project examining a contemporary example of gothic and/or sentimental narrative.

ENGL382 Reading Between Freedom and Necessity
Mostly the culture of literacy has taken shape within a realm of freedom, seemingly distant from the needs of the body and the demands of sustenance. At the same time, the world represented within so much of the world's narratives, both truth and fiction, has been saturated in struggle and deprivation. In this seminar we will try to make some sense of this juxtaposition, freedom on one side and necessity on the other, to explore the flip side of the drama of revolution in modern times. For us, revolutions, those great upheavals that unite hope with practical action, will be the background against which we will try to understand the gravity and persistence of dispossession itself: the pull of past or residual forms of unfreedom in the sphere of cultural representation, within and against new or emerging expressions of emancipation, themselves accompanied or countered in modern times by ever-novel styles of exploitation.

ENGL383 Fascism and American Literature
American writers were deeply engaged by the rise of 20th-century European fascism. A number of American writers took part in a generational critique of liberal democracy and thus played a role in establishing the intellectual context for the success of fascist ideology. Some American writers were fascinated by the seeming dynamism and innovation of fascist regimes. Others recognized early on the rising threat of authoritarianism and militant nationalism. In the years after World War II, many American writers surveyed the wreckage of global war and the consequences of genocidal racism and worried about their significance for art and literary expression. Were literary writers meaningfully complicit in the rise of fascism? Had totalitarianism discredited literature and culture? Or could art be a challenge to the forces that drove the rise of fascism? This research seminar will examine a range of ways in which American writers responded to fascism. We will consult the historiography and theory of fascism, as well as scholarship in the sociology of culture, with the aim of understanding how the rise of fascism affected American writers' fundamental beliefs about literature, democracy, and modern society.

ENGL384 Special Topic: Between Forms: Intermedia Arts Workshop
This advanced project-based workshop is for poets and artists interested in interdisciplinary practices crossing over between poetry, visual art, and performance. It is taught in conversation with the Fall 2021 exhibition, The Language in Common, in Zilkha Gallery including the work of Cecilia Vicuña, Tanya Lukin Linklater, Julien Creuzet, Jasper Marsalis, and Alice Notley.

Facilitated by Professors Benjamin Chaffee and Danielle Vogel, with modules taught by visiting artists from across the arts, this workshop is designed for

students interested in working outside of--or between--their primary mediums. Professors will guide students as they choose "companion mediums" to work in for the semester while employing interdisciplinary approaches to writing and art-making in order to discover their own unique and hybrid forms.

We will divide our time between intensive laboratory-like spaces for composing work, conversations with visiting artists, student presentations and workshops, and studying the works of artists working between forms, all in an attempt to root ourselves more dynamically in our individual practices. The course will culminate in a reflective essay or artist statement, as well as an exhibit of poems, objects, installations, and performances created during our time together.

ENGL385 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.

ENGL386 Special Topics: Improvisation--Collaborating with the Unknown
To improvise is to compose as one goes along, to arrange the unexpected, to make work from whatever materials and sources are at hand without previous planning. In this course, students will cultivate their relationships with what lies outside their realm of knowledge or experience in order to invent unforeseen but dynamic written works. We will study contemporary practitioners (e.g., poets, composers, essayists, dancers, and visual artists), who use found materials, somatic experiments, creative acts of translation, divination, and other innovative modes of improvisation to generate work. Together, while always keeping language close, we will create a forum in which bewilderment guides us. The class will culminate in an installation of creative writing projects spanning fields.

Prereq: **ENGL292 OR ENGL296 OR ENGL216**

ENGL387 Literature of London
This course examines the role of London in the literary imagination of nineteenth-century Britain. A vibrant multi-class and multi-ethnic jigsaw puzzle, London was a "world city" at the center of the empire, the seat of crown and Parliament, and a place of both danger and opportunity. In addition to being the economic and political center of Great Britain, some authors viewed London as the nation's narrative center as well. Together, we will explore how writers depicted the city, how they envisioned the relationship between urban living and modern life, how they understood London's inhabitants and their plots, and how they placed the city in networks of stories reaching around the world. Along the way, we will read works of literary and social theory from the nineteenth century to the present, and we will conduct our own investigations. Students will choose whether to undertake a single project culminating in a long research paper (fulfilling the requirement for honors thesis writers) or a combination of papers and targeted research projects, which may have a creative component.

ENGL389 Blackness and Affect
Critical theory and the humanities are in the throes of what has been termed "the affective turn," wherein scholars theorize affect--broadly construed as social feeling or bodily intensity--as central to understanding (post/human) relationality, the social, ethics, and the political. Haunting this field of inquiry is a series of questions: Can a turn to affect account for the figure of the Slave? Can an embrace of affectivity, as potential, bring Blackness into the realm of our understanding "without trying to fill in the void" (Hartman)? Rather than conceptualizing affect as the connective thread between bodies and worlds, or as a purely relational force, how might we think about affect and non-relationality; affect outside of and against the world; affect without the body? This seminar will engage these, and related, questions through extended explorations of the relationship between affect theory and Blackness. Readings will include: Frantz Fanon, Lauren Berlant, Brian Massumi, Sarah Ahmed, Rizvana Bradley, Xine Yao, Sianne Ngai, and Darieck Scott, among others.

ENGL390 Special Topics: Generative Novel Workshop
In this course, students will study contemporary novels, including the work of Toni Morrison, Julie Otsuka, Namwali Serpell and Kazuo Ishiguro with an eye for what differentiates the craft of writing a novel from that of writing a short story. Students then will conceptualize, explore, and write a substantial portion of a new novel project in class. They will submit outlines and excerpts for peer critique and participate in workshopping their peers' writing. The focus of this course will be generative rather than critical; that is, we aim to formulate questions, spark inspiration, and create momentum for a new novel project, rather than seek answers or completeness.

ENGL391 Unsovereign Elements, Caribbean Poetics
This course aims to study and question sovereignty, begin to theorize "unsovereignty," and stake out what may be meant by "anticolonial imagination" in literary and other aesthetic forms, as well in the theories of history that it arranges under its name, "Unsovereign, Caribbean." Unsovereignty and the anticolonial will not be imagined as exact and liberated opposites of sovereignty and colonialism, but rather as epistemically and linguistically entangled therewith, and inviting further thought from Afro-Caribbean historical and deconstructive vantages. By reading richly symptomatic, primary, historical documents about race, geography, and slavery in San Domingue/Santo Domingo, as well as contemporary fiction, art, and criticism that re-narrate and theorize Caribbean history, we will focus on the historical frame of ~1492 into the 19th century. This frame holds with specific reference to Sara E. Johnson's notion of a foundational "state of war" against black people in the Americas and Frank B. Wilderson III's notion of when the "gratuitous violence" of the Middle Ages begins "to mark the Black ontologically." The 19th century will be studied comparatively, and not as the era of heralded "emancipation," but of abduction, re-enslavement, "travestied freedom" (Hartman), anti-emancipation (Eller), and white psychosis. We will read sometimes for imperial notions of sovereignty, force, race, property, and labor, and other times for Caribbean notions and narratives that are sometimes at war with and sometimes in bed with said imperial schema and this episteme. In the face of some contemporary critical theoretical tendencies to use terms like "fugitivity," "resistance," "freedom," "abolition," "the commons," etc., as ones that are equally at stake for all, or that signify one shared known, fixed, and agreed-upon meaning, we will, rather (and especially), attend to the historical specificity and signifying work of marronage in the Caribbean region and the complex tropology of unsovereignty and "unruliness" in the Caribbean. Conceptually, the course thinks from and about Caribbean studies, Black critical theory, Black studies, Enlightenment thought, and Deconstruction. Students who want to nerd-out on critical theory, history, and Caribbean aesthetics are encouraged to apply.

We will study digitized versions of imperial naval and commercial maps held at the John Carter Brown Library, Archivo de Indias, and in other archives, as well as primary texts of different genres (e.g., pilotes, ledgers, letters, legal documents), including the writing and thinking of Christopher Columbus, Moreau de Saint Mery, Baudry des Lozieres, María de las Mercedes Santa Cruz, Immanuel Kant, and G.W.F. Hegel. We will also read selections from some of the following scholars, artists, writers: Colin Dayan, Sara E. Johnson, Evelynne Trouillot, Jacques Derrida, Robin Derby, Maryse Conde, Alejo Carpentier, Demetrius Eudell, Anne Eller, Dixa Ramírez D'Oleo, Ronald Mendoza de Jesús, Frank Wilderson III, Walter Benjamin, Gayatri Spivak, Aimé Césaire, Beatriz Santiago Munoz, Joiri Minaya, Jean Rhys, and others.

ENGL393 Special Topic: Difficult Novels, Uneasy Narratives
These are turbulent times, but they are not entirely unique. In this class, we, as writers, will consider how other writers have accommodated histories and experiences that often feel too overwhelming to describe. How have the techniques of fiction and nonfiction helped them to construct narratives that take into account the incoherence and confusion of political and personal events? We will be reading challenging works that seek to embrace complexity. We will write extensively, continually in class and outside of class. We will be asking ourselves how novels, plays, and nonfiction can both verbalize and quiet some of the questions we have all been asking as one inevitable occurrence seems to lead to the next in this world and in our lives. This is a course dedicated to rigorous reading and writing. Bring a notebook specifically for this class. You will be thoroughly immersed in literary exchanges. You will be asked to reckon with complex questions that spring from each literary work, and to set several books in conversation with each other to see what surprising, new dialogue emerges. This is a class deeply engaged in the ideas that spring from your own careful interpretations of the texts we read together.

ENGL394 Special Topics: Writing the Poetic Sequence
In this special topics seminar, students will continue to hone their creative and critical skills while focusing on the joys, opportunities, and challenges of crafting the long poetic sequence. Throughout the semester, students will write, revise, and workshop their own drafts-in-progress, and will study some of the greatest sequences written in the language. Poets and artists under consideration include Francis Bacon, Black Thought, Erykah Badu, Gwendolyn Brooks, Lucille Clifton, John Coltrane, T.S. Eliot, Ross Gay, Allen Ginsberg, Aracelis Girmay, Robert Hayden, Major Jackson, Galway Kinnell, Yusef Komunyakaa, Layli Long Soldier, Adrienne Rich, Nicole Sealey, Danez Smith, Patricia Smith, and Walt Whitman.

ENGL395 Hell: An Introduction
An inquiry into the changing experience of damnation, from sin to despair, in Dante's Inferno and Milton's Paradise Lost. Both are epics, poems of history, but their notions of history and of its lessons, belong to the specific historical moments of their composition. Both struggle, as Milton puts it, "To justify the works of God to man" but in different ways: Dante, through a representation of how hell represents divine justice as an expression of divine love: his sinners are not so punished for their sins as by them. Their torments are representations of the false good they pursue in their sins. They pursue damnation. For Milton, as for Shakespeare, original sin is not so much pride, an inborn sense of superiority, as ambition, an inborn sense of lack and intolerable sense of inadequacy that can be dispelled only by equaling the "most high," even if it means to reign in hell rather than serve in heaven.

ENGL396 Thinking with Objects: Processing a Museum Collection from Southern Africa
In Thinking with Objects, students will gain hands-on experience processing a collection of Namibian artifacts in Wesleyan's care. The course will introduce students to many of the ethical and practical challenges facing museum collections today, providing an opportunity to apply the ideas we discuss all semester by processing a collection of decorative and everyday objects made from diverse materials (wood, beads, animal hide, and shells). Part of the course will be the investigation of the origins and function of these objects. Learning how to handle, label, store, and potentially exhibit objects from the collection will enable students to reflect on Wesleyan's relationship to the African continent, and to think more generally about university and museum collections and methodologies

ENGL397 Black Grief Geographies
This course introduces students to literature and practices centered on post-slavery and post-colonial bereavement. Employing an interdisciplinary framework of Black Geography, Feminist geography, and post-colonial thought, students will examine the spatial orientations of Black grief and mourning. Here students will also evaluate the connections and frictions between queries on emotional geographies and Black grief. What are the affective and material forces of Black grief and mourning, and do they vary by place? How can we read Black grief and mourning beyond narratives of dispossession? What are the human and non-human assemblages that constitute Black grief and mourning? Is it possible to repair infrastructures that mark Black death? This course invites students to meditate on the above questions as well as to apply Black framings on grief to their own research by developing a 15-page visual essay or a 30-minute in-class lecture that draws on any of these questions.

ENGL398 Laureates
Why do some writers win prizes? What is originality? This class will focus on two recent winners of the Nobel Prize in Literature, novelist J.M. Coetzee (winner 2003) and poet Louise Glück (winner 2020), to develop a deep familiarity with their decades of work and its reception. As time allows, we will also explore other Nobel Laureates' writing, including poetry by Derek Walcott, fiction by Abdulrazak Gurnah, and autobiography by Annie Ernaux. Placing the Nobel within wider sociological contexts, we will examine the changing history of notions of literary merit and taste, the politics of literary prizes and "best of" lists, and the predominance of Europhone languages in global cultural prestige economies.

ENGL450 Senior Seminar in Creative Writing
This course is for seniors interested in the chance to devote more time to their creative writing. Structured as a space for workshop and exchange, the goal of this class will be to foster a community of ideas for students working on their own, independently directed creative writing projects. Our concerns and topics will be generated as a group with an eye toward flexibility with commitments. In part we will be exploring what it might mean to be a writer beyond the classroom. A spirit of generosity and adventure will be expected. We will be open to considering work in all its stages, and participants will have a part in setting readings to introduce issues and supplement concerns pertinent to ongoing writing, as we embark from inspirations to questions of generating goals, both as a group of writers and as individual artists.

FEMINIST, GENDER, AND SEXUALITY STUDIES

The Feminist, Gender, and Sexuality Studies (FGSS) Program is administered by the chair and other members of the program's core faculty. Core faculty are those who are actively involved in the program, who teach FGSS courses, advise FGSS majors and senior theses, and may serve as program chair. The program sponsors an annual symposium and the Diane Weiss Memorial Lecture.

FGSS102F Sex and Sexuality in Islam (FYS)
Islamic societies have long traditions of commentary about the body and sexuality. Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims throughout time. Instead of essentializing the Islamic "viewpoint" on sexuality, we will survey the variety of opinions and ideas about sex from medieval Islam to the modern world. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and modern sex manuals and debates, among other sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct in Islam, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature.

Prereq: **None**

FGSS105 Body, Self and Society (FYS)
In this course we explore the relation between the body, self, and society, and how the body can be viewed from social and cultural perspectives. We will examine the social construction of the normative body, looking at these in relation to gender, race, sexuality, and ability/disability and other social categories, and also consider representations of marginalized bodies. We will look at the coding of bodies in gendered, classed, racial, and ethnic terms, and consider how bodies 'figure,' so to speak, in current political struggles. We will also pay attention to how embodiment is felt and experienced, not as a universal site for perception, but rather as a potential space of feeling social difference and differentiation. The course will use a range of texts and materials from a range of scholarly fields, including feminist and queer theory, phenomenology, philosophy of mind/embodied mind theory, the medical humanities, and disability studies, and will look at representations of the body in film, social media, performance art, and other cultural sites.

Gen Ed Area: **SBS-FGSS**
Prereq: **None**

FGSS113F Reproductive Politics (FYS)
This course explores the history and current status of reproductive politics in the United States. Particular attention will be given to the intersection of scientific and bioethical concerns with matters of social difference and cultural meaning. Issues covered will include: the history and legacy of the birth control movement; the ideological construction of "infancy" and "childhood"; changing attitudes towards pregnancy and childbirth; conceptions of parenthood; abortion rights; the fetal personhood debates; the regulation of pregnancy within institutionalized settings; disability, selective abortion, and genetic engineering; race, gender, and reproductive justice; and more.

Identical With: **AMST115F**
Prereq: **None**

FGSS115F Reporting from the Inside: Journalism, Activism, and Intimacy (FYS)
What is the role of the reporter in today's divided and divisive America? While one approach has been to dip into the lives of others, get the story, and get out, this class will focus on pursuing the deeply human stories that matter most to you, guided by your own experience so that you can intimately connect with your subjects, your world, and yourself. From Black Lives Matter to the #MeToo movement to LGBTQ and Trans Rights, we are seeing writers and activists reporting events in real time, as they happen to and around them, celebrating the journalist as participant. This is hardly a new phenomenon. Many major historical moments--the Great Depression, the fight for Civil Rights and Women's Rights, the AIDS crisis--have had reporters on the inside, covering their own communities. In this First Year Seminar, students will immerse themselves in this kind of "intimate reporting" and its historical contexts, and also create a newsroom of their own design: learning the fundamentals of journalism through story idea meetings, research, and interview strategies; editing and fact-checking techniques; social media engagement; and pitching their work. Students will leave the class with a portfolio of writing that explores, from their own points of view, issues of gender, class, race, and sexuality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**

FGSS118 Reproduction in the 21st Century
This course will cover basic human reproductive biology, new and future reproductive and contraceptive technologies, and the ethics raised by reproductive issues.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **NSM-BIOL**
Identical With: **BIOL118, PHIL118, STS118**
Prereq: **None**

FGSS121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.
Offering: **Crosslisting**

Identical With: **WRCT121F, ENGL121F**
Prereq: **None**

FGSS123 Love, Sex, and Marriage in Renaissance Europe
This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to: How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-RLAN**
Identical With: **RL&L123, MDST125**
Prereq: **None**

FGSS123F Love, Sex, and Marriage in Renaissance Europe (FYS)
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence

play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

FGSS123Z Love, Sex, and Marriage in Renaissance Europe
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, the Italian Peninsula, the Low Countries, Portugal, Spain, and Sweden. (N.B. Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about "homosexual" love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how have contemporary (21st-century) writers reimagined Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

FGSS130F Thinking Animals: An Introduction to Animal Studies (FYS)
In 1789, British philosopher Jeremy Bentham wrote: "The question is not, 'Can they reason?' nor, 'Can they talk?' but, 'Can they suffer?'" This question, which challenged the social and legal norms of the 18th century that denied sentience to non-human animals, has influenced disciplines across the social sciences and humanities to focus on what has more recently become known as, "the question of the animal." Bentham's question has sparked centuries of debate about the sentience of non-human animals and our relationship to them. In this course, we will examine a range of theories and representations of "the animal" to understand the desire to tame or objectify animals (through zoos, factory farming, and taxidermy), as well as why they are often conceived of as guardians of inaccessible experience and knowledge, and how the human and its various gendered, classed, and racial manifestations have been conceived of through and against notions of animality. Readings may include Poe, Kafka, Derrida, Bataille, Haraway, and Coetzee (among others).

FGSS164F Hurting (FYS)
This course examines representations of harm (both received and enacted) at the intersections of race, gender, class, and sexuality. Through engagement with both artistic and social movements, we will explore questions about the ethics of representing pain. How do artists navigate depicting pain without simply reproducing violence? What constitutes an effective apology? (How) can complexly narrating the harm one has inflicted on others offer a reckoning rather than an excuse? How might we consider the relationship between identity and formal artistic choices, and how might such considerations open onto a more rigorous engagement of the social spaces texts make? How might we imagine and enact ecologies of care in the midst of ongoing histories of harm? We will consider these questions across media and genre and amidst structured self-reflection.

FGSS175F Staging America: Modern American Drama (FYS)
Can modern American drama -- as cultural analysis -- teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers' theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

FGSS187 From Shirtwaists to Hoodies: Fashion and Public Life
Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. With a focus on the United States, this course presents a loose chronology of fashion, from the late nineteenth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Guest speakers and museum visits will enhance these perspectives. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class

time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a pictured and cultural entity, embodied practice, site of technological innovation, and tool for shaping one's identity.

FGSS188 Introduction to History: Revolutionary Women
"I do not think the war would have been won without the women.... Now women have to liberate themselves." The fighter Maudy Muzenda's reflection on the role of women in Zimbabwe's liberation war speaks to a broader pattern in global history. Women have been central to the radical transformation of societies in Africa, Asia, Europe, and the Americas from the early modern era to the present. In this course we will examine revolutionary women who took up arms and others who protested for improved working conditions, voting rights, sexual liberty, and human rights. Our cases will include the history of political revolutions in France, Cuba, Russia, and China, as well as in Zimbabwe. We will also explore the critical role of women in the global Industrial Revolution, the Suffrage Movement, the rise of international feminisms, and the everyday struggles of women in multiple sexual revolutions.

FGSS200 Sex/Gender in Critical Perspective (FGSS Gateway)
Feminist, gender and sexuality studies is an exciting interdisciplinary field that addresses gender, sex, and sexuality as well as related issues of race, class, nation, and citizenship across multiple disciplines, epistemologies, methods, and vantage points. At its most fundamental, the field addresses how persons are identified and identify themselves as similar to and different from each other and the relation of these categories of difference to power relations. The study of feminist and queer thought on sex/gender and sexuality offers a critical lens through which to examine social structures and social problems, inequality, difference and diversity, identity and the self, belonging and community, and the possibility of social change, among other topics. This course will offer a broad introduction to the field and provide a foundation for further study of specific areas of interest. The primary goals are to (1) explore the multiple ways feminist and queer scholars have understood sex, gender, and sexuality; (2) explore different methods and styles of feminist thought and expression; (3) situate these in time and place, with attention to historical and cultural contexts; and (4) explore the intersections of sex, gender, and sexuality with race, nation, and other categories of difference. The course will cover aspects of first-wave feminism (e.g., suffrage and the abolitionist movement); second-wave feminism and critical theories of sex/gender; and contemporary feminism, including queer theory, intersectionality and race, and transnational and postcolonial feminism.

FGSS201 Queer Theories
This seminar will give you a solid foundation in queer studies. Although "queer" is a contested term, it describes -- at least potentially -- sexualities and genders that fall outside normative constellations. This theory-based, reading-intensive seminar considers multiple genealogies of queer theory, from foundational texts and authors in queer theory, queer of color critique, trans theory, and crip theory, to lesser-known but critically important interventions. Structured as a series of conversations, we explore multiple locations of theory and notions of "queer." Rather than understanding queer studies as a singular school of thought, we will continuously problematize queer studies as a mode of analysis, asking: What kinds of bodies or desires does queer describe? What are the politics of queer? What are the promises of queer theory, and what are its failures? What is the future of queer? This course is excellent preparation for a queer studies concentration in American studies. Students should expect to end the semester confident of their ability to read and draw on a range of queer theories.

FGSS202 Feminist and Queer Methods Across the Disciplines
This course aims to better equip students to conduct rigorous and politically-engaged interdisciplinary research by exposing them to (and inviting them to reflect on) the range of methodological approaches that feminist and queer thinkers employ across the humanities and social sciences. Engaging feminist and queer uses of such methods as oral history, ethnography, visual-cultural analysis, literary criticism, and archival research, we will explore how feminist and queer thinkers intervene in dominant knowledge production. Further, we will consider how, in our own research, feminist and queer commitments might necessarily reshape how and what kinds of questions we ask, how we select and marshal evidence, and how we engage our subjects and objects of analysis. Students will be expected to practice using methods that are unfamiliar to them and to reflect on their relationships to power, method, and disciplinarity as they develop their own research programs.

FGSS203 Sex and Sexuality in Islam
Islamic societies have long traditions of commentary about the body and sexuality. Medieval Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims, both historically and in the contemporary world. Instead of essentializing the Islamic "viewpoint" on the body, we will survey the variety of opinions and ideas about the body that Muslims have held. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and contemporary sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature. While the course primarily focuses on the premodern period, it will also delve into contemporary Islamic discourses.

FGSS204 Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies
Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, environmental legal frameworks, and a subtle mainstreaming of neopagan ritual practices and goddess worship in the Americas. This seminar will explore the social, legal and metaphysical aspects of myriad eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, pantheist, monist, and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Erndl 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S folks? Engaging emerging podcasts, shamanic documentaries, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke the gods to self-regulate the ecologically destructive practices of our late-stage capitalism? Who invokes who, how and when, shared where? To whom do we tend to listen on these matters, and why are they quaked to speak?

FGSS206 Feminist Technoscience: Making Bodies, Bits, and Bombs
This course focuses on feminist transnational approaches to the study of science and technology. It introduces students to a range of critical and experimental figurations, post/decolonial theories and methods, and interdisciplinary reading and writing practices proposed by leading and emerging scholars who shape today's vibrant field of feminist STS. While the various approaches share strong commitments to justice, difference, and collective agency, they don't always mean the same thing. Students will learn to unpack affinities, tensions, and radical possibilities for living with greater care and less violence in a more-than-human, more-than-Western world. The course has three parts. Part I grounds students in canonical texts that have opened up multiple pathways for critically examining patriarchy, war, and technoscientific progress. These texts challenge binaries and hierarchies of nature-culture, organism-machine, modern-traditional, center-periphery and so on. Part II focuses on analyses of colonialism and racial capitalism, and the material-discursive apparatuses deployed to reconfigure how bodies, bits, and bombs come to matter. Part III looks at new works that refuse the end of history and propose a pluriverse of bold alternatives.

FGSS209 Feminist Theories
How does "feminist" (a political commitment) modify "theory" (an intellectual practice)? We will address this question by reading a range of contemporary feminist theorists working to analyze the complex interrelations of social differences (gender, race, class, sexual orientation, religion, and so on), and relations of social domination and economic exploitation in a globalized world. The question "what is to be done?" will oversee our work.

Prereq: **None**

FGSS211 Queer Pop Culture
This course introduces students to the intersections between sexualities and popular cultures in historical and contemporary contexts, focusing on queerness(es). We think about the politics of sexuality in and across a range of cultural forms -- including fashion, food, music, cinema, and beauty. We attend to how normative and non-normative notions and forms of sexuality are shaped by differences of race, language, ethnicity, gender, class, religion, region, and nationalism. We think of pop culture in an expansive way, that is, as everyday cultural forms, texts, practices, products, spaces, and histories that we engage with, use, enjoy, and participate in. We draw on women of color feminist studies, transnational feminist studies, global cultural and media studies, and queer/trans of color studies to explore the politics of sexuality through an intersectional framework across a range of public cultures and arts.

FGSS211Z Sexual Politics
This subject introduces ideas developed in feminist theory about the social and political construction of areas of experience relating to the body, gender and sexuality. Issues analysed in the subject include transsexualism, reproduction, pornography, sex work, sexual violence and sexual orientation. Students who complete this subject should be able to understand the ways in which issues connected with the body and sexuality are socially and politically constructed, understand the ways in which the construction of masculinity and femininity affects the learning and regulation of such areas of experience, and apply a variety of feminist approaches to the analysis of these issues.

FGSS216 Global America: Gender, Empire & Internationalism Since 1890
This course explores the cultural history of America's relationship to the world across the long 20th century with particular attention to the significance of gender and sexuality. We will locate U.S. culture and politics within an international dynamic, exposing the interrelatedness of domestic and foreign affairs. While exploring specific geopolitical events like the Spanish-American War, World War I and II, and the Global Cold War, this course emphasizes the political importance of culture and ideology rather than offering a formal overview of U.S. foreign policy. How have Americans across the 20th century drawn from ideas about gender to understand their country's relationship to the wider world? In what ways have gendered ideologies and gendered approaches to politics shaped America's performance on the world's stage? How have geopolitical events impacted the construction of race and gender on the home front? In the most general sense, this course is designed to encourage students to understand American cultural and gender history as the product of America's engagement with the world. In so doing, we will explore the rise of U.S. global power as an enterprise deeply related to conceptions of race, sexuality, and gender. While reading key American studies texts in the history of the United States and the World, we will also examine films, political speeches, visual culture, music, and popular culture.

FGSS217 Key Issues in Black Feminism (FGSS Gateway)
This course surveys key issues in the historical development of black feminist thoughts and practices through readings of canonical works especially from the 1980s and '90s that contribute to this extensive body of knowledge. Our aim is to engage black feminist and womanist theorists, activists and artists from the diaspora who are exploring intersections of race, class, sexuality, religion, and other indices of identity affecting their daily lives. To that end, we will take an interdisciplinary approach to unpacking the historical tensions and politics and poetics in theory/practice, representation/self-making and expression/performance. We will also examine more recent turns in #BlackLivesMatter, #SayHerName and #BlackGirlMagic and conclude with Post-Zora Interventions--feminist interrogations on the borders anthropology, art, and activism.

FGSS218 Introduction to Queer Studies
This course will examine major ideas in the field of queer studies. Relying upon theoretical, historical, and cultural studies texts, we will consider the representation and constructions of sexuality-based identities as they have been formed within the contemporary United States. We will explore the idea of sexuality as a category of social identity, probing the identities of lesbian, gay, bisexual, and transgender to try to understand what they really mean in various cultural, social, legal, and political milieus. In doing so, we will ask, What does it mean to study queerness? What do we mean by "queer studies"? How do institutions--religious, legal, and scientific--shape our understandings of queer identities? In what ways do sexuality and gender interact, and how does this interaction inform the meanings of each of these identity categories? How do other social categories of identification--race, ethnicity, and class--affect the ways in which we understand expressions of queerness? Moreover, what does studying queerness tell us about the workings of contemporary political, cultural, and social life?

FGSS219 "The History that Hurts": Reading Saidiya Hartman
This course will introduce students to the major works of the Black literary theorist and cultural historian Saidiya Valarie Hartman (b. June 25, 1961), who was named a 2019 MacArthur "Genius" Fellow in Literary History and Criticism and American History. After graduating from Wesleyan in 1984, Hartman earned her PhD in American Studies from Yale in 1992; she is currently a professor in the Department of English and Comparative Literature at Columbia University. Students enrolled in this course will read and write about Hartman's trilogy of scholarly monographs: "Scenes of Subjection: Terror, Slavery, and Self-Making in Nineteenth-Century America" (Oxford University Press, 1997); "Lose Your Mother: A Journey Along the Atlantic Slave Route" (Farrar, Straus and Giroux, 2007); and "Wayward Lives, Beautiful Experiments: Intimate Histories of Riotous Black Girls, Troublesome Women, and Queer Radicals" (W. W. Norton, 2019). Finally, if her new book project is published before the syllabus is finalized, then students enrolled in this course will also read and write about Hartman's fourth scholarly monograph (tentatively titled "N Folio: An Essay on Slavery and the Archive"").

FGSS220 Literature and Black Feminism: The Dramas of Black Capital
This class explores Black women's fiction as a mode of critique and intervention into Black Americans' complicated relationships with social and economic capital in the wake of US chattel slavery. How do Black people negotiate the transition from being to owning property? How does the persistence of capital, even in the absence of the system of racial slavery that ushered it into being, continue to shape Black institutional access and Black intramural relations? How are white, Western regimes of value--constructed as they are through the production of racial-sexual difference in dominant habits of thought and representation--contested and, at times, recapitulated in Black social life? How does Black women's literature take up these questions, and what about Black women's literature uniquely equips it to meet this challenge? Ultimately, the course takes seriously Black women's literature as Black feminist thought, exploring how it indicts and imagines beyond the violence of modern racial capitalism.

FGSS222 Identity and Jewish Literature: Sexuality, Race, and Gender
What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

Prereq: **None**

FGSS223 Sex, Money, and Power: Anthropology of Intimacy and Exchange
Sex and money--intimacy and economy--are often imagined to occupy distinct and separate spheres. Sex and intimacy are located in the private or domestic realm, in spaces of leisure, feelings, care, and personal connections. Money and economy, on the other hand, are purportedly public, located in the market and tied to labor, rationality, and impersonal (non)-relations. This course brings these spheres together, focusing on the links, exchanges, and circuits between the intimate and the economic in diverse cultural contexts.

Drawing on anthropological, feminist, Marxist, queer, and critical race theory, we will build

working definitions of key concepts: intimacy, division of labor, domestic labor, sexual labor, exchange, commodity, value, neoliberalism, consumer culture, and more. We'll test, apply, critique, and expand these concepts as we work through ethnographic case studies on contemporary sex work and tourism, marketing and pornography, reproduction and domestic labor, marriage, class and sexual lifestyle, labor and care work, and sex stores and commodities. We will connect economic, cultural, and political formations with race, ethnicity, nation, sexuality, class, and gender, scaling up to consider global and transnational exchanges and down to consider how these circuits impact families and communities. Throughout, we will ask: Whose labor is valued and recognized, and why? How do bodies accrue value, and in what kinds of marketplaces? When are intimacies--sexual and social--commoditized? How is race, gender, and sexuality central to these exchanges? How do new transnational circuits constrain and/or empower people? And finally, who benefits from these relations, and who does not?

FGSS224 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100--1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

FGSS226 Performance Curation as Relational Praxis
When we hear the word "curator" we might think of the iconic fictional character of Bette Porter--someone who works in a museum or gallery with a vision for how paintings, sculptures, and wall texts are put together for a show. In this class we will expand on this idea of the curator to explore what happens when we add performance to the task of curation. Or, put differently, we will ask what happens when we remove performance from the more theatrical tradition to add it into the gallery and museum space. Thinking between performance studies, visual art, and museum studies, this course explores the role of the performance curator. Connecting performance curation to community engagement, social practice, and transformative justice, we will explore the ways in which performance might address questions of racial inequality, gender variance, class access, and dis/ability. We will ask: How does performance live in art institutions? How do you compensate a performer for a fleeting piece of work? How does performance help us reimagine the space of the art institution itself? Does performance curation make possible new genres of performance? Can, and how, might we apply its practices back to more traditional theater contexts at the university, in the art world, and beyond?

In this class students will explore theories of performance curation as a practice of not only selecting and choosing, but of building relationships. We will look at museum shows, arts organizations, and performance scholars to eventually build individual proposals for our own performance events. Artists and scholars to be discussed include Nivald Acosta, Mariana Valencia, Justin Allen, Morgan Bassichis, Jamie Shearn Coan, Ralph Lemon, Thomas Lax, Adrienne Edwards, Tourmaline, Carolyn Lazard, The Poetry Project, Center for Experimental Lectures, Wendy's Subway, Adult Contemporary, and more.

FGSS227 Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa
The 1929 Women's War is a touchstone for women's history in Africa. By 'sitting on a man' women in Nigeria shocked colonial authorities and demanded economic rights and a public voice. These unruly women danced in protest and rioted (sometimes nude), but their actions were not uncommon sights for their African audience. African women across the continent had long wielded power as queen mothers, prophets, and traders. Others challenged the constraints of ordinary domestic life through their labor, dress, or spirit possession. Gender and contested authority are central to everyday life and politics in Africa. In this course, we will study the history of political and domestic authority on the continent with special consideration for the ways in which gender, sexuality, and power intersect. These histories are diverse both in time and place. For this reason, this course will not present a single narrative of gender in African history. However, students who satisfactorily complete the course will be able to write knowledgeably about the major debates surrounding gender and sexuality in Africa. Major themes include: spiritual authority; domestic and sexual life; the division of labor; and the impact of colonial rule and post-colonial politics. We will examine how women (and also men) have grappled with these intricate social and political relations from the pre-colonial period into the post-colonial era.

FGSS228 Performing Identities (FGSS Gateway)
Despite the ways that "difference" matters in our social world, identity categories--particularly race, class, gender, and sexuality--are largely constructed. This course uses "performance" as a lens through which to better understand the constructedness of identity. Further, it explores how minority

artists and theorists mobilize art and "performance" in their efforts to scrutinize these identity categories' coherence and authority. We will explore the following questions: To what extent can "identity" be understood as a biological truth? How do historical and political needs shape how categories of difference appear? What political potential might art and performance generate, especially for helping us to imagine beyond our current identificatory regimes? Ultimately, this course suggests that the "performativity" of identity might suggest possibilities for undoing its real oppressive implications.

FGSS229Z Thinking with Octavia Butler's "Wild Seed"
Blend: Monday and Thursday class time synchronous; additional class hours asynchronous.

Black speculative fiction writer Octavia Butler's novel "Wild Seed" (1980) begins on the African continent in the 17th century amid the rise of transatlantic slavery and concludes on a plantation in Louisiana on the eve of the 19th-century American Civil War. "Wild Seed" was the last published book in Butler's Patternist series, but it relates the earliest segment of that epic story, which follows a shape-shifter named Anyanwu and a body-jumper named Doro across geographies, centuries, classes, corporealities, genders, races, and even, in Anyanwu's case, across species. To quote one student: "It's the weirdest novel I've ever read." This seminar takes up the myriad and interwoven provocations Butler offers in "Wild Seed" by reading her novel alongside a wide range of scholarly literature in the fields of African and African diaspora studies, Indigenous studies, gender & sexuality studies, animal studies, history, disability studies, religious studies, and cultural studies, as well as visual arts. Rather than "apply" the syllabus texts directly to Butler's novel, we will attend to how her novel not only reflects--indeed, anticipates--such scholarly and artistic production, but also produces its own aesthetics and epistemologies.

The seminar unfolds part-synchronously (via Zoom) and part-asynchronously (via writing assignments, screenings, and research project check-ins). Twice-weekly virtual meetings will be centered on presentations of research projects that students will develop over the course of the month, engaging a particular theme or question that they will identify in Butler's work. As such, the syllabus texts are subject to change. Students will be expected to read "Wild Seed" in its entirety in advance of the first class and to have begun thinking about topics they might explore for their presentation and research project (the former being preparation for the latter). The seminar's asynchronous component will consist primarily of weekly writing exercises asking students to reflect on how the assigned texts converse with Butler's novel and vice versa and to comment on one another's analyses. Shared annotatable pdfs will be used to generate conversations about the readings outside of class and to identify questions and topics for discussion. The professor will consider proposals for a creative final project, but it, too, will require substantive research.

FGSS230 Contemporary Korean Cinema and Society
This course offers an in-depth exploration of contemporary Korean cinema from the late 1990s to the present, emphasizing its intricate relationship with societal issues. Students will engage with a diverse array of films that not only demonstrate the artistic innovations of Korean filmmakers but also reflect the dynamic sociopolitical landscape of South Korea. Through guided analyses of film texts, we will employ various critical perspectives, including auteurism, national cinema, cultural studies, and genre theory, to enhance our understanding of cinematic narratives. A central focus of the course will be the examination of how gender, sexuality, and identity are portrayed in contemporary Korean films. Additionally, the course will investigate the impact of economic factors and transnational influences on the production and reception of Korean cinema, including the rise of genres such as "K-horror" and the rhetoric of transgressive violence. All films will have English subtitles, and all readings will be available in English; no prior knowledge of Korean film, history, or culture required. Join us on this captivating cinematic journey as we explore the intersections of films and society in contemporary Korea.

FGSS231 Black Women and the Sacred
This course examines how Black women engage spiritual practices, in and beyond religious traditions to remake an anti-Black world. Black women have famously been called the "mule of the world." In this role, the Black woman is beast of burden, property, ungendered, enslaved. As such the Black woman constitutes a limit for the normal, the human, and thus the religious. In the study and practice of religions in the modern, western world, Black women are included through exclusion as heretics, demons, and witches. Nevertheless, Black women and their practices across normative formations of nation, race, and religion have cultivated social practices, ideas, and communities which form a counter-poetics, a counter-mythology, and an otherwise possibility of what religion, unbounded and non-normative might be. This course examines typical accounts of Black women in different religious traditions, but more importantly, the course examines how Black women's practices upset normal accounts of nation, race, gender, sexuality, and religion. Course focuses on digital humanities in learning and assignments. Books for purchase are not required.

FGSS232 Gender and Spirituality in the United States
Reclaim your goddess energy. Worship at the altar within. Celebrate your moon cycle. Good vibes only. Messages like these invite women to sanctify themselves, find meaning in the workings of their bodies, and connect to supreme natural forces. They also have powered spiritual and political movements over the past 70 years. While we might we be inclined to relegate an interest in astrology, crystals, aromatherapy, yoga, or reiki to the realm of hobbies or health practices, this course will instead provide a more nuanced view. We will learn the historical and religious contexts of contemporary American spiritualities, particularly as they have been practiced by and marketed to women. We will answer questions such as: How different is spirituality from religion? Why has spiritual practice been commodified and gendered feminine since the New Age era of the 1960s? How has women's spirituality reflected changing ideals of womanhood and the feminine over time? Throughout the class, we will read and listen to popular spiritual content and contextualize it within broader struggles over identity, sexuality, and feminism. In particular, we will interrogate issues of religious

appropriation and consider the effects of contemporary movements on the communities who have cultivated sacred practices for centuries.

FGSS233 Global Queer Studies
This course explores global experiences of LGBT/Q life, bringing an explicitly transnational lens to a field too often dominated by U.S.-centered perspectives.

Drawing on queer ethnography and film, we will explore the contours of queer and trans life around the globe, from the lives of gay men in Indonesia to Muslim yan daudu in Nigeria, gay tourism in post-Revolutionary Cuba, queer mati work among working-class Afro-Surinamese women, lesbian activism in India, LGBT asylum claims in Canada, the queer art of Carnival in Trinidad and Tobago, the everyday lives of lalas (lesbians) in China, and and the transnational lives of Filipino gay men in New York. Our aim is to challenge and expand Western categories and concepts of sexuality, gender, identity, and desire (both hetero- and homo-normative) and to center the ways sexual/gendered identities, cultures, and politics are shaped by colonialism, imperialism, racialization, migration, transnational media, and global capitalism.

FGSS233Z Writing the Body
How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Melissa Febos, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

FGSS234 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

FGSS235 Writing on and as Performance
This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and staging live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Toni Morrison, Lidia Yuknavitch, Oliver Baez Bendorf, Glenn Ligon, Eve Sedgwick, Fred Moten, and Billy Ray Belcourt, this course will challenge students to craft ideas and arguments by enhancing critical and creative writing skills. We will experiment with style and form from academic arguments, to performance lectures, artist interviews, and free-form creative prose essays. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. Students will also be asked to complete hybrid creative writing assignments in response to prompts that imagine writing as always in conversation with performance. More specifically, students will write pieces about embodiment, sound, and the visual. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten) and "listening in detail" (Vazquez).

This course encourages students to experiment with their writing practices. Over the course of the semester students will be asked to write four separate creative/critical pieces, all of which will be workshopped in the space of the classroom.

FGSS236 Activism and Theories of Change
In this course we will explore strategies and theories of change that shape social justice movements, with particular reference to recent movements in the United States. We will discuss the benefits and risks of the many available strategies including direct action, grassroots mobilization, impact litigation, legislative campaigns, electoral campaigns, artistic protest, and public education. We will apply concepts and lessons from past movements to explore organized actions intended to protect communities and resist authoritarianism in our current climate. What strategic, ethical, or moral questions are raised by various types of protest and communications? What do history, research, and current events teach us about what causes social change? How do we measure whether various strategies and tactics work? The instructors will draw on their own experiences as activists for women's rights, queer rights, and social and economic justice. The course will be co-taught by Distinguished Visiting Professor of Public Policy Leslie Gabel-Brett and guest instructor Beverly Tillery, former Executive Director

of the Anti-Violence project in New York City, who will focus on the ways BIPOC and Queer BIPOC communities are reshaping the social justice landscape by addressing the safety of trans people, challenging the gender binary, and rethinking accountability and the carceral legal system. We will allow time to apply the course concepts to events occurring in real time during the semester. The instructors are deeply committed to maintaining a safe space for inquiry and learning where divergent opinions are welcome and respected. This course will be relevant to students interested in public policy, feminism, racial justice, gender and sexuality studies, and other social sciences, and will provide useful insight for current and future organizers and activists, lawyers, and public policy advocates.

FGSS239 Animal Theories/Human Fictions
The question of "the animal" has become a recent focus of theory, although depictions of nonhuman animals can be traced to the very origins of representation. This course will move among literature, philosophy, art, and theory in an effort to trace the changing conceptions of human-animal difference and human-animal relations from 18th-century fictions of savage men and wild children to current theories of the posthuman. We will consider the ways that the representation of "the animal" intersects with theories of gender and race as it also contests the grounds of representation itself. Authors may include Rousseau, Poe, Sewell, Mann, Colette, Coetzee, Heidegger, Agamben, Derrida, and Harway.

FGSS240 The Gendering of Music in Cross-Cultural Perspective
This course presents a critical examination of issues explored and debated in recent studies of gender, sexuality, power, identity, and music from diversified music traditions, including Western art music, popular music, and world musics. Drawing upon interdisciplinary discourse on theories of feminism and gender, gay and lesbian musicology, as well as queer theory in ethno/musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

FGSS241 Writings from the Abyss: Andean Women Authors Between Territory, Memory, and Body
This course explores literature written by Andean women through a lens that centers the body, gender, and territory as key axes of resistance writing. We will ask ourselves how authors from regions such as Peru, Bolivia, and Ecuador -- from the mid-20th century to the present -- articulate their experiences and genealogies from positions that engage with ancestral knowledge, Indigenous worldviews, Andean spiritualities, and political memory. The selected texts highlight representations of the female body as a site of conflict, pleasure, maternity, trauma, and rebellion. Topics will include the coloniality of gender, state violence, language and orality, racialization, and sexual dissidence. The course is organized thematically and combines literary analysis with approaches drawn from cultural studies, Andean feminisms, and decolonial theory. Readings will include texts written in Spanish as well as bilingual or translated works from Quechua, Aymara, or Kichwa, alongside visual materials, interviews, and digital archives when relevant.

FGSS242 Intimate Histories: Black Women's Sexuality
Black feminist theory teaches us that African American women have historically confronted racism and sexism in addition to other forms of oppression. How has this experience shaped the sexual lives of everyday black women and famous figures? This course places the sexual at the center of African American women's history. It will examine how regimes of violence have intervened in black women's sexual freedom, from intimate bonds to reproduction to same-sex desire. It will cover black women's resistance to these regimes; to their sexual agency in diverse spaces from the plantation to the porn industry. This course will also tackle the enduring impact of the Jezebel stereotype in the history of black women's sexuality. Using primary and secondary sources, this class will fundamentally investigate the significance of African American women's sexual history in the histories of American sexual, racial, gender, and class politics.

FGSS243 Television: The Domestic Medium
Of all the mass media, television is the most intimately associated with domestic and familial life. Its installation in American homes over the postwar decade coincided with a revival of family life that encouraged an emphasis on private over public leisure. Most television is still watched at home, where viewing practices are interwoven with domestic routines and provide a site for negotiating family and gender relations. Television production is shaped at several levels by the images broadcasters and advertisers have of viewers' domestic lives: Broadcast schedules reflect socially conditioned assumptions about the gendered division of family roles; a common televisual mode of address uses a conversational style in which performers present themselves to viewers as friends or members of the family; and families or surrogate families figure prominently in the content of programming across a wide range of genres, including sitcoms, primetime dramas, daytime soaps, and talk shows. Sitcoms, in particular, have responded to and mediated historical shifts in family forms and gender relations over the past 50 years, and they will be a focus in this course. We will explore how television has both shaped and responded to larger cultural discourses about family and gender from the postwar era into the 21st century.

FGSS244 Feminist and Queer Theories of Social Reproduction
This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and

political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

FGSS246 Girlfriend, Sister, Self: 20th-c. Black Women's Writing
This course will examine textual and visual constructions of the girlfriend, sister, cousin, and daughter in 20th-century black women's writing. We will read works by Toni Morrison, Alice Walker, Veronica Chambers, and Marita Golden as narratives of women loving women (sexually and not) and as sites through which to engage black women's subjectivity more generally. In this course we will attend to the interior landscapes of individual black female subjects as well as the social landscapes that produce and/or complicate notions of love, kinship, friendship, and self. We will draw on African American literary theory, queer and affect theory, and black cultural memory as well as turn to influential works by bell hooks, Deborah McDowell, Kevin Quashie, and Valerie Smith, among others. How do writers of the period imagine and articulate the relationship between black women and their others?

FGSS247 Gender and Power in Chinese Literature
This course explores the intersections of gender, power, and performance in Chinese society. Drawing on literary and historical sources, theories of gender and sexuality, and with reference to media forms such as theater and film, we assess the significance of gender as an analytical framework for studying Chinese literature, culture, and society. What power dynamics drive conceptions of gender and gender ideology in Chinese literature and history? And how do discussions around gender roles and sexuality change in the modern and contemporary periods? Course topics include: Chinese feminism; depictions of women in classical literature; gender roles, family, and marriage; conceptions of the body; constructing identities; women writers; the "new woman"; themes of cross-dressing; classical romance narratives; gender performance in Chinese theater; queer narratives; and more.

FGSS250 The Renaissance Woman
This course takes seriously the socioeconomic, cultural, religious, and physical restrictions placed on women writing in the 16th and 17th centuries. Through a selection of literary works, we will examine the ways in which early modern women exercised considerable authorial agency in the poetic-fashioning of the literary tropes, genres, and forms of thought that they inherited. Often re-forming, reinventing, revising, and re-imagining poetic spaces, these women developed their own styles of critique and creation from within their historically specific concerns. This course recovers works that were frequently written out of the study of the early modern during the 18th, 19th, and 20th centuries in order to grapple with the imaginative voices of women writing under the constraints of their time.

FGSS252 Guns and Society
Students will discuss some of the key questions that animate the emerging interdisciplinary field of gun studies, considering guns as objects and symbols and as sites of both shared and contested meanings in everyday life. Readings will include recent scholarship about the evolution of gun technologies and the changing place of guns in U.S. society, from the colonial era through to the present day, exploring how the history of guns in U.S. history is relevant to other histories, including studies of race, gender, class, labor and capital, social movements, and military and civilian life. Special focus will be put on visual studies, museum studies and public history, science and technology studies, public health, and legal history. Assignments include four shorter (2-page) papers and a 15-page final research paper. Each student, working in small groups, will also deliver a 10-minute presentation and have opportunities for site visits to local museums and gun violence memorials such as the Coltsville National Historic Park (Hartford), Springfield Armory National Historic Site (Springfield, Massachusetts), and the Connecticut Gun Violence Memorial (New Haven).

(This course is a prerequisite for individualized humanities "labs" designed for students to delve into a particular aspect of the topic of guns and society in a more applied way in the spring semester, through special projects that can include an individually designed research paper, a museum/archives project, a theater sketch, a podcast, a high school teaching module, an art project, an exhibit in a local museum, an oral history project, or a syllabus, among other possibilities to be discussed with the instructor.)

FGSS255 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex
This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

FGSS256 Social Movements
How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

FGSS258 A Celebration of Women in Jazz: A Critical Analysis of Gender
How can we take the lessons of Jazz with us into other spaces? In this course, students will study Women in Jazz and examine the broad impact of our social structures and power systems to consider how the lessons of Jazz can help us navigate our future. How can we take the values of Jazz, such as improvisation, listening skills, democracy, a celebration of diversity, and equity work, and use our agency to effect change for the better in our communities? This course will examine the traditionally male-dominated nature of Jazz, its history of misogyny, and underrepresentation of women and other gender expressions. Students will learn in general about the musical art form of Jazz, its history as Black American music, and its unique qualities including improvisation, the blues, and swing. There will be a strong focus on listening to music from women musicians, and students will learn how to actively listen to jazz and all music. Together, we will look at case studies of successful women musicians and composers from the history of Jazz through the present, reading biographical information and reviewing their performance and compositional contributions. Musicians may include Mary Lou Williams, Carla Bley, Terri Lynn Carrington, esperanza spalding, Nina Simone, Billie Holiday, Ella Fitzgerald, Melba Liston, Lil' Hardin Armstrong, Dinah Washington, Abbey Lincoln, Toshiko Akiyoshi, and Marian McPartland.

FGSS262 "Before the 'Body' there is the 'Flesh'": Reading Hortense Spillers
This course will introduce students to the major works of the black feminist theorist and literary critic Hortense J. Spillers (b. April 24, 1942), one of the greatest essayists and most gifted intellectuals of our times. While her published writings are legion, Spillers is perhaps best known for her scholarly article titled "Mama's Baby, Papa's Maybe: An American Grammar Book" (originally published by Diacritics in 1987). In addition to "Mama's Baby," then, together we will read and engage at close range with the essays collected in "Black, White, and in Color" (published by the University of Chicago Press in 2003) in order to reveal the extraordinary complexity and clarity of her thought.

FGSS267 Revolution Girl-Style Now: Queer Performance Strategies
Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer," we will pair theoretical readings with theatrical sites.

FGSS268Z Gender and History: Global Feminist Theories and Narratives of the Past
What is a female husband? In the 1980s an increasing number of feminist scholars posed questions about the relationship between biological sex and gender roles. Ifi Amadiume, who studied the history of female husbands in West Africa, asserted that such relationships between sex and gender needed to be studied in a global context. More than two decades after Amadiume's influential book Male Daughters, Female Husbands: Gender and Sex in an African Society (1987) was published, the scholarship on global gender and sexuality is vibrant and dynamic. These works have shown gender to be central to understanding society at different periods and geographical locations, but it is far from a universally understood category. This seminar will introduce students to the history of gender, sex, and the body from a global and comparative perspective with readings from the history of Africa, the Americas, Asia, and Europe. We will also cover the development of influential theories in the field and how they apply to the writing of history. For the first three weeks of the summer session we will focus on 1) Producing a Gendered Discipline 2) Feminist Theories and Sexualities and 3) Gender in the Archive. In the final week, students will produce a final research paper relating to one of four possible themes: International Feminisms, Women's Rights, Queering Histories, or Gender and Labor. Our readings for the week will guide an in-depth discussion of each topic. The course is especially appropriate for prospective history and feminist, gender and sexuality majors (this is a gateway course for FGSS), though all students interested in using gender as a category of historical analysis for their scholarly work in other fields are welcome.

FGSS271 Bad Sex
In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, "Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations." Brooks is far from alone in this critique of promiscuity. What is it about "casual encounters" and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

FGSS272 Knowing Their Place: Two Centuries of Women Generating Wonder in the Natural World
This seminar will examine the intersection of natural science, women's history, and poetic prose through the writings of Rachel Carson and the female nature writers who both preceded and succeeded her, including Mary Treat, Anna Botsford Comstock, Mabel Osgood Wright, Annie Dillard, Terry Tempest Williams, Robin Wall Kimmerer, Camille Dungy, and others. These women looked closely at the natural world and wrote intimately on botany, birdwatching, and the ecology of their local landscapes, teaching their readers to feel wonder and a sense of connection with place. What does it mean to know a landscape or an ecosystem intimately? How does a sense of place become political? How does gender affect perspective on the natural world and environmental stewardship? Each student will put these ideas into play in a portfolio of place-based personal essays.

FGSS273 Unruly Knowledges: Remixed Methods and Creative Practices
This course offers an introduction to methods for all students who are interested in experimental, critical and creative approaches to research and scholarly inquiry in the social sciences and humanities. This course examines a variety of methodological approaches used in feminist studies, queer studies, and trans studies as (comparatively newer) fields of inquiry into complex intersections of sexuality, gender, race, nation, state, disability, class, ethnicity, religion, and diaspora. We draw from disciplines and fields in the humanities and social sciences (including literary studies, cultural studies, anthropology and sociology, history, and urban studies) and explore how scholars in feminist, queer, and trans studies have used, re-used, mixed, and re-mixed methods, including ethnography, archival research, close reading, oral history, and creative work. Through these (re)uses and (re)mixes, feminist, queer, and trans studies scholars have provided rich and complex questions of methodology (the study of method) and epistemology (the study of knowledge), and draw attention to how methodology and epistemology are intricately and inextricably linked. How do we know what we know about where, when, and whom -- and why does it matter, and in what ways? Considering questions of methodology and epistemology is particularly powerful and urgent for questions of sexuality and gender precisely because these terms gather together categories of intense attachment, categories and forms of experience, desire, value, belonging,

infrastructure -- in other words, categories and forms of power -- produced through frames of race, citizenship, diaspora, disability, class, ethnicity, religion.

FGSS274 Self & Social Transformation
Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault's later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood's dawa movement from Egypt, Weight Watchers, and finally "ballroom" culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

FGSS275 Feeling Black Feminism
In this course we will explore the connected histories of the "felt life of black feminism" (Nash 2019) and Black feminist contributions to empowerment movements both inside and outside of the academy. Our class proceeds by reading some of the seminal texts that circulate as theory in US academic Black feminism alongside 20th and 21st century memoirs and poetry to explore how Black feminists articulate the relationship between their politics and the everyday psychic negotiations that comprise moments of rage, anxiety, melancholy, tenderness, joy, etc. This course engages in the study of collective minoritarian affect, feelings, and emotions as well as outlines their relationship to Black and/or women's liberation movements.

FGSS276 Black Performance Theory
What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

FGSS277 Feminist Philosophy and Moral Theory (FGSS Gateway)
This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

FGSS278 Magick and Her Practices, of Late
In this course we ask why paganism and Goddess worship have become "the fastest growing American religion," examining the tensions between science and society that so often provoke magic-infused social resistance movements. We explore the rise of Goddess worship in the Americas since the 1970s, considering its ties to ecofeminist, womanist, indigenous, and environmentalist movements. We examine the force of agency and its relation to ritual magic.

We then dive into the purported roots of several modern magic traditions, including Wicca, Dianic witchcraft, Feri traditions, and Haitian Vodou, among others, and ask how these cosmovisions define and/or transcend our gendered personhoods.

As we find our way back to a renewed understanding of modern paganisms, students will design individual or small group projects wherein they experience, ethnographically consider and/or perform extant manifestations of magic and ritual, bringing peoples lived experiences into conversation with course readings. This class is taught as a twice-weekly seminar designed around written assignments and engaged discussions, while inviting but not requiring students to engage in phenomenological experiences outside of class that may inform their written work. Students will produce ethnographic essays that are both analytical and personally reflective.

FGSS284 Displaying Clothes: Fashion in the Museum
What are clothes doing in the museum and why do they attract so much public attention? This course explores fashion exhibitions in history and the practice of fashion curation today, a key component of critical cultural analysis. Part curatorial workshop, part seminar, in this class students consider issues that influence professional curatorial practices through readings, discussions, and site visits. Topics include the origins of museums, museum architecture, the ethics and cultural impact of collecting and display practices, the role of dress and textile objects in art, history, and science museums, visitor experience research, and the challenges facing museums in the twenty-first century. As a group the students will work on an exhibition project, developing its organization and design, object selection and research, and accompanying texts and label writing.

FGSS285 Gender and Slavery in the Atlantic World
For most of the 20th century, historians of slavery in the Atlantic world overlooked the critical role of gender in shaping the marketplace, culture, and experience of the institution. Slaveholding and its attendant violence were presumed to be the domain of men. With a tragically limited archive, the popularity of slave narratives such as Frederick Douglass's "Narrative of the Life of Frederick Douglass, an American Slave" (1845) reveal how the voices and perspectives of men have dominated our understanding of the enslaved experience. Since the 1980s, the work of black feminist historians such as Deborah Gray White's, "Ar'n't I a Woman?: Female Slaves in the Plantation South" (1985) have unpacked the profoundly gendered nature of slavery in colonial America, the United States, and the Caribbean. This course embarks on an exploration of this important intervention. We will engage primary sources to illuminate the voices of enslaved women and debunk some of the historical myths of slavery and slaveholding. We will also visit classic and fresh secondary literature to understand the evolution of the field. Major themes include but are not limited to the Middle Passage experience, gendered violence, fertility, reproduction and motherhood, the Southern Belle archetype and slaveholding mistresses, notions of beauty and purity in black and white, and fugitivity.

FGSS286 Queer Activism and Radical Scholarship: Beyond Theory vs. Practice
This course explores the relationship between scholarship and activism, with a focus on intersectional radical queer scholarship and activism--queer left, black radical, trans, immigration, prison abolition, and sex work--in the United States. We will aim to connect the too-often bifurcated realms of academia and activism, theory and practice, research and action, so that we might think through the political stakes of knowledge-making in and outside the so-called "ivory tower," explore interdisciplinary methodologies we might use to study and learn from (and with) activists (including ethnography, oral history, and community archive), and gain insight into the histories and current realities of social justice movements, campus activisms, the work of a radical imagination, art and activism, and the impasse of the political present. To put their theory into practice, students will undertake a semester-long radical research project on a queer issue or activist organization--past or present--of their choice.

FGSS288 Gender and Sexuality in Chinese Narrative
This course pays particular attention to gender relations and representations of sexuality in Chinese narrative. This course will require close readings of translated Chinese novels, short stories and movies. We will explore themes and motifs such as gender roles in Confucianism, female chastity, same sex desire, cross-dressing, masculinity and femininity, manhood and misogyny, eroticism, the cult of qing (passion), the New Woman, socialist and post-socialist desires, and writing bodies in the era of globalization. In addition to providing a platform for appreciation of the aesthetic beauty of Chinese narrative, the course encourages students to think about how representations of gender and sexuality incorporate or confront the mainstream moral values and social principles in China. All readings are in English, no prior knowledge of Chinese language or culture is required. No text book requirement.

FGSS290 Too Much: Global Melodrama in Film
Often patronizingly dismissed as "women's weepies," this course will examine the proliferation and transformation of melodrama film within various national, subnational, postcolonial, queer, and global contexts. The course will focus on the specific language ad conventions of melodrama. We will watch a wide range of films from India, China, Japan, South Korea, Hong Kong, Hungary, Iran, Egypt, Kenya, Spain, Venezuela, Cuba, Argentina, and Mexico among various global film contexts. Importantly, this course will ask, what are the stakes and implications of "Global" in "Global Film Melodrama"? Moving away from an additive model that often present global film histories as an addendum to the "mainstream" cinemas, the focus will instead be on the emergence and significance of melodrama, and its specific idioms within transnational contexts. The course is open to all sophomores, including non-film minors and non-film majors at Wesleyan. No previous experience in Film is required.

Identical With: **SPAN294, LAST294**
Prereq: **None**

FGSS295 Queer Opera
Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

FGSS299 Constructing Black Interiors
An allusion to Elizabeth Alexander's noteworthy book of essays, this course will consider the way in which notions of the "interior" or "interiority" have been central to Black identity formation and Black cultural expression. We will begin by exploring the social and political reasons for this development and investigate the relationship between African American cultural production and the regulative force of race, gender, sexuality, class, and ability as systems of social organization. Making recourse to Black studies, theater and performance studies, affect theory, queer theory, geography, sociology, and their disciplinary intersections, we will attempt to engage the materiality of this spatial metaphor, encountering writers and artists who use text and image to construct interior space and do so in ways that challenge social structures and normative conceptions of identity.

Prereq: **None**

FGSS301 Black Speculative Fictions and the Anthropocene
The genre of black speculative fiction--in the form of literature, art, music, and theory--provides a generative framework through which to (re)think understandings of race, gender, sexuality, class, the body, disability, citizenship, and the human. Often couched as taking place in the "future," black speculative fictions also engage the past and critique the present. This makes the genre a critical resource for addressing the Anthropocene. The term "Anthropocene" first emerged from the discipline of geology in 2000. Scientists proposed that Earth had entered a new epoch (following the Holocene) in which "humans" had become geological forces, impacting the planet itself. However, the term Anthropocene raises numerous questions. What does it mean to think about the human at the level of a "species"? What constitutes evidence of the Anthropocene and when did it begin? Who is responsible for the Anthropocene's attendant catastrophes, which include earthquakes, altered ocean waters, and massive storms? Does the Anthropocene overemphasize the human and thus downplay other interspecies and human-nonhuman, animate-inanimate relations? Or does it demand a (potentially fruitful) reconceptualization of the human? Further, how does artificial intelligence complicate definitions of the human and, by extension, of the Anthropocene? Centering the work of black speculative thinkers and placing it in conversation with scientific studies ranging from marine biology and geology to cybernetics, this course takes an interdisciplinary approach to the Anthropocene that endeavors to (re)conceptualize the human, ecological relations, and Earth itself. Texts engaged will include: novels, art, music, theory, and scientific studies.

FGSS302 Critical Perspectives on the State
This course builds on Marxist, poststrucuturalist, feminist, anarchist, and cultural analyses to take a critical approach to the state--what it is and what it does. We will examine how the state is imagined by those who write about it and struggle against it. Where does the state begin? How do states act, and what are the consequences of these acts? How is rule consolidated and how are individuals and communities annexed to the project of rule? How do people

engage with state acts and ideologies? We will read texts drawn from a variety of disciplines, including anthropology, feminist theory, political theory, philosophy, sociology, and geography, that examine the nature, everyday workings, and effects of state power. Drawing upon ethnographic examples from around the world, we will analyze how states are cultural artifacts that produce and regulate people's identities and bodies, reproduce social inequalities, and engender resistances of all sorts. Some of the topics we will discuss include bureaucracy, governmentality, the security state, the prison industrial complex, terror and militarism, law and justice, citizenship, democracy, refugees, anti-state movements, the "man" in the state, and welfare and post-welfare politics.

Identical With: **ANTH302**
Prereq: **None**

FGSS303 Reproductive Politics and the Family in Africa
This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal and sexual health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, childhood health, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced health policy and political ideologies which, in turn, changed conceptions of motherhood, fatherhood, and the family.

Identical With: **HIST302, STS302**
Prereq: **None**

FGSS304 Pantheologies: Animal, Vegetable, Mineral, World
Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

FGSS305 Techniques of the Liar: Performance, Artifice, Fraud
This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

FGSS306 Black Feminist and Trans Theories of the Hu/Man
This seminar provides an introduction to Black feminist and trans theories' interventions into the modern Western category of the human and its violent exclusions. Since their inception, Black feminist and trans theories have brought attention to the violence of what Sylvia Wynter has called our "genres of the human," and in so doing, have laid bare the very preoccupations of power that condemn the non-white, non-cisgender being to sub-Human status and death in the material and discursive economies of racial capitalism. Students will develop broad knowledge of Black feminist and trans theories' provocations regarding the intersecting identity categories that organize our world, and will be encouraged to develop their own critical approaches that are attentive to the hegemony of racialized gender and its attendant violences.

FGSS307 Mobilizing Dance: Cinema, the Body, and Culture in South Asia
This course focuses on questions of "mobility"--cultural, social, and political--as embodied in two major cultural forms of South Asia, namely "classical" dance and cinema. Using Tamil cinema and Bharatanatyam dance as case studies, the course focuses on issues of colonialism and history, class, sexuality and morality, and globalization. The course places the notion of "flows of culture" at its center and examines historical, social, and aesthetic shifts in these art forms over the past 150 years.

The course is both studio- and lecture-based. It includes learning rudimentary Bharatanatyam technique, watching and analyzing film dance sequences, and participating in guest master classes in ancillary forms such as Bollywood dance and Kathak (North Indian classical dance). The studio portion of this course is for beginners, and no previous dance experience is necessary.

FGSS309 Christianity and Sexuality
This course will explore a range of Christian teachings on, attitudes toward, and technologies of sex and sexuality. We will read medieval and modern theologies of sexuality, as well as contemporary historical, sociological, and cultural studies. Points of focus will include confession, mysticism, marriage, celibacy, queer and trans practices and identities, and reproductive justice.

FGSS310 The Senses and the Subject in Cinema and Poetry
In this course, we will study a mixture of emotionally stimulating and structurally difficult contemporary cinema and lyric poetry, as well as select philosophical and theoretical approaches to the senses and the subject. Do theories and notions of the senses assume the subject, and/or subjectivity? If so, then how? What is the relationship between embodiment, the senses, the world, racialization, blackness, and being? How do select Western theoretical, aesthetic, and poetic frameworks represent and think as such? While cinema and lyric poetry might seem like strange neighbors, this course specifically foregrounds them as "repositor[ies] of synesthesia," where not only the reconstitution of the subject after some disturbance (i.e., sensorial, physiological, social, historical, etc.) will be relevant to how we read, but also when that either does not happen or constitutively cannot happen. (Note that some short fiction may also be part of the course readings.)

FGSS311 Abolitionist University Studies
This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

FGSS312 Women's Political and Sexual Revolutions--Middle East and South Asia
This course examines the role of politically organized women's movements, individual pioneers, hashtag and virtual campaigns, and the activism of grassroots and working-class movements in 20th-century Middle Eastern and South Asian contexts, with a focus on their political and sexual struggles, demands, and achievements.

The course is divided into two parts; it introduces a brief history of the nature and dynamics of women's movements in the MENA and SA regions. The second half of the course focuses on feminist documentation and debates around Muslim women's piety, sexuality, and political representation in a broader interdisciplinary frame. The course will examine how religious sensibility intersects with sexual orientation, gender identity, violence, sex work, the military, and even fashion. It will study these intersections as reflected in Muslim women's writings, desires, activism, and demands for sexual freedoms or against sex crimes, in different countries and under different legal regimes and geographies.

FGSS313 The Black Charismatic
In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called "charismatic") black political leadership by attending to Tavis Smiley's yearly "State of the Black Union" address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley's annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley's yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

FGSS315 Entertaining Social Change
"Our problem," Tom Frank writes, "is that we have a fixed idea of what power is, of how power works, and of how power is to be resisted." This is especially true of "entertainment." Power that may not seem like power -- only, say, like "fun" or "amusement" -- can be especially powerful. A thread that connects all

of our texts will be: how has the systemic critique of social contradictions been popularized as compelling and fascinating in modern times? A related concern: what are the seductions and violence built into "enjoyment" -- "enjoyment" that reproduces "Americans"? We will "entertain" the diverse strategies that progressive moviemakers have developed to entertain Americans -- to teach, persuade, seduce, provoke, upset, anger, and move them through laughter, tears, and, not least of all, ideas -- so that Americans will be more inclined to "entertain" social critique that inspires and envisions social change. Our critical focus will be on the popularizing (and sometimes the selling) of social critique in movies including Straight Outta Compton, Malcolm X, Medium Cool, Network, El Norte, Smoke Signals, Before the Flood, The Black Panthers: Vanguard of the Revolution, Salt of the Earth, Matewan, and The Big Short. We will place special emphasis on self-reflexive movies about "entertainment" and about labor/social movement organizing. Entertainment, we will see, plays a key role in organizing and reorganizing Americans. In doing so, it can place limits on our vision of what -- and who -- needs to be changed. By putting our movies in conceptual dialogue and making these limits more visible, we will help one another think, see, and feel beyond these limits. As we are "entertained" (and we will be) we will consider the stakes of being "entertained."

FGSS316 Decoloniality, Feminism, and Human Rights
Is decolonialism only about flag-burning, taking a knee, and bringing down statues of colonial figures? The course will study anticolonial critiques and theories about historic and current settler colonialism and connect these with the prevailing racial, gendered, and economic imperial order. Key classic texts will be studied about how former imperial powers continue to neocolonize the world through tax havens, as well as by leveraging the concept of human rights and often at the expense of gender rights. Specific case studies will be examined to illustrate the range of activism and global creative protests that widen the paths to a decolonized feminist future.

Gen Ed Area: **SBS-FGSS**
Prereq: **None**

FGSS317 Sexuality, Gender, and Science
This course will consider how the concepts of gender and sexuality have been treated in scientific fields, focusing primarily on the 19th and 20th centuries. We will examine the history of ideas about gender and sexuality as reflected in the development of sexology, theories of homosexuality, psychology, and endocrinology. We will also discuss contraceptive and reproductive technologies, the inclusion of women in clinical trials, women in scientific professions, and recent studies that use algorithmic predictions of sex or sexual orientation. Readings may include selections from Sigmund Freud, Siobhan Somerville, Emily Martin, Sarah Igo, Laura Briggs, Ronald Bayer, Sandra Morgen, David Serlin, Allan Bérubé, Dorothy Roberts, Johanna Schoen, Jennifer Terry, Carolyn Herbst Lewis, Steven Epstein, Riley Snorton, Rebecca Jordan-Young, Mar Hicks, and Safiya Noble.

FGSS319 Enemies of the State: Gender, Race, and the Nation
This course analyzes how gender and race function as boundaries for defining national belonging in contemporary political life. Students examine the construction of borders -- both literal and figurative -- that determine who counts as part of "the nation" and who is cast as a threat to it. Studying both right-wing movements and liberal opposition, their strategies and their failures, the course addresses anti-trans politics, migration and border enforcement, reproductive governance, and the reconfiguration of gender and racial hierarchies. Focusing primarily but not exclusively on the contemporary U.S., the course considers authoritarian and populist formations, liberal responses, and practices of refusal and resistance.

Prereq: **None**

FGSS321 BioFeminisms: Science, Matter, and Agency
This course rethinks feminism's relationship to nature, the body, and biological matter in light of new considerations of ontology in science studies, cultural studies, and feminist thought. We will read contemporary treatments of science, of Darwin and evolutionary theory, of neurobiology and epigenetics, and other fields and disciplines that consider biological matter, and think about them in feminist and queer frameworks. Readings will include "new materialists" alongside other works on the "new biology" and the "new sciences," and we will also revisit some second- and third-wave feminism. The course raises issues that challenge traditional boundaries of the body and self, conventional ideas of agency, and dualisms of mind/body. Readings include works by Donna Haraway, Anne Fausto-Sterling, Elizabeth Grosz, Karen Barad, Vicki Kirby, and Elizabeth Wilson, among others.

FGSS322 Decolonizing Gender and Sexuality
This course seeks to examine ways in which the history and ongoing presence of coloniality (including the deeply embedded forms of racial domination which coloniality generates) have shaped and been shaped by structures of gender and sexuality. The class will examine ways in which gender and sexuality have been mobilized historically and are mobilized today in ways that support imperial projects, even when presenting themselves in the guise of "protecting human rights," humanitarianism, or feminist/LGBT projects. In addition to linking together what Chandra Mohanty has described as the "One Third" and "Two Thirds" worlds, this discussion-based seminar seeks to reconnect the disparately gendered intimate and global spheres, situating the feminized "private" domains of love, sex, and caring within and around fields of action such as geopolitics and global political economy. Decolonial thinkers challenging Eurocentric framings will receive particular attention within the course.

Prereq: **None**

FGSS323 Staging Blackness: African American Theater
This course surveys the dynamism and scope of African American dramatic and performance traditions. We begin with a deep historical examination of 19th century blackface minstrelsy that then progresses into a long-view of how black American dramatists and theater-makers have self-fashioned black dramatic narratives, black aesthetics, and black representations into the twenty-first century. In all cases, we are interested in surveying the ways in which these

artists work within varying modes of dramatic expression and focus their plays and performances on such topics as class, ethnicity, era, fragmentation, gender, history, region, revolution, nationality, race, sexuality, and spectatorship.

FGSS324 Interpreting the "New World": France and the Early Modern Americas
The impact and long-lasting effects of the "discovery" of the "New World" on Europeans cannot be overestimated. This advanced seminar will compare and contrast styles of expedition and conquest among the European nations, though the course will focus on the French context and the various events and encounters that occurred in the early modern Americas, particularly between 1492 and 1610, a period that laid the groundwork for the subsequent colonial project. Throughout the course, we will pay special attention to the Amerindians' points of view. In turn, students will examine the insights and blind spots in 16th-century French navigators', cosmographers', cartographers', and intellectuals' interpretations, representations, and negotiations of difference by critically engaging with concepts such as nature, culture, alterity, gender, sexuality, marriage, religion, exchange, possession, conquest, and war. Reading, writing, and class discussions will be in French.

FGSS326 Using Drugs: Race, Drugs, and the Colonial Present
This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not. Ultimately, drug use is often framed as an issue of "lost productivity" and/or "lost reproductivity," with "rehabilitation" framed as a way of restoring productive activity and eugenic reproduction.

FGSS327 Litanies for Survival, Plots for Revolution
This seminar centers black-feminist and queer-of-color theory, literature, and art from the 1970s to the present in order to interrogate and reimagine revolution and revolutionary praxes. We will examine the interrelatedness of art and activism, hope and despair, collaboration and erotics. Key questions include: How does "survival" put pressure on "revolution," and vice versa, particularly in light of contemporary and imminent catastrophes, local and planetary? How does a joint consideration of survival and revolution affect interpretations of the past, understandings of the present, and imaginings of the future? What political work might intellectual and creative labor perform? Is revolution an event, a practice, or both? A useful term or a ruse?

This seminar is offered in conjunction with the Center for the Humanities' Fall 2018-Spring 2019 theme, "Revolutions: Material Forms, Mobile Futures." Assigned readings will include the work of scholars participating in the Center's Monday night lecture series, and students will be required to attend several lectures over the course of the semester.

FGSS329 Waiting: Bodies, Time, Necropolitics
This interdisciplinary course draws from social theory, gender studies, medical anthropology, disability studies and science studies to address the social stratification of time in corporeal terms. Many theorists have described the 21st century as marked by acceleration; this course addresses its counterpoint: the slow, interminable wait, the being made-to-wait, and the socially structured scenes and experiences of waiting. How can we understanding waiting in the city emergency room for the mentally ill immigrant? What is it in the gender transition clinic? The polluted, toxic neighborhood? The refugee camp? We will begin by surveying multiple frameworks through which we can theorize time and its suspension. We will then focus on experiences of waiting in intersectional terms, that is, in relation to gender and sexuality, race, class, and dis/ability. We will explore how practices that produce life, health, and well-being (biopolitics) can also be necropolitical, when attention, care, or action is given to some, but prolonged or suspended for others. Readings will include works on necropolitical theory (Georigo Agamben, Achille Mbembe), medical and state subordination and abandonment (Javier Auyero, Joao Biehl), and queer and crip time (Lee Edleman, Elizabeth Freeman, Alison Kafer). We will explore a wide range of experiences of waiting, from those related to cancer diagnosis (Sarah Jain), gender assignment surgery (Alexandre Baril), to environmental toxicity (Michelle Murphy) and asylum seeking (Jennifer Bagelman).

FGSS331 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

FGSS333 About Clothes: Styles, Histories, Activisms, Poetics
What kinds of work go into the making and wearing of clothes, and what kinds of work do clothes do? This course is a chance to think together about how a range scholars, journalists, curators, and others have written about, handled, studied, preserved, and displayed clothing. At the same time, we will pay close attention to what it means for you to live in relation with your clothes. In conversation with works of literature, historical and curatorial scholarship, visual art, reporting, activism, and more, we will investigate clothes as objects of imagination and resistance, as well as elements of material culture. As we think about the global circuits that have informed various fashion systems, we will consider how particular textiles and textures, cuts of cloth, and racialized, gendered, and sexualized ideas of style emerged in conjunction with particular forms of labor -- and will also note how sustained attention to this multi-billion-dollar business has been devalued historically. Over the semester, you will conduct your own writing experiments at the intersections of language, image, identities, and the materiality-ephemerality of clothing.

FGSS334 Gender and Sexuality in Japanese History Across the Premodern/ Modern Divide
This seminar explores both changes and continuities in Japanese conceptualizations of gender and sexuality between premodern and modern times. Structured around the notion that modernization produced a paradigmatic shift in Japanese life and thought, the course will examine gender and sexuality as both discourse and practice, considering how Japanese people described, experienced, and shaped gender roles and sexual life in their daily existences. We will investigate the dominant gender system and understandings of gender and sexuality operating in Japan before and during the Edo period (1600-1868), then consider the influence of Western views and concepts like the male/female and heterosexual/homosexual binaries on Japanese society and culture from the Meiji period (1868-1912) through postwar times. Other topics include gendered differences in education, gender performance in kabuki, female and male prostitution, the "gender crisis" of the Japanese modern girl, the salaryman and professional housewife archetypes, and postwar gay masculinities.

FGSS335 The Work of Art Against Work: Art, Labor, Politics
Understandings of late 19th- and early 20th-century avant-gardes are tied inextricably to leftist theory, particularly that of the Frankfurt School. This advanced seminar will consider the legacies of that entwinement, while focusing more specifically on its transformations from the late 20th century to the present: We will examine how artists have engaged the "work" of art in relation to the rise of post-Fordism, a globalized economy, and new theories of work and anti-capitalism. We will pay special attention to gendered notions of work and the division of labor (including "craft," affective labor, domestic work, care work, sex work, and more), to debt and racial capitalism, and to the rise of speculative finance and its links to the art market and the patron class.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-CHUM**

Prereq: **None**

FGSS339 Masculinities
This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.
Offering: **Crosslisting**

Identical With: **PSYC338**
Prereq: **PSYC105 OR [FGSS209 or ENGL208]**

FGSS341 Contemporary Trans Literatures
This course will explore the creative and critical output of trans and gender non-conforming writers, paying special attention to poetry, narrative fiction, and memoir. What literary traditions do trans and gender non-conforming writers draw from to establish our own inhabitations of style and form? How do trans and gender non-conforming writers attend to the erotic dimensions of writing? How do trans literatures address the relation between race, gender and sexuality? What can transness illuminate about the relation between literature and the law? What are the ethical stakes of trans literature? In addition to a deep engagement with the racial politics of transness in the United States, we will make an equal effort to consider perspectives from the global south in our pursuit of answers to these questions.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-FGSS**
Prereq: **None**

FGSS342 Queer Robotics: Cyborgs in Science Fiction & Anthropology
What do representations of robots and cyborgs in popular film, sci-fi literature, and cultural anthropology tell us about gender, sexuality, race, and what it means to be "human"? In this class we will use critical race studies, queer and feminist theory, disability studies, and science and technology studies (STS) to analyze representations of "cyborg" bodies in speculative fiction and ethnography. Our case examples explore the politics of the body through narratives of military research, artificial intelligence, sex work, urbanism and segregation, biotech research, prosthetics and athleticism, new reproductive technologies, and more. We will engage with poetry, film, visual art, and speculative fiction to explore how bodies are dreamed, crafted, and represented.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-SISP**
Identical With: **STS342**
Prereq: **None**

FGSS343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture
This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling. Topics examined will include: reproductive surrogacy; gender reassignment

surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of "universality" and "particularity," where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimaging.

FGSS344 Gender Economics
Gender Economics (200-level) explores gender issues from an economic perspective within diverse societies. This course investigates theoretical frameworks and empirical analyses to examine the changes in labor force participation, the gender gap in pay, workplace discrimination, social norms, household decision-making, and human capital. Through a multidisciplinary approach drawing from economics, sociology, and feminist theory, students critically assess topics such as the gender wage gap, occupational segregation, caregiving responsibilities, and the impact of policy interventions on gender equality. By engaging with contemporary research and real-world case studies, students will develop a nuanced understanding of the intersections between gender, economics, and social justice, preparing them to navigate complex issues in both academic and professional spheres.

FGSS345 Women's Lib, Women's Lit
The social movement known as second-wave feminism, but often referred to at the time as "Women's Lib," took center stage in much of the best-selling fiction of the 1970s. This course will look at popular fiction that concerned itself with women's issues and the way it popularized, memorialized, complicated, and contested feminism in the popular imagination. We will look at a range of novels that focused attention on the nature of and possible solutions to women's political, material, and sexual subjection by men. Although our focus will be on the 1970s, we will look at both some important pretexts, and some later responses to the ongoing crises of gendered inequality in the 1980s. We will pay particular attention the gendering of publishing and reception, exploring the contexts in which these books were produced, marketed, reviewed, and read.

Prereq: **None**

FGSS346 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

FGSS347 Melodrama and the Woman's Picture
Within film history and criticism, the usage of the term "melodrama" has changed over time, as has the presumed audience for the genre. This course will investigate the various ways in which melodrama and the woman's picture have been understood in the United States and around the world, beginning in the silent period; ranging through the 1930s, '40s, and '50s; and culminating in contemporary cinema. We will pay particular attention to issues of narrative construction and visual style as they illuminate or complicate various analytical approaches to melodrama and speak to gender, sexuality, race, and class. Screenings include films directed by D. W. Griffith, Evgenii Bauer, Oscar Micheaux, John Stahl, Frank Borzage, Naruse Mikio, King Vidor, Wu Yonggong, Douglas Sirk, Vincente Minnelli, Max Ophuls, Mizoguchi Kenji, Kim Ki-young, Rainer Werner Fassbinder, Pedro Almodovar, Ann Hui, Lars von Trier, Farah Khan, and Luca Guadagnino, among others.

Prereq: **ENGL201**

FGSS351 Queer of Color Critique
This course will examine and interrogate the field of queer studies with particular focus on the ways in which queer scholarship and queer political movements function alongside critical race theory, ethnic studies, and sociopolitical antiracist efforts. Students will be asked to consider the history of queer studies and queer politics, the contemporary state of queer movements, and future visions of queer life. We will take an interdisciplinary approach, and we will rely upon a diverse range of theoretical, historical, and cultural studies texts. We will explore the normative parameters of both sexual and racial identities, probing the terms of identification to consider their meaning in the contemporary moment and in relationship to various cultural, social, legal, and political milieus. Throughout the course we will consider, What does it mean to study queerness and to study race? How do institutions--religious, legal, and scientific--shape our understandings of both queer and racial identities? In what ways do sexuality and race interact, and how does this interaction inform the meanings of each of these identity categories? Furthermore, how have queer movement and scholarship both supported antiracist efforts and, also, how have they been complicit in cultural and institutional forms of racial oppression? How do other social categories of identification such as gender, ethnicity, and class, shape the ways in which we understand expressions of race and queerness?

FGSS352 Black Thought and Critical Theory
This course follows Stuart Hall's insistence in "What is this 'Black' in Black Popular Culture?" that the theoretical articulations of "blackness" are always "conjunctural." We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of "blackness" at specific historical and theoretical conjunctions. How is "blackness" useful for social theory? Must we assume there is a transhistorical identity to "blackness"? In what ways does "blackness" conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

FGSS353 Destroying the Audience: Limits of Performance and Representation in the Theater of (Non) Being
Young Jean Lee's Theatre Company, active between 2003 and 2016, is most known for a series of "racial-identity plays," written and directed by Lee, which adopt an experimental approach to the critique of racial politics, driven by the motto "destroy the audience." On the one hand, this course will explore literary and artistic works that express an ambivalent, if not antagonistic, relationship to the presence of an audience. On the other hand, this course will consider the role and function of the audience as a social category by considering how the concept of audience (broadly understood) contributes to cultural production about race and gender as a potentially active element in the creative process. Students can expect to read and/or view drama, visual art, performance, film, and self-writing (autobiography and memoir) which, explicitly or implicitly, address the presence of the audience as a way of tackling larger social and cultural problems related to race and ethnicity. The goal will be to foster an understanding of the politics of gender, sexuality, ability, language, and class that determine how these issues are conceptualized and articulated. This course will employ an interdisciplinary approach to the discussion of primary and secondary texts, engaging audience studies, performance studies, ethnic studies, and disability studies, in addition to queer/trans of color, postcolonial, and legal theory, to historically contextualize and theoretically ground a cultural understanding of the relation between audience and racial performance.

FGSS354 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments
This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Truillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

FGSS355 Social Movements Lab
What can we learn from social justice activists about the economic, political, and environmental struggles facing us today, including mass incarceration, immigration, economic precarity, and the violence of the state? Where are the critical sites of queer, trans, left, feminist, black, indigenous, disability, and environmental struggle? How do these movements converge, and where do they diverge? This participatory, interdisciplinary research seminar enables you to embark on an independent, semester-long research project on the social movement or activism of your choice. We'll start with some foundational reading on multidisciplinary social movement research; archival, ethnographic, and participatory methodologies; and histories of social justice struggles in the U.S.

The remainder and majority of the seminar is laboratory style, taking shape around your particular projects. Each week, we will collaboratively analyze one or two projects, mapping out and comparing methods, goals, visions, struggles, and contexts of the movements under study. Our goal is to understand a range of social justice activisms in their economic, political, and historical context, with an eye toward integrating activist scholarship and social change. The activism you research can be contemporary or historical; local, national, or global; and can take any shape: direct action, community organizing, activist philanthropy, art as activism, etc. You do not need previous experience or activist contacts for this course--just passion and the desire to learn collaboratively!

FGSS357 Sex and Gender: From Synapse to Society
From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.

FGSS360 Special Topics: Writing Lives
In this course, students will read profiles, biographies, and theories of biography, texts that focus on the stakes of writing the lives of women, people of color, people with disabilities, and queer subjects. As we analyze these attempts to capture a life, to define the problems of this form, and to expand its possibilities, students will work on their own biographical writing. Throughout the semester, we will ask: Whose lives get written, and by whom? What constitutes evidence of a life, according to whom--and what gets left out? What kinds of research are necessary? How does a writer's relationship to her subject inform such a portrait, and what are the ethics of that relationship?

Prereq: **None**

FGSS361 Queer & Trans Erotic Archives
Is it possible to capture and archive ephemeral, flickering pleasures? This course addresses this question by problematizing the relationship between embodied pleasures and affective memories on the one hand and historical analyses on the other. Based on Derrida's critique of archives' selective preservation mechanisms and reification of normative narratives, queer studies scholars have tried to create their own "counter-archives," often by means of an alternative reading of conventional archives. First, participants will discuss the ethics of reenactments and appropriations of archived desires, analyzing specific case studies that will be an entry point into broader issues related to the scholar's involvement in the voyeurism of the archive. Second, participants will discuss how a focus on queer cultures leads to a rethinking of what constitutes archival material, expanding this definition to include erotica and porn, feelings, ephemera, performances, and mass media. Course readings will also reveal the artificiality of the established boundaries between high and low culture, between authoritative knowledge and experiments with bodily pleasures. The course interrogates pornography's potential as a historical source that reveals non-normative fantasies. Participants will discuss the relationship between sexual fantasy and social reality, between representations of idealized boundless pleasure, and historical contexts of stigmatization, pathologization, and institutional violence. This will lead to debates on archival sexual activism and minoritized bodies in the archive, in order to fully grasp the contraposition between over-determination and queer utopianism.

FGSS363 Body Politics: Desire, Sexualities, and Gender, Past and Present
Sexuality as a category to define, construct, and control the "self" has been seen as a product of the 18th and 19th century. This course turns to ancient Greek society to look at body politics before sexuality and to examine the different ways in which sex and gender are experienced and constructed.

We will approach sex and gender roles as organizing principles of private and public life. Using literary, scientific, historical, legal, and philosophical sources as well as material evidence, we will address issues including the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution, adultery); and ideas regarding desire, self-control, masculinity and femininity, and their cultivation in social and political contexts. How ancient approaches to gender and sexuality are in dialogue or have informed recent debates will be a question throughout the course by looking at theoretical approaches and contemporary movements and debates. We will end by looking at how ideas about sexuality in classical antiquity were used in Romer v. Evans, otherwise known as the 1993 Colorado Gay Rights Case.

For CLST Major requirements, this course counts toward the concentrations of Literature and Performance and History, Politics, and Social Justice.

FGSS366 Queering the Dancing Body: Critical Perspectives on LGBTQ Representation
This course focuses on questions of "queering" dance as a historical, cultural, social, and political enterprise. Focusing on both historical and postmodern dance contexts, the course explores key issues around gender and identity, with special reference to the concepts of performativity, impersonation, sexuality, and transformation. The course places the notion of "flows of gender and transformation" at its center, and examines historical, social, and aesthetic

shifts in these ideas over the past 50 years. It draws on case studies ranging from female/male dance traditions of impersonation in India, China, Japan, and Indonesia, to postmodern shifts of "classical" dance (such as the all-male cast of Matthew Bourne's "Swan Lake") and more popular forms such as voguing and "RuPaul's Drag Race."

FGSS369 The Politics of Accessibility: Disability and Intersectional Feminism
This course will examine the social, historical, and political factors that have mediated the visibility of disabled people, as well as the legibility of disability as a marker of identity. As part of global discourses on human rights, disability activism has been a source of significant political change, intimately tied to struggles for the civil rights of racialized, gendered, and working class populations; at the same time, disability activists have pushed for a deeper critique of the assumptions and biases that condition and restrict access to political participation and social/cultural engagement. In order to unpack these connections, we will develop an interdisciplinary and intersectional academic practice, exploring a multitude of activist, artistic, and critical interventions in popular media, social media, documentary film, creative writing, and academic scholarship that have attempted to shift and transform cultural understandings of disability.

FGSS371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

FGSS374 Abolition and Social Praxis
This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

FGSS379 Gendered Belonging and the Politics of Inclusion
If inclusion and belonging are tied to recognition, how do marginalized subjects establish their legibility and "right to appear"? This course addresses social exclusions around gender nonconformity and examines legal, activist, and artistic practices that contest them. Using several contemporary case studies, including fights over the sex segregation of bathrooms, controversies over the diagnosis and treatment of trans* youth, and the movements defending the lives of trans* women of color and advocating for trans* people in immigrant detention, the course will address how U.S.-based social contests over sex/gender are implicated in hierarchies of race, citizenship, and dis/ability, and situated in (neo)colonialism, racial capitalism, and geopolitics in complex ways.

FGSS381 Afro-pessimism, Gender, and Performance
This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe's colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to "inanimate" things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer's body's disappearance/remains endow the Western art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars', artists', and activists' response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibits, and film screenings.

FGSS385 Race, Capital, and Sexual Consent
Race, Capital, and Sexual Consent will focus on the early 19th century through to the Progressive Era. It will explore racialized sexual markets, from what Black feminist historian Adrienne Davis has called "The Sexual Economy of American Slavery," to the Victorian-era marriage market, to continuing and emerging sex work and pleasure economies. This course will focus on areas of overlap, tension, and reinforcement within and between these racialized sexual markets. Fundamental to this class will be the question of if/how sexual consent is configured within these markets, and what this means in the broader evolution of American liberalism in the 19th- and early 20th-century U.S.
Offering: **Crosslisting**
Grading: **OPT**

FGSS386 Women and Politics
In this course we will study a variety of topics related to the theme of women and politics: women's political participation, the gender gap, women in political parties, female leadership, and women's issues. Because women's political engagement is affected by their position in society and in the economy, we will also study topics such as inequality, power, discrimination, and labor force participation. Although we will consider these issues in the U.S., our approach will be strongly cross-national.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**

Identical With: **GOVT385**
Prereq: **None**

FGSS387 Feminist Dispute Resolution
Is feminist negotiation possible? What would egalitarian alternative dispute resolution (ADR) entail? In the first part of this course, we will study and practice traditional dispute resolution techniques. Each student will participate in two-person and multiparty mediations, arbitrations, and quasi-judicial presentations. In the second part of the course, we will study and practice feminist dispute resolution techniques, including "invitational rhetoric." Students will then draw upon the course readings and in-class negotiation exercises to answer questions such as: Should we match dispute resolution strategies to parties' personalities or desired outcomes? Whose conception of fairness and social good should guide our negotiation practices? Are dispute resolution techniques gendered? By the end of the course, students will be more confident negotiators. They will also be able to discuss, debate, and recommend strategies for resolving conflicts and contributing to social justice. Students will be assessed based upon: their preparation for negotiations; their participation in negotiations; their performance on a written mid-term examination; and their performance on a final oral examination addressing the question: "Is feminist negotiation possible?"
Offering: **Host**

FGSS390 Politics and Society in Japanese Women's Writing
How have some of modern Japan's most celebrated and insightful authors responded to key events and social conditions in contemporary Japan? What sorts of perspectives have these authors brought to issues of industrial pollution, or to youth crime and social change under capitalism, or to ongoing crises in Okinawa and Fukushima? This course seeks to hear the voices of these authors--and the social actors with whom they engage--by grappling with key modern Japanese literary texts in English translation.

FGSS392 Black Grief Geographies
This course introduces students to literature and practices centered on post-slavery and post-colonial bereavement. Employing an interdisciplinary framework of Black Geography, Feminist geography, and post-colonial thought, students will examine the spatial orientations of Black grief and mourning. Here students will also evaluate the connections and frictions between queries on emotional geographies and Black grief. What are the affective and material forces of Black grief and mourning, and do they vary by place? How can we read Black grief and mourning beyond narratives of dispossession? What are the human and non-human assemblages that constitute Black grief and mourning? Is it possible to repair infrastructures that mark Black death? This course invites students to meditate on the above questions as well as to apply Black framings on grief to their own research by developing a 15-page visual essay or a 30-minute in-class lecture that draws on any of these questions.
Offering: **Crosslisting**

FGSS393 The Politics of Authenticity
Is there such a thing as an authentic self? If so, can politics help us realize it? Fifty years ago, authenticity was a thriving political ideal, invoked by radical feminists, black liberation movements, gay and lesbian activists, Marxists and conservatives alike. Over the past four decades, however, political appeals to authenticity have come under heavy scrutiny. Some claim that appeals to authenticity inadvertently marginalized individuals who are not "true women," "real blacks," or "actual natives." Others argue that the idea of an authentic culture can be deployed to constrain individual members of cultural minorities. Where does authenticity reside--in gender, sexuality, experience, or culture--and how do we know which one is "real"? Is it worth faulting politicians for hypocrisy if there is no such thing as a "true self"? What becomes of certain emancipatory or justice claims--such as those coming from trans-politics or multiculturalism debates--without a notion of authenticity? In this course, we will discuss what authenticity is or might be, how it has been conceptualized in political theory and contemporary social movements, and why it has become an object of widespread suspicion and continuing appeal.

FGSS395 Afterparty: End Times, Pleasure, and Clean Up
What do we do in end times, or "after the party" as Joshua Chambers Letson would have it? Already exhausted, with streamers and confetti scattered on the ground, what happens after the party is over? How do we pick up the pieces and move on? Can narratives of perpetual end times create new beginnings and new horizons? Beginning at the end, this course will engage conversations in science fiction, Black studies, art and performance, Indigenous studies, queer of color critique, and environmental justice to explore the work of endings and beginnings, of hope and hopelessness, of destruction and desire. We will pay particular attention to questions of futurity and pleasure as they are manifest in the aesthetic. Writers and artists to be discussed will include N.K. Jemisin, Sylvia Winter, Ursula Le Guin, Katherine McKittrick, Ohan Breiding, Franny Choi, Saeed Jones, Calvin Warren, Joshua Chambers Letson, Dana Luciano, David Wojnarowicz, adrienne maree brown, Autumn Brown, José Esteban Muñoz, Nick Estes, Dionne Brand, Samuel Delany, Tourmaline, Allison Akootchook Warden (AKU MATU), Jordan Peele, and M.E. O'Brien & Eman Abdelhadi. Students will be invited to craft both creative and theoretical responses to class assignments.

FGSS397 Difficult Women: Post/Feminism in Television Comedies and Dramedies
Although postwar family sitcoms represented women as homemakers, one of the first and most popular sitcom wives also articulated discontent with domestic femininity. Lucy Ricardo became the prototype of the "unruly woman," a figure with feminist potential whose desires exceed and disrupt dominant gender norms. As those norms have shifted, so have TV's unruly women. Second-wave feminism, anticipated in I Love Lucy, was incorporated into a 1970s cycle of comedies centered on single working women whose career aspirations were rewarded. Over the following decades, a postfeminist sensibility dominated television comedies and dramas and became central to a gendered neoliberalism in which energetic individuals "empower" themselves. In recent years, a new type of female protagonist has emerged. Alongside the can-do optimism of single-women comedies from The Mary Tyler Moore Show to Sex and the City to 30 Rock and Parks and Rec, a stream of comedies and dramedies, made largely by and for women, have depicted a variety of flawed, difficult, unruly women coming of age under conditions of socioeconomic precarity, whose less focused energies seem to articulate a more uncertain, downbeat, post-recessional mood. In this course we will situate the latter cycle in relation to both the longer history of televisual representations of women and to the current state of feminist politics. Among the shows we will look at are: I Love Lucy, Bewitched, The Mary Tyler Moore Show, Sex and the City, Ally McBeal, Girlfriends, The Mindy Project, 30 Rock, Parks and Rec, Girls, Insecure, Broad City, Better Things, Two Broke Girls, New Girl, Crazy Ex-Girlfriend, Jane the Virgin, Unreal, Abbott Elementary, Fleabag, Dear White People, and Somebody Somewhere.

FGSS405 Senior Seminar
This course is a required seminar for senior FGSS majors. Structured as a workshop, the goal of this course is to develop a collaborative intellectual environment for majors to work through the theoretical, methodological, and practical concerns connected with their individual projects. Seminar topics to be examined will be based on students' research projects, and participants are expected to engage critically, yet generously, with the projects of their peers. We begin by addressing feminist methodologies, including questions of praxis, representation, and theory. Participants are expected to lead discussions on readings relating to their own projects, submit written work on their senior research in stages (project proposal, annotated bibliography, drafts), and do class presentations.

FGSS444 Race and Reproduction
This interdisciplinary course explores the intimacy of race and reproduction against the backdrop of capitalist modernity. We scrutinize the policies, priorities, and perversions of slave owners, the racially differentiated family

planning programs under apartheid, the eugenicist movements and the criminalization of poverty in the United States to interrogate what is generated by the incapacitation of blackness across scales of time and space. We examine the Marxist feminist elaboration of the concept of social reproduction and then consider black feminist rejoinders that center the reproductive labor of black women -- as slaves, as domestic workers -- that implicate violence and ownership in the mediation of biological and social reproduction as a set of racializing practices in which value is generated, accumulated, and expropriated. Finally, the course considers the proliferation of assisted reproductive technology (ART) in the 20th century, the recourse to surrogacy, and family abolition to interrogate the extent to which the "race-reproduction bind" is disaggregated or reanimated in the present.

FRIES CENTER FOR GLOBAL STUDIES

MISSION

The Fries Center for Global Studies is committed to helping all members of the Wesleyan community achieve the knowledge, language skills, and sensitivity each person will need in order to exercise effective and responsible citizenship in an increasingly interdependent world.

VISION

Our emphasis on intercultural communication, experience, and knowledge reflects the value we place on adaptability, compassion, and cultural self-awareness with respect to the world beyond our borders. These qualities and practices put Wesleyan's liberal arts program at the forefront of global education and are the hallmark of responsible global citizenship.

GOALS & STRATEGIES

The Fries Center for Global Studies pursues it goals by drawing on resources at hand: the Wesleyan curriculum, faculty, student body, and staff; the Office of Study Abroad; Fellowships; Language and Intercultural Learning; and Language Resources and Technology. Our strategies are designed specifically to:

- Identify and expand opportunities for students and faculty wishing to pursue a global perspective in the field of their choice;
- Offer the support needed for each department, program, center, and college to develop global perspectives in accordance with its own aims and in partnership with other academic units;
- Provide a forum for inquiry and debate concerning the pedagogies and administrative strategies best suited to the cultural demands of the contemporary world;
- Help students transcend disciplines while coordinating their curricular, cocurricular, and extracurricular experiences in accordance with the demands of a global education;
- Increase the mobility of the Wesleyan student body and faculty in support of a more vibrant cross-cultural debate and in accordance with the needs and goals of each academic unit;
- Increase the vibrancy of global discussions on campus through facilitating visits to campus by key scholars, artists, and activists;
- Promote relevant partnerships with peer institutions in the United States and with targeted institutions abroad;
- Promote collaborative teaching and research across disciplinary and cultural boundaries;
- Develop curricular opportunities that will allow students to develop a global education tailored to their needs and aspirations.

AFFILIATED FACULTY

Dalit Katz
BA, Hebrew University; MA, Hebrew University
Director, Center for Jewish Studies; University Professor of Jewish Studies; Jeremy Zwelling Professor of Jewish Studies; University Professor, Religion; University Professor, Fries Center for Global Studies

Naho Maruta
MA, University of Wisconsin at Madison
Professor of the Practice in East Asian Studies; Professor of the Practice, Fries Center for Global Studies

Liana Pshevorska
BA, University of Arizona; MA, University of Arizona; PHD, Princeton University
Associate Professor of the Practice in French; Associate Professor of the Practice, Fries Center for Global Studies; Associate Professor of the Practice, Russian, East European, and Eurasian Studies

Camilla Zamboni
MA, Ohio State University

Section Head, Italian; Associate Professor of the Practice in Italian; Associate Professor of the Practice, Fries Center for Global Studies; Associate Professor of the Practice, Education Studies

FACULTY

Abderrahman Aissa
BA, University of Colorado Boulder; MA, University of Colorado Boulder
Associate Professor of the Practice in Arabic

Anita Deeg-Carlin
Visiting Instructor of Global Studies; Director for Intercultural Learning

Hrissi Haldezos
Adjunct Instructor in Modern Greek; Adjunct Instructor in Greek; Senior Associate Director of Student Accounts and Loan Services

Erica Kowsz
Assistant Staff Professor; Associate Director of Fellowships

Emmanuel Paris-Bouvret
Coordinator, Less Commonly Taught Languages; Adjunct Instructor in French; Director, Language Resources and Technology; Adjunct Instructor in Romance Languages and Literatures

Pedro Pascual
Assistant Professor of the Practice in American Sign Language

VISITING FACULTY

John Kiarie Wa'Njogu
BA, Kenyatta University; MA, Ohio State University-Main Campus; PhD, Ohio State University-Main Campus
Visiting Professor of African Languages

Leslie A. Warren Warren
BA, University of Vermont
Visiting Instructor in American Sign Language

ARABIC

ARAB101 Elementary Arabic I
Arabic 101 is the first introductory course of Modern Standard Arabic (MSA). The course will be conducted primarily in Arabic, except at the very beginning when students are learning the alphabet (Sound and Script). The course is communicative proficiency-based but other methods such as the translation are integrated in the course. While the communicative approach stresses the importance of developing the oral skills in class, all the other skills of language learning be emphasized. Arab culture and history are systematically integrated in the course through student groups cultural presentations as well as other activities.

The class will focus on speaking as an effective way of learning (speak it to learn it). Students will be able to write and create basic words, sentences and eventually write their first essay. The latter will cover--but will not be limited to--FORTE elements (family, occupation, recreation, travel and education). Students will able to converse basic dialogues comfortably in class, and HW will be assigned on a daily basis. There is a weekly Teaching Assistant's session conducted by a native Fulbright scholar from an Arab country.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB101Z Elementary Arabic I
ARAB101Z is the first introductory course of MSA (Modern Standard Arabic) designed for students who have never had any training in MSA while ARAB102 is its sequel appropriate for students who have taken ARAB101 and/or for individuals who are decent heritage speakers of an Arabic regional dialect. By taking ARAB101 & ARAB102, the student would earn 3 credits and would be able to enter ARAB201 if they choose to do so, as well as reach a low-intermediate level in MSA.

MSA is the official medium of oral and written communication in the Arab World and for religious services in the Islamic world. It has derived from Aramaic, has a close kinship to Hebrew, and it is the language spoken first by the Bedouins of the Arabian Peninsula in the fourth and fifth centuries A.D. It is the language used in books, novels, newspapers, conferences, official and religious speeches, business transactions, legal and government documents, court rulings, public signs, TV and radio newscasts and many TV/cinema productions and shows. It is the language of the Holy Quran and Hadith (sayings by the prophet Mohamed (PBUH) and/or his companions), and it is understood practically by every native Arabic speaker from Morocco to Bahrain. Being the language of Islam, more than one billion Muslims use it in their religious daily rituals all around the world, namely central Asia, South East Asia (Indonesia, Malaysia, India & Bangladesh etc.), the Middle East, the Great Sahara & North Africa.

It is very important to note that Modern Standard Arabic is not exactly the language spoken on the streets in the Arab world. However, anyone with a solid knowledge of MSA will have little to no problem "picking up" any of the main regional Arabic dialects (North African, Egyptian/Sudanese, Gulf, Iraqi, or Levantine)

The course will be conducted primarily in Arabic, except at the very beginning stages which will require the use of English (during Sound and Script discussions). The course is communicative proficiency-based, which stresses the importance of developing the oral skills but also aims at developing the other skills of language learning (listening, reading and writing).

Arab Culture and History are systematically integrated in the course and will be referred to, whenever appropriate and possible. References will also be made to the regional dialects for comparison with Modern Standard Arabic. Student Groups in-class presentations will be an excellent tool for students to learn about different aspects of Arab & Muslim culture, society and history.

The course will be supplemented by audio and video material as well as printed handouts provided by the instructor. Students are expected to do daily homework, role-play, group work, and give regular in-class feedback/ presentations, and are supposed to come prepared for class on a daily basis.

Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB102 Elementary Arabic II
This course is a second-semester course in modern standard Arabic (MSA) that will continue to stress the basic skills of reading, writing, speaking, and listening. The course will focus on speaking as an effective way of learning (speak it to learn it). Students will continue to learn MSA grammar, write and create paragraphs, and begin to converse comfortably in the target language. Students are expected to develop better listening, speaking, reading, and writing skills in Arabic and to become familiar with Arabic culture. Oral drills and speaking activities will be done in the classroom, and the class will be conducted primarily in Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.50**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101**

ARAB102Z Elementary Arabic II
ARAB102 is its sequel appropriate for students who have taken ARAB101 and/or for individuals who are decent heritage speakers of an Arabic regional dialect. By taking ARAB101 & ARAB102, the student would earn 3 credits and would be able to enter ARAB201 if they choose to do so, as well as reach a low-intermediate level in MSA.

MSA is the official medium of oral and written communication in the Arab World and for religious services in the Islamic world. Gen Ed Area: **HA-LANG**
Prereq: **ARAB101 OR ARAB101Z**

ARAB201 Intermediate Arabic I
This course is a second-year, lower intermediate course in modern standard Arabic (MSA) designed mainly for students who have completed at least two semesters of Arabic Fusha or those who already possess a basic foundation in Arabic. Students will develop more skills in writing concrete essays and narrating. They will start talking about current events and describing places and people. Narration, in fact, is the hallmark of the intermediate level, so conjugation tenses will need to be memorized. The course will primarily be conducted in Arabic, except for some cases which require the use of English. The course is communicative proficiency-based, which stresses the importance of developing the oral skills, while giving equal attention to the other skills of language learning (reading, writing and listening). The measure chart and the case system will continue to be discussed and practiced. Aspects of contemporary life and culture in the Arab world as well as Arabic regional dialects will be constantly referred to. Students are expected to do daily homework, role-play, group work, and give regular in-class feedback/presentations. The course will be supplemented by audio and video material as well as printed handouts by the instructor.
Offering: **Host**
Grading: **A-F**
Credits: **1.25**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101 AND ARAB102**

ARAB202 Intermediate Arabic II
This course is a second-year, upper intermediate course in modern standard Arabic (MSA) that will continue to focus on the four basic skills of reading, writing, speaking, and listening. In this level, students will be able to speak Arabic comfortably enough to communicate with a native speaker on a variety of topics. Students should be able to write simple texts on everyday themes and read uncomplicated authentic texts on familiar or concrete topics, as well as newspaper articles and storybooks. Culture will continue to be integrated in the classroom.The class will be conducted primarily in Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.25**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB101 AND (ARAB102 OR ARAB201)**

ARAB301 Advanced Arabic I
Arabic 301 is the fifth semester of Arabic MSA and is designed for students who have had at least two full years of Arabic MSA or its equivalent.

This first semester of third-year Arabic will continue to emphasize the four skills in language learning mainly through readings that introduce students to

more advanced topics that draw from literature, Arab Media, sciences and other disciplines. The course will be conducted entirely in Arabic, apart from cases where intricate grammar concepts necessitate English use.

The course is communicative proficiency-based, and students will continue to do role-play, pair work, write weekly reports and commentaries and give regular in-class feedback/presentations. They are expected to contribute orally to class discussions and lectures.

Arab culture and history will continue to be systematically integrated in the course through constant reference. Regional dialects will continue to be referred to, with the purpose of comparing them to Modern Standard Arabic.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-LANG**
Prereq: **None**

ARAB311 Introduction to Colloquial Levantine Arabic I
This course offers students an introduction to the spoken Arabic of the Levant (Syria, Lebanon, Jordan, Israel, and the Palestinian territories). One of the difficulties facing nonnative speakers trying to master Arabic is that very few Arabs can carry on a conversation in modern standard Arabic, so students must be familiar with a colloquial dialect as well as the standard literary language to communicate effectively in Arabic. Although Levantine Arabic is not as widely spoken as is the Egyptian dialect, it provides a useful entry for English speakers into colloquial Arabic, as it is about halfway between the Egyptian dialect and that spoken in Iraq and offers a useful bridge to mastering either dialect. The text for this course uses the Arabic alphabet. Students need to have a thorough knowledge of the Arabic alphabet and writing conventions to take this course. As much of the vocabulary used by the speakers of the Levantine dialect is derived from standard Arabic, this course will help build students' knowledge of basic Arabic vocabulary.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-LANG**
Prereq: **ARAB201**

ARAB322 Media in the Arab World: From TV and Film to Social Media (CLAC.50)
Media in the Arab world has undergone significant changes in recent times, with the emergence of new technologies, platforms, and voices across various mediums such as movies, newspapers, magazines, and social media. This course will introduce students to some of the main channels for the communication and expression of information in the Arab world today.

While television remains the most popular source of information - with channels such as Al-Jazeera even having an international audience - access to information has expanded to include online news websites and social media. Social media, in particular, has become an increasingly important source of information, especially among younger generations.

In this course, we will delve into the evolution and impact of media in the Arab world, exploring its role in shaping public opinion, identities, and narratives across different channels. We will look at movies, television series, and social media programs, as well as sources of traditional information, such as newspapers, magazines, and news broadcasts.

This course is open to students studying all levels of Arabic, but is particularly suited to students who have completed Intermediate Arabic as well as native speakers of Arabic.

ARAB380 Arabic in Translation: Arabic-English & vice versa (CLAC.50)
This course is aimed at introducing students of Arabic, who are already advanced in the Arabic language and have a decent command of it, to the art of translation--namely, translation between Arabic and English. After an overview of translation concepts and techniques, we will study and tackle samples from news media, literature, publicity announcements, novels, and a wide range of actual translation assignments. The course will be conducted in Arabic, except for the parts where English has to be used as part of the translation processes.

CENTER FOR GLOBAL STUDIES

CGST131B Writing About Places: Africa
This course is one in a series called "writing about places" that explore the long tradition of writing about travel and places and changing attitudes toward crossing cultural borders. We will examine historical and cultural interactions/ confrontations as portrayed by both insiders and outsiders, residents and visitors, colonizers and colonized--and from a variety of perspectives: fiction, literary journalism, travel accounts, and histories. Writing assignments will include critical and analytical essays as well as encouraging students to examine their own experiences with places and cultural encounters.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-ENGL**
Identical With: **ENGL131B**
Prereq: **None**

CGST136 Writing for Fellowships
National fellowships are prestigious, competitive awards that enable the recipient to pursue graduate study, a research project, or travel abroad. While fellowship winners experience great personal growth and gain credentials that aid future success, preparing the application itself helps students clarify their goals and learn how to present themselves to an unfamiliar audience, such as future employers. In this course students will learn about various fellowship opportunities, identify steps toward building a strong candidacy, and create a portfolio of compelling application materials. To inspire creative thinking, we will read short writings in various genres; authors may include Octavia Butler, Jose Antonio Vargas, Ruth Bader Ginsburg, N.K. Jemisin, Ursula Le Guin, and Ocean Vuong. We will then craft personal statements and other fellowship materials, taking them through a rigorous writing process with multiple revisions. By completing the course students will grow as writers and gain skills that can also be used in writing grants and seeking a job.
Offering: **Host**
Grading: **Cr/U**
Credits: **0.25**

Prereq: **FREN112 OR ITAL112 OR SPAN112**

CGST201Z Teaching English as a Foreign Language (TEFL)
This course is designed for students that are considering teaching English outside of the United States in the future. It may be particularly useful for those considering applying for a Fulbright English Teaching Assistant, the JET program, the Peace Corps, or continuing after Wesleyan to get a TEFL or TESOL certificate or master's degree. The course will include basic language acquisition theory, TEFL teaching techniques, readings by sojourners in various programs, and opportunities to reflect on personal reasons for choosing to teach abroad.
Offering: **Crosslisting**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT201Z, EDST201Z**
Prereq: **None**

CGST202 Preparing to Study Abroad: Culture and Language
This course is designed to facilitate students' preparations to study abroad during the following term. Through exploration of intercultural and language learning theories, intercultural communication strategies, and theories about culture, students will build a foundation for their learning and achieving their individual goals during the semester abroad. The course is open to those who are studying abroad in English as well as those who are studying a language. The course is graded at the end of the term, but ungraded check-ins during the study abroad experience are required for the credit to be awarded.
Offering: **Host**
Grading: **A-F**

CGST204 Artificial Intelligence and Other Digital Tools for Learning Another Language
This course will explore the applications of generative artificial intelligence and other technologies to enhance the language learning process. Through readings of current literature in the fields of Computer Assisted Language Learning (CALL) and language pedagogy, as well as hands-on experience, students will develop an understanding of guiding principles for implementing various technologies soundly in language learning activties. Class format will include conversations based on readings and work on projects using various technologies such as generative AI, augmented reality, and virtual reality environments; video games; and dedicated language learning software. Students will develop sample learning activities, participate in a presentation for the language teaching/learning community, and develop a project of their choice. This course is well suited to students with an interest in learning languages and understanding pedagogical approaches to the teaching of languages and cultures.

Gen Ed Area: **HA-CGST**
Prereq: **None**

CGST205 Introduction to Global Engagement
This team-taught and community-engaged seminar introduces students to the ideas and practices central to strengthening one's intercultural competence, in part through a critically informed approach to globalization. The course views "cultures" as porous, fluid, internally contested, and often overlapping -- and yet still as vital realities shaping the lived experiences of all people. Building intercultural competence requires not just acquiring new knowledge but also practicing the skills and honing the attitudes that are needed to interact effectively and appropriately on a basis of informed, mutual respect. This course is a core requirement of the Global Engagement Minor (GEM); students will begin to work with the eportfolio that they will use over their time in GEM to track, reflect on, and synthesize the various experiences making up the minor.
Offering: **Host**
Grading: **Cr/U**
Credits: **1.00**
Gen Ed Area: **SBS-CGST**
Prereq: **None**

CGST206 Global Engagement in Practice, Swahili Language and NGO Case Study in Kenya
This integrative, hands-on course is only open to Global Engagement Minors selected during the fall application process. Building on the theoretical frameworks and practical tools introduced in the gateway course, CGST 205: Introduction to Global Engagement, it weaves together Swahili language learning, regional studies, and an immersive spring break engagement with an educational NGO in Nairobi, Kenya. Situated within the broader regional education landscape, the course invites students to contextualize the NGO's work while also making their experience personally relevant through the design and implementation of a micro-project aligned with their academic interests. Course content introduces key historical, cultural, and contemporary dynamics of East Africa, with particular attention to the NGO's role within this evolving ecosystem. Through structured reflection and post-travel analysis, students critically examine their field experiences, strengthening their intercultural competence and deepening their global perspective. Throughout the semester, students will study beginning Swahili while exploring the broader context of the case study NGO, Kenya Education Fund. Course content will introduce students to key historical, cultural and contemporary dynamics of the East African region, with particular attention to the youth-led movements shaping present-day Nairobi and the NGO's role within that landscape. In preparation for the trip, students will design a personalized micro-project aligned with their academic interests, to be implemented during their time on the ground. Upon return, they will reflect on and analyze their experiences, deepening their intercultural understanding and global perspective.

CGST208 ¿Convivencia o conflicto?: Las tres culturas de la España medieval a través del arte (CLAC.50)
For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual wellbeing. This Spanish-language section complements the ARHA 310 curriculum, by exploring the resonance between medieval experiences of identity, pluralism, appropriation, and exchange and our own uneasy attempts at building a multiethnic, multicultural society. This class will be conducted in Spanish. ARHA 208 is open to intermediate and advanced Spanish learners (SPAN 113 and above), bilingual students, and heritage speakers. Enrollment in ARHA 310 is optional but encouraged.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**

Prereq: **None**

CGST210 Language and Thought: Introduction to Linguistics
What makes human language unique? This course is an introduction to the study of human language and its underlying properties. Much of our linguistic competence lies below the level of conscious awareness, and linguists seek to uncover the subconscious principles and parameters that govern our knowledge of language. This course first explores the core theoretical areas of linguistics: phonology (sound structure), morphology (word structure), syntax (sentence structure), and semantics (meaning). Then, we will explore such topics as the workings of language use, language variation, and first- and second-language acquisition.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-CGST**
Prereq: **None**

CGST213F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)
This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-WRCT**
Identical With: **WRCT135F**
Prereq: **None**

CGST214 Language Shift, Change, and Loss
South Asians (India and Pakistan) are multilinguals or at least bilinguals. Most of the world's population is at least bilingual, if not trilingual or more; nevertheless, fluent bilingualism in the United States is relatively uncommon, and biliteracy is even more rare. However, much of the research on language development and bilingualism has been conducted in the United States, even though we (USA) are a "minority world population" in these matters and we interpret the research findings in ways that most of the world's multilingual speakers would find unusual. In this course, we will study both first language and multiple language development. We will look carefully at both simultaneous bilingualism (early bilingualism, bilingualism as a first language, or "bilingualism from the crib") and sequential bilingualism (learning a second language, or more, after the first language is established). We will explore language shift (from mother tongues to majority language), and change and loss from South Asians' perspectives and how these perspectives are different from and similar to the rest of the world, and consider what should be done for language maintenance.
Offering: **Crosslisting**
Grading: **OPT**

Identical With: **GSAS214**

Prereq: **None**

CGST215 What is (a) Language?
Scholarly inquiries into language have always faced the distinctive (though not unique) problem of how to define their object of study. What is language? Language in general, human language, a particular language, language as opposed to dialect or idiolect, etc.

This course will not answer these questions. It will, however, examine the most important and influential ways that they have been formulated and answered throughout the Western tradition of linguistic inquiry. Our survey will be organized around two main tendencies that are sometimes distinct but often complementary. First, the question of origins: Where does (a) language come from, and what does this tell us about its nature? We'll look at etymology and theories of language change alongside thought experiments and evolutionary theories that try to narrate the emergence of language from nonhuman forms of animal communication. Second, the questions of structure and function: How does (a) language work; what do we use it to do? We'll look at the medieval trivium of grammar, logic, and rhetoric, alongside the (approximate!) modern analogues of morphosyntax, semantics, and pragmatics. Our goal will be to get a sense of the major theoretical issues that have run through scholarly inquiries into language(s) across disciplines ranging from linguistics and philosophy through anthropology, sociology, and literary theory, to cognitive studies and evolutionary biology.

While our scope is large, our method will be narrow, focusing on close readings of important primary texts in the history of Western linguistic thought. Since our emphasis will be on the coherence of theoretical positions rather the coherence of historical narratives, we'll focus especially on works that have exerted the strongest influence on contemporary understandings of language, particularly those from the 20th and 21st centuries.

CGST218 Teaching Spanish K-12: Second Language Pedagogy (CLAC 0.5)
This is a community engagement course in which students learn basic principles of language pedagogy and language acquisition to inform their teaching of Spanish to children at one of the Middletown public schools. Readings in English and Spanish; class discussion and assignments in Spanish. Students will familiarize themselves with characteristics of second language (L2) learning and teaching, a basic know-how on analyzing and preparing materials for language learning/teaching, and L2 teaching as a profession.

Language and course requirement: Students must have recently taken a SPAN course numbered 221 or above. Preference will be given to EDST and HISP majors, as well as juniors and seniors.
Offering: **Crosslisting**
Grading: **Cr/U**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **SPAN204, EDST204**
Prereq: **None**

CGST220 Italian Gaming Lab: Using Tabletop Games for Language Learning (CLAC.50)
Italian Gaming Lab is designed as a game-based Italian language laboratory that will focus on why and how tabletop games can be effective tools for language learning; examples will include board games, card games, and tabletop role-playing games (TTRPGs), an increasingly popular type of game that is based on collaborative storytelling in which participants either impersonate one or more characters or create and organize entire worlds.

In this CLAC course, we will explore how a game-informed pedagogy can work in Italian language and culture classrooms and to highlight analog gaming approaches that have worked inside and outside the language classroom. We will discuss the basics of Game-Based Learning (GBL) applied to L2 acquisition, as well as play a series of games that can illustrate the gameful principles previously studies. Participants will discuss the application of gaming principles to L2 acquisition and create reports and playful presentations on their linguistic journey through play. The course offers students the opportunity to use language creatively and to develop critical knowledge within the rising and innovative field of Game-Based Learning and educational game design.

The course will be conducted in Italian, and games will be played in Italian. Both intermediate/advanced learners of Italian (second-year level or above) and native speakers are welcome. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

CGST221 Food in Japanese Media (CLAC.50)
This 0.50 CLAC section is conducted in Japanese and will feature Japanese-language media (documentaries, films, TV shows, anime, and some texts such as news articles and manga). It is designed to supplement CEAS 210: From Tea to Connecticut Rolls: Defining Japanese Culture Through Food. All materials and discussion will be in Japanese. There may be some writing assignments depending on ability. The section is open to students with Japanese-language ability, from intermediate level to native speakers. With the instructor's approval, this section may be taken independently of the parent course. Evaluation will be primarily based on participation, effort, and completion of assignments.

CGST222 Translating Modern Japanese Song Lyrics (CLAC.50)
This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other's choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced

Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.

CGST223 French Literary Masterpieces on Screen (CLAC 0.5)
This CLAC course is linked to the FYS RL&L 252F: French Literary Masterpieces in Translation and on Screen. In this CLAC course, conducted entirely in French, students will have the opportunity to read the texts in their original language, and to hone their French speaking, listening, and writing skills. Assignments will include written commentaries (i.e., close readings) and short presentations on the material. As for the films, students in the CLAC course will be expected to watch and discuss French-language adaptations. This CLAC course is intended for students who have at minimum an advanced intermediate level of French. Learners of French as well as native and heritage speakers of French are welcome. Credit: 0.5. Regardless of students' previous exposure to the French language, including AP and IB courses, students interested in the CLAC course must take Wesleyan's French placement test and score into at least FREN 215 (Advanced Intermediate French). Should they place into FREN 215, they must enroll in this class in order to be eligible for the CLAC course. Students who place into FREN 112 or below will not generally be eligible due to the degree of difficulty, though students may submit a petition. Moreover, all students must meet with the instructor before enrolling in the CLAC course for an oral comprehension and expression evaluation. This CLAC course, in combination with the FYS in English, will count toward the French Studies Major or Minor, as well as the Romance Studies Major.
Offering: **Crosslisting**
Grading: **OPT**
Credits: **0.50**
Gen Ed Area: **HA-RLAN**
Identical With: **FREN253F**

CGST224 Living a Good Life: Chinese Lab (CLAC.50)
This optional "lab" class is intended for students (1) who have taken or are currently taking PHIL 210: Living a Good Life; and (2) who have little or no exposure to classical Chinese. Each weekly session will introduce students to aspects of the classical Chinese language--the written language of pre-20th-century China. Students will be able to read (in Chinese) and discuss (in English) key passages from the Confucian classics on which the Living a Good Life courses is partly based. No previous knowledge of Chinese (classical or modern) is necessary.
Offering: **Crosslisting**

Gen Ed Area: **SBS-PHIL**
Identical With: **PHIL151, CHIN151**
Prereq: **None**

CGST225 Living a Good Life: Greek Lab (CLAC.50)
This half-credit "Greek Lab" uses a slow reading of Plato's Republic to invite students into the world of Ancient Greek. In the first three weeks of the semester, students will be introduced to the Ancient Greek alphabet and explore the meanings of two key Greek philosophical terms -- eudaimonia (often translated as "happiness" or "flourishing") and dikaiosune ("justice" or "righteousness") -- that will set the stage for our study of Plato. In subsequent weeks, we will progress through each of the ten books of the Republic, highlighting a pivotal Greek keyword in each class session and discussing how its nuances inform Plato's argument for the good life as the just life.

No prior experience with Greek (ancient or modern) is required, and all readings and discussion will be geared toward students with little to no background in classical languages. Our goal is twofold: to develop an appreciation for Attic Greek, and to discover how direct exposure to the language enhances our understanding of a core text in the history of philosophy. Through short reading assignments prior to class, followed by group work and guided discussion in class, students will gain a unique perspective on some of philosophy's most enduring questions, while also developing the tools to navigate Ancient Greek terminology with confidence. Please note: this course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative and is not meant to replace a full introductory course in Ancient Greek. Students seeking more in-depth language training should enroll in GRK 101.

CGST226 French and Francophone Gastronomy (CLAC .50)
This course explores the variety of French and Francophone gastronomy through texts, recipes, and other media such as films and cooking shows. Through these materials, students will reflect on the relationship between food and culture and the shape it takes in French and Francophone cultures. They will develop a deeper knowledge and appreciation for various foods and dishes. The course will include a hands-on component through which students will cook and taste foods from various areas in the Francophone world. The course will culminate in a final public event during which students will introduce and share foods from the Francophone world, which attendees will have the opportunity to taste. In addition to weekly meetings, there will be a few cooking workshops. Grade will be based on class participation, weekly reflection journals, a final presentation, and a final paper. This course is taught entirely in French. Readings, written assignments, and class discussions will be in French. Any student who has completed FREN 215 (with a minimum grade of B) or has placed out of FREN 215 through the placement test may sign up for this course. It is an advanced course intended for students who have not yet studied abroad in a French-speaking country. Students who are not admitted to the course through pre-registration are strongly encouraged to submit an enrollment request and attend the first class. This course will count as one course toward the French studies major and minor, the Romance Studies major, and the COL major. It also fulfills the language requirement for the ARHA major and GEM (Global Engagement Minor).

CGST227 Writing Short Fiction in Spanish
This course will be both an examination of the short story form in Latin American letters, a genre that has been crucial to the region's intellectual traditions and its ruptures, and a deep exploration of the act of writing short fiction in Spanish. By examining diverse aspects of the craft of fiction writing, and through a discussion of their own writing and that of their peers, students will search for their (multilingual) voice to explore some of their philosophical, affective and linguistic concerns, become stronger writers and storytellers and improve their skills in Spanish. They will also familiarize themselves with some of the most captivating fiction produced by Latin American and Latinx short story writers over a century.

CGST229 Language and Politics: Making and Unmaking of Nations
This course explores the key topics at the intersection of language and politics, including language choice; linguistic correctness; (self-)censorship and hate speech; the performance of ethnic and national identity in language; gender politics and "powerful" language; rhetoric and propaganda; and changing conceptions of written language, driven in part by technological advances. One of the examples of such topics is Tweet politics or incivility on the web around the globe. This course consists of three modules. In the first two modules the above-mentioned topics will be discussed in general, while in the last module we will see how preferences in language policies and politics played a significant role in making and unmaking of nations in different parts of the world, from South Asia to East Asia to North America.

CGST230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s
In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

CGST231 Love and Suffering in Ancient Rome (CLAC.50)
In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

CGST233 Introduction to ASL / English Interpretation (CLAC 0.5)
Having completed course work in Beginning ASL I, II and Intermediate I, II, students who have demonstrated a strong interest in continuing their studies at a more sophisticated and challenging level may find this course work interesting pursuant to becoming a professional, credentialed Sign Language Interpreter.

This experience will provide students with a working knowledge of the profession of interpreting including the Code of Professional Conduct, certification criteria, the roles and responsibilities of a professional interpreter and discussions of the role of the interpreter in a variety of professional settings including educational, medical, legal, the performing arts, counseling, and rehabilitation.

Students who attend this course demonstrate that they are able to express in ASL, with some confidence, routine and everyday experiential topics within a conversational format with some elaboration. They demonstrate clear and accurate signing and fingerspelling at a moderate rate of speed.

This coursework uses a process-oriented approach for applying the essential cognitive strategies for interpretation. These strategies include organizing and manipulating visual images, analyzing message for meaning, and self-monitoring for message accuracy. This experience serves as a transition from language learning to beginning interpretation.

CGST234 Introduction to Russian and Soviet Cinema (CLAC.50)
This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

CGST235 Brazilian Culture and Identity Through Media (CLAC.50)
If asked about Brazil, chances are one may answer by invoking stereotypes that once conveyed Brazil's global image: samba and futebol (soccer). While music, carnaval, and soccer are central elements of the national identity, these aspects of Brazilian culture fail to do justice to the complexity of a country of ever-increasing global impact, with a top-ten economy, a massive, continental territory. and some 200 million inhabitants who constitute what may be the most diverse population on the planet.

In this course we will critically examine how the media has helped shape Brazilian identity and how the country is perceived from outside. We will cover topics such as social relations, race, poverty, gender, violence and human rights. Readings will draw upon theories and concepts in media studies and cultural studies. Class discussion will consider cultural texts, television shows, films, music, poetry, fashion, and social media posts. This course will be taught in English and Portuguese (introductory or intermediate level is sufficient).

CGST236 Music, Culture and Social Justice in Latin America (CLAC.50)
This course examines influential Latin American musicians and the relationship between their artistic production and the battles for human rights, democracy, and social justice in the hemisphere. The seminar will focus on the periods of dictatorial rule and transition to democracy in the Americas (mostly, from the 1960s through the late 1980s). We will study the main musical trends and leading artists in Spanish and Portuguese speaking countries in those decades, assessing the role of their music in battles for free expression, democracy, and social justice in human rights. Among the artists whose work we will consider are Victor Jara (Chile), Mercedes Sosa (Argentina), Los Guraguao (Venezuela), Catano Veloso, Gilberto Gil, and Chico Buarque (Brazil). Students will be encouraged to analyze music through lyrics and song form, while understanding the historical, political, and social climates in which these artistic productions developed. Students will understand how music and culture can be powerful tools of resistance, assessing their impact in educating, inspiring, and creating social awareness and commitment in Latin American societies. This course will be taught in English, Portuguese, and Spanish (introductory or intermediate level is sufficient).

CGST237 The Soviet Century (CLAC.50)
This course begins and ends with two crucially important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the Russian government with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to remake the world. On December 26, 1991, the Soviet Union collapsed into 15 countries. The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will explore the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the course will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider key theoretical writings in addition to poetry and prose by major Russian and Russophone authors. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. This class consists of lectures and focused discussion of essays and films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

CGST240 Introduction to Tamazight: The Native Language of North Africa and Beyond (CLAC.50)
This course will introduce students to the language (sounds and script) and culture of the Amazigh people, an ethnic group (commonly known as Berbers) native to North Africa and West Africa, specifically Morocco, Algeria, Tunisia, Libya, Mauritania, northern Mali, and Niger, with some oases in Egypt and the Canary Islands. The Tamazight language--the alphabet of which is called Tifinagh--has been a written language for almost 3000 years, although it was disrupted throughout history due to various invasions and conquests of the area. The Tuareg people of the Sahara desert in Northern Africa, and as of late Morocco and Algeria, have been using the Tifinagh alphabet (oldest dated inscription from about 200 BC) and the Tamzight language as a secondary national language. The objectives of this course are: 1. To introduce students to the sounds and script of Tifinagh; 2. To teach students basic conversation and essential elements of the Tamazight language; and 3. To familiarize students with the culture of the different Amazigh peoples.

CGST241 Introduction to ASL in the Performing Arts (CLAC.50)
This course offers an introduction to artistic ASL interpreting. "Artistic ASL Interpreting" does not apply only to performing groups who present songs in sign language on a stage. Nor is it a term that is exclusively linked with theatrical interpreting in a "platform" setting of plays, musicals, or poetry. Artistic interpreting can be explained as a refined, more creative style of interpreting at the highest levels of the profession. For students, it presents challenges that encourage more attention to eye gaze and contact; shifts in body stance and positioning; size and style of sign production; facial expressions; gestures as communication and sign alternatives in overall concept formations and messaging. These are, in fact, some of the most important components in ASL communication and some of the most challenging aspects to encourage or teach.

CGST243 Die Grenzen meiner Sprache bedeuten die Grenzen meiner Welt (CLAC .5)
This CLAC will explore the practice of translating philosophical German by focusing on Wittgenstein's Tractatus, its recent translations, and its (often unnamed) sources and influences -- including writings by Gottlob Frege and Immanuel Kant as well as by various Viennese intellectuals such as Karl Kraus and Otto Weininger. The Tractatus is a particularly productive focal point because it advances a theory of language and meaning that has immediate relevance for conceptualizing what is involved in translating from one language into another. In practicing translation, students will be testing the theory that they are attempting to translate. This will provide them an additional dimension in which to wrestle with the content of the text. Enrollment in the associated seminar, PHIL389/COL386, is encouraged but not required. The course is open to students at all levels of German study. Discussions will be conducted in a mixture of English and German, since we will be discussing the nuances of words and phrases in both languages. By preparing (and discussing) their own translations of texts, students will become familiar with the sorts of challenges that arise in rendering philosophical German into English and will develop strategies for negotiating these challenges. Students will also be encouraged to consider translations into other languages in which they are competent.

CGST245 Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)
This 0.5-credit course is conducted in Italian and designed to supplement the English-language Italian cinema course "Not Just Neorealism: Italian Cinema, its History, and Politics" (RL&L 245). The presentations that are part of the requirements for the parent course (RL&L 245) will serve as our basis in this discussion-based section: Students will be responsible for screening films in addition to those required for 245, for presenting them, and, during the discussion sections in Italian, responsible also for linking them to the course material. Further, students enrolled in the CLAC will also make mini-presentations to the broader body of the students enrolled in the parent course only, linking the extra screenings to those that are part of the course syllabus, and enriching the discourse and knowledge base.

Students are required to be simultaneously enrolled in the parent course in order to enroll in the CLAC section. For this reason, enrollment is granted on a POI basis.

Students must have advanced competency in Italian: completed ITAL 221 or a course with a higher number, spent a semester (or more) in Wesleyan's Program in Bologna, or be linguistically proficient. For any questions about linguistic preparation, please contact the instructor.

Please note that at present this section is not acceptable as one of the nine required courses for the ITST major.

CGST250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC.50)
The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

CGST251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

CGST252 Chinese Calligraphy (CLAC.25)
This 0.25 CLAC course will provide students with a brief understanding of the art of Chinese calligraphy through calligraphy practice. They will learn about the characteristics of Chinese calligraphy from the "Four Treasures of the Study," as the tools of calligraphy (writing brush, ink stick, ink stone, and paper). They will understand the development history of Chinese calligraphy from five basic scripts of Seal (zhuanshu), Clerical (lishu), Standard (kaishu), Semi-cursive (xingshu), and Cursive (caoshu). The course focuses on imitation and practice of the Standard script kaishu. Prerequisite: Current or future Chinese class students are preferred.

CGST253 East Asian Culture Through Chinese Pop Music (CLAC .50)
Even after the meteoric rise of K-Pop in recent years, Mandarin Chinese Language pop music, also known as Mandopop, remains a highly popular musical genre that influences East Asian popular culture. This course introduces students to the literary history and cultural forces that shaped Chinese popular music. The songs featured in the syllabus serve as a soundtrack to the "Introduction to History: Foundations of East Asian Cultures," as the themes largely mirror the contents of the parent course.
Offering: **Crosslisting**

CGST254 Self and Other in Cross-Cultural Encounters (CLAC.50)
This course is open to students currently enrolled in ANTH101: Introduction to Cultural Anthropology or in ANTH103: Gifts and Giving. It is intended for students with an interest in improving their spoken and written Spanish through an exploration of the problems and possibilities of cultural anthropological practice. This exploration will happen via class discussion and short ethnographic research assignments. The course will be conducted in Spanish and is open to students with some level of proficiency: from intermediate to advanced and to heritage speakers of the language. Students are expected to be currently enrolled in, or to have previously taken, ANTH101 or ANTH103. Email the instructor for information about alternatives to this requirement.

CGST255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)
This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

CGST256 Exploring Korea Through a Multifaceted Cultural Lens (CLAC .50)
This course will address a variety of aspects of traditional and modern Korean culture, ranging from traditional cuisine, music/art, religion, and the modernization of Korea in the 20th century to the Korean Wave, films, education, and the history of Korean pop music. Video clips, movies, and other multimedia materials will be utilized to better facilitate students' learning of Korean culture and heritage. This course will be conducted mostly in Korean. Students who have either completed one or two years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean and heritage speakers are also welcome.
Offering: **Crosslisting**

CGST261 Reporting on Global Issues: International Journalism in Action
This course is designed to introduce students to various mediums of international reporting beyond the traditional print format, like video and podcasting. Visual and auditory formats have gained widespread prominence, making journalism more accessible to diverse audiences. After delving into sourcing, research, and reporting techniques, students will engage in discussions with accomplished innovative journalists, hosts, and reporters who possess extensive experience in covering international issues. Throughout the semester, students will gain valuable insights from these conversations and collaborate in teams to produce a podcast episode for a class series focused on migration.

CGST262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

CGST264 Portuguese and the Luso-Brazilian Short Story (CLAC.50)
This course offers students a chance to read and discuss short stories written in Portuguese from around the world (Brazil, Portugal, Mozambique, and Macao). It is open to students with intermediate or advanced Portuguese. Heritage learners and students with native Portuguese, both spoken and written, are also welcome. Assignments will include presentations and written work in Portuguese; assessment will be tailored to each student's language background.

All classroom discussion will be in Portuguese. Readings/films will be discussed weekly, including topics of language and content. Everyone will participate in discussions. Each class will include a short presentation (5-10 minutes) by a

student on the week's assignment, including a brief introduction of the text, author, and geographical/historical context. Each student will contribute a discussion question before class on the assignment.

CGST265 History of Spanish Cinema for Spanish Speakers (CLAC.50)
Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: https://span301.site.wesleyan.edu/. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

CGST266 Neotropical Acuatic Ecosystems: Their Importance, Sustainable Use, and Conservation (CLAC 1.0)
(English translation below Spanish text) El curso de Ecosistemas Acuáticos Neotropicales permitirá a los estudiantes buscar información y discusión sobre la diversidad y complejidad de los ambientes acuáticos en la América tropical. Comenzaremos a aprender definiciones, características, distribución y ejemplos de humedales, lagos, ríos y muchos otros hábitats acuáticos en todo el neotrópico. El origen del sistema hidrológico. Evolución de las principales cuencas: Amazonas, Magdalena, Orinoco y Paraná. El Paleo Orinoco-Amazonía: Importancia geológica y biótica. Dinámica geológica. Evidencia geológica y biológica. Hipótesis evolutivas de la fauna piscícola. Evolución del paisaje amazónico como parte del conocimiento para comprender los diversos procesos y patrones de riqueza y distribución de la biodiversidad. Los humedales (sabanas inundadas) de Colombia-Venezuela como ejemplo de humedales neotropicales. El Pantanal brasileño y las llanuras colombo-venezolanas como "áreas de criadero" para la biota acuática y terrestre y su importancia para el mantenimiento de la biodiversidad. Los estudiantes también leerán y buscarán información sobre el Sistema Fluvial Orinoco como ejemplo de estudio. La importancia biótica, el desarrollo sostenible y la conservación. Identificar los factores antrópicos que afectan al sistema. El desarrollo social y económico, y las contribuciones a través de los Programas de Evaluaciones Acuáticas Rápidas (RAP's) como metodología para producir información que permitió proponer áreas para la conservación de la biodiversidad. Terminamos con un análisis de los recursos y la importancia pesquera de las principales cuencas neotropicales: Amazonas, Orinoco y Paraná-Paraguay. Seguridad alimentaria. Ejemplos de ríos en riesgo.

This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemicity, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST267 Current Environmental Issues in Latin America (CLAC 1.0)
(English translation below Spanish text) Este curso proporcionará información histórica y actual sobre el desarrollo de temas ambientales en América Latina. La información se dividirá en la evaluación del uso del medio ambiente durante los períodos precolombino y colonial (a); y b) período moderno. Se discutirá la organización, estructura y gobernanza del medio ambiente. El desarrollo de políticas públicas, planes de gestión, factores que se deterioran y los posibles usos sostenibles del medio ambiente y sus recursos. Leeremos literatura interdisciplinaria incluyendo: académica, informes, documentos oficiales gubernamentales y proyectos de ONG dedicados al diagnóstico, desarrollo y uso o nuestros recursos en América Latina. Por último, se estudiarán casos particulares de países latinoamericanos como Argentina, Brasil, México, Costa Rica, Perú y Venezuela. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs' projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST268 Food Security and Environmental Conservation (CLAC 1.0)
(English translation below Spanish text) En este curso los estudiantes investigarán información y discusión sobre la seguridad alimentaria y el uso del medio ambiente en una selección de países de América Latina. Haremos

preguntas sobre la base de la producción y disponibilidad de alimentos. También examinaremos la información disponible de las agencias públicas y privadas sobre los programas establecidos por los países para garantizar la seguridad alimentaria de sus habitantes y el uso sostenible y la conservación del medio ambiente. Discutiremos conceptos como: La soberanía alimentaria y la seguridad como un sistema alimentario en el que las personas que producen, distribuyen y consumen alimentos también controlan los mecanismos y políticas de producción y distribución de alimentos; La nutrición como normas mundiales y particulares de consumo de alimentos; La Justicia social relacionada con la accesibilidad de los alimentos; y el derecho humano a una alimentación adecuada y a la libertad del hambre como uno de los objetivos del milenio de las Naciones Unidas. El estudiante revisará casos particulares en América Latina. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español. In this course students will research and discuss food security and the use of the environment in a selection of Latin American countries. We will ask questions about the basis of food production and availability. We will also examine the available information from public and private agencies about programs established by countries to ensure the food security of their inhabitants and the sustainable use and conservation of the environment. We will discuss concepts such as: food sovereignty and security as a food system in which the people who produce, distribute, and consume food also control the mechanisms and policies of food production and distribution; nutrition as a global and particular standard of food consumption; social justice related to the accessibility of food; and the human right to adequate food and freedom from hunger as one of the United Nations' objectives of the millennium. Students will look at particular cases in Latin America. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST273 Tatort - Window into Germany (CLAC.50)
Few television shows have become anchored in German cultural discourse as firmly as "Tatort," a weekly crime show produced and broadcast by public television since 1970. Watched by up to 40% of all potential viewers, new episodes are prominently reviewed in major daily newspapers and serve as a focus for discussions about German politics, culture, and society. Episodes have tackled questions of police brutality, immigration, gentrification, and the surveillance state, while also shining a light on Germany's changing conception of itself. Over the years, the show has attracted some of the major directors and actors from German-speaking regions, such as Wolfgang Petersen, Margarethe von Trotta, Dominik Graf, Sibel Kekili, and Götz George. In this course, we will watch current and canonical episodes of the show, using it as a way into discussions about Germany's past, present, and future.

CGST281 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)
This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

CGST283 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy (CLAC 1.0)
(English translation follows below) Este curso examinará los factores clave que han afectado el desarrollo de Venezuela y su entorno desde el período precolonial hasta el presente. Dividiremos la historia de Venezuela en dos períodos críticos: antes y después del descubrimiento de petróleo. Haremos preguntas sobre la naturaleza y las interacciones de los factores y agentes clave que transformaron a Venezuela de una colonia a la de un país económicamente independiente. Al examinar los períodos económicos anteriores y posteriores al petróleo por separado, aprenderemos que los factores clave, como la agricultura, el uso de la tierra y la influencia colonial europea, cambiaron drásticamente, transformando así muchas instituciones sociopolíticas. Los contrastes incluirán la resiliencia y la erradicación de enfermedades, los derechos humanos y la esclavitud, la propiedad de la tierra, la salud humana, los impactos en la biodiversidad y la salud humana, y la protección de las culturas indígenas. En última instancia, examinaremos los factores que han llevado al colapso de la democracia. Leeremos una literatura interdisciplinaria que incluye antropología, religión, sociología, ciencias ambientales, derecho e historia. El curso se presenta en un formato de lectura / discusión en el que todas las lecturas, escritos y discusiones serán en español. This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

CGST285 Global Hip Hop of the Non-Anglophone World (CLAC .50)
Proficiency in a language other than English is required. Each student will present to the class a single piece of their choice in a non-English language every other week (for a total of five presentations). Presenters will provide the class with written lyrics in both the original language and in English translation. In lieu of analyzing recordings by others, students have the option to compose their own non-English rap songs and record (or perform) them for in-class discussion. The final paper will tie the five presentations together in a single formal document (or website). Class discussion will be in English, but the topics will all be rap lyrics and hip hop/youth culture in the non-Anglophone world.

CGST290 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

CGST291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)
The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of ta Aphrodisia (the things/matters related to Aphrodite) in a culture that has no one term/ concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

CGST302 Narrating China: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Narrating China: Introduction to Modern Chinese Literature (CEAS 202) course. It allows students to encounter a selection of modern and contemporary Chinese literary texts in their original Chinese. As the parent course guides students through major literary movements and themes from 20th-century China, students in the CLAC tutorial will read poems, short stories, or excerpts of longer texts from the same periods in the original Chinese. In weekly meetings, students will discuss the readings in Chinese, to delve deeper into their stylistic and linguistic characteristics unobservable in translations.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Evaluation is based on students' preparedness, participation, and formal oral presentations, and will be tailored to students' language background. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

CGST303 Ukraine and Its Environment
International perspectives on environmental issues are critical in order to address the challenges facing the world. Developing an international perspective

requires more than learning from printed literature--it requires in-country experience and the desire to be able to view issues through different cultural lenses. This course will provide such experience by learning about the diversity of Ukrainian environments, people, and cultures both in the classroom at Wesleyan and by traveling to Ukraine during Spring Break. During our time in Ukraine we will receive lectures in English from noted scholars, politicians, professors and scientists on topics such as environmental law, global environmental security, urban environment, environmental policy in developing states, and sustainable development for the developing world. We will travel and learn from scientists at Chernobyl about the regeneration of forest ecosystems, learn from agronomists about agriculture on the steppes, and learn from politicians and scholars about Ukrainian environmental policy and their views of U.S. policies. We will also enter into round table discussions with university students to exchange ideas about potential international solutions and approaches to environmental problems. These are just some of the experiences that are planned for our visit. Ukraine, as a pivotal democracy of the former Soviet Bloc, is an amazing place to witness how a nation wrestles with dramatic changes in policy. At the same time Ukraine is culturally diverse, which presents interesting challenges to formulating fair and cohesive policies.

CGST304 Urdu Literature and Poetry (CLAC 1.0)
This course is specifically designed for the learners who want to advance their skills through reading and discussing authentic materials in poetry and prose. The syllabus includes readings which range from the classic to current traditions. Students will read Mir Taqi Mir, Mirza Ghalib, Iqbal, Nasir Kazmi, Ahmad Nadeem Qasmi, Sadat Hassan Manto, Bano Qudsia, Abdullah Hussein, and many more. The main goal of the course is to familiarize students with Urdu literary traditions before and after partition of the subcontinent. Students will also get opportunity to improve their writing and creative writing skills in Urdu scripts (Nastaliq) by completing various projects and assignments.

Medium of instruction for this course will be standard Hindi/Urdu. This course is suitable for the advanced heritage learners, advanced Hindi/Urdu and native speakers.

CGST308Z Dealing with Difference: Intercultural and Multicultural Education
How do students learn about cultural difference in school and college? Multicultural education, intercultural education, international education, global learning, internationalizing the curriculum -- all are terms related to bringing cultural competence into teaching and learning. These different approaches are often in conflict with each other, while ostensibly teaching the same knowledge, skills, and attitudes. In this course, we will trace the histories of multicultural and international education to the present day. We will explore the purposes, theories, practices, and pedagogies associated with these two fields, as well as their intersections, convergences, and divergences. Finally, we will view these fields through a critical lens to reveal their successes and shortcomings, and formulate our own recommendations for the future direction of each -- or both.

CGST316 The Environmental Crisis and Nuclear Testing Narratives in Global Francophone and Arabic Cultures
This interdisciplinary course examines nuclear themes, with a particular focus on nuclear testing as depicted in novels, film documentaries, and poetry within Francophone and Arabic cultures. It emphasizes the profound impact of nuclear testing on human life and the environment. The course analyzes literature in French and English as well as visual materials (photography and films), archival materials, political writings, news articles, and websites. Students must possess reading ability in French and an interest in North African culture.

CGST319Z Islamic Spain
Islamic Spain is a history and culture course that deals with Muslims in and in relation to the Iberian Peninsula. The course will not only be limited to the first period spanning roughly over nine centuries (711-1614 CE) but will also cover the area in question from the 17th century to present. The course will be conducted in English but will additionally draw on sources written in other languages which the instructor will translate into English and provide to students for class purposes (mainly French, Spanish, Arabic and German).

CGST320 La cultura y la historia de la España islamica (CLAC.50)
This course will be taught in Spanish, and spans a timeline between 711 and 1492, i.e., from the date of the conquest/invasion of Iberia by Muslim troops to the fall of Granada and the expulsion of Muslims and Jews from Spain. Before

starting discussion of the course material, students will be introduced to Arabic sound and script, as well as some common vocabulary and lexical concepts shared between Spanish and Arabic. This makes sense because Muslim culture and the Arabic language were present in Iberia for the better part of 800 years. We will discuss not only the main events that took place during the Muslim occupation of parts of Iberia but also the cultural legacy Muslims and Jews left behind in the peninsula after they were expelled in 1492, especially in the realms of art, science, language, architecture, and le savoir-vivre. We will look at the different theories put forth by scholars about the conquest/invasion of the peninsula, in regard to the ease and speed with which the peninsula was overrun by Muslims. We will examine the hereafter and the consequences of the expulsion of Muslims and Jews on the Iberian peninsula as well as the neighboring territories. Finally, we will make a jump to the 21st century and try to connect some dots by looking at the current situation in and around the Strait of Gibraltar, particularly the influx of illegal immigrants from North Africa and sub-Saharan countries, and the ensuing issues.

CGST321 Theatre for Social Change - Taught from Ecuador with Local Participants
This course is taught in Spanish. Students should have Spanish proficiency equivalent to SPAN 112 or higher. This course is designed to lead Wesleyan students and Ecuadorian community counterparts through the process of creating social change by practicing social change. Using exercises and activities that pull from the areas of Theatre of the Oppressed and Performance Activism, as well as traditional theatre tools such as movement and mask-making, we engage challenging concepts and conflicts by dialoguing via our performative work. Our exploration stretches from the theoretical foundations of structural and symbolic oppression to ongoing real-life events related to themes that are selected by the course participants (examples include cultural identity, systemic racism, privilege, power, environmental justice, and gender equality/equity). Each course participant chooses a thematic area and joins a small group with which they will apply learned methods to exploring their theme. Together, Wesleyan students with local counterparts create short virtual theatrical projects to be presented to the whole cohort. Readings cover theory and methods in Applied Theatre, community-based case studies, and articles related to the chosen themes. The readings are contextualized to the diverse lived realities of the course's participants as well as to our globalized society.

CGST322 Storying and Re-Storying (Storytelling for Social Change) - Taught from Ecuador w Local Participants
This course is taught in Spanish. Students must have proficiency in Spanish equivalent to SPAN 112. When we consciously appropriate the power of stories to collectively reimagine our world, we turn the word story into a verb. We "story" our world. When our "storying" seeks to transform a system founded on unjust stories, we are "restorying" our world. This course begins with our human ability, and need, to tell stories, examining how we use them for communication, as well as how we become empowered or disenfranchised by them. Based on the realities present in our communities (our local community of place, college campuses, cities, neighborhoods, spiritual communities, etc.), students work with their counterparts, combining theory with practice, to create and tell stories with the goal of identifying shared conflicts and inspiring change. Since stories are told in many ways, the course engages the "telling" through various methods: writing stories and poems, Spoken Word, coloring/drawing, mapmaking, and moving our bodies. In each project, we implement the elements of storytelling, balancing distinct narrative traditions, such as myth and legend, with influences of the modern world. Readings look at a wide array of narrative theory and methods, focusing on storytelling as a form of creating and expressing knowledge. The course concludes with the interweaving of local and international stories into "our stories."

CGST323 Hebrew in the Media: From National Literature to International Films and TV Shows (CLAC 1.0)
This language course is offered as an enrichment opportunity to students with intermediate or advanced Hebrew skills who are interested in improving all their language skills and/or acquiring additional linguistic and cultural preparation for study abroad in Israel. Cultural activities including participating in the 24th Annual Contemporary Israeli Voices 2026 and Lunch and Learn meetings with native speakers are part of the course. In addition, special writing workshops with internationally renowned Israeli scholars will be integrated into the course curriculum. The course explores the changes in Israeli society as it moves from national ideological literature to the exploration of new multicultural media such as films and TV shows and thus gaining international fame and inspiring widespread emulation. The course may be repeated for credit. The course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

The course counts toward the minor in Jewish and Israel Studies.

CGST324 Cuban Literature and Film: Imagination, Revolt, and Melancholia
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

CGST325 Media in the Arab World: From TV and Film to Social Media (CLAC.50)
Media in the Arab world has undergone significant changes in recent times, with the emergence of new technologies, platforms, and voices across various mediums such as movies, newspapers, magazines, and social media. This course will introduce students to some of the main channels for the communication and expression of information in the Arab world today.

While television remains the most popular source of information - with channels such as Al-Jazeera even having an international audience - access to information has expanded to include online news websites and social media. Social media, in particular, has become an increasingly important source of information, especially among younger generations.

In this course, we will delve into the evolution and impact of media in the Arab world, exploring its role in shaping public opinion, identities, and narratives across different channels. We will look at movies, television series, and social media programs, as well as sources of traditional information, such as newspapers, magazines, and news broadcasts.

This course is open to students studying all levels of Arabic, but is particularly suited to students who have completed Intermediate Arabic as well as native speakers of Arabic.

Prereq: **None**

CGST331 Love and Suffering in Ancient Rome (CLAC .50)
In this CLAC course, students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

CGST334 Exploring Personhood in the 20th and 21st Centuries (CLAC 1.0)
The goal of this course is to provide a thorough examination of the concept of personhood in the 20th century by studying how it has been portrayed and understood in diverse cultural contexts across Arabic, English, and Francophone cultures. Through the use of comparative analysis and an interdisciplinary approach to cultural artifacts--such as works of literature, art, and religious texts as well as current debates around AI and personhood--students will explore how different cultures have approached the question of what it means to be a person and how this has evolved over time. By the end of the course, students will have a deeper comprehension of the various ways in which personhood has been created and perceived throughout different cultural and historical contexts.

The impact of historical occurrences and cultural movements on the construction of personhood, the influence of religion and politics or the fictional writing on conceptions of personhood, the representation of personhood in literature and art, and the emergence of AI as a new frontier in the investigation of personhood are some of the major topics covered in the course. This will open up new discussion topics about posthuman beings and persona status, particularly in science fiction.

CGST335 Politics, Revolutions and Visual Culture in the Post-Revolutionary Arab Societies
The course "Politics, Revolutions, and Visual Culture in Post-Revolutionary Arab Societies" critically investigates the interaction of politics, social revolutions, and visual culture in the aftermath of the Arab Spring. This course examines the dynamic interaction between political transformation, revolutionary movements, and the various forms of artistic expression in Arab countries.

Students will delve into the complex interplay between politics and visual culture through a combination of theoretical discussions, case studies, and visual analysis, gaining a nuanced understanding of how images, art, photography, film, and other visual media have shaped and reflected sociopolitical changes in post-revolutionary Arab contexts.

CGST340 Identity and "Pacha" (Land-Based Knowledge and Re-imagining Community) - Taught from Ecuador
This course is taught from Ecuador by our study abroad partner, Pachaysana.

According to indigenous Andean scholars, Pacha refers to the time-space continuum, or as the "everything around and inside us." This course asks students to challenge their identities by broadening their epistemological and ontological lenses to see their individual and collective lives as they relate to Pacha. To synthesize this complicated process, we ask participants to examine who they are as related to the ever-changing ecology in which they live. For this course, ecology is approached broadly, referring to the Greek origin on the word oikos, meaning home. We take advantage of our virtual exchange and examine home as an interconnection of how we relate to "place and space," exploring our ecology as the triad of our immediate territory (llakta in Kichwa), our surrounding natural environment (allpa in Kichwa), and our global and pluriversal space (pacha). Throughout the course, we use an interdisciplinary lens to examine "who we are" as related to this diverse understanding of ecology, taking into consideration that our ever-changing environment includes an ever-changing human story. Readings are transdisciplinary, coming from the fields of anthropology, sociology, human geography, gender studies, ethnic studies, history, the arts, and development studies. Toward the end of the course, after examining certain theories and case studies, we will imagine the reconstruction of our identities contextualized to pacha, space, place, ecology, oikos, and home.

CGST341 Critical Interculturality and the Pedagogy of Unlearning
This course is offered by our study abroad partner, Pachaysana, online from their site in Ecuador, with local educators.

An ever-growing number of students, scholars, and activists criticize our educational institutions for upholding colonial structures, and via numerous movements are calling for "decolonization." Any effort to decolonize our education must go well beyond the content of what we teach in the classroom. In addition to what we are learning, we must explore how we learn, where we learn, and with whom we learn. We also must think about what "decolonization" means, taking into consideration the lands on which our campuses and communities are located. This course addresses decolonization through the lens of critical interculturality, referring to Catherine Walsh's critique of multiculturalism as functional or relational interculturality. Bringing in readings from Indigenous and Latin American scholars and taking part in workshops facilitated by local Ecuadorian community members, we will use interactive methods to explore some of the most challenging concepts related to decolonization, including "decolonization is not a metaphor," epistemic justice, border thinking, and embodied methodologies. Those concepts will then be examined with regards to the realities on our college campuses and our communities, and we will begin to dream about moving from the "functional" to the "critical." By the end of the course, informed by the readings and interactions with community-based educators in Ecuador, students will formulate clear questions and identify potential strategies for applying critical interculturality at their college campuses.

CGST413 Israeli Cinema (CLAC 1.0)
This Hebrew course will be linked to the film course, taught in English, entitled CJST 250: Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema. This course is targeted toward students with very advanced knowledge of the Hebrew language. Students will mostly view the same films as the parent class, with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in format and themes of Israeli films. Scholar visits will be part of the course, and students will attend a few cultural enrichment activities. This course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative; for more information, see https://www.wesleyan.edu/cgs/eventsprograms/clac/index.html.
Offering: **Crosslisting**

CGST414 Israeli Cinema (CLAC 1.0)
This most advanced Hebrew course can be taken either as a language enrichment course to the parent course, CJS223: Israeli Women Filmmakers and Israeli Society, or taken by itself independently as an advanced Hebrew course. The focus of the course will be studying films made by female filmmakers. Students will analyze, discuss, and write on the films with special attention to mapping the cultural and social changes in Israeli society as well as changes in films' formats and themes. Conversing in Hebrew with Israeli film directors and scholars during Lunch and Learn Meetings as well as attending the screening of films in Hebrew in the 20th Annual Ring Family Wesleyan University Israeli Film Festival and writing reflective papers on films will provide a cultural and social framework for the course. In addition, the course will include special workshops delivered by renowned Israeli filmmakers and scholars. The course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check http://wesleyan.edu/cgs/eventsprograms/clac/index.html.

CGST480 Engaged Projects
Engaged Projects (EPs) are rigorous, self-designed endeavors in which a student studies a topic of their choice and completes a final project intended for a non-academic audience. Students are encouraged but not required to select a topic that is connected to another class or their major. Final projects can take the form of blogs, videos, a website, or other media; a work of art, an event, a workshop, a presentation, or panel; a policy proposal or analysis; a white paper or op-ed series; a business plan; and/or any other piece(s) thoughtfully designed for the public.

EP students will develop a self-directed research and project plan. They must enlist an EP Sponsor who will serve in an advisory/mentor role; Sponsors can be Wesleyan faculty, staff, alumni, or community partners; family members or friends; or other experts or professionals willing to play this role. Seeking and enlisting an appropriate Sponsor is a component of the EP learning experience.

In addition to conducting their own extensive research and producing a summative project by the end of the semester, students will write a series of reflections to document their progress and their learning.

For more information, visit https://www.wesleyan.edu/patricelli/engaged-projects.html.

HINDI-URDU LANGUAGE

HIUR101 Introduction to Hindi-Urdu Language and Culture I
This course is an introduction to the modern standard form of Hindi-Urdu, the most widely spoken language in South Asia, with its manifestation in deeply rooted cultural contexts. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film (in particular recent Bollywood songs) to reinforce structures and vocabulary.

The goal of this course is to provide students with a solid foundation in Hindi-Urdu grammar and vocabulary, as well as the cultural awareness and practical experience necessary for basic, yet accurate and appropriate, communication in spoken and written Hindi-Urdu. This course is designed to develop students' ability in the four skills of language learning. Students will learn to confidently navigate a range of common social and "survival" situations in Hindi-Urdu target cultures. Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

Core objectives include: the development of communicative and interactional abilities in Hindi-Urdu on familiar topics related to daily activities; the development of analytical competence (analysis of language, critical thinking, etc.) and learner autonomy through linguistic analysis and reflection; and the development of sociocultural/intercultural awareness governing language use according to the appropriate target cultural norms.
Offering: **Crosslisting**
Grading: **A-F**

HIUR102 Introduction to Hindi-Urdu Language and Culture II
This course is a continuation of Introduction to Hindi-Urdu Language and Culture I. It offers a balanced treatment of speaking, listening comprehension, reading, writing skills, and desi culture. Through scaffolding techniques, students will reach their potential zone of proximal development (ZPD), which is Novice-High, from their current ZPD, which is Novice-Mid.

At the end of the course, students will be able to communicate short, culturally appropriate messages on highly predictable, everyday topics that affect them directly. They will be able to produce lists and notes, primarily by writing words and phrases. They can provide limited formulaic information on simple forms and documents. These writers can reproduce practiced material to convey the simplest messages. In addition, they can transcribe familiar words or phrases, copy letters of the alphabet or syllables of a syllabary, or reproduce basic characters with some accuracy.

Students will get level-appropriate knowledge of the target culture, which is an essential ingredient of the course. All the material and activities will be presented through contextualized material. Students can understand key words, true aural cognates, and formulaic expressions that are highly contextualized and highly predictable, such as those found in introductions and basic courtesies. They will be able to understand words and phrases from simple questions, statements, and high-frequency commands.

Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

HIUR201 Intermediate Hindi-Urdu Language and Culture I
This course is a continuation of Introduction to Hindi-Urdu Language and Culture II, which emphasizes written expression and texts in both Perso-Arabic and Devanagari script systems and familiarity with cultures of the South Asian diaspora. The goal of this course is to provide students with an opportunity to build upon their knowledge of the Hindi-Urdu language and culture and bring them up to the intermediate low/mid-level in all four skills: reading, writing, listening, and speaking.

At the end of this course, students will be able to successfully handle a limited number of uncomplicated communicative tasks in straightforward social situations. Students will be able to produce some of the concrete exchanges and predictable topics necessary for survival in the target-language culture. These topics relate to basic personal information; for example, self and family, some daily activities and personal preferences, and some immediate needs, such as ordering food and making simple purchases. Students will also be able to ask a few appropriate questions, creating and writing statements and formulating questions based on familiar material.

As listeners, students will be able to understand simple, sentence-length speech, one utterance at a time, in a variety of basic personal and social contexts. They will develop accurate comprehension with highly familiar and predictable topics. Intermediate-mid listeners may get some meaning from oral texts typically understood by advanced-level listeners.

As readers, students will be able to understand short, noncomplex texts that convey basic information and deal with basic personal and social topics to which the reader brings personal interest or knowledge, although some misunderstandings may occur. Readers at this level may get some meaning from short connected texts featuring description and narration, dealing with familiar topics.

HIUR202 Intermediate Hindi-Urdu Language and Culture II
This course prepares students to achieve intermediate low-to-high level speaking, listening comprehension, reading, and writing skills. With a strong emphasis on achieving proficiency in spoken Hindi-Urdu, students are encouraged to speak Hindi-Urdu as much as possible, both in and outside of the classroom. Enrolled students are encouraged to form study groups that meet regularly outside of class to practice conversation in Hindi-Urdu and to learn nuances of the culture.

Students will work with a variety of web-based materials to learn songs; watch short film clips and advertisements; and read letters, dialogues, song lyrics, poems, and short stories in Hindi-Urdu. This course will introduce students to many aspects of Hindi-Urdu-speaking cultures through authentic language use, and students will also have the opportunity to participate in the Hindi-Urdu language learning community on campus.

Standard text, course materials prepared by the instructor, and authentic materials (contextualized in the target culture) available on the internet will be used with equal emphasis on spoken and written Hindi-Urdu. The structure and conversations will be prepared in a variety of authentic contexts of Hindi-Urdu. Students are also offered extensive exposure to spoken language emphasizing speaking and listening at normal speed with near-native pronunciation and intonation. By the end of this course, the students will be at the intermediate-high level of the ACTFL proficiency scale. At this level student are expected to converse comfortably in colloquial Hindi-Urdu on a wide variety of familiar subjects.

HIUR251 Hindi-Urdu Language and Culture for Heritage Learners
This course is specifically designed for heritage learners of Hindi and Urdu who have some proficiency in these languages. Such students may speak or merely understand the heritage language(s) and are, to some degree, bilingual in English and the heritage language.

The course can be tailored to the specific needs of learners of both Hindi and/or Urdu; the content of the course will be selected according to needs and requirements of each learner. For this purpose, a needs analysis will be conducted at the beginning of the semester to learn the students' proficiency level and interests.

As part of this class, students will not only learn the language and culture in the class but also get a chance to practice the language and familiarize themselves through language tables and a native peer from the target community. Students will visit cultural/community centers to get a feel for the language and culture in practice.

HIUR261 Advanced Hindi-Urdu Language and Culture for Heritage Learners
This course is specifically designed for heritage learners of Hindi and Urdu who have good proficiency in one or both of these languages. Such students may speak or merely understand the heritage language(s) and are, to some degree, bilingual in English and the heritage language.

The course can be tailored to the specific needs of learners of both Hindi and/or Urdu; the content of the course will be selected according to needs and requirements of each learner. For this purpose, a needs analysis will be conducted at the beginning of the semester to learn the students' proficiency level and interests.

As part of this class, students will not only learn the language and culture in the class but also get a chance to practice the language and familiarize themselves through language tables and a native peer from the target community. Students will visit cultural/community centers to get a feel for the language and culture in practice.

HIUR301 Advanced Hindi & Urdu Language and Culture
This course is specifically designed for the learners who want to advance their skills in Urdu and/or Hindi through reading and discussing authentic materials in poetry and prose. The main goal of the course is to improve your skills in both Urdu and Hindi languages, and you will also get opportunity to enhance your writing and creative writing skills in Urdu and/or Hindi scripts by completing various projects and assignments. The specific focus of each semester will depend on the background and interests of enrolled students.

HIUR302 HIUR 302: Advanced Hindi-Urdu Language & Literature II
The course is specifically designed for the learners who want to advance their skills in Urdu/Hindi through reading and discussing authentic materials including poetry and prose. Students will also get an opportunity to improve their academic writing and speaking skills. Through this course, students will read the classical and current Hindi/Urdu writers and will get an in-depth understanding of South Asian literary traditions. Material will include an anthology of various short stories, novels, selected poetry, and scholarly articles. The specific focus of each semester will be listed below under "Additional Requirements and/or Comments."

WORLD LITERATURE

WLIT207 Autobiographical Storytelling
How do filmmakers and writers negotiate memory, identity, and the author's voice to create original work drawn from life? Through analysis of a broad range of autobiographical narratives by experimental, documentary, and fiction filmmakers and writers, we will investigate various modes of working with personal source material, and explore the capacity and complexities of family and individual narratives to showcase diverse perspectives and interrogate assumptions about the self on screen. Inspired by the films and writing we will study, the creative work produced in this course may be drawn from a variety of sources: one's own lived experience, the lived experience of a family or community member, an event, a place, an artistic and/or cultural tradition. Thinking through the fluid nature of autobiography and the vast range of narrative possibilities for representing autobiographical material on screen

will be part of class discussions. In this reading- and writing-intensive course, students should expect to spend several hours reading and writing outside of class per week. For most class periods, students will use Perusall to read and annotate either scholarly articles or pieces of autobiographical writing, or to read and comment on their peers' screenplays via Google Drive. Weekly screenings and readings may include work by Pedro Almodovar, Chantal Akerman, Radha Blank, Julie Dash, Mati Diop, Nathalie Léger, Barbara Loden, Lucrecia Martel, Jonas Mekas, Nanni Moretti, Alice Rohrwacher, Céline Sciamma, Agnès Varda, and others. In addition, the course will include screenings and discussions of videographic criticism (e.g., audiovisual work that critically reappropriates existing works of film and media).

WLIT208 Anticolonial/Decolonial: Literature and Film
This course examines how histories of twentieth century anti-imperialist writing and cinema are relevant for contemporary decolonizing agendas. We will compare works by colonial and postcolonial theorists, writers and filmmakers, to examine how literature and film address processes of colonization, anti-imperialist struggle, decolonization, and neo-colonization. Readings will be drawn from a range of countries in both the Global North and South and films include Ousmane Sembène's La Noire de.../Black Girl (1966), Gillo Pontecorvo's The Battle of Algiers (1966), Sarah Maldoror's Léon G. Damas (1994), Stephanie Black's Life & Debt (2001), and Ciro Guerra's Waiting for the Barbarians (2019).

WLIT221 Place and Space in Literary Hangzhou
The city of Hangzhou is unique in the Chinese cultural imagination. As a former dynastic capital, Hangzhou is saturated with the intrigues of China's turbulent political and social history. But the city is also famous as a literary and cultural center--a prime leisure location along the Grand Canal; the site of the famous West Lake (just as famously compared to the mythically beautiful Xi Shi); and the setting for numerous poems, short stories, and dramas. This seminar explores the literary culture situated in and around Hangzhou, considering topics such as food, folklore, and tourism, in addition to the city's depiction in poems, short stories, and dramas. Our aim is to explore how the Chinese cultural imagination about Hangzhou--part of a broader imagining of the southern region of Jiangnan ("South of the Long River")--is built through these many layers of texts, histories, and spaces. With Hangzhou as our geographical focus, we consider materials from a range of genres (poems, short stories, dramas, folktales, historical anecdotes) and time periods (Song to late Qing, with reference to the present as well). We consider how the image of Hangzhou is built up throughout time, and how the literary culture in and of Hangzhou is interwoven with the "real" experience of the city as a space/place.

WLIT222 Chinese Theater and Drama
This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific actors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

WLIT223 Narrating China: Introduction to 20th- and 21st-Century Chinese Literature
This survey course introduces students to major literary movements in 20th- and 21st-century China through selective works by representative authors. It has two major aims: (1) It invites students to explore how individual authors--at different historical moments and in different social positions--have responded to historical changes that radically unsettled their senses of self and nation and also how their literary expressions may reveal the shifting subjectivity of modern China and Chineseness. (2) At the same time, it introduces students to the academic discipline of literary criticism, develops or deepens students' critical close reading and textual analysis, and invites them to discover the joy and reward of plunging into a reading experience and coming out with interpretations of their own making. While the course does attend to important historical flash points unique to Chinese history, it also explores literary themes that resonate globally, beyond the context of modern China. Varying slightly by semester, these themes could include the relation between politics and literature, revolution and revolutionary arts, alternative modernities, writerly authority and the individual self, gendered authorship, memory and trauma, ethnic governance and resistance, class divisions, ecological damages, labor migration, etc. This course assumes no prior knowledge of China or Chinese language, and all texts will be taught using English translations.

WLIT226 In Search of the Good Life in Premodern Japan
This course presents works of literature from premodern Japan to consider how people conceptualized and struggled to attain the good life. How did people's evocations of their ideals and desires reflect and engage with the historical

reality? How did their social status (such as a Buddhist monk, samurai, or a lady-in-waiting), occupation, and gender contribute to their aspirations as well as struggles? What were their strategies for not just survival but for fulfillment in periods of warfare or disasters? Works will encompass diary literature, essays, fiction, and poems from a variety of authors across most of Japanese premodern history. Practices such as the tea ceremony and works of art will also be discussed to fill out the cultural context.

WLIT228F Sex, Ghosts, and Cannibalism: The Chinese Short Story FYS
This course takes the passionate, the strange, and the peculiar--sex, ghosts, and cannibalism--as a lens through which to explore big issues in the history of Chinese literature and culture.

Focusing on short stories from the 7th to 21st centuries, we ask what fiction can tell us about the real concerns that shaped the lives of Chinese writers. How do literary depictions of sex and desire relate to social issues surrounding gender, power, and family? What do supernatural characters--hungry ghosts, lofty gods, unruly demons, seductive snakes, and fox spirits--reveal about the human world and belief systems used to make sense of unusual occurrences? What do motifs of cannibalism and related themes linked to bodies, consumption, hunger, and food tell us about the social and political changes China witnessed on its path toward becoming a modern nation-state?

As a First Year Seminar, this course is writing-intensive and is meant to equip you with the writing, reading, research, and presentation skills needed at Wesleyan. You will have numerous opportunities to write and revise your work, share your insights during class discussion, and practice the core skills of effective reading and interpretation.

All texts will be taught in English translation. No prior knowledge of China or Chinese language is required.

WLIT229 Gender and Power in Chinese Literature
This course explores the intersections of gender, power, and performance in Chinese society. Drawing on literary and historical sources, theories of gender and sexuality, and with reference to media forms such as theater and film, we assess the significance of gender as an analytical framework for studying Chinese literature, culture, and society. What power dynamics drive conceptions of gender and gender ideology in Chinese literature and history? And how do discussions around gender roles and sexuality change in the modern and contemporary periods? Course topics include: Chinese feminism; depictions of women in classical literature; gender roles, family, and marriage; conceptions of the body; constructing identities; women writers; the "new woman"; themes of cross-dressing; classical romance narratives; gender performance in Chinese theater; queer narratives; and more.

WLIT230 Contemporary Korean Cinema and Society
This course offers an in-depth exploration of contemporary Korean cinema from the late 1990s to the present, emphasizing its intricate relationship with societal issues. Students will engage with a diverse array of films that not only demonstrate the artistic innovations of Korean filmmakers but also reflect the dynamic sociopolitical landscape of South Korea. Through guided analyses of film texts, we will employ various critical perspectives, including auteurism, national cinema, cultural studies, and genre theory, to enhance our understanding of cinematic narratives. A central focus of the course will be the examination of how gender, sexuality, and identity are portrayed in contemporary Korean films. Additionally, the course will investigate the impact of economic factors and transnational influences on the production and reception of Korean cinema, including the rise of genres such as "K-horror" and the rhetoric of transgressive violence. All films will have English subtitles, and all readings will be available in English; no prior knowledge of Korean film, history, or culture required. Join us on this captivating cinematic journey as we explore the intersections of films and society in contemporary Korea.

WLIT231 The Fantastic and the Nonhuman in Pre-modern Chinese Literature
What defines the human and the humane, and how have "the human" and its many "others" been imagined throughout pre-modern Chinese history? This course explores a fascinating range of Chinese literature dealing with the fantastic and supernatural, from ancient times to the late imperial period. We will delve into captivating stories of gods, ghosts, seductive creatures, and alluring objects, investigating the boundaries of humanity and the rich spectrum of subhuman, superhuman, and nonhuman beings. Key themes include the interplay between the supernatural, gender, and sexuality, and how these narratives either reinforce or challenge traditional hierarchies and social norms. Through these stories, we will discover how pre-modern Chinese literature reflects, questions, and reimagines those cultural values and beliefs.

WLIT240F Russian Masterpieces: Great Short Works (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments and polishing grammar and style, will inform students' own writing. We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Nikolai Gogol's surreal comedies and urbanistic fantasies; Anton Chekhov's subtle psychological tales; Ivan Bunin's reflections from exile on a lost Russia; Mikhail Bulgakov's sketches of life as a country doctor; Evgeny Kharitonov's experimental narratives of queer experience in a totalitarian society; and Lyudmila Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period. All readings in English translation. No knowledge of Russian is expected.

WLIT241 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.
Offering: **Crosslisting**

WLIT242 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

WLIT243 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

WLIT244 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

WLIT245F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

WLIT246 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern

civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries. The Soviet project raises fundamental questions about political systems, economics, and human nature -- questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

WLIT247 Don Quixote: How to Read the Ultimate Novel
No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

WLIT248 Not Just Neorealism: Italian Cinema, Its History and Politics
This introductory course on Italian cinema, taught in English, investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of the auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others. Additional material includes readings in film theory and criticism, Italian history, literary sources, screenplays, and interviews. For interested students with advanced competency in Italian, there will be a .50 credit (CLAC) discussion section, ITAL245/CGST245, at a time to be determined but very likely after our second class of the week. Italian and Romance Studies Majors, please see additional comments below.

WLIT249F Love, Sex, and Marriage in Renaissance Europe (FYS)
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

WLIT249Z Love, Sex, and Marriage in Renaissance Europe
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, the Italian Peninsula, the Low Countries, Portugal, Spain, and Sweden. (N.B. Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the

maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about "homosexual" love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how have contemporary (21st-century) writers reimagined Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

WLIT250 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

WLIT251 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

WLIT252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

WLIT253 Gods, Heroes, and Chaos!: An Introduction to Greek and Roman Mythology
This class will dive into the wild and tumultuous world of ancient Greek and Roman mythology to begin to understand its impact on culture and identity in both the ancient and modern world, reading primary source literature, looking at iconography and material culture, and studying later examples of mythological reception. Primary sources span mythical stories of the creation of the universe and the gods themselves; the dramatic exploits, interrelationships, and depictions of the gods; the careers of major heroes and heroines; and the myth of the Trojan war and its long aftermath. While we read ancient works, we will discuss the impact of mythology on religious and cultural practices, history, cultural identity, art, politics, and day-to-day life. We will also discuss the enduring influence these myths have on modern culture -- for better and for worse -- in today's politics, culture and art. Students will acquire mythological literacy, to understand the language of myth itself in both the ancient and modern world, to be able to read the impact myth continues to have on the way we define the natural world, the divine, and humanity's place in the universe. This course counts towards the Literature and Performance track of the Classics major.

WLIT255Z Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Russian Empire, the Soviet Union, and contemporary Russia and Ukraine. Students will learn the key works, names, events, and concepts of the Russian and Soviet cinematic traditions. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film and media studies. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. No knowledge of Russian is expected or required. All films have English subtitles.

WLIT256 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

WLIT257 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

WLIT259 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's Trans-Atlantyk and Aleksandar Hemon's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

WLIT261 Cuneiform to Kindle: Fragments of a Material History of Literature
This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries,

editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

WLIT263 Tolstoy: War and Peace and Other Works
Lev Tolstoy (1828-1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

WLIT264 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

WLIT265 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists¿the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild¿s Violin," and "The Lady with a Lapdog."

As one of Chekhov¿s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov¿s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

WLIT266 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

WLIT268 When the Empire Strikes Back: (Post) Colonial Theory and Fiction
Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

WLIT271 Mahabharata and Ramayana: The Sanskrit Epics and Indian Visual Culture
This course explores the complex interface between literary texts, painted illustrations, and visual performance traditions in South Asia, taking as our primary focus the two great Sanskrit epics, Mahabharata and Ramayana. Both epics will be read in abridged translation to provide familiarity with the overall narrative structure and thematic concerns of the two texts, and a number of excerpts from unabridged translations will be studied in detail to arrive at a fuller understanding of the contents of key episodes and of the style and texture of the two works. The first part of the course addresses a series of questions pertaining to the literary versions of the two epics: What is epic as a genre, and what are its social roles? Do the Mahabharata and Ramayana manifest similarities that permit us to identify a distinctive Indian epic type? What are the connections between these epics and the early history of India? Why, and how, did the written texts we have today come to be redacted from bodies of oral tradition? In the second part of the course, we will consider the visual manifestations of the Sanskrit epics in the form of painted manuscript illustrations, classical Sanskrit plays (known literally as "visual poetry"), later performance traditions such as Kutiyattam, and, finally, selected films of the Hindi- and regional-language cinemas. This course requires no prior knowledge of Indian literature, history, or art and may serve as an effective introduction to the culture and civilization of South Asia.

WLIT273 Tibetan Religion
This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. It will also examine the lesser-known communities of Tibetan Muslims and Christians inside Tibet and in exile. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

WLIT281 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

WLIT282 Introduction to the New Testament
The purpose of this course is to provide an introduction to those writings of the earliest Christians that came to be included in the Bible. These writings will be examined critically with respect to their social-historical origin, religious

content, and place within the development of ancient Christianity. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will therefore focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, having as one of the chief aims of the course the acquisition of critical skills in reading and understanding the Bible. In the process we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

WLIT301 Global Film Auteurs
This course offers a comparative introduction to film auteurs from around the world spanning the 1930s to the present day. Our aim is threefold: to analyze the narrative and stylistic tendencies of each filmmaker while considering their work in a historical, cultural, and industrial context; to develop our film analysis skills via formal comparison; and to consider the formation, redefinition, and influence of film canons. Emphasis will be placed on describing and analyzing the functions of narrative and stylistic elements and their effects on the viewing experience. Each week will include two film screenings, a lecture, and a discussion. Screenings will include films directed by Andrea Arnold, Julie Dash, Fernando Eimbcke, Don Hertzfeldt, Krzysztof Kieslowski, Akira Kurosawa, Steve McQueen, Jafar Panahi, Satyajit Ray, Ousmane Sembène, Céline Sciamma, Wong Kar-wai, Agnès Varda, Yim Soon-rye, and Zhang Yimou, among others.

WLIT321 The Legacy of World War II in Postwar Japan
In 1956, the Japanese Economic Planning Agency famously declared, "The 'postwar' is over." Indeed, by that time, the national economy had made a remarkable recovery since the end of World War II. Others place the end of the postwar with Emperor Hirohito's death in 1989. The new Reiwa era might be another marker. Still, was the postwar truly over for Japan? This seminar aims to tackle this dilemma of the postwar and assess how the war and the American occupation are remembered by the Japanese, and how they continue to reverberate politically and culturally, nearly 70 years after Japan regained its independence.

WLIT324 Cinema and Moviegoing in American Chinatowns: Digital Tools and Storytelling
In the latter decades of the twentieth century, movie theaters dedicated to the screening of Chinese-language cinema dotted Chinatowns and Chinese ethnoburbs across the United States. What historical and economic forces explain the development of these unique exhibition sites, and how can we understand their social and cultural impacts? This seminar explores the production, distribution, and exhibition of Chinese-language films for overseas audiences and the moviegoing cultures that emerged around cinemas in Chinatowns and Chinese ethnoburbs. Units will explore Chinese immigration to North America, the establishment of Chinatowns, and early cinema spaces; Chinese immigrant and American-born Chinese filmmaking pioneers, the growth of "Chinese Hollywood," and challenges to Hollywood's dominant representations of Chinese characters and communities; the significance of diaspora audiences for Hong Kong movie studios and the creation of affiliated film distribution chains in the US; the expansion of Chinese-language cinemas in the 1960s and 1970s; the Mandarin and Cantonese films seen by overseas audiences and their range of appeals; and the social and cultural functions served by Chinese-language movie theaters. Students will learn qualitative and quantitative digital tools for film history research and use them to analyze original data sets, visualize research results, and create interactive GIS maps, storymaps, digital timelines, databases, web pages, oral histories, and other digital work related to cinema and moviegoing in American Chinatowns.

WLIT325 Native Matters: Materiality in Indigenous Literatures Across the Pacific
This seminar contemplates the function and representation of materiality in contemporary indigenous literatures. It highlights the centrality of embodied practices in indigenous cultural lives. The primary texts for the course will be literary texts (novels, short stories, essays, and poems) from different indigenous communities, including from North America, East Asia, Austrasia, and Oceania. We may also deal with non-textual materials such as artifacts, maps, clothes, video games, etc. Readings will also include theoretical or philosophical works from indigenous and non-indigenous thinkers on the subject of materials and materiality. The course will thematize materiality in two ways: the first is to understand materiality as a way for indigenous authors to represent or construct various understandings of indigeneity, either in traditional lifeways, modern indigenous realities, or indigenous futurisms, both within and between specific indigenous communities. The second is to engage with thing theory and materiality as a method of literary analysis.

WLIT326 Contemporary East Asian Cinema
This is a seminar on comparative narrative and stylistic analysis that focuses on contemporary films from Hong Kong, Taiwan, China, South Korea, and Japan, regions that have produced some of the most exciting commercial and art cinema in the last thirty years. We will begin by examining the basic narrative and stylistic principles at work in the films, then broaden the scope of our inquiry to compare the aesthetics of individual directors. Our goals are to analyze the narrative and stylistic tendencies of filmmakers while considering their work

in a historical, cultural, and industrial context, and to develop our film analysis skills via formal comparison. Films from Bong Joon-ho, Fei Mu, Hong Sang-soo, Hou Hsiao-hsien, Kitano Takeshi, Kore-eda Hirokazu, Jia Zhangke, Jeong Jae-eun, Kon Satoshi, Lee Chang-dong, Mizoguchi Kenji, Ozu Yasujiro, Suo Masayuki, Tian Zhuangzhuang, Johnnie To, Tsai Ming-liang, Tsui Hark, Wai Ka-fai, Wang Xiaoshuai, Wong Kar-wai, Yim Soon-rye, Yoon Ga-eun, Yuen Kuei, and others will be featured.

WLIT327 Hong Kong Cinema
This course offers an introduction to the dynamic history of Hong Kong cinema from 1960 to the present day. The course will acquaint students with Hong Kong's major films, genres, directors, and industrial trends; explore the factors that enabled the Hong Kong film industry to become a regional and global powerhouse; and consider the reasons behind the contraction of the industry since the mid-1990s and the outlook for Hong Kong cinema's future. Screenings will feature the films of Fruit Chan, Jackie Chan, Peter Chan, Chang Cheh, Mabel Cheung, Tony Ching Siu-tung, Chor Yuen, Stephen Chow, King Hu, Ann Hui, Michael Hui, Stanley Kwan, Andrew Lau & Alan Mak, Li Han-hsiang, Lo Wei, Johnnie To, Cecille Tong, Tsui Hark, Wang Tian-lin, Wong Kar-wai, John Woo, Corey Yeun Kwai, Toe Yuen Kin-to, and others.

WLIT333 Storytelling in Japan's Empire (and its Aftermaths)
This course introduces different forms of storytelling in the Japanese Empire (1868-1945), and considers how the ghosts of Empire continue to haunt storytelling in the postwar era (1945 ~), as well. By considering texts (in English translation) produced by different individuals navigating everyday life in disparate locations across the Empire (including Korea, Taiwan, and the "home islands" of Japan itself), the course aims to move beyond historical timelines of "big events" and introduce the material realities and struggles, the complexities and contradictions of everyday life under Empire. Although it certainly takes up literary "texts" in the traditional sense of short stories, novels, and poetry, the course understands storytelling as occurring through a range of mediums, including film, music, and manga/graphic novels. By considering a disparate selection of literary, musical, and filmic stories from this period, it strives to attend to some of the contested and competing desires of individuals and entities seeking to navigate conditions of empire, colonialism, and war.

WLIT340 The Mediterranean Archipelago: Literary and Cultural Representations
"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands -- both fictional and real -- as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevitc's statement that "the Mediterranean is not only geography," we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto's Island of Alcina to Goethe's Capri), narrative stratagem (from Homer's Phaeacia to Boccaccio's Rhodes), literary protagonist (from Deledda's Sardinia to Murgia's Sardinia), political concept (from Plato's Atlantis to Campanella's Taprobane), and existential condition (from Cervantes's Cyprus to Cavafy's Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands' inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

WLIT341 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

WLIT342 Dante in His World: Politics, Poetry, Religion
Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante's own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

WLIT376 Foundations of Playwriting from the Global South
Cimientos (Spanish for "foundations") is a play development program run by NYC-based Latinx theater company IATI Theater. Since 2001, this program has showcased authors from around the world. However, in most recent years, the experience of working with playwrights from Argentina, Chile, Colombia, Mexico, Kenia, and Uganda has opened up the possibility of addressing playwriting as a deterritorialized praxis in which political, thematical, and historical discussions intertwine with shared aesthetics and new forms to understand theater in the Global South. In this workshop-seminar, students will analyze canonical texts and unpublished plays from contemporary authors based in the Global South to participate in the discussion of decolonizing playwriting. Students will analyze critical scholarship on the Global South to trace a contemporary South-South relationship within playwriting as a literary and political device. Authors from the Cimientos program will join the class as guest speakers to prompt students to develop creative writing techniques. Students will present a draft of a short play that integrates the material covered in class.

WLIT377 Ancestral Writings: (Re)Tracing AfroCaribbean and Indigenous Frameworks for Creative Writing
Coined by Puerto Rican author Mayra Santos-Febres, "ancestral writing" elicits a reconceptualization of creative writing and its techniques from the point of view of our ancestors in Latin America, more particularly, the Afro-diasporic and indigenous. In this course, students will explore theoretical, literary, and cinematic material that encourages decentralizing creativity and writing as a political praxis. Concepts such as the ch'ixi in Aymara culture and biocultural memories from Andean indigenous nations will work as points of departure to develop decolonizing, anti-imperialist, and anti-racist writing techniques. Guest speakers, who include specialists in the Quechua language and Afro-Caribbean folklore, will encourage students to (re)formulate techniques for their creative writing. Students will analyze texts by Silvia Rivera Cusicanqui, Mayra Santos-Febres, Odi Gonzales, Frantz Fanon, Guaman Poma, Elicura Chihuailaf, and Solimar Otero, among others. Students will present a creative writing piece that puts into practice the material studied in class.

WLIT395 A Wesleyan Student's Guide to Fascism: The Case of Modern Japan
"Fascism" is a term that is frequently encountered in social and political discourse. But what does this term actually mean? How can we conceive productively of different fascisms across different historical moments and (geo)political contexts--including our own? This course will consider fascism in modern Japan, and address the economic, (geo)political, social, and cultural circumstances that incited what we will call "fascist desire" in Japan's imperial moment and beyond. But while the specific experiences and characteristics of historical fascisms are informed by the unique contexts within which they unfold, including Japan's, fascism as phenomenon can never be reduced to national or cultural particularities, or confined to isolated historical moments. As one possible reaction to the experiences of modernity, that is, the specter of fascism is always with us, everywhere. By engaging with primary and secondary texts--scholarship, music, literature, film--that variously analyzed, challenged, bolstered, and critiqued fascism in the context of modern Japan, students will learn to recognize the specter of fascism in their own lived, everyday contexts, and grow in their ability to confront and counter the conditions and desires that help nourish it.

GERMAN STUDIES

Interdisciplinary in nature, the academic field known as German studies has undergone rapid development in recent years. At Wesleyan, the German Studies Department takes an active part in internationalizing the curriculum, educating students for a world in which a sophisticated understanding of other cultures and their histories has become increasingly important. A background in German studies can prepare students for careers in many fields. Among them are teaching, translation, publishing, arts administration, journalism, law, international business, and library sciences. German studies also prepares students for graduate study in literature, linguistics, philosophy, art history, history, psychology, the natural sciences, music, and other disciplines. At every level, the department’s courses taught in German stress the four basic skills: reading, writing, listening, and speaking. These courses develop students’ awareness of how language functions to convey information, express emotions, and communicate thought. The department’s courses taught in English focus on the specific historical experiences of German-speaking countries and the contributions of those countries to many realms of human endeavor. These courses often raise the question of translation, asking how successfully cultural phenomena specific to a particular place and time can be expressed in another language.

The topics of courses offered by members of the department and the affiliated faculty include German literature from the 18th century to the present, philosophy, literary theory, art history, German film from its origins to the present, political science, environmental studies, and history. A number of courses, taught in English in other departments, are cross-listed and can be counted toward the major.

For more information about German Studies, please visit our department website. (http://www.wesleyan.edu/german/)

GERMAN LITERATURE IN TRANSLATION

GELT230F The Simple Life (FYS)
As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GELT239 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GELT279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GERMAN STUDIES

GRST101 Elementary German
This course is an introduction to German and leads to communicative competence in German by building on the four primary skills--speaking, listening, reading, and writing--while developing participants' awareness of life and culture of German-speaking countries. Learning German and its structure will also enhance students' awareness of commonalities between the English and the German languages. The GRST101/102/211 course sequence will help students appreciate that contemporary Germany is economically and politically the leading country in the European Union and has a dynamic, multicultural society. The German language opens vistas into a world of ideas that is as complex as it is elemental. It provides access to many fields, from philosophy to the natural sciences and many disciplines between: history, musicology, art history, and environmental studies. These three courses prepare students to study abroad in Germany, on one of the two Wesleyan-approved programs in Berlin and Hamburg or continue with GRST212 here at Wesleyan.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **HA-GRST**

Prereq: **None**

GRST102 Elementary German
This is the second part of the two-part sequence in Elementary German (see GRST101). Students will continue their study of the four primary skills--speaking, listening, reading, writing--plus German grammar and culture. They will read a variety of authentic texts, listen to native speakers, handle everyday conversational situations, and write short compositions. At the end of the semester, students will write, perform, and videotape a skit based on the material learned this semester. GRST211 is the course following GRST102. Students who take GRST211 can apply to study abroad in Germany on one of Wesleyan's approved programs in Berlin and Hamburg or continue with GRST214 here at Wesleyan.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST101**

GRST211 Intermediate German
This course typically follows GRST101 and 102 and increases students' proficiency in the German language while they learn about different cities and regions in the German-speaking world. Working collaboratively, students engage in cultural activities with authentic readings and contextualized grammar in a unifying context. Through exposure to a variety of texts and text types, students develop oral and written proficiency in description and narration, as well as discourse strategies for culturally authentic interaction with native speakers. Classes focus on active use of the language. Film, music, and other audio clips are regularly integrated into the course to increase students' listening comprehension. Through regular writing assignments, students expand their vocabulary and practice varied styles and techniques. Among the course goals are improved communication and reading skills, an expanded vocabulary, more accurate and nuanced written expression, and increased insight into historical and cultural features of the German-speaking world. After the successful completion of this course, students can study abroad through Wesleyan's approved German programs in Berlin and Hamburg or continue with GRST212 at Wesleyan.

Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST102**

GRST212 Practice in Speaking and Writing German
This course is designed to build and strengthen skills in oral and written German. It functions as a bridge between the basic language series (GRST101&102 and 211) and the more advanced literature/culture courses. This course extends the focus on language and culture through reading, interpreting, and discussing longer German texts (including poems and short stories) begun in GRST211. Moreover, students will research various aspects of the history and culture of Germany and gain practice writing about and presenting the results of their research. Grammar instruction and review as well as vocabulary-building are integral parts of this course, since mastery of the structures of German will facilitate students' ability to express more complex ideas. We will supplement the textbook with additional readings, music, and films. Class discussion will be conducted in German.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **HA-GRST**
Prereq: **GRST211**

GRST213 German Culture Today
Readings, class discussion, and written work will be based on current and recent events and developments in Germany. Topics will include Germany's place in the new Europe and the world, Germany as a multicultural society, and German contemporary culture. The course will provide extensive practice in speaking, reading, listening, and writing in German and using literary and nonliterary texts, as well as audio and visual materials. Structured conversation, debates, and analysis of different types of texts, along with writing assignments in a variety of genres, will strengthen proficiency in German and prepare students for 300-level courses. This course can be taken either before or after study in Germany.

GRST224 The Holocaust in Contemporary Popular Culture
How to describe the indescribable and to speak the unspeakable? Long after the end of World War II, filmmakers still grapple with these questions, and their answers vary ethically and aesthetically. This course will discuss depictions of the Holocaust in contemporary popular culture. We will touch on graphic novels, TV sketches, and social media, but mainly focus on film. While the time frame will be limited to mainly the last two decades, we will explore a vast range of texts including: Hollywood fare and East European art-house movies; gritty dramas and dark comedies; reenactments of real-life events and alternative history. From Hipster Hitler to the Jojo Rabbit, from "Inglorious Basterds" to "Son of Saul," what all these examples share is an artistic and thematic audacity. We will examine how they try to propose new and unsettling answers to old but ever-vital questions: How did the Holocaust happen and might it happen again?

GRST227 Criticism and Psychoanalysis
This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

GRST230F The Simple Life (FYS)
As the human population grows toward nine billion and our planet's carrying capacity comes under increasing pressure, many observers believe the human project itself is at risk. What human beings have accomplished is probably unique in the history of the universe; once lost to war, famine, and ecological collapse, the understandings and physical creations of our cultures will be irrecoverable. We must ask ourselves, with considerable urgency, the following questions: How do our values, our economic systems, and our behaviors--as individuals, groups, societies, and cultures--affect the conditions under which we, future generations, and the plants and animals with which we share the earth might live in the future? To what extent and at what cost can technology enable us to adapt to changes already under way? Should we take an "après moi, le déluge" attitude or try to prolong the life of our species, and if so, in what form? Does the so-called simple life, as conceptualized in different times and places, offer any useful models? Does living "green" make sense? What about environmental (in)justice? This course will draw on texts from a variety of periods and disciplines, written in a range of styles and from many perspectives, to examine how these questions and others can be approached. Creative thinking will be strongly encouraged. We will pay particular attention to contemporary sustainability initiatives and threats to the environment in the present moment.

GRST231 Reading Theories
In this survey of theories that have shaped the reading of literature and the analysis of culture, emphasis is on key concepts--language, identity, subjectivity, gender, power, and knowledge--and on key figures and schools such as Marx, Freud, Nietzsche, Saussure, Barthes, Gramsci, Benjamin, Althusser, Foucault, Lacan, Deleuze, Jameson, Berlant, Moten, postmodernism, and U.S. feminism.

GRST232F Marxism and Abolitionism (FYS)
This course explores the historical encounter of Marxist revolutionary theory, with its roots in German idealism (Kant, Schiller, Fichte, Hegel), and abolitionist causes. How have abolitionist movements historically informed, expanded, and challenged Marxist theory and its tactical playbook? What made Marx a touchstone for so many black revolutionary thinkers, including W.E.B. du Bois, Franz Fanon, C.L.R. James, and Angela Davis? How have anticommunist, racist, security-statist ideologies been mobilized to undermine and defeat transformative social movements? We will begin with the Haitian Revolution and work our way through the abolition of slavery in the US and the anticolonial and civil rights struggles of the mid-20th century to the prison abolition movement today. In addition to the above mentioned authors, readings will include Toussaint L'Ouverture, Frederick Douglass, Ottilie Assing, V.I. Lenin, Rosa Luxemburg, Georg Lukács, Max Weber, Martin Luther King, Jr., Herbert Marcuse, and the Combahee River Collective.

GRST233F Holocaust Remembrance in Germany: The Third Generation (FYS)
Remembering the Nazi past is a fundamental aspect of postwar German culture. In this course, we will trace the Holocaust's aftermath in contemporary German literature and thought. We will pay close attention to the socio-cultural and historical-political changes in attempts to glean new meanings from a past that is both omnipresent and highly evanescent. It will be our particular concern to encounter versions of Jewish identity and attempts to prescribe different narratives. We will focus especially on contrasting the creative works of the immediate postwar period and "the third generation." These contemporary writers explore a historical trauma that has become an integral part of specific Jewish-German identity. At the same time, their temporal and personal distance to the actual events necessitates new imaginative approaches to the past. Careful readings of literary, theoretical, journalistic, and historical texts, as well as personal discussions will enable us to critically think about the challenges and limits of how to write about the Holocaust 70 years after it occurred, and how the difficulties in doing so might inform other kinds of writing about historical and personal trauma. Students need to read Olga Grjasnowa's "All Russians Love Birch Trees" prior to the start of the course. Students will have Zoom class discussions and intensive peer-feedback-driven writing practice.

GRST234F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

GRST238 Bauhaus: Art, Craft, Design
This seminar examines the theory and practice of the Bauhaus, the most influential art school of the 20th century. The Bauhaus proposed a radical concept: to reconstruct the material world of war-torn Europe to reflect principles of unity in the arts and within all world cultures. In the 15 years of its existence, from 1919 until 1933, the Bauhaus underwent many changes, including moves from Weimar to Dessau and Dessau to Berlin, as well as the reorientation of its curriculum away from craft and towards industrial production. Throughout, its activity was defined by a series of tensions, between fine and applied arts and between form and function. Attracting men and women from Western and Eastern Europe, the Americas, and East Asia, the Bauhaus adopted an international and gender-inclusive orientation from the beginning, even as gender inequalities persisted. After the school's forced closure in 1933 by the National Socialists, many of its teachers and students left Germany to found art schools throughout the globe, and its core principles continue to shape art pedagogy and practice today, above all its a commitment to experimental learning in de-hierarchized workshops. This course will examine the origins, core products and theories, and afterlife of the Bauhaus.

GRST239 Modernism and the Total Work of Art
The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

GRST241 Introduction to European Avant-Garde, 1880-1940
This course introduces students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism's relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

GRST249 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

GRST250 Cultural Criticism and Aesthetic Theory: Walter Benjamin and Theodor Adorno
This seminar introduces and explores the cultural criticisms and aesthetic theories of Walter Benjamin and Theodor Adorno, two of the 20th century's most notable Marxist thinkers and critics. Our aim will be to illuminate the intimate interconnections between cultural criticism and aesthetic theory taking

place concurrently with the rise of the artistic avant-gardes (with which both thinkers felt deep affinities). We will study the intellectual origins, cultural contexts, methods, and critical aims of Benjamin's and Adorno's uniquely individual yet also closely related practices of cultural criticism. Further, we will examine the assumptions underlying their aesthetic writings and seek to reconstruct their respective contributions to aesthetics.

Over the course of the semester, we will study the works of our protagonists both on their own terms and in comparison to each other. Major thematic units will include (but are not limited to) their writings on literary aesthetics, narrative, and translation; architecture and the city (Naples, Moscow, Paris, Berlin); landscape and nature; mass culture and aesthetic autonomy. Our starting point will be Georg Lukács's Theory of the Novel, a work to which both Benjamin and Adorno were much indebted. On occasion, we will supplement our explorations with asides from the 1920s and 1930s (by Alfred Sohn-Rethel, Siegfried Kracauer, Bertolt Brecht, Asja Lachs, Ernst Bloch) as well as scholarship for optional reading (by Susan Sontag, Hannah Arendt, Fredric Jameson, Susan Buck-Morss, Miriam Bratu Hansen, Susan Ingram, Judith Butler, Esther Leslie).

GRST251 Kafka: Literature, Law, and Power
Elias Canetti claimed that among all writers, Kafka was "the greatest expert on power." In this course we will focus on Kafka's narratives of power relations. We will read and discuss Kafka's sometimes painfully precise descriptions of how power is exerted in the family and in personal relationships and how scrutiny and discipline are exercised over the body. We will also consider Kafka's depictions of physical violence and of apparatuses and institutions of power and the ethical and political implications of these depictions. The working hypothesis of this course is that Kafka not only tells stories about power, but that his stories also contain an implicit theory of how power works in modern society.

GRST252 From Caligari to Hitler: Weimar Cinema in Context
This course offers a critical introduction to German silent and sound films from 1919 to 1932. It will test the thesis of Siegfried Kracauer's classic study that expressionist films in particular prepared the way for Hitler's rise to power. The focus will be on canonical films of the era including THE CABINET OF DR. CALIGARI, NOSFERATU, and THE LAST LAUGH (Murnau); METROPOLIS and M (Fritz Lang); and THE JOYLESS STREET and PANDORA'S BOX (Pabst). Some attention will also be given to films made at the ideological extremes of Weimar culture: KUHLE WAMPE (with a screenplay by Brecht), Leni Riefenstahl's THE BLUE LIGHT, and Pabst's THREEPENNY OPERA. Readings will include screenplays, essays, and reviews from the period as well as selected literary works such as Brecht's THREEPENNY OPERA and Irmgard Keun's novel THE ARTIFICIAL SILK GIRL.

GRST259 Criticism and Marxism
This course introduces students to the Marxist (or historical-materialist) tradition, with an accent on its centrality to interpretative methods in literary studies and to related fields in the human sciences. We will study foundations, beginning with Marx and Engels, and our reading will carry us through the range of Marxisms that inform contemporary critical practice. We will focus on historical materialism as a style of dialectical thought, uniquely equipped to grasp both our immediate objects of study (literary texts and other cultural productions) and the social forces through which those objects are determined. In the same dialectical mode, we will reflect often on the relation between our work in the classroom and our contemporary social and historical situation. Students with an interest in literary and social theory will benefit from the course, as will students who know a little bit about Marxism but want to understand the logic of this crucial body of thought.

GRST261 Reading Nietzsche
Friedrich Nietzsche, trained philologist and self-proclaimed "free spirit," remains one of the most controversial figures in modern thought, a source of fascination and outrage alike. Best known as the philosopher of the "Dionysian," the "will to power," the "eternal return of the same," the "transvaluation of all values," and the "over-man," Nietzsche also proudly considered himself the most accomplished prose stylist in the German language. In this course, we will examine two closely interrelated issues: (1) the genesis of Nietzsche's major philosophical thoughts in the areas of epistemology, aesthetics, ethics, and the critique of religion, from his earliest to his latest writings; (2) the cultivation of a philosophical style that, in its mobilization of highly artistic modes

of aphoristic reduction, metaphorization, personification, and storytelling, aspires to turn critical thinking into a life-affirming art form. The course will combine philosophical interpretation with textual analysis. No prior knowledge of Nietzsche's works is expected; however, a willingness to set aside significant chunks of time to dwell in Nietzsche's texts is required. Students with reading knowledge in German are encouraged to read at least some of the assignments in the original. Guidance in doing so will be provided based on individual need.

GRST263 Inside Nazi Germany, 1933--1945
This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

GRST264 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933
Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

GRST266 Ethics After the Holocaust
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

GRST266F Ethics After the Holocaust (FYS)
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

GRST267 Losers of World War II
This course explores the experiences of Germany and Japan in the postwar era. These countries faced the dual challenge of making political transitions to democratic government and recovering from the economic ruin of World War II. Japan and Germany both were occupied and rebuilt by the United States, and both were blamed for the devastation of the war. How did Japan and Germany respond to being cast as worldwide villains? How strong were the democracies that developed? This course explores these questions by comparing the culture, history, and institutions of these two countries.

GRST268 Foundations of Critical Theory: Marx, Nietzsche, and Freud
This course serves as an introduction to the main ideas of Marx, Nietzsche, and Freud, and their distinct yet similar techniques of interpretation. Michel Foucault once claimed that Marx, Nietzsche, and Freud "have changed the nature of the sign and modified the fashion in which the sign can in general be interpreted" -- which means that they changed the way in which we interpret and make sense of the world and of ourselves. Marx did so by leading his readers, in Capital, to "the hidden abode of production" where "the secret of profit-making must at last be laid bare;" Nietzsche did so by inviting his readers, in his Genealogy of Morality, to "go down and take a little look into the secret of how they fabricate ideals on earth;" Freud did so by teaching that we cannot know ourselves and are hence "not the master in our own house."

This course is designed to make critical theory and contemporary discourses in the humanities and social sciences more accessible by providing the modern historical and philosophical foundations for key critical concepts such as interpretation, subject/agency, history, origin, society and social power, value, modernity, capitalism, socialism, and religion/morality. We will explore some of the most influential writings of the respective authors in a comparative manner and, thus, come to a better understanding of the genesis of critical modern thinking.

GRST269 Modern Aesthetic Theory
As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebility of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

GRST270 Theories of Fascism
Fascism came out of the horrors of the First World War and drove the world into the even greater horrors of the Second World War. Arguably, however, fascism is more ubiquitous and elusive than historical dates suggest: it was prefigured in how early-modern authoritarian leaders agitated the masses (as analyzed by Max Horkheimer), in France's Second Empire Bonapartism (as analyzed by Karl Marx), and in Richard Wagner's intoxicating spectacle of the total work of art (as analyzed by Friedrich Nietzsche, Charles Baudelaire, Theodor Adorno, and many more). After fascism as a political movement was largely defeated, its theoretical value for understanding race, class, gender, and sexual domination in late-capitalist societies only increased, albeit in a fractured and often hazy way. Over the decades, the body of theoretical thought on fascism has grown to encompass not only its program, tactics, rhetoric, and organization, but also its aesthetics, psychology, and political economy. Because fascism, as Alberto Toscano observed, "is a matter of returns and repetitions," this course will study theories of fascism in thematic units rather than chronologically. Our focus will be on fascism's transatlantic dimension, and it will include the writings of fascist agitators (Mussolini, Hitler), intellectuals (Evola, Schmitt, Heidegger), and artists (Wagner, Marinetti, Riefenstahl, Jünger). In addition, the course will draw on the traditions of anti-fascist Critical Theory (from Zetkin and Lukács to the Frankfurt School to Žižek and Theweleit), French post-war thought (Lacoue-Labarthe, Guattari), and Black Radicalism (Césaire). We will also study reevaluations of fascism in the context of its political, cultural, and intellectual resurgence over the last decade (Marasco, Herzog, Massumi, Traverso, Toscano).

GRST272 Introduction to History: Germany from Napoleon to the Berlin Republic
Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions. We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

GRST273 Tatort - Window into Germany (CLAC.50)
Few television shows have become anchored in German cultural discourse as firmly as "Tatort," a weekly crime show produced and broadcast by public television since 1970. Watched by up to 40% of all potential viewers, new episodes are prominently reviewed in major daily newspapers and serve as a focus for discussions about German politics, culture, and society. Episodes have tackled questions of police brutality, immigration, gentrification, and the surveillance state, while also shining a light on Germany's changing conception of itself. Over the years, the show has attracted some of the major directors and actors from German-speaking regions, such as Wolfgang Petersen, Margarethe von Trotta, Dominik Graf, Sibel Kekili, and Götz George. In this course, we will watch current and canonical episodes of the show, using it as a way into discussions about Germany's past, present, and future.

GRST277 The Past is Our Present Problem: Post-1945 German Literature and Culture
The quarter century following Germany's unconditional surrender in 1945 saw a continued struggle between a desire to move on and rebuild a society and culture in ruins on the one hand, and efforts to own up to--and learn from--Germany's recent Nazi past on the other. Literature, in particular, became one of the driving forces trying to understand how the Third Reich was possible, what happened to the remnants of Nazi ideology in the new Germanies, and what avenues forward there were for a language and literature so thoroughly complicit in the horrors of genocide and Holocaust.

In this course, we will explore how writers (re)configure, but also ignore, questions of personal and national identity, the function of language, the role of tradition, individual agency and social norms, or gender roles. With a main focus on West Germany, we will read some of the most important works of the time, ranging from so-called "rubble literature" of the immediate post-war years (Wolfdietrich Schnurre, Wolfgang Borchert) to texts trying to find ways to confront questions of guilt and responsibility (Günther Grass, Heinrich Böll) and to more radical attempts to reconfigure what literary art in German is able and obligated to say (Paul Celan, Peter Weiss). To complement the focus on West Germany, we will also read select texts from the other German-speaking countries: Austria (Thomas Bernhard, Ingeborg Bachmann), Switzerland (Max Frisch), and East Germany (Christa Wolf). In addition to close readings, we will engage with larger questions and cultural movements of the time, from debates between authors who left Nazi Germany and those who stayed, to the Gruppe 47 (Group 47) and its attempt to change the literary landscape between 1947 and 1967, to the increased politicization of literature and resurgence of debates of Nazism's staying power surrounding the social movements of the late 1960s. We will combine our readings with looks at historically significant moments such as the founding of two German states, the so-called economic miracle in West Germany, the conservative "restoration" efforts under chancellor Adenauer, or the election to the chancellorship of Kiesinger, a former Nazi bureaucrat with the Propaganda Ministry.

GRST279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact
The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GRST280 The Translation Circuit
In "The Translation Circuit," students will read twelve works in translation from around the world. The course will be taught by just as many instructors -- twelve Wesleyan professors and guests, each teaching a single text that has been translated into English from a language that we know or translate from ourselves. The course proceeds chronologically and traces, via translation history and practice, the lines of influence among major works of world literature, possibly including Sappho's fragments, Ovid's¿"Ars Amatoria," Ibn Hazm's "The Ring of the Dove," Nikolai Gogol's and Gabriel Garcia Marquez's short stories, Paul Celan's poems, Bertolt Brecht's plays, Oguz Atay's¿"Korkuyu Beklerken,"¿and Elena Ferrante's "Days of Abandonment."¿No prior knowledge of any specific language would be required, although we imagine that the student cohort collectively will have some knowledge of all the languages from which our texts have been translated.

GRST284 Frankfurt School Critical Theory, Then and Now
This course serves as an introduction to Critical Theory as first envisioned and practiced in the 1930s and 1940s by a group of European refugee scholars in New York and Los Angeles associated with the "Institute for Social Research," which later became known as the "Frankfurt School" (the city of Frankfurt being the location of its European origin and post-WW2 abode). Drawing on the German philosophical (Kant and Hegel), sociological (Weber and Simmel), psychological (Nietzsche and Freud), and Marxist (Engels, Marx, and Lukacs in particular) intellectual traditions, "Critical Theory" was intended to shed light on the genesis of capitalist class societies' inherently antagonistic and irrational makeup. Uncompromisingly interdisciplinary, the critical theorists explored phenomena such as authoritarian movements, mass media, propaganda, and the culture industry, and in doing so championed the significance of art and radical thought for the prospects of liberation from authoritarianism and alienated social relations. For the first generation of Critical Theorists (who must be distinguished from their less radical heirs, such as Habermas and Honneth), critique was not a purely academic exercise, but was pursued for the sake of radical social transformation and thus was sparked by a utopian impulse.

GRST288 The Human Condition: Arendt, Nietzsche, Marx
"God is dead," the philosopher Friedrich Nietzsche wrote at the close of the 19th century, "and we have killed him!" Nietzsche presents these words as being proclaimed by "a madman who in the bright morning lit a lantern and ran around the marketplace crying incessantly." Both the content of this famous quotation and its setting express a concern with the internal and external conditions under which modern humans live and make sense of their lives: without the certainty of divine guidance and order (internally), encountering one another only as impersonal buyers and sellers on the marketplace (externally). In this seminar, we will study three strikingly unique yet nonetheless intersecting ways of addressing the human condition after the death of god. We will start with Hannah Arendt's magisterial "The Human Condition" (1958), in which she presents the history of how in the Western philosophical tradition the active life (the vita activa, as distinguished from the vita contemplativa, the life of the mind) has been conceptualized. Drawing on Nietzsche's genealogical method, Arendt traces the genesis of concepts from their Greek, Latin, and Biblical origins to modernity. In doing so, she focuses on the activities of labor, work, and action: Labor is the "metabolism between humans and nature" (Marx), the process through which we appropriate the earth for our survival as a species; work is the transformation of the earth into a durable world; and plurality is the sharing of this world with others.

From Arendt's comprehensive conceptual history of the human condition, we will proceed in reverse chronological order to contextualize and challenge her claims. Arendt singles out Nietzsche and Marx as the paradigmatic modern "life and labor philosophers" and foremost representatives of philosophical "naturalism," and we will first examine Nietzsche's account of the devolution of European morality to nihilism and his critique of Western metaphysics as a "life-denying" death-cult, and will then, in the final third of the semester, investigate Marx's attempts to historicize and rethink the interdependence of humans and their natural environment in terms of an alienation of practice and the transformation (necessitated by the capitalist "law of value") of human labor into an abstract power of domination over humans and, eventually, the whole planet.

GRST289 The Formation of the Modern Self: German Romanticism
The 18th century in Europe saw tremendous changes in the ways people thought about and saw the world. In the process, old certainties, assumptions, and authorities collapsed, requiring new conceptions of self and world. In the decades around 1800, it became increasingly clear that the Enlightenment's optimistic view of progress was hiding some deeper concerns about unsettling and urgent problems, such as the reintegration of the newly "liberated" individual into society, the disconnect between scientific hypothesis and a more holistic view of the world, the role of language as the main mediator of human experience, or the sorting and ordering of the sheer mass of knowledge and information that the Enlightenment produced. It was German authors and thinkers, in particular, who started asking and answering such questions, creating some of the lasting conceptualizations of the modern self in literature (Goethe), aesthetics (Kant), and anthropology (Herder), but also exploring roads not pursued any further, such as Goethe's theory of color. Later authors explored even more troubling questions about communal cohesion (Hölderlin), the dangers of misinformation and misconceptions (Kleist), and the disruption wrought by new technology (E.T.A. Hoffmann), topics of as much urgency then as they are today. By reading authors from this German "Romanticism," we will historicize, evaluate, and critique notions of the modern individual, just as this very self is starting to dissolve under the pressure of new technology and accelerating social and political processes.

GRST290 Nietzsche - Science, Psychology, Genealogy
This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

GRST291 Directed Research in European Studies
This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

GRST292 Reason and Its Limits
This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness--but only because those features are, in some crucial sense, mind-dependent. This class will explore in

detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

GRST293 The History of Global Warming
Our planet is now hotter than at the beginning of modern industrialization, and more places on earth are on the brink of becoming uninhabitable due to extreme heat. There is little prospect that the steady rise of global surface temperatures is going to stop or revert anytime soon. We are only beginning to see the dangerous ecological and social consequences of this planetary heating up. With the collective failure to meet the Paris climate goals, the planet has entered a period described by Wim Carton and Andreas Malm as "The Long Heat." Drawing on their and the work of other historians and critical theorists, we will explore the past and future history of global warming, from the mass adoptions of first coal and later oil as the "prime movers" of industrial production, to the politically embattled introduction of alternative energy sources. We will ask why there has not been a large-scale transition to green energy, and why the proposed technological solutions to planetary overheating are so inadequate. Throughout the semester, we will pay close attention to the political, social, economic, and cultural causes that have shaped both high- and low-carbon technologies.

GRST294 Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond
The Holocaust, Germany's STASI terror, resistance to dictatorships, debates about Germany's war memorials, and colonial history come to mind when we think of 20th-century Germany. In this seminar we will pursue the questions: What do we remember? How do we remember? What are places of remembrance, how are they created, and what functions do they have in our society and for us personally? The term "places of remembrance" comes from the French (lieux de mémoire, literally, places of memory). This term was coined by the French historian Pierre Nora. For him, places of remembrance are not only material places, but also the so-called 'immaterial' places such as people, data and concepts that are anchored in people's collective memory and have an identity-forming function. In relation to Germany, places of remembrance can be specific places (like Weimar) or memorial sites (the Auschwitz concentration camp), but also buildings (Kaiser Wilhelm Memorial Church in Berlin), monuments (Bismarck Monument in Hamburg), people (e.g., names of people on street signs), events (Fall of the Wall), customs (Christmas) or symbols. The French sociologist Maurice Halbwachs, who was murdered at Buchenwald, described memories as a connective structure. They connect people socially and temporally. But not only individuals, also societies, nations and cultures remember (= collective memory). According to Halbwachs, crystallization points or places of memory are needed for this process. Like pieces in a mosaic, these form the identity of a culture, a nation, or a society. Their meaning and their perception can change over time. Some things can also be forgotten, but places of remembrance can help us avoid forgetting. With this caveat in mind, we want--among other things--to explore, discuss, and present "places of remembrance" and the role of memory culture in Germany and beyond.

GRST298 Marxism and Climate Crisis
Since the Communist Manifesto of 1848, the notion of "crisis" has played a prominent role in Marxist theorizing. Today's intensifying climate crisis is lending new theoretical and political weight to the Marxist critique of extractive, productive, and consumptive practices that transform nature into a means of production for ensuring ceaseless economic growth through the accumulation of capital. The consequences of this are not only the exhaustion of human labor-power and human sociality but also of non-human nature (fossilized carbon, wild animal biomass, topsoil, clean water, forests, etc.). Our perspective for studying and understanding this destructive transformation of nature will primarily be informed by a set of recent "eco Marxist" writings that oppose eco-modernist technocracy and instead reconceptualize capitalism as "a way of organizing nature" (J. Moore); extend the notion of social alienation to a "metabolic rift" between the labor process and the natural environment (Saito's "degrowth communism"); and explore the economic and ideological drivers behind the current expansion of fossil fuel extraction (Malm and the Zetkin collective). In light of the Center's semester theme of Energy and Exhaustion, we will ask three kinds of questions: historical (about the origins of the "Capitalocene" and of "fossil capital"); theoretical (how is Marx's "general law of accumulation" also a law of environmental depletion and planetary limits?); and political (traditional "Promethean" Marxism envisioned revolution as the full actualization of productive forces -- what is the meaning of social revolution in our age of emerging fascism and overshooting climate limits?).

GRST301 Advanced Seminar in German Literature: Poetry as a Way of Life
Who am I? What is the world? And what can language (not) do? Throughout its history, German poetry has returned, time and again, to asking these fundamental questions about a self, its relation to the world, and language's capacity to represent, influence, and constitute an I. Poetry serves as one of the central sites where the epistemological, moral, social, and aesthetic potential of mankind is negotiated. Lyric texts play a fundamental role in the creation and exploration of the promises, problems, and paradoxes of modern notions of subjectivity, society, and art. Almost all of the most canonical German poems pick up on some or all of these issues, and we will read a selection from the 18th to the 21st centuries. The goal of this class is to provide students with an overview of German poetic traditions and to give students the tools to talk about poetry in German. We will explicitly engage with analytic terminology as well as aesthetic discourses. All readings, writings, and discussions in German.

GRST302 Forward, Without Forgetting: The GDR in Literature and Film
In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include short stories, songs, and

excerpts by and among others: Wolf Biermann, Johannes Becher, Günther de Bryn, Stefan Heim, Rainer Kunze, Brigitte Reimann, Claudia Rusch, Susanne Schädlich, Maxi Wander, Christa Wolf. Participants will view and discuss films and TV series produced before and after unification.

GRST303 German-Language Theater After 1945: Show, Teach, Remember
Theater has played an integral role in the development of German culture since the 18th century. Playwrights, directors, and producers have been able--indeed compelled!--to constantly negotiate and define theater's pedagogical role vis-à-vis the public and the political sphere. They had to ask how theater can and should (re)present the world on stage, and how the world on stage can and should relate to the audience and its world. German-language theater after 1945 additionally had to tackle questions about Germany's past, as well as the past of (its) theater traditions, the connection between visuality, aesthetics, and the power that had played such an immense role during the National Socialist era. In this course, we will read some of the most important and influential plays written and produced in the German-speaking countries since 1945, as well as influential theoretical texts. We will discuss such performance aspects as set designs, language, and acting techniques, and we will ourselves stage short excerpts in various styles as a way of gaining first-hand experience with the range of possibilities in this infinitely flexible genre.

GRST304 Punk, Pop & Politics in Cold War Germany
This course introduces artistic responses and positions developed in the face of social and political realities in a divided country after WWII until its reunification and subsequent rapprochement. We will explore this period through works by artists, musicians, and young German authors, including Joseph Beuys and his concept of society as a social sculpture; bands of the Neue Deutsche Welle, who paired German lyrics with punk and new wave music; and the representative painting styles of the Neue Wilde, young painters who left abstraction and conceptual art behind to give expression to their observed reality. We will read contemporary texts that accompanied these developments in the form of literary writing (Rolf Dieter Brinkmann, Peter Glaser, Rainald Goetz) or as critical responses in newspapers, art journals, and pop magazines (Diedrich Diederichsen, Jutta Koether, Peter Bömmels), supported by excerpts from influential theoretical texts. Students will develop skills to critically engage these works and will apply these skills by preparing their own responses to works of art and cultural events.

GRST305 Oppression, Resistance, Despair: Attempting Change in Pre-Revolution Germany, 1830-1848
The 1830s-40s were a volatile moment in the history of German democracy and literature. After the defeat of Napoleon and the restoration of the old political order in 1815, authorities started rigorous and increasingly violent campaigns to oppress and destroy the budding (proto-) democratic and early nationalist movements. At the same time, the beginning of industrialization in the German-speaking world led to massive social upheavals, increasing poverty, famines, and the loss of entire economic sectors. In this context, authors of the Vormärz, the decades right before the March revolutions of 1848, became increasingly politicized, critical not only of their societies, but also the previous literary paradigms of Weimar Classicism and Romanticism. In their works, revolutionary in form and content, they fought for a better world and reflected on the need for resistance in the face of defeat and despair, the possibilities for a good life in an unjust world, and the role of art in political and social struggle. The course's main focus will be on Georg Büchner (1813-1837), whose works explore the tension between subjective agency and the destructive dynamic of history (Danton's Tod), idyll and insanity (Lenz), or individual life and structural oppression (Woyzeck). We will also engage with the function of humor and subversion in social critique (Heinrich Heine), the fight for a better status for women (Fanny Lewald, Louise Aston), and hugely problematic components of the rising German nationalism like anti-French and anti-Jewish sentiments.

GRST306 Feeling Critical: Emotions in the 20th & 21st Centuries
Do Germans have feelings? The prevailing image of the cold German, characterized by emotional restraint and subdued industriousness, indicates significant changes since the Romantic era, when German was considered the language of passion, equally suited for expressing deeply felt personal convictions and nation-forging collective sentiments. Focusing on the pivotal transitional decades of the 20th century to today, a period stimulating conspicuously non-emotional, critical artistic-intellectual responses to ongoing political shifts and global crises, we turn to the cultural artifacts of this time as an archive of feelings (Ann Cvetkovich) to trace this development. Through close readings of literary and journalistic texts, works of visual art, performances, music, film, and theater in their cultural and political contexts, we explore if and how they negotiate and contribute to affective structures and strategies--an approach termed "reading for emotion" by Anna Parkinson. We examine methods of evading or sharing "authentic" emotions in recent literary expressions, including German Popliteratur, autofiction, and social media formats, dialectic tensions of pop-journalism that engages aspects of critical theory and cultural studies from an affirmative perspective, and Christoph Schlingensief's confrontational artistic interventions in response to a social and political landscape of repressed feelings. Course readings, discussions, and assignments will be in German.

GRST310 Newest German Literature and Film
This seminar is designed to introduce students to films and literary texts produced in the German language in the past few years. Because the materials we will read and watch are of recent vintage, they are not yet part of an established canon: What their significance is, and how and why we should engage with them, is far from settled. For this reason, this seminar will fulfill a twofold task: (1) It will critically engage with some of the most cutting-edge literary and filmic creative work currently being done in the German language; and (2) it will offer extensive opportunities to explore and critique how these texts deal with contemporary social issues such as the revival of nationalist, Islamophobic, and authoritarian politics; the European Union's crisis of legitimacy in the wake of the Covid-19 pandemic; or the new "social question" arising from the dismantling of the welfare state and the growing "precarization" of work.

GRST320 Places of Remembrance: Historical Consciousness in Germany
Memorial days and monuments: every nation recalls its history. Antisemitism, the Holocaust, East Germany's STASI terror and the resistance to dictatorships, and the more recent debates about Germany's colonial history come to mind when we think of 20th century Germany. In this seminar, we will explore the culture of remembrance (Erinnerungskultur) and visit places of remembrance (Erinnerungsorte) virtually. We will discuss how and what we do--and do not--remember, based on selected readings, documentaries, and memorial sites. Speakers from Germany will be invited via Zoom to talk about specific places and activities of remembrance. We will develop online projects, for example, one's own family history or that of others, or geo-mapping memorial sites.

GRST330 Nietzsche als Versucher (CLAC.50)
The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

GRST332 The Racialized German Screen
In this course, we will examine filmic constructions of racial otherness in German cinema from early sound film until the present. The films in this course represent Asian, Jewish, Black, Native American, Romani, and Muslim characters. Some of these racialized character types are inextricably tied to Germany's history of war, migration, and asylum, including the post-WWII "war child," the West German guest worker, the former East German asylum seeker, and the twenty-first-century refugee. We will consider the parameters of national cinema, asking to what extent Germany's films can be seen as a projection screen for anxieties about racialized others, but also potentially fantasizing about cosmopolitan, multicultural Germany. While the majority of these productions are created by white German filmmakers, we witness a shift in more recent productions, where filmmakers of color step behind the camera to reclaim their narratives while employing their own strategies of representation. In addition to screening and analyzing films, we will read accompanying texts that will provide an aesthetic and cultural frame for interpretation.

Through careful film screenings, reading assignments, scaffolded analysis assignments, a presentation, and the creation of a final video essay, students will develop analytical skills in the viewing and interpretation of films and in writing original arguments about film history and cinema culture. Students will gain vocabulary for interpreting, analyzing, evaluating, and researching films in the context of the history that shaped and was shaped by them. No prior film studies knowledge is required, but the class discussions will take place entirely in German.

GRST342 Empire, Memory, Translation: A Seminar on the Rings of Saturn
In this seminar, we will explore three themes: The lasting effects of European imperialism and colonialism in (mostly but not exclusively) Europe and their literary representations; the relationship between historical memory and fiction in these representations; and the role of translation in shaping the relationship between historical memory and fiction.

At the center of this course is W. G. Sebald's travelogue "The Rings of Saturn" ("Die Ringe des Saturn"), a work we will read in both its German original and its congenial English translation. Sebald's genre-defying narrative recounts the historical traces of empire, war, and colonialism in the observations and reminiscences of the protagonist's wandering through the de-industrializing landscape of England's Suffolk County during the early 1990s. Obsessively associating phenomena near and far in an almost paranoid fashion, Sebald's first-person narrator leads the reader to the devastations wrought in China during the Opium Wars and in the Congo during Belgian rule; the local and global effects of cycles of capital accumulation, resource exploitation, and climate change; and the challenges and pitfalls of memory's attempts to find an adequate narrative form for how the globally disparate effects of capitalist modernity are interlinked.

All discussions and papers will be in German, and readings will be in German and English, with a consistent focus on theoretical and practical questions of translating from German to English. We will proceed at a slow pace, with plenty of time to grant our superb primary text the time and attention it deserves.

This course is designed for students who have taken GRST 213 or have spent a semester studying abroad in a German-speaking country. We will focus on developing critical writing, reading, interpretation, and translation skills in German. Since the quantity of reading is fairly modest, we will put much emphasis on regular writing and rewriting.

GRST350 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)
This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

GRST370 History of German Cinema
This course will provide a survey of some of the most significant German contributions to the history of cinema. We will watch and discuss one film every week and use additional source materials to illuminate each film's social, political, and cultural context. Our itinerary will include famous films from the Weimar Republic, consider Nazi cinema, engage with GDR cinema, explore the New German Cinema, and finally will conclude with contemporary German and Austrian film. All course materials, discussions, and papers will be in German.

GRST376 The Volksstueck Tradition
In this course we will be studying the Austrian and German genre of the Volksstück. As the name suggests, plays in this genre are intended to address the joys and sorrows of ordinary people in their everyday lives, both reflecting and commenting on the social life of their times. While 19th-century Austrian Volksstücke owed much to the conventions of the commedia del arte, the genre evolved in the 20th century into a form of critical social analysis. This evolution accompanied changing concepts of the "Volk," with salaried office workers coming to the fore during the Weimar Republic. The 20th-century Volksstücke written between the world wars present characters who in real life would likely become supporters of the Nazis. Starting in the 1960s, playwrights and audiences rediscovered the Volksstücke of the prewar period, and new authors emerged. Topics and stylistic features we will examine include the changing figurations of the "Volk," dialogue employing actual or synthetic dialect and colloquial language, the prevalence of inarticulateness or inauthentic speech, oppression and exploitation of women, shifts in class attitudes, and the increasing influence of the mass media. Interesting parallels to the Volksstück can be found in Norman Lear's long-running television series "All in the Family." Among the authors we will be reading are Johann Nepomuk Nestroy, Bertolt Brecht, Karl Kraus, Marieluise Fleisser, Ödön von Horváth, Rainer Werner Fassbinder, Martin Sperr, Wolfgang Bauer, and Franz Xaver Kroetz. All reading, writing, and class discussion will be in German.

GRST379 German Fairy Tales: Brüder Grimm and Beyond
In this advanced-level German course, we will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century in Germany and the US. Most readings and all discussions are in German.

GRST385 Die Grenzen meiner Sprache bedeuten die Grenzen meiner Welt (CLAC .5)
This CLAC will explore the practice of translating philosophical German by focusing on Wittgenstein's Tractatus, its recent translations, and its (often unnamed) sources and influences -- including writings by Gottlob Frege and Immanuel Kant as well as by various Viennese intellectuals such as Karl Kraus and Otto Weininger. The Tractatus is a particularly productive focal point because it advances a theory of language and meaning that has immediate relevance for conceptualizing what is involved in translating from one language into another. In practicing translation, students will be testing the theory that they are attempting to translate. This will provide them an additional dimension in which to wrestle with the content of the text. Enrollment in the associated seminar, PHIL389/COL386, is encouraged but not required. The course is open to students at all levels of German study. Discussions will be conducted in a mixture of English and German, since we will be discussing the nuances of words and phrases in both languages. By preparing (and discussing) their own translations of texts, students will become familiar with the sorts of challenges that arise in rendering philosophical German into English and will develop strategies for negotiating these challenges. Students will also be encouraged to consider translations into other languages in which they are competent.

GRST386 German Romanticism: Disenchantment and Re-enchantment
Famously, the sociologist Max Weber described the rational, enlightened age as "disenchanted": Unlike "the savage," he claimed, who uses "magical means" for manipulating "mysterious incalculable powers," the denizens of capitalist

modernity use "technical means and calculation" to master "all things." At the same time, Weber indicated that the "process of disenchantment, which has been under way for millennia in Western culture," birthed abstract new enchantments: "Having lost their magic, the multiple gods of the past rise up from their graves in the form of impersonal forces, fighting for power over our lives and thus beginning anew their eternal struggle against one another." Against the backdrop of Weber's dialectic of disenchantment and re-enchantment, this course offers a representative overview of some of the key ideas, works, and authors of German Romanticism, a term that designates both a period that extends from about 1795 to 1848 and a style of creative and intellectual production that encompasses a remarkable diversity of phenomena, including the proto-avant-garde experiments with communal "sympoetry" and "symphilosophy" in the Early Romantic circles and the rise of "Dark Romanticism" that fuses a fascination with science and new technologies with a turn to the occult and demonic. In tracing the tensions between disenchantment and re-enchantment, we will consider works of literature, criticism, art, and music, including works by some of the key figures in the German intellectual and artistic tradition, such as Heinrich Heine, the Brothers Schlegel and the Brothers Grimm, E. T. A. Hoffmann, Ludwig Tieck, Caspar David Friedrich, Robert and Clara Schumann, Franz Schubert, Karoline von Günderrode, Bettina von Arnim, Novalis, Annette von Droste-Hülshoff, and the young Karl Marx.

GRST390 Romanticism-Realism-Modernism
In the study of German literature (and art), the terms romanticism, realism, and modernism designate a span of time extending from the "Age of Goethe" to the mid-20th century literary cultures of West Germany, East Germany, Austria, and Switzerland. In this seminar, we want to take a closer look at representative examples for each of the three categories: What kind of subject matters are prevalent in each respective period? What narrative, dramatic, and poetic devices and forms are typically employed? What distinguishes these periods from one another? How useful are these distinctions? What, finally, is the purpose of such periodizing of literature? The purpose of this seminar is twofold: 1. It is intended to provide a historical overview of German literature by engaging with representative romanticist, realist, and modernist works of prose, drama, and lyric; and 2. It is designed to critically probe the concepts of romanticism, realism, and modernism. How useful are these categories in making us understand the evolution of fiction, authorship and readership, literary subjectivity, or narrative form? What are some pitfalls of using these categories? All readings, papers, and discussions will be in German.

Prereq: **GRST213**

GRST391 Weimar Modernism and the City of Berlin
One of the most fascinating aspects of Weimar modernism is the emergence of new forms of perception and consumption, reflected in a new urban consumer culture that generated an ever-changing array of visual and aural stimulations. This changed reality was perhaps best captured by the young medium of film, but older media like literature and painting also responded to this modernist challenge. This course will examine not only exemplary works of literary and visual production from the Weimar period, but also other aspects of Weimar modernism, such as the development of radio, design, fashion, advertising, and architecture, emphasizing analyses of the new mass culture of entertainment, distraction, and "pure exteriority" (Kracauer) in combination with left-wing cultural and political criticism. The city of Berlin, then the third largest in the world and in many ways the international capital of modernism, will provide the main locus of investigation. All course readings, discussions, and assignments will be in German.

- Global South Asian Studies Major (p. 603)
- South Asian Studies Minor (https://catalog.wesleyan.edu/minors/ugrd-gsas-mn/)

GLOBAL SOUTH ASIAN STUDIES MAJOR

MAJOR DESCRIPTION

The Major in Global South Asian Studies (GSAS) enables students to explore the region's cultures within a worldwide context. South Asia (including India, Pakistan, Bangladesh, Nepal, Sri Lanka, Bhutan, the Maldives, and the Tibetan cultural world) is home to more than a quarter of the world's population, with a diaspora of 24 million people. Students will study many aspects of this rich and diverse heritage using a variety of disciplinary methods and theories, including postcolonial critique, embodiment theory, and feminist and queer theory, while cultivating an awareness of transnational dynamics. The global/diasporic aspect of GSAS will also give students an understanding of worldwide movements of labor, capital, and culture. The program encourages the study abroad experience in which students gain insights through immersion in local cultures.

Students with a strong cultural curiosity and interest in regional dynamics, history, and contemporary issues may be attracted to the Major in Global South Asian Studies.

In addition to a level of regional and global expertise, students will exercise their critical thinking, research, language, and communications skills in this course of study. This makes them valuable job candidates in fields such as education, government, diplomacy, business, and international trade and relations.

ADMISSION TO THE MAJOR

Students may apply for the major no earlier than their second semester of their sophomore year. There are no prerequisites for application. The same process applies to transfer students.

MAJOR REQUIREMENTS

Students are required to take a minimum of 11 courses (10 courses for one credit each and .25 credit capstone experience) designated as appropriate for the major. A maximum of 15.25 credits—including thesis credits—may be taken. Except for language courses (which have no limit), up to two of these may be taken away from Wesleyan (e.g., on a study abroad program). The 11 required courses must include:

- Foundations in Global South Asian Studies. The Foundations requirement can be satisfied with the following courses: GSAS 150, English 254/GSAS 254.
- The equivalent of at least four credits in South Asian languages. There is no limit to the number that can be taken off campus in approved programs.
- The capstone experience.
- At least one course in each of the four distribution categories.
- No more than six courses that count towards the major can come from any one of these categories.
- The distribution categories are as follows:
  - Contemporary Society and Practice (CSP): Courses primarily concerned with the study of contemporary South Asian communities, their practices, and their productions
  - Historical Inquiry (HI): Courses primarily concerned with the historical study of South Asia
  - Creative Arts (CA): Courses in which students obtain training in the practice of a specific form of art deriving from South Asian communities
  - Language (L): Courses in which students gain comprehension in South Asian languages

GENERAL EDUCATION EXPECTATIONS

Among other expectations, honors will only be awarded to those who have completed at least stage I of the general education expectations.

STUDENT LEARNING GOALS

Students completing the major will be expected to have:

- Expertise in the cultural breadth and historical depth of South Asia and the global South Asian diaspora complemented by experience with some creative artistic traditions.
- Intermediate or advanced language proficiency in a South Asian language.
- Analytic skills in intercultural interpretation with an awareness of the necessity for a coherent, multi-methodical approach to study. Understanding of the development of South Asian studies as a field (and its most recent iteration as "Global South Asian Studies"), and of "area studies" more generally.

STUDY ABROAD

Majors are encouraged to study abroad for at least one semester, if not two. Ordinarily, study abroad would be conducted in a South Asian country. However, as the South Asian diaspora is global, students may profit from study abroad in a country with a significant South Asian diasporic population, such as Trinidad, Guyana, Canada, Fiji, Singapore, South Africa, etc. It is recommended that students discuss such choices with their faculty advisor in the major.

LANGUAGE REQUIREMENT

The major requires the equivalent of at least four credits in South Asian languages. There is no limit to the number that can be taken off campus in approved programs.

The language requirement signals to students how essential linguistic understanding is not only for communication but for understanding the cognitive worlds involved in spoken and written interaction.

TRANSFER CREDIT

The program accepts only one credit from courses taken off-campus, except in the case of foreign study. This must be for a course not available at Wesleyan. It accepts up to two approved credits taken before arrival at Wesleyan by transfer students for each year of work they transfer (i.e., two credits from incoming sophomores, four credits from incoming juniors).

HONORS

Candidates must declare their interest in undertaking a thesis and a general idea of their topic in a 2-3 page proposal, to be given to the program chair by the last Friday in April.

The proposal should contain a focused description of the work to be undertaken, and a thoughtful articulation of a student's interest in—and history with (such as a list of relevant coursework)—their discipline of choice. In the case of a research project, a bibliography should be included. Students must meet with at least one potential advisor to get feedback on the project before submitting their proposal. Securing the consent of a particular faculty member (named in the proposal) to serve as thesis advisor will facilitate approval of the proposal. The program will determine which proposals will be approved, and students will be notified of the program's decision before classes end in May.

The student must have a minimum of a B+ or 88.3 GPA in the program's courses by the end of their junior year to proceed with the project.

Honors is available for majors who (a) have successfully completed a senior honors thesis, (b) who have at least a 88.3 GPA in the major, and (c) have completed at least stage I of the general education expectations.

Thesis courses may not count toward the 11 required courses for the major.

CAPSTONE EXPERIENCE

Required capstone experience:

Assessment Portfolio and Capstone Symposium. During their time in the major, students will assemble a portfolio of three papers (at least four pages in length each) or works of creative art that they have created during three separate semesters. Taken together, these should give evidence of the student's personal, creative, and intellectual development, as well as their command of critical, analytical, creative, and interpretative skills.

In the drop/add period of the spring term, all senior majors enroll in a .25 credit Cr/U tutorial (GSAS 404), for which they will write a three- to four-page paper reflecting on the portfolio they have assembled and perhaps on other work in the program. This paper allows students an opportunity to assess the arc of their intellectual development as a GSAS major. Papers will be submitted to the program chair and distributed to faculty members for evaluation. At the end of the spring semester, all faculty and graduating majors will meet for a symposium banquet during which faculty will offer detailed feedback on these self-assessments as a prelude to a general discussion about student experiences.

Optional additional capstone experiences:

- Senior essay (one semester, one credit)
- Senior thesis – written, visual, or performative (two semesters, two credits)
- In regard to both, note:

1. Seniors writing theses and essays will present to faculty and majors their work to date at a November gathering each year.
2. Seniors who have completed a thesis will present to faculty and majors their work a week after its submission.

GOVERNMENT

Wesleyan's Department of Government is dedicated to exploring "who gets what, when, and how," as Harold Lasswell defined political science in 1935. The department might well be called a department of political science or a department of politics; it is called the Department of Government for historical reasons. Department faculty today uphold a tradition, more than a century old, of distinction in scholarship and teaching. Each tenured or tenure-track Department of Government faculty member is affiliated with a concentration representing one of the four major subfields of political science: American politics, comparative politics, international relations, or political theory. We offer introductory courses in each of these four concentrations (American is GOVT151; international, GOVT155; comparative, GOVT157; and theory, GOVT159), a range of upper-level courses **(201-368)**, and specialized research seminars **(369-399)**. In addition, we offer courses in research methodology, individual and group tutorials, and tutoring of senior honors theses. Courses numbered **201-368** are ordered according to field of study, not level of difficulty.

- Undergraduate Government Major (p. 1078)

GOVT102F Politics: Fundamental Concepts (FYS)
This First Year Seminar introduces students to the concepts that remain central to political life: capitalism, class, race, gender, state, citizenship, power, civil society, democracy, anarchy, populism, and fascism, to name a few.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT108F It's (Not) a Laughing Matter: Humor as Resistance and a Force for Social Change
Using a global perspective, this course will focus on developing critical thinking and writing skills as well as developing intellectual empathy. The students will learn to define issues within a broad cultural context and gain experience in evaluating and interpreting content in a variety of mediums. Students will interact with their classmates and actively participate in classroom activities to improve their ability to work in groups, think outside of the box, improve their writing, and develop their oral presentation skills.

The subject matter crosses disciplinary boundaries, linking the neuroscience of laughter with social science analyses about the power of humor. Students will be able to explain how humor can be a crucial tool to cope with painful and even repressive circumstances. They also will investigate how comedians and political activists use humor and other art forms to push for political and social change.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**

GOVT116F Good Books on Bad Wars (FYS)
This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

GOVT151 American Government and Politics
This course introduces the "building blocks" of American politics and government at the national level. It has four main parts: (1) foundations of our governmental system, (2) political institutions and the way they generate policy, (3) politics at the level of the individual citizen and the mechanisms that link the masses to elites, and (4) how all the factors come together in the making of public policy. We will scrutinize insider accounts of politics, scholarly work on governmental processes, and popular debates on issues and institutions. In addition, we will discuss why Americans are often so unhappy with their politics and politicians and the challenges faced by elected officials attempting to meet a wide scope of public demands. This course is designed specifically for first-year students.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT151F American Government and Politics (FYS)
An introduction to American national institutions and the policy process, the focus of this course is on the institutions and actors who make, interpret, and enforce our laws: Congress, the presidency, the courts, and the bureaucracy. The course will critically assess the perennial conflict over executive, legislative, and judicial power and the implications of the rise of the administrative state for a democratic order. This course is designed specifically for first-year students.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT155 International Relations
Why do states go to war with each other? How do we solve global problems? How do we govern the global economy? To equip students to answer these questions, this course introduces students to an analytical framework emphasizing the role of political interests, strategic interactions, and international institutions. Students will use this framework to understand current events and to critically analyze theories and concepts that have been used to explain world politics. Students will also consider critical perspectives on international relations, such as the role of colonialism in shaping the global order.
Offering: **Host**
Grading: **A-F**

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT155F International Politics (FYS)
This introduction to international politics applies various theories of state behavior to selected historical cases. Topics include the balance of power, change in international systems, the causes of war and peace, and the role of international law, institutions, and morality in the relations among nations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT155Z International Relations
This course represents an introduction to the central concepts, theories, and empirical findings in the study of international politics. The principal actors, structures, and processes of international relations will be analyzed in a theoretical and historical context. Major topics include nationalism and the national interest, power, diplomacy, game theory and bargaining, the causes of foreign policy, nuclear weapons and international security, imperialism, underdevelopment, international organizations, international resource management, the environment, and transnational actors.

GOVT158 Writing the World
How do U.S. newspapers and magazines frame world politics? How adequate is their coverage of ongoing crises and breaking stories around the world? The course will involve reading some classic texts of political journalism and some political novels (such as Orwell's HOMAGE TO CATALONIA and Vargas Llosa's THE FEAST OF THE GOAT). We will also read current articles on contemporary politics from a variety of sources. Students will be assigned to write alternative sources, both reporting and opinion, on current events of their choice. The topics covered will include military conflicts, elections and political crises, and economic stories. We will of course assess the impact of the Web (e.g., blogs, YouTube) on news coverage.
Offering: **Host**

Prereq: **None**

GOVT159 The Moral Basis of Politics
An introduction to upper-level courses in political theory, this course offers an introductory survey of political theory from ancient Athens to 20th-century North America, Asia, and Europe. We will read, discuss, and write about works authored by a number of seminal political thinkers. In doing so, we will encounter and evaluate diverse answers to some of the central questions in the analysis of politics: What is politics and where does it take place? What does it mean to exercise political rule? What is justice? How are political societies legitimately founded? What is the place of revolution in politics? What is power and how does it operate in political life? How is democracy intertwined with struggles against social oppression?
Offering: **Host**

GOVT200 Doing Political Science Research
This course focuses on how to conduct and evaluate empirical political science research. It is specifically designed for first-year and sophomore students who are intending to major in Government. Topics covered include generating research questions, reviewing and synthesizing existing research, designing research studies, and qualitative and quantitative approaches to studying political phenomena. Students will also be introduced to different datasets political scientists use to answer research questions in the American, comparative, and international relations subfields and learn the basics of working with quantitative data. In addition to preparing students to engage in their own research projects, the course better equips students to think critically and productively about research evidence in political science and popular media discussions of politics.

GOVT201 Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.
Offering: **Crosslisting**

Prereq: **None**

GOVT205 Judicial Process and Politics
How do courts in the United States work? What is the function of law and courts in both the American political system and the daily lives of people with legal problems? Are courts, which are governed by different processes and rules, producing varied outcomes? These questions will drive our examination of legal systems in America, which will include both federal and state systems. We will consider the factors that influence the decisions of judges--including law, politics, and ideology. We will also interrogate the scope of judicial power. In this class, students will develop a deeper knowledge of law and legal systems in the United States, engage with concepts relevant to the study of judicial politics, and develop independent research ideas relevant to this field.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

GOVT206 Public Policy
"Public policy" describes the actions employed by the government to achieve a variety of social goals. Some of these actions may be of great consequence (e.g., incarcerating prisoners, providing income maintenance to the poor, preventing deaths from pollution or workplace hazards). This course provides a survey of several key public policies in the U.S. It will begin with an exploration of the policy-making process, policy design, and policy evaluation. The remainder of the course will be devoted to the examination of several key policy areas including criminal justice, education, social welfare, economic management, health care, and environmental protection regulation. In each case, the current Trump administration has made significant changes that we will place in the larger historical context. By integrating theoretical debates and the historical evolution of core public policies, the course aims to develop analytical skills as well as an appreciation for the technical and political complexities of policy-making.

Identical With: **ENVS206**
Prereq: **None**

GOVT209 Experiments in Public Life: Introduction to Effective Local Political Action
This course serves as an introduction to local political engagement. With a focus on the City of Middletown as a key case study, students will learn how they can "think global, act local" on political issues that they care about. The course will begin by studying theories about how political power is organized and exercised, and we will learn how well these theories explain how policy is made and implemented in local communities. We will study how local government works and how non-governmental actors, such as grassroots organizations and the business community, are involved in making change.

Members of this class will not just study how politics works in theory, we will learn how it operates in real life in our city. We will participate in city meetings, meet with local officials and advocates, and learn how regular citizens -- even university students -- can become effective political actors in their communities. Throughout the semester each student will research a local political issue that they care about, and by the end of the semester they will contribute a positive case study to a public-facing "Positive Local Action" website that we will be developing as a class.

GOVT210 Calderwood Seminar in Public Writing: Law, Courts, and Policymaking in the US
In this course we will explore some of the most salient policy questions in contemporary American politics through a lens that puts law and courts at the center of inquiry. Among the topics we will cover are the place of judiciary in American democracy, hate speech and the First Amendment, criminal justice, immigration, surveillance, and privacy. In exploring these various topics, we will see how law is socially constructed by a myriad political, economic, and cultural forces, and how social phenomena are legally constructed as courts deliberate and decide on particular cases.

This is a writing-intensive course. Students will try their hand at public writing, working on op-eds, book reviews, and blog posts. They will read and edit each other's work.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT214 Media and Politics
Mass media play a crucial role in American politics, as citizens do not get most of their information about the workings of government from direct experience but rather from mediated stories. This course examines the evolving relationship between political elites, mass media, and the American public.
Offering: **Host**
Grading: **A-F**

Prereq: **None**

GOVT220 US Political Economy: State, Markets, and the Dynamics of Change
The past century has witnessed dramatic changes in the US political economy. Many of these changes stemmed from the policies and institutions introduced during the New Deal, which created a foundation for a period of great prosperity in the immediate postwar period--a quarter century of steady growth, low inflation and unemployment, and declining inequality. Yet, by the mid-1970s, the nation was mired in stagflation and subsequent decades brought a significant departure from the earlier policy mix. The US entered a period of stagnant wages, growing inequality, and heightened vulnerability to a host of risks, all of which contributed to the severity of the financial crisis of 2007-08, the Great Recession, and the slow recovery thereafter. In this course, we will explore the critical role of policy and institutions in shaping economic performance, the factors that contributed to their erosion, and the factors that shape and limit the options available to contemporary policymakers.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT221 Environmental Policy
Arguably, environmental protection is the most complex and fascinating regulatory policy area. This course explores U.S. environmental regulation. We will examine the key features of policy and administration in each major area of environmental policy. Moreover, we will place regulation in a larger context and examine the factors that shape the environmental decisions of various economic actors. Although the course focuses primarily on domestic policy, at various points in the course we will draw both on comparative examples and the challenges associated with coordinating national policies and practices on an international level.

Prereq: **None**

GOVT222 Averting Catastrophe: Public Policy and Risk Management
The U.S. faces several significant risks that, if poorly managed, could have significant implications for the economy, the environment, and public health. This course focuses on the government's role as risk manager. We will explore how public policies can be used to manage risk, mitigate the extent of damages to the environment, the economy, and public health, and avert catastrophic outcomes. After examining the concept of risk, decision-making under conditions of uncertainty, and competing policy instruments, we will turn to a series of case studies, including offshore oil spills, nuclear accidents, financial crises, the COVID-19 pandemic, and climate change. In each case, we will seek to better understand the factors that shape performance and consider the implications for strengthening the government's role as risk manager. We will conclude with an examination of an emerging issue: the regulation of artificial intelligence, a technology that even its strongest advocates admit could result in unprecedented dislocations and risks.
Offering: **Host**

Identical With: **ENVS243**
Prereq: **None**

GOVT223 Constructing and Deconstructing the Administrative State
Steve Bannon, Donald Trump's chief strategies, famously called for the "deconstruction of the administrative state," while others have denounced the "deep state" as a permanent ruling elite committed to circumventing the Constitution and the will of the voters. The administrative state has always occupied a precarious place in the US. There has been an ongoing tension between the need for bureaucracy and a political culture steeped in anti-statism and populism. In this class, we will examine the efforts to expand the reach of the administrative state and efforts to reign in the bureaucracy during the Progressive Era, the New Deal, and the postwar decades, including a detailed discussion of the Trump presidency. This exploration will be grounded in a history of public policy and theoretical debates from across the ideological spectrum.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT226 Constitutional Political Economy: Law and Courts in the Making of the American Economy
In the first part of the course, we address the foundational question -- What is law? -- and explore how key aspects of political and social life are organized through legal constructs. Questions such as what counts, from a legal standpoint, as religion, speech, family, or commerce serve as entry points for analyzing how law constitutes social meaning, power, and material outcomes. The second part of the course offers a historical overview of American political economy in the twentieth century, tracing institutional transformations associated with major structural shifts and critical turning points, such as the Great Depression and the New Deal, the rise of neoliberalism, and financialization. In the third part, the course focuses on the role of courts in shaping the contours of the American economy. We examine how political struggles over constitutional interpretation have influenced issues ranging from economic regulation and labor rights to consumer protection, corporate power, and market governance. This section situates judicial decision-making within broader economic and political transformations, highlighting the mutual constitution of law and economic change. This course is organized as a research seminar. Each student will develop a substantial research project and work closely with the instructor to refine it into an academic paper over the semester.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT229 Black Lives, Black Power & Black Politics
This course will explore the lineage of Black politics, with a particular focus on the social movements that have brought Black political thought to the forefront of the national conversation, through the lens of the academy and popular culture. In particular, students will learn about the many different iterations of the struggle for Black political freedom and autonomy, starting before the United States existed. We will trace this through slavery, reconstruction, the civil rights movement, all the way up to the contemporary Black Lives Matter movement. The course will provide considerable historical background on the conditions that created these movements and the ever-present role of government in shaping their trajectory. We will explore the commonalities and innovations in these struggles over time, and how they have shaped the development of the American state. We will also explore the degree to which patterns of dispossession, exploitation, and resistance have not only shaped the engagement of Black Americans with the broader polity, but also the way these same themes have weighed on the contributions of Black Americans to broader American culture. For the latter aspect we will engage with both popular music and film. Students will leave the course with a broader understanding of the historical context in which Black politics emerged, the themes that have commonly animated the many iterations of this struggle, and how this has all shaped the landscape of popular American culture.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT232 Campaigns and Elections
This course introduces students to the style and structure of American campaigns and how they have changed over time. We also consider academic theories and controversies surrounding campaign "effects" and whether or not parties, media, campaigns, and elections function as they are supposed to according to democratic theory. Students will read, discuss, and debate classic and new scholarship in the field of political and electoral behavior. Students will also conduct research into different electoral contests in the United States at either the federal or state level.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT238 American Political Parties
This course explores the origins, purposes, roles, and consequences of political parties in the American political system. After a brief consideration of the broader theories behind political party systems, we will turn our focus to the party system in the United States. V. O. Key (1964) presented a tripartite definition of political parties that we will use to structure our exploration of parties for the rest of the course: party as organization, party in government, and party in the electorate. In these sections, we will address political party polarization, party identification, parties' fundraising, and many other related topics. From this rich examination of political parties in the U.S. context, we will discuss why parties exist and enable democracy, but also discuss their potential flaws and failures.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT239 Racial and Ethnic Politics
This course will provide historical context on the development of race and racial attitudes, and demonstrate the crucial role that they play in contemporary politics with a particular focus on immigration, criminal justice, welfare, and housing policy. The assigned readings will examine how the mere presence of underrepresented racial groups in the United States has shaped policies in these arenas, and the way these policies have, in turn, shaped the material circumstances and the burgeoning identities of these groups. The course will also uncover the complex relationship between race, political participation, and public opinion.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT245 Regulation and Governance
Regulation describes an array of public policies explicitly designed to govern economic activity and its consequences at the level of the industry or firm. In the first half of the course, we will explore of the history of economic regulation (e.g., finance, transportation), the new social regulation (e.g., environmental protection, occupational safety and health), deregulation, and regulatory reform. The second half of the course will turn to an examination of governance. Governance focuses on efforts to develop solutions to regulatory problems by engaging a much larger field of forces (e.g., various nongovernmental organizations, trade associations, standard setting associations, supply chains, markets) in addition to using standard policy instruments. We will consider the extent to which effective governance is compromised (or enhanced) by global competition and the quest for corporate profitability.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT250 Civil Rights and Liberties
This course introduces students to the development of civil liberties and civil rights law in the United States. We will focus primarily on the decisions of the Supreme Court that concern the First Amendment (including religious freedom, freedom of speech and expression, and freedom of the press), privacy and personal liberty, equal protection, voting, and representation. In this course, students will learn about the evolution of major legal doctrines governing civil liberties and civil rights. Students will also develop an understanding of the process of Supreme Court decision-making.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT253 The American National Security State
In this course we will focus on the rise of the national security apparatus in the U.S. through the second half of the 20th century. This topic deals with political issues that are often characterized as "intermestic" because they occur at the point of intersection between domestic and international politics. Accordingly, we will examine the ways in which external forces influence internal state-building. We will also consider the choices and implications of policies designed to provide for what President Roosevelt famously called "freedom from fear."
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT254 Capitalism and the Politics of Climate Change: When an Unstoppable Force Meets an Immovable Object
This course explores the complex relationship between capitalism and climate change. In the first part of the course, taking a comparative approach with a primary focus on the US, we begin by examining how capitalism has evolved since the Industrial Revolution, and how various capitalist models have developed worldwide, depending on the role of the state. In the second part, we question the "hegemony of growth" -- how growth has been perceived as an indicator of progress and distributive justice -- and explore competing visions of green growth and degrowth. In the third part, the course shifts to the political economy of decarbonization. We discuss the history and current realities of carbon dependency, examine cross-national variations in decarbonization efforts, consider the challenging trade-offs, and explore the economic and political factors underlying the struggle over climate policies. Our discussion will also focus on the role of economists and other experts in shaping mitigation efforts.

GOVT261 Politics of Inequality
This course focuses on inequality along various identity-based dimensions in American politics. Students will leave with a deep understanding of when inequality is a normative concern, and how politics has created and has the power to alleviate inequality along class, racial, and gender divides. Specifically, the course will focus broadly on the level of inequality in these three areas, and the degree to which this has changed over time. We will explore both the political and social phenomena that have driven this inequality, and the ways they intersect and exacerbate the impact for those who share multiple stigmatized identities. Finally, students will, in their final papers, explore potential political policies that can help to reduce or even eliminate inequality.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT262 Experiments in American Political Behavior
This seminar explores the cutting-edge of experimental political science, with a substantive focus on American political behavior. Students will become familiar with various types of experiments, such as laboratory experiments, survey experiments, field experiments, and natural experiments. In doing so, students will engage with research that aims to isolate the causal consequences of group affiliation (including partisanship, race/ethnicity, and other social identities), affect and emotions, political knowledge and sophistication, political advertisements and campaign efforts, and media/information environments on individuals' political attitudes and behavior. Along the way, students will gain a deep proficiency in experimental design and develop foundational skills in statistical analysis and basic programming.

GOVT273 Environmental Politics in East Asia
This is an upper-division course on the environmental politics of East Asia. It will focus on the major environmental issues of our time (pollution, conservation, energy, waste, environmental justice, etc.), and how East Asian countries are coping with them from both policy and politics perspectives. It will cover both transnational and international efforts, as well as national and local initiatives. The course will require that students "do" environmental politics as well as study environmental politics through a civic engagement component.

GOVT274 Russian Politics
The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

GOVT275 Political Resistance to Dictatorships
The series of seminars is focused on different strategies of non-violent resistance against authoritarian regimes. We'll explore various aspects of building an efficient resistance movement--from fundraising to electoral strategies, from online communication to polling--based on best practices from countries all around the world. Pro-democracy activism and the fight against dictatorship is never an easy game to play; still, a lot can be derived from the existing experience to make it more efficient. But even if the resistance movement is successful, it doesn't guarantee a perfect democratic transition: resentment and disappointment often start to prevail in the society very soon. In workshops and role-playing games students will be encouraged to put together feasible transition plans for different countries.

GOVT277 Islamic Movements and Parties
This course examines the diversity of movements and political parties that take Islam as a reference point, and situates these discussions within broader debates around religion and politics. Through a variety of cases spanning from the Middle East and North Africa to Southeast Asia, we will explore the rise and evolution of different types of Islamic movements, and discuss different modes of mobilization, organization and interaction with the state and with other social and political actors. We will examine why some groups form political parties, and how they navigate the tensions between the needs of the party and the mission of the movement. We will consider how Islamic parties impact local and national politics, and in turn how they respond to shifting political terrains and challenges from within. The course will conclude with a reflection on "post-Islamism" and Western attitudes towards Islamic movements.

GOVT278 Nationalism
Nationalism is the desire of an ethnic group, a nation, to have a state of its own. Nationalism emerged as a powerful organizing principle for states and social movements in the 19th century and was integral to the wars and revolutions of the 20th century. This course examines rival theories about the character of nationalism and tries to explain its staying power as a political principle into the 21st century. It looks at the role of nationalism in countries such as the U.S., France, India, China, and Japan, and nationalist conflicts in Northern Ireland, Quebec, Yugoslavia, the former U.S.S.R., and Rwanda. The course is reading- and writing-intensive.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT278Z Nationalism
Nationalism is a political movement advocating self-rule for a community that sees itself as having a common identity and shared historical fate. To different degrees, ethnicity, language, religion, and culture have been used to demarcate the nation's boundaries. There are some 6,000 nations in the world but only 200 states, so competition for self-rule can be fierce. This course introduces the main theorists of nationalism as a response to the rise of capitalism, and explores its complex relationship with liberalism, socialism, and democracy. Why does nationalism persist--even as capitalist globalization makes national economies more open and porous? We explore both state-level nationalism, which ranges from war and genocide to protectionist trade policy, and everyday or "banal" nationalism, which expresses itself through food, music, and sport.

We start off with relatively familiar cases from the developed world--the US, Brexit, Northern Ireland, and Quebec, and the classic cases of France and Germany. We then look at decolonization in Africa and the genesis of genocide in Rwanda. The socialist world is represented by the multiethnic federations of the Soviet Union and Yugoslavia. We then look at nationalism in Japan and China, followed by the Arab world. Finally, we look at the role of the internet in the propagation of nationalism. Students will be expected to read all four assigned books before the start of the class, and will have to write a three- to four-page response paper on one of the books.

GOVT279 State and Society
Every aspect of our lives is shaped by the state. What exactly is it, the modern state? How has it come to be? From where does it derive its legitimacy? How has its involvement in social and economic life evolved over time, and varied cross-nationally? In what ways is American statecraft is considered "exceptional"? In this class we will seek answers to these questions, and on the way, we will learn about welfare states, penal states, racial states, straight states, submerged states, authoritarian states, strong and weak states.
Offering: **Host**

GOVT281 Social Movements in East Asia
Despite East Asia's reputation for acquiescent populations and weak civil society, the region has been replete with social movements. This course assesses the state of civil society in both authoritarian and democratic societies in East Asia by surveying contemporary social movements in China, Japan, South Korea, and Taiwan. The course is designed for students to gain an understanding of how civil society looks in East Asian countries and its role in social and political changes in the past and present times. Although the course will not be able to cover the entirety of social movements in the region, the course is to equip students with contextual knowledge and theoretical tools to take a critical approach to examining current and future social movements in the region.

GOVT282 Activism in Exile
This course examines how social movements and political opposition groups adapt and adjust their activism when they are in exile. Through a variety of cases spanning from the Middle East to South Africa, we will explore what shapes diasporic activism and why some movements are more resilient than others. We will situate these discussions within broader debates around social movements and migration. After we consider what exile is, how different migration regimes emerge, and how conditions in the host states may vary, we will look at both cases of violent and nonviolent mobilization in order to understand what shapes diasporic activism. The course concludes with a reflection on what happens after exile, when movements and leaders return to their home country.

GOVT284 Comparative Politics of Western Europe
The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian "second republic"?

GOVT285 Losers of World War II
This course explores the experiences of Germany and Japan in the postwar era. These countries faced the dual challenge of making political transitions to democratic government and recovering from the economic ruin of World War II. Japan and Germany both were occupied and rebuilt by the United States, and both were blamed for the devastation of the war. How did Japan and Germany respond to being cast as worldwide villains? How strong were the democracies that developed? This course explores these questions by comparing the culture, history, and institutions of these two countries.

GOVT295 Korean Politics Through Film
This course explores the contemporary politics of Korea through academic sources and films. Students will discover how the tumultuous history of modern Korea has contributed to the present political conditions in the two Koreas. The course will focus on issues surrounding major political events in both South and North Korea, including Japanese colonialism, Japan-Korea relations, Korean War, military dictatorships, economic development, democratization, neoliberalism, inter-Korean relations, and US-Korea relations. Films and documentaries spanning from the 1990s to the present will highlight these political issues and events through the eyes of Korean filmmakers. The course will explore how films problematize political issues and how a film's storytelling compares to actual history and scholarship on Korea.

GOVT298 Terrorism and Film
This course provides an overview of the major concerns and debates in the study of terrorism and political violence, and it uses the prism of cinema to further grapple with the complexity of political violence. We will explore the root causes of violence and the varied reasons why individuals and organizations turn to violent tactics. We will also discuss what policies are most effective and desirable, problematizing our understanding of security, and examining the implications of counterterrorism for civil liberties, human rights, and international law. The films assigned contextualize the theoretical issues and address the question of political violence from alternative perspectives: those of the perpetrators of violence, victims, soldiers, government officials, and police officers. In this immersive winter session, students are expected to watch the films outside of class, between the morning and the afternoon class session. Through the readings, films, discussions and assignments, the goal of the course is to help you understand the major controversies and debates surrounding terrorism, to equip you with the tools to critically engage with the media, academic and policy discourses on political violence, and to enhance your speaking, writing and analytical skills.

GOVT302 Latin American Politics
This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include: why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

GOVT303 War and Society
While most societies condemn physical violence between individuals, they condone and encourage collectively organized violence in the form of warfare. War is obscene, yet all modern societies have engaged in warfare. This course will examine war as a social, political, and historical phenomenon. We will look at the way in which wars have led to the consolidation of political power and the acceleration of social change, as well as the relationship between military service and the concept of citizenship. The course also examines the crucial role played by technology in the interaction between war and society. Films and novels will be examined to test to what extent these literary works accurately reflect, or obscure, the political, social, and technological logic driving the evolution of war. Our examples will include warfare in premodern society, the gunpowder revolution in early modern Europe and Japan, the American Civil War, colonial wars, World War I, World War II, Vietnam, and Iraq.

GOVT305 Challenges to Democracy in East Asia
East Asia is home to a remarkable diversity of political regimes, economies, religions, and cultural traditions. The region includes one of the most repressive countries in the world, North Korea, alongside authoritarian regimes like China that tout political stability and rapid economic growth. At the same time, Japan, South Korea, and Taiwan represent fully consolidated democracies -- albeit ones that continue to grapple with significant domestic and international challenges. This course examines the workings and challenges of democracy in East Asia by addressing questions such as: What are the defining features and challenges of existing democracies in East Asia? To what extent are these features unique to the region? Why do some citizens in East Asia find authoritarianism appealing? How do historical experiences with authoritarian rule shape democratic institutions and political culture today? And does China's authoritarian model present a challenge to democracy in the region?

GOVT308 Comparative Urban Policy
Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.

GOVT312 Strategic Dilemmas in Politics
Politics is full of strategic interactions: politicians and voters, enemies and allies, office-holders and bureaucrats. But while the details might be different from issue to issue, the challenges are often the same. How can a large group cooperate on a common goal? How can you make a promise or threat credible? How can you learn someone's true intentions? This course uses in-class games and simulations to explore some of the key lessons that game theory can teach us about politics. There will be a bit of introductory game theory, but the focus will be on the intuition, not the method. The goal is to identify and analyze common strategic challenges in politics.

GOVT313 Civil Wars and Armed Groups
Since 1945, five times as many people have died in conflicts within countries (between governments and rebels/militias) than in conflicts between countries. This course digs into the big questions about civil wars: Why do they begin? Who participates? How do they end, and why do some never end? How do combatants treat civilians, and why? Class will be primarily discussion-based, evaluating common answers to these questions, and the evidence behind them, from conflicts all over the world. Along the way, students will design their own research question and a strategy to answer it. The course is especially appropriate for sophomores and juniors who are potentially interested in writing a thesis, but relevant to any student interested in war and peace.

GOVT314 Public Opinion and Foreign Policy
The relationship between leaders and the public remains a core concern of democratic theorists and political observers. This course examines the nature of public views on foreign policy, the ability of the public to formulate reasoned and interconnected perspectives on the issues of the day, and the public's influence on foreign policy decisions with a focus on the U.S. We will consider the role of the media and international events in shaping public perspectives and public attitudes toward important issues such as internationalism and isolationism, the use of force, and economic issues. This course provides an intensive examination of a very specific area of research. As such, strong interest in learning about public opinion and foreign policy is recommended.

GOVT315 Policy and War through Film
This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

Prereq: **None**

GOVT316 Wars of Resistance in Scholarship and Film
This course explores the theory, practice, and interpretation of wars that see ostensibly stronger powers wage wars against relatively weaker resistance movements. It combines scholarly readings and interpretive films to gain a deeper understanding of how and why resistance and insurgency can prevail when confronting adversaries who are numerically superior. Students will analyze the inescapable paradoxes that can make wars of asymmetry difficult for stronger states. The seminar discussions will develop a keener grasp of the logic that permeates wars where the weak resist invasion and occupation. This course intersects international security studies, history, and conflict studies. This course will improve knowledge about asymmetric wars and for critical analysis. Though there are no prerequisites, it is desirable that students have previously taken a course in conflict studies or war.

GOVT318 America's Unexceptional War of Independence
Americans often think of the War of Independence as an exceptional event, focusing on the unique people, ideas, and historical turning points. But in many ways the key actors in the War of Independence faced similar challenges that others around the world have faced and continue to face: how to organize around political grievances, how to prevent a conflict from escalating, how to manage trade relationships, and how to navigate great power politics. Through lectures, group discussions, and essays, this course will compare the American experience to other conflicts, examining how the American experience reflects broader patterns.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT319 Citizenship and Statelessness in Comparative Perspective
This course will investigate how modern nation-states decide who has the right to citizenship, along with situations where certain groups are denied citizenship of any country. Every country in the post-Westphalian world-system hosts large numbers of minorities and migrants. Thus, it becomes essential for each nation to define its territorial boundaries and who belongs to it. Are citizenship rules determined mainly based on material considerations, such as economic and security issues? Or are such policies based on racial and civilizational notions shaped by encounters with pre-colonial and colonial forces? In this seminar, we will consider these questions about belonging and territorial definitions, which are often politically contested. We will start by paying attention to various theoretical explanations of citizenship, and then look at case studies from non-Western and Western settings. Class discussions will be complemented alongside discussions with experts who will join us in-person on campus or via Zoom.

GOVT320 International Relations of South Asia
Since independence in 1947, the countries of South Asia have seen major wars, a nuclear arms race, dozens of small insurgent movements supported by neighbors, and complicated politics around identity, citizenship, and migration. At the core of these issues are questions about whether and how to transition a multiethnic, multireligious empire into nation states. This course will explore the major questions of war, peace, and politics in modern South Asia. Why did India and Pakistan fight three wars in the first 25 years of independence, but have largely avoided open conflict since? Why have some insurgencies escalated into major conflagrations while others have simmered at low levels for decades? How have religion and language shaped patterns of migration and citizenship, and been shaped by them in return? Along the way, students will design and conduct their own research on key issues in South Asian politics.

GOVT321 Topics in International Law
This course is a seminar on international cooperation and international law (IL) for students of international relations. The course's primary goal is to enhance students' understanding of how ILs facilitate or hinder international cooperation. The course has four modules: a) Introduction, b) IR theories on ILs, c) Application (Trade, Climate, Gender, Conflict), d) Future of ILs. The emphasis throughout the course is on the role of politics, understanding why ILs operate as they do, and recent episodes that illustrate the issues. Throughout the course, students will learn to produce concrete policy recommendations drawing from key research in the literature on ILs, practice giving others constructive feedback on peers' policy proposals and revise their own projects, and think critically about theories of international relations.

GOVT322 Global Environmental Politics
This course is an introduction to environmental politics for students of international relations. This course aims to enhance students' understanding of how international politics may affect environmental outcomes. The course has four modules: a) Introduction, b) IR theories and the environment, c) Application to select environmental issues, d) Policy implications. The introductory module presents several concepts that are important to understanding environmental cooperation. The IR theory module introduces canonical IR theoretical frameworks. Primarily, this module investigates how states' power dynamics, international institutions, domestic political systems, and NGO networks may explain the likelihood of international cooperation on environmental issues. The third module applies the theoretical concepts to real-world policy issues such as climate change, water air pollution, and endangered species. The final module focuses on the future of environmental cooperation among states. Assignments include an in-class quiz on key concepts, a role-based negotiation simulation, a podcast episode analyzing an environmental agreement of student choice, and a final exam. By the end of the semester, students think critically about environmental agreements by applying theories to policy examples.

GOVT323 Refugees in World Politics
The primary objective of this course is to provide students with i) an introductory overview of the political, economic, social, and security determinants of refugee flows; and ii) the political and social responses of receiving governments and societies to them. Using both historical and contemporary case studies, this course will highlight security concerns engendered by internal displacement and transnational migration. These include armed conflict, smuggling, trafficking, and terrorism. This course will also highlight the concepts of citizenship in receiving

states, and the roles played by the international institutions in influencing state policies towards refugees.

GOVT324 Africa in International Politics
The continent of Africa features 54 countries and the fastest growing population on the planet. This course contextualizes the African continent in international politics, and provides an overview of the many ways (especially sub-Saharan) African states engage with foreign countries, with international institutions, and with each other, from colonial times to the present. We'll focus on integrating the African continent into theories of international relations, including African countries' roles in the international political economy and in international security. Topics include colonialism, trade, aid and structural adjustment programs, sovereign debt, international and regional organizations and blocs, security arrangements, and African states' roles in ongoing international climate governance. The focus of the course is on the foreign policy and international interactions of countries in sub-Saharan Africa. The course therefore provides a broad overview of diverse topics and countries, emphasizing breadth over close study of a particular case or topic. The assignments provide an opportunity for students to add depth to their knowledge of particular countries and contexts of their choosing. In addition to giving students the opportunity to learn more about politics in contemporary sub-Saharan Africa, the course will provide students with experience testing social scientific theories against empirical evidence, conducting original research using primary and secondary sources, and writing succinct research reports. Students will analyze both issues of academic and political importance.

GOVT325 Solving the World's Problems: Decision Making and Diplomacy
This course represents a hands-on approach to decision making and diplomacy. It is designed to allow students to take part in diplomatic and decision-making exercises in the context of international political issues and problems. Important historical decisions will be evaluated and reenacted. In addition, more current international problems that face nations today will be analyzed and decisions will be made on prospective solutions. Finally, various modern-day diplomatic initiatives will be scrutinized and renegotiated.

GOVT326 Political Consulting for International Business
This course is an applied course in political consulting skills for international business. It is designed for students who are directed toward a career in international business. Entry to the course requires a strong track record in prior involvement and or interest in international business. Emphasis will be placed on developing the most important political skills related to working in an international corporation. Learning will take place by applying what has been learned in real-life international business scenarios. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional environments. The course asks the class to function as a working committee of top executives trying to confront important international business challenges.

GOVT327 Experiments in International Development
Do policies designed to promote development around the world actually work? Do they sometimes produce effects we didn't expect? This seminar teaches the experimental method of social science research and applies it to these questions. Students will read examples of how social scientists have used experiments to study international development -- broadly defined -- including foreign aid, conflict and violence, illicit finance, elections, climate cooperation, trafficking in persons, and migration. Over the course of the seminar, students will design and analyze their own experimental research project and will write either an academic research article or an impact evaluation policy report. The seminar is especially appropriate for any student considering a career in policy or social science. Throughout this course, students will learn about experimental methods. They will also learn how to form a research question, conceptualize and measure variables, develop testable hypotheses, select an appropriate case/unit of analysis, write a literature review. These skills may be especially helpful for students who pursue an honors thesis or other original research project.

Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT329 International Political Economy
This course examines the political consequences of and responses to international economic exchange between countries with an emphasis on whether climate change changes this political behavior. In particular, we will look at how domestic actors, such as voters, firms, and associations, respond to and try to shape government action on issues such as trade, international finance, migration and foreign direct investment. Rather than consider climate change and its policy as a separate domain, this course will focus on the interaction between the climate and other policy areas in international political economy (IPE). Students will be provided with an introduction to these topics via lectures and discussion sections as well as data analysis and social science research techniques in weekly labs.

GOVT330 Policy and Strategy in War and Peace
This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction

influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy makers, strategy, and war interact, while honing their critical thinking and writing skills.

Prereq: **None**

GOVT333 International Organization
Why do international organizations (IOs) exist? Do they shape outcomes in international politics? Who runs international organizations? This course considers the role that institutions have played in addressing global problems since World War II. Some argue their role is trivial, since there is no international police force that can constrain states' behaviors. Others argue their role is profound, as institutions help states to overcome important barriers to cooperation. And just as in domestic institutions, the rules of IOs represent some interests more than others, creating opportunities for controversy and contestation. We will apply these theories to understand several institutions governing economic stability, environmental sustainability, human rights, security affairs, and global development. At the conclusion of the course, students will be able to explain why these IOs exist, how well they work, and what challenges they face in the future.

GOVT336 New Topics in International Political Economy
This course helps students understand how states cooperate in three new areas: global health, climate, and identity politics. The course introduces new IPE research on health, climate, and identity, focusing on these issues' relationships with interstate economic interactions. The course has four modules: a) IPE theory review, b) Global health and trade/intellectual property, c) Environmental protection and trade/foreign direct investment, d) Identity politics and globalization. After a brief review of IPE theories in the first module, the course will touch on specific topics of importance. For example, the health unit explores the relationship between intellectual property rights and global health outcomes, how trade policies affect states' responses to health crises, and how the global trade regime (i.e., the WTO) mediates those policy responses. The environment module investigates how economically developed countries use trade agreements to protect the environment and why some companies support climate actions more strongly than others. The identity module examines how gender, race, and ethnicity may shape individual preferences on globalization. In the process, students will apply IPE theories to understand new challenges the world faces. This course is designed for students who are already familiar with core concepts in IPE, including those who have previously taken GOVT 329. However, GOVT 329 is not a prerequisite.

GOVT337 Virtue and Glory: Classical Political Theory
How shall we think about public life, our "life of common involvements"? This course is a survey of premodern political theories, with attention to their major theoretical innovations, historical contexts, and contemporary relevance. Major themes will include the nature of political community and its relation to the cultivation of virtue, the relation of politics to economics, the origin of the ideas of law and justice, and the relation between knowledge and power and between politics and salvation. Readings will include Plato, Aristotle, Augustine, Aquinas, Machiavelli, and others.

GOVT338 Global Modern Political Thought
Modern political thought is defined by questions of the consolidation of state power, democratic governance, the rise of capitalism, and the legitimate uses of violence. Yet, these questions are intertwined with questions of colonialism, racism, and inequality. How does capitalism give rise to new ways of life across different times and places? What new forms of subjectivity arise with the consolidation of the nation-state, the emergence of new forms of communication, and the rise of the so-called autonomous individual? What is the relationship between democracy, empire, and colonialism? This course will consider the writings of thinkers such as Thomas Hobbes, John Locke, Jacques Rousseau, and Karl Marx in dialogue with Franz Fanon, Mao Zedong, B.R.

Ambedkar, Mahatma Gandhi, Kwame Nkrumah, Enrique Dussel, and others. This course is required for political theory concentrators in the government major.

GOVT339 Contemporary Political Theory
How shall we get along? This course examines some important 20th and 21st century theories of politics. Major issues include the role of reason and emotion in grounding the basic principles of our political lives, the conceptual foundations of liberal and civic republican democracy, and critiques of liberalism from communitarian, critical theory, and postmodern perspectives. We will explore what political theory can be today. This course, together with GOVT337 and GOVT338, provides a survey of major Western political theories; at least two of these courses are recommended for students concentrating in political theory.

GOVT340 Action and Inaction in Social Movements
This is a class on contentious politics that examines how the action-inaction binary shapes our understanding of social movement strategies, life cycles, resilience, and success. We will examine activity and inactivity in the context of a variety of social movements, diaspora groups, and rebel organizations, at various stages of their lifecycle. When is inactivity a failure of mobilization or a sign of weakness, and when is it an intentional strategy? What does "doing nothing" look like? Can it ever be an effective strategy for a group? When is inactivity a form of organizational defeat? To address these questions, we will look at different forms of "nothing doing": social movements that choose disengagement or tactics such as hunger strikes, exiled movements that focus on internal bonding and capacity building rather than overt activism, and rebel groups that intentionally abstain from violence or mobilization for prolonged periods.

GOVT341 Visions of Democracy
This course will explore diverse articulations of what democracy was, what it is, and what it could be. It takes its cue from Sheldon Wolin's suggestion that in political theory, putting forward a vision means mobilizing the imagination to illuminate otherwise hidden phenomena and communicate the theorist's values. The visions of democracy that we will analyze in the course were written in (or about) a wide range of time periods; center a variety of locations, including Latin America, Europe, North America, and South Asia; were expressed in different genres, from poetry to academic political theory; and present different valuations of democracy, from conservative critical to romantic laudatory.

Prereq: **None**

GOVT342 Questioning Authority: On the Politics of the Teacher-Student Relationship
What is the authority of the teacher in an era where the legitimacy of institutions and curriculum are under fire? Can hierarchical relationships between teachers and students be beneficial for learning and for political life? What are alternative conceptions of the teacher-student relationship? This course will explore different models of teaching within the history of political thought and beyond. From Socrates to the present, the context and manner of teaching has been just as important to political theorists as the content itself. The course will consider how questions of power, sexuality, risk, wisdom, and friendship inform different pedagogical styles and their implications for preparing citizens for democratic life. Readings include John Locke, Immanuel Kant, Alexis deTocqueville, John Dewey, Hannah Arendt, Mr. Rogers, Jacques Ranciere, Bernard Stiegler, Laura Kipnis, and others.

GOVT346 War on Terror in Contemporary Political Thought
In an ironic statement made to the men and women at Whiteman Air Force Base on October 19, 2001, Secretary of Defense Donald Rumsfeld claimed that in the emerging struggle that came to be known as the "War on Terror," Americans would be faced with a choice when confronting a new, ill-defined enemy: "We have two choices: Either we change the way we live, or we must change the way they live. We choose the latter." And yet, despite Rumsfeld's resoluteness that Americans would stand firm and never "change the way we live," there is hardly a single aspect of American--and indeed global--society, culture, and politics that has not been altered or even dramatically transformed by the attacks of September 11 and the US response. The discipline of political theory practiced in the United States and across the world was no exception. In the immediate aftermath of the attacks, a new set of questions were placed on the agenda of political theorists, and older, even perennial questions taken up by the discipline were sharpened or pursued with greater urgency and intensity. This course provides students with a snapshot of a set of theoretical debates that the War on Terror provoked (and still provoke), including debates related to the limits and character of patriotic attachment, the question of the US's imperial ambitions, and how we might forge new conceptual tools to understand forms of terrorist and state terrorist violence. These debates will not simply enable students to think about September 11 and the War on Terror specifically. This course will introduce students to a set of concepts and questions that oftentimes precede, and indeed move far beyond the context of September 11 itself. In short, the attacks of September 11 and the War on Terror provide us with an entry point to examine concepts that are integral parts of the current toolbox political theorists use to make sense of the world.

GOVT347 Political Freedom
Is political freedom about doing what you want as long as you don't hurt anyone else? Is it about collectivizing power or actively participating in governance? Is freedom an inherently individual practice or a necessarily collaborative one? A private or public matter? Does it depend upon rights or the transformation of social conditions? Does it emerge from political representation or direct democracy? Is capitalism the scene of human domination, human freedom...or both? Is freedom a concept, a principle, or a practice? What is the relationship of political freedom to power, equality, and community? What is the relationship of social identity to freedom -- is it emancipatory or imprisoning? Is freedom something we even desire, or do we experience it as a burden? What happens when Dr. King meets Karl Marx, when John Stuart Mill meets Kate Bornstein, when Cathy Cohen meets Milton Friedman? In this course, we will pursue these kinds of questions through consideration of classics in Western political theory,

contemporary writings, and some films. We will neither settle the question of what freedom is nor the question of how to produce it. However, we will deepen our appreciation of its importance and complexity.

GOVT348 Justice and Equality
To what extent and in what ways does justice require that people have (roughly) equal life prospects? That issue has become increasingly urgent as inequality has increased rapidly during the last 40 years or so. Although inequality in the US has grown faster than in most other (already developed) countries, the increase in inequality is widespread. At the same time, at the global level there has been a reduction of inequality as economic growth has delivered hundreds of millions of people from deep poverty. This class will examine the relationship between equality and justice. Our principal concern will be to assess how, in what ways, and among whom justice requires equality, but we will also look at the dynamics of inequality--how inequality has developed historically, the factors explaining the recent surge of inequality within countries while equality of life prospects has lessened globally, how growing inequality may be affecting domestic politics, and the policies that could address the issue of equality.

GOVT350 Law, Justice, and Democracy
In this course, we will explore law from a political-sociological perspective, in relation to the historical, political, and cultural contexts within which it exists. In the first part of the course, we will address the question "what is law?" by exploring a variety of theoretical approaches (Marxian, Weberian, and Durkheimian perspectives, legal formalism, legal realism, and critical legal studies). We will then move on to discussing the relationship between law and justice. In the third part of the course, we will talk about the politics of crime and punishment, exploring a number of key issues, including the birth of modern prison, rising incarceration rates in the U.S., the emergence of drug courts, and the politics of death penalty. In the fourth section, we will discuss the role courts play in constructing political and social reality. What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases. In the final section of the course, we will discuss law's place in the American system of government by exploring the evolving relationship between courts, the presidency, and Congress.

GOVT352 Deception and Democracy
What's the best way to tell if a politician is lying? According to the punchline of this old joke, you should simply determine whether their lips are moving. This course will undertake a more complex and nuanced analysis of political deception and democratic government. Is lying for political gain undemocratic? What ethical duties and obligations befall representatives and citizens within a democracy? Where do we draw the line between persuasion and deception? By examining the philosophical treatment and historical practice of political deception - from Plato's Myth of the Metals to Donald Trump's illusory trade deficit with Canada - we will broaden our understanding of various participatory, deliberative, and epistemic forms of democracy and their procedural and substantive commitments.

GOVT354 Marx and Marxism
What does it mean to "think like a Marxist" or "see the world as a Marxist" might? What are the fundamental concepts, categories, methods, and modes of inquiry we associate with the work of Karl Marx and those who consider themselves "Marxists"? What are the significant political, social, and theoretical problems that motivate scholars, activists, and citizens who participate in this ongoing tradition of thought and practice? This course will provide students with points of entry to make sense of these questions, placing particular emphasis on Marxism as a multifaceted and evolving method that rather than a dogmatic worldview that sets forth a series of rigid truth claims. Together, we will work to decipher some of the key texts produced by Karl Marx and others within the Marxist tradition. This will in turn enable us to parse out a diverse set of theoretical, historical, empirical, and normative questions, which, in addition to those above, include the following: 1. What is capitalism? How did Marx believe it worked, and how do contemporary Marxists believe it works in the present? What, if anything, is wrong with capitalism as a mode of social organization? What are the theoretical tools Marxists use to approach these questions? What are the diagnostic and prescriptive elements of the theory? 2. How do Marxists tend to explain contemporary socio-political pathologies like racialization, class domination, imperialism, fascist resurgence, environmental catastrophe, gender-based domination, or the degradation of democratic politics? What might this method allow us to see that other modes of inquiry cannot? 3. How, if at all, must Marxist styles of inquiry adapt in order to maintain their relevance as analytical tools? How have more contemporary Marxist thinkers expanded,

modified, or critiqued the work of Marx in order to maintain the life of the tradition? Which new categories have been integrated into Marxist theorizing in recent decades, and to what effect? 4. What is insufficient with the Marxist method? What inevitably falls outside of its purview? Is this a fatal flaw or a problem to be corrected? Is it appropriate for us to ask that this method allow us to explain everything? 5. What is "Marxism" and how might it differ from the work of Marx himself? How do we link certain seemingly disparate literatures together as a coherent movement? In other words, what makes "Marxism" an "ism"?

GOVT355 Political Theory and Transitional Justice
Transitional justice refers to the variety of legal, political, and social processes that occur as a society rebuilds after war; it includes war crimes trials, truth commissions, and the creation of memorials. Although the term "transitional justice" is a recent one, the philosophical issues contained within it are at the core of political philosophy. What kind of society is best? What is the relationship between political institutions and human nature? What does justice mean? The purpose of this course is to understand the issues of transitional justice from both practical and philosophical perspectives and will include case studies of World War II, South African apartheid, and the genocide in Rwanda.

GOVT356 Theorizing Subjection Beyond Contract and Consent
What modes of subjection does political life elicit from us, and how do they underpin and challenge our ideas of consent? Can we give genuine consent when we have already been subjected to parental authority? When we have unconscious desires we cannot avow? When we lack meaningful control over the norms that constitute our political, social, psychic lives? This class examines the centrality of the notion of consent to the liberal democratic order, and how it requires a prior mode of subjection that the liberal subject cannot knowingly or willingly consent to. In Unit 1, we read classic formulations of the liberal individual who consents to political rule (Locke, Hobbes, Rousseau). We look for the ways these theorists presuppose and disavow practices of subject formation that are beyond consent--parental authority, the informal authority of mores and norms, deception, precarity, ideology. We then read critiques of the social contract tradition that highlight the constitutive exclusions of liberalism, and ask how consent bears upon subjects that are constituted by the state as included others (Pateman, MacKinnon, West, Mills, Simplican). In Unit 2, we read critiques of the liberal subject that interrogate the possibility of genuine consent, examining issues of false consciousness (Marx, Marcuse), self-opacity and the unconscious (Freud, Benjamin), discursive constitution (Foucault), and performativity (Butler). We use these thinkers to interrogate the distinctions underpinning liberal notions of consent, such as autonomous and heteronomous, authentic and inauthentic, public and private. In Unit 3, we examine how the notion of consent is changing in in our current political moment, in which the liberal democratic state is waning, but the notion of consent persists, such as under neoliberalism (Brown, Feher, Berlant), sexual assault (Kessel, Halley, Murray), and right-wing movements (Grattan, Anker). We close by considering what might be alternatives to and reconfigurations of this model of consent (late Foucault, Maxwell).

GOVT357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

GOVT357Z Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic's relevance for contemporary United States.

GOVT358 Fascism
In 1932, Benito Mussolini proudly declared the twentieth century to be "a fascist century," one that would shed the supposedly degenerate nineteenth-century aspirations towards "socialism, liberalism, and democracy" and their attendant assumptions of progress, equality, and rationalization. This prediction surely did not come to pass, yet the interwar period of the twentieth century

(1918-1939) and the fascist movements that incubated during this period have left an indelible stamp on global history. The twentieth century was not "a fascist century," but it was surely a century haunted by the global experience of fascist terror. At the same time, fascism cannot be consigned to history as some kind of political artifact. The afterlives of interwar fascist movements have in many cases been vibrant, and neo-fascist and "post-fascist" movements continue to maintain degrees of influence in western and non-western countries alike. The so-called "populist turn" in the decade after the financial crisis of 2008 has also brought renewed attention to potential linkages and continuities between certain contemporary political formations and the beliefs and practices of the fascists of the interwar years. But what exactly is fascism? This seemingly basic question has vexed scholars for decades, and provoked countless competing interpretations that settle on vastly different conclusions. Additionally, methodological debates concerning how to approach these movements as subjects of scholarly inquiry have been no less contentious. This course will introduce students to an important set of debates and interpretations regarding fascism's character as a doctrine; the sociological, economic, and political conditions that facilitated its rise; the question of how fascists mobilized support; and the fundamental questions related to how fascists governed and why. Importantly, we will also approach the theoretical questions of the foundations of fascist ideology, how fascists imagined their ideal political subjects, and the kinds of affective energies (rage, nostalgia, disgust, fear, desire for redemption/purification, etc.) that facilitated distinctly fascistic sentiments. Our course will not provide students with fixed, dogmatic answers to each of these questions, but will rather grant students access to a set of tools that will enable them to engage in responsible, scholarly inquiry on these matters of pressing political concern.

GOVT365 Cybercrime and Cybersecurity
This course will cover the elements of "computer crime" under U.S. law, how computer-based crimes are investigated and prosecuted, and current legal and policy developments that affect data security and privacy. The course will also address U.S. cybersecurity policy and the governance of offensive cyber operations, as well as the role of private-sector institutions such as providers of critical infrastructure, electronic communications, and data storage. Topics will include hacking, ransomware, botnets, government access to data, geolocation information, data privacy regulations, and the role of cyber activity in international affairs. The course is not a technical or Computer Science course, but will involve high-level discussion of computer-related topics such as how computers, networks, the internet, and cloud storage work. Students will not need to have a background in these areas and the professor will provide supplemental materials in this area.

GOVT366 Empirical Methods for Political Science
This course is an introduction to the core methods used in the study of political phenomena. We will cover topics in theory building and hypothesis generation, research design and operationalization, and data collection and analysis. Throughout the course, there is a significant emphasis on practical application and familiarization with statistical software. Students will come away from this course with a robust set of skills to conduct original research. You will also become more critical consumers of arguments made in mass and social media, academia, and political debates.

GOVT368 National Security Law
In this course, students will learn legal concepts that govern law enforcement investigations and criminal prosecutions, and then explore how those concepts apply in the context of national security. The course will examine (1) the history and structure of the U.S. Intelligence Community; (2) differences between investigative tools such as search warrants and wiretaps in traditional and national security cases; (3) the history, role, and future of the Foreign Intelligence Surveillance Act; (4) how counterterrorism and counterespionage statutes operate; and (5) how prosecutors use classified information as evidence in public trials. Guest speakers and current events will inform part of the semester.

GOVT369 Political Psychology
This course explores the psychology of political preferences and decision-making. More specifically, we will examine the role of predispositions, values, rationality, emotions, and social influences on a variety of political attitudes and behaviors. In doing so, we will engage with research from many disciplines that study human behavior, with the goal of obtaining a more holistic understanding of why people do what they do in the realm of politics. This deeply interdisciplinary endeavor will motivate us to think about politics beyond single disciplinary perspectives, moving toward a more comprehensive view that adopts useful insights from each relevant field.

GOVT371 Judicial Decision-Making
This course examines the roles judges play in American politics, with a particular emphasis on judicial decision-making. Topics include, but are not limited to: theories of judicial decision-making, the selection of judges, judicial empathy, and constitutional interpretation. Throughout the course, we will engage in a multidisciplinary discussion about the craft of judging, with a focus on political science theory and empirics.

GOVT374 Seminar in American Political Economy and Public Policy
In 2023, the standoff over the debt ceiling threatened to have catastrophic consequences for the U.S. and the world economy. Why were the politics so complicated? Why were the stakes so high? This seminar explores the long-term fiscal challenges facing the United States grounded in a broader discussion of the postwar political economy. Although the nation exited World War II with a record level of debt, within three decades, the debt-to-GDP ratio had fallen by almost 80 percent. However, significant tax cuts in the 1980s and again in the 2000s, the growth of entitlement spending, and a series of shocks (e.g., two wars, the financial crisis, and the COVID-19 pandemic) brought about a great reversal. Within the next few decades, the national debt is projected to exceed 200 percent of GDP. By that time, interest payments will be the largest component of federal spending. Moreover, absent policy change, the trust funds supporting Social Security and Medicare will become insolvent, placing greater pressure on public finances. This seminar will explore the structure of federal finances, the politics of taxation, the growth of entitlements as a share of federal spending, the ways in which polarization has undermined the budgetary process, and the normative and practical implications of the debt. We will conclude with a discussion of competing reform proposals.

GOVT375 American Political Development
This is a course about the big questions in American politics. What is it all about? What does it mean to be living under a text written more than two centuries ago? Is the very concept of development an oxymoron for constitutional government? This course introduces students to a scholarship and a method of analysis that melds the historical with the institutional, applied to understanding the evolving state/society relationship in American political life. We will examine the ways in which developing state institutions constrain and enable policy makers; the ways in which ideas and policy-relevant expertise have impacted the development of new policies; the ways in which societal interests have been organized and integrated into the policy process; and the forces that have shaped the evolution of institutions and policies over time. This seminar will provide an opportunity to survey the literature drawn from several theoretical perspectives in the field and to consider competing arguments and hypotheses concerning the development of the American state and its changing role in the economy and society.

GOVT376 Political Polarization in America
In the 1950s, political scientists feared that weak parties in the United States threatened democratic accountability. Today, many political scientists argue strong, ideologically extreme parties distort representation. Undoubtedly, things have changed, but why? Several possible culprits exist, including partisan gerrymandering, primary elections, the ideological realignment of the electorate, and changing congressional procedures. We will cover the possible explanations and try to decipher what explanation, or combination of explanations, is most convincing. While we evaluate the arguments for why polarization has increased we will also debate the merits and drawbacks of strong parties at the elite level. Finally, we will examine to what extent polarization among elected officials and activists reflects polarization in the public.

Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT377 American Political Thought
This course will provide students with a thorough discussion of the main currents of American political thought. We will explore a selection of key texts and speeches that have helped to shape American political culture. Beginning with the Founders and ending with the contemporary era, we will cover moments of critical change between then and now. We focus on the intellectual battles of the past because, apart from being rewarding in themselves, they help us to think critically about contemporary politics. Accordingly, this course will emphasize how ideas give rise to individual identities, how they motivate political actors, and how they explain political outcomes.

GOVT378 Advanced Topics in Media Analysis
Government, corporations, campaigns, nonprofits, other organized interests, and sometimes individuals have a vested interest in knowing and reacting to media messages that affect them. To do so, they need information on what is being said, in what venue, by whom, and with what effect. This seminar will provide hands-on, in-depth experience with academic research involving media, including the type of advertising analysis conducted by the Wesleyan Media Project team. Students will be involved in various aspects of research, including data collection, data coding, literature reviews, data analysis and visualization, and writing/editing.

GOVT379 Access to Civil Justice
In this course, students will explore contemporary issues related to the public's ability to access civil legal advice, legal representation, and fair outcomes within our civil justice system. Students will be exposed to scholarship that highlights the difficulties the public faces when they have justice problems, including 1) exclusion from legal processes; 2) lack of resources; 3) lack of awareness of rights; 4) difficulty recognizing the nature of their problem; and 5) lack of confidence in the justice system. The course will culminate with student-designed research projects investigating and proposing solutions to an access to justice question relevant to a collaborating local, state, or national civil justice organization's work.
Offering: **Host**

GOVT380 Public Opinion and Polling Lab
Survey research is a crucially important tool for understanding how everyday people think about any given topic. This is especially important to those studying government in a democracy as public preferences serve as a key guide to legislators and policy makers on how the government should function. However, there are a number of challenges that can make getting an unbiased assessment

of the public's true beliefs difficult. This course is meant to serve as a more advanced hands-on seminar that will expose participants to the exciting and messy nature of survey research. More specifically, students will get first-hand experience designing surveys and analyzing the results but will also work through the many challenges in assessing public attitudes, including how to conceptualize and measure opinions and how to sample and weight data appropriately.
Offering: **Host**
Grading: **A-F**
Credits: **0.50**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT381 DeltaLab: Computational Media Analysis
The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.

GOVT384 Representation in Congress
This class will examine the nature of congressional representation both from the perspective of how individual members represent their constituents and how effectively Congress as a whole represents the diverse interests of the country. We will pay particular attention to how reelection motivates members of Congress's behavior and how increases in polarization and the centralization of power in the hands of party leaders has affected the nature of congressional representation. In addition, we will focus on the degree to which certain groups are over or underrepresented in Congress and the resultant consequences for policymaking and institutional legitimacy.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT385 Women and Politics
In this course we will study a variety of topics related to the theme of women and politics: women's political participation, the gender gap, women in political parties, female leadership, and women's issues. Because women's political engagement is affected by their position in society and in the economy, we will also study topics such as inequality, power, discrimination, and labor force participation. Although we will consider these issues in the U.S., our approach will be strongly cross-national.

GOVT386 The Nuclear Age in World Politics
This course examines the role of nuclear weapons in world politics. Why do states acquire nuclear weapons? What are they good for? Do nuclear weapons make weak states more secure by leveling the playing field, or less secure by making them targets for annihilation? Are nuclear weapons a force for stability or instability? Are missile defenses defensive or offensive? Are these weapons still relevant, or is it time to rethink their usefulness? Topics include rational and extended deterrence, strategic doctrine, nuclear superiority, the stability-instability paradox, nuclear proliferation, rogue states, nuclear terrorism, missile defense, and Cold War crises.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT387 Foreign Policy at the Movies
Recent research on public opinion has suggested that public attitudes about foreign affairs are informed by many non-news sources. This course examines the messages and information provided by movies with significant foreign affairs content. The questions considered are, What are the messages about international politics sent by the movies? Are these messages consistent with the understanding of the events and processes within the political science literature? What are the implications of movies and the information they provide for democratic governance? Students will watch the movies outside of class. Class periods will be devoted equally to discussion of the political science concepts and their portrayal in films.

GOVT389 Globalization in Practice: Activism in the Global Village
Globalization is considered by many to be the most powerful transformative force in the modern world system. Modernization and technology have effectively made the world a smaller place with respect to the interdependence and interpenetration among nations, which are greater today than at any time in history. But while most agree on the transformative power of globalization,

many disagree on its nature and its effects on modern society. Liberals hail globalization as the ultimate means to world peace and prosperity. Leftists see it as a means of reinforcing the inequality and unbalanced division of labor created by modern capitalism. Still others, such as mercantilists and nationalists, see it as a source of political instability and cultural conflict. In the final analysis, globalization carries a variety of malign consequences but also produces abundant means for advancing life on our planet. This class will approach globalization through an activist platform. Each student will be an activist and work on solving real world problems that are produced by globalization. But globalization has also generated a great many resources and outcomes that can be used by activists to solve these problems. Students will learn to use these as building blocks for a better world. This class is heavily project-based. It applies theories and learning to real life situations. There is also much teamwork involved. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional activist environments.

GOVT390 Presidential Foreign Policy Decision-Making
In the realm of foreign policy, good choices can avoid or win wars, while poor choices can lead to disaster. Although analysts consistently evaluate the quality of US presidential foreign policy decision-making, the fundamental aspects of good and poor judgment remain controversial. This course starts with a consideration of the effects of both individual character and decision-making processes in determining the quality of foreign policy choices. The majority of the course focuses on these issues through the intensive simulations of foreign policy decision-making, with students taking on the roles of the major players.
Offering: **Host**

GOVT392 Theorizing the City
Recent years have brought a shift to imagining the city, rather than the nation-state, as the primary allegiance for citizens, with its own unique set of challenges and responsibilities. What are our political and ethical obligations to the strangers we live near? Should cities be governed more democratically? This course will examine topics such as income inequality, environmental justice, immigration, localism vs. cosmopolitanism, and public art.
Offering: **Host**
Grading: **A-F**
Credits: **1.00**
Gen Ed Area: **SBS-GOVT**
Prereq: **None**

GOVT393 The Politics of Authenticity
Is there such a thing as an authentic self? If so, can politics help us realize it? Fifty years ago, authenticity was a thriving political ideal, invoked by radical feminists, black liberation movements, gay and lesbian activists, Marxists and conservatives alike. Over the past four decades, however, political appeals to authenticity have come under heavy scrutiny. Some claim that appeals to authenticity inadvertently marginalized individuals who are not "true women," "real blacks," or "actual natives." Others argue that the idea of an authentic culture can be deployed to constrain individual members of cultural minorities. Where does authenticity reside--in gender, sexuality, experience, or culture--and how do we know which one is "real"? Is it worth faulting politicians for hypocrisy if there is no such thing as a "true self"? What becomes of certain emancipatory or justice claims--such as those coming from trans-politics or multiculturalism debates--without a notion of authenticity? In this course, we will discuss what authenticity is or might be, how it has been conceptualized in political theory and contemporary social movements, and why it has become an object of widespread suspicion and continuing appeal.

GOVT394 Law, Justice, and Democracy
This advanced research seminar will study law though a political sociological lens. Students will write a major term paper exploring a theoretical or empirical question.

We will ask: What is law? What does it mean to think of law as a social construct? We will explore how these questions have been answered by social theorists like Marx, Weber, Durkheim, and Foucault, and by legal scholars writing in the tradition of legal positivism, legal realism, and critical legal studies.

We will talk about the relationship between law and justice. What does it mean for laws to be unjust? What are the normative arguments that have been made about how to respond to unjust laws?

We will discuss how social phenomena get legally constructed. Who is a person? What constitutes speech? What constitutes religion? What is a crime? What is gender? Who is a criminal? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

We will spend some time on questions of crime and punishment. We will talk about the history of modern prison, and why the carceral state has expanded in the U.S. We will also talk about death penalty, and how and when the modern state kills.

Finally, we will talk about the place of courts in the American system of government, and policymaking.

GOVT395 Caste, Race, and Democracy
Drawing on the resources of social and intellectual history, political theory, literature, and social science, this seminar will explore the intimacies and differences between two forms of social differentiation: caste in South Asia and race in the United States. We will focus, in particular, on the relationships between caste formation, racial formation, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression.

GOVT396 Intro to Human Rights Advocacy Seminar
This course is limited to students already admitted into the Human Rights Advocacy Minor (HRAD-MN).

Fresh from having completed the Human Rights Standards Course (CSPL-228), you will already have a good understanding of how global and domestic human rights institutions should (in principle) function to respect, protect, and fulfill human rights norms. In this 1.5 credit seminar we turn our attention towards the specific methods of human rights activism. The seminar is structured as an intensive workshop where we practice and refine skills, challenge ourselves and our classmates to reflect deeply about our emerging identities as aspiring human rights activists, eat lunch together, and prepare actively for our human rights fact-finding practicum (which will take place during the summer break).

The course continues some of the themes raised during the Human Rights Standards course. We will discuss what others have written about the ethics of "doing" human rights, but we will also develop our own personal ethical framework in anticipation of our own field research. Likewise, we will read what others have written about the process of effectuating attitudinal change about human rights, but we will also refine our own theories of change in the real-world contexts in which we will soon be working. Much of our learning will come about experientially and through thoughtful discussion, so please come to class prepared to engage.

GOVT397 Acting and Citizenship
From Plato's fears about the corrupting effects of tragedy on the civic devotion of citizens, to Rousseau's concerns about the theater as the cause of moral decay, to Richard Sennett's contemporary arguments for an understanding of citizenship as a performance in the "theatrum mundi," the performance and spectacle of theater, through both watching and in acting, has been closely linked to expectations of democratic citizenship. This course will examine the history of acting as a way to consider what we are called to do to sustain democratic life. How is being a citizen or a juror the equivalent of playing a role? Can the practice of acting help develop skills of empathy and deliberation that are needed to navigate difficult political questions? On the other hand, can the "inauthenticity" of acting be a corrosive parallel that treats all civic interactions as strategic ones grounded in self-interest? Drawing on texts from the history of political thought, theater studies, and the psychology of acting, the course will culminate in a performance art piece at Wesleyan, developed by the class, to highlight the demands of citizenship. A willingness to act is expected, but no experience is required.

GOVT398 What Is the Good Life?
Work, political participation, friendship, art, and justice: These are the components that political philosophers have long thought to be components of a life well lived. How do these practices shape our identity and relationships with others? How do they contribute to a thriving society? How have theorists changed our understandings of these core concepts over time? What happens when they come into conflict? This course will use these five categories to understand what the "good life" means from ancient, modern, and postmodern perspectives.
Offering: **Host**

Prereq: **None**

GOVT399 Citizens, Judges, Juries: Who Decides in Democracy?
The tensions between rule by the people, rule by elites, and rule of law are at the core of democratic theory. What is the proper balance among the three? Under what circumstances is one group of decision makers better than another? What happens when they come into conflict? This is an upper-level course in political theory designed for students who have taken GOVT159, The Moral Basis of Politics or an equivalent course in philosophy and related disciplines. We will focus on the following topics: the role of voting in liberal democracies, the Athenian jury system, deliberative democracy, referendum and initiatives, civil disobedience, and the role of juries in the U.S. criminal justice system.

HISTORY

Why history?

History is a way of understanding the whole of the human condition as it has unfolded in time. Without history, nothing makes sense: from the meaning of words to the formation of identities, to institutions, states, and societies. History straddles the boundary between the social sciences and humanities. Like the other social sciences, it has established methods of investigation and proof, but it differs from them in that it encompasses, potentially, every area of human culture from the beginning of recorded time. Like the other humanities, it uses ordinary language and established modes of telling its stories, but it is constrained by evidence left us from the past.

Majoring in history will help you develop valuable skills transferable beyond the classroom: critical thinking, interpretation, and persuasive writing, as well as analytical and research skills for tackling complex questions. These are all essential to doing a job well after you leave Wesleyan. History is inherently complex and requires the ability to acquire knowledge from large amounts of information and assess evidence and conflicting interpretations of the past. As a history major you will learn to make sense of complexity and to tell a good story.

AFFILIATED FACULTY

Alexander Brakel

Visiting Scholar in History

Ana Laura Camargo Cunha
Visiting Scholar in History

- Undergraduate History Minor (p. 1126)

HIST101F History and the Humanities (FYS)
This course offers first-year students an opportunity to explore the humanities from a variety of different disciplinary perspectives, traditionally Western as well as global, and to make connections between humanistic learning and history. The course is a small discussion seminar in which primary source materials, or classic texts, are used exclusively. An effort will be made to examine the interrelationship of ideas in the various disciplines and to compare history, literary analysis, philosophy, and theory as modes of inquiry and as ways of thinking about documents and texts. The course thereby aims to provide students with the critical tools by which to analyze texts produced in the remote or recent past. The course also serves a related purpose: to familiarize students with the heritage of Western historical tradition and to impart knowledge of the crucial role of history and the humanities as a component in general education. Students may take HIST101F without having to take HIST102F.
Offering: **Host**
Grading: **OPT**

HIST103F From Protest to Revolution: A Middle Eastern History (FYS)
This seminar explores protests, rebellions, insurgencies, and revolutions that have shaped the history of the Middle East from the birth of the three monotheistic religions to this day. Why do people rebel? We will seek answers in the context of religion, ethnicity, language, and race in the long and political history of this wide-ranging human geography. The main focus will be the agency of those who strived for change and modes of resistance, finishing with the 21st-century activisms in labor, LGBTQ+, student, journalist, academic, and political Islamic mobilizations.
Offering: **Host**
Grading: **OPT**
Credits: **1.00**
Gen Ed Area: **SBS-HIST**
Prereq: **None**

HIST104F Islam and Empire Through Fiction (FYS)
This first-year seminar will cover the three different empires of the Early Modern era (c. 1500-1800), encompassing much of the Muslim world: the Ottoman Empire in the core of the Middle East, Safavid Empire in Persia and beyond, and Mughal Empire in South Asia. Our aim is to analyze both common and divergent patterns and structures of imperial rule as well as shared imperial legacies and cultural resources. In addition to lectures and secondary background readings, students read and discuss fictional works, with a view to exploring "Islamic civilization" through literary voices of acclaimed authors. Reading fiction is to help us through the fragmentary nature of the sources used to reconstruct the major debates that surround the emergence and formation of Islamic empires in the Early Modern period. Questions of fictional narration, historical memory, and revisionist history will also be discussed.

HIST106F Black Reconstruction: The Origins of America's Racial Divide (FYS)
Voter intimidation, racial violence, an impeached president, an embattled Congress, threats of a civil war, and emboldened domestic terrorists are not a new phenomenon in American history. All have their roots in America's most violent, revolutionary, and contested era: Reconstruction. Beginning after the Civil War, Radical Republicans inside and outside Congress worked with free Black allies to found an American nation that lived up to its ideals. White domestic terrorists, backed by an increasingly recalcitrant Democratic Party, violently opposed the increased political power and civil rights of African Americans. In this first-year seminar, we will examine the contours of that contest, the world that it created, and the lasting influence of America's unfinished revolution.

Gen Ed Area: **SBS-HIST**
Prereq: **None**

HIST107F Life of the Modern Fact (FYS)
Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This course explores the tools and techniques that people have used to craft facts in varied domains of applied science, such as agriculture, climate modeling, epidemiology, and pharmaceutical production. The course also examines how broader social structures, such as law and community, helped produce facts as people shared, defended, and used them. We consider examples from the 17th century through the present day, including practices of nature study, classification, quantification, and experiment.

Prereq: **None**

HIST108 Time Machines: Bringing the Past to the Present and the Future to the Past
In the course we will explore how ghosts of the past and imaginaries of the future haunt the present. We will do so by looking at the temporal disjuncture in canonical and seemingly concrete evidentiary categories of disciplinary history. In essence, we will see how they serve as time machines to bring the past into the present and the present to the future. The course will be organized around a variety of themes from ghosts, haunting, trauma, and historical injustice, through heritage, memory, and presentism, to technological imaginaries and the Anthropocene. In addition, we will look at the ways such imaginary time travel occurs in seemingly everyday sites as well such as supermarkets, films, and amusement parks.

HIST109F With Bold Knife and Fork: An Introduction to Food History (FYS)
This first-year seminar is an introduction to food history and food studies, two linked fields in which we ask how people have satisfied their appetites, and what their choices mean. This encompasses everything from the question of how agriculture began, to the question of what it meant to eat a Korean taco in Los Angeles in, say, 2014. Food history and food studies are vast fields, and in this seminar we will sample many versions of them. Because this seminar is designed for students just beginning college, it introduces a variety of academic approaches to food, from chronological analyses of how specific ingredients became important for specific populations, to the anthropological treatment of food and identity, to cultural histories informed by primary sources--that is, documents written by historical actors. We even read contemporary "food writing," including restaurant reviews, which are themselves historical documents of a sort. This course also has a strong chronological through-line, winding from the establishment of agriculture to the modernization and industrialization of global food ways.

Prereq: **None**

HIST110F Been in the Storm So Long: Grassroots Movements and the Black Freedom Struggle (FYS)
Most civil rights narratives focus on Martin Luther King, Jr. and other prominent leaders of the civil rights movements. This course seeks to shift that narrative to young activists working on the ground in the struggle for Black freedom. These college students used grassroots organizing tactics, embedding themselves in local Black communities, to drive local politics and draw attention to larger systemic issues. We will look specifically at the work of the Student Nonviolent Coordinating Committee (SNCC), led by John Lewis and Stokely Carmichael, as they moved from the shock troops of the Southern freedom struggle to Black Power.
Offering: **Host**

HIST112F Religion, Science, and Empire: Crucible of a Globalized World (FYS)
The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

HIST113F The Intellectual History of US Conservatism Since 1945
How do we understand the phenomena of Trumpism? What are the ideas that have inspired this movement? This course attempts to provide answers by looking at the origins and evolution of US conservatism from 1945 until the present. It does so through the prism of intellectual history -- namely by focusing on the ideas and ideology that have constituted the conservatism movement in the US for roughly the last eighty years. Topics to be discussed include: Neoliberalism, Neo-conservatism, America First, Paleoconservatism, the Religious Right, American Fascism, Trumpism, etc.

HIST114F From Sumo to Sonic: Japan at Play (FYS)
This class explores the many ways the Japanese have played throughout time including sports, card games, martial arts, video games, poetry contests, and more. We will contemplate the general societal impact of play and look to Japanese history as a specific, and oftentimes distinct, example. The class is a combination of lectures about the historical and cultural significance of Japanese games and class time devoted to you playing some of those games to better understand them. By the end of this course, you will know about the sumo wrestling competitions that delighted the Heian court over one millennium ago as well as current baseball phenom Otani Shohei. You will have explored the wonderful virtual worlds of visionary video game creators, such as Miyazaki Hidetada and Kojima Hideo, while trying your hand at some of Japan's most enduring board and card games. No knowledge of Japan or the Japanese language is required for this course.

HIST116 Environmental History: Telling Stories in Place
This course introduces students to environmental history, the study of the changing relationships between humans and nature through time. We will consider how the natural world has shaped human history; how humans have transformed the environments they have moved through, made use of, and inhabited; and how ideas about nature have shaped people's interactions with the world around them and with one another. Focusing on both historiography and methods, we will read classic and recent work in the field and learn to conduct historical research. We will also pay attention to narrative and the writing of history, through reading, in-class workshops, peer editing, and trying different kinds of historical storytelling. The central assignment will be a short research paper in which students will practice environmental history through the study of a particular place.

Gen Ed Area: **SBS-HIST**
Prereq: **None**

HIST116F Independence at 250: The American Revolution and its Broader Impact (FYS)
The Declaration of Independence was both part of and yet separate from the American Revolution. The document is both a statement of principles and also a list of grievances. Its authors looked to the future and hoped to create something new, while historians too often read independence backwards and assume the United States would always become a country. This course will explore the making and meaning of Independence as it relates to the American Revolution and its significance within North America and beyond. While other countries drew inspiration from the Declaration, many living within the boundaries of what would become the United States -- enslaved workers, women, Indigenous peoples, and others -- felt excluded from the project that the Declaration announced. By reading the most recent and exciting scholarship and investigating relevant primary sources, this course will look within and beyond the United States to ask new questions and understand different perspectives on the meaning of the American Revolution.

HIST117 Chinese Cities
More than half of China's population now resides in cities. Within the next few years, China plans to accelerate the rate of urbanization by building sprawling cities and relocating more people into urban areas. This course explores the history of Chinese cities from the imperial to modern age. Cities were centers of commerce, intellectual activity, and, in the words of historian and political scientist David Strand, "storehouses of political technique, strategy, and sentiment open to anyone with the understanding and the will to inventory to exploit them." We will study how cities supported massive populations with limited resources, inspired new forms of social organization, and transformed the political and social order of China.

Identical With: **CEAS269**
Prereq: **None**

HIST117F Global Psychedelia: Music and Politics in the Middle East and Beyond (FYS)
This course explores the emergence of Turkish psychedelic rock within the global psychedelic moment of the 1960s and 1970s, tracing how musicians drew on historical poetic traditions while engaging with worldwide experiments in sound and counterculture. We begin with the medieval context of Anatolia and political resistance to Ottoman authorities and examine how this literature and history shaped the sonic vocabulary of 1960s artists such as Selda Bagcan, Cem Karaca, and Mogollar. We then analyze how electrified folk, political lyrics, and hybrid aesthetics articulated new visions of modernity in a changing Turkish society. Throughout, we situate the Turkish case within the Middle East and broader global developments, including youth movements, anti-establishment politics, and censorship. By working with music, historical texts, and cultural theory, students will investigate how sound becomes a site for negotiating identity, power, and belonging. For the final project, students will write and produce a radio essay that will be broadcast in collaboration with WESU 88.1FM.

HIST118F History of U.S Social Movements (FYS)
This first year seminar course examines the long history of movements for social change in the United States from the 1830s to the 1970s. Movements we will explore will include abolitionism, women's rights, the black freedom struggle, modern feminism, and gay liberation. We will focus on the tactics used by social movements to achieve their goals, how social movements related to each other, how social movements changed over time, and how social movements interacted with the broader forces of American society, including politics, race, law, and religion. A major focus of this course will be how historians conduct research, use evidence, and write history. Students will be exposed to primary sources as well as selected secondary sources in the field.

HIST120F Sex and Sexuality in Islam (FYS)
Islamic societies have long traditions of commentary about the body and sexuality. Islamic texts are replete with references to homosexual and erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims throughout time. Instead of essentializing the Islamic "viewpoint" on sexuality, we will survey the variety of opinions and ideas about sex from medieval Islam to the modern world. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and modern sex manuals and debates, among other sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct in Islam, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature.

HIST122F Germany from Napoleon to the Berlin Republic (FYS)
Was Germany destined to launch two world wars in the 20th century? Were the roots of Germany's deviance from the path of liberal democracy deep or shallow, culturally determined or shaped more by circumstance? This course analyzes these and other questions in the fascinating and turbulent history of modern Germany. We will begin our study by examining the political, social, and economic upheavals ushered in by the Napoleonic conquests, highlighting the territorial, religious, and class divisions pulling at the fabric of German society in the context of revolution, rapid industrialization, and urbanization. We will then analyze the processes that resulted in Bismarck's unification of Germany in 1871 and how Germany's nationalism, growing industrial power, and deep internal divisions contributed to a policy of aggressive imperialism that would challenge both the European and international status quo. The course carefully analyzes the role played by these processes in the outbreak of the World War I and will explore the profound impact of war and defeat on German society. Situating both the Weimar Republic and National Socialism in this context, we will subsequently study the rise of Hitler, World War II, and the Holocaust. The course will conclude with the Cold War history of the two German states until the collapse of the Berlin Wall and reunification in 1990. The aims of the course are to provide a firm grounding in the historical processes that have shaped modern Germany, to develop and refine the critical skills of historical analysis,

and to familiarize students with the major historical debates over the continuities and discontinuities of German history.

HIST123F Cinema India: South Asia's Past on Film (FYS)
This first year seminar course examines the relationship of film and history in India. We will focus on how filmmakers represent the past and, alternatively, how films inform historical memory--especially in the context of the competing trajectories of nationalism, postcolonialism, and globalization. A central concern will be the historiographical challenges and opportunities of film. We will pay particular attention to Hindi cinema, including films produced by the Bombay/ Mumbai ("Bollywood") film industry since the 1950s, though we will also consider the rise of "parallel" cinema. Feature films will range from classics like "Mughal-e Azam" (1960) and "Umraon Jaan" (1981), to lesser known works like "Shatranj ke Khiladi" (1977), "Mirch Masala" (1987), and "Hazaaron Khwahishen Aisi" (2005). We will also probe the critical and box-office success of relatively recent blockbusters such as "Lagaan" (2001), "Rang de Basanti" (2005), and "Jodhaa Akbar" (2008), comparing them to the ambivalent domestic and diaspora response to period dramas like "Dil Se" (1998), "Mangal Pandey" (2005) and "Laal Kaptaan" (2019).

HIST124F History and the Turn to the Present (FYS)
This course attempts to make sense of contemporary politics, economics, and society through an historical examination of the present. It will discuss contemporary topics such as neoliberalism, nationalism, COVID-19, critical race theory, the forever war, the New Cold War, etc. It will also raise methodological questions on the promises and perils of using history to understand the present.

HIST129 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

HIST130F North American Borderlands (FYS)
North American Borderlands explores the physical, social, political, cultural, and economic spaces that borders create and purport to divide. The course covers a long history and a wide variety of material - with subjects ranging from 17th-century contests between Algonquian peoples and Dutch traders along the saltwater frontier to the Gilded Age story of a Texas slave who reinvented himself as a Mexican millionaire, to the sulfur dioxide that blew up from U.S. power plants to fall as acid rain in Canada and sour relations between the two nations in the 1980s. By the end of the course, students will be able to recognize borderlands as distinctive spaces of conflict, exchange, dispossession, and opportunity.

HIST132 History of Energy
From fire to fossil fuels, humans are characterized by their ability to use more energy than other species. By capturing and releasing reservoirs of energy stored over the course of Earth's history, humans have increased their resource base, expanded global population, and modified the environments on which they have relied for subsistence.

This course introduces students to themes in the history of energy transitions, from photosynthesis to fire to the exploitation of fossil fuels beginning in the 19th and 20th centuries. By taking up the use of pre-industrial fuels, animal muscle, water, and wind, in addition to coal, oil, and gas, we will consider the ways humans have come to rely on cheap and abundant energy. In a broad survey of energy regimes, we will probe the effects of production and consumption of energy on politics, environment, economy, and society.
