social value and symbolic meaning. What can we learned from these and other body histories in Africa? In this course we will examine embodied rituals such as spirit possession, which marks the body as a site for human engagement with the supernatural. The widespread practice is also a gendered technique of healing documenting shifting understandings of health and illness. In addition, we will study the practice of "sitting on a man" by which women addressed the body politic through dance and collective nudity. The revealed body in motion shamed men into action and has been employed in the 21st century to shame oil companies for their greed and environmental destruction. In this and other examples, we will approach the body as an archive: it is an archive in motion and subject to social renewal. Our embodied evidence will allow us to explore shifting histories of religion, art, sexuality, the economy, and politics from the precolonial era to the contemporary moment. By taking the body as our lens we will also learn new ways to examine the African past through histories of aesthetics, value, labor, hierarchy, and knowledge production.

HIST342 The Rise of the Conservative Movement in the United States Since 1945
"So inevitable, yet so unexpected," Alexis de Tocqueville declared, referring to the French Revolution of 1789. The same is true of the conservative movement that developed in the United States during the second half of the 20th century. What is the nature of modern American conservatism? How and why did it emerge? What are its social bases? How has conservatism evolved in America since the 1930s? What sort of varieties and conflicts exist within the movement? How did mid- and late-20th-century American conservatives compare to earlier sorts of conservatism in America in the early Republic, the antebellum South, modern American liberalism, and political conservative parties in Europe and Britain? What is the historical significance of the movement?

HIST345 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s
This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We will also explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

HIST348 Urban Histories of Latin America
Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

HIST351 Beyond 1619: Enslavement in the United States, 1619-1860
The recent publication of the New York Times' "1619 Project" has refocused attention on the history and lasting effects of enslavement in the United States. Discussion of slavery as America's "original sin," however, oversimplifies the complex, multifaceted, and adaptable nature of enslavement in American history. This seminar will provide students with a grounding in the extensive literature of slavery in the United States from 1619 to the outbreak of the Civil War. We will examine slavery as an economic system of labor exploitation, a racialized hierarchy that legitimized white supremacy, and as a site of resistance and cultural formation. We will explore, additionally, the lives of enslaved individuals alongside our study of the institution of slavery.

HIST352 The Communist Experience in the Soviet Union (CLAC.50)
Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and
- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day’s materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day’s online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically—to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar—both on the forum and in the synchronous sessions—is absolutely essential.

HIST355 The 1918 Influenza Pandemic: A Research Seminar
This fall is the centennial of the 1918 influenza pandemic, which swept around the globe that year and caused an estimated 40 million deaths worldwide. It caused more deaths in the 20th century than any other event except World War II. In this seminar we will examine this pandemic from multiple perspectives with the goal of defining how understanding it changed from the time it occurred to the present. In class, we will examine contemporary journalistic and scientific accounts and various secondary sources, with the goal of establishing a starting point for student research projects that will be completed over the second half of the semester. We will explore sources in Olin Special Collections, various digital archives, Middletown and Connecticut State archives, and other collections as available. Possible outcomes for the class can be a paper, documentary, exhibition, or web resource.

HIST356 Between Worlds: Change and Continuity in Early Latin America
The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted
the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

HIST357 Regulators: The Administrative State in Modern America
How much arsenic is permissible in drinking water? Should financial firms be required to hold on to some of the risky securities they issue? Can a company sell a jar of peanut butter that contains only 90% peanuts? In the modern United States, the answers to these questions are determined by the administrative state - a collection of dozens of regulatory agencies, bureaus, and commissions comprising millions of officials and staff. Historians, political scientists, and other scholars have long recognized the administrative state as an important site of governance. But unlike Congress, the courts, or the Presidency, most of us have little idea about what exactly the administrative state does, much less how these regulatory bodies came to have so much power and responsibility. EPA G-Men banging down doors in Springfield might get a laugh on "The Simpsons," but why do EPA special agents carry guns?

This course approaches the making of the administrative state as a central component in the history of the modern United States. The seminar begins in the late 19th century, when elected officials created commissions of experts in an attempt to govern an increasingly complex economy, and continues through the 20th century, with its bursts of new state authorities and responsibilities, before concluding in the present, asking what a long history of the administrative state can teach us about contemporary policy. To understand the context in which the administrative state emerged and evolved, we cast a wide net. Among other subjects, students will consider popular movements for environmental protection and worker safety, intellectual transformations in understandings of risk and public welfare, political fights over the scale and scope of the government, and biographies of regulators and the powerful institutions that they make up. Readings include classic texts and new scholarship across different disciplines, alongside contemporary journalism and novel approaches like podcasts - returning throughout the semester to the question of how we can tell an engaging and vital history of the administrative state. Toward that end, students will also explore a variety of different primary source materials throughout the semester before embarking on their own original research projects.

HIST358 The "Self" in Self-Determination: Personhood & Peoplehood in Empire & Decolonization
This seminar course will explore the historical literature on self-determination and decolonization movements in the twentieth century across the globe. Combining the fields of US imperial history, international history, global indigenous studies, and diasporic studies, this course will delve deep into the historical development of right of self-determination within and outside of imperial regimes. It interrogates how peoples articulated their sense of "personhood" and "peoplehood" to claim political rights within the borders of nations and empires, as well as on the international stage. The course will also explore how decolonization as a concept transformed beyond the realm of law and personhood and encompassed culture, the environment, and lifeways.

HIST364 Thinking with Objects: Processing a Museum Collection from Southern Africa
In Thinking with Objects, students will gain hands-on experience processing a collection of Namibian artifacts in Wesleyan's care. The course will introduce students to many of the ethical and practical challenges facing museum collections today, providing an opportunity to apply the ideas we discuss all semester by processing a collection of decorative and everyday objects made from diverse materials (wood, beads, animal hide, and shells). Part of the course will be the investigation of the origins and function of these objects. Learning how to handle, label, store, and potentially exhibit objects from the collection will enable students to reflect on Wesleyan's relationship to the African continent, and to think more generally about university and museum collections and methodologies.

HIST367 Life of Modern Fact
Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the
present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

HIST369 Issues in the Environmental History of Japan
Many people continue to voice the idea that the Japanese have a special relationship with nature while thinking, for example, of Japanese gardens and the deification of natural objects such as trees and rocks. The triple disaster of earthquake, tsunami, and nuclear meltdown that occurred in 2011 has challenged that perspective. Yet few are aware of the tremendous human impact on the environment of the Japanese archipelago and its surrounding regions in both premodern and modern times. In this course we will place Japanese environmental history into a wider context while examining how economic, social, and cultural forces have had an impact on the natural environment. Topics include premodern deforestation and water management, the toxic effluvia of mining, mercury poisoning, nuclear contamination, and changes in disease patterns.

HIST370 Disease and Health in Modern Asia
While this course might seem highly focused and specialized at first glance, it is intended for students of all majors and backgrounds. It has two main goals. The first is to explore the influence of epidemics and diseases more broadly over the course of East Asian history while keeping a global context in mind. The focus is on China and Japan, but Korea will be included when possible. The second is to consider how historically, diseases and epidemics are best understood through multiple disciplinary approaches, including biology, epidemiology, anthropology, sociology, and iconology. Colonialism and empire--both Western and Japanese--are, of course, underlying themes throughout. We will examine several important historiographical and methodological approaches as well as some basic issues in the history of science and some important examples of specific diseases such as cholera, tuberculosis, and plague from different approaches using both secondary and primary sources.

HIST371 Fascism
This seminar aims to identify varieties and components of fascist ideologies and to undertake comparative analysis of European fascist movements in the first half of the 20th century. The initial focus will be on the several ways fascism has been defined and understood, including examples of how the term has been utilized to characterize certain governments and personalities. Specific attention will then be devoted to Italy, Germany, Spain, and France, with emphasis on Mussolini and Hitler and their regimes. Additionally, apparent linkages of fascism to post-1945 politics, such as the National Front in France, will be explored. Other fascist movements may be chosen as the subject of a major research paper. Materials for the seminar will include documentary sources, films, interpretive studies, and biographies.

HIST373 Language and Power in Latin America
What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region.

The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of indigenous peoples as social and political actors in contemporary Latin America.

HIST374 Food Security: History of an Idea
The Food and Agricultural Organization of the United Nations has held that “food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life.” This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

HIST380 Transforming Bodies: Movement and Agency in West Africa

Dancers in West Africa embody human agency and transform historical worlds. As one elder farmer proclaimed: “Our ciwara have power!!” Masked ciwara dancers on the Mandé Plateau call upon the collective labor of farmers to produce rural life, and more recently, have responded to transformations of the agricultural landscape. They emphasize the power of the human body over agricultural machines. Elsewhere in West Africa, the Atsiagbekor dance energized and celebrated Ewe male soldiers by acting out scenes from the battlefield. The dance movements were also secret codes used during battle to give instructions. How and when to fight, defend, or retreat depended on this embodied communication. The accompanying loud drum music served an added purpose of instilling fear in enemy ranks because it created the impression of a mighty army on the march. Still performed, the dance now symbolizes Ghanaian cultural heritage and helps to shape local historical memory.

In this course we will examine the body as an active agent in West African social and political life. We will study the historical and contemporary meanings of laboring bodies through dance and everyday movement, such as women’s pounding of fufu or stirring of tons daily meals. We will also reflect on the ritual enactment of enslavement or colonial rule as a means to subvert old power structures. The body in these was a tool for resistance. We will also unpack multiple interpretations for specific women’s embodied protests such as “sitting on a man.” Collective body movement was powerful, but individual bodies might also enact healing or express religious devotion. Spirit possession, for example, marked the body as a site for human interaction with the supernatural. In this and other examples, the body is an archive in motion and subject to social renewal. By taking the body and movement as a lens, we will explore shifting histories of labor, performance, gender, politics, aesthetics, and religion from the pre-colonial era to the contemporary moment. We will also learn new ways to creatively move and narrate the African past and present.

**HIST382 Anthropocene as Modern Grand Narrative**  
The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's systems, where the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism versus uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale—one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

**HIST384 Critical Approaches to the History of Disease and Epidemics**  
Epidemic disease is as much a part of the human condition as earthquakes, droughts, floods, heat waves and other natural hazards that can result in disaster. This course will examine four cases of epidemic disease: (tentatively) cholera, tuberculosis, and AIDS. While we will definitely be asking the classic historical question "what happened and how?" we also will be considering how different epistemological frameworks, metaphorical strategies, and historiographical assumptions have shaped past historians' understandings of these events, while exploring alternative approaches. Students will write a research paper as a final project on an epidemic disease of their choice using an approach that helps explore some little-examined dimension of that disease.

HIST392 The Acceleration of Europe: Mobility and Communication, 1000—1700
This research course explores the thesis that during the Middle Ages, Europeans began to move faster, to move more often, and, by doing so, transformed the nature of social life, cultural life, and the character of selves and minds in the world. The course will explore the material aspects of this, such as the nature and development of roads and bridges, ships and canals, inns and hospitality that sustained and encouraged advancing travel. Thematic importance will be given to the place of horses and horseriding in these developments. The course is about the history of communication and the idea that a particular sort of traveler was created through later medieval travel and became the means of cultural and psychological acceleration. The social and cognitive networks established through travel, including the exchange of letters and messages, linked the local to the national. Merchants, pilgrims, soldiers, judges, students, preachers, and bureaucrats became the means of spreading news, changing views, and speeding up the world. This course will expose students to methods and skills in the digital humanities such as network analysis, geographic information systems, and database analysis.

HIST393 Materia Medica: Drugs and Medicines in America
This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

HIST395 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky’s The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind “without God and immortal life,” asking whether this means that “all things are permitted.” Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and “godless Soviets,” to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by “totalitarian” regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

In Fyodor Dostoevsky’s The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind “without God and immortal life,” asking whether this means that “all things are permitted.” Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and “godless Soviets,” to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by “totalitarian” regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.
One of modernity’s master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion’s moral and spiritual function be performed by a different kind of belief system?

HIST396 The U.S. South: A Global History

When people think of the U.S. South, they often think of a place that’s isolated and insular—a region cut off from the rest of the United States and the wider world. Yet nothing could be further from the truth. Throughout its history, the South has been deeply entangled in the world and in the larger processes of globalization. Few regions of the United States have been more connected or more cosmopolitan. This seminar explores the global history of the U.S. South from the early 1800s to the present. By tracing the transnational movement of people, ideas, and commodities, it seeks to understand how the world has shaped the South, and also how the South has shaped the world.

HIST397 United States Overseas Empire

The United States is an empire: an empire that expands beyond the North American continent into many islands across the globe. From Puerto Rico and the U.S. Virgin Islands in the Atlantic to American Samoa and Guam in the Pacific, the US remains an imperial power with unincorporated island territories, a euphemism for replacing the anachronistic term "colonies." The residents of these territories have truncated political rights; they do not have voting representation in the U.S. Congress, and they cannot vote in U.S. Presidential elections. Though U.S. territories are usually footnotes in the grand narrative of U.S. history, this course argues that they are integral to understanding the United States as a whole.

We will examine the history of how the U.S. acquired and governed the territories from the perspective of the islands themselves, emphasizing the local effects of U.S. colonial policies. We will analyze how U.S. foreign policy split indigenous peoples into separate political entities, how economic interests changed native political systems, how U.S. militarism affected the ecology of whole islands and the culture of territorial residents, and how public health policies racialized island peoples. We will also explore how self-determination and decolonization movements were stymied by the U.S. government, and how a whole host of other colonial policies and actions has affected and continues to affect the territories.

The course will cover islands currently under U.S. control, including American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, the United States Virgin Islands, and Hawaii. It will also examine former territories, Trust Territories of the Pacific, and occupied islands including the Philippines, Cuba, Haiti, the Dominican Republic, among others. With the changing nature of U.S. imperialism, we will also consider the United States expansive military base presence throughout the globe. The history of these islands can tell us much about limits of U.S. citizenship, about the growth of U.S. commerce and militarism globally, about patterns of migration and immigration, and about the changing discourse of race and indigeneity.

HIST398 Visions of the Future: Capitalism and Colonialism in the World’s Fairs

This course will explore the history of the world’s fairs from the 1851 Great Exhibition in London to the 1893 New York World’s Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world’s fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

ITALIAN (ITAL)

ITAL101 Elementary Italian I
This gateway course is the first half of a two-semester elementary sequence and an ampersand (&) course. Our emphasis is on the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.
Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will learn to talk about things in your own immediate environment, such as family, friends, daily routine, likes and dislikes, and you will learn how to handle basic social interactions such as meeting people, planning events, eating out, inquiring about other people's lives, and relating information in simple terms. We will explore roughly five units of the textbook; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

ITAL102 Elementary Italian II
This course is the second half of a two-semester elementary sequence. Our emphasis is on the continuing development and strengthening of oral and written competence, and reading and comprehension skills. Specifically, you will master the linguistic skills necessary to describe and narrate simple events in the past and in the future, make comparisons, express possibility, express your point of view, and agree and disagree with the opinions of others. You will also reach a better understanding of culture, society, and everyday life in Italy as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

ITAL103 Intensive Italian
Intensive Italian is a course designed for highly motivated students who wish to learn the basics of Italian language in one semester. The course emphasizes the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will build on class and at home; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

This course is particularly recommended for students with a background in other romance languages, such as Spanish, French, or Portuguese.

ITAL111 Intermediate Italian I
This course is the first half of a two-semester intermediate sequence and an ampersand (&) course. Authentic artifacts such as literary excerpts, films, newspaper articles, songs, and commercials constitute the starting points of this course. These include topics ranging from stereotypes and perceptions of Italy to significant moments in Italian history and politics, family and student life, employment, immigration/emigration, organized crime, and environmental awareness, all of which shed light on the rich diversity and complexities within Italy and offer a variety of opportunities to improve and refine your ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will build on previously learned grammatical structures and acquire more complex ones that will allow you to improve your ability to relate information, narrate stories, make hypotheses, express your opinions, and debate the opinions of others, both in writing and in conversation. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

ITAL216 Words and Sex: Storytelling, Censorship, and Boccaccio’s Decameron

We will explore literary genres and representations of sex and gender in Boccaccio’s Decameron. Through close readings of selected tales and cultural analyses of their trans-historical and transnational reception, we take the Decameron’s words as point of departure for the study of storytelling and the politics of readership. As modern readers of Boccaccio’s renowned and classic Medieval collection of short tales, we investigate the text’s notions of love, gender, and sexuality by comparing and contrasting the Decameron with various other texts across varying media, from the works of Petrarch and Chaucer to the modern readings of D. H. Lawrence and Pier Paolo Pasolini, and from visual arts to digital humanities. Students are invited to creatively engage with these and other texts of their choice (and with approval of the instructor) in order to produce, by the end of the course, either a) an analytic blog post that may be published on the H-Net of the Transnational Italian Studies working group; or b) an individual or collective project inspired by Boccaccio’s Decameron.

ITAL220 Italian Gaming Lab: Project-Based, Gameful Pedagogy for Language Learning (CLAC.50)

In the past two decades, crowdfunding and renewed interest in games (board games, role-playing games, digital games, and instructional games) have created an increased and diverse gaming production, which has become the subject of several studies, articles, and projects related to all areas of education, including second-language acquisition. In an effort to explore how a game-informed pedagogy can work in Italian language and culture classrooms and to highlight analog gaming approaches that have worked inside and outside the language classroom, this course will explore the basics of Game-Based Learning (GBL) applied to second-language acquisition, as well as present a selection of classroom projects informed by its principles.

"Italian Gaming Lab" is designed as a project-based Italian language laboratory that will focus on why and how analog games can be effective tools for language learning; examples will include board games and role-playing games. Participants will discuss the application of gaming principles to second-language/L2 acquisition and either adapt existing games for language learning or create brand new educational games. The course offers students the opportunity to use language creatively and to develop critical knowledge within the rising and innovative field of Game-Based Learning.

The course will be conducted in Italian, and games will be created in Italian. Both intermediate/advanced learners of Italian (second-year level or above) and native speakers are welcome. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

ITAL221 Culture, Society, and History in Italy

This course is designed for students who have completed at least two years of college-level Italian or who have achieved equivalent competency through study in Italy. Our primary objective is to enhance students’ speaking abilities and Italian cultural literacy through exposure to a variety of Italian texts and contexts. The course will be organized both thematically and chronologically, taking into consideration a group of three themes that could change from one year to the next. Some groups or themes that might organize the course include the following groupings: l’amore, la morte, e l’altro; la città, la campagna, i sogni; il passato, il presente, e il futuro. We examine these themes in literary texts, paying attention to the different genres, and in opera and film. Students are expected to participate actively in this seminar setting. Class is conducted entirely in Italian.

ITAL222 Ruin and Redemption: Narrating Twentieth-Century Italy

When fugitive far-left terrorist Cesare Battisti was extradited to Italy in January 2019 to serve out a life sentence for crimes committed in the late 1970s, he provided fresh evidence for the way that 20th-century events still cast long shadows into contemporary Italy. The events, their narration and re-narration over time tell the story of unresolved conflicts and overturned verdicts in a context characterized by repression, revisionism, and rehabilitation. In this course we study three historical events of the past century that continue to haunt contemporary Italian society, culture, and politics: fascism; civil war and resistance; and the political violence of terrorism in the 1970s and 80s. We approach these events by examining the ever-changing narratives about them. For each narrative we focus on specific issues (e.g., for fascism: the rise of fascism, racism and anti-Semitism, colonialism, Mussolini’s cult of personality, the exaltation of war, fascist intellectuals, the art of the regime, etc.), but we use these as an entry point to articulate contradictions and complexity. We explore these narratives through various media and forms of expression: from films to novels, from landmarks to newspaper articles, from poems to billboards. By exploring how the polarizations of these narratives flow into the 21st century, we unveil the fractures and conflicting agents at the core of contemporary Italy.

The course is conducted in Italian. Authors include: Gianni Amelio, Marco Belloccchio, Italo Calvino, Liliana Cavani, Umberto Eco, Beppe Fenoglio, Dario Fo, Natalia Ginzburg, Helena Janaczek, Primo Levi, Pier Paolo Pasolini, Luisa Passerini, Cesare Pavese, Rossana Rossanda, Roberto Rossellini.

ITAL223 Home Movies: Italian “Families” on Film

What is “the family” in an Italian social and cultural context? How has it changed over time? How has it responded to the transformations of Italian society since the time of the postwar economic miracle until today? Have its contours changed to adapt to new values? Has it fossilized existing values? Are families limited to flesh-and-blood kinship or are they constructed along lines of shared values and
loved? This course seeks some answers to these questions through a sustained exploration of a variety of types of families as they are presented in Italian cinema from roughly 1950 until today. We will take stock of representations of the "traditional" family and the related social values, seeking to understand how Italian filmmakers, through their focus on the family, enter into the debate concerning tradition and change within Italian society, culture, and history. To that end, we will examine family dynamics along a broad spectrum of relative and intersecting aspects including affiliation, love, and rivalry; elective families (organized around crime syndicates, families constituted according to affinity); "failed" and "challenged" families and what that means; and examples of single-parent and same-sex families that seek to challenge conventional heteronormative paradigms. Along the way, we will recur to some critical readings (in sociology, history, and anthropology) that will help us frame our inquiry. This course is conducted in Italian. ITAL 223 is an appropriate course for anyone seeking an advanced class after ITAL112.

We will screen one primary film each week, which will anchor our discussions and serve as the basis for that week's activities. Students will also make 10-15 minute presentations on a secondary film that will serve as a "companion" to the primary text and will thicken our understanding of that week's themes.

ITAL224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance
In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolo Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

ITAL225 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante’s inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

ITAL227 Devotion and Deception: Erotic Discourse from Dante to Petrarch
In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarch. Through a close reading of such texts as Dante's Vita nova (ca. 1295), Giovanni Boccaccio's Decameron (ca. 1353), and Petrarch's Rerum vulgarium fragmenta (often referred to as the poetry book par excellence: il canzoniere, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate 'love stories' in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

ITAL229 Italian Bodies: Race, Gender and National Identity in Modern Italian Literature
The metaphor of the nation as a body--a motherland, a fatherland, a body politic--is a familiar one. Italian literature is rich with images of Italy as a woman to be saved, a mother honored, a father avenged. But what are those bodies made of and how do they behave? What are the shapes and feels of the Italian body? In this course we will test the limits and possibilities of the metaphor, examining texts that offer different bodies and differing notions of what it means to be a body and to be Italian. As we read and discuss these texts we will take into account the times and places in which each narrative is situated, taking note of differences and commonalities, paying special attention to the ways these articulations of identity respond to transformations in the Italian national landscape. This course is conducted in Italian.

ITAL231 Italian Colonialism and Its Legacies
This course is an introduction to the history and consequences of Italian colonialism. We will study literary and historical texts describing the social and
political forces that led to colonization as well as writings by colonized people and their descendants in order to gain a balanced, comprehensive understanding of this often-overlooked moment in Italian history. Students will read futurist, fascist and postcolonial theoretical work and will examine Italian, African and Albanian cultural artifacts representative of the colonial experience. We will also discuss current debates about immigration in Italy and their relationship to this colonial history. Literary texts will include: Dell'Oro's L'abbandono; Cialente’s Cortile a Cleopatra; Ali Farah’s Madre piccola; Marinettii’s Mafarka futurista; and work by prominent Italian scholars of colonialism such as Del Boca and Isenghi.

This course is conducted in Italian.

ITAL232 Italy at School: Biography of a Nation
Soon after the unification of Italy (1861), the Coppino Law extended primary school to five years, making it free of charge and mandatory for its first three years (1877). Edmundo De Amicis would subsequently depict these reforms in his best-selling novel Cuore (1886), a text that introduced some enduring features of school narratives but also many stereotypes, thus attracting constant criticism and inspiring several parodies of its moralistic underpinnings. Ever since then school narratives have become a key component of Italian culture, creating a genre that has thrived especially in the last three decades, with a number of both fiction and nonfiction books published by teacher-writers who have reflected on their experience.

In this course we will study Italy from the perspective of these texts about school that often originated within school walls themselves. In so doing, we will reconstruct the history of a relatively young country, Italy, through the institution that, like no other, has been given the responsibility of "making Italians." At the same time we will question the image of Italian society that school narratives have, intentionally or not, contributed to portraying. In addition to reading Lucio Mastronardi’s Il maestro di Vigevano (1962), we will focus on a wide range of materials, including novels, memoirs, poems, popular songs, films, and works of art that, even in the absence of a unanimously acclaimed "classic" of the genre, have shaped the Italian collective imaginary. Materials will be organized around five poles that have been quintessential to the debate on school in Italy across politics and culture: characters (teachers and students, obviously, but also colleagues, classmates, and families), labor and working conditions (including themes such as precarious work, class conflict, labor rights), gender and identity (questioning traditional gender roles and discussing integration of migrants at school), places and geographies (addressing topics from school design to teaching in prisons, as well as center-periphery integration and north-south divide), and actions (both those of teachers and of students, such as obtaining a certification vs. passing a test, disciplining students vs. questioning teachers’ authority, resigning from job vs. cutting classes). The course will be conducted in Italian.

ITAL235 The Invention of Fiction: Giovanni Boccaccio’s Decameron
In this course we will read and discuss Giovanni Boccaccio’s Decameron (ca. 1355), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio inhabited. We examine the Decameron’s tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio’s tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book’s adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio’s remarkably modern sensibility and unsurpassed art of writing fiction.

This course is conducted in Italian.

ITAL236 Inferno
In this course we read and discuss Dante’s Inferno (ca. 1306-1309) and its afterlife. Inferno is the poetic description of Dante’s (imagined or actual) journey through Hell. We study how its poetry and narrative embody the notions of love, sorrow, evil, guilt, redemption, and punishment. We examine the poem as both a product and an interpretation of the world it describes and of its radical otherness: its representation of the otherworld, its relationship with religion and faith, its fear of death, its obsession with the Devil. We inquire into Dante’s inventiveness and poetic technique, reviewing his magisterial use of realistic and figurative language. We observe how Inferno casts its long shadow on modern culture: in the description of the horror of Nazi concentration camps (Primo Levi’s memoir), or in the representation of the inauthentic life in consumerist society (Pier Paolo Pasolini’s rewriting of Inferno in contemporary Italy). We investigate the challenges that Dante’s text elicits when it migrates to visual and cinematic arts (or to Disney comics), continuously camouflaging and adapting to different media. And we critically reflect on how, after seven hundred years, Inferno has not finished saying what it has to say. The course is conducted in Italian.

ITAL241 Antonioni and Cinema of the Environment
From its earliest days, the cinema has sought to capture the wonders of the world: exotic landscapes, industrial inventions, and human prowess in the face of nature. At the same time, many important filmmakers—and particularly those in the Italian tradition—have mined their medium’s capacity to register and comment upon environmental change. Few directors traversed the upheavals of the 20th century quite like Michelangelo Antonioni. Beginning with his early documentaries, we’ll explore cinema’s relationship to both the natural world and the built environment across Antonioni’s long career. From the foggy landscape of the Po valley to the urban centers of Milan, Rome, London, and Los Angeles, we will assess the images produced by location shooting and realist techniques, but also by formal abstraction and non-narrative time. What might Antonioni’s inclination toward abstraction and detachment (“Antoniennui,” in a memorable pun) tell us about the world? How should we square his stylistic tendencies with his camera’s attention to an environment under pressure? What lessons does his cinema hold for the present?

We’ll approach these questions using the core methods of the humanities: close reading, careful viewing, and critical analysis. Along the way, we’ll sharpen our understanding of film scholarship, and explore how to make critical (and creative) arguments about cinema and the environment.

ITAL245 Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)
This 0.5-credit course is conducted in Italian and designed to supplement the English-language Italian cinema course "Not Just Neorealism: Italian Cinema, its History, and Politics" (RL&L 245). The presentations that are part of the requirements for the parent course (RL&L 245) will serve as our basis in this discussion-based section: Students will be responsible for screening films in addition to those required for 245, for presenting them, and, during the discussion sections in Italian, responsible also for linking them to the course material. Further, students enrolled in the CLAC will also make mini-presentations to the broader body of the students enrolled in the parent course only, linking the extra screenings to those that are part of the course syllabus, and enriching the discourse and knowledge base.

Students are required to be simultaneously enrolled in the parent course in order to enroll in the CLAC section. For this reason, enrollment is granted on a POI basis.

Students must have advanced competency in Italian: completed ITAL 221 or a course with a higher number, spent a semester (or more) in Wesleyan’s Program in Bologna, or be linguistically proficient. For any questions about linguistic preparation, please contact the instructor.

Please note that at present this section is not acceptable as one of the nine required courses for the ITST major.

ITAL246 Crises and Emergencies in Modern Italy
The COVID-19 pandemic revived a longstanding concern in Italian theory about the relationship between rule of law and state of exception. This course draws upon biopolitics and cultural studies to investigate the relevance and ramifications of the emergency management paradigm in modern Italy. It also provocatively questions an established trend in public discourse, namely the rhetoric of the crisis: "crisi di governo," "crisi di valori," but also "emergenza migratoria," "emergenza ambientale," and so on. Why is Italy constantly in crisis? By relying on various genres of literature and on a wide range of media including films, songs, and social media, we will analyze artistic representations of these crises and emergencies, as well as the state responses to them. The critical exploration of case studies from four interconnected thematic areas revolving around issues of public health, power, body, and space will often unveil diverging narratives, allowing for reflections on the tension between safety and freedom, vulnerability and resistance, individual and collective memory, and truth and fiction.

ITAL247 Coming Out/Coming of Age: Narratives of Becoming in Italian Culture
By examining narratives of "becoming" in Italian literary and screen texts, we will work to read against a dominant "master" narrative of Italian culture that is cis-male, patriarchal, and "white." The literary and screen texts we will explore in depth include some "classic" narratives of coming of age in the Italian cultural tradition which we will lay alongside Italian cultural "coming out" narratives, some "classic," others less so. What can we learn from such adjacencies? What does one "come out" of with regard to either strand of inquiry? Is adolescence a "closet" out of which one emerges with a sexual identity? Does one come of age as an artist or "come out" as a practitioner of a particular artistic genre (filmmaker, poet, novelist)? How do artistic choices of practice subvert and inform sexual identity? What gets left behind in this "progress" of "becoming"? These are some of the questions we will address in this course, conducted in Italian.

ITAL249 Italian Filmmaking by the Book: Adaptations, Texts, and Contexts
This course explores the adaptations and transformations of Italian literary texts into their cinematic and televisial counterparts. We will principally study Italian narratives from the 20th and 21st centuries and their screen adaptations as a way of uncovering the modes and means by which Italian screen culture borrows from literary antecedents. Is the relation between literary texts and their screen adaptations a love story or bad romance? Is it characterized by a "faithfulness" to the text or a "betrayal"? Throughout the semester, students will acquire an enriched understanding of the assorted texts and their contexts by studying varied genres (short fiction, novels, nonfiction, detective stories), a variety of themes (crimes both real and imagined, petty and powerful; historical revisionism; personal and political dilemmas), and diverse geographical settings focusing principally on Southern Italy (including cities and islands reaching from the Mediterranean to the Adriatic).
All students in the course will study a common core of five author/director pairs. The core consists of "Il Gattopardo" (di Lampedusa/Visconti); "Io non ho paura" (Ammanniti/Salvatores); "L’amica geniale" (Ferrante/Costanzo); "Gomorra" (Saviano/Garrone/Sollima); and "Novelle per un anno/ Caos" (Pirandello/Taviani). Additionally, students will, in consultation with the instructor, choose a sixth pairing from the list of the following titles, which will serve as the basis of their end-semester presentation as well as an element of the oral final exam: "Il giorno della civetta" (Sciascia/Damiani); "Il contesto/ Cadaveri eccellenti" (Sciascia/Rosi); "Il Malavoglia/La terra trema" (Verga/Visconti); "Padre Padrone" (Ledda/Taviani); "Quo vadis, baby?" (Verasani/Salvatores); "Acciaio" (Avalon/Acqua); "Il conformista" (Moravia/Bertolucci); "Todo modo" (Sciascia/Petri); "Minchia di re/Viola di mare" (Pilati/Maiorca); "Benzina" (Stancanelli/Stambrini); "Il padrino" (Puzo/Coppola); "La tregua" (Levi/Rosi); and "Le forme dell’acqua" (Camilleri/Sironi). Students may also care to consider literary texts from earlier historical periods: Basile’s 16th-century "Il cunto de li conti/Il racconto dei racconti" (Garrone) and Collodi’s 19th-century "Pinochio" (with adaptations by Disney, Benigni, and Garrone). This course will be conducted in Italian. This course is appropriate for all students who have completed ITAL 112 or whose placement exam indicated a course numbered ITAL 221 or higher.

This course will be offered in a hybrid mode, both online and in person, accepting students on campus only. Unless the public health circumstances change, the course will be held online until the weather permits outside class meetings (probably the end of March or the beginning of April), when we will meet in one of the outdoor covered spaces on campus. Finally, for the duration of the semester (from February to May), one class meeting per week will be online. The specific day will be announced at the beginning of the semester. It is possible that the class will be divided into two groups, each meeting with the professor once weekly, and together once weekly. We will determine whether this will happen once the composition of the class is known.

Students are encouraged to put the lengthened winter break to good purpose. All students are expected to read the first book of Ferrante’s Neapolitan quartet, "L’amica geniale," during the winter break. It is a long novel, but students will find that the Italian is not challenging. Any edition in Italian will be fine (e.g., electronic, print, used, etc.). Reading in advance of the semester will facilitate students’ workload as well as keep Italian flowing during the lengthy pause. It is further greatly recommended that students read di Lampedusa’s "Il Gattopardo" in advance of the semester. If students have already taken an Italian course numbered 221 or higher, or have already studied in Italian, it is recommended that they read "Il Gattopardo" in Italian. Any edition will serve.

ITAL256 Medieval Gigs: Saints, Scholars, Sailors, Sinners

A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages.

For those staying closer to home, like clerics and other literate "Italians," we review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

ITAL260 Castles of Cards: Italian Romance Epic Storytelling Lab

Celebrated authors of 20th-century Italian literature such as Italo Calvino and Gianni Celati have included in their works several features of Renaissance romance epic, from the importance of orality and the idea of sharing stories with a community of listeners to multi-threaded narratives and a playful attitude to the world of storytelling. The current popularity of fantasy literature and TV series puts us in an ideal position for the study of the chivalric romance and for an exploration of the continuities and the differences between past and present literary forms. In this course we focus on canonical and less canonical texts of the Italian Renaissance epic and their modern rewritings. After a multimedia investigation of Andrea da Barberino’s “Guerrin Meschino,” Luigi Pulci’s "Morgante," Boiardo’s "Inamoramento de Orlando," Ariosto’s "Orlando Furioso," and Tasso’s "Gerusalemme liberata" along with their rewritings by authors such as Bufalino, Nori, Celati, Calvino, and Giuliani, we will take inspiration from Calvino’s "Il castello dei destini incrociati" to transform the classroom into a storytelling lab. The same deck of tarot cards that Calvino used for his book will help us to take part in a role-playing game and create a collaborative story that will gradually unfold throughout the semester. The class aims both at studying the Italian romance epic in order to reenact it creatively and also at using this collaborative rewriting as an interpretive tool to explore Renaissance literature from within.

ITAL266 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italo-phon cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of
change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles’ Antigone, Euripides’ Oedipus and Medea, Aeschylus’ Agamemnon, as well as figures from the Oresteia and from such epics as Homer’s “Iliad” and Virgili’s “Aeneid.” This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

ITAL289 The Mediterranean Archipelago: Literary and Cultural Representations

“Islands which have / never existed / have made their ways / onto maps nonetheless” (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands—both fictional and real—as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevict’s statement that “the Mediterranean is not only geography,” we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto’s Island of Alcina to Goethe’s Capri), narrative stratagem (from Homer’s Phaeacia to Boccaccio’s Rhodes), literary protagonist (from Deledda’s Sardinia to Murgia’s Sardinia), political concept (from Plato’s Atlantis to Campanella’s Taprobane), and existential condition (from Cervantes’s Cyprus to Cavafy’s Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands’ inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

JAPANESE (JAPN)

JAPN103 Elementary Japanese I
This course is designed for those who have no previous experience studying Japanese. The objective of this course is for students to acquire communicative and functional skills in Japanese. You will learn the basics of speaking, listening, reading, writing, orthography, and sociolinguistics (when to say what and why) of modern Japanese. Textbook Genki Lesson 1 - Lesson 8 will be covered. Each of the 8 lessons covered in this course includes new vocabulary items and expression patterns related to topics such as time, shopping, daily activities, travel, family, and expressing opinion, etc. In addition, students will learn to read and write 46 basic hiragana and katakana syllables and approximately 86 Kanji (Chinese characters). Class meets daily, five hours per week, and includes weekly TA sessions. No credit will be received for this course until you have completed JAPN104.
Offering: Host
Grading: Amp Graded
Credits: 1.50
Gen Ed Area: HA-CEAS
Prereq: None

JAPN104 Elementary Japanese II
This course is a continuation of JAPN103, and will approach elementary-level Japanese from two angles: form (grammar) and context (social usage). Students will continue to enhance their fundamental skills in Japanese, with a focus on describing thought and action, expressing intent, and developing intercultural and interpersonal communicative abilities (apologizing, giving/receiving advice, making requests, etc.). The course will continue to emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 9 - Lesson 16 will be covered and 123 additional kanji will be introduced.
Offering: Host
Grading: A-F
Credits: 1.50
Gen Ed Area: HA-CEAS
Prereq: JAPN103

JAPN205 Intermediate Japanese I
This course will approach intermediate-level Japanese from two angles: form (grammar) and context (social usage). Students will learn complex expressions, such as communicating regret, respect (honorfics/humbling), passive experiences, and causative forms. The course will emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 17 - Lesson 23 will be covered and 107 additional kanji will be introduced.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CEAS
Prereq: JAPN104

JAPN206 Intermediate Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including the geography, speech styles, technology, sports, and food of Japan. Students will also learn various strategies in conversation: asking questions, apologizing, asking for favors and expressing gratitude, asking for advice and getting information, and expressing one's thoughts. Lesson 1- Lesson 5 from the textbook Tobira will be covered and 176 additional kanji will be introduced.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CEAS
Prereq: JAPN205

JAPN217 Third-Year Japanese I
The primary goal of this course is to enable students to acquire Japanese language proficiency through integrating four skills: speaking, listening, reading, and writing. Lesson 6 - Lesson 9 from the textbook Tobira cover different topics, including religion, pop culture, traditional performing arts, and education in Japan. The class meets three hours per week.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CEAS
Prereq: JAPN206

JAPN218 Third-Year Japanese II
This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including convenient things, history, traditional crafts, and nature of Japan. Students will also learn various strategies in conversation: conveying information, talking about past events, explaining how things are made, and extending one's dialogue. Lesson 10-Lesson 13 from the textbook "Tobira" will be covered and 141 additional kanji will be introduced.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CEAS
Prereq: JAPN217

JAPN219 Fourth-Year Japanese: Conceptualizations of Identity in Contemporary Japan
Enrolled students and faculty will determine the twice-weekly, 80-minute class meeting times together.

This course involves close readings of modern literary texts, attention to current events reported in the media, and examinations of visual materials and critical discussions in Japanese. Placing Japan in a global perspective, the course addresses the following three main themes surrounding Japan in comparison to the world.

(1) Issues pertaining to the modern Japanese family (declining birthrate, aging society, women's social advancement)

(2) Bioethics (regenerative medicine, cloning, reproductive choices, life-extending and end-of-life care)

(3) Identity (questions of "Japanese-ness," as well as issues faced by so-called "gaijin," immigrants, refugees, biracial/bicultural individuals, and resident Koreans or "zainichi")

*These themes are subject to change.

JAPN229 Debating Japan and the World in Japanese
Tied to courses being offered in the CEAS, students in this course read related literature, scholarly articles and blogs, watch videos and films, and debate in Japanese about current events and issues surrounding Japan, Asia, and the world. Guest Japanese speakers may visit the class. Some possible themes are foodways, educational systems, Japanese relations with other Asian countries, identity and stereotypes, and cultural appropriation. However, an overarching focus will be on the history and current dynamics of Japanese-American relations. All materials, reading and writing assignments, and discussion will be in Japanese, with some comparative materials in English, and some translation by students into English. Native speakers of Japanese are strongly encouraged to participate.

JAPN285 Translating Modern Japanese Song Lyrics (CLAC.50)
This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other’s choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.

Prereq: KREA205

KREA217 Advanced Korean I
Advanced Korean I is the first half of the advanced course in spoken and written Korean. Various functions of more complex grammar patterns and vocabulary than those learned in previous levels will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CEAS
Prereq: None

KREA218 Advanced Korean II
Advanced Korean II is the second half of the advanced course in spoken and written Korean. In addition to the textbook, selected readings from news articles and short stories from modern Korean literature will be introduced to help students develop their writing skills and a higher level of reading comprehension.
Upon the completion of this course, students will be able to demonstrate an advanced level of balanced communicative skills in speaking, reading, writing, and listening.

Prereq: KREA217

KREA255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)
This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.
This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

KREA256 Exploring Korea Through a Multifaceted Cultural Lens (CLAC.50)
This course will address a variety of aspects of traditional and modern Korean culture, ranging from traditional cuisine, music/art, religion, and the modernization of Korea in the 20th century to the Korean Wave, films, education, and the history of Korean pop music. Video clips, movies, and other multimedia materials will be utilized to better facilitate students' learning of Korean culture and heritage.
This course will be conducted mostly in Korean. Students who have either completed one or two years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean and heritage speakers are also welcome.
Offering: Host
KREA262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and, of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking “Hermit Kingdom,” Korea has now entered into instant global communications with the production of more individual music in various styles.

LAT101 First-Year Latin: Semester I
Conquer Latin in two semesters! Acquire a basic vocabulary and build your skills with essential grammar as you develop your ability to read passages in Latin from the principal classical authors—including Cicero, Vergil, and Ovid. This first semester covers half the textbook. In the second semester (LAT 102), you will complete the textbook.

LAT102 First-Year Latin: Semester II
Continue your conquest of Latin by completing your acquisition of a basic vocabulary and essential grammar.

LAT104 Intensive Introductory Latin
Learn Latin in a semester with this intensive introduction to grammar and syntax. Readings in original authors help illustrate and reinforce the fundamental principles of the language in preparation for more advanced reading at the intermediate level. Recommended for students wanting accelerated Latin acquisition or those with some background wanting a quick review.

LAT201 Catullus and Cicero: Love and Life in Republican Rome
A selection of the poems of Catullus and portions of Cicero’s “Pro Caelio” as a reflection of life in late Republican Rome, with a particular emphasis on the intersection between the lives of Catullus, the young Caelius, and their mutual love-interest Lesbia/Clodia. This course is intended for students with one year of college Latin or the equivalent (normally three to four years of high school Latin) and includes a thorough review of Latin grammar and syntax.

This course will fall under the Literature and Performance track.

LAT202 Latin Lyric Poetry
In this intermediate-level Latin course, students will continue to develop their facility with the Latin language and their understanding of Roman literary history.
through a reading of selections of Latin lyric and elegiac poetry, two corpora that are both heavily influenced by earlier Greek models and show a remarkable degree of Roman ingenuity. The work of Horace and Catullus will provide an entry point into this fascinating material. We will then turn to work by the elegists Propertius and Tibullus, as well as shorter poems by Ovid. Throughout the course, we will also be investigating a number of questions. What is lyric poetry, and to what extent must Latin lyric poetry be read as a continuation of the Greek lyric tradition? How do Roman authors take Greek models and rework them to address the interests of their contemporary audience? How and for whom were these poems performed, and how does this affect the way we read this corpus? To facilitate our discussion we will be reading translations of a number of Greek lyric songs and of Latin lyric poetry by Seneca and Statius, some examples of modern lyric, and scholarly literature. In addition to our daily reading in Latin, we will undertake a careful review of Latin grammar, as well as long-term translation and commentary assignments.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-CLAS
Prereq: None

LAT203 Latin Prose: Roman Letters
An introduction to the reading of classical Latin prose, the course will include a review of Latin grammar and syntax. Students will read selections from the letters of Seneca the Younger and Pliny the Younger. Seneca, a distinguished philosopher and statesman of the Neronian period, uses his experiences in contemporary Rome as texts from which to derive simple philosophical messages. Pliny recounts events from the life of an Italian aristocrat of the first century CE, including an eyewitness account of the eruption of Vesuvius. The course will begin slowly, with the aim of gradually aclimatising students to the rhythms and stylistic and syntactical patterns of Latin prose. The emphasis will be on understanding and translating the Latin, but we will consider the social and cultural background to the texts we read.

LAT230 Love and Suffering in Ancient Rome (CLAC.50)
In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

LAT251 The Age of Nero
Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

LAT254 Apuleius: THE GOLDEN ASS
Fast-paced, magical, sexy, and bizarre, Apuleius' GOLDEN ASS, or METAMORPHOSES, contains more than enough rowdy episodes to keep us entertained for a semester. The novel tells the story of the feckless Lucius, the man-turned-ass whose encounters with the residents of Thessaly range from the vulgar to the weird to the sublime. Our goals, in addition to reading and understanding the Latin, include tracing prominent themes and becoming acquainted with recent relevant scholarship.

LAT281 Roman Satire: Juvenal
Roman satire, as practiced by Lucilius, Horace, Persius, and Juvenal is a strange hybrid: it combines social criticism, literary parody, philosophical rumination, and obscene burlesque, a self-consciously "humble" genre set in the framework of dactylic hexameter, the meter of high-flown Homeric and Vergilian epic. It is among a small minority of ancient literature which directly addresses itself to the humber aspects of the everyday lives of Roman citizens. This course on Roman satire will focus on Juvenal, the last practitioner of Roman verse satire. We will begin the course with a selection of short readings from each of the four Roman satirists in order to orient ourselves with standard topics of Roman satire (including dining, country vs. urban life, the body, sex, and gender roles) and differentiate the approaches. We will spend the rest of the semester exploring Juvena’s seminal works: his first and second book of Satires, wherein he situates himself as a figure marginalized by a new order of foreign interlopers, powerful
LAT335 Martial
This half-credit course will explore a variety of themes in Martial's "Epigrams." Underappreciated today, the "Epigrams" depict friendships, rivalries, sexualities, ethnicities, violence, gender roles, professions, aspirations, and failures in a sharp social commentary on the imperial Roman world. In addition to weekly translation, we will survey the latest scholarly literature on Martial's corpus.

LAT375 Set in Stone: Reading Roman Life through Inscriptions
Inscriptions are our tweets from the ancient Romans. From the alphabets scrawled by school children on wax tablets to the curse tablets of scorned lovers and the biographical epitaphs on funerary monuments lining the roads leading...
into Roman cities they provide an intimate view of daily life in the ancient world, while public inscriptions document the political, religious, and social workings of the Roman state. This course will survey a representative sampling of the Latin inscriptive record from the earliest period through the Empire, including examples of laws, decrees, and religious dedications, Augustus' Res Gestae, and the methods employed in inscribing objects.

LAT126 Intro to History: Heretics on Trial: The Holy Inquisition and Its Enemies
The Inquisition was among the most feared institutions of the early modern West. In its efforts to impose religious orthodoxy, it persecuted minorities, prohibited behaviors it deemed heretical--like magic and unbelief--and censored intellectual inquiry. Yet despite its resoluteness, the ability of the Catholic Church to impose control varied widely across time and place and was often met with equally firm resistance. This introductory course examines how the Catholic Inquisition functioned, from its origins in the medieval period to its final demise in the nineteenth century, paying particular attention to geographic and temporal specificities. From Cartagena de Indias to Lima, Goa, Rome, and Toledo, inquisitorial tribunals spanned a significant portion of the Atlantic world. The records produced by its scribes are some of the richest sources of the social, cultural, religious, and economic history of the era, yet they are also some of the most challenging to deal with, both epistemologically and morally. Historians have relied on Inquisition archives to reconstruct the lives of individuals and communities who left no other written records, all the while seeking to acknowledge that the records were produced under duress by officials who suspected the accused of the terrible crime of heresy. Through a wide range of primary sources like trial transcriptions, Inquisition "autobiographies," written confessions, censored books, and literary sources, students will both survey the lives of people who faced the Inquisition's scrutiny, while considering the role of violence, persecution, and resistance in the creation of the very records that allow for historical reconstruction.

LAST188 Neotropical Acuatic Ecosystems: Their Importance, Sustainable Use and Conservation (CLAC 1.0)
This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemism, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable
development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST200 Colonialism and Its Consequences in the Americas
Why does colonialism matter to the fields of American studies, Latin American studies, and Caribbean studies? What have been the consequences of colonialism for the nations that make up the Western Hemisphere? This course offers a transnational, hemispheric approach to the study of the Americas through a comparative analysis of colonial ventures and their consequences. With a focus on the interactions of Indigenous, European, and African peoples, the course introduces a diverse range of issues and topics, such as the organization of production, including chattel slavery and indenture; the formation of colonial cultures and syncretic belief systems; and independence movements and the emergence of nation-states.

LAST218 From Chocolate to Coca: Commodities and the Making of Latin America
Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

LAST219 Latin American Economic Development
In this course, we try to understand the puzzle of differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin American and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

LAST229 Between Worlds: Change and Continuity in Early Latin America
The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to
the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

LAST242 Histories of the Caribbean: New Questions, Methods, and Vantage Points
In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin/x America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Chinese American and Filipino writers (such as Dario, Tablada, Gómez Carrillo, Balbó, and hispanicized perspective, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and political). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

LAST245 Modern Latin America Since 1810
This lecture course explores some of the most exciting new trends in historical scholarship on the Caribbean. We will consider how recent scholars of Latin America have turned a critical eye to existing methods and reimagined "archival" as they have crafted new stories about gender, sexuality, race, the environment, and the rise of modern capitalism. In this way, we will question how these new directions in Caribbean studies have reshaped the study of history more generally. We will use a wide geographic lens in order to gain an expansive vision of the circuits of the Greater Caribbean, stretching from Antigua, Guadeloupe, Barbados, Martinique, Jamaica, Trinidad, Guyana, Cuba, Puerto Rico, and Haiti into the wider Atlantic world.

LAST252 Race and Nation in Latin America
How does race operate in Latin America, and in what ways does it intersect with the concept of nation and national belonging? The regions we call Latin America and the Caribbean have, since the first human encounter between "Old" and "New" Worlds of the 15th century, been often understood as places of mixture--both cultural and biological. From at least the early 19th century, when independent nations in the region began to emerge from colonial rule, intellectuals, statesmen, and citizens alike have had to contend with "race" and its inextricable connection to the concept of "nation." This course aims to introduce students to the history of race and national formation in Latin America and the Caribbean, from the wake of the independence movements of the early 19th century to the present. It draws on historical, anthropological, and literary approaches to identifying, analyzing, and interpreting the varied meanings of race and nation throughout the region.

LAST254 Tales of Resistance: Modernity and the Latin American Short Story
Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

LAST258 Bolívar's Interpreters: Nation Construction in the Americas
No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolivar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolivar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolivar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

LAST259 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World
Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders—the Strait of Gibraltar and the Río Grande (Río Bravo)—and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

LAST265 Multilingual Aesthetics in Latin America
This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety
of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

LAST266 Latin American Theater and Performance
This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

LAST268 Black Religions in the Americas
This course will focus on the African-based religious systems that cultivated traditional ways to survive slavery, white supremacy, and state violence. We will focus on Vodou in Haiti, Regla de Ocha (Santeria) and Palo Mayombe in Cuba, Obeah in Jamaica, and aspects of Black religions in the US. We will discuss questions of method and themes of political resistance, orality, secrecy, magic, "authenticity," commodification, and the ethics of representation. We will also look at the Black church and especially the rise of the Pentecostal movement in African and Afro-Caribbean spaces, as well as visionary Black religious thought.

LAST271 Political Economy of Developing Countries
Students will study issues related to economic development and its sustainability, primarily focusing on lesser-developed, developing and middle-income countries. Students will examine how political norms, government institutions, and state capacity create incentives that shape political behavior, government policies, and ultimately policy outcomes.

Over the course of the semester, students will analyze the factors that influence the persistence of poverty and economic inequality in some countries. Additionally, students will evaluate specific factors that inhibit countries' economic growth and development, such as dependence on commodities, foreign aid or natural resource rents; systematic discrimination against women or religious and ethnic minorities; systemic corruption or criminal violence; the negative externalities of informal economies; and indebtedness to international financial institutions. Students will also review case studies to evaluate specific policy innovations to determine which succeeded or failed and why. By the end of the semester, students should be able to make a case for particular approaches to governance and public policy that will promote political and economic development in poorer countries and help all citizens to achieve their full capabilities and improve their happiness and overall well-being.

LAST272 Cubanidad: Diaspora, Exiles, and Cultural Identity in Cuban Literature and Film
This course will examine shifting notions of Cubaness, or "cubanidad," from the 19th century to the present times from a diasporic framework. We will discuss writings by/about African slaves, Chinese indentured laborers and migrants, and Spanish immigrants in Cuba, as well as Cuban exiles in the U.S. and Spain from the 19th century to the beginning of the 20th century. Through a variety of literary texts and films, we will then study select cases of European exiles who visited Cuba in the 1930s and '40s, the later massive waves of Cuban migration to the U.S. after the Revolution, and the more recent immigrants who have settled in Cuba.

LAST273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters
Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra’s other Chile, César Aira’s Colón (Panamá), Fernando Vallejo’s Medellín (Colombia), and Mayra Montero’s eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904–1914), the Cold War (1947–1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

Offering: Crosslisting
environment and its destruction, to peasant and indigenous agency, and to a projects of modernization and development, to the global angst over the subversion collide. We will evaluate this topography in relation to diverse anxieties about sovereignty, nationhood, race, development, gender, and the United States’ successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island “intra-colonial” (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai‘i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Edouard Glissant’s concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

LAST274 Insular Borders of Latin(x) America
Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire’s control of its remaining insular colonies in the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the United States’ successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island “intra-colonial” (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai‘i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? LAST276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

LAST278 Dangerous Plots: Fictions of the Latin American Jungle
This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

LAST279 Christianity and Globalization
This course focuses on recent developments in global Christianity. We will look at various interlinked dynamics: the rise of spirit-filled Evangelicalism, especially Pentecostalism, faith-based humanitarianism, child-sponsorship programs, and themes of militarism such as spiritual warfare. We will pay attention to the role of U.S. power in the world and how the narratives that various Protestant Christians tell through their writings and media shape life across international spaces. We will sample a variety of methods in how one studies the field of Christianity. These will include historical, sociological, and anthropological methods, all of which challenge traditional scholarly accounts (meaning those in the field of church history) in order to expand our understandings of Christianity in the modern period.

LAST280 Screening Youth in Contemporary Latin American Cinema
This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

LAST281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature
Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as “Islas sonantes” (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times,
ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

LAST283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile
This course explores how poetry, novels, and films, produced during and after Chile’s military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

LAST288 Territories of Dwelling, Desire and Resistance in Latin America
This course seeks to examine the ways in which diverse geographical spaces in Latin America have been produced, negotiated, and contested from the past century to our times through cultural practices that construct them as territories of dwelling, desire, possession, dispossession, and resistance. We will focus on texts and practices—literature, film, performance, and the visual arts—that seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries, which in our times manifests itself through extractivist and other capitalist practices, and pay close attention to local modes of dwelling and the relationships among community, embodiment, gender, and desire. We will trace how these texts intervene in urgent debates about the destiny of rural lands, the uses and abuses of nature, and the place of rural peoples, the struggles for peasant and indigenous rights, environmental justice, and the construction of alternative modernities. We will focus particularly on the Andean and Amazon regions (mountains, rainforests) of South America, as well as other rural tropical areas.

LAST290 Current Environmental Issues in Latin America (CLAC 1.0)
This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs’ projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST291 From the Muralists to the Narconovela: The Public Intellectual in Mexico
Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910–1917) and the Muralists (1920s–40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

LAST292 Spanish American 'Modernismo' in a Global Context

The publication of Nicaraguan Rubén Darío's AZUL... in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

LAST295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures

What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

LAST315 Cuban Literature and Film: Imagination, Revolt, and Melancholia (CLAC 1.0)
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late nineteenth century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afro-Cubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life. Reading materials and in-class discussions will be in Spanish. Hence, knowledge of advanced Spanish is required.

LAST320 Media and Power in Latin America: From Quipus to Twitter
This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

LAST321 Secrets, Lies, and Fictions in the Americas
In 1964, historian Richard Hofstadter underlined the spread of a "paranoid style" in American politics. Although Hofstadter’s description seems more appropriate today than ever, in an increasingly interconnected global order the role of misinformation, uncertainty, manipulation and conspiratorial imaginaries in shaping and limiting democracies and public spheres cannot be exclusively assigned to any particular locale. From a continental standpoint, this course offers analytical tools to explore the political complexity of lies, secrets and fictions in both the United States and Latin America since the mid-twentieth century to this day. By studying a series of cases-including the Guatemalan civil war, the assassination of John F. Kennedy, the Pentagon Papers, the U.S. intervention in the Middle East, the “dirty war” in Latin America, censorship in socialist Cuba, the arrest of Augusto Pinochet in London, Wikileaks, hacker practices in the early days of internet, or Cambridge Analytica-we will address the relations between surveillance, spectacle, and conspiracies (both factual and imagined) in the contemporary techno-political landscape. Moreover, the course emphasizes the speculative and theoretical potentials of art and literature when it comes to understanding socio-political phenomena. Beyond distinctions between truth and falsehood, fictional constructions are key to our collective capacity to imagine alternative worlds. By mapping out the ways in which fictions circulate as such or rather as truthful versions of reality, we will problematize the limits and uses of truth, lies, official and alternative narratives, as well as the power of states, corporations, individuals, and collectives to direct attention and frame information.

LAST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present
Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle’s rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike.
This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in Tristes Tropiques (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog’s film Fitzcarraldo (1982).

LAST335 Nature, Science, and Empire in Early Latin America
This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

LAST343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations
The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

LAST344 The Haitian Revolution Beyond Borders
In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti’s neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti’s founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti’s long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

LAST348 Urban Histories of Latin America

Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

LAST373 Language and Power in Latin America

What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region.

The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonisation, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of indigenous peoples as social and political actors in contemporary Latin America.

LAST383 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy

This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European-colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LANG141 Elementary Modern Greek
The course is an introduction to the language and culture of modern Greece. The fundamentals of reading, writing, and speaking are taught. We start by learning the Greek alphabet and sounding out basic words and expressions. We then progress to acquiring useful vocabulary; practicing in-class dialogue exercises; and eventually constructing original sentences for use in conversation. In addition, we examine different aspects of Greek culture including modern Greek literature in translation, the Mediterranean Diet, contemporary Greek history, and Orthodox Christian spirituality and holiday customs.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: HA-LANG
Prerequisite: None

LANG142 Elementary Modern Greek II
The course builds upon the language skills acquired in LANG 141. Students learn how to count, tell time, and give directions in Greek; compose short descriptive essays in the target language; and translate passages into English. Student-led conversation hours outside of class provide further opportunity to practice speaking and to explore interests such as Greek music, social media, and travel. In class, we also examine historical and cultural topics including life in contemporary Athens, the Greek War of Independence, and the story behind the modern revival of the Olympic Games.
Offering: Host
Grading: Cr/U

Prerequisite: None

LANG160 Introduction to Tamazight: The Native Language of North Africa and Beyond (CLAC.50)
This course will introduce students to the language (sounds and script) and culture of the Amazigh people, an ethnic group (commonly known as Berbers) native to North Africa and West Africa, specifically Morocco, Algeria, Tunisia, Libya, Mauritania, northern Mali, and Niger, with some oases in Egypt and the Canary Islands.

The Tamazight language—the alphabet of which is called Tifinagh—has been a written language for almost 3000 years, although it was disrupted throughout history due to various invasions and conquests of the area. The Tuareg people of the Sahara desert in Northern Africa, and as of late Morocco and Algeria, have been using the Tifinagh alphabet (oldest dated inscription from about 200 BC) and the Tamzight language as a secondary national language.

The objectives of this course are: 1. To introduce students to the sounds and script of Tifinagh; 2. To teach students basic conversation and essential elements of the Tamazight language; and 3. To familiarize students with the culture of the different Amazigh peoples.

LANG190 Elementary American Sign Language I
This course is the first (1st) of six American Sign Language (ASL) courses encompassing two terms for Elementary, two for Intermediate, and two for Advanced. The two Elementary ASL courses are an introduction to communication in ASL. You will acquire a beginner’s vocabulary and grammar while starting to build a preliminary understanding of the Deaf perspective on life. The course will be taught primarily in ASL and with clarifications in written English as needed. Interactive activities in class and homework assignments will provide you with ample opportunities to practice communication in ASL as much as possible. Because of the absence of a standardized written system for ASL, you will complete many of the assignments by recording yourself on video.
Offering: Host
Grading: Amp Graded
Credits: 1.00
Gen Ed Area: HA-LANG
Prerequisite: None

LANG232 Introduction to ASL in the Performing Arts (CLAC 0.5)
This course offers an introduction to artistic ASL interpreting. "Artistic ASL Interpreting" does not apply only to performing groups who present songs in sign language on a stage. Nor is it a term that is exclusively linked with theatrical interpreting in a "platform" setting of plays, musicals or poetry. Artistic interpreting can be explained as a refined, more creative style of interpreting at the highest levels of the profession. For students, it presents challenges that encourage more attention to eye gaze and contact; shifts in body stance and positioning; size and style of sign production; facial expressions; gestures as communication and sign alternatives in overall concept formations and messaging. These are, in fact, some of the most important components in ASL communication and some of the most challenging aspects to encourage or teach.

Prereq: LANG191

LANG233 Introduction to ASL / English Interpretation (CLAC 0.5)
Having completed course work in Beginning ASL I, II and Intermediate I, II, students who have demonstrated a strong interest in continuing their studies at a more sophisticated and challenging level may find this course work interesting pursuant to becoming a professional, credentialed Sign Language Interpreter.

This experience will provide students with a working knowledge of the profession of interpreting including the Code of Professional Conduct, certification criteria, the roles and responsibilities of a professional interpreter and discussions of the role of the interpreter in a variety of professional settings including educational, medical, legal, the performing arts, counseling, and rehabilitation.

Students who attend this course demonstrate that they are able to express in ASL, with some confidence, routine and everyday experiential topics within a conversational format with some elaboration. They demonstrate clear and accurate signing and fingerspelling at a moderate rate of speed.

This coursework uses a process-oriented approach for applying the essential cognitive strategies for interpretation. These strategies include organizing and manipulating visual images, analyzing message for meaning, and self-monitoring for message accuracy. This experience serves as a transition from language learning to beginning interpretation.

Students will use body movements in performance-like activities to model people’s actions in the real world or in imaginary universes, facial expressions to convey feelings and emotions as well as some ideas and concepts, hand gesticulations to represent objects and concepts. Students will practice their non-verbal (aka not based on language) communication in diverse settings on a variety of topics taking into account different perspectives and sensibilities in the world: countries, cultures, languages, minorities, genders, ages, etc. Students will also be exposed to a stylized form of signed language used by the Deaf community in international settings, commonly called International Sign Language. This course does not require previous exposure to American Sign Language.

LANG300 Introduction to Pequot Language and Culture I
This course is designed to provide participants with an introduction to Pequot language. Pequot is an Algonquian language spoken by many of the Native American people indigenous to Connecticut, including the Wangunks who lived in the area that is now Middletown. This course will focus on acquiring linguistic concepts aimed at developing conversational proficiency but will also include readings and discussions about Wangunk history and culture.

Offering: Host

Grading: OPT

MATH119 Introductory Calculus
This course is designed to introduce basic ideas and techniques of differential calculus. Students should enter with some precalculus skills but with very little or no prior study of calculus. Topics to be considered include differential calculus of algebraic, exponential, and logarithmic functions. (Integral calculus will be introduced in MATH118.)
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: None

MATH118 Introductory Calculus II: Integration and Its Applications
This course continues MATH117 and is designed to introduce basic ideas and techniques of calculus. Students should enter MATH118 with sound precalculus skills and with very limited or no prior study of integral calculus. Topics to be considered include differential and integral calculus of algebraic, exponential, and logarithmic functions.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: None

MATH119 Elements of Calculus, Part I
This course is the first half of a two-semester calculus sequence (MATH119, MATH120). This sequence is designed for students who have not previously studied calculus. The course, together with MATH120, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: None

MATH120 Elements of Calculus, Part II
This course is the second half of a two-semester calculus sequence. This sequence is designed for students who have not previously studied calculus. The course, together with MATH119, will cover limits, derivatives, and integrals. Exponential, logarithmic, and trigonometric functions will be introduced and their calculus will be studied. Applications of calculus to biology, economics, physics, and/or other fields will be emphasized.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: MATH119

MATH121 Calculus I
MATH121, together with MATH122, will cover both theoretical and practical aspects of limits, derivatives, and integrals; the calculus of exponential, logarithmic, trigonometric, and inverse trigonometric functions; techniques of integration; plane analytic geometry; various applications of calculus; and sequences and series, including power series and intervals of convergence.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: None

MATH122 Calculus II
The continuation of MATH121. Topics covered include techniques and applications of integration and an introduction to sequences and series.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: None

MATH123F Mathematical Deduction with Calculus (FYS)
This course is a first-year seminar (FYS). Topics covered include techniques and applications of integration and an introduction to sequences and series, with an emphasis on mathematical writing. Weekly papers will be required. It is suitable for students who have already taken calculus and are interested in pursuing the mathematics major. Students may not receive credit for both MATH 122 and MATH 123.
Offering: Host

Gen Ed Area: NSM-MATH
Prereq: MATH132

MATH134F Mathematical Thinking (FYS)
In this course we seek to illustrate for the students that mathematics is an organic way of thinking, with a beauty and elegance of its own, that also includes...
its essential applications to many concrete physical models. Students will learn the techniques of mathematical writing, as well as take a survey of important mathematical topics.

**Offering:** Host
**Grading:** OPT
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** None

**MATH211 Problem Solving for the Putnam**
This course will explore the problems and problem-solving techniques of the annual William Lowell Putnam mathematical competition. Particular emphasis will be placed on learning to write clear and complete solutions to problems. The competition is open to all undergraduate students.

**Offering:** Host
**Grading:** Cr/U
**Credits:** 0.25
**Gen Ed Area:** NSM-MATH
**Prereq:** None

**MATH221 Vectors and Matrices**
This is a course in the algebra of matrices and Euclidean spaces that emphasize the concrete and geometric. Topics to be developed include solving systems of linear equations; matrix addition, scalar multiplication, and multiplication; properties of invertible matrices; determinants; elements of the theory of abstract finite dimensional real vector spaces; dimension of vector spaces; and the rank of a matrix. These ideas are used to develop basic ideas of Euclidean geometry and to illustrate the behavior of linear systems. We conclude with a discussion of eigenvalues and the diagonalization of matrices.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** MATH122

**MATH222 Multivariable Calculus**
This course treats the basic aspects of differential and integral calculus of functions of several real variables, with emphasis on the development of calculational skills. The areas covered include scalar- and vector-valued functions of several variables, their derivatives, and their integrals; the nature of extremal values of such functions and methods for calculating these values; and the theorems of Green and Stokes.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** MATH122

**MATH223 Linear Algebra**
An alternative to MATH221, this course will cover vector spaces, inner-product spaces, dimension theory, linear transformations and matrices, determinants, eigenvalues and eigenvectors, Hermitian and unitary transformations, and elementary spectral theory. It will present applications to analytic geometry, quadratic forms, and differential equations as time permits. The approach here is more abstract than that in MATH221, though many topics appear in both.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** MATH122

**MATH225 Introduction to Real Analysis**
In this rigorous treatment of calculus, topics will include, but are not limited to, real numbers, limits, sequences and series, continuity and uniform continuity, differentiation, the Riemann integral, sequences and series of functions, pointwise and uniform convergence of functions, and interchange of limiting processes. MATH228 or comparable experience in writing mathematical proofs is strongly recommended for success in this course.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** (MATH222 AND MATH221) OR (MATH222 AND MATH223)

**MATH226 Complex Analysis**
This course will present the basic properties of complex analytic functions. We begin with the complex numbers themselves and elementary functions and their mapping properties, then discuss Cauchy's integral theorem and Cauchy's integral formula and applications, Taylor and Laurent series, zeros and poles and residue theorems, the argument principle, and Rouche's theorem. In addition to a rigorous introduction to complex analysis, students will gain experience in communicating mathematical ideas and proofs effectively.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** (MATH222 AND MATH221) OR (MATH222 AND MATH223)

**MATH228 Discrete Mathematics**
This course is a survey of discrete mathematical processes. Students will be introduced to the process of writing formal mathematical proofs, including mathematical induction. Topics may include set theory, logic, number theory, finite fields, permutations, elementary combinatorics, or graph theory.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** None

**MATH229 Differential Equations**
This course is an introduction to the theory of ordinary differential equations. Topics will include existence and uniqueness theorems as well as techniques to solve systems of equations, with applications in pure mathematics and related fields such as physics, chemistry or biology.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** (MATH221 AND MATH222) OR (MATH222 AND MATH223)

**MATH231 An Introduction to Probability**
This course teaches the basic theory of probability. Although the notions are simple and the mathematics involved require only a basic knowledge of the ideas of differential and integral calculus, a certain degree of mathematical maturity is necessary. The fundamental concepts to be studied are probability spaces and random variables, the most important ideas being conditional probability and independence. The main theorems we will study are the law of large numbers and the central limit theorem.

**Offering:** Host
**Grading:** A-F
**Credits:** 1.00
**Gen Ed Area:** NSM-MATH
**Prereq:** MATH222 AND MATH228

**MATH232 Mathematical Statistics**
This course covers the basic notions of estimation, hypothesis testing, regression, analysis of variance, experimental design, and other topics in statistics from a rigorous mathematical perspective. This material will be supplemented by various case studies.

**Offering:** Host
MATH246 Applied Topology
This course teaches the main concepts in Applied Topology. Students will learn to apply nonlinear methods to analyze the shape of data sets. These approaches are drawn from classical topology and focus on the shape in one of two ways: they either 'measure' it, that is count the occurrences of patterns within the data set; or build combinatorial representations of the data set. As an example of the former, we will look at persistent homology, whereas the latter will be represented by mapper. The topics covered include: basic notions from topology, simplicial complexes (Cech complexes, Vietoris-Rips complexes, etc.), homology, persistent homology and applications, mapper.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: MATH223

MATH252 Differential Forms
This class will be an introduction to differential forms, a central tool in modern topology, geometry, and physics. The course begins where MATH222 ends, with Green's theorem, the divergence theorem, and Stokes' theorem. All of these theorems are special cases of one theorem, known as the general Stokes' theorem, about integration of differential forms. The objective of the first part of the course will be to understand and prove this theorem. We will then discuss manifolds and what can be learned about them using differential forms, concentrating on de Rham cohomology.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: (MATH221 AND MATH222) OR (MATH222 AND MATH223)

MATH225 Advanced Topics in Real Analysis
Topics to be addressed include convergence of sequences and series of functions, spaces of functions and their topologies, the Lebesgue integral (on the line) and its basic convergence theorems, and Fourier series.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: MATH225

MATH261 Introduction to Abstract Algebra
This course is an introduction to abstract principles based on the special properties of the integers, rational, real and complex numbers. The course will cover general algebraic structures as well as their quotients and homomorphisms, with emphasis on fundamental results about groups and rings.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MATH
Prereq: MATH228

MATH264 Algebraic Geometry
This course is an introduction to algebraic geometry, the study of the geometric structure of solutions to systems of polynomial equations. These may take the
form of lines, circles, parabolas, ellipses, hyperbolas, elliptic curves, leminiscates or Cassini ovals. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: MATH261

MATH271 Error-Correcting Codes
Nowadays messages are sent electronically through different kinds of communication channels. Most of these channels are not perfect and errors are created during the transmission. The object of an error-correcting code is to encode the data so that the message can be recovered if not too many errors have occurred. The goal of this course is to introduce the basic mathematical ideas behind the design of error-correcting codes. It makes use of algebraic techniques involving vector spaces, finite fields, and polynomial rings. These techniques will be developed in this course so that prior knowledge is not necessary. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: MATH221 OR MATH223

MATH272 Elementary Number Theory
This is a course in the elements of the theory of numbers. Topics covered include divisibility, congruences, quadratic reciprocity, Diophantine equations, and a brief introduction to algebraic numbers. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: MATH228

MATH273 Combinatorics
This course will present a broad, comprehensive survey of combinatorics. Topics may include partitions, the topic of inclusion-exclusion, generating functions, recurrence relations, partially ordered sets, trees, graphs, and minimax theorems. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: MATH228

MATH274 Graph Theory
A graph is a set V of elements called vertices and a set E of pairs of elements of V called edges. From this simple definition, many elegant models have been developed. Indeed, graph theory is essential to applications of computer science to network analysis and planar mapping. 

This course will be an introduction to graph theory and its applications. 

Offering: Host  
Grading: A-F  
Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: MATH228

MATH283 Differential Geometry
This course is an introduction to the classical differential geometry of curves and surfaces in Euclidean 3-space. Topics from global differential geometry and extensions to higher dimensions will be considered as time and the background of the students permit. 

Offering: Host  
Grading: A-F 

Credits: 1.00  
Gen Ed Area: NSM-MATH  
Prereq: (MATH222 AND MATH221) OR (MATH222 AND MATH223)

MATH284 Euclidean and Non-Euclidean Geometry
Euclid developed an axiomatic system to describe plane geometry in 300 BC. This system is fundamental to our understanding of mathematics today. In this course, we will compare and contrast plane geometry and its axiomatic system with several beautiful geometries, including spherical, elliptical and hyperbolic geometries, and their applications.

MATH509 Model Theory
This course will emphasize model theoretic algebra. We will consider the model theory of fields, including algebraically closed, real-closed, and $p$-adically closed fields; algebraically closed valued fields; and also general questions of definability in fields. As time permits, we will consider more recent applications of model theory in number theory and arithmetic geometry. Ideally, the student should understand what it means to be first-order definable and should have the equivalent of a year’s study of abstract algebra. To study various applications, it
will be necessary to assume certain results from the areas of application—that is, without proving them ab initio.

and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

**MDST125F Love, Sex, and Marriage in Renaissance Europe (FYS)**

This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about “homosexual” love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

**MDST128 Rome After Rome: Culture and Empire of Constantine**

Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capital to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.
In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (https://arcg.is/0e4Lb4). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

MDST131 Introduction to Western Art I: Ancient to Medieval
This course introduces the art and architecture of the Western world during the ancient and medieval periods. The artistic traditions of the Near East, Europe, and the wider Mediterranean will be surveyed from the prehistoric era to ca. 1400 CE. Questions of style, content, function, and cultural and historical context will be examined alongside such perennial concerns as religion, rulership, social class, luxury, and the definition of art within its ancient and medieval milieus.

MDST151 European Architecture and Urbanism to 1750
This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society’s identity? What is the relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

MDST203 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God’s gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

MDST204 Medieval Europe
This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity, its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the modern world, including the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

MDST207 Chaucer and His World
In this course, we will read Chaucer’s fascinating dream-visions, THE BOOK OF THE DUCHESS and THE HOUSE OF FAME and his best-known work, THE CANTERBURY TALES. We will also read selections from Chaucer’s sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer’s poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer’s reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

MDST209 Mosque and Cathedral: Islam and the West, c. 600-1500
This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaics, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.

MDST210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

MDST211 Magic, Witchcraft, and Miracle, from Saints to Salem
Until the “disenchantment of the world” in the 18th and 19th centuries, Europeans lived in a universe shot through with hidden and awesome power. God’s action in the world was possible, but puzzlingly he often operated through other agents, through the saints and by miracle. On the other hand, humans were often tempted to appeal to other powers to get what they wanted, and the use of magic, some pagan in origin, some not, was a pervasive influence. The world was full of demons and even devils, who used illusion and magic to entrap people by possessing them or turning them toward witchcraft in exchange for wealth and health. Surprisingly, the occult was not all bad, and Catholics and later Protestants too wrestled with the question of what to accept and what to suppress. Magical forces did not fade with the Renaissance but actually grew later. Magical forces did not fade with the Renaissance but actually grew alongside the first developments toward modern natural science in the 16th and 17th centuries. The necromancer joined the saint, the priest, and the witch as the faces of occult power. This course will take a broad look at the people and powers that filled the place where science and a lot of religion sit today.

The course will survey medieval developments and will end in New England in the 17th century. The instructor will provide background and narrative history in order to place the readings into their appropriate context. In surveying the long history of magic and miracle in Europe, we shall ask such questions as: What exactly do these terms mean and how have the meanings changed? How far away from such a worldview are we today and did magic really end in the 17th century? And, if so, why? Who controlled the use of magic and how was its misuse identified and punished? Were the processes of law, inquisition, and prosecution fair or effective? Were there really witches or just witch hunts? Why did people believe in miracles and magic? Who were the practitioners? Why did it all decline?

MDST213 Cross, Book, Bone: Early Medieval Art, ca. 300-1100
This course surveys the art and architecture of early medieval Europe, beginning with the multicultural world of Late Antiquity, the decline of the Roman Empire, and the spread of Christianity, and then continuing through the glory of Byzantium, the rise of Islam, and the development of Germanic kingdoms in Northern Europe. Style, content, function, and historical context shall be examined across monuments of architecture, sculpture, mosaic, manuscripts, painting, and the luxury arts. Questions of religious practice, political messaging, and cross-cultural translation shall be threaded throughout, for example: Could one picture God? How might divinity be conceptualized and accessed? How might one best picture a ruler? How did early medieval Europe define both art and the figure of the artist? How might we see dialogue, overlap, and/or competition between the art and architecture of Islam and Christianity, among other religious traditions? The art historical periods considered will include Late Antiquity, Byzantine, Umayyad, Abbasid, Migration, Insular, Carolingian, Mozarabic, Byzantine, Ottonian, and Viking art.

MDST214 Introduction to the New Testament
The purpose of this course is to provide an introduction to writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, one of the chief aims of the course being the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

MDST215 Politics and Piety in Early Christianities
The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

MDST216 What is Sicily?
Language is frequently thought of as the accompaniment of empire. How, then, does one study a poetry without an imperium? This course examines Sicilian culture as a phenomenon which developed under the rule of many empires (Greek, Byzantine, Arab, Norman, French, Spanish) whilst never itself an empire. Birthplace of the sonnet and crossroads of a plurality of cultures, the Sicilian language remains a literary language to this day. What does it mean to write in Sicilian? At the margins of history, empire, and continent, this course examines the growth and transformation of a colonized island from antiquity to the present through its literatures.

MDST219 Northern Renaissance Art
The Northern Renaissance, roughly c. 1400-1600, was a period of thrilling transition in Europe and profound change for the Western tradition of art and architecture. For art history, the period’s many paradigm shifts include the rise of oil painting, the spread of the printing press and print media, the growth of middle-class patronage, the Protestant Reformation, radical developments in the practice of portraiture, an increasingly global worldview and mentality, the foundations of what might be referred to as an art market, and a fundamental revision of the purpose and definition of both art and the artist. This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England. We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourg brothers, van Eyck, van der Weyden, Memling, Fouquet, Riemenschneider, Dürer, Grünewald, Altdorfer, Cranach, Bosch, Holbein, and Bruegel - such a narrative will be equally enriched with less familiar and less canonical works. Threaded throughout are questions of mimesis, realism, skill, medium, and the growing cult of genius, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe.

MDST220 Love and Loss in Medieval and Early Modern French Literature and Culture
The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.

MDST221 Mystical Visions, Medieval Women, and the Performance of Early Music
This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MDST222 Early Renaissance Art and Architecture in Italy
This course surveys key monographs of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

MDST223 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance
In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics
of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarcha, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

MDST226 The Cosmos of Dante’s "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante’s masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante’s encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi’s description of the horror of Nazi concentration camps, or in Amiri Baraka’s fragmentary representation of America’s infernal racist system. We investigate the challenges that Dante’s text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul’s relation to the divine; Dante’s concepts of governance and universal peace; mythology and theology in Dante’s Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante’s work from the 14th century to the present. The course combines a close analysis of Dante’s inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

MDST227 What Can the Middle Ages Teach Us About Nature?
Today nature is at the center of our preoccupations. This course will go back to a time before human beings thought they were the masters of nature, when nature was at the same time teaching and allegory, metaphor and science. We will explore the different functions of nature in bestiaries, poems, romances, and herbaria from the Middle Ages to the beginning of the Early-Modern period (in modern French translation). We will be able to see a real herbarium in the Special Collections & Archives. Students will also visit the Davison Center for the Arts and the Joe Webb Peoples Museum to explore visual representations of nature as well as scientific displays. During the semester, students will put together a herbarium that will be displayed in an exhibition at the end of the semester.

MDST228 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History
This course is designed to develop students’ ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic EL CID (12th–13th century); the bawdy and highly theatrical prose dialogue known as LA CELESTINA (1499); the anonymous LAZARILLO (1554), the first picaresque novel; and María de Zayas’s proto-feminist novella THE WAGES OF VICE (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

MDST229 Fight like the French: Debates, Quarrels and Polemics in French Culture
In the age of "fake news" and polarization, knowing how to debate is essential. The French are notoriously practiced in debate; the importance of public opinion and the figure of the public intellectual have made French society as a whole particularly prone to the agonistic discussion of ideas. This course will survey foundational aesthetic and political debates in French culture from the 15th century to this day, focusing on those that were led by writers, philosophers, and intellectuals and that have entered French literary and cultural history. The course will show how controversies mark and make paradigmatic changes in the cultural landscape, advancing the arts and sciences and voicing political dissent. Throughout the course we will read literary works, treatises, letters, and newspapers.

MDST231 Cuneiform to Kindle: Fragments of a Material History of Literature

This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

MDST232 Obscure Enigma of Desire

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

MDST236 Don Quixote: How to Read the Ultimate Novel

No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

MDST237 Dante in His World: Politics, Poetry, Religion
Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante’s own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

MDST238 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

MDST241 Revolutionary Lives: How a Life Becomes Political Power, Middle Ages to Modernity
Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, beggars, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

MDST245 The Invention of Fiction: Giovanni Boccaccio’s Decameron
In this course we read and discuss Giovanni Boccaccio’s Decameron (ca. 1353), a collection of 100 short stories traded by an “honest brigade” of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio inhabited. We examine the Decameron’s tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio’s tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book’s adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio’s remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

MDST247 Devotion and Deception: Erotic Discourse from Dante to Petrarch
In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarch. Through a close reading of such texts as Dante’s Vita nova (ca. 1295), Giovanni Boccaccio’s Decameron (ca. 1353), and Petrarch’s Rerum vulgarium fragmenta (often referred to as the poetry book par excellence: il canzoniere, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate ‘love stories’ in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

MDST254 Cervantes
Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes’ art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political,
For those staying closer to home, like clerics and other literate “Italians,” we track seafarers as they encounter the Other during their maritime voyages. We consider the development of visions to the institutional politics of the Church. We examine various aspects of medieval religious culture ranging from mystical Alighieri, and through a variety of other workers in the Italian economy. We review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

MDST255 The Vikings and the Viking Age, 700-1243
The Vikings erupted from their isolated northern homelands throughout Europe from the eighth century, and arguably reoriented European history both in the West, where they were instrumental in the history of the British Isles and France, as well as the East, where they were founders of the Russian kingdom. By 1100, they and their descendants had also established themselves in the Mediterranean, Italy, Sicily, and the Holy Land. This course will examine the reasons the Vikings emerged, and will explain their role not only as warriors, but as important merchants, administrators, and contributors to a robust European literary culture. They provide the perfect avenue by which to understand the creation of European culture and politics. The course will also act as an introduction to the dark age history of England, France, and Northern Europe.

MDST257 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture
The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

MDST258 Medieval Gigs: Saints, Scholars, Sailors, Sinners
A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages. For those staying closer to home, like clerics and other literate “Italians,” we...
as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

**MDST302 The Arthurian Legend on Film**

This course will serve both as an introduction to the Arthurian legend and to its cinematic representation since the 1940s. Medieval texts will be paired with films that are “based” -- more or less closely -- on them. We will consider the ways in which these stories are told in literature and in film and the differences between them. We will also consider the ways in which the legend was used to address both medieval and modern preoccupations.

**MDST310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia**

For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as “convivencia.” While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why “convivencia” ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

**MDST311 The Body in Medieval Art**

Medieval thinkers theorized the body in ways vastly different from how human bodies are conceptualized and defined today in the twenty-first-century West. Indeed, the “medieval body” was not at all a stable or monolithic entity, but rather a shifting constellation of ideas and practices that waxed, waned, and coexisted throughout the European Middle Ages, c. 400-1400. The diversity of medieval attitudes toward the body helped inform its representation in art, which, simultaneously, was also dependent upon conventions of craft, medium, artistry, preciousness, and style. "Body" signals not only earthly bodies--sexed, fleshly, corruptible, and soon to decay--but also the soul (equally fragile), as well as heavenly, angelic, and divine bodies, including that of Christ. This course analyzes medieval strategies of representing these bodies while situating them in their respective intellectual and cultural environments. Primary-source materials will be contextualized by secondary literature, and our inquiries will remain cognizant of gender-, sexuality-, race-, and performance-critical methods. The bodies examined will include, and are not limited to, saintly, gendered, racialized, clerical, monstrous, virginal, heretical, sickly, healthy, courtly, resurrected, and uncircumscribable bodies.

**MDST313 Medieval Manuscripts**

Medieval manuscripts were dense, considered gatherings of text and image, and they are among the richest of artifacts bequeathed to us by the Middle Ages. Manuscripts both crystallized and intervened in many of the key intellectual, religious, and aesthetic foundations of medieval Europe. To step into a luxurious medieval manuscript--into its script, its miniatures, its marginal decoration, its scribbles, its little monsters and unexpected grotesques, its tears and signs of use--is to probe definitions of painted image and written word that differ markedly from our own today. Throughout, basic questions of the relationship between text and image, and the linguistic and the pictorial, repeatedly beg attention. How were these books made, who used them (if they were used at all), how did the reading process unfold in the medieval period, and how did pictorial decoration assist in revealing--or, perhaps, obscuring--truth? These questions, and more, will inform this seminar’s systematic inquiry of the making, function, and layout of the medieval book, from its Late Antique origins to the 15th-century advent of printing.

**MDST315 The Politics of the French Language and the Birth of the French State**

Today, the advantages of national borders and monolingual language policies are being trumpeted all across the world. And yet, the study of premodern languages and literatures reveals that the history of national languages has always been a multicultural affair. In this course, we will look at the case of the French language, particularly the establishment of French as a literary language through strategies of legitimation. Starting with an examination of the first text written in the language that would later become French, from the 9th century, we will then go on to study (in modern French) a series of medieval and early-modern poems, plays, treatises and essays that borrow from other languages and literatures, even as they establish French as a literary and a national language. The final portion of this class will include a meditation on the
status of French language in contemporary Francophone countries based on Derrida’s essay “Le monolinguisme de l’autre.”

MDST321 Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philine) and wisdom (Sophia). “The Dialogues of Love” (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers’ courtship.

MDST350 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena
Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena—a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire—to finally break into this most gendered of genres? And, how has Anna Komnena’s accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with “The Alexiad” through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

MDST353 Race, Ethnicity, and Religion in Medieval Literature
Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question by considering the emergence of medieval ideas of race, ethnicity, and religious difference. We will also think through the meaning of these categories in medieval studies. Our focus will be on a selection of texts dealing with encounters—real and imaginary—of Western European Christians with cultures from the Mongol Empire to the Jewish communities in their own territories. The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts, and romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasy.

MDST360 The Mediterranean Archipelago: Literary and Cultural Representations
"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands—both fictional and real—as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Mavcevjevitc’s statement that “the Mediterranean is not only geography,” we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto’s Island of Alcina to Goethe’s Capri), narrative stratagem (from Homer’s Phaeacia to Boccaccio’s Rhodes), literary protagonist (from Deledda’s Sardinia to Murgia’s Sardinia), political concept (from Plato’s Atlantis to Campanella’s Tapprobane), and existential condition (from Cervantes’s Cyprus to Cavafy’s Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands’ inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

MDST363 (Un)Popular Performances/Performances (Im)Popolaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular “study abroad destination” for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastoral plays, and farces. Although these performances were often met with hostility from the city’s religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 “season” are preserved in his personal papers in the National Library of Scotland.
This course will use Drummond’s notes as a guide to discover and examine other forms of evidence—both traditional and nontraditional—that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

MDST373 From Courtly Love to Cannibalism: Medieval Romances
Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist switches genders, skin color changes with religion, and a dog might be the hero of a narrative. In this course, we will begin with texts that date from the Romance’s origins in 12th-century France and continue with the form’s development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur’s court. Some of the topics we will consider are Romance’s engagement with “chivalry,” the religious and racial conflicts of the Crusades, and of course, Christian mysticism and the Holy Grail.

MDST376 Travel and Communication in Europe
This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

MDST378 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage
This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel.

Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

Molecular Biology and Biochemistry (MB&B) 

M8&B101F The Personal Genomics Revolution (FYS) 
The first draft of the human genome sequence was published approximately 15 years ago, having taken more than a decade to complete at a cost of approximately three billion dollars. With incredible advances in sequencing technology, accompanying analysis tools, and maturation of sequence databases, we have arrived at the beginning of an era of “personal genomics.” Today, individuals can have their genomes sequenced in a few hours for a few hundred dollars! This course explores the kinds of information contained within one’s genome and the various ways in which genome sequences can be used for improving quality of life. Students will conduct original research to explore societal attitudes about the use of personal genomics for the purpose of making lifestyle choices (dating, diet, vocations, etc.); establishing notions of personal identity (race, gender, nationality, etc.); creating new social networks (based on genetic kinship); or prolonging life span (and revolutionizing medicine). As part of this research, students will also consider ethical issues (e.g., privacy, discrimination) surrounding the use of personal genomics, as well as how education might impact societal attitudes on particular applications of this technology. As this is an FYS course, student work will focus on developing skills in scholarly writing, which will include peer evaluations of other student writing and production of a final scholarly paper based on the results of their research project.

M8&B103 Copernicus, Darwin, and the Human Genome Project 
Much of art and philosophy is inspired by the question: What does it mean to be human? The project of science has provided rational explanations of human identity that threaten our self-perception as special beings—beginning with the Copernican revolution and discoveries about our unspecial place in the universe. In this course, we will discuss three paradigms arising from modern molecular biology that provide perspective on the lines between living and non-living, human and non-human life, and human and machine by exploring the science of DNA, evolution, and the Human Genome Project, respectively. As part of both discussions, we will consider how society negotiates with science, as depicted in politics and popular art, ethical issues pertaining to the advancement of scientific (e.g., reproductive, genetic) technologies, and plausible resolutions to the tension between science and society that arise from a detailed understanding of the scientific method. Little or no background knowledge in science/biology will be assumed.

MB&B108 Discutamos la ciencia en Español (Lets discuss science in Spanish)
This introductory course is designed for students with intermediate to advanced knowledge of the Spanish language. The class focus is to help students understand basic scientific concepts in Spanish and discuss scientific literature of general interest in Spanish. The goal is to develop language skills (reading, listening, writing, and speaking) with focus on scientific topics.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: None

MB&B108Z Discutamos la ciencia en Español (Lets discuss science in Spanish)
This introductory course is designed for students with intermediate to advanced knowledge of the Spanish language. The class focus is to help students understand basic scientific concepts in Spanish and discuss scientific literature of general interest in Spanish. The goal is to develop language skills (reading, listening, writing, and speaking) with focus on scientific topics.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: None

MB&B111 Introduction to Environmental Toxicology
This course will look at the true nature of the microbiome, with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual’s health. This course will look at the true nature of the microbiome,

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: None

MB&B117 Life in the Cell from a Molecule’s Perspective
What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor “walks,” how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PHYS
Identical With: PHYS1107
Prereq: None

MB&B119 Biology and Chemistry in the Modern World: A Survey of Drugs and Disease
This course will cover a wide range of topics of current interest that are at the intersection of biology and chemistry. In particular, the molecular basis of issues related to drugs and disease will form a focus of the course. Topics to be discussed will include psychoactive and performance-enhancing drugs, mad cow, cancer, viral and bacterial diseases, and the chemistry of foods.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-CHEM
Identical With: CHEM119
Prereq: None

MB&B130Z Discovering a Small World Nanobots, Nanomedicine, and Nanomaterials
How can nano-sized salt and sugar help make food healthier? How can your ipod or Laptop get any smaller? Why does sunscreen contain titanium oxide nanoparticles? How small is “nano”? Through discussions on science fiction novels and learning of scientific principles, this course will explore how nano-sized objects are studied and used to advance the fields of medicine, electronics and biomaterials. This general education course is designed for non-science undergraduate majors where students will explore what we may not know about our world, our community, our friends and ourselves. This course is meant to teach students how to critically interpret science in popular media and news sources.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-CHEM
Identical With: CHEM130Z
Prereq: None

MB&B155 Tiny Organisms with a Big Effect: The Microbiome
With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multacellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual’s health. This course will look at the true nature of the microbiome,
to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-BIOL
Identical With: BIOL155
Prereq: None

MB&B160 Biochemical and Molecular Basis of Human Diseases
This general education course will cover the biochemical, molecular, genetic, and cellular aspects of selected human diseases. The basic anatomy of each relevant system will also be covered, along with ethical questions that can arise when addressing each condition. Topics will include sickle cell anemia, diabetes, atherosclerosis, and prion diseases.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: None

MB&B181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication, chromosome dynamics, transcription, translation, and gene regulation. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including transport across cell membranes, cellular energetics, protein sorting, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology. This course will require about 10 hours per week of engagement.

Students should enroll separately in MB&B/BIOL191 Principles of Biology I - Laboratory.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL181
Prereq: None

MB&B181Z Principles of Biology I: Cell Biology and Molecular Basis of Heredity
This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of genetics and gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication and repair, chromosome dynamics, RNA transcription, protein translation, gene regulation, and genomics. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including cell signaling, energetics, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology.

Gen Ed Area: NSM-BIOL

Identical With: BIOL181Z
Prereq: None

MB&B182 Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

Offering: Crosslisting
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-BIOL
Identical With: BIOL182
Prereq: MB&B181 OR MB&B181Z

MB&B182Z Principles of Biology II
This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. MB&B191 Principles of Biology I--Laboratory
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.

Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-MBB
Identical With: BIOL191
Prereq: None

MB&B192 Principles of Biology II: Laboratory
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. A specific emphasis will be placed on science communication.
Offering: Crosslisting
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-BIOL
Identical With: BIOL192
Prereq: [MB&B191 or BIOL191]

MB&B193 Principles of Biology I Laboratory (Online)
This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: NSM-MBB
Identical With: BIOL193, NS&B193
Prereq: None

MB&B194 Principles of Biology II: Advanced Topics
This course provides an optional supplement to the introductory course in physiology, development, evolution, and ecology (BIOL182, which should be taken concurrently). It is designed for highly motivated biology students who seek to enrich their understanding by engaging with current research in an intensive seminar setting. Students in BIOL194 will read and discuss recent journal articles that probe in greater depth some of the subjects covered in BIOL182. Weekly meetings will consist of a short lecture by the professor followed by group discussion of the readings.
Offering: Crosslisting
Grading: Cr/U
Credits: 0.25
Gen Ed Area: NSM-BIOL
Identical With: BIOL194
Prereq: BIOL181 or MB&B181

MB&B198 Principles of Biology II Laboratory __ Online
This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophoresis, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.
Offering: Crosslisting
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Identical With: BIOL198, NS&B198
Prereq: BIOL192

MB&B207 Introduction to Biophysics
This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PHYS
Identical With: PHYS207
Prereq: PHYS116

MB&B208 Molecular Biology
This course is a comprehensive survey of the molecules and molecular mechanisms underlying biological processes. It will focus on the cornerstone biological processes of genome replication, gene expression, and protein function. The major macromolecules—DNA, RNA, and proteins—will be analyzed to emphasize the principles that define their structure and function. We will also consider how these components interact in larger networks within cells to permit processing of external and internal information during development and how these processes become perturbed in disease states.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL208
Prereq: MB&B181 AND MB&B182

MB&B209 Research Frontiers in Molecular Biology and Biochemistry
This course of weekly discussions of current research is for students who have completed the MB&B or BIOL introductory series. Discussions will be informal in nature and cover topics of current interest in molecular biology and biochemistry, emphasizing possibilities for future research areas for the students.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-MBB
Prereq: [(MB&B181 or BIOL181) AND (BIOL182 or MB&B182)]

MB&B210 Genomics: Modern Genetics, Bioinformatics, and the Human Genome Project
Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-BIOL
Prereq: MB&B181 OR BIOL181 OR BIOL181Z
Identical With: BIOL210

MB&B212 Principles and Mechanisms of Cell Biology
The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-MBB
Prereq: [(MB&B181 or BIOL181) AND (BIOL182 or MB&B182)]

MB&B212 Principles and Mechanisms of Cell Biology
The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.
structure, organelle function, cell adhesion and motility, signal transduction and cell differentiation, cell survival and apoptosis, and consider how these mechanisms integrate to generate coherent cell behaviors. Published research will be discussed throughout the course in order to build students' understanding of research in cell biology. Lectures, assignments and assessments include opportunities for students to develop a broad and deep knowledge of cell biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL212
Prereq: [MB&B181 or BIOL181]

MB&B223 The Molecular Basis of Cancer
Cancer is a group of diseases characterized by unregulated cell growth and tissue invasion. This course will focus on the molecular events that lead to cancer. We will cover topics in both molecular and cellular biology and genetics that are relevant to understanding the differences between normal and cancer cells. Particular focus will be placed on oncogenes and tumor suppressor genes, DNA damage responses, the p53 signaling pathway, cell cycle regulation, and the molecular basis of cancer therapies. This course will utilize both the textbook and primary scientific literature in the study of cancer.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Identical With: BIOL223
Prereq: MB&B181

MB&B228 Introductory Medical Biochemistry
This introductory course will focus on the essential concepts of biochemistry important to students interested in the health professions, including the chemical and biological foundations of cellular metabolism and related disease states. Major topics will include the structure and function of biological molecules in the human body (proteins, carbohydrates, fats, nucleic acids, vitamins), enzyme catalysis, cellular signaling, and digestion, absorption, and processing of nutrients for energy and growth.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL228
Prereq: [MB&B181 or BIOL181] AND CHEM251

MB&B231 Microbiology
This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field. Enrollment in the separate Microbiology Laboratory MB&B 235 is strongly encouraged but is not required.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL231
Prereq: [MB&B181 or BIOL181] OR [MB&B208 or BIOL208]

MB&B232 Microbiology Laboratory
This laboratory, to be taken concurrently with MB&B231, is an essential part of learning microbiology. Techniques in general and specific areas of microbiology including recombinant DNA procedures involving microorganisms will be taught.

Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: NSM-MBB
Prereq: None

MB&B233 Cellular Mechanisms of Gene Regulation and Gene Editing Tools
This course will explain the mechanisms of gene expression in eukaryotes. Then we will define the main and current techniques used for gene editing (CRISPR/Cas9, TALEN, site director mutagenesis, CRE/Lox recombination). Discussions will include how these technologies can be used to optimize organisms for health, food, and energy applications. Ethical use and current regulations of gene editing tools will also be considered.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: MB&B181

MB&B235 Microbiology Laboratory
This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field. Enrollment in the separate Microbiology Laboratory MB&B 235 is strongly encouraged but is not required.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: BIOL237
Prereq: [MB&B208 or BIOL208]

MB&B241 Informal Science Education for Elementary School Students I
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary age children in an afterschool program taking place at five local elementary schools. The classroom components include writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class.

Offering: Crosslisting
Grading: BMS
Credits: 1.00
Gen Ed Area: None
Identical With: CHEM241
Prereq: None

MB&B243 Signal Transduction
Cells contain elaborate systems for sensing their environment and for communicating with neighbors across the membrane barrier. This class will explore molecular aspects of signal transduction in prokaryotic and eukaryotic cells. Topics will include membrane receptors, GPCRs, kinases, phosphorylation, ubiquitination, calcium signaling, nuclear receptors, quorum sensing, and human sensory systems. We will integrate biochemical functional approaches with structural and biophysical techniques.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Prereq: NSM-MBB
MB&B242 Informal Science Education for Elementary School Students II
This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary age children in an afterschool program setting at five local elementary schools. The classroom component includes writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class. This course is a continuation of CHEM241.
Offering: Crosslisting
Grading: Cr/U
Credits: 1.00
Gen Ed Area: NSM-CHEM
Identical With: CHEM242
Prereq: None

MB&B265 Bioinformatics Programming
This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.
Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-BIOL
Identical With: BIOL265, COMP113, CIS265
Prereq: [MB&B181 or BIOL181]

MB&B266 Bioinformatics
This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.
Offering: Crosslisting
Grading: A-F
Credits: 0.50
Gen Ed Area: NSM-BIOL
Identical With: BIOL266, COMP266, CIS266
Prereq: [MB&B181 or BIOL181]

MB&B285 Molecular Biology Journal Club I
This course involves presentation and discussion of recent literature in the field of molecular and cellular biology.
Offering: Crosslisting
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Identical With: MB&B585
Prereq: None

MB&B286 Molecular Biology Journal Club II
This course includes the presentation and discussion of recent findings in the field of molecular and cellular biology.
Offering: Crosslisting
Grading: OPT

MB&B290 Molecular Biophysics Journal Club I
This course includes presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from journals including but not limited to the Biophysical Journal, Biopolymers, Current Opinion in Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.
Offering: Crosslisting
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-CHEM
Identical With: MB&B507, CHEM507, CHEM307, PHYS317, PHYS517
Prereq: None

MB&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: NS&B303, MB&B523
Prereq: [CHEM251 AND CHEM252 AND (MB&B208 or BIOL208)]

MB&B306 Epigenetics
Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.
Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-MBB
Identical With: MB&B506

MB&B309 Molecular and Cellular Biophysics
This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.
Offering: Host
Grading: A-F

MB&B310 Mechanisms of Protein Trafficking Within Eukaryotes
This course surveys the mechanisms of protein trafficking and sorting within eukaryotic cells with an emphasis on the major protein exocytosis pathway.
Offering: Crosslisting
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Identical With: MB&B510
Prereq: [MB&B208 or BIOL208] OR [BIOL212 or MB&B212]

MB&B311 Genomics Analysis
This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.

Prereq: [MB&B181 or BIOL181]

MB&B313 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function
This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.

Grading: A-F
Credits: 0.50
Gen Ed Area: NSM-MBB
Identical With: MB&B513
Prereq: None

MB&B315 The Regulation of Ribosome Biosynthesis
This course will focus on understanding one of life's original, and still greatest, feats: namely, how cells make proteins. Since early life forms evolved ribosomes several billion years ago, their synthesis, regulation, function, and evolution have been at the core of all aspects of biology.

This act of protein translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, involving the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course, we will investigate the biosynthetic pathways that are involved in effecting protein synthesis from various approaches. Both prokaryotic and eukaryotic systems will be considered, including the questions of how ribosome biosynthesis and activity is relevant to genetic diseases, cancer, cell growth, and antibiotic activity.

Prereq: [MB&B208 or BIOL208]

MB&B316 Advanced Topics in Structural Biology
This course will examine how researchers use the tools of structure determination to explore current fundamental questions in the biological sciences. Beginning with a short history of the field of structure biology, we will examine the benefits and limitations of various techniques used to study protein and DNA structure. We will read primary literary sources on a number
of contemporary topics for which structural biology has made important contributions. This may include (but is not limited to) microbial pathogenesis, immunology, gene regulation, membrane protein biology, neurological signaling, signal transduction, and metabolism. This course will explore how the study of structural biology contributes to our understanding and treatment of human diseases, including the development of drugs and other therapeutic interventions.

MB&B317 Advanced Topics in Recombinant DNA
The breaking and rejoining of DNA molecules is at the heart of so many cell biological processes, including adaptive immunity, the common emergence of new viral variants (such as the flu), the fundamental life cycle of other viruses (such as retroviruses), the prevention of aneuploidy in reproductive cells, the production of chromosomal rearrangements in cancer cells, and the repair of damaged DNA. Used as a tool by molecular biologists, recombinant DNA has led to tremendous insight into cell function, development, and disease. Recombinant DNA methodology is growing in its capacity to precisely change the genes carried by organisms, which has important implications for both the food industry and medicine. In this half-semester course, we will examine primary literature that touches on how recombination between DNA sequences is utilized within cells and as a research tool by humans to promote new genetic outcomes.

Credits: 0.50
Gen Ed Area: None
Identical With: MB&B522
Prereq: [MB&B208 or BIOL208] OR [BIOL212 or MB&B212]

MB&B325 Introduction to Biomolecular Structure
This course aims to provide a framework for understanding three-dimensional structures of proteins, nucleic acids, and their complexes. The first half of the course emphasizes structural modules and topological patterns in major classes of proteins and nucleic acids. The second part of the course covers novel structural motifs, such as helix-turn-helix, zinc-finger, and leucine zipper, that are responsible for recognition of specific nucleotide sequences in nucleic acids by proteins. Analysis of structures using tools available on the Web and independent exploration of protein and nucleic acid databases are strongly encouraged.

Prereq: None

MB&B330 Molecular and Cellular Basis of Human Diseases
This course will cover the molecular, genetic, cellular, and biochemical aspects of selected human ailments. Topics will include aging, atherosclerosis, osteoporosis, diabetes, obesity, and Alzheimer's disease.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Identical With: MB&B530
Prereq: [MB&B208 or BIOL208] OR [CHEM383 or MB&B383]

MB&B333 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Identical With: MB&B533, BIOL533, BIOL333
MB&B334 Stochastic Biology: Randomness and Order in Gene Regulation
While much of biology is discussed with assumptions of “determinism” (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and “homogeneity” (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stems cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

Identical With: MB&B534
Prereq: None

MB&B335 Protein Folding: From Misfolding to Disease
Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson’s disease, Alzheimer’s disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B340 Practical Methods in Biochemistry
This course centers on currently used techniques for protein separation, characterization, and purification, such as ultracentrifugation, gel electrophoresis, and chromatography. These topics will be introduced within the general context of the behavior of macromolecules in solution. The relative stability of proteins in different media, the forces stabilizing protein structure, and the interaction of proteins will be discussed. We will explicitly consider different techniques used to study proteins. Relatively novel techniques to be discussed include surface plasmon resonance, microarray methods and mass spectrometry, and single molecule microscopy. In the course, we will go through three or four different protein purification protocols and discuss the methods used in each one. We will also touch upon the commonly used spectroscopic techniques used to characterize proteins, including absorption, fluorescence, and circular dichroism. The course will focus on biochemical techniques and understanding the physical principles underlying these techniques and will also discuss tactics for optimizing established isolation and purification procedures and for isolating and characterizing an unknown protein.

The course content is appropriate for advanced undergraduates (juniors/seniors) and beginning graduate students from chemistry, biology, molecular biophysics or MB&B.

MB&B342 Molecules to Medicine
This course will explore the process of drug development, including target selection, lead discovery using computer-based methods and combinatorial chemistry/high-throughput screening, organic synthesis, bioavailability, clinical trials, and other factors (some economics and politics) involved in bringing a drug to the marketplace. Critical consideration of the variables to contend with at each step will be described and discussed, including aspects of research ethics and patent law. The basic science of molecular recognition, computer-aided drug design, and the role of factors from synthetic chemistry to toxicology will be presented. Case studies of the development of drugs recently successful in making the journey from molecule to medicine will be discussed, as well as the story of some that did not, and why. Emerging new design strategies such as fusion-protein therapies, crisper technology, and enhanced use of rational design and combinatorial methods will be emphasized, and how pharmaceutical research is evolving in the postgenomic era, particularly with biologics. Job opportunities in the pharmaceutical industry will be discussed.
NMR spectroscopy is a powerful tool in the field of molecular biology and biochemistry. It allows for the analysis of molecules ranging from a few atoms to tens of thousands. This technique is used to study the structures and interactions of biological molecules. The principles and applications of NMR spectroscopy will be covered in this course, providing an introduction to this essential technique.

**MB&B387 The Cell-Division Cycle and Cancer**

This course will explore a broad range of topics related to cell division and cancer. Students will learn how the cell cycle is regulated and how it is disrupted in cancer. The course covers fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy, applying these principles to understanding biological systems. Several major themes will be addressed, including the structure and function of key enzymes and regulatory proteins involved in cell division. The course integrates theoretical and practical aspects, with an emphasis on using current research techniques.

**MB&B383 Biochemistry**

This course focuses on the foundational principles of biochemistry, including the structure and function of biological macromolecules (proteins, lipids, and carbohydrates). Students will learn about enzymatic activity, the basis and measurement of enzymatic activity, and general mammalian and plant cellular metabolism. The course is designed to help students understand the molecular basis of life processes and to develop critical thinking skills in the context of biological systems.

**MB&B386 Biological Thermodynamics**

This course explores the thermodynamic principles that govern biological processes. Students will learn about the structure and function of macromolecules, energy transfer pathways, and the role of enzymes in catalysis. The course covers fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy, applying these principles to understanding biological systems. Several major themes will be addressed, including the structure and function of key enzymes and regulatory proteins involved in cell division. The course integrates theoretical and practical aspects, with an emphasis on using current research techniques.

**MB&B387 Enzyme Mechanisms**

This course focuses on the chemical mechanisms involved in the action of a series of typical enzymes. Students will learn about the structure and function of key enzymes and regulatory proteins involved in cell division. The course integrates theoretical and practical aspects, with an emphasis on using current research techniques.

**MB&B383 Advanced Genetics**

This course covers classical genetics, a discipline that grew from a desire to explain how adaptive traits are passed from generation to generation. Special emphasis will be placed on model organism genetics and understanding how classical genetic analysis, in conjunction with the analysis of cellular and chromosome behavior, led to key discoveries about the nature of the gene, DNA, RNA, proteins, and cellular function. The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

**MB&B384 Advanced Laboratory in Molecular Biology and Genetics**

This course is designed to familiarize students with current research techniques in molecular biology, biochemistry, and genetics. A variety of methods and approaches will be applied in a series of short projects, primarily using E. coli.
and Saccharomyces cerevisiae (budding yeast) as model systems. Students will gain hands-on experience employing recombinant DNA, microbiology, protein biochemistry, and other methods to answer basic research questions. This course provides excellent preparation for students planning to conduct independent research at the undergraduate level (MB&B401/402) and beyond.

**MB&B395 Structural Biology Laboratory**  
One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

**MB&B506 Epigenetics**

Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.

**MB&B509 Molecular and Cellular Biophysics**

This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

MB&B520 Topics in Nucleic Acid Structure
This course focuses on the principles of nucleic acid structure. The scope of this course is to go beyond the common DNA structures such as B-DNA and A-DNA helical structures. The course will concentrate on other DNA structural motifs such as branched DNA, supercoiled DNA, triple DNA, and quadruplex DNA. Physical characterization of these structures as well as the functional implication of these structures (in terms of DNA replication, transcription, telomeres, etc.) will be discussed extensively. Discussion will also center on the forces that stabilize these structures, such as H-bonding and stacking interactions. The course will also cover other important DNA structural motifs such as curved or bent DNA as found in A-tracts and the relevance of these structures in promoter recognition and gene expression. Important RNA structures, such as ribozymes and pseudoknots, will be discussed. We will also discuss the significance of DNA structural motifs in eukaryotic genomes and the application of bioinformatic tools to search for these motifs.

MB&B523 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.
a population of cells all behaving synchronously in the same way), there is a gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a cell is instructed to express a transcription factor that activates a downstream phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stems cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B533 Gene Regulation
This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omic" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

MB&B581 Physical Chemistry for the Life Sciences
The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MUSIC (MUSC)

MUSC102 World Music
This course will map the world musically by introducing a range of sonic expressions from diverse geographic areas spanning Asia, Africa, Europe, and the Americas. Students will learn about regionally specific concepts of music and sound, types of performance, instruments, and vocal styles, the meanings music carries for its performers and listeners, and the ways in which it is produced and experienced. They will consider the significance of music in forming a sense of place and identity, and trace the journeys and transformations of local musical sounds in contemporary globalized societies. The course will broaden students' understanding of music as a worldwide phenomenon, raise their awareness of cultural processes constructed through music, and provide them with aural and analytical means to recognize and appreciate a wide variety of sonic repertoires and practices among the world's peoples.

MUSC103 Materials and Design
Materials and Design is an introduction to some of the elements of musical notation within the western European musical tradition. Its primary aim is to provide students with a vocabulary and set of tools with which they can describe their experience of music, broadly understood. Focused on music's formal construction and operation within a specific cultural practice, the course also encourages critical listening and thinking about the nature of musical "materials"--instruments, natural resources, and people--as well as how these materials are "designed"--notational practices, improvisation, the formation of canons, accessibility related to class, gender, sexuality, race, and place of origin. In the case of the latter, whereas the Fall and Spring versions of MUSC 103, this version of Materials and Design is expanded in terms of scope and the level of student engagement. In the case of the former, the summer terms will allow for greater and more individualized exploration, including independent and group listening assignments, improvisation exercises, discussion posts, and more.

MUSC106 A Thousand Years of Music History
This course will offer a history of European art music from the early Middle Ages to the present day. Featured composers will include Hildegard, Machaut, Strozzi, Bach, Handel, Mozart, Beethoven, Debussy, Stravinsky, Beach, and Cage. Students will relate course content to art, architecture, and literature of the periods, as well as to major economic and historical events. We will explore
the technical workings of music and together build a vocabulary for analyzing music and articulating a response to it; music will be interpreted as a cultural phenomenon. By the end of the semester, students should be equipped for a lifetime of informed listening.

MUSC108 History of Rock and R&B
This course will survey the history of rock and r&b (broadly defined as a conglomeration of loosely connected popular musical genres) from their origins in the 1940s and '50s through the early 1990s. Three parallel goals will be pursued: to become literate in the full range of their constituent traditions; to experience the workings of the music industry by producing group projects; and to become familiar with a variety of theoretical approaches to the music, confronting issues such as economics of the industry, race relations and identities, youth culture and its relationship to American popular culture, and popular music as a creative, cultural, and social force. For the midterm and final projects, the class will form a music industry in microcosm (musicians, journalists, producers, video and sound engineers, visual artists), resulting in audio and video releases and a magazine.

Prereq: None

MUSC110 Introduction to South Indian Music
This course will introduce students to one of the world's great musical traditions, one that has been part of Wesleyan's renowned World Music Program for more than 60 years. Students will learn beginning performance techniques in melody (raga) and rhythm (tala), the cornerstones of South Indian music. Through a listening component, they will also learn to identify important ragas (melodic modes) and talas (rhythms). Lectures will cover a wide range of topics, including Hindustani (classical) music, light classical music genres, folk music traditions, music in Bollywood film, and contemporary pop music. Readings and lectures will also provide the historical and cultural context for this rich and diverse musical world.

Learning Objectives:
- To gain familiarity with the diversity of forms of musical notation.
- To recognize the variable relationships between inspiration, transcription, performance, and recordings.
- To consider musical notation as a form of design, a language code, and a form of translation.

- To develop creative processes and understand the creative processes of others.

MUSC116F Visual Sounds: Exploring the Landscape and Architecture of Musical Notation (FYS)

This course examines a diverse range of musical works, seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the 9th century? How do 1600s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater.

One of the reason composers started to experiment with open scores in the 1950s and ‘60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students; no prior knowledge of musical notation or instrumental expertise is required.

MUSC117F Musicking Body (FYS)

"What is this thing called music?" asks Christopher Small in his book "Musicking" (1998) and observes, "Music is not a thing at all but an activity, something that people do." Taking a cue from Small's concept of "musicking" as an inherently social and physical process, this course will explore the role of the human body in the act of music performance and the creation of musical meaning. We will discuss interdisciplinary approaches to the study of music as embodied experience, drawing insight from fields as diverse as philosophy, feminist and performance studies, anthropology, ethnochoreology, and ethnomusicology. We will examine the modes, aesthetics, and cultural connotations of bodily expression, movement, and gesture in a variety of music traditions worldwide—from Sufi-shamanic rituals in Central Asia to Indian classical vocal music, and from drumming and martial arts in East Asia to African American popular genres. By engaging with a range of theoretical perspectives and case studies of embodied sounds, we will reflect on the corporeal, sensory aspects of music performance and perception, the tacit nature of learning and transmission, the intersections of human musicking with the environment and technology, and the ways in which the musicking body is entangled with the physical, social, spiritual, and political forces that shape our lives.

MUSC118F Bob Dylan and His World: Sources and Legacies (FYS)

Bob Dylan's songwriting, recordings, and performances in the 1960s are widely recognized as causing a seismic shift in American music and in the youth counterculture. He did not exist in a vacuum, though, and drew deep from the wells represented by songwriter Woody Guthrie, mountain ballad singer Jean Ritchie, and blues musician Robert Johnson, among many others. His meeting with the Beatles and subsequent world tour with the Band caused unforeseen reverberations, such as the Beatles moving into increasingly sophisticated lyrical territory and Aretha Franklin covering a song by the Band. Many artists covered Dylan songs early on (Stevie Wonder, Sam Cooke, the Byrds, and Sonny and Cher), and many credited Dylan with opening up new avenues of creative expression, including Joni Mitchell, who has been recognized as one of the most inspiring and accomplished singer-songwriters of any era. In this course we will explore (1) the sources of Dylan's art; (2) Dylan's albums, performances, and films throughout his career, with a primary focus on the 1960s; and (3) artists who have been touched by Dylan's legacy, including those outside of North America. We bypass hero worship in favor of understanding cultural and social currents that enable individuals like Dylan to blossom. In addition to collecting, interpreting, analyzing, and presenting evidence as part of written scholarly arguments, which will be stressed throughout the semester, either the midterm or final project may take the form of a creative work other than a paper.

MUSC119F Jazz in the 1960s (FYS)

The 1960s were a turbulent but stimulating time for the world of jazz. The R&B-based soul jazz movement was at its peak and often at odds with the still-developing avant-garde aesthetic. Certain other influences, such as those of Brazilian and African music, were becoming widespread in jazz for the first time. Older forms of jazz like bebop, big band music, and traditional jazz (aka "Dixieland") were struggling to remain viable and relevant. Rock music's surge in popularity was threatening the commercial solvency of jazz while acting as a musical and cultural force to which all jazz musicians had to react in some manner. Meanwhile much of this decade's jazz is inexorably linked to the political

Host
and social upheaval of the era, particularly those aspects relating to Black Americans’ sense of identity and struggles for equality.

In this course, we will broadly explore the various movements that made up the jazz of this decade. We will delve more deeply into the music of some of the most important figures in jazz during this time, such as Art Blakey, John Coltrane, Miles Davis, Ornette Coleman, Charles Mingus, Stan Getz, Rahsaan Roland Kirk, Jimmy Smith, Yusef Lateef, and Sun Ra. We will study musicians who typified a particular movement, those who assimilated several into a personal style, and those who moved freely among factions. All the while, we will be contextualizing the music within the social and political climate of the decade and the broader artistic and commercial landscape of music at the time.

MUSC120F Music, Place, and Culture: An Exploration of African American Soundscapes and Traditions (FYS)
This course will explore African American soundscapes and traditions through the lens of New Orleans, a cradle of jazz, brass bands, Mardi Gras celebrations, and more. From the historically significant grounds of Congo Square to the mean streets of the Calliope; from the moving voice of gospel singer Mahalia Jackson to the edgy flows of southern hip-hop artist Mystikal; from the sweet trumpet sounds of jazz pioneer Louis "Satchmo" Armstrong to the emphatic full body twerk of bounce artist Big Freedia; from the inspiring soulful sounds of Tank and the Bangas to the powerful sonic echoes of parading brass bands, New Orleans is a place where music and culture bubbles up from the streets and travels throughout the world.

New Orleans is also a place of perpetual marginalization stemming from systemic racist policies that often lead to life-threatening forms of policing and gentrification. These policies disproportionately affect the very African American communities that provide the world such rich, and sometimes healing, iconic sounds. New Orleans serves as an ideal place—bearing strong African American musical roots—to study the manner in which culturally invested people understand, negotiate, and produce space musically. Course participants will immerse themselves in the varied genres of African American music-making traditions through reading and writing assignments, in-class discussions, active music listening, video screenings, creative projects, and possible guest artist engagement. Music genres to be studied include jazz, gospel, soul, funk, blues, hip-hop, rap, zydeco, and bounce.

MUSC121 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo A.T.U. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:
Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxyemiron, ICEPEAK

MUSC122 Sample, Remix, Reuse, and Replay: Approaches to Musical Adaptation in Audiovisual Culture
Many of the music we listen to and encounter are palimpsests, collages, and assemblages. Texts are layered upon and juxtaposed against pre-existing texts, creating polyvocal dialogues and contrasting and complementary systems of meaning. This class introduces students to questions and controversies of adapted and remixed musical media in 20th and 21st century society, analyzing the ways music and other texts and materials (e.g., paintings, plays, places, novels, technologies, genres, historical events, preexisting music) are adapted through processes of revision, remix, remediation, sampling, restaging, and reinterpretation to create new layers of meaning. The course will consider the roles of film, television, video games, music video, digital audiovisual formats and technologies, and related audiovisual media. We will journey from the recycling of preexisting classical music in video games to the remediation and transmission of live operas to the movie theater screen in the MET Live in HD series, from compositions that translate the visuality of iconic paintings into sound to the practice of remix and sampling in hip hop culture, from the digital adaptation of operatic conventions in Final Fantasy VI to cover versions that complicate listeners’ expectations of gender performance, from the live performance of video game soundtracks by a symphony orchestra in Video Games Live and Pokémon: Symphonic Evolutions to the compilation mixtape scores of Hollywood films, and from Tan Dun’s Internet Symphony for the YouTube Orchestra to how the urban neighborhood of Washington Heights in New York City is repurposed, staged, and cast as a central character in In the Heights or how American political history is adapted and revitalized in Hamilton. Themes in the course include, among others, the changing roles and responsibilities of musicians in an age of digital globalization; the power of musical media and referential texts to structure human experience; and the role of the composer and listener as manipulators and interpreters of musical meaning across comparative audiovisual texts. This seminar draws on the classroom community’s interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can achieve success in this course without previous musical knowledge.

MUSC124F Mapping Culture (FYS)
What is a culture, how can it be intimately wrapped up in a location, and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom—“location, location, location” and “All politics is local”—tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location. From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City’s Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip-hop). Deploying a broad conception of culture, we will cover other art
forms (e.g., graffiti) and social formations. Haight Ashbury (San Francisco) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models as students embark on their own to map out a culture of their choice as their midterm and final projects, using Google maps, Story Maps, or some other interactive multimedia format. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

**MUSC127 C-Pop in the Shadow of a Rising China**

Explore the emotional aspect of a rising China and understand the inner feelings of contemporary Chinese youth through C-pop. How did "red songs" from the Cultural Revolution become popular songs in the 21st century? How did an "extremely soft and feminine" voice threaten the Chinese Communist Party? Why do songs from the "jazz capital of the Orient" trigger nostalgia? How do underground rock and punk bands negotiate their existence? How is rap in China different from that of the US or anywhere else? How do Chinese artists deal with LGBTQ issues and ethnic minority issues in popular music? Why do TV variety shows matter? What future is there for China's burgeoning "internet songs"? Popular music in a rising China presents complex issues of state-sponsored popular culture intersecting with bottom-up popular taste and desire, the repressive collective "we" intersecting with the resilient individual "I" in artistic expressions, the imagined "ancient China" intersecting with contemporary sound and technology, and the intensifying nationalistic sentiment intersecting with China's expanding global ambition. This course offers students opportunities to explore aesthetic, political, and cultural meanings expressed in China's popular music from the 1980s to the present. Chinese language knowledge is not necessary.

**MUSC128F Music and the Moving Image: From Music Video to Film to Digital Media (FYS)**

On August 1, 1981--the day that a cable TV channel playing music videos 24/7 made its debut--the inaugural video aired on MTV by the band The Buggles announced to viewers, "Video Killed the Radio Star." Since the launch of MTV, music videos have shaped popular culture, and their production, narrative, multimodal, and editing aesthetics have influenced other musical screen media, including film, commercials, television title sequences and end credits, film trailers, live concert films, video games, YouTube fan remixes and more. The development of digital new media technologies made the production technologies once only accessible to commercial record labels and production companies available to fans and consumers on their computers, cameras, and mobile media devices. This course explores the relationships between music and moving images (e.g. television, film, computer, video games, mobile media, digital media), and how the music video format has influenced modes of music making, performance, reception, and circulation. Music videos have shaped the aesthetic style of a wide range of screen media genres, serving as a form of branding popular music and artists, introducing experimental and avant-garde techniques to a mass audience, and facilitating participatory fan musicking. This course thinks deeply about several key issues concerning music and moving images (e.g. virtuality, identity politics, cross-cultural exchange, participatory musicking, fandom, virtuosity, adaptation, branding, liveness, nostalgia), examining how screen media with their visual and auditory content can be listened to and read as cultural texts.

Case studies in this seminar range from the history, genre expectations, and experimentalism of music videos to ethnographic filmmaking, from the visual album (Beyoncé’s LEMONADE) to fan produced video game music machinima, from the sound design of documentary film to the movie musical, from Hollywood compilation soundtracks to the pace, camera angles, and dance sequences of post-MTV Bollywood film, from 8-bit video game sound to the music pedagogy of children’s television programs (Sesame Street’s “Geometry of Circles” scored by Philip Glass), and from the use of pre-existing music in
television commercials (United Airlines' use of George Gershwin's Rhapsody in Blue, Michael Jackson's "Billie Jean/New Generation" for Pepsi), video games (ETERNAL SONATA, TETRIS), and mobile media apps (the Clapping Music app, the John Cage Prepared Piano app) to expressions of indigenous musical modernity (Tanya Tagaq's multimedia collaboration NANOOK, the Anishinabae singing mobile game app HONOUR WATER, the soundscapes of the Ifugao Alaskan Native video game NEVER ALONE).

**MUSC129 The Art of Listening**
Over the 20th century, the advent of electronic sound recording and transmission triggered rapid changes in all forms of auditory culture. We will examine this evolution through the different approaches to listening that emerge with the concepts of soundscape, sound object, sound art, and sound design. We will give particular attention to the artists and composers who explicitly shaped these concepts through their work. This includes figures such as writer William S. Burroughs, composer John Cage, singer Bing Crosby, pianist Glenn Gould, theatre director Elizabeth LeCompte, filmmaker Walter Murch, artist Max Neuhaus, composer Pauline Oliveros, guitarist Les Paul, composer R. Murray Schafer, and theorist Pierre Schaeffer. In addition to readings, listenings, and viewings, class members will perform works by composers such as Maryanne Amacher, John Cage, Alvin Lucier, and David Tudor and create sound works of their own. The class should be of interest to anyone who anticipates working with sound in their creative endeavors, whether as a musician, artist, dancer, or filmmaker.

**MUSC130F Wagner and Wagnerism: Richard Wagner’s Music and Influence from the 1840s to the Present (FYS)**
Richard Wagner is perhaps the most influential composer who ever lived. Not only an influence on every musician who followed him, he has also had enormous influence on literature, the theatre, visual arts, and even politics. His music is beautiful but controversial. His ideas range from the most exalted, idealistic visions of the future and human possibility to some confused political notions and a particularly virulent antisemitism. In the words of one of his countless biographers, "Humanity has paid dearly for the Wagnerian patrimony." He was a particular favorite of Hitler, but also of W.E.B. Du Bois. Can Wagner and his legacy be redeemed? Should it? The first step is to understand exactly what this complicated man and his long shadow are all about.

**MUSC133F Caribbean Connection: Music and Culture of Trinidad and Tobago**
**Music**
MUSC 133F will examine the history and development of three major genres of music from Trinidad and Tobago: Calypso, Soca, and Chutney music. In this course we will explore issues relating to culture, tradition, colonialism, gender, identity, religion, and sexuality in Trinbagonian party music. We will survey scholarly material as we listen and analyze the lyrical and visual components found in popular music videos, as well as the party/fete arena, to gain a better understanding of how these styles of writing and visual portrayals have shaped Carnival music today. Additionally, we will begin this course with an introductory examination of the musical traditions within some of the Spanish, French, Dutch, and English-speaking Caribbean, ending the course by probing the many ways Caribbean countries connect culturally and historically.

Although this is not a performance-based course, students would have a firsthand opportunity to play the steelpan and auxiliary percussion instruments as we learn about the invention of the instrument, as well as hear directly from Trinbagonian musicians and other Caribbean musicians via zoom.

Some styles of music explored in this course are: Tamboo bamboo, calypso, soca, chutney, chutney-soca, Jamoo, shango (orisha), tassa drumming, rhythm sections (folk drumming), steelpan, extempo, parang (parranda), parang-soca, zess, zouk, ska, rocksteady, reggae, reggaeton, afro-cuban, merengue, bachata, and vodou-jazz.

N.B. This course is open to ALL students and requires no prior knowledge of or experience in Caribbean music.

**MUSC201 Tonal Harmony**
This course continues the work of Materials and Design, with a greater focus on the analysis of Western European music from the Common Practice period (1700-1900). Through activities such as model composition, listening assignments, and written exercises, students will deepen their understanding of harmony, melody, and form idiomatic to music of the late Baroque, Classical, and early Romantic periods. Although the repertoire for the course is drawn predominantly from Classical music as a specific cultural practice, other topics for elaboration will include jazz and popular music, musical theatre, and others at the suggestion of the students. In weekly labs, students will acquire greater agility with sight-singing, dictation, and keyboard skills, using solfège.

**Offering:** Host

**Credits:** 1.00
**Gen Ed Area:** HA-MUSC
**Prereq:** MUSC103

**MUSC202 Theory and Analysis**
This course focuses primarily on two aspects of Western tonal music: harmony and form. Harmony is the study of chords: their individual qualities and their relative importance and function within a given musical context, and ways of moving between them. We will review the treatment of diatonic harmonies and then expand our palettes through sonorities that borrow from or lead to new key areas. Forms, treated in the latter part of the course, are common patterns of repetition and contrast used to structure diverse
musical works from pop tunes to symphonies. Working from detail to whole, we will learn how composers and songwriters construct motives, melodies, songs, and large-scale pieces. In addition to these topics on pitch relations and structure, this course contains a short unit on rhythm and meter. While we'll focus predominantly on European art music repertoire, we will also examine how harmony, rhythm, and form function in other musical traditions. Assignments and activities will include reading texts by composers and scholars, analyzing scores and recordings, composing, listening, singing, and keyboard playing.

Prereq: MUSC201

MUSC203 Chromatic Harmony
This course is an investigation of the tonal system as it functions in extreme situations: selected highly chromatic passages in Mozart, Beethoven, and Schubert; the more adventurous compositions of Chopin and Liszt; Wagnerian opera-drama; and late-19th-century works in which the tonal system approaches collapse (Hugo Wolf, early Schoenberg). Recently developed models from the music-theoretical literature will be introduced. Chromatic harmony will be considered from both technical and expressive points of view.

MUSC208 Post-Tonal Music Theory
At the dawn of the 20th century, European composers began to experiment with a radically new and completely decentered tonal language. Leaving the practice of tonality behind them, these composers used unorthodox numerical relationships to create formal links and motivic connections between the sounds of their compositions. Post-tonal theory represents the body of scholarship that attempts systematically to examine the formal procedures and properties associated with this modernist music; it also represents one attempt to understand the relationships between musical pitches that hold outside the framework of tonality. This course will serve as a general introduction to post-tonal music theory and will also serve as an introduction to the music of the Second Viennese School: Arnold Schoenberg, Alban Berg, and Anton Webern. Beyond the music of these composers, we will also contemplate applications of post-tonal theory to more recent music.

MUSC212 South Indian Music: Solkattu
Solkattu is a system of spoken syllables and hand gestures used to teach and communicate rhythmic ideas in all of South India's performing arts. It has been part of Wesleyan's program in karnatak music for more than 40 years. Students of many different musical traditions have found solkattu valuable for building and sharpening rhythmic skills and for understanding the intricacies of karnatak tala (meter). Building on the fundamental skills acquired in MUSC110, students will learn increasingly advanced and challenging material in a variety of talas. An extended composition, developed for the group, will be performed in an end-of-semester recital.

MUSC219 I am the Loudest Sound in This Room // I am the Softest Sound in This Room
I am the Loudest Sound in This Room // I am the Softest Sound in This Room (MUSC 219) examines the use of feedback-based systems in performance, composition, and sound art. Particular emphasis will be given to the creation and exploration of recursive systems, starting with Alvin Lucier's seminal work I am Sitting in a Room. The class will overlap with explorations of instrument design, acoustics, orchestration, improvisation, idiosyncratic electronic systems and programming, and performance. Students will be encouraged to create original work as part of the class. The class will use softwares such as Max/MSP, Reaper, and other systems as necessary for the class.

Offering: Host
MUSC220 Composing, Performing, and Listening to Experimental Music
This is a first course in experimental music composition with a focus on live electronic and electroacoustic music. The course uses freeware tools such as SuperCollider 3, Spear, and Audacity to enable students to work from their own computers. The course introduces those aspects of acoustics, psychoacoustics, and audio engineering relevant to composing music, designing interactive electronic instruments, and conceiving self-sustaining sound installations. Course work consists of weekly creative assignments taking the form of both short, original compositions and realizations or transcription of works by others, and two larger compositional projects. The online class session focuses on technical issues, while the extended session allows time for auditions and discussion of assignments and relevant compositions from the literature.

Prereq: MUSC109

MUSC222 Sound Art, Music, and Interactive Media
The focus of this course is on creative projects in digital media conceived in relation to historical considerations of these same techniques. Recording, amplification, and radio transmission have exerted a profound effect on musical practices of all forms since the beginning of the 20th century. In the period immediately after World War II, composers and artists began to focus on changing the relation of composers, performers, and listeners to sound in response to those techniques. We will consider those artistic strategies and the role they have played in shaping musical genres such as musique concrete, serial and spectral composition, interactive computer music systems, circuit bending, and entirely new genres such as sound, video, and performance art. Student projects will be focused on the creation of music, installations, and performances that respond to those ideas and issues. Our primary tool for those projects will be MAX/MSP/Jitter, a software environment designed to enable the composition of real-time interactive sound, video, and network connections.

MUSC223 Music, Recording, and Sound Design
This technical and historical introduction to sound recording is designed for upper-level students in music, film, theater, dance, and art. The course covers the use of microphones, mixers, equalization, multitrack recording, and digital sequencing. Additional readings will examine the impact of recording on musical and filmic practice. Participation in the course provides students with access to the Department of Music recording facilities in the Music Studios.

Class meetings will be on Tuesdays. The class will be divided into three distinct production teams which will meet for one hour on Thursdays within the same basic time period as the Tuesday class.

Prereq: MUSC103 OR MUSC201

MUSC225 Sound Systems and Chamber Electronics
A course in live electronic music centered on the transformation and spatial redistribution of sound. Coursework includes individually creating interpretations of fixed media work (by a composers such as Eliane Radigue, Luc Ferrari, Robert Ashley) for specific spaces using a sound system designed for that space and that piece. Collectively we will prepare realizations of ensemble pieces that played a pivotal role in the development of this music (such as John Cage’s Cartridge Music and David Tudor’s Rainforest IV). Term projects will take the form of concert music or sound installation or other hybrid forms.

On a technical level we will explore different generations of electronic instruments and instrumentation drawn from Wesleyan’s World Instrument Collection. This ranges from found objects such as slinky’s and bird calls to Moog and Arp synthesizers and guitar pedals and other idiosyncratic synthesis devices. We will expand this vocabulary with digital sound techniques using SuperCollider 3, a free music programming environment that extends the DIY sensibility to software.

Grading: OPT
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC230 Music Theater Workshop
This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, “I Want/I Am” songs, extended musical sequences, act one finales, 11 o’clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the “rules” to suit their own creative instincts.
Offering: Crosslisting

Prereq: None

MUSC241 Mystical Visions, Medieval Women, and the Performance of Early Music  
This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Various "medievalisms"—modern interpretations of the medieval—are explored, to show how musicians continue to interact with early practices in new and exciting ways. This allows us to talk not only about performers of historical early music, but also about composers like Kaaja Saariaho, folk groups like Vulcan’s Hammer and Folkal Point, and pop artists like Janelle Monae and Florence Welch. The creation of medievalist music for films and video games is also relevant, as an arena where musicians reimagine the medieval for new audiences.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MUSC242 Baroque and Classical Music  
This discussion-based seminar provides an overview of the history of Western European music from the Baroque and Classical periods (roughly 1600 to 1800). More than a survey course, however, it engages students in some of the significant debates around the character and function of music, with a special focus on music’s role in defining the modern era. Together, we will consider (and in some cases, reconsider) the following questions: How does music express? What were some of the paradigms for conveying meaning with music? Why does music feature so prominently in contemporaneous discourses as varied as the natural sciences, aesthetics, rhetoric, and others? By the end of the semester, students should expect to acquire some techniques for articulating their experience of music and relating that experience to compositional procedures idiomatic to the style. Repertoire to be considered will include works by Monteverdi, Lully, J.S. Bach, Haydn, Mozart, and Beethoven. We will also devote time to exploring the role of this music in cultural exchanges in Asia and the Americas. Facility with musical notation is expected.

MUSC243 Music of the 19th Century  
The nineteenth century is a time of great change—politically, socially and artistically. We will study many of the major composers, and major trends, through their relationship to Richard Wagner. Wagner’s life intersects with almost every major figure in nineteenth century music, in one way or another, and his legacy defines much of the twentieth century, extending all the way to today. In addition to European composers, we will study selected composers in the United States as well. Europeans include Beethoven, Chopin, Berlioz, Schubert, Liszt, Louise Ferenc, Brahms, Arthur Sullivan, and Hugo Wolf. Americans include Frank Johnson (the first published African American composer), Louis Moreau Gottschalk, and “the Beethoven of America,” Anthony Philip Heinrich.

MUSC244 Music of the 20th Century  
In the 20th century, European and American art music (classical music in common parlance) became increasingly fragmented. Composition splintered into diverse idioms and methods: the minimalism of Steve Reich, impressionism of Claude Debussy, and indeterminacy of John Cage, to name only a few. Often, the proponents of one school vehemently rejected the techniques of the others. Perhaps as a result of such schisms, the audience for classical music—particularly contemporary composition—diminished in size, to the point that critics were hailing the “postclassical era” by the 1990s. The concert hall ceased to be a showcase for contemporary compositions and became a kind of museum devoted to preserving (and occasionally reinventing) canonic works of the past. Commercial popular musics such as jazz and rock eclipsed classical music in audience appeal and relevance. While some composers attracted listeners through their interface with folk and popular musics or with film (e.g., Aaron Copland, Leonard Bernstein), others preferred to cultivate small but devoted audiences of initiates for their challenging works (e.g., Milton Babbitt, Arnold Schoenberg). Meanwhile, the advent of mass-produced sound recordings enabled music from distant times and places to be preserved, transported, and heard on demand, with profound consequences for the creation, performance, and consumption of music. In this course, we will explore the many trends that have marked classical musicking in the 20th century. Through extensive listening assignments and primary source readings, we will meet many of the century’s influential composers, performers, critics, record producers, pedagogues, patrons, and listeners. In discussions and writing, we will explore what the past century’s legacy means for us as musicians and listeners today. While previous experience with music is useful, it is not a requirement for success in this course.

MUSC248 Music in Outer Space
Very few people have traveled out of the Earth’s atmosphere, but many composers have voyaged extensively in the conceptual realms of outer space. Throughout human history, musicians have been inspired by the "harmony of the spheres," knowledge of the universe, celestial bodies, and planetary motion. From Pythagoras, Boethius, Philippe de Vitry, John Dunstaple, Johannes Kepler, Gustav Holst, György Ligeti, John Cage, Judith Weir, Alvin Lucier, Brian Eno, Karlheinz Stockhausen, Sun Ra, and Jeff Mills to the 1977 Voyager Golden Record, Hawkwind, David Bowie, the Grateful Dead, Pink Floyd, John Williams, Kraftwerk, and the Beastie Boys, we explore the importance of constellations to musical creativity, and the ways in which cosmic sounds have influenced artists. The course will approach the topic through various interpretive lenses. Readings are drawn from a wide range of sources— theoretical, scientific, poetic, and experiential. Discussion topics will include theories relating to the music of the spheres, the study of geometry and proportion, astro-acoustics, sonification, the use of metaphor (in naming the planets in our solar system, lunar and solar imagery), and the influence of imagined and documented sounds of space on composers past and present. Students will each construct their own soundscape of space in the near future. Musicians, astronomers, theorists, and composers: All are welcome.

MUSC249 Music Journalism and Public Muscology
As listening modes have transformed over recent decades, so too have the ways audiences read and write about music. This course will offer an introduction to music journalism as a practice of public muscology. Students will analyse and apply techniques used to write about music, learn how to pitch and develop ideas, sharpen critical skills, and complete a series of reporting assignments. We will look at the history and function of music criticism, assess different kinds of music writing, discuss changing perceptions of music as a public art-form, and the role of journalism in cultural preservation. The class will write and collaboratively edit a series of reviews, and make a short radio feature in collaboration with WESU (88.1FM). The reviews will focus on recordings, live events, and books on musical cultures. Students will have the opportunity to engage with professional music writers, which will help to prepare them for later work in music journalism, or in arts or media organizations.

MUSC250 Film and Folk Music of India
What is film music culture in India? What is folk music in India today? How do these genres interact and influence one another? Most research on the music of India has focused on the classical systems. However, for many people, the most important musical expressions found in their personal and social lives are film and folk musics. Even though film music is considered to be entertainment, it reflects almost all aspects of Indian music and culture. Students will be introduced to the culture and heritage of India. Film and folk music will be analyzed with reference to ancient and modern musical treatments. Topics covered will include the diverse cultures within India and its global diaspora. Students will be encouraged to sing or play the pop and folk songs of India.

MUSC261 Music and Modernity in China, Japan, and Korea
This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the issues of global/local cultural contacts, and a better understanding of music’s central role in political and social movements in 20th-century East Asia.

MUSC262 Korean Music from Shamanism to Television (CLAC.50)
This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarain aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from
One of the assets of Africa's music scene is its vast plurality. Traditional music conceived, developed, and performed in Africa over many centuries coexists and interacts with contemporary art and popular music. Through readings, classroom discussions, listening, viewing, and practical performances, this course will examine some selected musical traditions linked geographically and historically to various areas of Africa. The course highlights several themes: structure and style; interconnection of traditional, popular, and art music forms; circulation of African music; and music's role in shaping African identities in the globalized world.

MUSC448 History of Jazz in American Culture

This course will provide students with a broad-based literacy in the history of jazz while examining its significance and impact within American culture. As a musical style, jazz has been a staging ground for working out some of the most defining issues and aspects of American culture, including the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, assimilation versus appropriation, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s through the '50s, until it was displaced and pushed to the margins by rock and soul in the 1960s. But it has remained an inspiration for diverse artists in rock and rap up to the present day, including Kendrick Lamar's jazz-drenched "To Pimp A Butterfly" and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

We will explore the early 20th-century origins of jazz in New Orleans, its rise as America's popular dance music in the 1920s and '30s, a shift to a more concert art-oriented form in the 1940s and '50s (representing the epitome of cool and hipness), avant-garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based collectives of the 1970s, and its emergence in hip-hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, among many others, as well as new directions from recent generations (bringing in guest music department faculty). We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados and those interested in social and cultural dynamics as well as the musical materials.

This course will explore the emergence of an avant-garde in jazz in the 1950s and 60s, including earlier efforts and later developments in the preceding and succeeding decades. We will take a holistic approach, examining the music and its surrounding community within the broader social and cultural currents of 1950s and '60s America, especially that of European-inherited avant-garde aesthetics, the increasingly urgent Civil Rights Movement and changing notions of freedom, and artist collectives in the U.S. and Europe. Key artists will include Monk, Coleman, Taylor, Sun Ra, Coltrane, Art Ensemble of Chicago, Bailey, and Braxton, among others. We will immerse ourselves in a combination of reading, listening to recordings, discussion, and in-class performances. Throughout the semester, we will pursue the parallel goals of using this era in jazz to expand our understanding of avant-garde movements in general and using historical avant-garde movements to expand our understanding of how the phenomenon has played out in jazz. The first two weeks will function as a Jazz 101 boot camp, and so no prior experience in jazz is required.

MUSC278 Survey of Jazz Styles
This course is a study of how jazz works, developing the awareness and tools that allow us to understand and evaluate what we are hearing when we listen to live or recorded jazz--how and why the musicians do what they do and the larger context into which a performance fits. We explore historical developments and chronology, the structures that govern jazz improvisation and other performance practices and the instrument roles and sub-styles that typically make up the music. Though there will be ample relevant information for musicians, a background in music theory or performance is not at all necessary for this course.

MUSC279Z Music and Wellbeing
IN-PERSON COURSE: 10:00am-noon and 4:00pm-6:00pm, Monday through Friday. Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings. Music has been, and continues to be, an essential component of the practices of traditional healers in most indigenous cultures. Methods vary greatly from culture to culture, and from ancient to modern times. Hindustani (North-Indian art) music is unusual in having a very well-established written record, as well as an oral history. But although knowledge of the medicinal effects of Hindustani musical tones and modes was once integral to understanding and selecting the rags (melodic systems) that make up this music, much of this
knowledge has been lost. The sarangi (North-Indian viol) is an instrument closely associated with musical healing. Oral history transmitted through generations of sarangi players makes it possible to trace a lineage of music's medicinal purposes back to the Mughal era.

This course draws on my experience and knowledge as a Hindustani music scholar and an eighth-generation sarangi player from a hereditary musical family to open up a space for the development of community-focused performance methodologies. It looks at ways that my inherited tradition can provide a model for musical healing in contexts outside of India. Acknowledging the capacity for music to activate and influence autonomic system responses, components of the course involve research into the neuroscience of musical healing, public health initiatives, and the relationship to composition and to improvisation.

An integral part of the course, the "lab" will teach you strategies for listening and learning songs composed in rags. It will include structured breathing and yogic-postural forms, combined with healing strategies drawn from diverse sound-based creative practices. Borrowing tools from ethnomusicology, music-therapy, and medical anthropology, the course will extend the listening part of the lab to draw comparisons and analyze music healing practices. In addition, students will be encouraged to investigate, compare, and draw parallels to their own culture(s) and the discipline of music(s) they belong. Detailed and guided listening will make it possible for you to integrate emerging understandings of the relationships between ritual, music, and the health care. The course goal is to broaden your understanding of music as therapy, while raising awareness of the cultural processes that are constructed through musical practice. Syllabi for Winter Session courses will be posted to https://www.wesleyan.edu/wintersession/courses.html as soon as they are available.

MUSC285 Global Hip Hop of the Non-Anglophone World (CLAC .50)
This optional lab class is intended for students who are currently taking MUSC295: Global Hip Hop. Proficiency in a language other than English is required. Each student will present to the class a single piece of their choice in a non-English language every other week (for a total of five presentations). Presenters will provide the class with written lyrics in both the original language and in English translation. In lieu of analyzing recordings by others, students have the option to compose their own non-English rap songs and record (or perform) them for in-class discussion. The final paper will tie the five presentations together in a single formal document (or website). Class discussion will be in English, but the topics will all be rap lyrics and hip hop/youth culture in the non-Anglophone world.

MUSC291 The Gendering of Music in Cross-Cultural Perspective
This course presents a critical examination of issues explored and debated in recent studies of gender, sexuality, power, identity, and music from diversified music traditions, including Western art music, popular music, and world musics. Drawing upon interdisciplinary discourse on theories of feminism and gender, gay and lesbian musicology, as well as queer theory in ethno- musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

MUSC293 Mapping Culture
What is a culture? How can it be intimately wrapped up in a location and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom—"location, location, location" and "all politics is local"—tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location (Nile Project, Playing for Change). From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti and other street art) and social formations. Haight-Ashbury (SF) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models before students embark on their own to map out a culture of their choice as their final project, using either Google Maps or Story Maps. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC294 Queer Opera
Opera is a total art: it weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage—and there is plenty of that—operatic narratives also bear witness to changing structures of
normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

MUSC295 Global Hip-Hop
Over the past two decades, hip-hop, in its various facets of rap, deejaying, dance, visual art, fashion, and attitude toward authority, has gradually taken over as a primary medium of expression for youth around the world. Used as mass entertainment, elite aesthetic statement, social and political commentary, tool for education and social change, vehicle for economic opportunity, and as the core of a cultural movement, hip-hop has proven malleable enough to thrive embedded in scores of different languages and cultures around the world and effectively speak to local needs. Yet its local manifestations have also managed to retain their membership in a global hip-hop culture.

In this seminar we will study the global spread of hip-hop from an interdisciplinary approach, examining its varieties of expression from aesthetic, cultural, social, musical, linguistic, kinetic, economic, and technological perspectives. We will first come to an understanding of the rise and dispersion of hip-hop culture in the United States. Then, beginning with France, where it first took hold, we will move around the world examining local case studies and their more global implications.

MUSC296 Soundscapes of Islam
From the melodious recitation of the Qur’an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting sonic articulations of Muslim identity. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres (Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip-hop). The roles and meanings of music and the status of musicians are discussed in relation to wider aspects of cultural and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization. The course draws on extensive audiovisual materials and is open to students of all levels. No background in music or Central Asia is required.

MUSC308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.
In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites—public, private, physical, and electronic—in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

MUSC405 Private Music Lessons for Nonmusic Majors
Private instrumental and vocal lessons meet once a week at a regularly scheduled time. Permission of the instructor is required. Students contract to take 12 lessons. Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the Private Lessons Program must contact the instructor to determine whether an interview during the first week of classes is required. This course may be repeated four times for credit towards graduation regardless of section or combination of sections.

Each section is for different instrument or voice lessons. Please see each section for the instrument/voice lessons taught by that instructor. (Section 01 is only for Bass lessons). A full list of instructors and their instruments can be found under the Private Lessons section of the Music Department website.

In most cases the student needs to provide their own instrument. Piano and drums are available to students for lessons, and certain other orchestra instruments may be available to private lessons students.

Course Fee: $780 for 12 lessons billed through the Student Account. Financial support may be available for those who qualify. Please see the Music Department website under Private Lessons for details.

MUSC413 Korean Drumming and Creative Music Ensemble
This course is an experiential, hands-on percussion ensemble with the
predominant instrument in Korean music, the two-headed janggo drum.
Students will learn to play a range of percussion instruments including janggo,
barrel drum (buk), hand gong (kwenggari), and suspended gong (jing).

Through the janggo, drumming students gain first-hand experience with the role
music plays in meditation and the benefits it offers to develop a calm, focused
group experience. In the end they integrate their focused mind, physical body
energy, and breathing through a stream of repetitive rhythmic cycles.

The students will be introduced to traditional folk and court styles of janggu
drumming. The ensemble plays pieces derived from tradition and new ideas,
and creates new works exploring imaginative sounds on their instruments. If
there is an opportunity during the semester, the students will have a creative
collaboration with a dancer(s) or musician(s) from other cultures. The ensemble
will experience a deep respect for the diverse cultural backgrounds of the
students developed from the efforts of teamwork and creating music together
through Korean drumming. The semester will end with a live performance for the
public.

MUSC414 Korean Drumming and Creative Music Ensemble Advanced
This class offers more advanced techniques for those students who have taken
the beginner course or who have some basic experiences in Korean drumming
or who have long-term drumming experiences of any other cultures including
Western drum set. Attendance and additional practice time are mandatory. In
comparison to the beginner class, the advanced class will play rapid, vigorous,
and seamless rhythmic patterns on janggu, buk, and kwenggari. Students are
expected to be creative in utilizing materials given during the semester.

Each student will focus on a lengthy solo work on any of these instruments, as
well as ensemble playing. Students will explore both traditional and new
emerging styles of Korean drumming. In the end, they will integrate their solos
in the ensemble piece and create a new piece. The ensemble will experience
a deeper level of drumming from contributing solo work to the ensemble and
the efforts of teamwork. They will learn about group activity in music-making
through sharing ideas and assisting each other. The semester will end with a live
performance(s) for the public.

Grading: A-F

MUSC416 Beginning Taiko--Japanese Drumming Ensemble
This course introduces students to Japanese taiko drumming. The overarching
goal of this class is to gain a broad understanding of Japanese culture by studying
the theory, performance practices, and history of various genres of classical, folk,
and contemporary music traditions. Students will gain a better understanding of
the spirit behind the matsuri (festival) and Japanese performance arts through
learning basic taiko technique and one or two pieces on the Japanese taiko drum.
Students should wear clothes appropriate for demanding physical activity (i.e.,
stretching, squatting, various large arm movements).

MUSC439 Wesleyan University Orchestra
The Wesleyan University Orchestra is a student-community ensemble that is open to everyone with a passion for orchestral literature. Prospective members should have an intermediate-to-advanced skill level of performance on an orchestral instrument and be a part of the following groups: Wesleyan music majors, nonmajors, faculty and staff, and community musicians. The orchestra performs music from all genres and time periods, ranging from the 18th-century "classics" to contemporary academic and popular compositions.

The orchestra presents four hour-long concerts each year: middle of October: a "masterworks" program, featuring one of the department's private lessons teachers, or a guest artist, as a soloist; early December: a program of popular, film, and holiday music; early March: children's concert; and early May: a "masterworks" program, featuring the winner(s) of the annual Wesleyan Concerto Competition. The Orchestra occasionally collaborates with the Wesleyan Concert Choir. Rehearsals will combine intensive concert preparation with occasional readings of works not scheduled for performance. Open to all members of the Wesleyan/Connecticut community.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC440 Instrumental Conducting
The theoretical portion of the course will highlight key events in historical development of orchestra and conducting. The practical portion will focus on aspects of basic baton technique, score study strategies, score analysis, rehearsal techniques, interpretation, style, and performance practice, all on examples from standard orchestral literature.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: MUSC103

MUSC441 Piping Performance: An Exploration of Artistic Expression through the Pipe Organ
With the ability to create the most delicate and jarring of timbres, and to fill the space with "other-worldly" soundscapes, the pipe organ is a vehicle that transports one toward artistic and musical growth. This course will introduce students to the history and development of the instrument, while fostering other musical skills and studies that assist each student to find their voice as an artist-creator.

This multi-track course allows students to select their focus in one or more organ-related disciplines: improvisation, composition, performance practice, repertoire playing, church music, musicological research, etc. Students utilize their growing knowledge of the organ to complete three musical performance or research-related projects that they develop over the course of the semester. Final projects are publicly presented. A lab time in the form of private lessons, consultation, and individual practice is required.

Grading: OPT
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC444 African Popular Music Performance
This course aims at bringing together students with diverse musical skills to explore the riches of African popular music (broadly defined to include a range of styles such as highlife, hiphife, hip-hop, dancehall, reggae, azonto, and gospel highlife) through performance. Popular music, first and foremost, is an urban genre. Its origins go back to the early 1900s when, because of European presence in the coastal areas of West Africa, and later spreading to other parts of the continent, new musical instruments, ideas, and imaginings became available. Today, popular music is the driving force of the music industry in Africa. Through intensive studio practice, reading, listening, viewing, and individual and group rehearsals, the goal of the course is twofold: to develop proficiency in African pop music performance and to become familiar with the intellectual discourse on African popular music, its interactions with traditional African music, and its role in the formation of generational identities. The course is fundamentally performance-based; hence, enrollment is limited to skilled musicians with some proficiency in singing and the following instruments: guitar, keyboard, drum sets, bass guitar, saxophone, trumpet, and trombone.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC445 West African Music and Culture: Beginners
This is a performance-based course that focuses on West African music. The course is designed to provide a practical and theoretical introduction to traditional West African music and culture. Students experience the rhythms, songs, movements, and languages of Ghana and its neighboring countries.
through oral transmission, assigned readings, film viewing, and guided listening to commercial and/or field recordings. This interdisciplinary approach to learning is in keeping with the integrated nature of drumming, dancing, singing, and hand clapping in West Africa. Students learn to play a range of instruments, including drums, metal bells, and gourd rattles.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC446 West African Music and Culture--Intermediate
This course is designed to build on the skills developed in MUSC445. The beginning repertoire is reviewed, and more demanding call-and-response patterns are learned, along with new, more challenging repertoire. Students may be asked to perform on and off campus.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: MUSC445

MUSC447 West African Music and Culture--Advanced
This course is designed to build on the skills developed in MUSC445 and MUSC446. Complex repertoire is learned and brought to a higher performing standard. Students experience the intricacies of dance accompaniment while drumming and singing with the advanced West African dance class. The student ensemble will be asked to perform on (and possibly off) campus.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: MUSC446 OR MUSC445

MUSC448 Ebony Singers: Gospel Music
This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

Offering: Host
Grading: A-F
Credits: 0.50

MUSC457 Jazz Orchestra I
This course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.

MUSC458 Jazz Orchestra II
A continuation of MUSC 457, this course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious
MUSC459 Wesleyan New Music Ensemble I
This ensemble class offers a unique opportunity for graduate and undergraduate performers and composers to explore and perform various acoustic and electroacoustic works composed by composers of avant-garde and experimental music in America after 1950. Additionally, composers who are enrolled in the course may be asked to create pieces that are specifically designed for any number of the ensemble participants. Through extensive large ensemble rehearsals and small group rehearsal labs that will culminate in a performance (or a series of performances), students will develop a deep understanding and appreciation of contemporary music performance techniques and collaborative processes. Students will gain skills that pertain to the reading of scores, the execution of complex rhythmic and melodic passages, music composed using graphic and/or textual notation, event scores, and extended instrumental performance techniques. Advanced Western musical literacy is required in order to succeed in this course. All instrumentalists (including those specializing in the human voice) are encouraged to participate.

MUSC461 Sound Systems: The How of Hearing
Since the late 19th century artists, corporations and composers have all proposed, developed, presented, and occasionally commercialized physical systems that reconfigure how sound can be experienced. The early impact of the entertainment industry ranged from the introduction of stereo to movie theaters in Walt Disney's Fantasia to the development of close miking for the crooning of Bing Crosby to McCune sound service's introduction of stage monitors for the benefit of Judy Garland. Artists and composers used related methods to propose entirely new understandings of how music can be. Futurist Luigi Russolo's Intonarumori of 1913 proposed an Art of Noise, while Pauline Oliveros' concept of deep listening developed listening as a foundational form of music making. R. Murray Schafer's concepts of soundscape and acoustic ecology project a music of environmental relations mediated through sound, while Maryanne Amacher's sound characters create individual sounds understood as capable development and change beyond the expanse of any one performance or composition.

This class will be a performing ensemble focused on "sound systems" as musical instruments and musical practices performing live and fixed media sound pieces through sound systems we will configure for different sites on campus. Together with developing the technical skills required to mount these pieces, we will also investigate and discuss the varied musical, social, acoustic, and psycho-acoustical understandings of music and sound that influenced their shaping.

Identical With: CHUM347
Prereq: MUSC109

MUSC463 Teaching Music Lessons to Children in Local Schools
This is a service-learning course. Wesleyan students will teach private and small group music lessons to local children remotely. These sessions will be augmented by a weekly classroom session in which readings and the student teachers' journals will be discussed. Some of the Wesleyan Department of Music's private lesson instructors will visit to answer questions and guide the student teachers through the issues, musical and extra-musical, that the lessons will raise.

Written assignments will include responses to weekly readings, regular journal entries, and an end-of-semester paper. There will also be a recital by the school children at the end of the semester.

MUSC505 Topics in Applied Ethnomusicology/Public Musicology

Work in applied ethnomusicology and public musicology includes a wide range of activities and formats, including: blog posts, magazine articles, public community music performances, tweets, podcasts, pre-concert and public lectures, forensic testimony, and the development of digital open-access tools and resources. What unifies these and many other possible forms is a desire by scholars to convey the cultural relevance and influence of music by engaging audiences outside the academy. Many are concerned with the social responsibility of the university, and developing methods and projects to collaborate with and give back to the communities in which we live, work, and research. The seminar will also address what the tools, methods, and values of the interdisciplinary field of digital humanities can offer applied ethnomusicology and public musicology. We will apply a suite of open-source analytic, pedagogical, networking, research, and presentation tools developed by digital humanists to our own projects. Through readings and research-creation projects we will better understand the work of institutions for cultural preservation, the role of activist and political scholarship, how to write accessibly for all readers, and how to convey our ideas in a number of different formats (e.g. blogs, “think pieces” or online articles, pre-concert lectures, open-access digital archives and research webspaces).

MUSC506 Reading Ethnomusicology

As one of the two core introductory courses to ethnomusicology, this course lays a general intellectual groundwork for MA students with a concentration in ethnomusicology through in-depth reading of some of the most important writings in ethnomusicology. Focusing on both intellectual history and current issues, the course evolves around the key concepts and themes that have defined, expanded, or challenged the field. Students will critically and comparatively discuss the approaches and contributions of each work they study. At another level, this course also aims at broadening students' knowledge of world musics through studying a wide range of music ethnographies.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC507 Practicing Ethnomusicology

This course provides a broad introduction to the research methods of ethnomusicology. The theory and practice of musical ethnography are examined, including techniques of face-to-face and remote fieldwork, ethnographic writing, research ethics and representation, bi-musicality, approaches to the transcription and analysis of musical sound, ownership, repatriation, and dissemination of ethnographic materials. Students acquire practical skills of ethnography-based research.

MUSC513 Improvisation in Cross-Cultural Perspective
This course will explore musical improvisation around the world from a variety of theoretical and practical perspectives. Readings on theories of improvisational processes, as well as on specific musical traditions in the United States, India, Indonesia, Africa, and elsewhere, will complement practical transcription and analysis projects.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Prereq: None

MUSC515 Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture
Music circulates, moves, and is mapped through places, pathways, materials, bodies, and technologies. Together, we will encounter a series of conceptual frameworks and case studies that map the nodes, pathways, boundaries, and movements of sonic phenomena and musical life. How do the movements of music and musicians, the places they occupy, and the boundaries they negotiate communicate spatial information about music practices? How do they circulate physically and virtually? What are the different methods that ethnomusicologists use to represent and map these circulating sounds? This seminar not only discusses the physical cartography and circulation of music cultures, but also, the virtual spaces music moves through. In the opening decades of the 21st century, new media practices and Web 2.0 modalities (e.g., Spotify, YouTube, Twitter, Facebook) have enabled new cartographies, patterns, and pathways of circulation, and engendered new approaches to participatory musicking.
The seminar also raises questions of how technologies and modes of mobility interface with categories of identity, race, and gender.

In-class discussions foreground the role of movement and how musical movement is mapped and represented. The seminar addresses such topics as: musical movements by way of travel, habitation, refuge, trade, ghettoization, migration, or telecommunication; sonic geography; the ways sounds and music flow and vibrate through, in, and among places (e.g., urban streets and neighborhoods, spaces of protest, music scenes, performance venues); composition as travel writing; why some musics and musical actors are more mobile than others; how travel and migration shape music-making and musical senses of place; how the maps and cartographic representations of places are redrawn as music and musical actors move and aural culture makes claims to space; the place of border theory, cartography, migration studies, transnationalism, and human geography in ethnomusicology; the impact of travel, tourism, festivals, and tours on local music scenes; mobile media and technologies; how subversive and DIY cartographies of music cultures and their movements offer alternative representations to conventional social and political customs; and how the spatiality and materiality of musical mobility is experienced through aural, tactile, visual, and haptic sensations.

Prereq: None

MUSC517 Sex/Gender/Queerness in Music and Music Scholarship
This seminar is designed to involve all music graduate students, namely students in composition, ethnomusicology, and performance concentrations, from both MA or PhD programs. This course will examine the major ideas in the recent feminist, gender, and queer studies in the fields of composition, ethnomusicology, musicology, and popular music studies. The class will explore varied approaches in critical re/presentation of femininity/masculinity/ transgender/queerness in composing, listening, performing, and analyzing music and sound. We will consider the significance of engaging feminism, gender studies, and queer studies in our varied relations with music. In so doing, each member of the class will have the opportunity to design their own final creative project and to develop a dialogue with the ideas presented in the readings.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-MUSC
Prereq: None

MUSC518 Music and Embodiment
This course will explore the role of the human body in music performance, transmission, and perception. Through discussion of interdisciplinary literature on embodiment, analysis of cross-cultural case studies, and ethnographic projects describing their embodied engagements with music, students will examine the biological and cognitive foundations of human musicality, the cultural and social dimensions of music as embodied practice and experience, and the body politics of musical expression and participation. Topics covered will include the role of movement and gesture in singing and instrumental playing; the interrelation of instrument morphology, body techniques, and music structure; the interplay of sound, space, and architecture; and intersections between human musicking, technology, and the environment.

**MUSC519 Current Issues in Ethnomusicology**
This course concentrates on current scholarship, intellectual issues, and music ethnographies in ethnomusicology. It challenges the students with contemporary theoretical debates among ethnomusicologists, such as music and identity, music and gender, race and power, music and technology, and music and decolonialization. The course will closely examine the impact of interdisciplinary approaches on music ethnography through critical analysis of the readings.

**Offering:** Host  
**Grading:** A-F  
**Credits:** 1.00  
**Gen Ed Area:** HA-MUSC  
**Prereq:** None

**MUSC520 Explorations in Musicology**
What is Musicology? How and why do scholars write about music? This course will investigate some of the motivation for making music a scholarly object of inquiry. After reviewing some of the methodologies through which scholarship has been constructed (archival research, reception history, historiography, practice-led research), we will assess and discover new ways to write about music and the cosmos. This topic will serve as a prism through which musicological debate can be understood, and contrasted with ethnomusicalogical and other approaches. We will draw on a range of musicological approaches and frameworks—cultural, historical, scientific, and environmental studies, posthumanism, mythology, and countercultural spirituality.

**Course Objectives:**
- To gain familiarity with diverse thinking about music inspired by the great beyond  
- To understand some of the reasons why musicians turn to cosmology  
- To develop cross-cultural understandings of the collaborations of musicians and astronomers  
- To explore celestial motion as a form of design, or a mode of rationalizing  
- To use musicology tools to find new ways of analyzing phenomena

**Offering:** Host

**MUSC521 Seminar in Interdisciplinary Studies**
The course, one of the four core PhD seminars in ethnomusicology, examines a number of disciplines as they relate to general current theoretical issues and the interests of ethnomusicology. Visitors from other departments will present their disciplinary perspectives.

**Offering:** Host  
**Grading:** A-F  
**Credits:** 1.00  
**Gen Ed Area:** None  
**Prereq:** None

**MUSC522 Seminar in Comparative Music Theory**
In this seminar we will take a deep dive into historical texts of music theory from the 18th, 19th, and early 20th centuries. Because of its significant overlaps with physics, acoustics, aesthetics, and philosophy, music theory can serve as an important site for any inquiry into the history of ideas. Particularly distinctive in music theory of the 18th century and beyond are the linkages that join the empirical and physical sciences with speculative discourses on beauty and subjectivity. In addition to covering major figures in the canonic history of Western music theory after 1700, this seminar will focus in particular on moments of colonial encounter and exchange that occurred through music theory; our aim will be to understand how the modern, Western self was in part fashioned through its investigation of non-Western musical systems. For their final papers, students are encouraged to draw on their own research interests, placing them in dialogue with the historical texts and methodological concerns that we will explore together this semester.

**Offering:** Host  
**Grading:** A-F  
**Credits:** 1.00  
**Gen Ed Area:** None

NEUROSCIENCE & BEHAVIOR (NS&B)

NS&B149 Neuroethology: Sensory Basis of Animal Orientation and Navigation
This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.

NS&B210 Research Methods in Cognition
This course will examine the experimental method as a means of gaining knowledge about human cognition. Students in this course will learn about general research methods in cognitive psychology related to experimental design, understanding and interpreting research, and ethical issues involved in research with human subjects. Classic research paradigms in cognitive psychology will be explored through the use of interactive demonstrations and in-class experiments.
Offering: Crosslisting
Grading: A-F

NS&B213 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-NSB
Identical With: BIOL213, PSYC240
Prereq: None

NS&B220 Cognitive Psychology
Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.
Offering: Crosslisting
Grading: A-F

Gen Ed Area: NSM-PSYC
Identical With: PSYC220
Prereq: PSYC105

NS&B222 Sensation and Perception
This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena.

Identical With: PSYC222
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

NS&B224 Hormones, Brain, and Behavior
Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These
molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.

Identical With: BIOL224
Prereq: [NS&B213 or BIOL213 or PSYC240] OR [BIOL182 or MB&B182]

NS&B225 Cognitive Neuroscience
This course provides an introduction to cognitive neuroscience--the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders.

NS&B227 Motivation and Reward
This course will focus on motivation and reward, providing students with a background in and understanding of the various theories and approaches to studying the topic of motivation, including an introduction to some of the history and the current advances in the field. The course uses animal and human research to try to unravel the brain areas and neurotransmitter systems involved in different forms of reward, including food, sex, and drugs, and examine cases of disordered motivation such as drug addiction, obesity, and disordered gambling.

Offering: Host
Grading: A-F
Credits: 1.00

Identical With: PSYC227
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

NS&B228 Clinical Neuropsychology
This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

NS&B238 Psychological Theories of Learning and Motivation
The goals of this course are to help students develop practical, evidence-based skills for effective classroom learning, understand and appreciate research on the neuroscience of learning and motivation across species, and apply theories of learning and motivation to understanding human behavior. Course objectives for achieving these goals include: implementing evidence-based practices; dispelling myths about learning; explaining mechanisms of memory consolidation and factors that modulate it; distinguishing between and identifying components of operant and classical conditioning; and explaining how each theory of motivation can be used to understand why people behave in certain ways.

Prereq: PSYC105 OR NS&B213

NS&B239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected by complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Identical With: BIOL239, PSYC239
Prereq: [NS&B213 or BIOL213 or PSYC240]

NS&B243 Neurohistology
The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-NSB
Identical With: BIOL243
Prereq: [NS&B213 or BIOL213 or PSYC240] OR [MB&B181 or BIOL181]
NS&B244 Neuropharmacology
This course will introduce students to the physiological and molecular effects of drugs on neuronal activity and behavior. We will cover key concepts in neuropharmacology, including pharmacokinetics and pharmacodynamics, alongside techniques used in modern pharmacotherapeutic discovery as it relates to the treatment of neurological and neuropsychiatric disease. Student assessment will include in-class quizzes and exams.
Offering: Crosslisting
Grading: A-F

Identical With: BIOL250, NS&B555
Prereq: [NS&B213 or BIOL213 or PSYC240]

NS&B252 Cell Biology of the Neuron
Understanding the cellular biology of neurons is critical for understanding neurological disorders as well as neuropharmacological methods for treating the nervous system. In this course, we will explore how neurons function, focusing on structure-function relationships of the molecular building blocks of neurons. We will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include cytoskeleton, cellular polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, neuronal plasticity, and regeneration. This course is designed to follow on from NS&B213 Behavioral Neurobiology.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-NSM
Identical With: BIOL252
Prereq: [NS&B213 or BIOL213 or PSYC240]

NS&B254 Comparative Animal Behavior
An introduction to the study of animal behavior, this course will examine the factors that control the behavior of vertebrates and invertebrates within evolutionary, developmental, and physiological contexts. All animals face similar challenges, and we will examine the common and sometimes unique behavioral strategies used to meet these challenges. Throughout the course, you will integrate knowledge across diverse topics in biology as you practice thinking like an animal behavior scientist. Specific topics include navigation, social behavior, parental care, mating strategies, and communication.
Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-BIOL

Prereq: [BIOL182 or MB&B182] OR [BIOL196 or MBB196] OR [NS&B213 or BIOL213 or PSYC240]

NS&B257 Neurogenetics
Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.

NS&B299 Waves, Brains, and Music
Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.

NS&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function
Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

NS&B316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives
The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

Offering: Crosslisting

Prereq: ([MB&B181 or BIOL181] AND [BIOL182 or MB&B182])

NS&B328 Chemical Senses
The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-NSB
Prereq: [PSYC225 or NS&B225] OR [NS&B213 or BIOL213 or PSYC240]

NS&B330 Neuroscience of Learning and Memory
One of the fundamental functions of our nervous system is to encode and store memories, which allows us to survive and shape our personal identities. In this course we will cover different animal models of learning and memory, which have been useful tools to understand maladaptive memories underlying neuropsychiatric and neurological disorders such as post-traumatic stress disorder, substance use, and Alzheimer’s disease. We will look in detail at how neurons and neural circuits change and respond when an organism learns something new or recalls a past experience. This course will also involve detailed discussions related to sex differences in both learning behavior and the biological basis of memory processes. The central focus of the course will be integrating current work in basic cellular and molecular neurobiology with the experimental psychology of learning and memory.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Prereq: NS&B213

NS&B332 Biochemistry of Neurodegenerative Disease
Broadly defined, neurodegenerative disease occurs when a specific class of neuron dies and thus fails in its biological action. In this course, we will delve into the many different, intricate ways neuron death can occur and cause disease. From the chemistry of neurotransmitters, aggregation of proteins, and the collapse of neuromuscular junctions, many areas of the neurobiology can go awry. The focus of the course will be on understanding the complex interplay of small molecules and proteins that keep neurons healthy and functional. In this course, we will use current primary literature and lecture to understand
in a variety of psychological and behavioral traits such as aggression, political orientation, and mental health.

Offering: Crosslisting

Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: PSYC335
Prereq: PSYC105

NS&B341 Psychology of Human Memory
This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

NS&B345 Developmental Neurobiology
Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-BIOL
Identical With: BIOL345, NS&B545, BIOL545

NS&B347 Mammalian Cortical Circuits
The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing these processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Most of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

Gen Ed Area: NSM-PSYC
Identical With: PSYC348
Prereq: None

NS&B351 Neurobiology of Learning and Memory
Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal’s environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

NS&B357 Sex and Gender: From Synapse to Society
From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.

NS&B358 Neurobiology of Movement
This course is designed to take a comparative approach to understanding the major motor systems of the brain and will cover the basic elements of motor "control." However, the motor system does much more than contract muscles. Even the most basic movements such as walking require whole-body coordination that must be learned and adapted to our environment. During active sensation, motor systems even modulate our sensory perceptions. Much of what we have learned about motor systems comes from animals as diverse as crickets, electric fish, and birds. This course uses a comparative approach to understand the functions various brain regions contribute to our active lives.

NS&B360 Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits
This course will examine structural and functional neuroplasticity in the nervous system. The ability of the nervous system to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and discover how adult neurogenesis is altered by the aging process, physical exercise, stress, and neuropsychiatric disorders, such as epilepsy and Alzheimer's disease. We'll also learn about potential stem cell therapies for enhancing brain repair and plasticity after brain injuries. Students will prepare for class by reading scientific papers and reviews on the topic. In class, I will introduce the topic with slide presentations, and after that we will discuss the topic based on the scientific article discussion. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a final exam, and class participation.

NS&B373 Exploring the Brain-Body Interface: The Neuroscience of Basic Survival
Basic survival depends on the brain's regulation of fundamental behaviors and physiological pathways, such as eating, drinking, breathing, digestion, cardiac function, and thermal regulation. How do the brain and body communicate with each other to achieve homeostasis, different physiological states, and what goes awry in disease? How have different animals adapted to thrive under challenging environments, such as extreme temperatures, hypoxia, and resource scarcity?

In this advanced seminar, students will take a deep dive into the exciting research taking place at the brain-body interface. We will explore the main components of the peripheral nervous system, such as the vagus nerve and the dorsal root ganglia, that act as gatekeepers into our internal and external sensory worlds. We will also explore pathways in the central nervous system that regulate our basic bodily functions. By reading primary literature and review papers, as well as participating in in-class discussions, students will gain deep knowledge of this burgeoning field of neuroscience. Through short written assignments and oral presentations on topics of their choosing, students will gain skills in scientific writing and scholarship as well as in oral communication of scientific information.

NS&B390 Experimental Investigations into Reading
Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

NS&B392 Behavioral Methods in Affective Neuroscience
This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

NS&B399 Advanced Research in Gambling, Drugs, and Junk Food
This advanced laboratory course provides in-depth training in the experimental methods of behavioral neuroscience of motivation and reward and provides students with hands-on experience with animal research using rodent models. The capstone of the course gives students the opportunity to carry out an independent group animal research project in the lab, which may require a slightly heavier time commitment for the duration of the experiment (typically around two weeks). Students will learn how to handle rats in a behavioral neuroscience research setting and how to design and carry out an experiment to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers. Research typically focuses on rodent models of gambling, diet-induced obesity, and drug addiction. The course also focuses on strengthening students' scientific writing and oral presentation skills.

In addition, the course contains a service learning component in which students will work to develop a brief presentation/talk on a topic related to gambling, eating disorders, or drug addiction. Students will practice their talk in class with the aim of presenting it to local middle and high school students, in order to provide more information and education about these topics and the state of current research surrounding them.

NS&B45 Developmental Neurobiology
Near the top of the list of unsolved mysteries in biology is the enigma of how the brain constructs itself. Here is an organ that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies. In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. With each topic in this journey, we will ask what the roles of genes and the environment are in forming the nervous system. We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature.

Identical With: CGST225
Prereq: None

PHIL154 What Is Rationality?
What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking
PHIL160 Philosophy and the Movies: The Past on Film
This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve “the reality effect”? How has the contemporary documentary’s use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

PHIL201 Philosophical Classics I: Ancient Western Philosophy
This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.
Offering: Host
Grading: OPT
Credits: 1.00

PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant
Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes’ MEDITATIONS, Locke’s ESSAY CONCERNING HUMAN UNDERSTANDING, Hume’s ENQUIRY CONCERNING HUMAN UNDERSTANDING, and Kant’s CRITIQUE OF PURE REASON.

PHIL206 Community-Engaged Philosophy: Teaching the Search for a Good Life
In this half-credit course, students who have successfully served as discussion facilitators for PHIL210: Living a Good Life will learn how to teach an abbreviated version of the course to local high school students in a nine-week voluntary after-school program. Having been trained in this special approach to discussion facilitation for their fall semester work in PHIL210, students will be able to deepen their knowledge of both course content (philosophy) and their facilitation skills through guided experiential learning. Course topics will focus on the skills of learning through close observation and reflection on one’s teaching (reflective practice), understanding one’s students (adolescent development, cultural consciousness), and pedagogical knowledge regarding lesson planning, student engagement, developing productive classroom climate, promoting self-directed learning, and authentic assessment. Students must have served as discussion facilitators/leaders for PHIL210.
PHIL207 Live Like a Philosopher

Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

Offering: Host
Grading: Cr/U
Credits: 1.00
Gen Ed Area: SBS-PHIL
Prereq: None

PHIL210 Living a Good Life

For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. For details about the structure of the course and a syllabus of class meetings, along with the locations of plenary lecture sessions, breakout sessions, and dialogue sessions, please see this year's course website and past versions of the course at the following link: https://livingagoodlife.com.

Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.50-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WestMaps for more information.

PHIL211 Critical Philosophy of Race

This course starts with W.E.B. Du Bois, not only because he is formative, but because his philosophy of law, he sets out many of the major themes of the course. We then explore "What is Race" through an understanding of social construction, what problems people of mixed races and non-Black/white races pose to metaphysical theories of race, and finally the relationship between the social construction of race and the "reality" of the biological differences in races. We look at the position—both for and against—that the goal of racial justice is "no longer seeing race," but also from the interesting perspective of those who literally don't "see" race: the blind. We look at the mini-topic of what the role of white people should be in racial justice. We then look at the first-person experience of being a racialized subject through Frantz Fanon and through Frank Wilderson's new book "Afro-Pessimism." We also look at sexual desire and its connection to race. The course ends with a timely look at the connection of race, criminalization, policing, and incarceration, as well as prison and police abolition.

PHIL212 Introduction to Ethics

This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness. Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism

This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldúa, and Frantz Fanon. Throughout we will...
investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

PHIL214 Reasoning About Justice
This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagements with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

PHIL216F Whither Democracy? Introduction to Political Philosophy (FYS)
The course introduces students to some of the major philosophical perspectives that continue to inform contemporary social and political thought. We begin with the two paradigmatic arguments for obedience to the state and arguments for civil disobedience given by Plato and Dr. Martin Luther King Jr. We then look at the main justifications for obedience to the state--the social contract, freedom and equality (by looking at the topic of work and a universal basic income)--and then explore the contemporary crisis of democracy. We then conclude by exploring civil disobedience as the legacy of Dr. King in light of Tahrir Square/Occupy Wallstreet/BLM.

Prereq: None

PHIL218 Personal Identity and Choice
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL218F Personal Identity and Choice (FYS)
This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose the self? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL220 Human Nature
The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining
philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL221F Philosophy as a Way of Life (FYS)
For many philosophers, East and West, philosophy has been more than an effort to answer fundamental questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of life. How does philosophical reasoning interact with lived practice? How do metaphysical views lead to ethical commitments? Despite their differences, Confucians, Christians, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

PHIL222 Global Philosophy
Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves—sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions—in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL231 Reason and Paradox
This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno's Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

PHIL233F Bodies and Experiences (FYS)
Philosophers study the world with their minds. But who says that they should only discuss "mental" stuff such as concepts, rationality, or logic? This course is about bodies, and about the experiences that we have in virtue of those bodies. We will explore a variety of contemporary philosophical topics that have bodies and experiences at their center. These include the experience of skilled movement when we dance or play a sport, having a physical disability, or being shamed for our body size. We will discuss the ways we experience race, gender, sex, and sexual orientation. We will learn what makes a question distinctly philosophical and what methods philosophers follow to answer it. But most importantly, we will learn to be OK with the fact that there might be no true answer at all.

PHIL251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)
This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language.
This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations as a polarizing cult figure who has attracted the fascination of generations. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestowed on the "philosophers of the future"—a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestowed on the "philosophers of the future"—a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

**PHIL252 Nietzsche - Science, Psychology, Genealogy**
This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions—does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

**PHIL254 The Rationalist Tradition in Early Modern European Philosophy**
This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics — including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

**PHIL255 Moral Psychology**
Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives.

**PHIL257 Human Nature in Chinese Thought**
This is a course on theories and practices regarding human nature in the history of Chinese traditions, such as Confucianism, Daoism, Legalism, Buddhism, and Neo-Confucianism. What does it mean to be a human? Do all humans have something in common? How should we conduct our lives with respect to those common characteristics? Thinkers from both Western and Eastern traditions have offered their own distinctive and thought-provoking answers to those questions.

In the West we are more familiar with the concept of "rational animal" which remains the classical understanding of human nature since the time of Plato and Aristotle. In the history of the Chinese tradition, however, very different approaches towards human nature were adopted, such as the concepts of sympathy, effortless action, no-self, and original enlightenment. Together they can offer us some new insights into the concept of human nature beyond just rationality.

**PHIL258 Post-Kantian European Philosophy**
In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics
include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate’s requirement in philosophical origins of theory.

PHIL265 Postanalytic Philosophy: Science and Metaphysics
The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy’s relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL266 Buddhism and Social Justice
In this course students will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a
PHIL267 History and Limits of Aesthetic Theory

This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

PHIL269 Modern Aesthetic Theory

As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenability of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

PHIL270 Environmental Philosophy

This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition—human-centered and individualist accounts of existence, agency, knowledge, and value.

Shared questions may include:
Is there a coherent way of distinguishing "nature" from the non-natural?
What can we understand about non-human experience and value?
How do people become motivated to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies?
How do concepts of moral responsibility apply to climate change?

When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another?

Despite near consensus about our times being rife with environmental crises, concepts like "environment" and "nature" defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainability, they may not share any clear positive account of justice or of sustainability.

Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique—each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics).

Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

PHIL271 Data, Privacy, and Ethics

Paying for items at the grocery store has become automated thanks to self-checkout stations. Grabbing a coffee at McDonalds involves plugging an order onto a screen. These and other new technologies positively and negatively impact society. For instance, many of these now automated procedures were once occupations, and research shows that automation is displacing jobs that would normally serve underrepresented communities. What's more is that these machines store your information: what you bought, how many items, and at what time you made the purchases. The internet and various social media websites store even more information that is bought and sold to companies...
and organizations. Thus, should it be permissible for automation to replace workers? What is and isn’t moral use of such information? Who is responsible if a machine does something wrong? Are there scenarios in which an organization should not have access to data? In this class, we will explore these questions and other normative questions on data-driven technologies by way of case studies on particular topics. We will explore the topics data ownership, surveillance and privacy, algorithmic bias and its solutions, misinformation, the black box problem, opacity in machine learning, and societal implications of automation. Authors to be read include Emmanuel Mesthene, Cathy O’Neil, Wendell Wallach, Frances Haugen, Sina Fazelpour, David Boonin, and more. Some relevant movies that touch on these topics include Chappie, Coded Bias, the Minority Report, and the Great Hack.

PHIL273 Philosophy of Law
This course will consist of four sections. We will start by understanding what law is by looking at a classic debate within the philosophy of law between natural law and legal positivism (whether law and morality are connected). We will then look at adjudication, the different methods that judges use to interpret laws and we will do this by looking at famous, recent supreme court judgments. We will then look at freedom of religion cases and think about whether religious practices should be exempt from general laws that normally applies to everyone. We will end with the largest section of the course: the legal regulation of freedom of speech and then connect it to freedom of speech on the internet.

PHIL274 Self & Social Transformation
Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault’s later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood’s dawa movement from Egypt, Weight Watchers, and finally “ballroom” culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)
This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

PHIL280 Theory, Critique, Politics
The subject of this course centers on two questions in 20th century continental philosophy. First, what can theory bring to our understanding of politics? Second, what is the role of critique for political judgment? We will begin with Kant for an understanding of the meaning of "critique" that many 20th century continental philosophers draw upon. Following this introduction, the course will be split between German philosophers and French philosophers to allow us to understand the tensions and convergences between the two camps. The German philosophers we will read are Heidegger, Adorno, Herbert Marcuse, and Ernst Bloch. For the French philosophers, we will read Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, and Michel Foucault. By the end of the course students will be able to assess how different thinkers attempted to resolve the relationship of the philosopher to political society.

PHIL281 Africana Political Philosophy 1800s-1970
This course aims to introduce students to both the critical and the constructive dimensions of Africana political thought. Through our readings and discussions, we will assess the claims that Africana thinkers have made upon the polity, how they have defined themselves, and how they have sought to redefine the basic terms of public life away from either slavery or colonization. Among the themes that we will explore are the relationship between slavery and democracy, the role of historical memory in political life, the political significance of culture, the connections between "race" and "nation," and the tensions between claims for black autonomy and claims for integration, as well as the meaning of such core political concepts as citizenship, freedom, equality, progress, power, and justice. As we focus our attention on these issues, we will be mindful of the complex ways in which the concept of race has been constructed and deployed throughout historical periods and its interrelationship with other elements of identity such as gender, sexuality, class, and religion. Furthermore, we will attend to differences across black geographies from the Americas to the Caribbean, and parts of Africa.

PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion
With the dawning of modernity, Europe’s colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romanticists, and liberationists. Themes include proofs of God's existence—along with refutations of those proofs and rebuttals to those refutations—the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

Offering: Crosslisting

PHIL283 Animal Law and Policy
This course will provide an overview of law and public policy as they apply to non-human animals. The course will explore the historical and philosophical treatment of animals; discuss how such treatment impacts the way judges, policymakers, lawyers, legal scholars, and lay people see, speak about, and use animals; survey current animal protection laws and regulations, including overlap with such policy issues as food, and agriculture, climate change, and biodiversity protection; consider recent political and legal campaigns to reform animal protection laws; examine the concept of "standing" and the problems of litigating on behalf of animals; interrogate the current classification of animals as "property" and the impacts of that classification; and debate the carceral turn in animal legal advocacy.

PHIL284 Philosophy of Mind
This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

PHIL285 Philosophy of Science
This course is a fast-moving introduction to some central topics in the philosophy of science, aimed at students with some college-level study of at least one natural science. Topics include the norms of scientific understanding or explanation; the relation between finished theories or explanations and ongoing research; the recognition and dissemination of discoveries; the justification of scientific claims; conceptual and technical (revolutionary) change in the science; the significance of instrumentation, experiment, and artifice in science; the places of laws, models, and causal relations in scientific understanding; and whether various sciences differ fundamentally in their aims, methods, and achievements. Considerable attention will be given to examples of scientific practice, both historical and contemporary.

PHIL286 Sciences as Social and Cultural Practices
Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role
for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

PHIL291 Reason and Its Limits
This course offers a close study of Immanuel Kant’s magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason’s ability to offer substantive insights into necessary truths. Kant’s "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

PHIL294 Heidegger and the Being Question
Martin Heidegger argued in BEING AND TIME that philosophy has only one question at its heart, the question of the sense of being, even though that question has been trivialized or obscured by the philosophical tradition. This course will explore this question; its relation to more traditional topics in metaphysics, epistemology; and the philosophy of mind, language, and science; and its implications for how philosophy should be done, to what ends. Our primary readings will be BEING AND TIME and various secondary literature, but the aim will be to formulate, pose, and address the question of what it means to be, rather than to interpret or assess Heidegger’s own views about this question.

PHIL296 Philosophy of Psychology
How does the mind work? So-called "computationalists" think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called "mental representations") according to rules, and then issues "commands" to guide behavior. On the other hand, the "SE" (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. SE theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn’t happen "in a vacuum," and it isn’t separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the SE approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of

PHIL297 The Problem of Language in Chinese Philosophy
The class examines the criticisms of language in various schools of Chinese thought, exploring themes such as the ineffability of the absolute, the rejection of logic, naturalistic criticism of language as a vehicle of propositional knowledge, the "heart that precedes words" in apophatic practice, words as generator of duality, and more. Special emphasis will be given to the paradox of "saying the unsayable" in Daoism and Chan Buddhism, and on the various literary techniques by which the early thinkers have tried to avoid this conflict.

PHIL298 Feminist Epistemology
Traditionally, the project of theorizing about knowledge (including concepts such as justification, belief formation, and rationality) assumes that such an enterprise is possible even if one ignores the context and situation of the knower: Philosophers can theorize about, say, belief formation, even if we ignore who is forming the belief--that is, we can ignore their educational, socio-economic background, gender, ethnicity, race, and disability status. Feminist epistemologists question this assumption: They think the context and situation of the knower is relevant for knowledge acquisition and generation. In this course, we will specifically focus on scientific knowledge, since science is typically assumed to be 'pure' and 'isolated' from socio-political and cultural influences. Some questions we will address include the following: Is the notion of scientific objectivity gendered? Is rationality gendered? In what ways can the process of scientific theorizing be more equitable? Do the ideals and standards of science themselves need to change? This course will study the work of Linda Alcoff, Elizabeth Anderson, Sandra Harding, bell hooks, Helen Longino, Maria Lugonés, Alison Wylie, and more.

PHIL301 Du Chatelet's Philosophy of Science
Émilie Du Châtelet was a respected and lauded natural philosopher, mathematician, and physicist during her time. She published an essay on fire in 1739 alongside Voltaire, and published two editions of her work on physics and philosophy, namely the Foundations of Physics, in 1740 and 1742. After Du Châtelet's death in 1749, her former math tutor collected and submitted for publication her translation and commentary of Newton's Principia. It was Du Châtelet's death in 1749, her former math tutor collected and submitted for publication her translation and commentary of Newton's Principia. After the rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

PHIL302 Plato's REPUBLIC
"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted
to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power—the life of a tyrant—is psychologically corrupted. These are bold claims. What is Plato’s argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL306 Sophist, Statesman, Philosopher: Plato’s Later Metaphysics and Politics

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides’s puzzle and explore Plato’s solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths

This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth—for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

PHIL327 Progressive Confucianism and Its Critics

Contemporary “Confucianism” designates a diverse set of philosophical, social, political, and religious approaches that are rooted in traditional East Asia and are playing significant—and increasing—roles in the modern world. “Progressive Confucianism” designates a subset of these approaches, emphasizing the ways that the Confucian tradition has developed throughout the centuries and arguing both that modern Confucianism must continue to develop, and that a properly developed Confucianism has much to contribute to contemporary philosophy and to modern societies. This seminar will explore the background out of which progressive Confucianism has emerged; its distinctive approach and key contributions to Confucianism and to global philosophy more generally; and central criticisms that it has faced, with sources ranging from more conservative (or even fundamentalist) Confucians to liberals and progressives.

PHIL340 Human Nature

The idea of “human nature” plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL347 Ethics, Ecology, and Moral Change

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.
Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan’s Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

PHIL350 Radical Self-Care
This is a higher-level seminar on philosophy as a way of life that will explore how the notion of self-care has been developed and deployed throughout history by several political theorists and activists, including Mohandas Gandhi, MLK Jr., Nelson Mandela, Audre Lorde, Angela Davis, bell hooks, and Sara Ahmed.

When conducted in the present day, reflection on how one should live naturally requires attending to matters of sociopolitical concern, such as healthcare inequities, environmental degradation, wealth disparities, and prison reform. An investigation into the links between personal and social well-being has so far been something of a lacuna in the field of philosophy as a way of life, though in a variety of formulations and across several traditions, practices of self-care and self-formation have typically been seen as continuous with (and even a prerequisite for) a robust engagement with others and the pursuit of social justice causes. We will explore the connection between these two domains in this course. As a project during the semester, students will be asked to engage in a cause that matters to them by implementing selected ideas from the thinkers and activists that we’ll be studying.

PHIL351 Deconstruction and Politics
Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to so many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

Offering: Host
Grading: A-F

PHIL352 Black Thought and Critical Theory
This course follows Stuart Hall’s insistence in “What is this ‘Black’ in Black Popular Culture?” that the theoretical articulations of “blackness” are always “conjunctural.” We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of “blackness” at specific historical and theoretical conjunctures. How is “blackness” useful for social theory? Must we assume there is a transhistorical identity to “blackness”? In what ways does “blackness” conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

PHIL353 Blackness in the Anthropocene
To deny the “unprecedented” geological impact of humans’ force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this “new era” has afforded us in terms of critical potential. From accusations that what we now call the “Anthropocene” has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the “Anthropocene” are still contested terrains. The aim of this course is to investigate the Anthropocene’s many forms of socio-political erasures and theoretical “blind-sights.” We will examine the ways in which Anthropocenic discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocenean times. We will explore questions like “who are ‘recognizable/legitimate’ victims in environmental disasters,” “do events like hurricane Katrina or the migration crisis teach us anything about our human condition,” and “what is the ‘post’ in post-humanism.” We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

PHIL354 Ecologies of Attention: Biosemiosis, Attunement, and Ethics
We consider variants on biosemiotic accounts of meaning, following one thread through Emerson to Nietzsche, another from Peirce and James to Bateson (Ecology of Mind, 1972) and Gibson (Ecological Approach to Visual Perception, 1979), and a third through contemporary indigenous thinkers and anthropologists attempting to bridge scientific ecology and animist panpsychism—Kimmerer, Whyte, Kohn, Ingold, Strathern. While most of the texts here focus on the nature of meaning as a living process, they are also in constant dialogue with normative concerns, being both motivated by subversive or non-
humanist ecological values and inspiring distinctive insights about how to lead meaningfully connected lives.

PHIL363 Philosophy of Perception
Roughly, perception is the cognitive activity embodied creatures engage in in order to find out things about their environment. In the most basic sense, perception involves conscious awareness of something other than ourselves, which causally depends on sensory organs (our eyes, ears, nose, etc.) being stimulated by something external to our physical body. In this course, we will explore the several different "levels" at which philosophers think about perception and the different questions being asked. At the metaphysical level, the central question is: What kind of "things" do we perceive? What is perceptual awareness of? At the epistemological level, we will deal with the question: can we gain knowledge about the world through perception? Finally, at the psychological level, we will ask: How do the psychological processes--studied by sciences like cognitive science, neuroscience, physiology, etc.--relate to the metaphysical and epistemological questions?

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

PHIL383 Mind, Body, and World
This seminar in the metaphysics of mind and meaning begins with the philosophical and scientific background to cognitivist conceptions of mind and artificial intelligence. Both classic and recent criticisms of cognitivism and early AI emphasize the role of bodily movement and skill, language, social normativity, and engagement with and within the world as integral to conceptualization and understanding. These themes will then be explored constructively in some recent reconceptions of cognition as embodied and social-pragmatic, and of language and other conceptual repertoires as integral to bodily involvement in the world and with one another.

PHIL385 Understanding Life and Mind
Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

PHIL390 Topics in Metaphysics
If I say to you, "It's been a very warm fall," and you reply, "Yeah, I think so too,"
do we not think the same thing? Doesn't this mean that there is a thing that we
both think? This seminar is devoted to the question: is there indeed a thing that
we both think, and, if so, what is it? We start with the view that this thing is a
"thought," which represents the world as being a certain way. We then move to
a contrasting view that the thing is a "proposition," which an entity composed of
items in the world, rather than a representation of the world. We next consider
a view on which the thing is what is common to mental acts that we perform and
express by saying what we said to one another. The next view we'll examine is
that the thing is a "fact" about me and you, which represents a fact about the
world. Finally, we will consider the view that there is no thing at all that we both
think. Throughout our discussions, we will keep in mind something obvious:
sometime what we think is true, and sometimes it is false. In this way, we will see
how the metaphysics of thinking intertwines with the metaphysics of truth and falsity, and thereby also with the metaphysics of reason.

PHED104 Golf
This course is designed to teach the basic information necessary to play and enjoy the game of golf. Each classroom period is spent teaching beginning golfers to play the game correctly from the start: mastering the pre-swing, fundamentals of grip and aim, addressing the ball, and swing technique. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED106 Fitness, Beginning
This course is designed to meet the needs of the individual interested in establishing a self-paced exercise program. The emphasis of this course is on the development of cardiovascular endurance. Individuals are instructed how to determine personal work-load levels and pace themselves during various classroom aerobic activities. Participants also receive additional instruction in strength training. Cardiovascular activities include fast walking, jogging, aerobic exercise, rope jumping, interval training, and rowing ergometer work. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED107 Inner Game of Golf
Golf is traditionally taught with verbal instruction from the teacher to the student. The students in this class will be taught with learning by feel. Through this unique approach, students will learn that their natural swing is already present within themselves and they simply need to allow it to come out. Through various drills and learning techniques, students will also discover that enjoyment of golf comes first, success comes second. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED108 Advanced Olympic Weightlifting and Powerlifting
The focus of the class will be on advanced weight room techniques. Half of the quarter will emphasize the art of Olympic weightlifting, including the clean and jerk and the snatch movements. The other half of the quarter will emphasize the art of powerlifting, including the three power movements—squat, deadlift, and bench press. Safety in these advanced techniques is always prioritized.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED109 Strength Training, Introduction
This course is designed for the individual who is unfamiliar with or has had no experience in programs focusing on building body strength. This course includes an introduction to the strength-training facilities at Wesleyan, proper strength-training techniques, and various elementary training programs. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED110 Strength Training, Advanced
This course is designed to meet the needs of students who are sincerely involved in strength training, body building, and/or competitive lifting. The course will include the use of four weight-lifting machines and instruction in competitive
lifting techniques. There will also be discussion and demonstration of various progressive resistance modes that develop muscular strength and endurance. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED120 Swimming, Beginning
The objective of this course is to equip students with basic water safety skills and knowledge to make them reasonably safe while in, on, or about the water. We will introduce skills designed to improve stamina and basic coordination and to increase individual aquatic abilities. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED121 Swimming, Advanced Beginner
This course is designed to build upon the skills learned in beginning swimming. Emphasis is placed on improving the overhand crawl stroke with rotary breathing. Students will be introduced to the basic skills needed to learn the backstroke and breaststroke. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED122 Swimming for Fitness
This program is designed for the lap swimmer who is interested in learning and applying cardiovascular conditioning and training to swimming. Instruction is given in breathing exercises and pacing techniques. Individual work-load levels are determined, and self-paced programs are centered around those levels. Various training techniques are discussed and used in the program. A course prerequisite is the ability to swim 25 yards (any stroke) continuously and comfortably. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED123 Lifeguard Training
This course is designed to teach potential lifeguards the skills and knowledge needed to prevent and respond to aquatic emergencies. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED124 Squash
This course is geared toward the beginner but may be taken by those who have played some before. Basic grips and strike technique will be taught for the forehand, backhand, serve, and volley. Also covered will be safety precautions, court etiquette, and proper scoring of games and matches. The intermediate player may not get much attention the first two weeks while the beginners learn the basics. The first class of each quarter will meet in the lobby of the Freeman Athletic Center. Students must have their own racket and goggles.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED127 Tabata/Fitness Training
Tabata/fitness training is a program designed to enhance an individual’s competency at all physical tasks. The student will perform exercise elements successfully at multiple, diverse, and randomized physical challenges. Areas of fitness will include cardiovascular endurance, stamina, strength, power, speed, balance, agility, and coordination. The start-stop training design is based on 20-second bursts of high-intensity workout followed by a 10-second rest. Each high-intensity burst/rest is repeated 4–8 times. The course will provide challenging workout programs that provide the health benefits of cardiovascular workouts with high- to moderate-intensity training and/or high- to moderate-intensity interval training. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED130 Skating, Beginning
This introduction course to ice skating will include lectures as well as work on ice and covers all basics of skating. Progress is self-paced. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED133 Interval Training
Interval training involves a series of low- to high-intensity exercise workouts interspersed with rest or relief periods. This course includes a variety of cardio drills and resistance training exercises designed to challenge and improve cardio and muscular strength while maintaining a strong core. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED137 Rowing for Fitness
This course is designed to introduce individuals to the use and benefit of rowing as a lifetime fitness activity. Through the use of the Concept II rowing ergometer, students will be taught proper rowing technique, conditioning, injury prevention, and ways to include rowing as a part of an overall exercise program. No previous rowing experience is necessary. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED138 Indoor Cycling
Indoor cycling, as an organized activity, is a form of exercise with classes focusing on endurance, strength, intervals, high intensity (race days), and recovery that involves using a special stationary exercise bicycle with a weighted flywheel in
PHED139 Running for Fitness
This course is an introduction to the basic principles of a fitness running program. The training program will be individualized for each student based on individual goals. Topics will include proper training techniques, running gear, injury prevention, and stretching. All levels of running welcome. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED140 Racketlon
Racketlon combines tennis, badminton, squash, and table tennis into one sport. It is racketsports' answer to other combination sports such as triathlon or decathlon. Very commonly played in Europe, opponents play each of the sports to 21 points, and the winner is the person with the highest total points. Racketlon is also played in a doubles format where teams of two opponents play against each other. This class will introduce students to each of the four racketsports and how to play them in combination within the sport of racketlon. As a capstone experience, the class will play both a singles and a doubles racketlon. Previous racketsport experience will be valuable in this class, but is not required. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED142 Yoga for Fitness
This yoga class is designed to improve the health, performance, and mental acuity of students interested in improving their level of fitness. The class will blend balance, strength, flexibility, and power in a fitness format. This practical and user-friendly style of yoga is accessible, understandable, and achievable by individuals at any level of fitness. Attendance is required. The first class in each quarter will meet in the lobby of Freeman Athletic Center. This class meets in the second quarter.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED145 Indoor Cycling and Yoga
This is a combination class that warms up your body with some sun salutations, strengthens your lower body with a cycling ride, and then stretches your hard-worked muscles with yoga asanas. Yoga and indoor cycling are natural complements to one another because each exercise has a mental and a physical component and trains your body while developing mind/body awareness. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25

PHED147 Hatha Yoga
This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercises aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered: Warm-up: Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).
Stretching: Standing Separate Leg Stretches - Dandayamana-Bibhaktapada-Paschimothanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit)
Spine Strengthening, Sit Up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit).
Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana (Sanskrit), Blowing in Firm Pose - Kapalbhati in Vajrasana (Sanskrit). Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED152 Outdoor Hiking
Hiking is merely walking on a footpath, whether on a neighborhood path or a more adventurous trail that involves some climbing. Hiking is a moderate cardiovascular activity. Common benefits include weight loss, prevention of osteoporosis, decreased blood pressure, and relief of back pain. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED154 Speed Agility Plyometric Training
Learn to increase your cardio by speed and quickness. Agility training focuses on foot speed, quickly changing direction and improving reaction to visual cues. Plyometrics is an explosive movement to build muscle. The two will be combined to enhance the over all body conditioning. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

PHED155 Pickleball
Pickleball is a paddle sport with combined elements of tennis, badminton, and ping pong, and played on a doubles badminton court. The net is similar to a tennis net, but is two inches lower. The game is played with a hard paddle that is similar to table tennis and usually made up of graphite or composite. The ball is comparable to a whiffle ball.
Radical sustainability explores the intersection of these now-critical challenges—extinction, climate change, and many others—as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is to produce polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

**PHYSICS (PHYS)**

**PHYS105 Calderwood Seminar in Public Writing: Radical Sustainability**
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way.

The game can be played in either singles' or doubles' matches. For new players, the basics of the sport are easy to learn. Typically, one session of three or four games is all that it takes to grasp the basics.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

**PHED159 Cross Training Fitness**
This class will use dynamic warm-up, dynamic flexibility, bodyweight, dumbbells, free weights, kettlebells, interval training, cardio/fun machines, aquatic training, core training, and neuromuscular training in a fun, progressive way so students have a variety of ideas to implement to stay fit for life. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

**PHED170 Sculling**
This course is designed for those students that have completed the introductory Rowing for Fitness course (PHED137). It gives them the opportunity to take these skills to the water and learn a fitness activity that can last a lifetime. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: PHED137

**PHED201 Practicing Mindfulness Techniques During Activity**
This course will provide students with an introduction to mindfulness and teach them mindfulness tools they can use to better self-regulate their emotional states and manage the stress-reaction cycle so many college students find themselves in.

Mindfulness can be brought to any activity. In this course, students will practice different mindfulness techniques through various types of physical activity such as walking meditation, yoga, and time in nature, to name a few. Part lecture, part activity class, students will acquire skills that aid in reducing stress caused by many of life’s major stressors: time, people, sleep, work/academics, roles, food, pain, change, fear, panic, and anxiety.

Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Prereq: None

**PHYS110 Life in the Cell from a Molecule’s Perspective**
What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse.

Writing is a core element of the course.

Identical With: MB&B117
Prereq: None

**PHYS111 Introductory Physics I**
This course, along with PHYS 112 in the spring semester, is an introduction to the fundamental principles of physics. Employing trigonometry and algebra the goal is to provide tools for the quantitative understanding of a wide variety of phenomena, with many examples taken from the life sciences. The lab PHYS 121 is recommended. Since algebra is an important prerequisite for PHYS 111, we strongly recommend that all students take a diagnostic test prior to the start of the course. It can be found at https://www.khanacademy.org/math/algebra/test/subject-challenge?modal=1

Taking this "Course Challenge" will take 30-45 minutes and leave you with a good idea of where your algebra skills might need review. Follow-up guided lessons can be chosen at this website.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Prereq: None
PHYS112 Introductory Physics II
This course is the second of two non-calculus courses covering fundamental principles of physics. The emphasis is on developing a conceptual understanding of the physical processes that govern our universe. Proficiency in elementary algebra, vector algebra, trigonometry, and arithmetic is required. The lab PHYS122 is recommended.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Prereq: PHYS111

PHYS113 General Physics I
This course is the first term of a general physics course with calculus, recommended for students interested in majoring in the sciences. With the focus on Newtonian dynamics, PHYS 113 seeks to develop both conceptual understanding and the ability to use this knowledge to obtain quantitative predictions of how the universe works. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of mechanics. The associated lab, PHYS123, is highly recommended.

PHYS116 General Physics II
This course is the second term of a general physics course with calculus, recommended for students interested in majoring in the sciences. The focus is on the physics of charged particles, including an introduction to the concepts of electric and magnetic fields. Students will develop both conceptual understanding of how charged particles give rise to both electricity and magnetism and the ability to use this knowledge to quantitatively describe the behavior of these particles in a variety of contexts, including electrical devices. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of electricity and magnetism. The associated lab PHYS124 is highly recommended; any student wishing to major in physics should enroll in PHYS124, since it is a requirement for the major.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Prereq: PHYS113

PHYS121 Introductory Physics Laboratory I
This laboratory course provides experience with phenomena discussed in PHYS111 lectures. While this course is not required by the Physics Department, students planning to enter the health professions should be aware that a year of physics with laboratory is usually required for admission. Consult your major advisor if you are in doubt about similar requirements in your field. Each laboratory is limited to 16.
Offering: Host
Grading: Cr/U
Credits: 0.50

Prereq: None

PHYS122 Introductory Physics Laboratory II
This course provides laboratory experiences for students taking PHYS112.
This laboratory course teaches students how to obtain, process, and evaluate data and compare these data with quantitative models of how our world works.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-PHYS
Prereq: None

PHYS123 General Physics Laboratory I
This laboratory course provides experience with phenomena discussed in PHYS113 lecture, integrating calculations with the experiments. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS113. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-PHYS
Prereq: None

PHYS124 General Physics Laboratory II
This laboratory course is designed to be taken in conjunction with PHYS116. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS116. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.
Offering: Host
Grading: Cr/U
Credits: 0.50

Prereq: PHYS113 OR PHYS123

PHYS170 Introduction to Mechanical Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.

Grading: Cr/U
Credits: 1.00
Gen Ed Area: NSM-CIS
Identical With: IDEA170, CIS170
Prereq: None

PHYS170Z Introduction to Design and Engineering
This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.
PHYS207 Introduction to Biophysics
This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.

Offering: Crosslisting
Grading: OPT
Credits: 1.00

Identical With: MB&B207
Prereq: PHYS116

PHYS210 How Things Fail: Mechanics and Materials
This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will require the design, implementation, and performance testing of an optimized structural system model, such as a truss bridge, building, or other structure.

Offering: Crosslisting
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-IDEA
Identical With: IDEA210, CIS210
Prereq: IDEA170 AND (PHYS111 OR PHYS113)

PHYS213 Waves and Oscillations
The properties of periodic motion recur in many areas of physics, including mechanics, quantum physics, and electricity and magnetism. The ubiquity of oscillatory motion in biological and chemical systems, as well as engineering, provides interdisciplinary importance for developing the formal description of periodic motion. We will explore the physical principles and fundamental mathematics related to periodic motions. Topics will include damped and forced harmonic motion, normal modes, the wave equation, Fourier series and integrals, and complex analysis. Principles and techniques developed in this course are central to many subsequent courses, particularly Quantum Mechanics (PHYS214, PHYS315), Classical Dynamics (PHYS313), and Electricity and Magnetism (PHYS324). An important component of this course is to develop the ability to use mathematical software packages to graph expressions, solve equations, and obtain numerical solutions to differential equations.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Prereq: PHYS116

PHYS214 Quantum Mechanics I
This course provides an introduction to wave and matrix mechanics, including wave-particle duality, probability amplitudes and state vectors, eigenvalue problems, and the operator formulation of quantum mechanics.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Prereq: (PHYS213 AND MATH221) OR (PHYS213 AND MATH223)

PHYS215 Special Relativity
This calculus-based half-credit, half-semester introduction to Einstein’s theory of special relativity promotes both a qualitative understanding of the subject and a quantitative problem-solving approach.

Offering: Host
Grading: A-F
Credits: 0.50
Gen Ed Area: NSM-PHYS
Prereq: None

PHYS216 Nonlinear Dynamics and Chaos
The techniques of nonlinear dynamics and chaos have been proven useful for a variety of disciplines, ranging from astrophysics to population dynamics. This course provides an introduction with applications.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-IDEA
Identical With: MB&B207
Prereq: PHYS113 AND PHYS116

PHYS219 Introduction to Contemporary Physics
This course examines the foundations of modern physics, including special relativity, the building blocks of matter, the fundamental interactions and gravity, and recent views of the universe such as entanglement, supersymmetry, strings, and dark matter and dark energy.

Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: NSM-IDEA
Identical With: PHYS113 AND PHYS116

PHYS313 Classical Dynamics
This is a course in classical mechanics at the intermediate level that utilizes problem solving instruction and learning. It approaches Newtonian mechanics from a more advanced point of view and introduces Lagrangian and Hamiltonian dynamics.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PHYS
Identical With: PHYS113
Prereq: (PHYS213 AND MATH221 AND MATH222 AND MATH122)

PHYS315 Quantum Mechanics II
This course will expand the formalism of quantum mechanics to include spin and angular momentum in three dimensions. The quantum theory of identical particles will be developed and applied to multi-electron atoms.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PHYS
Identical With: PHYS115
Prereq: (PHYS214 AND MATH223) OR (PHYS214 AND MATH221)
PHYS316 Thermal and Statistical Physics
Thermodynamics and statistical mechanics are pillars of physics. Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

Prereq: PHYS516 AND PHYS124 AND PHYS213 AND MATH222

PHYS339 Molecular and Cellular Biophysics
This course is an integrated consideration of the biophysics and biophysical chemistry of biological systems from molecules to cells. The objective is to develop a critical sense of the quantitative data currently being obtained from microscopy to spectroscopy, considering both ensemble and single-molecule experiments, and to gain familiarity and facility with interpretation using mathematical and computational models. Biological systems are inherently complex, and some form of modeling is always involved in developing an explanation of how they work. However, these models typically involve only a few basic constructs (simple harmonic motion, ideal fluids, two-state Ising models, random walks, electrostatic interactions, classical dynamics, rate equations, QM energy levels, distribution functions, and network analysis) and only elementary aspects of linear algebra, calculus, differential equations, and statistics. This course deals with how these constructs are integrated in the framework of Boltzmann statistical mechanics to formulate mathematical models of biological phenomena, how these models are validated and refined, and how they are used to form explanations and make testable predictions. Model systems to be considered include the nucleosome, the ribosome, membrane dynamics and ion channels, molecular devices and motors, prototype signal transduction systems, and regulatory processes. This course is suitable for physics and chemistry students who wish to learn about biological applications and for molecular and cellular biology students to develop skills with quantitative physicochemical modes of inquiry applied to the life sciences.

Identical With: CHEM377
Prereq: PHYS316

PHYS395 Structural Biology Laboratory
One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods.

This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

PHYS500 Graduate Pedagogy
The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop BEFORE the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.

Credits: 1.00
Gen Ed Area: None
Prereq: (PHYS213 AND PHYS217 AND PHYS313) OR (PHYS213 AND PHYS217 AND PHYS513)

PHYS5565 Mathematical Physics
Historically, physics and mathematics are closely related. Physics uses powerful tools developed by mathematicians, while physicists, investigating the actually existing universe, provide mathematicians with new concepts and ideas to explore. This way, many mathematical techniques, and even entire areas of mathematics, developed from the need to solve certain real-life problems posed by physical reality. The purpose of this course is to give students an overview of the powerful array of mathematical tools available for the solution of physical problems. Starting with the presentation of tools of complex analysis, we will apply them to the solution of ordinary and partial differential equations. We will encounter Fourier and Laplace transforms and will study the Green’s function method for the solution of bound and scattering problems. We will also look into the elements of Group Theory and apply it to angular momentum in quantum many-body systems.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Prereq: MATH222 AND MATH223 AND PHYS313 AND PHYS315 AND PHYS324

PHYS5566 Electrodynamics
This course covers boundary value problems, Green’s functions, multipoles, fields in dielectric and magnetic media, electromagnetic radiation, and wave guides.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: None
Prereq: PHYS324

PHYS5567 Statistical Mechanics
This course will develop important concepts in statistical physics by examining several applications in detail. The areas covered will include the classical and quantum gases, critical behavior and phase transitions, and elementary transport phenomena.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Prereq: [PHYS316 or PHYS516]

PHYS568 Quantum Mechanics
This course will develop advanced aspects of theory and application of quantum mechanics.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: None
Prereq: [PHYS315 or PHYS515]

PHYS571 Advanced Topics in Atomic and Molecular Physics
This course will introduce classical and quantum collision theory, with special consideration of atomic and molecular collisions.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Prereq: PHYS5315

PHYS572 Advanced Topics in Atomic and Molecular Physics
In this round of Advanced Topics (PHYS 572), fundamentals and applications of low temperature plasmas will be considered. We will investigate theoretical and experimental aspects related to the production and diagnostic of such plasmas. Discussion of a several usages of plasmas—for example, in chemical analysis, material processing, environmental monitoring, or medical applications—will conclude the semester.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Prereq: PHYS5315

PHYS573 Advanced Topics in Condensed Matter
The course will cover advanced topics in condensed-matter physics, with emphasis on current research problems within the department.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Prereq: PHYS5324 OR PHYS524

PHYS574 Advanced Topics in Condensed Matter
The course will cover advanced topics in condensed-matter physics, with emphasis on current research problems within the department. This course may be repeated for credit.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Prereq: PHYS5324 OR PHYS524

PHYS575 Advanced Topics in Theoretical Physics
This graduate course presents advanced topics in theory of relevance for current research in the department. The specific material varies each time the course is taught.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: None
Prereq: PHYS213 AND PHYS214 AND PHYS324

PHYS576 Advanced Topics in Theory
This graduate course will present advanced topics in theory of relevance for current research in the department.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: NSM-PHYS
Prereq: None

PHYS588 Seminar in Atomic and Molecular/Chemical Physics.
Weekly seminars presented jointly with the Chemistry Department under the auspices of the Chemical Physics Program. These informal seminars will be presented by students, faculty, and outside visitors on current research and other topics of interest.
Offering: Host
Grading: Cr/U
Credits: 0.25
Gen Ed Area: None
Identical With: CHEM548
Prereq: None

PORTUGUESE (PORT)

PORT155 Portuguese (Romance Language Speakers) I
This course offers students who have a strong working knowledge of Spanish or another Romance language the opportunity to study Brazilian Portuguese in an accelerated format. This course is conducted entirely in Portuguese. Completion of both semesters is required for study abroad in Brazil.
Offering: Host
Grading: Amp Graded
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: FREN112 OR ITAL112 OR SPAN112

PORT156 Portuguese (Romance Language Speakers) II
This course is the continuation of a yearlong course in intensive Portuguese. The second semester will concentrate on mastery of grammar points, with increasing attention to readings, writing, and cultural topics. Music, poetry, short stories, Internet resources, video, and journalism are integrated with the textbook.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: PORT155 or LANG155

PSYCHOLOGY (PSYC)

PSYC105 Foundations of Contemporary Psychology
This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for
upper-level courses in psychology and as a valuable contribution to students’ liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None

PSYC105F Foundations of Contemporary Psychology (FYS)
This course will introduce the field of psychology through digital projects that includef data collection and analysis, video production/editing, graphic design, and script writing. Students will learn about contributions of the brain to our behavior, sensation and perception, emotions, development, learning, mental health, memory, our social world, and more.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC105Z Foundations of Contemporary Psychology (FYS)
This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. Prereq: None

PSYC113F What is “Typical?” Diversity in Human Development (FYS)
Much of psychological research aims to describe & understand human behavior by studying how typical people think or act in typical circumstances. However, quite a lot can be learned by looking beyond the average and examining the variability of human behaviors, experiences, and abilities. This First Year Seminar will explore the ways that atypical development, neurodivergent minds, and non-normative populations can broaden our understanding of human development. Students will develop academic writing skills while critically engaging with psychological research.

PSYC114F Race in Everyday Space: The Psychological Impacts of Racism (FYS)
"We are all products of a racialized society, and it affects everything we bring to our interactions" (Oluo, 2018, p. 15). This seminar uses psychological theory and research as well as interdisciplinary scholarship (e.g., ethnic studies, history, sociology) to critically unpack this statement. Through the semester we examine the nature and experience of racially marginalized communities in the United States, and engage in critical analysis of the ways in which systems of power affect the everyday lives of racially marginalized communities. As a First Year Seminar, this course will emphasize the continued development of written and verbal communication skills.

Prereq: None

PSYC115F Your Brain on College: Applying Neuroscience to College Life (FYS)
This course introduces first-year students to reading, writing, and discussing research in neuroscience. We will cover topics related to how the brain perceives and changes in response to experiences that are common in college or university, including building friendships, learning new information, time management, and coping with stress. Students will be encouraged to apply research to their own experiences through several short writing reflections. Students will also develop an APA-style literature review over the course of the semester.

Prereq: None

PSYC115F Psychoanalysis Then and Now: From Freud to Psychosocial Studies (FYS)
Psychoanalysis appears to be little more than an anachronism within the context of modern Psychology, and yet it nonetheless is leading a surprising afterlife—
PSYC116F How our Bodies and Minds Shape our Social and Physical Lives
Over the past few decades, psychology has embarked on a serious journey to understand how our minds influence our bodies in ways that are important for our health. However, alongside this journey runs another, equally fascinating one, exploring how our bodies can influence our minds in ways that are important for our social lives. Throughout this course we will examine key insights from both these perspectives. First, we will investigate how the ways in which we think and feel can influence physiological processes that shape our health. Then, we will take a look at how our physiological states can shape our minds by influencing how we think and feel, and the judgments that we form about ourselves and others. We will explore these topics by taking a critical look at some of the most provocative and, at times, controversial methods, ideas, and findings that have emerged from this field of scientific inquiry. This course will involve lecture, readings, visual media, and in-class discussion.

Prereq: None

PSYC117F Psychological Science and the Good Life (FYS)
How can we use psychological science to help improve our coping, resilience, and well-being? We are in an intense period of adjustment - historical change in how society functions, a recent shift to a world with Covid-19, and, for you, the transition to Wesleyan and college. Fortunately, psychological science has given us many helpful research findings about how the mind and brain work, how to improve well-being, and how to change our own behaviors and mindsets for a better life. In this course, we will learn about the scientific findings that point us toward well-being, and we will practice the skills that are supported by such evidence. The aim of the course is to leave with a better understanding of psychological science, a toolkit of research-supported practices we can use in our everyday lives, and a supportive community.

Prereq: None

PSYC138F Masculinities (FYS)
This course offers an interdisciplinary approach to the study of masculinities, focusing on the difficulty of disentangling the (social-) scientific questions of what men are and how they come to be that way from the interpretive question of what masculinity means. We will survey a range of perspectives from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, anthropology, feminist studies, and queer theory that describe and attempt to account for masculinities. In order to understand how these scholarly accounts might fit together to form a more comprehensive interpretive framework, we will also be engaging in critical analysis of examples from contemporary television and film that will help us to understand the role that representation plays in our cultural constrictions of masculinity.
Offering: Crosslisting
Grading: Cr/U

PSYC200 Statistics: An Activity-Based Approach
This course will introduce the concepts and methods used in the analysis of quantitative data in the behavioral and life sciences. The approach will emphasize activity-based learning. Lectures will be used for the initial presentation and wrap-up of topics, but most class time will be devoted to activities in which students perform analyses. The topics covered will include descriptive statistics, sampling distributions, estimation, hypothesis testing, analysis of variance, and regression.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: PSYC105

PSYC201 Psychological Statistics
This course provides a general introduction to the use of statistics in everyday life and in psychological research. Special emphasis will be placed upon the development of critical thinking skills for evaluating the validity of statistically-based claims found in the media and in published research. In addition, the course will focus on the practical application of statistics and the logical connection between various analytic techniques. Both descriptive and inferential statistics will be discussed, and students will learn to clean and analyze data using Microsoft Excel and specialized statistical software (e.g., SPSS and/or R).
Offering: Host
Grading: Cr/U
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: PSYC105 OR PSYC101

PSYC202 Qualitative Research Methods in Psychology
The goal of the course is to introduce students to basic research strategies for investigating human thought and behavior, with a focus on qualitative methods. The course provides detailed introduction to different qualitative methods, including interview, observation, case study, content analysis, archival, life history, and narrative techniques. Attention is given to the framing of research questions, design of studies, the ethics of psychological research with humans, and assumptions about human nature. The course is problem- and project-based, providing hands-on research experience.

Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC204 Methods of Interpretation
Projects incorporating issues of race, gender, and class will be the focus of this methods course. Feminist, phenomenological, experiential, textual, and ecological methods of interpreting gender, race, and class in multimedia formats will be explored.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC261

PSYC205 Research Methods in Psychopathology
How do psychological researchers study unusual and distressing human experiences? This combined laboratory and lecture/discussion course provides an introduction to methods used in the study of clinical and subclinical phenomena. With an emphasis on methodological pluralism in the ‘psy’ disciplines, the course covers both quantitative and qualitative approaches, exploring the intersections between diverse modes of inquiry. Throughout the semester, students conduct a team research project on a psychological topic of the group’s choosing, proceeding through each stage of the research process. Along the way, we consider the historical context of psychological science, as well as contemporary debates about the nature of psychopathology. We also think critically about the relationship between research methods and the topic(s) under investigation, asking questions such as: Why do psychologists use the methods that they use? How is research in psychology different from research in the other sciences and humanities?
PSYC206 Research Methods in Cognitive Development and Education
This course introduces students to translational research in psychology—research that draws on psychological science to inform practice. The first third of the course will cover basic research methods, fulfilling the requirement for the major and preparing students to critically read, interpret, and engage in research. Then, we will investigate a series of case studies in which people have attempted to take basic research in developmental science and apply it to education settings. Example research-based interventions we might choose to study include mindfulness, growth mindset, early numeracy, reading instruction, teacher development, and anti-bias education. We will ask questions like: Which aspects of the research did the interventions account for, and which aspects were set aside? What are the factors that facilitate or block the use of research in practice? How are research-based interventions evaluated, and how do the outcomes of those evaluations affect our interpretations of the original research findings? What tradeoffs are made when putting research findings into the real world? How do seemingly small details about how interventions are designed and implemented affect the research-practice interface? Through our discussions, we will cover some core topics located at the bridge between research and practice such as practitioner expertise, science communication, participatory action research, educational design, and implementation science.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC207 Research Methods in Developmental Psychology
The goal of this course is to introduce students to basic research strategies and methods, with a focus on those pertinent to developmental psychology. Course materials will focus on conceptual, design, and analytic issues. This course is designed to provide students with the knowledge, skills, and understanding to conduct and evaluate research. In the service of these goals, students will participate in lectures, readings, discussions, and hands-on projects.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC208 Research Methods on Emotion
This course will focus on methods and techniques to study emotions in their social context, including emotional narratives, interviews, experiments with emotional stimuli (e.g., mood induction), surveys, and daily diaries. We will investigate which methods and techniques are best suited to study various positive and negative emotions. The course will give special attention to ethical issues in emotion research.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC214 Research Methods in Sleep Research
Have you ever read an empirical research article and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting findings when researchers test the same phenomenon?
This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. This is an interactive lecture and lab-based course. Through a series of hands-on lab assignments, students will acquire the necessary skill set to be able to critique, analyze, and design psychological research. Students will explore both qualitative and quantitative methodological designs used in psychological research (e.g., experiments, interviews, and surveys). Additionally, students will gain skills in conducting basic statistical analyses (e.g., correlation, t-test, ANOVA). The course will culminate with a final project in which students will design an original research study.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC215 Research Methods: Behavioral Methods in Animal Research
This is a research methods course that provides an understanding of the different approaches to animal research, particularly those using rodent models. It provides students with an understanding of the different techniques employed by researchers and the questions they address. This course provides students with HANDS-ON EXPERIENCE WITH ANIMAL RESEARCH USING RODENT MODELS. Students will learn how to handle and inject rats and will also get a sense of how to design a behavioral experiment, including the use of control groups and counterbalancing. The course will follow a lecture/discussion/lab format where students will learn about different forms of conditioning (operant/classical) and how these apply to various behavioral tasks such as operant responding, autoshaping, decision-making, locomotion testing, etc. (see readings for more examples). One class each week will take place in the lab to provide students with hands-on experience with rats and the testing apparatuses. Students will be assigned a rat for the semester that they will use to collect and analyze data during lab classes. This will be combined with regular class discussion of research articles dealing with each topic, including some of the earlier reports and more recent applications. The focus of the course will be on trying to prepare students to design and carry out behavioral/animal research in a laboratory setting.

Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

PSYC216 Research Methods in Diversity Science
This course introduces students to the research methods important to conducting scientific inquiry into topics related to inequality, oppression, and disparities in life outcomes across a broad range of experiences of marginalization (e.g., gender, race, sexuality, and the experiences at the intersections of these domains). In the process of introducing research methods pertinent to diversity science, we also discuss foundational and contemporary research in diversity science.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105 AND (PSYC200 OR PSYC201 OR QAC201 OR QAC300 OR MATH132)

PSYC220 Cognitive Psychology
Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B220
Prereq: PSYC105

PSYC222 Sensation and Perception
This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena.

PSYC225 Cognitive Neuroscience
This course provides an introduction to cognitive neuroscience—the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders.

Offering: Host

Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B225
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

PSYC226 Psychological Theories of Learning and Motivation
The goals of this course are to help students develop practical, evidence-based skills for effective classroom learning, understand and appreciate research on the neuroscience of learning and motivation across species, and apply theories of learning and motivation to understanding human behavior. Course objectives for
achieving these goals include: implementing evidence-based practices; dispelling myths about learning; explaining mechanisms of memory consolidation and factors that modulate it; distinguishing between and identifying components of operant and classical conditioning; and explaining how each theory of motivation can be used to understand why people behave in certain ways.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B238
Prereq: PSYC105 OR NS&B213

PSYC227 Motivation and Reward
This course will focus on motivation and reward, providing students with a background in and understanding of the various theories and approaches to studying the topic of motivation, including an introduction to some of the history and the current advances in the field. The course uses animal and human research to try to unravel the brain areas and neurotransmitter systems involved in different forms of reward, including food, sex, and drugs, and examine cases of disordered motivation such as drug addiction, obesity, and disordered gambling.

Offering: Crosslisting
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-NSB
Identical With: NS&B227
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

PSYC228 Clinical Neuropsychology
This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B228
Prereq: PSYC105 OR [NS&B213 or BIOL213 or PSYC240]

PSYC230 Developmental Psychology
This course is an introduction to human behavior and psychological development focusing on infancy and childhood. We will examine theory and research about physical, social, emotional, language, brain and cognitive development, with emphasis on cognitive development.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC230Z Developmental Psychology
Please note: readings and assignments will be due during winter break, prior to arriving on campus for Winter Session. Please visit the Winter Session website for the full syllabus -- http://www.wesleyan.edu/wintersession.

In this two-week, full-credit course, students will learn how children develop across different domains -- physical, cognitive, language, social-emotional, identity, personality. We will emphasize the primary research literature in developmental science and expose students to the fundamental methods and theories used to study how children develop. In the process, we will learn to appreciate the beauty and detail of human development, as well as the ingenuity of research in the field over the last several decades.

Please note that the course is broken up into two chunks with a week-long break in the middle. Students will have a writing assignment to work on during the break.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None

PSYC239 Functional Anatomy of the Human Brain
The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: Crosslisting
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-BIOL
Identical With: NS&B239, BIOL239
Prereq: [NS&B213 or BIOL213 or PSYC240]

PSYC240 Behavioral Neurobiology
This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

Offering: Crosslisting
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-NSB
Identical With: NS&B213, BIOL213
Prereq: None

PSYC245 Psychological Measurement
This course will discuss various approaches to the measurement of psychological constructs such as intelligence and personality. Topics covered will include
ability tests (e.g., IQ tests), achievement tests (e.g., classroom assessments), and diagnostic clinical assessments (e.g., the draw-a-person test). Strengths and weaknesses associated with various methods of measurement (e.g., self-report vs. performance measures) will also be discussed. Special attention will be given to the criteria used to critically evaluate the psychometric quality of measurement instruments. Students will learn the steps necessary to develop psychometrically sound, practically useful, and legally defensible tests.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None

PSYC246 Behavior Change, Clinical Interventions and Health Promotion
This class will review the current science and historical context of mental and physical health behavior change approaches across three levels of intervention: the self, the individual, and society. Major topics will include fundamental behavioral principles, basic elements of empirically supported individual treatments (e.g., cognitive behavioral therapies, interpersonal therapy), and the design and evaluation of population-level health interventions. Lectures, readings, and clinical examples will illustrate both the theory and step-by-step practice of evidence-based approaches to behavior change across levels. Assignments may include a self-monitoring exercise, in-class role plays, a group project, an exam, and brief writing assignments. This course is designed to introduce students to a broad range of contemporary approaches to psychological and behavioral treatments; however, it will not provide the skills needed to implement psychological interventions.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC248 Adolescence and Emerging Adulthood
This class takes a global, cultural perspective to the study of human development during adolescence (ages 10–18 years) and emerging adulthood (ages 18–25 years). Students will gain a deeper understanding of key aspects of psychosocial functioning during these two developmental age periods. The course approaches adolescence and emerging adulthood as periods of both opportunity and vulnerability. Topics include cognitive development, love and sexuality, media, peer relationships, and risk and resilience. Class activities and assignments provide opportunities for students to actively engage with the material presented and discussed in class. Students also will have the opportunity to participate in a cross-cultural experience, culminating in a class documentary on a selected topic related to adolescent and emerging adulthood development.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC249 Psychology of Sexual and Gender Diversity
There is a wide range of variability in sexuality and gender. This course reviews psychological research on the experiences of people with various sexualities, gender identities, and gender expressions, as well as how people come to develop beliefs about sexuality and gender.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC250 Personality
What does personality mean? Can you measure it? Who studies it and why? This course is designed to give a deeper understanding of these questions that psychologists interested in personality study, how they study these in a scientific manner, and how they use this knowledge to help others.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC251 Psychopathology
This course provides an overview of psychopathology, the study of “abnormal” behavior or mental disorders. From various theoretical perspectives, the ways that abnormality is defined will be considered. You will learn what we know and don’t know about the phenomenology, diagnosis, and causes of mental disorders. Major domains of psychopathology, the symptoms and behaviors associated with common mental disorders, and the mechanisms hypothesized to be involved with them will be covered. The ways that different paradigms steer the development and implementation of treatments will be examined. This course is not designed to help resolve personal experiences with mental illness. This class will challenge widely accepted ideas about mental illness. You will learn to think critically about how mental illness is understood by society, mental health professionals, and clinical researchers.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: PSYC105

PSYC253 Educational Psychology
This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate.

Gen Ed Area: SBS-PSYC
Identical With: EDST253
Prereq: None

PSYC259 Discovering the Person
This course surveys major developments in psychology and psychiatry from 1860 to the present. Through readings and lectures, the course introduces the major schools, theories, and systems in the American “psy” sciences. We examine the kinds of persons who were “discovered,” the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine phenomena that were located, catalogued, and explained by these sciences, including rationality, gender, cognition, personality, race, emotion, psychiatric disorders, development, intelligence, and the will. Attention is given to the scientific grounds of investigations and the empirical evidence sought in the century-long process of discovering and naming psychological kinds. Readings include primary source documents, histories, and philosophical analyses.
PSYC260 Social Psychology
What leads us to become attracted to one person rather than another? How does prejudice develop, and how can it be reduced? Can psychological research help protect the environment and, if so, how? This course offers an overview of classic and contemporary social psychology, covering topics such as group behavior, friendship, stereotyping, conformity, obedience, and conflict resolution.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Identical With: AMST259, SISP259
Prereq: PSYC105

PSYC261 Cultural Psychology
Through essays, novels, videos, and film, we will explore the intersection of culture, ideology, and psychology. We will examine how gender, ethnicity, and class are interwoven in the social fabric and individual identity. Employing feminist, psychoanalytic, and deconstructive interpretive methods, we will try to decipher the many ways we inscribe ourselves in culture.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None

PSYC262 Cultural Perspectives on Mental Health
The study of mental health/illness is increasingly recognized as conditioned by a wide range of interconnected cultural and social factors that profoundly influence subjective experiences. This course seeks to understand the cultural, social, structural, and environmental determinants of mental health, with particular emphasis on cultural and social diversity in a North American context. Some major questions that will be considered are: How do different cultures view mental health and illness? Why do some ethnic groups readily accept mental health care while others generally avoid the psychiatrist or psychologist at all costs? How does bicultural or multicultural identity and minority status affect one’s psychological development? How do continuing social disparities related to race, gender, sexual orientation, and social class impact one’s mental health and well-being? What is the impact of social media use on mental health? Readings will draw from the growing body of research literature, and examples from popular arts and media will be incorporated as supplemental material for class discussion. Students will review current treatments and participate in class discussions. Students of all backgrounds will be encouraged to explore mental health and illness with a broadened cultural and critical perspective.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None

PSYC265 Culture in Psychology: An Introduction to Theory and Research
Culture is central to the study of mind and behavior. This course will provide students with an introduction to theory and research on culture in psychology. We will discuss what culture is, the methods that psychologists use to study culture, and how much of our behavior is universal or culture-specific. We will explore how culture influences how we think, feel, and behave.

Offering: Host
Grading: OPT

PSYC266 Psychology of Communities: Identity, Activism, and Social Engagement
This course serves as an introduction to community psychology. Students will read about, research, and discuss major topics in the field, including the ecological framework, diversity paradigms, social change, and empowerment.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC267 Global Mental Health
During the past half-century, mental health professionals have increasingly explored the international reach and cross-cultural relevance of their work. Practitioners have traveled from country to country in order to work with local populations, including those experiencing traumatic circumstances such as war and natural disasters. Professional organizations such as the American Psychological Association have developed guidelines and recommendations for multicultural competence. Researchers have investigated the cross-cultural epidemiology and expression of mental health challenges; for example, according to the World Health Organization, one in four people across the globe will experience a mental disorder at some point in their lives.

What does it mean to establish the global prevalence of mental disorders? Is psychological distress, including the distress that results from traumatic exposure, experienced and interpreted in the same way in all cultural contexts? While some scholars have argued that mental disorders are a global epidemic requiring a uniform, universal response, others have suggested that the exportation of psychological discourse and approaches from Western countries has eclipsed local expressions of distress and indigenous healing traditions. This course will explore these questions and controversies using the tools and frameworks of multicultural psychology. We will place particular emphasis on the social, cultural, structural, and environmental determinants of mental health. We will address mental health disparities between high- and low-income countries, as well as the meanings of psychiatric explanatory models in advantaged and disadvantaged communities. Populations of focus will include migrants, refugees, internally displaced persons, and the urban homeless. Throughout the course, we will explore the growing research in the field of indigenous psychology, which promotes local knowledge, as well as the structural competency movement, which emphasizes the socio-institutional origins of health disparities.

PSYC271 Life-Span Development
This course summarizes classic and current theory and research on human development, highlighting the life-span perspective on development and the interacting contributions of biology and environment. Commonalities and differences among ethnic groups and cultures are considered, as are the broader social contexts within which individuals develop. Implications for educational practices and social policy are also discussed.

PSYC277 Psychology and the Law
This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as the psychological implications of the death penalty, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature.

PSYC280Z Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

PSYC288Z Zero to Infinity: The Psychology of Numbers
What are the origins of mathematical thinking, and why do some people become experts while others get nervous calculating a tip? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their intuitive understanding of numbers, geometry, and space to successfully navigate their environments. Yet, individual differences in math achievement emerge early in development and often
indigenous psychology, and including models for systemic change found in social approach, while utilizing concepts of flourishing through suffering found in free from the binary concepts of "positive" and "negative" in favor of a dialectic harmony and compassion. More recently, the field has been redefined through later broadened its focus to include traditionally Eastern concepts such as social While former work used a narrow, Western definition of happiness, the discipline offering evidence of the fundamental components of well-being and flourishing. Students will be exposed to theoretical and empirical work evaluating several prominent hypotheses about language and thought, including the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

This course provides a close examination on the relationship between language and thought, a central question in cognitive science and a very active area of research and theory in recent years. Students will be exposed to theoretical and empirical work evaluating several prominent hypotheses about language and thought, including the hypothesis that the language you speak influences or even determines the thoughts you can think. The case studies to be evaluated will include object kinds, number, spatial relations, time, gender, theory of mind, and causality.

This course will trace the history and development of positive psychology from its inception to the current state of the field, using a positive psychology text supplemented by journal articles. Core concepts will be discussed and critiqued. It will require students to keep "flourishing Journal" and complete out-of-class activities for personal reflection upon and practice of individual experiences of happiness. Additional course requirements include shorter and longer reflection papers, in-class discussion, and a final project.

Humans typically develop their view of themselves, or their self-concept, through interactions with others in their community. For adolescents, this takes place typically within school environments and other community institutions as they begin to rely less on their parents. With the dawn of social media, these interactions are taking place on a global scale with increased anonymity. How does this social and technological change impact how teens and young adults form their views of themselves? What implications do these changes have for adults who work with adolescent populations? This course will explore these questions, illuminating an understanding of the accepted model of self-concept development and the impacts of social media. Students will also explore related concepts of self-esteem and social development. This course will use empirical research to examine and critique the overall negative view of social media usage amongst adolescents, and train students to probe commonly accepted viewpoints using careful scholarship. The course will provide a discussion of research standards in the field of social media research and encourage critical evaluation of empirical research.

This course will trace the history and development of positive psychology from its inception to the current state of the field, using a positive psychology text supplemented by journal articles. Core concepts will be discussed and critiqued. It will require students to keep "flourishing Journal" and complete out-of-class activities for personal reflection upon and practice of individual experiences of happiness. Additional course requirements include shorter and longer reflection papers, in-class discussion, and a final project.

Prereq: None

What does it mean to conduct "antiracist" studies that "decenter whiteness"? What investigative practices are warranted and what scientific foundations are necessary for doing innovative, antiracist research? This course takes up these questions, grounding exploration of scientific practices in a fuller understanding of psychology's history and epistemology. We examine past practices that fostered and sustained racist beliefs, consider race theories, and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These and related concepts along with historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science.

How do humans develop the capacity to learn? This course will focus on the dynamic influence of the cognitive, social emotional, and demographic factors involved in this process, using a research-based framework. Students will be encouraged to evaluate the learning process throughout K-12 educational settings and will explicitly learn to read and critique research in the learning sciences. Students will also evaluate the utility of research in different learning settings and the effectiveness of associated pedagogical tools and strategies.

This course will trace the history and development of positive psychology from its inception to the current state of the field, using a positive psychology text supplemented by journal articles. Core concepts will be discussed and critiqued. PSYC311 Children’s Learning from Media
Children are surrounded by media that aim to teach them, from television shows that introduce Spanish, to books that promote kindness, to apps that explain the biological world. How do children learn from the wide range of educational media they encounter? In what ways do media set the stage for children's expectations about the world? And does our modern, digital era suggest a shift in children’s education? In this course, we will explore theoretical questions and empirical research to better understand how children learn from media and how different forms of media affect cognition and behavior. We will focus primarily on infancy and early childhood as periods of tremendous growth and increasing exposure to media, but will also discuss media use during middle childhood and adolescence. We will consider topics that have been well-studied and important questions that remain unanswered in the field. We will also turn a critical eye to the historical lack of representation (i.e., race, gender, disability, sexual orientation, family structure, etc.) in children’s media and discuss necessary changes. Throughout the course, we will engage critically with empirical research, develop ideas for testing unanswered questions, and practice communicating about research to the public.

PSYC312 Family Transitions Across the Life Span
This seminar aims to provide an overview of normative and non-normative family transitions from adolescence through adulthood. Grounded in a life-course perspective, this course examines theories and recent findings related to family transitions. Topics include "modern" dating, relationship formation and dissolution, staying single, parenthood and remaining "child-free," family structure changes such as marriage, divorce, remarriage, and widowhood, as well as grandparenting, empty nesting (and refilling), and the "sandwich generation.” From this course, students will learn developmental theories related to transitions across the life course, and be able to critically analyze recent research on family transitions.

Prereq: None

PSYC313 Psychology of Power, Status, & Inequality
Differences in power and status can be found in almost every society around the world. This course will provide an introduction to power and status by focusing on the theories and methods that contemporary psychologists use to understand these fundamental aspects of social life. First, we will explore who is more likely to gain power and status (e.g., personality characteristics of powerholders); the methods that people use to do so (e.g., asserting one’s dominance or expertise); and the influence of power and status on basic psychological processes, such as attention, emotion, and perception. The second part of the course will review the potential consequences of power and status on various aspects of our lives, from decision-making and goal pursuit to interpersonal and intergroup relationships, as well as health and well-being. Throughout the course we will discuss not only how power and status dynamics give rise to inequality, but also how their effects may, in turn, be shaped by the degree of inequality in a given society. The course will involve lecture, discussion, and readings of relevant primary sources.

PSYC316Z Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives
The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

PSYC317 Seminar in Adoption & Culture
This seminar uses psychology theory and research, as well as interdisciplinary scholarship from across the social sciences and humanities, to critically examine
PSYC 318 Culture and Subjectivity

This is a course about neoliberal culture, its distinctive social and psychological characteristics, and possible alternative conceptions of the social and forms of subjectivity in the 21st century. Neoliberalism is a contested signifier that designates both an economic program and a cascade of cultural changes that began coalescing and accelerating in the early 1980’s and has continued to exert an influence that has only recently been challenged by the resurgence of nationalism ushered in by the Trump era which has reverberated across the globe. Over the course of its development, neoliberalism has had widespread ramifications not only as an economic doctrine that spurred and intensified globalization but also as a cultural ideology that has influenced self-concept and modes of social relating. This course focuses on the concept of human subjectivity and how subjectivity appears within a neoliberal horizon. The critical psychologist Thomas Teo states, “society, culture, and history provide forms (molds) of subjectivity, whereby (developing) individuals have the agency to sometimes choose, expand or change forms, and in rare circumstances, they may even be able to transcend these forms. Under normal circumstances, however, humans adapt, (ful)fill, and actively ‘suture’ into these forms, allowing for variations and new actualizations.” To elucidate the current cultural molds informing neoliberal subjectivity, the historical development of neoliberal economic doctrine and its implementations will be studied, followed by an examination of neoliberal cultural products (e.g. Serial TV and Social Media) considering both their content and form. Finally, recent reactionary phenomena will be considered in relation to the effects of neoliberalism as well as what social and subjective alternatives exist within our current indeterminate conjuncture.

PSYC 322 Psychology of Decision-Making
We make decisions all the time. The vast majority of decisions have little consequence, though some are monumental and can deeply affect our lives. The broad goal of this course is to explore the science of judgment and decision-making. We will leverage concepts and research from the fields of psychology, neuroscience, and economics to understand how an individual makes judgments and decisions, why these decisions are subject to bias, and whether humans are "rational" decision-makers. Along the way, we will examine major questions that have guided decision research, consider domains where decision-making could be improved, and think of practical applications of course concepts to everyday life. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite (plus any courses listed under individual sections), as this is an upper-level course (that relies on student contributions) in the Psychology Department.

Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC 261

PSYC 325 Healthy Places: Practice, Policy, and Population Health
The built environment influences many aspects of health and well-being: psychological stressors (crime, noise, and violence), what people eat, the water they drink, the air they breathe, where (or if) they work, the housing that shelters them, where they go for health care, what social networks are available for support, and how political power is distributed and public resources allocated. How cities, suburbs, and rural areas are managed; local policy; and planning and design decisions can all help determine whether the places we live will be threats to public health and, perhaps more important, to an aging society. The focus of this course connects the fields of planning, psychology, and public health to explore contemporary challenges (and innovations) in the 21st-century built environment. Students will explore the multiple forces that impact population health, how to analyze these determinants, and what roles planning and public health agencies, as well as other institutions such as local governments, civil society, the private sector, and communities themselves, can play in research and action aimed at improving physical and mental health.

Prereq: None

PSYC 328 Current Research in Early Childhood
Early childhood is widely seen as a time when the environment exerts particularly strong influences on individuals, with large effects on children’s risk or resilience for healthy developmental outcomes. Research in this area provides a way to consider and evaluate claims about this developmental period. What knowledge does society need about this period to promote healthy development for all children? Where do children learn social skills? Why do children play with some toys but not others? How does timing affect the impact of early interventions? What foundational skills help all children learn to read? By what mechanisms does economic poverty affect development?

This advanced seminar will explore current research in early childhood. We will focus on the period from birth to five years, drawing on empirical work in developmental psychology, cognitive science, and education to discuss major topics and debates. These include cognitive and academic foundations for later schooling; emotional development and social skills; social identity and sense of self; self-regulation and executive functions; play; adverse factors in development; risk, resilience, and vulnerability; culture, socioeconomic status, and poverty; developmental neuroscience; early childhood education; and public policy. Guest visits by experts in some of the areas will complement our readings and discussions.

PSYC330 Engaging Antiracist Psychological Science: From History and Theory to Practice

Responding to calls for antiracist psychological science, this seminar explores what it means to design and conduct that science. What does it mean to conduct "antiracist" studies that "decenter whiteness"? The exploration of scientific practices is grounded in gaining a fuller understanding of psychology's history, epistemology, research practices, and influence on social policy. Upon surveying past practices that fostered and sustained racist beliefs, we examine race theories and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science. The course incorporates lab activities, 6 papers, and a final project that engages a key concept or practice of antiracist psychology.

Offering: Host
Grading: A-F
Credits: 1.00

Prereq: PSYC105

PSYC332 Seminar in Cognitive Neuroscience

This seminar is an in-depth analysis of the ways that scientists study the neural basis of cognition in humans. Topics to be covered include the representation of visual categories, the neural influence of attention, episodic memory, theories of spatial cognition, and decision-making. Through reading and discussion of primary research articles, we will evaluate the methods and theoretical debates in each domain, while recognizing and integrating common themes that link across the field. Students will also learn how to work with simple computer models and simulations (using Python), in order to gain a strong foundation in the computational principles that underlie recent advances in the field of cognitive neuroscience.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC334 Seminar in Social Neuroscience

One of the most complex functions we (and other animals) exhibit is the ability to interact with other members of our species. Social behavior, in turn, depends on processes at scales ranging from the entire nervous system down to the effects of individual hormones and genes. This course will examine phenomena such as facial processing, attributions of agency and mental states, aggression, dominance, social isolation, in-group/out-group identification, and group decision-making.

To understand these concepts, we will discuss experimental findings that employ a variety of methods, ranging from behavioral studies to physiological assays, but with particular emphasis on methods from cognitive neuroscience. As we discuss primary research in the field, students will not only gain insight into the specific social behaviors covered, but a broader understanding of research approaches in psychology and neuroscience. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite.

PSYC338 Masculinities

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105 OR [FGSS209 or ENGL208]

PSYC339 Psychology of Human Sexuality

This course introduces the psychology of human sexuality in its evolutionary, physiological, reproductive, and social contexts. We’ll explore various psychological theories of human sexuality, as well as sexual motivations, sexual anatomy, sexual response, sexual pleasure, gender and gender identity, sexual orientation, sexual behavior, sexuality across the life span, safe sex, and consent.

In addition, this course covers contemporary issues that may arise each week, such as sex education, gender diversity, and sexual orientation. For example, National Coming Out Day is during October, and the benefits and drawbacks of self-disclosure will be discussed using excerpts from the podcast SexEd Debunked, which details a personal coming out story. In light of the current political climate, it is anticipated that politically sensitive topics may be discussed in class to sort out myths from evidence supported by scientific research.

The course emphasizes current research in psychology, sexology, and sociology and will be inclusive across cultures, races, ethnic groups, gender, sexual
orientation, and relationship orientation. This course is also intended to be responsive to student questions and to provide a space for discussions in a non-judgment, inclusive, and accepting environment.

**PSYC340 Seminar on Migration and Child Development**

How do the current politics of borders and citizenship impact the well-being of migrant children, youth, and families? How do U.S. immigration policies intersect with what research tells us about what children need to thrive? Is there a role for psychologists to inform today’s discourse on immigration policy? These are a few of the questions that we will be exploring throughout our time in this class.

Through class readings, discussions, and course assignments, we will examine why and under what circumstances children and families migrate to the United States. We will explore how various parts of the migration experience relate to child and adolescent development. Together we will analyze contemporary immigration policies through the lens of developmental psychology. Students will learn to grapple with the opportunities and limitations of developmental science to inform immigration policies that matter for the day-to-day lives of immigrant children and families.

**PSYC343 Sleep and Psychosocial Functioning in Youth**

Have you ever wondered whether it’s worthwhile to pull an all-nighter in hopes of improving your grades on an exam the next day? Have you ever noticed that you snack more when you’re having trouble sleeping? And why is it that you often perform better on an exam the next day? Have you ever noticed that you snack more when you’re having trouble sleeping? And why is it that you often perform better on an exam the next day? These are a few of the questions that we will be exploring throughout our time in this class.

The focus of this course is on the fascinating world of sleep and psychosocial functioning. We will briefly explore the architecture of sleep and analyze theoretical explanations for the functions of sleep. The bulk of the course will focus on examining predictors and consequences of (“normal”) sleep in relation to various aspects of psychosocial functioning, including mental health, interpersonal relationships, technology use, cognitive functioning, and chronotype. We will examine these associations specifically within the context of late childhood, adolescence, and emerging adulthood. As part of this course, you will have the opportunity to track your own sleep via an objective sleep monitor and keep a sleep diary for part of the course.

Offering: Host

Prereq: PSYC105

**PSYC347 Science of Suicide Risk & Prevention**

This course will explore the science of suicide research, prevention, and intervention. Topics will include terminology, epidemiology, historical and contemporary theories of suicide, ethical and methodological challenges to suicide research, risk and protective factors, empirically supported approaches to prevention and intervention, suicide in the media and popular culture, and emerging issues and controversies in the field of suicidology. In many ways, the field of suicide research is young and knowledge is rapidly changing. Special attention will be paid to novel methodological advances in clinical psychological science. The course will use books, empirical articles, class discussion, critical thinking, exams, and writing assignments to accomplish its learning objectives. This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness nor will it address assessing suicide risk among friends or family members.

Offering: Host

Prereq: [NS&B213 or BIOL213 or PSYC240]

**PSYC354 Seminar on Intelligence and Creativity**

What does it mean to be smart? Who decides whether something or someone is creative? The answers to these questions are of great consequence as they often determine who gets access to scarce resources. This course will
introduce students to some of the most vibrant and lively debates in the fields of intelligence and creativity. Our goal will be to discuss relevant theories and evaluate empirical data associated with various perspectives and approaches to understanding these important constructs. In addition, students will gain familiarity with and critically evaluate how intelligence and creativity are measured, as well as the usefulness of different measures for predicting the success of individuals and organizations.

Prereq: None

PSYC355 Psychology of Reading

The study of the psychology of reading encompasses many aspects of human cognition: from sensation and perception to comprehension and reasoning. This class will provide an overview of research in the psychology of reading. Topics such as word recognition, eye movements during reading, comprehension, learning to read, methods of teaching reading, the brain and reading, reading in different languages, and reading impairments in children and adults will be covered.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC356 Neurodevelopmental Disorders

This course aims to provide a foundation in the underlying mechanisms of neurodevelopmental disorders. We will explore through lectures and readings of primary literature a number of important neurological and psychiatric diseases, including genetic disorders such as Down syndrome, Fragile X, and Williams syndrome; spectrum disorders such as autism and fetal alcohol syndrome; ADHD, Tourette's, cerebral palsy, and some motor disorders including developmental coordination disorder, stereotypic movement disorder, sensory inattention disorder, and neonatal hypoxia. This course focuses on the fundamental molecular and cellular mechanisms that underlie neurological disorders and is designed to engage students who wish to study basic cellular aspects of brain function.

Credits: 1.00
Gen Ed Area: NSM-NSB
Identical With: NS&B356, BIOL356
Prereq: [NS&B213 or BIOL213 or PSYC240]

PSYC358 Seminar in Intergroup Peace and Conflict

This seminar is an in-depth analysis of key psychological readings on the topic of intergroup peace and conflict. Topics covered include key psychological theories in intergroup relations used to articulate the reasons and sources for intergroup conflict (i.e., Social Identity Theory, Realistic Group Conflict Theory), topics covering how intergroup conflict is perpetuated (i.e., revenge, collective memory and collective victimization), strategies to reduce conflict and promote peace (i.e., contact theory, norm interventions, intergroup dialogues, protest), and behaviors that ideally progress beyond conflict (i.e., apologies, forgiveness, reconciliation, reparations). Additionally, the course examines philosophies of peace. Students in the course will not only discuss psychological strategies that are used to move toward peace, but critically consider/reconsider what a peaceful society means and what one would actually look like. Through reading and discussion of theoretical and experimental research articles, we will not only evaluate the methods scholars use to study these real-world issues, but also critically analyze and deconstruct the theoretical underpinnings influencing how psychologists approach and evaluate intergroup conflict and peaceful societies.

Offering: Host

PSYC359 Making the Psychological: Discovering, Manufacturing, Circulating

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

PSYC362 Health Psychology: the Psychology of Illness and Wellness
This course provides an introduction to the rapidly growing field of health psychology. The mind and body are inextricably bound. Nowhere is the profundity of this connection more on display than in the context of physical injury or medical illness. We will synthesize foundational writings with selections from current research to explore the psychological theories, methods, and interventions used to support medical patients and promote physical health and well-being. We will consider the various ways psychology can enhance health promotion and medical treatment outcomes, and, through the lens of health equity, examine how social and structural factors influence them.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC365 The Dramaturgical Approach to Psychology
The objective of this course is to explore the use of the language of theater in the illumination of psychological questions. Material for the course will be about half drama, half readings from social psychology. Among the issues to be explored are politics as theater, audience effects, role-playing as a teaching and therapeutic technique, the actor’s identity problems, and general theory of the mask.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC365 Seminar on Emotion
This seminar aims to provide an intensive introduction to what emotions are and how they influence our relations with other people. The seminar will cover general theory on emotion as well as theory on specific emotions (e.g., anger, shame, envy, humiliation). As emotions are multicomponential processes, we will examine how the social context shapes different components of the emotion process (e.g., phenomenological experience, regulation, and expression of emotion). Moreover, we will explore how emotions operate at the individual, interpersonal, intergroup, and cultural levels of analysis.
Offering: Host
Grading: OPT
Credits: 1.00

PSYC370 Advanced Psychology Seminar for Thesis Writers
This is an advanced seminar course for students completing a thesis (Senior Honors or BA/MA) in a psychology lab or related research discipline. The course will allow students an opportunity to develop skills that are relevant for thesis writers. A specific focus of the course will be on developing research presentation skills. This course will also provide students an opportunity to practice how to effectively discuss their thesis topic with a broader audience.
Offering: Host
Grading: Cr/U
Credits: 0.50
Gen Ed Area: SBS-PSYC
Identical With: PSYC370
Prereq: None

PSYC375 Advanced Research in Social Psychology: Social Representations of Crime in Children's Television
This is an advanced research seminar examining the relationship between adult understandings about crime and criminals and the images depicted in children’s entertainment. Working with the instructor, students will become part of an active research lab, collecting and analyzing qualitative data that will ultimately contribute to a project that aims to connect early childhood media exposure to adult understandings about such things as the “causes” of crime, the demographics of crime, and solutions to crime. Students will gain significant knowledge about and fluency with social representation theory, as well as hands-on experience using a variety of qualitative data analysis techniques.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC376 Advanced Research in Adolescent Racial Identity and Resistance
Students in this advanced research course will contribute to ongoing research studies in the area of adolescent ethnic-racial identity and sociopolitical development. Students will be introduced to community- and school-based research methods with marginalized youth and families. Students will contribute to different aspects of the research such as literature reviews, collecting and analyzing qualitative and/or quantitative data, data management, and manuscript preparation.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC377 Advanced Research in Racism and Intergroup Relations
Students in this advanced research course will contribute to ongoing research studies on the topics of race, racism, and intergroup relations. Students will be introduced to social psychological and cultural psychological research methods within the study of racism and intergroup relations. Students will contribute to different aspects of the research process such as literature reviews, collecting and analyzing quantitative and/or qualitative data, data management, and manuscript preparation.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC378 Advanced Research in Cognitive Neuroscience
This advanced research course provides in-depth training in the experimental methods of cognitive neuroscience, focused on human memory. Students will work individually and in groups on semester-long projects, which will include literature reviews, experimental design, data collection, analysis, journal-formatted writing of results, and oral presentations.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B378
Prereq: None

PSYC379 Advanced Research in Conceptual Development
Students in this course work on new and ongoing research projects in the Cognitive Development Laboratory. Students will be individually matched to a research project and participate in all aspects of research including background literature review and designing, running, and analyzing experiments.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: None
PSYC382 Advanced Research in Decision Making
This course is designed to allow students to conduct supervised research in the area of the cognitive psychology of reasoning and decision making. Working as a team with the instructor and other members of the research group, students will undertake a semester-long experimental research project on a topic in reasoning and decision making.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B382
Prereq: None

PSYC383 Advanced Research in Learning and Memory
This advanced research course is designed to allow students to conduct supervised research in the area of human learning and memory. Students will become familiar with both classic and contemporary studies in memory and undertake a semester-long experimental research project that seeks to answer a current question in the field of memory research either individually or as a group. Students will get to work on all aspects of the research project, including reviews of the background literature; generation of research ideas; the design, conduct, and analysis of a study; and a write-up of research findings in a journal-article format.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B383
Prereq: None

PSYC384 Advanced Research in Cognitive Development
This course is designed to allow advanced students to conduct a supervised group research project in cognitive development. Working with the instructor, students will conduct an experiment that seeks to answer a current question in the field of cognitive development.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC385 Advanced Research in Digital Learning
This hands-on research seminar provides advanced and applied experience in the design, delivery, and evaluation of digital learning. Students will have the opportunity to develop skills in curricular design, the review of research focused on project-based learning strategies, the design of evaluation research, support for digital learning in diverse educational environments, and the collection and analysis of quantitative and qualitative learning data.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: None

PSYC386 Advanced Research in Sleep
This advanced research course is designed to provide students with an in-depth understanding of how to critique and analyze psychological research. Specifically, we will focus on research within the field of sleep and psychosocial functioning. This seminar course takes an intensive lab-based approach. Students will have access to a comprehensive dataset that includes assessments of stress, anxiety, depression, physical activity, interpersonal relationship quality, personality, procrastination, and chronotype. Based on this data, students will be expected to commit to a semester-long project, which involves analyzing data and reporting findings on a self-selected topic. Upon completion of this course, students will have a strong working knowledge of the field of sleep and psychosocial functioning. This course also provides opportunities for students to develop analytical, writing, critical thinking, and presentation skills. Students also will gain data analytic skills using the Statistical Package for the Social Science (SPSS) program.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: (PSYC105 AND PSYC200)

PSYC388 Advanced Research in Measurement
In this advanced seminar on psychological measurement, students will receive individualized mentoring from the instructor on each aspect of the course, including conducting an in-depth literature review on a topic, developing a new measurement instrument, gathering and analyzing pilot data using a variety of advanced statistical methods (e.g., factor analysis, Rasch measurement, item response theory), and writing a professional paper reporting on the results and future directions.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Prereq: PSYC105

PSYC389 Advanced Research in Social and Historical Process
Students will become familiar with core theories on the temporal dynamics and cultural diversity of psychological phenomena. Students will work collaboratively on empirical projects that engage and appraise the theories.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC105

PSYC390 Experimental Investigations into Reading
Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B390
Prereq: None

PSYC391 Advanced Research in Cultural Phenomenology
This seminar is designed for seniors doing theses in cultural psychology to share their ideas and for juniors who are thinking about a thesis to explore various research directions.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-PSYC
Prereq: PSYC261

PSYC392 Behavioral Methods in Affective Neuroscience
This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in...
cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B392
Prereq: None

**PSYC393 Advanced Research in Cognition and Neuropsychiatric Illness**

Students in this advanced undergraduate research course will work in teams on novel and ongoing research studies focused on understanding neurocognitive dysfunction and its treatment in neuropsychiatric illness. Students will be matched to a research project and will participate in different aspects of this research including background literature review, acquiring elementary skills in neurocognitive and symptom assessment, and collecting and/or analyzing extant data using SPSS. Students may also be involved in learning cognitive training procedures.

Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: NSM-PSYC
Identical With: NS&B393
Prereq: None

**PSYC396 Advanced Research on Culture and Emotion**

This course offers an in-depth examination of how culture (e.g., cultural values, norms) influences the emergence, experience, expression, and social consequences of emotions. Students will work in a team on a semester-long research project on culture and emotion (e.g., envy, humiliation, shame, happiness). The course includes advanced theoretical and empirical literature. The readings and research projects will give special attention to how gender intersects with culture in emotional experience and expression. Students will also learn how to adapt methods (e.g., narrative approaches, diary studies, field experiments) and techniques (e.g., adjustment of research measures to specific cultural communities, translation) to study emotions in their cultural context.

Offering: Host
Grading: OPT
Credits: 1.25
Gen Ed Area: NSM-PSYC
Identical With: NS&B399
Prereq: None

**PSYC399 Advanced Research in Gambling, Drugs, and Junk Food**

This advanced laboratory course provides in-depth training in the experimental methods of behavioral neuroscience of motivation and reward and provides students with hands-on experience with animal research using rodent models. The capstone of the course gives students the opportunity to carry out an independent group animal research project in the lab, which may require a slightly heavier time commitment for the duration of the experiment (typically around two weeks). Students will learn how to handle rats in a behavioral neuroscience research setting and how to design and carry out an experiment to measure reward and motivation using diverse apparatuses such as operant (Skinner) boxes or conditioned place preference chambers. Research typically focuses on rodent models of gambling, diet-induced obesity, and drug addiction. The course also focuses on strengthening students’ scientific writing and oral presentation skills.

In addition, the course contains a service learning component in which students will work to develop a brief presentation/talk on a topic related to gambling, eating disorders, or drug addiction. Students will practice their talk in class with the aim of presenting it to local middle and high school students, in order to provide more information and education about these topics and the state of current research surrounding them.

---

**QUANTITATIVE ANALYSIS CENTER (QAC)**

**QAC150 Working with SQL and Databases**
Many of you have heard of studies that analyzed Twitter messages and predicted some phenomena—spread of flu in New York, consumer confidence index, and so on. Behind the success of these studies are the systems for data storage and retrieval. A regular user can access only the latest nine days of tweets. Any study that aspires to analyze longer periods has to deal with the issues of storing the observations and retrieving them later for analysis. The goal of this course is to show you how to do that—how to connect to various types of databases and how to retrieve and update your data. We will start with relational databases; learn SQL, the language used to query and update the data; and explore the latest developments in the database field—Hadoop and MapReduce.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: NSM-QAC, SBS-QAC
Prereq: None

**QAC151 Working with Excel and VBA**
Many of us know Excel for its spreadsheets: a quick and easy way to store some information, share it, and maybe make some charts. The goal of this course is to show you the more advanced features of Excel. We will write code in Visual Basic for Applications (VBA), learn how to import data from external databases and Web-based resources, create custom menus to interact with a user, and examine how Excel can be used in business decision making.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: NSM-QAC, SBS-QAC
Prereq: None

**QAC153 Working with Mathematica**
This course introduces students to Mathematica's computing environment and all the basic features of the software. Starting with basic operations and computations, students will be introduced to graphics, visualization, and mathematical computations and will learn through a series of hands-on lab exercises to use the Mathematica programming language for modeling and data analysis. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, a basic calculus background, and a willingness to make mistakes and learn from them is expected.
Offering: Host
Grading: OPT
Credits: 0.50
Gen Ed Area: NSM-QAC
Prereq: None

**QAC154 Working with MATLAB**
The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in...

<td>QAC159</td>
<td>Working with High Performance Computing (HPC) Tools</td>
<td>This is a cross-disciplinary course designed to introduce students to UNIX and learn how to perform calculations/analysis in a high performance computing (HPC) environment. We assume students have a basic understanding of computing, but no prior experience with working with UNIX or HPC is expected. All students will gain experience working on Wesleyan's High Performance Computing cluster. We will learn to work in a UNIX environment, how to write BASH scripts, and how to schedule and complete our work in a multuser HPC environment. In the second part of the course, we shift the focus to parallel computing. We introduce CUDA devices used for parallel computing, and work to convert a serial program into its parallel version. Students will develop and implement a project of their choosing, which may involve UNIX and HPC combined with any area of interest. Anticipating the course will be taken by students studying a broad range of disciplines brought together by a common interest in HPC, individualized support and feedback will be provided at several checkpoints throughout the course. Students will gain insight into the many ways UNIX and HPC are crossing traditional disciplinary boundaries to advance research in a variety of fields, expanding the possibilities in our data-driven era.</td>

<td>QAC171</td>
<td>Business Modeling with Excel</td>
<td>Broadly speaking, this course is about evidence-based decision-making. It is intended for students with a background in Excel and VBA who want to learn how to use spreadsheets to develop business and financial models and communicate the results. Model building is different from the usual Excel skills as it focuses more on the analytical/mathematical aspects than on data wrangling and requires some basic familiarity with economic/financial models and data analysis tools. We will start with problems where the inputs are deterministic and we must decide on optimal allocation of resources. We will then advance to problems with stochastic inputs and explore solutions either through simulation or through optimization of goal functions. Through this work we will develop the appropriate programming skills (e.g., VBA) and learn to effectively use Excel to implement our models and display the results of our analyses.</td>

<td>Big Data, Big Promises, Big Problems? (FYS)</td>
<td>This seminar explores the transformation of the modern data landscape from its pre-datafication beginnings in the early 90s to the contemporary age of “big data.” Throughout this transformation, various sectors of society, including healthcare, education, business, urban planning, governance, sustainability, media, science, and art, have experienced unprecedented opportunities for growth and advancement. However, alongside these opportunities, significant challenges have arisen, including privacy concerns, fairness and bias issues, data governance, and model interpretability, all of which have far-reaching implications. The seminar provides a systematic exploration of the characteristics of the “big data” landscape, its impact on the production and distribution of goods and services, and its “data ethics” implications. We will explore the promises, and problems, of our data-driven era, paving the way for informed discussions and critical thinking in our fields of study.</td>

QAC201 Applied Data Analysis
In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

QAC203 Hollywood and Big Data
Taught by a media research executive with a long industry experience this course is designed to provide students with an introduction and understanding of how the media industry is using data to make decisions that shape the art landscape of our times. Data around consumer behavior—what, how and why people are watching—has exploded recently and is extensively used in making decisions about what TV shows and movies to produce, how to promote them and how to make them. The course will explore how the media industry quantifies different kinds of content, the ways in which people watch and pay for that content, and how value is attributed across the media landscape. Students will be introduced to essential "media metrics" (e.g. viewership, box office, engagement) and learn to evaluate different data sets for their integrity and representative insights. Visiting media executives will discuss how data informs their jobs ("evidence-based decision making"). Assignments will include written briefs based on different data sets and a final project presentation highlighting skills in analyzing and presenting insights extracted from media research data. By the end of this course, students will be familiar with key decision-making tools in the media industry and be able to analyze and understand the impact on media output.

QAC211 Digging the Digital Era: A Data Science Primer
The course introduces students to the practice of what has come to be known as data science. Using a multidisciplinary approach and data from a variety of sources that cover any aspect of everyday life—from credit card transactions to social media interactions and Web searches—data scientists try to analyze and predict events and behavior. The first part of the course defines the area and introduces basic concepts, tools, and emerging applications that will include a broad introduction to machine learning tools and algorithms. It will include a brief mathematical background and introduction to modeling across disciplines. In part two of the course, we work on data acquisition and management and introduce appropriate programming and data management tools. In part three, we concentrate on basic analytical and visualization techniques as we explore and understand the emerging patterns. Using a learning-by-doing approach in a computing laboratory, students will learn how to write computer programs in R to access, organize, and analyze data through a series of small projects designed to illustrate the application of the techniques we develop for a variety of data sets and situations. The class will include hot topics like big data, privacy, and ethical issues around data, to name a few. Students will also engage in a semester-long project where they will address their own research questions working with "messy data."

QAC216 Introduction to Survey Design and Analysis
Survey data provide valuable information for the study of public opinion and behavior, and they are commonly used in several fields such as political science, public policy, economics, education and psychology. This course is an introduction to survey design, current implementation methods, and survey data analysis. By the end of the course, students will be able to design and conduct their own survey research projects. The class meetings include lectures, discussions, hands-on exercises, and work on a term project.

Prereq: None

QAC220 Applied Vectors and Matrices
An introduction to the mathematics of matrices and their application in traditional and modern methods of data analysis and scientific computing. The course promotes an interdisciplinary approach, and topics may include:

- Coordinate transformations in data visualization, iterated patterns in mosaics and art

Use of perspective projection in art and its representation as a matrix transformation

- Linear system solvers and their applications in image alignment and geo-referencing of old maps in GIS systems

- Use of least squares approach with linear solvers for alignment and geo-referencing in the presence of errors

- PCA-decomposition of computer images (the "eigenfaces" example) and multispectral images from satellites

- Use of linear solvers to find solutions to tiling problems like Sudoku, and

- Recommender systems
The course will introduce students to operations in Adobe Photoshop (for image transformations and blending), ArcGIS Pro (for coordinate transformations and geo-referencing of maps), Mathematica (for symbolic math), and R, thus serving as an introduction to these tools as well.

QAC231 Introduction to (Geo)Spatial Data Analysis and Visualization
Geographic information systems (GIS) provide researchers, policy makers, and citizens with a powerful analytical framework for spatial pattern recognition, decision making, and data exploration. This course is designed to introduce social science and humanities students to spatial thinking through the collection, management, analysis, and visualization of geospatial data using both graphical and command line-based spatial analysis platforms. Classes will consist of short lectures, hands-on training, group projects, critiques, and class discussions. Weekly readings and assignments will build skills and reinforce concepts introduced in class. The course will culminate in a group project developed through student-driven inquiry and including geo-computation. Readings across multiple disciplines will allow students to comprehend the breadth of applied geospatial thinking in today's research arena. The course is part of Wesleyan's Digital and Computational Knowledge Initiative and is aimed at students with limited or no prior GIS experience.

QAC232Z Mapping the Pandemic
The COVID-19 pandemic has altered the global community's daily relationship with space and movement, both at a hyperlocal scale of social distancing to a global scale of disease spread. Spatiotemporal visualizations in the form of maps and apps have allowed us to watch the worldwide spread of COVID-19 and keep tabs on local case counts in our own spaces. Geographic information systems (GIS) provide citizens, researchers, health care providers, and policy makers with a powerful analytical framework for visualization, data exploration, spatial pattern recognition, response planning, and decision making within our life in the time of COVID-19. This course is designed to develop spatial thinking and visualization skills relevant to COVID-19. Students will look at (and critically evaluate) existing maps and apps related to the current pandemic, create their own maps and apps, and critically evaluate their classmates’ maps and apps.

Class meetings will consist of case study lectures/discussions, instructor-led skill-building workshops, studio work sessions, and presentation/critique sessions. Spatial data collection, management, analysis, and visualization will occur within a cloud-based GIS (ArcGIS Online). Readings prior to the first class will establish a baseline for student comprehension of the breadth of applied geospatial thinking in today's research arena. The course is aimed at students with limited or no prior GIS experience.

QAC234 Working with Remote Sensing Data with Applications in Social Science Research
The last decade has seen an increase in application of remote sensing data in social science research: nighttime light data is used to support research into economic development and urbanization, measurements of pollutants serve as a proxy for economic activity, digital elevation models are used by historians to reconstruct most probable locations of ancient roadways, and archeologists use image analysis to discover ancient sites. This course will introduce students to the universe of publicly available remote sensing data products and will teach the students how to work with the remote sensing data (e.g., using Google’s Earth Engine and its scripting platform). Topics covered in the course include the manipulation of geometric features, making of maps and animations of environmental variables, generation of time series for geographic regions, and operations on aerial photography.

QAC239 Proseminar: Machine Learning Methods for Audio and Video Analysis
In this course, students are introduced to machine learning techniques to analyze image, audio, and video data. The course is organized in three parts, and in each part we will first introduce how these nontraditional data can be converted into appropriate (mathematical) objects suitable for computer processing, and, particularly, for the application of machine learning techniques. Students then will learn and work with a number of machine learning algorithms and deep learning methods that are effective for image and audio analysis. We will also explore major applications of these techniques such as object detection, face recognition, image classification, audio classification, speaker detection, and speech recognition.

QAC241 Introduction to Network Analysis
This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.

QAC250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality—a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

QAC251 Data Visualization: An Introduction
This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.

QAC282 Economics of Big Data
"Big data" is a popular buzzword that describes techniques using very large datasets, often from nontraditional sources. Many technology firms essentially base their businesses on big data; Google, Facebook, and Amazon are all examples. Increasingly, there are opportunities and pressures to employ these techniques in other areas of the economy and society such as government, health care, and education. This course examines big-data analysis techniques and how they relate to conventional economic statistics; the effect of big data on the economy, society, and privacy; and practical methods of big-data analysis using the R statistics package.

QAC301 Statistics Education Practicum
This course will serve students who are pursuing their undergraduate degree in a variety of disciplines but who want to expand their skills in statistics and applied data analysis in preparation for a future career. It will also serve students who are currently pursuing independent, quantitative research at the undergraduate or graduate level. The course will center on personal interaction in support of introductory statistics students. Active peer mentoring and supporting experiences will be based on the theory that good teachers (and learners) of statistics need to be developed, as opposed to being trained. In line with this theory, this hands-on course will provide an intensive opportunity to build specific knowledge regarding teaching and learning in the area of data-driven statistical inquiry. Students enrolled in this course will (1) attend statistics-mentoring development sessions (one hour per week); (2) provide one-on-one support for introductory statistics students during workshop-oriented class sessions (three hours per week); (3) lead small group-mentored meetings for five to six statistics students (one hour per week); and (4) monitor and critique progress on applied data assignments (one hour per week). In addition to these hands-on experiences, students will pursue a project aimed at furthering the field of statistics education. Projects may take the form of course evaluation, content/conceptual curriculum development, or translation of educational statistical software materials.

Similar to QAC380 (Introduction to Statistical Consulting), this course is aimed at providing students with an opportunity to enhance their statistical skills beyond the introductory level.

Offering: Host

Credits: 1.00
Gen Ed Area: NSM-QAC, SBS-QAC
Prereq: None

QAC302 Political Science by the Numbers
This course covers the basics of probability theory and statistics. The main purpose of this course is to promote the understanding of statistical concepts and how these concepts can be used to make inferences about the political world. Topics include probability distributions, correlation analysis, linear regression, generalized linear models, maximum likelihood, logistic regression, causal inference, experiments, and non-parametric modeling. Lectures will mainly cover theory, while readings will connect the concepts described during lecture to problems in political science. Whenever possible, the instructor will draw upon research in political science to illustrate the why and how of a given concept or technique. Demonstrations will allow students to "play around" with abstract statistical concepts. Most lectures will have an interactive component involving class participation. Problem sets will cover some of the more technical aspects of what we discuss in class along with applications using real data.

QAC305 Exploratory Data Analysis and Pattern Discovery
This course introduces the theory and practice of exploring, describing, summarizing and detecting patterns of interest in complex datasets. Various
approaches including aggregation, clustering, data visualization, and latent
variable modeling will be employed. This course will give students an opportunity
to develop computational skills (primarily in R) and to learn how to discover and
interpret relationships in unstructured observational data. The applications and
examples for this course will be broad and relevant to many fields of study.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: NSM-QAC, SBS-QAC
Prereq: QAC211 OR ECON300 OR GOVT367

QAC307 Experimental Design and Causal Inference
The course provides the foundations and statistical thinking to design, collect,
and analyze experimental data and introduces appropriate techniques for
observational data when causal inference is the objective of the analysis.
Throughout the course, we introduce and compare various experimental designs.
We will discuss sample size and power calculations as well as the advantages
and disadvantages of each of these designs. With observational data, we will
explore difference-in-difference models, propensity score matching techniques,
regression discontinuity designs. This course gives students the opportunity to
develop further their computational skills as we learn how to describe, interpret,
control, and draw inferences from experimental and observational data.

Offering: Host
Grading: A-F
Credits: 1.00

Identical With: CIS307
Prereq: QAC201 OR PSYC200 OR MATH132 OR ECON300

QAC311 Longitudinal Data Analysis
Work across different fields, from medicine and public health to social sciences
and education, often involves the collection and analysis of longitudinal data--
combination of cross-sectional and time series (repeated measures for the unit
of observation) data. This rich data structure provides opportunities to explore
questions that could not be addressed with simpler data sets, but at the same
time requires special considerations because we are analyzing observations
that are not independent. The course introduces students to appropriate
graphical exploration of the data and the specification and estimation of fixed
and random-effects models. It also develops the basic framework for difference-
in-differences models and explores their applications.

Offering: Host
Grading: A-F
Credits: 0.50
Gen Ed Area: NSM-QAC, SBS-QAC
Prereq: QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR
ECON300 OR [GOVT367 or QAC302] OR PSYC200

QAC312 Hierarchical Linear Models
Research questions cannot always be explored by collecting data with
independent observations. Sometimes this is due to limitations or constraints
on the data collection method, and other times our questions pertain to data
that are measured at both the individual and group levels (e.g., patients from
different hospitals or students from different schools that belong to different
districts). Hierarchical linear models (HLM), also called multi-level or mixed
models, explicitly model such nested data structures and address analytical and
estimation issues not accounted within the framework of the classical linear
model. Using data sets from different fields of study (e.g., education, medicine,
and health) students will learn to formulate multilevel research questions,
estimate and critically examine HLM applications.

Offering: Host
Grading: A-F
Credits: 0.50

QAC313 Latent Variable Analysis
The course is an introduction to latent variable modeling. Students will learn
the fundamental statistical methods for structural equation modeling (SEM),
including principal component analysis, confirmatory factor analysis, path
analysis, and SEM for both quantitative and binary observed variables. In
addition, students will learn the basic components of SEM, such as assumptions,
testing model fit and indices of fit, testing competing models, estimation
methods, and issues in model identification. Students will learn to develop
structural equation models using AMOS, R, and/or Mplus statistical software.

ECON300 OR [GOVT367 or QAC302] OR PSYC200

QAC314 Survival Analysis
Survival or event history analysis focuses on modeling and analysis of time-to-
event data--such as onset of a disease; duration of a strike; failure of a biological,
physical, or social system; or recidivism). This course introduces students to
survival and hazard functions, the analysis of censored data using parametric
and non-parametric estimation methods; compares survival curves for different
groups; and discusses competing risk models. The emphasis is on the applications
of the different methods with the objective of broadening computational skills
in R and/or SAS and to reinforce statistical writing and communication. These
skills will be applied to a variety of problems in political science, public health,
engineering, and medicine.

Offering: Host

QAC320 Applied Time Series Analysis
Understanding and modeling the past allows us to extract insights in our areas
of study that are not possible to extract without time series data. This course is
an introduction to the theory and practice of time series analysis. We will learn
to identify and model the components of a time series process, and to properly
model relationships among variables over time. By emphasizing the practical
applications of time series analysis, the course will give students an opportunity
to further develop computational skills and learn how to develop forecasting
models, and to make inference using time series data.

QAC323 Bayesian Data Analysis: A Primer
This course introduces the applied principles of Bayesian statistical analysis. The
Bayesian paradigm is particularly appealing in research where prior research
and historical data are available on parameters of interest. This course will teach
students appropriate techniques for analyzing data of this nature as well as
broaden computational skills in R. The course will lay the foundation for Bayesian
data analysis that students can use to further develop skills in decision making.

Offering: Host
Grading: A-F

QAC381 QAC Praxis Service Learning Lab
As a service learning lab, this course provides students with an opportunity to further develop their abilities to analyze data and apply their knowledge and statistical computing skills as they work closely with nonprofit community partners on data analytic projects. Students in the course will identify research questions of interest to the community partner, gather and manage data, conduct statistical analyses, and interpret and summarize results. The service component involves providing statistical consulting to community partners by formulating and completing data analytic projects, the results of which may be used to improve services, identify areas requiring increased services and areas in which services can be made more efficient, as well as improving data collection, data reporting, and organizational functioning.
Offering: Host

QAC385 Applications of Machine Learning in Data Analysis
The course provides a broad overview of machine learning algorithms and focuses on their application in data mining. Building on a basic background of regression analysis, and following a learning-by-doing approach, students are introduced to data mining tools and techniques that are used to identify patterns and relationships in large and complex data. While the emphasis is on intuition and application rather than theoretical results, through different case studies, students are introduced to the fundamentals of the different methods and learn how to conceptualize a problem, analyze it using appropriate tools, and communicate their results.

**RELIGION (RELI)**

**RELI15F Theorizing Religion with Zombies (FYS)**
This course introduces students to theories in Religious Studies in order to investigate the intellectual and cultural histories of two highly influential and essentially religious ideas: the zombie and the apocalypse. We will critically trace their representations in popular culture in order to explore writings in biblical narrative, history, modernity, monster theory, alterity, gender, capitalism, race, epidemiology, film theory, and media studies. We will begin ancient texts, move to the history of the concept of the zonbi in Haiti, and then trace the trope of this modern monster and its various meanings into the contemporary moment.

**RELI151 What is Religion? Kool-Aid, Living Images, and the Dalai Lama**
This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

**RELI151F What is Religion? JewBus, Museums, and the First Amendment (FYS)**
Why did the FBI assault the Branch Davidians' compound near Waco, Texas, thinking it was a cult, while those inside the government as serving the anti-Christ? Can one be Buddhist and Jewish at the same time? Are museums religious spaces? Does secularism protect religion from the government or the government from religion? This class will introduce you to the ways in which we study religions by reading critical case studies, including those about Muslims debating the hijab, the treatment of sacred objects in museums, and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.

**RELI173F Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies (FYS)**
Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, and environmental legal frameworks with language that invokes the Mother Earth. This seminar will explore the social, legal, and metaphysical aspects of eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, panist, monist and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Endli 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S folks? Engaging emerging podcasts, shamanic documentaries, social manifestos, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke Mother Earth, the Pachamama, or the Goddess to self-regulate the ecologically destructive practices of our late-stage capitalism?

**RELI174 Jesus Chicken: Business and Religion in America (FYS)**
Summary: Although many Americans are aware of the religious identity of the fast-food chain Chick-fil-A (earning it the moniker of “Jesus Chicken” in some communities), there is nothing new about businesses that project a religious ethos. This First Year Seminar explores the blurry boundary between business and religion in America, examining the ways in which businesses use religion and the ways in which religious entities often function as businesses. Although this course primarily focuses on the Christian tradition, it will also examine the ways in which other religious communities (such as Jewish and Buddhist) approach the marketplace. Chronologically, the course spans the 17th to 21st centuries, paying special attention to the emergence of the market economy in the U. S. from 1800-1850 and the growth of consumer culture in the second half of the 20th century. This course will provide students with an introduction to historical methods and the critical study of religion, while focusing on developing collegiate-level reading, writing, and critical thinking skills that will form a foundation for any major at Wesleyan.

RELI201 Introduction to the Hebrew Bible (Old Testament)
The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God’s gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

RELI205 Dharma, Karma, and Living with the God/dess/es: Hindu Lives
Through fiction, autobiography, biography, art, a comic book, a city, and a village, this course explores some of the myriad understandings of what it is to be Hindu. In an effort to introduce students to Hindu culture and religion, a number of approaches shall engage the questions, What is Hindu dharma? and What is it to be Hindu? The class will also investigate the issue of “Hinduism,” a term created in the 19th century to identify a Hindu “religion” rejected by many 21st-century Hindus. This issue expresses just one of many arising from the Indian experience of contact with the West. Overall, the course immerses students in the lives of Hindu individuals and communities so that we, as a class, can draw our conclusions about Hindu practices and meanings in different political, mythic, social, and cultural contexts.

RELI207F Who is the Dalai Lama? (FYS)
This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulkus) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the
15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

RELI212 Introduction to the New Testament

The purpose of this course is to provide an introduction to writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, one of the chief aims of the course being the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

RELI213 Refugees & Exiles: Religion in the Diaspora

Recent years have seen the ongoing tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. This course deals with the meaning of refugee, exile, and diaspora through three perspectives: philosophical, historical, and literary. What does it mean to be forced to leave one’s home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? In our search for answers, we will examine a variety of case studies including the contemporary refugee crises in the Middle East, the border between the United States and Mexico, the black transatlantic, and the destruction of the temple in the Hebrew Bible. This course is a project-based Service Learning in which all assignments are geared toward the final project, in which each student will produce a radio show based on an analysis of a refugee crisis of their choice. These shows will air on WESU 88.1 FM Middletown. To learn more and listen to previous seasons of last year’s radio shows visit https://reli213.site.wesleyan.edu

RELI216 Jesus Through Jewish Eyes

In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves, in particular, the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

RELI217 The Environment, The Bible, and Moral Debate

The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular “biblical” view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

RELI218 The Cosmos of Dante’s “Comedy”

In 1321, Dante Alighieri completes the final cantos of the “Comedy” and breathes his last. After 700 years, the “Comedy” has not finished saying what it has to say. This course provides an in-depth introduction to Dante’s masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante’s encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the “Comedy” casts its long shadow on modern culture: in Primo Levi’s description of the horror of Nazi concentration camps, or in Amiri Baraka’s fragmentary representation of America’s inferior racist system. We investigate the challenges that Dante’s text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul’s relation to the divine; Dante’s concepts of governance and universal peace; mythology and theology in Dante’s Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception...
of Dante’s work from the 14th century to the present. The course combines a close analysis of Dante’s inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RELI219 Online and #IRL: Digital Media, Power, and Religion
From meditation apps and Zoom church to TikTok witches and spiritual influencers, religion and spirituality pervade the Internet. Yet digital media reflects social, economic, and political negotiations of power that often elude our scrolling eyes. This course critically examines digital media and religion by asking how the “power” of digital infrastructures affects religion. Together we will map different platforms and mediators (social media, material technologies, and corporate gatekeepers) that shape “power” and “religion” online. We will survey how religious practitioners navigate digital media through case studies of ex-Evangelical Twitter users, Hindu mega-temple live streams, ritual smartphone apps, and more. We will discuss “spiritual machines” and ask, “Has digital technology become a new god?” This course takes an interdisciplinary approach and engages research from technology studies, media studies, and religious studies. Students will also examine methods, ethics, and theories of studying digital religion and develop their own digital religion case studies.

RELI224 Zen Buddhism Across East Asia: Teaching and Practice
In this course, we will examine Zen/Chan Buddhism in history and in its contemporary practice. We will trace how Zen Buddhism sprouted from Chinese religious traditions in the Tang Dynasty (618-907), flourished in the Song Dynasty (906-1279), and then spread to other East Asian countries such as Japan and Korea. Then, we will pay attention to the ways in which Zen Buddhism found its way to modern Western society, through figures such as D.T. Suzuki and Okakura Kakuzo since the 19th century.

Course readings consist of primary sources of Zen Buddhism, which are available in English translation. A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

RELI225 Socialist Utopias: Transcendence and Religion in Communist States
Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx and some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangoes became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

RELI226 American Christianities: What do Christians Want?
The course explores various forms of contemporary Christianity in the United States and focuses on the ambitions that guide Christian practices. One guiding question we will ask is, "What do American Christians want?" More converts? Social justice? Salvation? Money? A Christian nation? We will interrogate how ideals of salvation, justice, nationhood, and the family shape Christian social action. Religion is not only what groups think and believe, but also what they do. We will examine why Christians form separatist movements, fund global humanitarian efforts, travel on international missions, use digital media, support anti-abortion activism, and more. By considering a wide variety of Christian groups, we will critically evaluate the diverse social imaginaries, theological frameworks, and historical foundations that shape contemporary U.S. Christianities. This course uses methods from sociology, history, and anthropology. We will critically engage media produced by Christian practitioners.

RELI229 Tibetan Religion
This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. It will also examine the lesser-known communities of Tibetan Muslims and Christians inside Tibet and in exile. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

RELI239 Modern Shamanism: Ecstasy and Ancestors in the New Age
The wise and mysterious native shaman has long held a particular fascination for Western scholars of religion, but does this figure even exist? What does it mean to be a practicing shaman today? Beginning with Eliaède’s definition of “archaic ecstasy,” we examine the idea of the shaman, their role in the New Age movement, and the challenges faced by contemporary indigenous shamans, from negotiating international intellectual property rights law to Ayahuasca tourism and environmental activism. Course materials are supplemented by A/V materials from the instructor’s fieldwork in Siberia.

RELI241 Cults, Crusades, Jihad, and Multiculturalism: On (Non)Religious (In)Tolerance
"More people have died in the name of religion than any other cause on earth." Is this true? If not, why do so many people believe it? Even if it is not true, a great many people have died for causes propelled by religious ideologies and sentiments. Then again, a great many people have been killed because of their religious identities and associations. How do religious traditions generate emotions of empathy, suspicion, antagonism, and/or indifference? And how do secular traditions promote similar emotions toward specific religions and toward religion in general? This course will investigate what these dynamics tell us about various religions in different cultures--specifically those of South Asia and the United States--and how some social ideologies allow only for specific religions or all religions. We will explore these in the context of the so-called "cult" of the Branch Davidians in Waco, Texas; the pogrom against Muslims by Hindu nationalists in India; various jihads in Afghanistan, Pakistan, and India; and the role of imagined Muslims in the language of tolerance among the American republic’s founders.

REL242 Introduction to Buddhist Thought and Practice
This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

REL250 Islamic Movements and Modernities
The so-called Islamic State once grabbed headlines daily with criminal acts primarily committed against other Muslims, but also against non-Muslims. Its violence overshadowed even al-Qaeda and the Taliban in media coverage. This seminar will track the development of these groups as well as the many more Islamic movements that reject violence and seek peaceful social change. Indeed, many Muslims object to the name "Islamic State" because they recognize the group as neither Islamic nor a legitimate state. The seminar examines how specific Muslim communities in the Middle East, Europe, South Asia, and the U.S. have engaged the modern conditions of Western imperialism, nationalism, and globalization and shaped their own forms of modernity. The seminar also investigates the increasingly digital, transnational, and intercultural realms of Muslim experiences.

REL252 The Five Rachels: Jewish Women in Contemporary American Culture
The course will focus on five iconic contemporary female TV characters, actors, and creators; American, Jewish, and incidentally—or not—sharing the same name: Rachel. Rachel Green ("Friends"), Rachel Berry ("Glee"), Rachel Menken ("Mad Men"), and Rebecca Bunch ("Crazy Ex-Girlfriend"), played by Rachel Bloom, and Midge Maisel ("The Marvelous Mrs. Maisel"), played by Rachel Brosnahan. These five complement each other and offer us a panoramic view of the American Jewish female experience: discrimination, inclusion, the generational gap, and their relationship with Israel. In addition, they allow us to explore the three most common stereotypes associated with the Jewish woman: the Jewish nose, the Jewish mother, and the Jewish American princess. We will discuss the conflicts and the societal shifts these characters embody, and how they define themselves, their Jewishness, their femininity, their unique surroundings, and place in history.

REL255 Heretics and Heresy
What is religion all about? Is it fundamentally about belief, truth, or God? About understanding, revelation, or salvation? Is religion about one's origins, identity, or destiny? Is it about what one does or is supposed to do? How would we ever know? And who gets to say so? This class will explore the emergence of "heresy"—notions of error—in the construction of religious belief and practice in ancient Christianity, and how "heretics" became central to the way Christianity defined itself in relation to Jewish and Greco-Roman religious traditions. We will examine these issues, in part, by reading a number of remarkable, and recently discovered "heretical" texts from antiquity and early Christianity, including the Gospel of Thomas, the Gospel of Mary, the Gospel of Judas, the Gospel of Truth, and the Cologne Mani Codex.

REL263 God & Guns: the History of Faith and Firearms in America
This course examines the history of firearms and religion in the United States, ultimately seeking to understand the significance of gun culture within American Christianity and the powerful "God & Guns" story at the core of many Americans' identity. Beginning with an overview of colonial and revolutionary-era views of firearms and violence, the course examines the influence of slavery, gender, and the wars of the 20th century, paying special attention to the emergence of a masculine, warrior Jesus within evangelical and fundamentalist communities during the Cold War. Students will be challenged to consider the ways in which this story helps explain one facet of popular support for Donald Trump and to reflect on how firearms are central to the identity of many conservative American Christians.

REL266 Buddhism and Social Justice
In this course we will get a basic introduction to Buddhism, covering major concepts including interdependent origination, suffering, not-self, and Buddhist ethical practices. Through major historical texts, we will establish a uniquely Buddhist basis for social justice. Historical texts to be covered include the Dhammapada, Therigatha, Jataka Tales, and Shantideva's A Guide to the Bodhisatta's Way of Life. We will discuss major philosophical questions such as, "how can we strive for change, while simultaneously accepting things as they are?" "How do we respect the importance of identities while denying the existence of a self?" "If the world will always be imperfect, why bother trying to improve social conditions?" We will then discuss contemporary applications of Buddhism for social change, and compare these with non-Buddhist approaches. Modern texts include "Soaring and Settling" by Rita Gross, "Freedom in Exile"
by His Holiness the 14th Dalai Lama, "Burdened Virtues" by Lisa Tessman, and "Strength to Love" by Martin Luther King Jr.

RELI270 Magical Money and Enchanted Capitalisms
In the early days of the 20th century, Max Weber foresaw that with the rise of capitalism and modernity, the world would become increasingly disenchanted. Now, with the turn of the 21st century, people all over the world experience capitalism as a realm of enchantment. In Malaysia, ghosts possess factory workers; in South Africa, capitalism produces zombies; and in Bolivia, mines eat their miners. Instead of Weber's "iron cage," we live in a world of "voodoo economics" where Korean shamans conduct ceremonies to bless new businesses, Russian psychics curse business competitors, and prosperity theology preaches that God will make you rich. This class explores the enchantment of the financial sphere, combining theory on the disenchantment of modernity (Max Weber) and commodity fetishism (Karl Marx, Sigmund Freud, William Pietz) with ethnographic accounts of how capitalism and the economy become mystified and enchanted.

RELI271 Secularism: Godlessness from Luther to Lenin
Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

RELI272 Ethics After the Holocaust
The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

RELI281 Political Fantasies of Zion
Palestine, Zion, Judah, the Promised Land. A small piece of land in the Middle East has a very long and contested history full of religious meaning for Judaism, Christianity, and Islam. Some imagine the State of Israel as an island—"the only democracy in the Middle East" or the only Western state in the region—surrounded by a hostile environment. The geographical area, by contrast, has often been portrayed as a crossroad, a place where cultures clashed, merged, and exchanged ideas.

In this class, we will examine this tension between a physical and imagined space, between political reality and idea, by recovering alternative Zionist, non-Zionist, and anti-Zionist visions of the Zion. Jewish statehood is a very recent phenomenon. Throughout the modern period, the vast majority of Jews lived under empires, whether Habsburg, French, Romanov, British, or Ottoman. How did the imperial experience shape Jewish religious and political views? What role does the imagination of Zion play in today's political context? Reading political pamphlets, poetry, maps, artworks, and utopian fiction, we will pay attention to the construction of the Zionist idea not just in political Zionism but also in contrasting visions including Canaanism, cultural Zionism, diaspora nationalism, a Jewish-Arab federation, a binational state, and the rejection of statehood as heresy. In the last part of the class, we will look at recent contemporary issues from the news, e.g., the agreements between the State of Israel and the United Arab Emirates, or government corruption in Israel, in order to see how these ideas of Zion are still present in today's discourse.

RELI282 Religion and the Scientific Imagination
Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another—in an effort to move beyond the frankly boring "debates" between them.

Offering: Host
Grading: A-F
those refutations—the problem of evil, religious ethics, religious experience, the proofs of God's existence—along with refutations of those proofs and rebuttals to ethicists, idealists, empiricists, Romantics, and liberationists. Themes include Christians, committed anti-Christians, secular and nonsecular Jews, feminists, major texts within this field, whose authors include deep skeptics, committed of revelation and reason in terms of one another. We will examine some of the Broadly speaking, "philosophy of religion" is the effort to evaluate the claims With the dawning of modernity, Europe's colonial and scientific adventures and Hindu engagements with divine images, this seminar will explore these efforts to protect venerated sites from "development" that they describe as神圣的, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

RELI300 Semiotics of al-Barzakh: The Grammars of the End of Days and Horizons of Possibility This course builds from the Islamic eschatological concept of "al-Barzakh" as it has been taken up in anthropological theories, as well as in Islamic thought more generally, with careful attention to the term's semiotic transformations.
and significations. It does so in order to explore both how the term describes an earthly place and an eschatological hereafter as well as a theoretical and practical alternative to the notion of the liminal personhood.

Since at least the 12th century, thinkers have explored the Islamic concept of al-Barzakh to explore the connection between the earthly present and the heavenly hereafter and the scales of judgment in between. This term, somewhat akin to Christian notion of purgatory or limbo, appears only three times in the Qur’an. It is explained as being like the productive firmament that separates salt and sweet water. In places like Morocco, this is commonly interpreted as referring to the Strait of Gibraltar and the underwater isthmus that separates and produces the waters of the Atlantic Ocean and the Strait of Gibraltar.

We will read both contemporary scholarly apprehensions of this term and its various applications in Muslim-majority contexts such as Morocco, Egypt, Sudan, and Iran—often ethnographic—as well as Islamic philosophy that attempts to bring the concept into relation with earthly personhood. In our approach, we will move through a variety of scholarly genres and epochs in order to trace the genealogies of present-day popular invocations of the term as we contrast it with other apprehensions of the eschatological and the liminal.

We will work to understand how this term contains space for both an imagination of everyday life as well as the boundary-generating difference marking here and there, then and now, by looking at how the term is evoked by artists, scholars, religious adherents, psychoanalysts, and border crossers. As we go along, we will pay special attention to the languages of belonging and difference evoked by this term and attend to how an anthropological approach to semiotics might elucidate new grammars of community and horizons of possibility that exist alongside notions of the liminal, uncanny, dreaming, the hereafter, and the imagination of the end of days.

RELI301 Jesus and the Gods: Christianity and the Religions of Antiquity
This course will focus on the politics and methods of comparison in order to reveal how thinkers have described the myths and practices of early Christianity as they relate to the religions of ancient Israel, Greece, and Rome. In reading carefully a wide range of ancient texts and modern scholarly discussions, we will be thinking on several levels at once. That is, we will learn about the gods and ritual practices of ancient Greece and Rome and also think critically about the agendas of the many writers—from Plato to Thomas Jefferson and beyond—who described them for their own purposes.

How did Jesus of Nazareth come to be understood as a god, who dies and rises, in a world brimming with gods? Why was he remembered as a philosopher and a martyr, like Socrates? How and with what motives did writers throughout history compare Jesus with the priests and kings of ancient Israel or with the gods and goddesses of the Hellenistic Mystery Religions? What is the place of Demeter, Isis, and Osiris in the history of religion? How did early Christians understand their rituals of death and resurrection in terms of rebirth, salvation, and martyrdom? Considering themes and theories of piety and sacrifice, purity and prophecy, wisdom and narrative, ethics and philosophy, mythmaking and cultural critique, we will ask how the politics of comparison and classification have shaped not only our understanding of Jesus and Judaism, ancient Greece and Rome, but also the construction of Judaism and Christianity as religions, and the very category of religion itself.

RELI302 Kierkegaard: An Advanced Seminar in Absurdity
Throughout Kierkegaard’s “pseudonymous authorship”—a set of books written by different characters he dreamed up to remove the burden of authorship from himself—we encounter the possibility that, from the perspective of ethics, philosophy, and even religion, the truth will seem ridiculous. Truth, for these pseudonymous authors, takes the form of paradox, that reason and common sense can only call “absurd.” Of course, it is no surprise that a paradox seems absurd; if it is not absurd, it is not a paradox. For the pseudonyms, it is therefore either the case that truth is paradoxical, exceeding the realms of ordinary thinking and existing, or that it is not. If it is not, then the absurd is simply absurd and both philosophy and religion are right to reject it. But if truth “is” paradoxical, then we are faced with the problem of thinking the unthinkable, communicating the incommunicable, and getting serious about absurdist. In this seminar, we will wrangle some of these pseudonyms’ best-known, most exciting, and crankiest books, along with a few of Kierkegaard’s signed, vitriolic attacks on the established church.

RELI303 Extinction/Rebellion: Christianity and the Climate Crisis
Although this course is not devoted specifically to the subject of “XR”—the decentralized environmental activist organization and global campaign of civil disobedience—it borrows the movement’s self-designation as a point of departure for an exploration of the historical, conceptual, and geopolitical significance of Christianity to the “Anthropocene.” How is Christianity entangled among the “historical roots of our ecologic crisis”? What is “eco-theology”? How do ancient narratives of creation and traditional Christian teachings regarding the origin of humankind continue to shape modern, scientific, and popular assumptions about the natural world and our place in it? What does the book of Genesis have to say about commercial agriculture, ethical veganism, and the relation of divinity with the more-than-human, animal-vegetal-mineral web of life? Whence this “planet of slums” and whither Paradise or the Promised Land? Which elements of the Christian imagination enabled colonization of the New World, indigenous displacement and genocide, the transatlantic slave trade, and capitalist globalization? Is another world still possible, and could Christian thought and practice play a pivotal part in actualizing an alternative planetarity today? We will pursue these questions together by way of readings in theology, philosophy, critical science studies, ecology, geography, political economy, Black feminism, queer theory, and Indigenous studies. Ultimately, the course analyzes aspects of Christianity’s intimate involvement in the history of climate change and considers how critical attention to this history may contribute to collective acts of rebellion against mass extinction.

RELI305 Pantheologies: Animal, Vegetable, Mineral, World
Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered “matter” to be lifeless, dark, and feminine.
(which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politics of environmental justice?

RELI306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions
Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other "other-than-human persons." Using case studies and the instructor's fieldwork materials with place beings in Buryatia, we will explore the different relationships humans beings have with animate and sacred landscapes and think about the ramifications these relationships have for thinking about sovereignty over and in the "natural" world.

RELI307 Ritual
Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion, and not all rituals are religious. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

RELI308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America
This course examines the history of American evangelicalism, seeking to understand the nature of its support for the presidency of Donald Trump. Beginning with a brief overview of religion in the colonial and revolutionary eras, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped 21st-century evangelicalism, and reflect on how the movement’s view of American history contributes to its own sense of identity and purpose.

RELI309 Scoundrels, Sinners, and Saints: Approaches to Buddhist Life Writing
This seminar will examine a variety of religious biographies and autobiographies in order to evaluate the significance of life writing in the Buddhist traditions of Asia. Materials will cover a broad range of historical periods, from early medieval to modern, and geographic regions, including South Asia, East Asia, the Himalayas, and Tibet. Topics include the structure, function, style, production, and reception of biographies and autobiographies, as well as more thematic questions of religious transmission, soteriology and praxis, formations of self-identity, gender, and the relationships of biographical literature to art and pilgrimage. Readings include primary Buddhist texts in translation supplemented by secondary scholarship on hagiography and sainthood, literary theory, narrative constructions of the self, and Buddhist history.

RELI312 Judaism in the Time of Jesus
This course is designed to help us understand the emergence of Judaism—its practices and beliefs, as a philosophy, a way of life, a religion—from the formation of the Hebrew Bible (ca. 400 BCE) to the parallel development of rabbinic Judaism and early Christianity (ca. 100 CE). We will be concerned with the creation of community and its institutions, the rise of sectarianism and claims of normativity, the creation of the Bible as scripture and various modes of its interpretation, the relationship of early Judaism to ancient Israelite religion and society, and relations between Jews and Judaism to gentiles and gentile culture. Attention will be given to the creativity of Jewish literature, its common setting in times of oppression, and its place in the religious heritage of Judaism and Christianity.

RELI313 Curating Religion: Museums, Monuments, and Memorials
Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they present present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect
in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan’s collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

RELI314 Buddhist Traditions of Mind and Meditation
This seminar surveys a range of Buddhist meditation practices in the context of traditional theories of mind, perception, and cognition, with an emphasis on the traditions of South Asia, East Asia, and the Himalaya. Beginning with canonical descriptions of the mind and its variety of mental states, the course will then examine early scriptural expositions on the two principal types of meditation techniques: tranquility or concentration meditation (samatha) and insight meditation (vipasyana). Next will be an examination of techniques for cultivating compassion and the view of emptiness that were central to the later Indian traditions of the Mahayana or Great Vehicle. The course will finally turn to the elaborate systems of Tantra that developed in India and spread through Tibet, which incorporate the visualization of deities and recitation of mantras. Readings will include both primary Buddhist canonical works and commentaries by contemporary Buddhist teachers in English translation as well as secondary scholarship on the historical context of Buddhist meditation systems, cognitive theory, and ritual practice.

RELI315 Ethics and Action in the Buddhist Cosmos
We often think about nirvana, or "enlightenment," as the ultimate goal of Buddhist practice. But the reality is much more complex. Buddhist traditions imagine a huge range of positive outcomes for moral behavior: immediate material benefits, rebirth in a better body or in a wealthier family, and enjoyment of gold-paved heavens or eternally blissful Pure Lands.

In this seminar we will read Buddhist scriptures, commentaries, biographies, narrative anthologies, and scholarly works that trace the many ways of thinking about ethics, action, and rebirth in the vast Buddhist cosmos. We will tour Buddhist heavens and hells, Pure Lands and political dystopias, as well as the complex worlds of Buddhist modernity. Along the way we will begin to think about key issues in the study of religion: narrative and ethics, magic and material culture, cosmology and sacred presence, modernity and globalization.

RELI317 Colonizing Space: Exploration, Extraction, and Inhabitation
Under its "Artemis Mission," NASA plans to put "the first woman and first person of color" on the Moon to build a permanent outpost. This lunar base will allow NASA to mine the Moon, extract precious metals from asteroids, and eventually colonize Mars—hopefully before China and Russia do the same. Thanks to recent legislation, NASA will rely throughout this mission on the rocket and extractive technologies of private corporations like SpaceX, Blue Origin, Moon Express, and Deep Space Industries, whose CEOs proclaim they are saving the human race by expanding it into space. It will also rely on the backing of the newly-created sixth branch of the U.S. military: the Space Force.

This course will track the ideological and colonial history of the Apollo era before approaching the scientific, corporate, and legislative landscape of "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of the Earth and its cosmic neighbors. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

RELI318 Awesome Cinema: Religion, Art, and the Unrepresentable
How does one represent the unrepresentable? In particular, how might a medium like cinema—founded on recording the visible world—move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the nonrational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason. Films may include "Arrival," "Interstellar," "The Exorcist," "Jai Santoshi Maa," "Passion of Joan of Arc," and "Yeelen."

RELI320 Schemers and Redeemers: Capitalism and Christianity in the Early Republic

This course examines the intersection of two of the most significant themes in U.S. history: Capitalism and Christianity. Beginning with the Early Republic (1790s) and continuing through the mid-19th century, this course asks students to explore how Americans used their religious identities to negotiate and shape market activity and institutions (and in turn, how the marketplace shaped their religion). Students will investigate the varied ways in which religious women and men resolved tensions between gender, class, slavery, moral dogma, and market imperatives. Finally, this course will require students to reflect on how the early 19th-century U.S. experience informs our understanding of the relationship between capitalism and Christianity in 21st-century America.

RELI321 Visual Worlds of Himalayan Religions

How do Tibetan Buddhists look at religious images? What do pilgrims in Nepal see when faced with sacred monuments? Why do devotees in Bhutan display erotic caricatures in public? This seminar will explore the ubiquitous role of images and imagining in the religious traditions of the Himalayan region. Readings and viewings will examine the painting, sculpture, architecture, and performing arts of the Himalaya (including Tibet, Nepal, north India, and Bhutan), placing them in the context of local religious beliefs, ritual practices, and literary canons. The seminar aims to understand how Himalayan cultures produce religious images and the ways of seeing that invest them with meaning. Classes will address specific modes of visual representation, the relationships between text and image, and the social lives of images, as well as processes of reading and interpretation. Particular attention will be paid to representations of Buddha Sakyamuni and visual expressions of his life.

RELI322 Playing God: Race, Colonialism, and Raising Dinosaurs from the Dead

This seminar draws on the fields of religious studies, ecocriticism, philosophy of science, decolonial thought, Black studies, political anthropology, and queer theory to examine our culture’s fascination with dinosaurs. Questions discussed include: What are the ethical implications of “discovering” dinosaur fossils on stolen Indigenous land? How have “philanthro-capitalists” used dinosaurs to promote the ideology of American exceptionalism? How do fossil fuels and their extraction relate to searches for fossil animals? Why do creationists believe dinosaurs still live, and how is this a remnant of European imperialism? Is the dream of resurrecting extinct species scientific or religious? How do natural history museums benefit from and contribute towards colonialism? Is the past more like a natural resource or public utility? In the process of addressing these and many more questions, students will examine what dinosaurs can teach us about humans, non-humans, post-humans, extinction, and the end of the world.

RELI323 The Black Charismatic

In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called “charismatic”) black political leadership by attending to Tavis Smiley’s yearly “State of the Black Union” address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley’s annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley’s yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

RELI373 Religion, Science, and Empire: Crucible of a Globalized World

The development of modern science—and of modernity itself—not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistememes.

RELI375 Relic and Image: The Archaeology and Social History of Indian Buddhism

This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be
covered include the cult of the Buddha’s relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodh Gaya (site of the Buddha’s enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

RELI377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or “inflationary,” version of the big bang hypothesis in relation to Christian and indigenous myths of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast “multiverse” in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies—that is, theories that posit a rebirth of the cosmos out of its fiery destruction—in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle “decides” upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

RELI393Z “If there is no God, then everything is permitted?” Moral Life in a Secular World

In Fyodor Dostoevsky’s The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind “without God and immortal life,” asking whether this means that “all things are permitted.” Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and “godless Soviets,” to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by “totalitarian” regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity’s master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion’s moral and spiritual function be performed by a different kind of belief system?

RELI395 The Anthropology of Religion
What do we study when we study religion? We can observe practices, record speech, examine objects and actions—but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of “explaining away” the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

RELI398 Majors Colloquium in Religious Studies
This seminar provides an opportunity for majors to reflect even more critically upon the theories, methods, and discourses that constitute the academic study of religion. We will be concerned with current studies in history and the history of religions, the interpretation of texts, anthropology, feminist theory, and post-colonial theory.

With particular emphasis on case studies, the seminar will explore how scholars operate within disciplinary communities, choose their topics, engage interlocutors, weigh issues of emic and etic interpretation, and—on good days—publish their analyses.

Each member of the seminar will choose a local religious community to engage throughout the semester as a further opportunity to consider the choices scholarship entails.

RL&L123 Love, Sex, and Marriage in Renaissance Europe
This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

RL&L123F Love, Sex, and Marriage in Renaissance Europe (FYS)
This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

RL&L126 El Greco to Picasso: Modern Art’s Passion for Golden Age Spain

This course examines the life and afterlife of the Spanish artists of the Golden Age, whose achievements reached unprecedented heights in the 17th century. Centuries later, their works took on new roles as artists of other times and cultures found their own inspiration in works of the past: Manet copied Velázquez, Picasso copied El Greco, and (famously on “Project Runway”) Christian Soriano copied Murillo. What allowed these complex works to resonate so strongly in another era? Is such influence automatically a sign of success? And why have the works of Francisco Goya inspired more filmmakers than any other artist? Students will be introduced to the reading of visual art for stylistic, historical, and political content and develop a critical understanding of art and society in Golden Age Spain, as well as insights into the role of art as a cultural currency.

RL&L127 Catholicism and Ideology in the Hispanic World

Catholicism has played a number of roles in the cultural politics of the Hispanic world, appearing as a place of national being, resistance, and conservatism. In this course, we will read a number of texts from different periods and national contexts with a view to understanding how writers and intellectuals from Spain, Latin America, and the U.S. engage with Catholicism and the historical conditions under which they do so.

RL&L129 Writing the French Revolution

“Liberty, equality, and fraternity” was the slogan of the French Revolution and features three concepts of enduring interest. In this seminar we will explore the French Revolution and its antecedents—and what these can mean for us today. In the process we will delve into a number of ways of thinking and modes of representation: historical thinking, of course, but we will also get a sense of the origins of sociology and political science, the power of scientific thinking, and differences between literary and visual representation (especially films). This course will also serve as a writing workshop emphasizing the nuts and bolts of good writing and experimenting with such rhetorical modes as argument, personal narrative, persuasion, and fiction-writing.

RL&L130F If This Is an Author: Primo Levi and the Politics of Authorship

Imagine this: an alleged Holocaust survivor in Pennsylvania frequently makes appearances in schools and other gatherings to discuss his experiences in a concentration camp. He shows the number tattooed on the inside of his wrist. It is later discovered that this is not his number but, rather, Primo Levi’s, noted Italian chemist, Holocaust survivor, and writer of many genres (testimonial and memoir, poetry, science fiction, non-fiction) that have been translated into more than 40 languages worldwide. Not only this, but the stories he told--so that a living memory of the Shoah could be carried forward to younger generations--were not his but, rather, the stories of others.

What do these appropriations of text (an Auschwitz identification number) and body tell us? The subject of our course is the holder of that identification number, Primo Levi. In this course that focuses on Levi’s works, we will explore questions of authorship, reception, and appropriation of a non-Anglophone writer who confronted some of the most difficult themes of the 20th century: genocide, evil, the uses of science and technology, the importance of clear communication, the relationship between historical truth and memory, and the meaning of life.
In this First Year Seminar, students will hone their writing skills by reflecting on what an author is in theory (e.g., Foucault, Barthes) and in practice, engaging with and reacting to Levi's works through such questions as: What makes a literary work authentic and why should we trust the words of an author? How do authors affirm their authority differently in their own country and abroad, and what is the role of publishers, translators, and critics in their reception? What happens when an author becomes a character for another author, and, more generally, what are the aesthetic and ethical implications of appropriating an author's body (of work)? These are some of the questions that will animate our discussions and provide the basis for writing assignments.

RL&L140F Van Gogh and the Myth of Genius (FYS)
This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making—both in his time and today—in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist’s own account of his paintings and prodigious correspondence. Van Gogh’s extensive, insightful, and fascinating writing begs the question of how one should treat an artist’s statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886–1890.

RL&L148F Responding to Political Turmoil (FYS)
“What just happened? What’s going to happen? What do we do now?” Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions—including the creation of the U.S.; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil’s military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo—to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The course is both academic and project-based: as we gain perspective through academic readings and assignments on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and intended to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L150F Undoing Gender in Medieval France
In this course, we will go way back—before Stonewall and even Simone de Beauvoir—to depictions of gender diversity in multiple medieval literary genres including romances, songbooks, lais, and chantefable. We will dive deep into medieval French texts with an ability to hold ambiguous and complex representations of gender and sexuality. We will discuss canonical French literary works in translation and also in medieval manuscript, alongside contemporary works on gender, queer, and trans theory, in order to illuminate what medieval literature can teach us about gender identities and desire processes that trouble or even escape the gender binary, as it is commonly understood today. As will become clear from our explorations of medieval French texts and manuscripts, many identity categories that we take to be stable, eternal, or “natural,” are contingent and simply “naturalized.” Medieval genders are not ours, and our genders will not be those of future generations.

This is a writing-intensive course, and you will produce upwards of 20 pages of academic writing by the semester’s end. In this class, we will consider writing a collaborative and ongoing process. In the first few weeks, you will be exposed to ideas about gender and sexuality that surprise you. Your first written assignment will be to describe something “weird” that intrigues you and that you would like to investigate more. Sparks of confusion and intrigue are often seeds that grow into ideas and ultimately arguments! As you investigate this topic, you will be encouraged to begin writing about it, and sharing your writing with your peers. In addition to reviewing drafts of your peers essays, you will produce abstracts, outlines, and short conference papers to practice different means of focusing your thought in writing and communicating your thoughts to an audience. Our course will culminate in a collaborative miniconference, where we will work collaboratively to trouble and undo commonsense notions of gender.

Reading knowledge of French is quite helpful but not essential to this course.

RL&L203 Modern Europe
This course surveys the history of Europe since 1815 and is intended primarily as an introduction to decisive events and interpretation of central themes. Attention will be devoted to major political, social, economic, and cultural developments, beginning with the many dimensions of the political and industrial revolutions of the 19th century; continuing with the emergence of nation-states and nationalism, working-class movements, the consequences of imperialism and the World War I, and communism and fascism; and concluding with study of the World War II, the reassertion of Europe, the collapse of the Soviet system, and contemporary issues.

RL&L210 Romanesque and Gothic Art and Architecture
This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the reliquary; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

RL&L211 What is Sicily?
Language is frequently thought of as the accompaniment of empire. How, then, does one study a poetry without an imperium? This course examines Sicilian culture as a phenomenon which developed under the rule of many empires (Greek, Byzantine, Arab, Norman, French, Spanish) whilst never itself an empire. Birthplace of the sonnet and crossroads of a plurality of cultures, the Sicilian language remains a literary language to this day. What does it mean to write in Sicilian? At the margins of history, empire, and continent, this course examines the growth and transformation of a colonized island from antiquity to the present through its literatures.

RL&L212 Early Renaissance Art and Architecture in Italy
This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.
Offering: Crosslisting

RL&L213 Introduction to Existentialism
This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldúa, and Frantz Fanon. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

RL&L217 Venice and the Renaissance
Venice -- a city built almost impossibly on a forest of stilts sunk into the mud of the lagoon and buttressed by powerful myths of divine origins, permanence, and prosperity - produced some of the most spectacular works of Renaissance art and architecture. This introductory-level course on the art and culture of Venice's "golden age" considers the works of artists such as Carpaccio, Bellini, Giorgione, Titian, Veronese, and Tintoretto, and architects such as Codussi, Sansovino, and Palladio in the context of the city's unique setting, social and governmental structure, cultural and political milieu, and larger geopolitical significance. It also positions Venice's artistic production within the broader framework of early modern Europe, exploring its connections with Byzantium and the Islamic world. The course also introduces students to key issues and methods of art history.

RL&L220 Authority and Resistance: France Since 1870
Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.
Offering: Crosslisting
This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

In this service-learning course, students are required to volunteer a minimum of two hours per week in the Middletown Public Schools, assisting French, Italian, and Spanish teachers in their world language classes. Students will write weekly journal entries reflecting on their classroom experience, and will learn to evaluate, adapt, and create pedagogical materials. By the end of the semester, they will have created a portfolio of activities that can be used in a foreign language classroom.

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolo Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

How does one re-create someone else’s life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence—from the archive, primary sources, secondary sources, and written shreds of a life—to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713–1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting.

RL&L226 The Cosmos of Dante's "Comedy"
In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the relationship to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RL&L227 Desire, Deception, Disenchantment: Five French Novels in Translation and on Screen
This course aims to study five French novels from the 17th to the 20th centuries in translation, alongside and against their respective cinematic adaptations. We will begin with Lafayette's The Princess of Cleves (1678), one of the Western world's first psychological novels, and then move on to Choderlos de Laclos' epistolary novel Dangerous Liaisons (1782). We will then read Gustave Flaubert's Madame Bovary (1856), Albert Camus' The Stranger (1942), and Marguerite Duras' The Lover (1984). Films will include: Jean Delannoy's 1961 adaptation of Lafayette's novel, Christophe Honoré's The Beautiful Person (2008), a modern-day adaptation of the story, and Rémy Sa二者's 2011 documentary on how the novel is being used in a French school in Marseille; three adaptations of Laclos' novel: Roger Vadim's cutting-edge Les Liaisons dangereuses 1960, Miloš Forman's 1989 Valmont, and Stephen Frears' 1998 acclaimed Dangerous Liaisons; three adaptations of Madame Bovary: Vincent Minnelli's film (1949), Claude Chabrol's adaptation from 1991 starring Isabelle Huppert, and Sophie Barthes' version (2014); Luchino Visconti's adaptation of Camus' The Stranger (1967); and Jean-Jacques Annaud's The Lover (1992). These novels and their adaptations will allow us to think about notions of canon formation; genre and narrative; the uses of history in fiction; censorship, controversy, and crime; gender, class, race, and (post)colonialism; translation; and how these texts have been and continue to be read, used, adapted, and transformed from their time of publication up to the present day.

RL&L230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s
In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

RL&L231 Mystics and Militants: Medieval Women Writers
In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the misogynist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's La dolce vita, Pasolini's Mamma Roma, De Sica's Matrimonio all'italiana, Leone's Il buono, il brutto, il cattivo, Argento's Suspiria, Moretti's Caro diario, Ozpetek's Saturno contro, and Giordana's Quando sei nato non puoi più nasconderti. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationships of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory

...
Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized—the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist’s personal correspondence in relationship to his painted oeuvre, and independent research.

RL&L237 Making New Worlds: Encounters on Turtle Island
From before the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years’ War, Turtle Island (North America) was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on Indigenous homelands with deep histories. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease). Throughout, we will focus on the persistence and resistance of Indigenous nations who protected (and still protect) their homelands and lifeways.

RL&L238 Unfinished Revolutions: Uprisings in North America, 1760-1815
While the American Revolution dominates the historical landscape of early American history, the “Age of Revolutions” was full of uprisings in North America. This course will explore resistance movements that began in the latter part of the 18th century, most of which remain unfinished. Students will learn about pan-Indigenous uprisings against settlers, labour revolts against capital, enslaved men and women fighting for freedom, and other resistance movements that shaped (and were shaped by) the American Revolution and the fracturing of the British Empire.

RL&L239 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art
This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making—both in his time and today—in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist’s personal correspondence in relationship to his painted oeuvre, and independent research.

RL&L240 Revolutionary France and the Birth of Modern Art, 1789-1900
This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. During this period, France emerged as the uncontested center for art in the West, with its exhibitions drawing artists from all over Europe and the Americas. France’s established art institutions were tested by the fires of Revolution and emancipation ideologies, resulting in a uniquely vibrant art scene centered on the nation's capital, Paris. The city underwent a series of physical, political, and social transformations during this period, which brought artists to overturn timeless ideals and triumphal narratives.

Themes this class explores include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution in France and its colonies; the redefinition of history painting in light of the abolition of slavery and the Declaration of the Rights of Man; the expansion of France’s colonial empire and the representation of racial difference; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the destabilization of classicism in light of scientific discoveries and ideas of “primitivism”; and the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience. Although these developments took place two centuries ago, they continue to define the field of modern art today.

RL&L241 Introduction to European Avant-Garde, 1880-1940
This course will introduce students to the major avant-garde art movements from the first half of the 20th century as they took root in France, Germany, Italy, Holland, and Russia. Our focus will be on painting, but we will also look at attempts to go beyond painting in an attempt to gain greater immediacy or social relevance for art. Topics that will receive special emphasis include the relationship between abstraction and figuration, the impact of primitivism and contact with non-Western arts, modernism’s relationship to mass culture, war and revolution, gender and representation, art and dictatorship, and the utopian impulse to have the arts redesign society as a whole.

RL&L242 Italian and Italian American Cinema: Not Just Mafia Movies

The entanglements of Italian and Italian American cinema date to the medium's silent era. If the Taviani Brother's 1987 film Good Morning, Babylon is to be believed, while filming Intolerance (1916) D.W. Griffith lauded and lamented the genius of Giovanni Pastrone's colossus Cabiria (1912), doubting that his own epic film would be able to match the virtuosity of the earlier Italian example. Flash forward to 1931-32 and the trio Little Caesar (1931), Public Enemy (1931), and Scarface (1932) sear into the American imaginary the cinematic representation of the Italian mobster. Beyond Italian artistry and aesthetics of the sort Griffith ostensibly applauded, and the numerous examples of the violent, lawless gangster of Italian descent, what are some other (stereo) typical intersections between Italian and Italian American cinema?

Mapping the Transatlantic transmissions of representations, stereotypes, and aesthetic values reveals how these two cinematic traditions co-articulate and condition each other, with "Hollywood on the Tiber" offering a chief example of the ways Italian and American industrial contexts invoke and implicate each other. How do Hollywood's glamorized gangsters inform Italian representations of organized crime? How do American cinematic "Latin lovers" draw on Italian models? How have representations of masculinity, men, and fathers; femininity, women, and mothers; (large) families, food, religion, class mobility, questions of race and racism, and immigration unfolded in their respective contexts and what do intersections among them reveal?

Two non-fiction films from Scorsese help draw our parameters for our discussion: Italianamerican (1977), for socio-cultural codes; for cinematic contexts, My Voyage to Italy (1999), in which the director reviews his Italian influences and which also serves as an introduction to Italian cinema. We subsequently investigate the indicated themes and topics as they range across a corpus of texts which includes, on the Italian American side: Scarface (Hawks, 1932), Not Wanted (Lupino, 1949), The Godfather (Coppola, 1972), Mean Streets (Scorsese, 1973), Rocky (Avildson, 1977), Raging Bull (Scorsese, 1980), Moonstruck (Jewison, 1987), Married to the Mob (Demme, 1988), True Love (Savoca, 1989), Do the Right Thing (Lee, 1989), The Freshman (Bergman, 1990), Goodfellas (Scorsese, 1990), My Cousin Vinny (Lynn, 1992), Household Saints (Savoca, 1993), The Sopranos (Chase, 1999), The Departed (Scorsese, 2006), Wendy and Lucy (Reichardt, 2008), The Miracle at St. Anna (Lee, 2008). Alongside these, we examine Italian films drawn from this list: Cabiria (Pastrone, 1912), Umberto D. (De Sica, 1952), I Vitelloni (Fellini, 1953), Rocco and His Brothers (Visconti, 1960), Eclipse (Antonioni, 1962), Amarcord (Fellini, 1974), Kaos (Taviani Brothers, 1984), Mediterraneo (Salvatores, 1990), Johnny Stecchino (Benigni, 1991), Lamerica (Amello, 1994), Gomorra (film Garrone 2008, series 2014), The Young Pope (Sorrentino, 2016), and The Confessions (Andò, 2016). The films for group presentations will also be drawn from these lists.

This course has no prerequisites. We will work on students' capacity for formal film analysis as we go along and, at the beginning of the course, some students may have greater proficiency in this area. At the same time, other students may initially have a broader knowledge base of Italy and Italian society. Everyone has something to learn. Conducted in English.

RL&L275F Religions Resisting Modernity (FYS)
Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn’t? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of what it means to be modern.

RL&L284 Comparative Politics of Western Europe
The leading nations of Western Europe—Great Britain, France, Germany, and Italy—have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian “second republic”?

The Arthurian Legend on Film
This course will serve both as an introduction to the Arthurian legend and to its cinematographic representation since the 1940s. Medieval texts will be paired with films that are "based" -- more or less closely -- on them. We will consider the ways in which these stories are told in literature and in film and the differences between them. We will also consider the ways in which the legend was used to address both medieval and modern preoccupations.

History of Spanish Cinema
This course explores the development of Spanish cinema from the early 20th century to the present. We will evaluate how social, political, and economic circumstances condition Spanish cinematography at key junctures of Spanish cultural history in terms of the production and distribution of films, cinematographic style, and themes. The course will also highlight key facets of the Spanish star system as well as the auteurism of those directors who have achieved international acclaim by reworking a national film idiom within international frames of reference.

Translation Workshop in Early Modern Spain: Topographies of Love, Arcadia, and History
This course takes a practical approach to the translation of early modern Spanish literature. We will begin by consulting various comments on the art and craft of translation made by 16th-century Spanish translators in their own works before we encounter the curious case of the "pastoral prosimetrum," a type of narrative fiction that reimagined the author and their contemporaries under literary pseudonyms in an updated version of an idyllic Arcadian landscape. From Spanish to English, from experience to poiesis, we'll recontextualize these topographies of love in their own literary and historical moment in order to translate those imaginaries into contemporary English. Readings will be in English and Spanish. Discussions and translations will be in English. There are no prerequisites, but reading knowledge of Spanish is required. Please consult the instructor if you have questions about your language ability.

Dialogues of Love: A Close Reading
Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philemon) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

Eloquent Forms: Topics in Italian Renaissance and Baroque Sculpture
Early modern Italy was a site of vibrant and wide-ranging innovations in the field of plastic arts. Fueled by fierce competition, financed by extravagant expenditures, and created for a range of religious, commemorative, and decorative functions in both public and private realms, the sculptural medium reached a pinnacle of creative expression, material experimentation, and theoretical engagement in this period. From monumental urban commissions such as fountains to small-scale precious objects sought out by the wealthy collectors, sculptural works profoundly shaped the visual worlds of early modern Italy. This seminar on the making and meaning of sculpture in the Renaissance and Baroque periods will engage students with the works and careers of several key artists of the era, including Lorenzo Ghiberti, Donatello, Andrea del Verrocchio, Niccolò dell’Arca, Francesco Laurana, Properzia de’ Rossi, Michelangelo, Benvenuto Cellini, Giambologna, Leone Leoni, Gianlorenzo Bernini, and Alessandro Algardi, among others. Seminar readings and discussions will be structured around broad themes such as: making and viewing of early modern sculpture; rhetoric of sculptural materials; verismilitude and sculptural animation; sculpture and the senses; fragmentation and the "non-finito"; touch, desire, and the nude; representations of force and violence; antiquarianism and sculpture collecting; tombs and sculptural commemoration; and monsters and monstrosity in garden sculpture.

Criticism and Psychoanalysis
This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

Appeasement and the Origins of the Second World War
In this study of Europe’s crisis, 1933-1939, from Hitler’s appointment as chancellor of Germany to the outbreak of the Second World War, attention will focus upon the reassertion of German power and its effects upon the diplomacy...
and politics of Great Britain and France. Specific topics will include Hitler’s aims and actions; critical events concerning the Rhineland, Spain, Czechoslovakia, and Poland; pacifism and the French Left; Neville Chamberlain and British conservatism; and the debate over the immediate origins of the war in 1939. Readings will include memoirs and contemporary diplomatic documents, newspapers, and journals.

**RL&L339 Modernism and the Total Work of Art**

The term “total work of art” refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner’s ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner’s works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

**RL&L350 Integrative Learning Project 2: Website Incubator**

Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you!

Throughout the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world’s most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

**RL&L351 Deconstruction and Politics**

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such? We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

**RL&L390 Directed Research in European Studies**

This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one’s research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

RUSS205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realistic masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RUSS208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: HA-REES
We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets' dialogues with each other across cultures. For example, we will learn how Mayakovsky's "ladder" might have influenced Williams' verse libre, or how Joseph Brodsky learned T. S. Eliot's theory of impersonality in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost's visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

RUSS223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities—all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RUSS224 Performing Russian Culture: From Peter the Great to the Russian Revolution
This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

RUSS226 Documentary Fictions
How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of non-fiction? How does creative non-fiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present?

This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

RUSS233 Introduction to Russian and Soviet Cinema
This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

RUSS234 Introduction to Russian and Soviet Cinema (CLAC.50)
This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture.

The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills.

RUSS235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RUSS240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections of exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

RUSS251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

Prereq: None

RUSS252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature

viewed in Russia as the intelligentsia’s primary medium for debating its big

questions (such as how to resolve the inequalities that had been institutionalized

under serfdom, or how to choose between new and old values as Russia

experienced modernization). Writers like Tolstoy and Dostoevsky willingly

assumed the responsibility to address a broad range of political, historical,

and philosophical-religious questions in their fiction, and they wrote novels

with radical formulations as well as solutions to these questions. However,

they also viewed literature, particularly the novel, as a medium with rich

potential for innovative formal experimentation, and so they resisted the call

for conventional ideological novels. Each of Tolstoy’s best works is an innovative

formal experiment that creates an unprecedented, new type of novel. This

course will study how Tolstoy’s writings both responded to and transcended their

times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four

semesters, a half-credit course is available in which we will read excerpts from

Tolstoy’s works (CGST 330).

RUSS252 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the

development of twentieth-century Russian literature by focusing on the prose

and poetry of authors awarded the Nobel Prize in Literature—Ivan Bunin (1933),

Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970),

Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students

will read Lev Tolstoy, who rejected being nominated for the prize, as well as

Vladimir Nabokov and Anna Akhmatova, who arguably merited the award

but never received it. On the broader level, the class will ponder literature’s

relevance for shaping public discourse on cultural policies, national identities,

and international relations.

RUSS254 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and

Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern

Europe, with an emphasis on the Czech novel. The novels we will read make

history come alive through the eyes of vividly individual characters. In Joseph

Roth’s Radetzky March, the collapse of the Austro-Hungarian Empire is viewed

through the lens of a single heartbroken family; in Bohumil Hrabal’s I Served the

King of England, the Czech experience in World War II and postwar Stalinization

is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko’s

Mondegreen is an experimental narrative told through the eyes of a refugee

from the Ukrainian Donbas region in Kyiv who struggles with language and

identity; Nobel Prize-winner Olga Tokarczuk’s Flights provides a constellation

of short narratives that attempt to capture the place of the body in the world

of travel and migration; in Witold Gombrowicz’s Trans-Atlantyk and Aleksandar

Hemon’s The Question of Bruno, the main characters find themselves in a foreign

land when their home countries (Poland and Yugoslavia, respectively) are torn

apart by war. All the works we will read exemplify the high level of narrative

sophistication, in realist, absurdist, and experimental modes, that is a hallmark

of Central and Eastern European literature.

RUSS256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th

century. On November 7, 1917, the Bolshevik party launched a revolution against

the government of the Russian Empire with the aim of overthrowing not just

the state but capitalism, the economic and social system that defined modern

civilization. Over the coming decades, the state they created (eventually named

the USSR) embarked on an unprecedented project to transform human beings

and remake the world. On December 26, 1991, the Soviet Union collapsed into

15 European and Asian countries.

The Soviet project raises fundamental questions about political systems,

economics, and human nature—questions that are a long way from being

answered. It also shaped modern history all over the world, including in the

United States, which confronted the Soviet Union as its political and ideological

archenemy during the Cold War. In charting the USSR’s trajectory from pariah

nation after World War I to global superpower following World War II, we will

move beyond the cliched view of the Soviet Union as the Evil Empire. Instead, we

will examine the ways in which socialist modernity offered an alternative to its

capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and

during the Cold War, the class will examine how the Soviets sought to rethink

issues of class struggle, family structure, education, gender dynamics, race,

religion, sexuality, and patriotism. We will consider the theoretical writings of

Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovskiy,

Akhmatova, Platonov, Pasternak, Tsveetaeva, Berggolts, and Nabokov, among

others. Particular attention will be paid to underground cultures that arose in

response to the repression of free speech, ethnic discrimination, and the Gulag

prison system. All readings are in the English translation.

RUSS260 Dostoevsky’s BRAT’IA KARAMAZOV
A seminar devoted to close reading of the original text of Dostoevsky’s 1879-80

novel. All students will be required to read the entire text in English, and each

week specific passages will be read in Russian. In class we will analyze and

discuss the text in Russian. Students will give presentations about critical works

related to the novel and to Dostoevsky’s work in general. Dostoevsky’s novel

enters into a great dialogue with the political, historical, philosophical, and

religious discourses that were prevalent in 19th-century Russia. Study of the

novel entails learning the various languages of 19th-century Russian culture.

Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres

and styles that Dostoevsky weaves together in his great novel. Class will be

conducted in Russian.
The course is taught in English. No knowledge of Russian is required.

RUSS279 Chekhov: Prose vs. Drama

This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists—author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild's Violin," and "The Lady with a Lapdog."

As one of Chekhov’s biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov’s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov’s admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov’s influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings.

All readings and discussion are in English.

RUSS290 Tolstoy Part One: War and Peace and Other Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy’s career, beginning with his experiments in the narration of consciousness (“A History of Yesterday” and Childhood) and in the narration of the experience of war (Sevastopol Stories).

The course is taught in English. No knowledge of Russian is required.

RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon’s formulation, that parody is “repetition with critical distance, which marks difference rather than similarity,” provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of “restorative parody,” as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice’s Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda’s Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RUSS276 Contemporary Russian Literature

The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepantova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses

Nikolai Gogol (1809-1852), hailed as one of Russia’s greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol’s satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol’s interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol’s reception by modern Russian and Western writers and critics. The course is conducted in English.

RUSS290 Tolstoy Part One: War and Peace and Other Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy’s career, beginning with his experiments in the narration of consciousness (“A History of Yesterday” and Childhood) and in the narration of the experience of war (Sevastopol Stories).
The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy’s best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy’s writings both responded to and transcended their times by creating new fictional forms and new truths within those forms. The course will be conducted in English.

RUSS291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy’s mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy’s own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy’s final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RUSS297 Music of Central Asia: From Throat-Singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres (Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip-hop). The roles and meanings of music and the status of musicians are discussed in relation to wider aspects of cultural and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization. The course draws on extensive audiovisual materials and is open to students of all levels. No background in music or Central Asia is required.

RUSS321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period’s artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an “off-modern” path. The course will conclude with a discussion of the revolutionary avant-garde’s legacy in the East Berlin underground and post-Soviet Moscow.

RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RULE208F Otherness & Belonging (FYS)
One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of
undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RULE220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experiment. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RULE222 Russian and American Poetic Encounters
The fascination of Russian poets with American authors, and the curiosity of Anglophone poets about the culture of Russia and the USSR, are trends that accompany the turbulent twentieth century, when the political relationships between Russia and the USA were largely inimical. But it was also a period when poetry mattered. In this course, we will focus on some of the most significant poets of the twentieth century.

We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets’ dialogues with each other across cultures. For example, we will learn how Mayakovsky’s “ladder” might have influenced Williams’ vers libre, or how Joseph Brodsky learned T. S. Eliot’s theory of impurity in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost’s visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

RULE223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works work directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities—all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RULE224 Performing Russian Culture: From Peter the Great to the Russian Revolution

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of “Russianness.” The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

RULE233 Introduction to Russian and Soviet Cinema

This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

RULE235 Queer Russia
Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years—whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"—have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RULE240F Reading Stories: Great Short Works from Gogol to Petrushevskaya
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

RULE251 Dostoevsky
Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RULE252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RULE254 Nobel Laureates: The Politics of Literature
This course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature—Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

RULE255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's Redetsky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RULE267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon’s formulation, that parody is “repetition with critical distance, which marks difference rather than similarity,” provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of “restorative parody,” as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice’s Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda’s Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RULE276 Contemporary Russian Literature The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Ljudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

Offering: Crosslisting Grading: A-F Credits: 1.00 Gen Ed Area: HA-REES Identical With: REES276, WLIT266, RUSS276 Prereq: None

RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses Nikolai Gogol (1809-1852), hailed as one of Russia’s greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol’s satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol’s interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol’s reception by modern Russian and Western writers and critics. The course is conducted in English.

RULE279 Chekhov: Prose vs. Drama This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists—the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as “Ward No. 6,” “The Black Monk,” “Rothschild’s Violin,” and “The Lady with a Lapdog.”

As one of Chekhov’s biographers put it, “Of all the Russian ‘classics’ he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy” (Donald Rayfield).

Poetic, dense, and elusive, Chekhov’s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov’s admirers believe
that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RULE290 Tolstoy Part One: War and Peace and Other Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RULE291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RULE321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalistic agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES200 Histories of Ukraine
Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses a specific territory, it has also been a space where multiple communities—Ukrainians, Russians, Jews, and Poles—have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

REES204 Entangled Sounding Objects: Musical Instruments of Central Asia
Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel
The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin’s elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

REES216 Secularism: Godlessness from Luther to Lenin
Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther’s arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

REES219 Russian and Soviet History, 1881 to the Present
Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the “short” Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and
human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

REES220 Speak, Memory: The Russian Memoir
Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

REES221 Queering Russian Music
How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international acceptance of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer theory and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u, Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

REES222 Russian and American Poetic Encounters
The fascination of Russian poets with American authors, and the curiosity of Anglophone poets about the culture of Russia and the USSR, are trends that accompany the turbulent twentieth century, when the political relationships between Russia and the USA were largely inimical. But it was also a period when poetry mattered. In this course, we will focus on some of the most significant poets of the twentieth century.

We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets' dialogues with each other across cultures. For example, we will learn how Mayakovsky's "ladder" might have influenced Williams' vers libre, or how Joseph Brodsky learned T. S. Eliot's theory of impersonality in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost's visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

REES223 After Communism: Animals, Avatars, Hybrids
During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities—all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

REES224 Performing Russian Culture: From Peter the Great to the Russian Revolution

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of “Russianness.” The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

REES225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx’s vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state’s repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn’t like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangoes became Mao’s relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

REES226 Documentary Fictions

How stable is the binary distinction between the documentary and the fictional? Is fiction’s claim to representing reality any less valid than that of non-fiction? How does creative non-fiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present?

This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

REES230 Socialist Utopias: Transcendence and Religion in Communist States

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx’s vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state’s repression of organized religion? We will read some Marx and some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn’t like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangoes became Mao’s relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

REES233 Introduction to Russian and Soviet Cinema

This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

REES234 Introduction to Russian and Soviet Cinema (CLAC.50)

This course provides an introduction to the history and poetics of Soviet and Russian cinema—Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class
consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

REES235 Queer Russia
Russia is accustomed to playing the role of the “evil empire.” The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years—whose functions range from banning Americans from adopting Russian orphans to criminalizing the so-called “gay propaganda”—have further solidified Russia’s reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country’s systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

REES240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)
This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students’ own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy’s novellas of faith, adultery, and facing death; Gogol’s surreal comedies and urbanistic fantasies; Chekhov’s subtle psychological tales; Bunin’s reflections from exile on a lost Russia; Bulgakov’s sketches of life as a country doctor; and Petrushevskaya’s modern stories of the tortured lives of women in the late Soviet period.

REES251 Dostoevsky
Dostoevsky is widely recognized as one of the world’s greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky’s major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

REES252 Tolstoy
During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia’s primary medium for debating its big questions [such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization]. Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy’s best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy’s writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy’s works (CGST 330).

REES254 Nobel Laureates: The Politics of Literature
The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature—Vladimir Nabokov (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature’s relevance for shaping public discourse on cultural policies, national identities, and international relations.

REES255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe
This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth’s Radetzky March, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal’s I Served the King of England, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Vojdymyr Rafeyenko’s Mondegreen is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and
identity; Nobel Prize-winner Olga Tokarczuk’s Flights provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz’s Trans-Atlantyk and Aleksandar Hemon’s The Question of Bruno, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

REES256 The Soviet Century
This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature—questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR’s trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

REES260 Dostoevsky’s BRAT’IA KARAMAZOV
A seminar devoted to close reading of the original text of Dostoevsky’s 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. Class will be analyzed and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky’s work in general. Dostoevsky’s novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

REES267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred
Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon’s formulation, that parody is “repetition with critical distance, which marks difference rather than similarity,” provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of “restorative parody,” as exemplified in the medieval practice of parodia sacra (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of parodia sacra in Andrew Lloyd Webber and Tim Rice’s Jesus Christ Superstar, and of restorative parody in Lin-Manuel Miranda’s Hamilton. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, Campbell v. Acuff-Rose Music, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

REES268 Nabokov
Vladimir Nabokov—brilliant writer, outrageous literary gamesman, and cosmopolitan exile—is a towering figure of 20th-century literature. His most famous novel, “Lolita,” propelled him to international stardom and changed the transnational literary landscape. Child of a turbulent century, Nabokov wrote exquisite and at times disturbing prose in Russian and English, balancing between imaginary worlds and harsh realities. This seminar offers a sustained exploration of Nabokov’s major Russian and American writings as well as film adaptations of his “Despair” (Rainer Werner Fassbinder) and “Lolita” (Stanley Kubrick). We will consider memory, exile, trauma, nostalgia, and identity as we adapt Kubrick. We will consider memory, exile, trauma, nostalgia, and identity as we read Nabokov, who saw existence as a “series of footnotes to a vast, obscure, unfinished masterpiece.”

REES276 Contemporary Russian Literature
The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s, and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila
Petrushkovskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

REES277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses
Nikolai Gogol (1809-1852), hailed as one of Russia’s greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol’s satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol’s interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol’s reception by modern Russian and Western writers and critics. The course is conducted in English.

REES279 Chekhov: Prose vs. Drama
This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists; the author of such classic plays as The Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard. Chekhov also wrote profound prose works, such as “Ward No. 6,” “The Black Monk,” “Rothschild’s Violin,” and “The Lady with a Lapdog.”

As one of Chekhov’s biographers put it, “Of all the Russian ‘classics’ he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy” (Donald Rayfield).

Poetic, dense, and elusive, Chekhov’s writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov’s admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov’s influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

REES280 Russian Politics
The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. While the focus of the course is Russia, students will also study the transition process in the other 14 states that came out of the Soviet Union. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

The course will include a role-playing simulation of Kremlin decision making that will run over several weeks.

REES289 Indigenous Religions: Politics, Land, Healing
From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the “natives” have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor’s own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a “noble savage,” what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

REES290 Tolstoy Part One: War and Peace and Other Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy’s career, beginning with his experiments in the narration of consciousness (“A History of Yesterday” and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy’s best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy’s writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

REES291 Tolstoy Part Two: Anna Karenina and Later Works
Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy’s mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy’s own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy’s final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

REES296 Soundscales of Islam
From the melodious recitation of the Qur’an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieux. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscales and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim ‘counterpublics’; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur’an and Sunna, shari’a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

REES297 Music of Central Asia: From Throat-Singing to Heavy Metal
The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres (Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip-hop). The roles and meanings of music and the status of musicians are discussed in relation to wider aspects of cultural and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization. The course
draws on extensive audiovisual materials and is open to students of all levels. No background in music or Central Asia is required.

REES299 Imagining Communities: National Religions and Political Rituals
From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadalupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

REES318 The Politics of Death: The Living, the Dead, and the State
This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation in Russia, and monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

REES321 Moscow/Berlin: Dreamworld and Catastrophe
The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES344 "If there is no God, then everything is permitted?" Moral Life in a Secular World
In Fyodor Dostoevsky's The Brothers Karamazov, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.
Russian, East European, and Eurasian Studies (REES)

One of modernity’s master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion’s moral and spiritual function be performed by a different kind of belief system?

REES352 The Communist Experience in the Soviet Union (CLAC.50)

Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project will involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

REES353 The Communist Experience in the 20th Century

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism’s answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day’s materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day’s online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

REE5377 Perspectives in Arts as Culture: Ukrainian Arts and Language as Resistance
Throughout history, arts and language have been central to Ukrainian resilience. This course will introduce students to basic elements of the Ukrainian language as well as the rich tradition of Ukrainian arts--dance, theater, poetry, literature, visual arts and crafts--and the way they have survived and thrived despite 400 years of censorship and persecution. Each week, one class will focus on the basics of the Ukrainian language, its history as a vital element of the Ukrainian culture, as well as current national language policy and practice. The second class will explore the ways that arts in Ukraine foster psychosocial, physical, and political resilience in the face of crisis. Students will engage with traditional arts and crafts, learn about leading experimental artists (1700s-present) and their role in major art movements in history, hear from an array of guest artists from Ukraine, and complete a final creative project that explores the current political moment and conflict in Ukraine.

SCIENCE IN SOCIETY PROGRAM (SISP)

SISP115F Reproductive Politics (FYS)
This course explores the history and current status of reproductive politics in the United States. By prioritizing issues of difference, including race, gender, sexuality, disability, and class, the course will consider how scientific and bioethical concerns intersect with matters of cultural ideology and social control. Issues covered will include: the history and legacy of the birth control movement; the ideological construction of “infancy”; changing attitudes towards pregnancy and childbirth; gendered and racialized conceptions of parenthood; abortion rights; the fetal personhood debates; the regulation of pregnancy within incarcerated and institutionalized settings; genetic engineering; reproductive justice; and so on.

In this class, we will discuss technological changes caused by war and accompanying social changes and ethical debates in both militaries and civilian societies. Topics will include technological changes in warfare and weapons, as well as the ways in which societies have responded to new injuries and health issues resulting from war. Subjects may include the development of machine guns, trench warfare, chemical warfare, nuclear warfare, drones, cyber-warfare, and surveillance technologies, in addition to the professionalization of nursing, military psychiatry, medical experimentation, environmental contamination, and disability and health issues for veterans and civilians. We will also talk about the implementation in the civilian world of technologies developed or expanded during war. We will discuss cases from across the globe, focusing chronologically on 1850 to the present. Readings may include selections from Margaret Humphreys, John Ellis, Carol Byerly, Warwick Anderson, Beth Linker, Paul Lerner, Jessica Adler, Edmund Russell, Charles Perrow, Susan Smith, Susan Lindee, Jessica Wang, Kelly Moore, Janet Abbate, Stephen Graham, and others.

SISP135F Skin, Sex, State, Software: Surveillance & Society (FYS)
Scopophilia is the derivation of pleasure from looking. What pleasures does the surveillance state gain from looking at us? From feeling and documenting us? How do privacy activists fight back against such surveillance, and what might be wrong with privacy rights discourse? Which groups are always already surveilled? In this class, students will play with notions of surveillance—including sousveillance, lateral surveillance, and counter-surveillance—as engaged by queer and feminist studies, the cultural anthropology of expertise, and social studies of science and technology. We will draw on case studies ranging from police technologies, facial recognition software, Pornhub's data collection projects, TSA airport body scanners, Facebook ads, science fiction like Black Mirror, and more to understand how bodies, races, genders, and sexualities are made known and contested by activists, artists, corporations, and governments. Students will also collect data for a creative personal surveillance project culminating at the end of the quarter.

SISP190 Introduction to History: Environment
Humans have profoundly altered the character of Earth’s environment since the advent of agriculture and settled societies some 10,000 years ago. This course is a study of the historical relationship between human beings and their habitats, with additional attention to arid lands as places of settlement, cultivation, and development. We explore how global problems such as climate change, biodiversity attenuation, and depletion of fossil soils, fuels, and water are linked to social problems such as economic inequality, food insecurity, conflict, and declining public health. The course reviews evidence of major environmental problems; considers how varied academic disciplines address them; and models a historical approach to understanding environmental change.

The course is divided into two parts: “Environmental Concepts," and "Case Studies." In Spring 2022, the case studies will be devoted to biodiversity.

SISP203 The Secrets of Ancient Bones: Discovering Ancient DNA and Archaeology
New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins, past population migrations, ancient diseases, plant and animal domestication, and even the factors that contributed to the extinctions of megafauna such as woolly mammoths. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: human evolution and genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; extinction and de-extinction; domestication and the origins of agriculture; paleodiseases and paleodiets; and ethics in genetic research.

SISP204 Extreme Landscapes of the Anthropocene
The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term "Anthropocene," questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from "capitalist ruins" to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of "non-judgmental attention" to their critical engagement with the Anthropocene.

SISP205 Sciences as Social and Cultural Practices
Philosophers long construed scientific knowledge as achieved and assessed by individual knowers, but recent work has recognized a greater epistemic role for scientific communities, disciplines, or practices and has taken seriously the social and cultural context of scientific research. This course surveys some of the social, cultural, and political aspects of the sciences that have been most important for scholars in science studies, including differences between experimental, field, and theoretical science; the role of disciplines and other institutions in the sciences; interactions between science and its various publics; the politics of scientific expertise and science policy; the globalization of science; the social dimensions of scientific normativity, from metrology to conceptions of objectivity; race and gender in science; and conceptual exchanges between sciences and other discursive practices. The concept of the social will also receive critical attention in its purported contrasts to what is individual, natural, rational, or cultural.

SISP209 Visual Methods: Introduction to Researching with Visual Materials
This course is designed for students who are interested in visual culture and looking to get to grips with the complex debates and ideas in visual analysis and interpretation. We will consider changes in visual and digital cultures and the new possibilities of visual engagement and communication. Students will learn and apply new visual theories and methods and discover how scholars across the humanities, social sciences, and STEM fields approach visual source in their research, use images to disseminate findings, and weigh ethical considerations in visual research. In addition to theory/methods orientation, the course is designed for students to generate their own ideas for topics for future research projects, especially in the humanities and social sciences, using a range of visual sources, from pre-print to digital, including in Wesleyan's libraries and Special Collections. Students will gain knowledge of different forms and technologies of visual culture from late 18th century graphic satire to early 20th century film, and learn ways to identify different kinds of photographic prints through on- and on-campus field trips. The course will also examine the history of photography as a pivot point between the worlds of analog media and digital media. Students will read essays, lead discussions, attend seminars twice a week, and complete four short analytical papers and/or creative assignments based on our readings and lectures and a final project in lieu of a final exam. There are no prerequisites, and the class is designed to support and further students' interests in/knowledge of the societal significance of art, film and visual culture, whatever their major.

SISP210 Feminist Technoscience: Making Bodies, Bits, and Bombs
This course focuses on feminist transnational approaches to the study of science and technology. It introduces students to a range of critical and experimental figurations, post/colonial theories and methods, and interdisciplinary reading and writing practices proposed by leading and emerging scholars who shape today's vibrant field of feminist STS. While the various approaches share strong commitments to justice, difference, and collective agency, they don't always
mean the same thing. Students will learn to unpack affinities, tensions, and radical possibilities for living with greater care and less violence in a more-than-human, more-than-Western world. The course has three parts. Part I grounds students in canonical texts that have opened up multiple pathways for critically examining patriarchy, war, and technoscience. These texts challenge binaries and hierarchies of nature-culture, organism-machine, modern-traditional, center-periphery and so on. Part II focuses on analyses of colonialism and racial capitalism, and the material-discursive apparatuses deployed to reconfigure how bodies, bits, and bombs come to matter. Part III looks at new works that refuse the end of history and propose a pluriverse of bold alternatives.

SISP215 Metabolism and Technoscience
This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle.

In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

SISP221 History of Ecology
The word “ecology” has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics.

How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

SISP222 Disease and Epidemics in Historical Perspective
Disease and epidemics have been powerful agents of historical change as well as determinants of human development before the advent of historical records. In this lecture course we will examine how diseases have changed human societies over time, with special attention given to the place of disease-causing organisms, from viruses to parasites, in the ecological networks they make home. Yet at the same time, we will keep in mind the ways in which human society and culture also have important causal roles in human disease. HIV, for example, arose because of human interactions with animals but reached pandemic proportions, in part, because of cultural, social, and political forces.

Offering: Crosslisting
SISP223 Liminal Animals: Animals in Urban Spaces
This course examines the major ways in which nonhuman animals influence and are influenced by human-built environments, with specific attention to the ethical, political, and social dimensions of human-animal interactions in these spaces. Discussions, films, readings, and an independent research project will introduce students to key concepts related to urban/suburban animal life. Specifically, it will focus on topics including the use of animals for food, the use of animals as spectacle or entertainment, animals as human companions, urban wildlife, "invasive" species, "vermin" and "problem" animals, animals and the law, ecological webs, and human encroachment in animal spaces.

SISP224 Critical Design Fictions
Design fiction involves the deliberate use of diegetic prototypes to suspend disbelief about change. Through practices of estrangement and defamiliarization, and through the use of carefully chosen design methods, this course experiments with the creation of provocative scenarios and imaginative artifacts that can help us envision different ways of inhabiting the world. The choices made by designers are ultimately choices about the kind of world in which we want to live—expressions of our dreams, fantasies, desires, and fears. As an integrated mode of thought and action, design is intrinsically social and deeply political. In conversation with science fiction, queer and feminist theories, indigenous discourses, drag and other performative interventions, this course explores speculative and critical approaches to design as catalysts for imagining alternate presents and possible futures. We examine a number of environmental and social issues related to climate change, incarceration, gender and reproductive rights, surveillance, emerging technologies, and labor.

SISP225 Darwinian Fictions
This class tracks the discourse surrounding evolutionary science as it circulated through various spheres of American intellectual life in the decades after the Civil War. If the ideas proposed by Charles Darwin and Herbert Spencer fundamentally changed the way scientists and politicians understood the natural world and human beings' relation to it, these ideas would also influence the way writers understood the function of literature. Best summed up by Emile Zola's suggestion that, through literature, we are capable of "possess[ing] knowledge of man, scientific knowledge of him, in both his individual and social relations," authors during this period began to explore the literary possibilities of evolutionary science. By reading works of literature alongside influential scientific treatises, this course encourages students to think about the kinds of knowledge literary experience gives us access to, and the relationship between literary knowledge and other disciplinary forms that emerged at the turn of the twentieth century.

SISP230 Anti-Psychiatry
This course will investigate anti-psychiatry, the social and scientific movement that has critically analyzed and opposed psychiatry as a field of medicine. No field of medicine is more deeply implicated in creating and legitimating human suffering than psychiatry, from the role that psychiatry plays in managing people's daily lives to the administration of the criminal justice system. We will ask how social and psychic traumas are transformed into discrete psychiatric disorders by exploring the cultural production of diagnostic criteria used to diagnose and the psychopharmacological drugs that are used to intervene on mental states.

SISP231 Guns and Society
Students will discuss some of the key questions that animate the emerging interdisciplinary field of gun studies, considering guns as objects and symbols and as sites of both shared and contested meanings in everyday life. Readings will include recent scholarship about the evolution of gun technologies and the changing place of guns in U.S. society, from the colonial era through to the present day, exploring how the history of guns in U.S. history is relevant to other histories, including studies of race, gender, class, labor and capital, social movements, and military and civilian life. Special focus will be put on visual studies, museum studies and public history, science and technology studies, public health, and legal history. Assignments include four shorter (2-page) papers and a 15-page final research paper. Each student, working in small groups, will also deliver a 10-minute presentation and have opportunities for site visits to local museums and gun violence memorials such as the Coltville National Historic Park (Hartford), Springfield Armory National Historic Site (Springfield, Massachusetts), and the Connecticut Gun Violence Memorial (New Haven).

(SThis course is a prerequisite for individualized humanities "labs" designed for students to delve into a particular aspect of the topic of guns and society in a more applied way in the spring semester, through special projects that can include an individually designed research paper, a museum/archives project, a theater sketch, a podcast, a high school teaching module, an art project, an exhibit in a local museum, an oral history project, or a syllabus, among other possibilities to be discussed with the instructor.)

SISP236 Race, Gender, and Medicine in U.S. History
This course will examine the intersections of race, gender, public health, and medicine in the United States, largely focusing on the 20th century. Topics will include the racialization of certain diseases, race and health care access, and the history of African Americans in health care professions and health care activism. Students will learn about the history of medicine and public health in the United States, African American history, and historical research methods. We will consider the built environment, the law, and federal and local politics as they relate to medical care in the United States. By the end of this course, you will gain further understanding of some of the major currents in the history of medicine and public health in the United States; you will make connections between race and health care experiences in the U.S.; you will be able to discuss...
historical research methods and appraise the values and limitations of various kinds of sources. Possible readings may include selections from Sowande’ Mustakeem, Rana Hogarth, Sharla Fett, Deirdre Cooper Owens, Jim Downs, Tera Hunter, Samuel K. Roberts, Susan L. Smith, Natalia Molina, Nayan Shah, Wendy Kline, Vanessa Gamble, Jonathan Metzl, Susan Reverby, Alondra Nelson, Keith Wailoo, Jennifer Nelson, and Jennifer Brier.

SISP243 Commodities and Addiction
This course will examine several commodities that have often been described as addictive. We will use a case study approach and focus on the following substances: tobacco, sugar, opiates, and alcohol. We will also consider the history of the concepts of addiction and addiction treatment. The course will be largely focused on United States history but will also consider the global history of the production of these substances and the development of global consumer markets. Some of the subjects that we will discuss include colonization, slavery, agricultural and environmental history, advertising, public health, and criminalization of substance use.

SISP245 Ethnography and Design
Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

SISP250 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SISP253 Science and/as Literature in Early Modern England
Seventeenth- and 18th-century England saw the development and popularization of the "new science." Microscopes, telescopes, air pumps, automata, and experiments captured the popular imagination. The first important scientific societies and journals were founded, and the public learned about new discoveries through sermons and coffeehouse lectures. This course will trace the literary reaction to these cultural changes. A female natural philosopher wrote utopian science fiction, and satirists skewered mathematicians and experimenters. While the best of early 18th-century nature poetry takes Newton quite seriously as it depicts the way light glimmers off objects, by the century's end William Blake villainized Newtonian thought as reductive and deadening. We will try to understand what writers found exhilarating, scary, confusing, hilarious, or important about science at this key moment of its development. At the same time, we will read this science as literature—considering, say, Francis Bacon's symbolically fraught "Idols" and Robert Boyle's "literary technology," the role of poetry in spreading scientific ideas, and the importance of analogy and metaphor to the very logics that structured scientific thought. The disciplines of science and literature were not as cleanly separated in this period as they are now, and we can better understand both by exploring their intersections.

SISP254 Science in Western Culture
This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called "science" and how they have attained such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have "done science" in different times and places.

Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between
science and state power by exploring the changing nature of scientific authority, the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

SISP255 Nature/Culture
In this course, we are going to explore—and problematize—the boundary between the so-called "natural" world and human social and cultural life. Rather than assuming that "nature" is something that already exists in the world that humans have systematically excoriated and transformed, we consider instead the idea that nature and culture are fundamentally co-constitutive concepts—that is to say, that one cannot exist without the other. As we go, we will explore pressing concerns such as the boundaries between human and non-human, the nature of the Anthropocene, the question of what it means to be "modern," and the power of ecological politics in our contemporary orders of global capitalism.

SISP256 Race and Medicine in America
This course will trace ideas of race in American medical science and its cultural contexts, from the late 19th century to the present. We will explore how configurations of racial difference have changed over time and how medical knowledge about the body has both influenced and helped to shape social, political, and popular cultural forces. We will interrogate the idea of medical knowledge as a "naturalizing" discourse that produces racial classifications as essential, and biologically based.

We will treat medical sources as primary documents, imagining them as but one interpretation of the meaning of racial difference, alongside alternate sources that will include political tracts, advertisements, photographs, and newspaper articles. Key concepts explored will include slavery's medical legacy, theories of racial hierarchy and evolution, the eugenics movement, "race-specific" medications and diseases, public health politics and movements, genetics and modern "roots" projects, immigration and new technologies of identification, and intersections of race and disability.

SISP257 Japan and the Atomic Bomb: History, Myths, and Mysteries
Even today, when discussing the atomic bombings of Hiroshima and Nagasaki, newspaper and other media sources often refer to "Truman's decision" to drop the bomb, the idea that these bombings conclusively brought an end to World War Two, arguments that they saved more lives than they killed, and assertions that the United States would not have dropped the bomb on Germany since its citizens were white. But what do the historical sources actually say on these and other related points? This course emphasizes the use of archival sources to address these and many other issues. It establishes the historical context for the atomic bombings of Japan by tracing events that led to the War in the first place, how civilians became the targets of mass bombings, and the scientific discoveries that made nuclear weapons possible. It also examines how after the War the American press and government strove to establish a particular perspective on the atomic bombings of Japan. By the end of this course students will have a much better idea about the historical facts, the popular myths, and remaining mysteries related to the bombings of Hiroshima and Nagasaki.

SISP259 Discovering the Person
This course examines major developments in psychology and psychiatry from 1860 to the present. Through readings and lectures, the course introduces the major schools, theories, and systems in the American "psy" sciences. We examine the kinds of persons who were "discovered," the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine phenomena that were located, catalogued, and explained by these sciences, including rationality, gender, cognition, personality, race, emotion, psychiatric disorders, development, intelligence, and the will. Attention is given to the scientific grounds of investigations and the empirical evidence sought in the century-long process of discovering and naming psychological kinds. Readings include primary source documents, histories, and philosophical analyses.

SISP260 Bioethics and the Animal/Human Boundary
In this course, we will explore the construction of the animal/human boundary through the lens of bioethics. We will define bioethics as the study of the ethical consideration of medical, scientific, and technological advances and their effects on living beings. At the same time, we will pay close attention to the cultural contexts in which these advances emerge, imagining the realms of scientific progress and popular culture as mutually constitutive. We will consider topics such as cloning, organ transplantation, pharmaceutical testing, and gestational surrogacy, with a focus on the late 20th and early 21st centuries. We will begin by interrogating how ideas of the "animal" and the "human" are constructed through biomedical and cultural discourses. We will ask, How is the human defined? By intelligence or consciousness levels? By physical capabilities or esoteric qualities? Similarly, how has the human been defined against ideas of the animal? Or, what ethical justifications have been cited in the use of animals in biomedicine? What makes certain species "proper" research subjects and others not? What do these formulations tell us about our valuation of animal and human life, and what kinds of relationships exist between the two? To answer these questions, we will consult a wide range of interdisciplinary scholarship, from authors in the fields of animal/ity studies, bioethics and medicine/science history, sociology, anthropology, and philosophy. Students will also be exposed to the basics of biopolitical theory.

SISP261Z Enlightenment and Science
This course will be a study of how we, as a society, have obtained our views on science. The class will concentrate on the positive and negative ways that twenty-first-century science and technology have been impacted by
the Enlightenment. In general terms, the long-eighteenth-century European Enlightenment is taken to be the marker of the modern age—when modern science emerged. The time has now come for a reconsideration of the complexity of science and the scientific method during the Enlightenment as a means of comprehending its direct impact on the modern age in which we are living today. This class will focus overall on the strengths and weaknesses that modern science, technology, and thus society have inherited from the Enlightenment.

This is not wholly a story of science and technology in the West, but a World History story. This class will highlight test cases and ethical choices—to give two modern examples, decisions about resource allocation, that of fossil fuels and vaccines—that we are facing today. These choices are not made simply on scientific, logical lines but also according to the preferences of society. In order to understand our current situation, we must inform ourselves about how we arrived at this situation. Two centuries ago, without government or private sources of funding for science, the emphasis on immediate outcomes in science became common. Practitioners of science (the term "scientist" was not used until the nineteenth century) often had to be showmen to attract attention in order to get funding. Likewise, by the twenty-first century, it is now almost impossible for scientists to get grants for pure research; winning applications have to stress immediate public outcomes in order to get funded. This effectively puts a stopper into the very source of new scientific ideas—pure science—and of virtually all new scientific break-throughs, and this is a world-wide trend in the sciences.

In this class, we will examine crucial examples of the key scientific subjects that emerged during the Enlightenment, and social and political responses to these same scientific discoveries, from both the Enlightenment and Counter-Enlightenment, which stressed religion over science. We will read responses from non-practitioners of science at the time—educated people trying to make sense of emerging modern science in the midst of politically and economic troubled times. There was, in the eighteenth century, no safety net—such as unemployment benefits—for those who wanted to practice science in a time that there were no jobs in science. There was certainly no safety net for rest of society either. The parallels to our own time are self-evident: political polarization, closely linked to radically different views toward science, in the midst of epidemics and widespread financial distress.

Emerging modern science in the long eighteenth century was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans in addition to well-connected practitioners of science. Talented young men from less privileged backgrounds were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also active in scientific circles. Such accomplished women were rare during the Enlightenment but they should not be ignored. Margaret Cavendish, Emilie du Chatelet, and Caroline Herschel are prime examples of women practitioners of mathematics, physics, and astronomy respectively. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In all these cases, even the political salons, science was discussed as a general topic of discussion, not just a subject for specialists. And those knowledgeable in the sciences were expected to make their work accessible to non-specialists. Later, however, the nineteenth-century professionalization of, and specialization in the sciences led to mixed results. It certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly-established manner. Alas, it also resulted in the end of the belief that educated people outside of the sciences should know about it in order to be proper citizens. Overall, this class will address areas of commonality and difference between Enlightenment science and technology and modern science and technology, including lingering problems, as well as possible solutions suggested from past writings and experiences.

There will be many distinctive aspects of this class. One will be the intensive textual analysis of primary documents in class. Another will be the active participation of several guest speakers. There will also be a virtual visit to Special Collections, Olin Library, Wesleyan University.

SISP262 Cultural Studies of Health
Nothing is more fundamental to the human condition than our most basic right—the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SISP263 Atomic Africa: A Technological History of the Cold War
"Atomic Power Programme Moves Ahead: NUCLEAR REACTOR FOR GHANA"
In 1962 the Ghanaian Times proclaimed Ghana’s atomic ambitions. Strikingly, it was only two years after the West African nation raised the international alarm against France’s nuclear testing in the Sahara. In the midst of the global Cold War, African activists, politicians and scientists called for an end to nuclear imperialism and struggled for political and scientific sovereignty. It was an era marked by the struggle for decolonization but also by the promise of a new technological age. As African politicians planned for an Africa of the future, they faced intense political pressures from both the U.S. and the Soviet Union. They also formed partnerships with China and Cuba, reshaping the international lines
of Cold War cooperation and the nature of "development." Over the course of the semester, we will examine Cold War stories across the continent including the mining of uranium, the international Congo Crisis, the development of African radiation experts, the use of radio by liberation forces in Angola, the emergence of an African Jet Age, and the building of the Freedom Railway in Tanzania. In addition, we will examine how students, workers, and scientists negotiated the currents of the Cold War and responded in creative ways to produce their own Atomic Africa.

SISP265 Anthropology of Science
What are scientific facts? How do we know what we know? In this course, students will gain an introduction to thinking about science and technology as cultural practices shaped by power, politics, race, indigeneity, gender, and sexuality. Students will explore how anthropologists, long interested in how "culture" works, have recently turned their gaze toward critically examining the cultures of people in positions of technoscientific power, including nuclear scientists, Wall Street analysts, drone weapon designers, climate scientists, molecular biologists, and more. Students will also be trained in conducting ethnographic fieldwork on a group of experts in their own communities in order to ask questions about scientific rituals, truth-making, and distributions of power and privilege.

SISP266 Eating Others: Histories and Cultures of Animal Edibility
For many people, animals form a significant and cherished part of their diet. Indeed, humans have used other animals as sources of nutrients for hundreds of thousands of years. What can these animal-based dietary practices tell us about humans and their relationships with other animals? Of course, these inter-species relationships have varied as radically across time and cultures as the dietary practices that have shaped them. To better understand some of these practices and the relationships they generate, this course will explore the following questions: How did animal-based food practices develop from pre-domestication to the contemporary era of industrialized animal agriculture? How have cultural categories of "edibility" developed in different cultural contexts? What is meat, and how does it differ from inedible flesh? How have gender, class, race, sexuality, and other categories of difference intersected with and shaped animal consumption practices in different times and contexts? How has animal consumption shaped and been shaped by animal ethics, philosophy, and scientific knowledge production? How has large-scale animal consumption contributed to the ecological crises of the Anthropocene, and how have these in turn affected animal consumption practices? What is the future of animal-based food?

This course will use ethnographies, historical and legal analyses, and philosophical inquiries to examine the histories and cultures of animal edibility. Specifically, it will focus on topics including human evolution, animal domestication, slaughter practices, industrialized animal agriculture, indigenous ecological ontologies, hunting, dairy and egg consumption, cannibalism, cultural conflicts over the edibility of specific species, and recent technological innovations that can produce animal products without animals.

SISP267 Development in Question: Conservation in Africa
"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, artists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international environmental and governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine park politics, the history of resource extraction, climate change, and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

SISP281 Post-Kantian European Philosophy
In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

SISP282 Religion and the Scientific Imagination
Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another—in an effort to move beyond the frankly boring "debates" between them.

SISP283 What Is Rationality?
What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures—or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

SISP284 Chinese Eco-Civilization: History, Experience, and Myths
The course traces the historical roots of the ideas of eco-civilization, a policy platform that appeared in the twenty-first century by examining how Chinese agrarian civilizations and their nomadic neighbors transformed the bio-physical environment over the course of 3,000 years of history.
We will draw on translations of Chinese literary texts including poetry, classical prose, and novels to explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China’s transformation from feudal ages to the modern period. How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice? Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs?

SISP285 China as Scientific Powerhouse
Science, technology, and medicine played an integral role in the China’s transition to modernity and inspired dramatic economic, social, and political transformations. As scholars of modern China developed a keen interest in transnational histories and comparative methodologies, they have paid closer attention to the histories of science, technology, and medicine. This course introduces students to this emerging field of study. It examines broad philosophical questions that motivate the research in history of those areas. We will learn to explore science, technology, and medicine in China on its own terms” by understanding how the unique political and social challenges of modern China shaped Chinese science.

SISP286 Philosophy of Mind
This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-person experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

SISP287 Science in Modernity and After: 20th-Century Science and Technology
The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence
of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

SISP294 Saving Animals: The Politics of Rescue, Captivity, and Care
This course examines the major issues related to captive animal care and rescue across a wide variety of contexts, especially the current global extinction crisis, with specific attention to the ethical, political, and social dimensions of human-animal interactions. Discussions, films, readings, and an independent research project will introduce students to key concepts related to animal care and rescue. Specifically, the course will focus on topics including the ethical dilemmas of care, the politics of extinction and conservation, animal trafficking, wildlife rehabilitation efforts, wildlife refuges, captive animal sanctuaries, and zoos.

SISP296 Philosophy of Psychology
How does the mind work? So-called “computationalists” think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called “mental representations”) according to rules, and then issues “commands” to guide behavior. On the other hand, the “SE” (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. SE theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn’t happen “in a vacuum,” and it isn’t separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the SE approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

SISP299 Medicine and Healing in the Black Atlantic
This course examines the ways in which Black people have conceived of health, healing, and the body since 1500. Readings, lectures, and documentary films will focus on historical case studies in Western Africa, South America, the Caribbean, and North America. We will cover topics such as herbal and environmental medicine; the intersections of religion and healing; gendered medical knowledge and labor; medical racism and exploitation; health disparities; and health activism. To help us situate these topics in the lived experiences of historical actors, we will use a variety of primary sources, including narratives of formerly enslaved people, court cases, correspondence, interviews, and print culture. The goal of this course is not simply to show how Black people have used healing practices to endure racism, slavery, imperialism, and racial capitalism; We will also emphasize how medicine and healing have been sources of joy, conflict, knowledge production, and entrepreneurship within Black communities. Lastly, we will consider the present and future of Black health and think about what it would take to make medicine and health care for all.

SISP300 Black Phoenix Rising: Death and Resurrection of Black Lives
The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racisms and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people’s death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

SISP301 Unsettling Times: Clocks for Ghosts, Monsters, and Aliens
Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to understand continuity and change, and places countless lives and landscapes at great risk.
This seminar draws from the social and natural sciences, humanities, and arts to unsettle these simplifications. Through readings and audio/video screenings, we will consider how apparatuses for time keeping (or clocks, broadly defined) become power tools, creating haunted, monstrous, and alienated subjects. Through exercises and field walks throughout the semester, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. The final project will involve research and design of a speculative clock for futures otherwise.

SISP302 Reproductive Politics and the Family in Africa
This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal and sexual health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, childhood health, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced health policy and political ideologies which, in turn, changed conceptions of motherhood, fatherhood, and the family.

SISP303 The Race Makers: How the Enlightenment Invented the Most Dangerous Idea in History
The concept of race was first "invented" during the 18th century by anatomists, natural historians, and, ultimately, the century's classifiers. While this seminar is constructed as something of an intellectual history seminar, it will also delve into the lives and (often messy) psychologies of several of the people who helped develop the idea of race during the eighteenth century. We will become familiar with a French king and the signatory of the Code Noir (Louis XIV), the Swedish inventor of the term Homo sapiens (Linnaeus), the theorist of human degeneration from a white prototype (Buffon), the most famous philosopher of the eighteenth century (Voltaire), the theorist of human stage theory (Robertson), a skull-measuring naturalist (Blumenbach), and an American president, in Thomas Jefferson. The class will also examine 16 manuscripts that were submitted to a contest on the source of "blackness" organized by the Bordeaux Royal Academy of Sciences in 1739. The goal of this course is to provide students with an understanding of the origins of race that will inform their reactions to this question as both a historical concept, and an ongoing problem that affects all of us in the present.

SISP305 Pantheologies: Animal, Vegetable, Mineral, World
Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism—in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materialitysetting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism? Is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politics of environmental justice?

SISP307 The Economy of Nature and Nations
On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek oikos, or household. They also share much common history. This course thus explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the oikos over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

SISP309 Multispecies Worldbuilding: The Chestnut Project
How do forests think (Kohn)? Do rocks listen (Povinelli)? Can insects speak (Mitchell)? How do fungi make history (Tsing)? Should trees have rights (Stone)?

These are some of the most exciting questions percolating in the humanities, arts, and social/natural sciences today. They disrupt Western colonial notions of what it means to be human, while also calling for methods, theories, and apparatuses that might imagine and build more livable multispecies worlds.

This course has two goals: (1) introduce students to key texts on more-than-human, more-than-Western ontologies, particularly from the fields of multispecies/cyborg anthropology, science and technology studies, biology, and environmental humanities; (2) engage students in transdisciplinary research on
the American chestnut (Castanea dentata), a tree species once known as the "queen of forests" from the Appalachian mountains to the Mississippi river until fungi wiped them out in the early twentieth century. This course will lay the groundwork for students to participate in current debates and projects to restore a transgenic version of the American chestnut in the eastern United States within the next five years.

SISP312 Technologies of Care
In this seminar students will explore how Feminist STS has conceived of caring technologies and relations. Starting with Maria Puig de la Bellacasa's (2011) call for STS scholars to consider ethical and political obligations to care along more-than-human networks, students will read recent work on compulsions to express care and solidarity with humans and nonhumans. How does thinking about sociotechnical assemblages ask us to consider how we are already entangled in webs of care with material and immaterial forms? What does it mean in practice to work toward good relations as humans with technologies, within environments, and with nonhumans? Students will also consider the centrality of labor to how we understand caring relations. How do transnational circuits of care become encoded into the daily functions of global capitalism? How might demands for care enact their own forms of violence, hindering continuing struggles against personal and structural oppression? This seminar will be set up as a research incubator, and students will have the opportunity to produce and share original research projects on care labor and technology, from topics including computer therapists, feminist health technologies, nursing robots, the global commercial surrogacy industry, sex companion robots, eldercare digital pets, and other contemporary expressions of care labor mediated through technology.

SISP313 Extinction/Rebellion: Christianity and the Climate Crisis
Although this course is not devoted specifically to the subject of "XR"—the decentralized environmental activist organization and global campaign of civil disobedience—it borrows the movement’s self-designation as a point of departure for an exploration of the historical, conceptual, and geopolitical significance of Christianity to the "Anthropocene." How is Christianity entangled among the "historical roots of our ecologic crisis"? What is "eco-theology"? How do ancient narratives of creation and traditional Christian teachings regarding the origin of humankind continue to shape modern, scientific, and popular assumptions about the natural world and our place in it? What does the book of Genesis have to say about commercial agriculture, ethical veganism, and the relation of divinity with the more-than-human, animal-vegetal-mineral web of life? Whence this "planet of slums" and whither Paradise or the Promised Land? Which elements of the Christian imagination enabled colonization of the New World, indigenous displacement and genocide, the transatlantic slave trade, and capitalist globalization? Is another world still possible, and could Christian thought and practice play a pivotal part in actualizing an alternative planetary tomorrow? We will pursue these questions together by way of readings in theology, philosophy, critical science studies, ecology, geography, political economy, Black feminism, queer theory, and Indigenous studies. Ultimately, the course analyzes aspects of Christianity’s intimate involvement in the history of climate change and considers how critical attention to this history may contribute to collective acts of rebellion against mass extinction.

SISP315 The Health of Communities
Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown’s Community Health Center (CHC) & Moses Weitzman Institute.

SISP318 Critical Global Health
What does it mean to approach global health as not an applied science but an ethnographic object? This course will explore this question by bringing critical, social science perspectives to bear on global health issues and interventions. This course covers three areas of scholarship. First, we will examine the processes by which social inequalities produce patterns of health and disease in globalizing contexts. This will be followed by an interrogation of the term "global health," in which we will trace its emergence as a discourse and enterprise and unpack its contested meanings. While some view global health as a clinical practice, others conceptualize it as a business, security concern, charitable duty, or human right; yet another camp probes the term’s ideological construction. We will consider how such vantage points are underpinned by cultural assumptions and ethical agendas that, in turn, can determine how, and to whom, care is delivered. As a third area of inquiry, we will investigate the implications and unintended effects of doing global health by probing such questions as, When are good intentions not good enough? How useful is biomedicine for alleviating locally
defined problems? Under what conditions does global health exacerbate the social inequalities it seeks to overcome?

SISP319 Toxic Sovereignties: Life after Environmental Collapse
What politics emerge at the borders of life and nonlife? Representations of the human species as being on the brink of environmental collapse have become increasingly common, as the specters of climate change and cataclysmic environmental disaster seem to bear down ever more heavily upon us. At the same time, the increasing entanglement of human bodies with various forms of chemical and otherwise man-made pollutants presage a slightly different future, one in which, if the human species does not outright disappear, it will be fundamentally transformed. This course explores different forms of political and social action that have emerged in response to these seemingly epochal shifts with a particular emphasis on the ever-mutating concept of sovereignty. Our goal is to explore the ways in which the shifting borders between human life and its artificially produced absence can serve as productive sites of new political forms and transformations of older ones, even as they also generate tremendous social and cultural anxiety.

SISP321 BioFeminisms: Science, Matter, and Agency
This course rethinks feminism's relationship to nature, the body, and biological matter in light of new considerations of ontology in science studies, cultural studies, and feminist thought. We will read contemporary treatments of science, of Darwin and evolutionary theory, of neurobiology and epigenetics, and other fields and disciplines that consider biological matter, and think about them in feminist and queer frameworks. Readings will include "new materialists" alongside other works on the "new biology" and the "new sciences," and we will also revisit some second- and third-wave feminism. The course raises issues that challenge traditional boundaries of the body and self, conventional ideas of agency, and dualisms of mind/body. Readings include works by Donna Haraway, Anne Fausto-Sterling, Elizabeth Grosz, Karen Barad, Vicki Kirby, and Elizabeth Wilson, among others.

SISP322 Methods and Frameworks for Understanding and Overcoming Health Disparities
In recent years especially, the need for both interdisciplinary and mixed approaches to inquiries in public health research has become apparent in health promotion, policy formation and evaluation, service needs assessment, the social determinants of health, and program evaluation and outcomes measurement more generally. This course is intended to provide an overview of methodologies and frameworks used to examine and overcome disparities in health through research. A range of quantitative and qualitative research designs and methods will be introduced, and strategies to address challenges in real world program settings will be emphasized. This course will discuss approaches commonly used in public health and health services research, such as mixed methods, implementation science, community-based participatory research, and their strengths and limitations. Additionally, this course will examine how critical race theory and intersectionality, and additional theories and frameworks from ethnic studies, psychology, and sociology, can further advance public health’s capacity and effectiveness in promoting health equity. The course will incorporate examples of applied research and opportunities to learn from the direct experiences of the instructor. There will be a mixture of discussion and lecture depending on the topic, with student participation and questions strongly encouraged. Preference will be given to students who have taken SOC/SISP 315 Health of Communities or SISP 262/SOC 259 Cultural Studies of Health.

SISP325 TechnoPrisons: Corrections, Technology, and Society
The United States currently incarcerates more of its citizens than any other nation, and most of them are members of disadvantaged social groups. How does our government practically accomplish mass incarceration? This first-year seminar (FYS) examines prisons as technologies and the role that specific technologies play in the U.S. prison system. To say that prisons are technologies means that prisons operate as an architectural system that is designed to hold people captive within enclosed social spaces. At the same time, prisons are the location for multiple kinds of technological systems including surveillance systems, biomedical technologies, classification and administrative technologies, and military technologies. This seminar introduces basic concepts within science and technology studies (STS), criminology, and sociology to investigate how prison happens.

SISP327 Colonizing Space: Exploration, Extraction, and Inhabitation
Under its "Artemis Mission," NASA plans to "the first woman and first person of color" on the Moon to build a permanent outpost. This lunar base will allow NASA to mine the Moon, extract precious metals from asteroids, and eventually colonize Mars—hopefully before China and Russia do the same. Thanks to recent legislation, NASA will rely throughout this mission on the rocket and extractive technologies of private corporations like SpaceX, Blue Origin, Moon Express, and Deep Space Industries, whose CEOs proclaim they are saving the human race by expanding it into space. It will also rely on the backing of the newly-created sixth branch of the U.S. military: the Space Force.
This course will track the ideological and colonial history of the Apollo era before approaching the scientific, corporate, and legislative landscape of "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theoretical justifications for the unfettered exploitation and inhabitation of the Earth and its cosmic neighbors. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

SISP329 Waiting: Bodies, Time, Necropolitics
This interdisciplinary course draws from social theory, gender studies, medical anthropology, disability studies and science studies to address the social stratification of time in corporeal terms. Many theorists have described the 21st century as marked by acceleration; this course addresses its counterpoint: the slow, interminable wait, the being made-to-wait, and the socially structured scenes and experiences of waiting. How can we understanding waiting in the city emergency room for the mentally ill immigrant? What is it in the gender transition clinic? The polluted, toxic neighborhood? The refugee camp? We will begin by surveying multiple frameworks through which we can theorize time and its suspension. We will then focus on experiences of waiting in intersectional terms, that is, in relation to gender and sexuality, race, class, and dis/ability. We will explore how practices that produce life, health, and well-being (biopolitics) can also be necropolitical, when attention, care, or action is given to some, but prolonged or suspended for others. Readings will include works on necropolitical theory (Georgio Agamben, Achille Mbembe), medical and state subordination and abandonment (Javier Auverro, Joao Biehl), and queer and crip time (Lee Edleman, Elizabeth Freeman, Alison Kafer). We will explore a wide range of experiences of waiting, from those related to cancer diagnosis (Sarah Jain), gender assignment surgery (Alexandre Baril), to environmental toxicity (Michelle Murphy) and asylum seeking (Jennifer Bagelman).

SISP331 Decolonizing Ecocinema: Aesthetics and Politics of Disaster
This seminar will focus on twelve experimental documentary films as critical texts that situate, theorize, and decolonize representations of disaster. What the films share is an insistence that struggles for social and environmental justice are deeply entangled and thus require "new figures and tactics" (Povinelli). We will consider how representation is composed from choices made at two levels: aesthetic forms and specialized languages articulated through the camera and editing software; and political calls for accountability and embodied, embedded, inherited praxis. We will unpack how the medium of film alters and stylizes engagements between subjects positioned behind, in front of, prior to, and after the camera frames, records, and plays back images and sounds.

The films will take us to more-than-human worlds, questioning how we engage with species and landscapes, history and technology, power and language. A partial list of characters includes wild bees in Hawaii (Swarm Season, Christmas 2019); steel mines in Mongolia (Behemoth, Liang 2015); colonial waters in Tierra del Fuego (Pearl Button, Gunzman 2015); shepherds in Montana (Sweetgrass, Barbash and Castaing-Taylor 2010); farmers in Thailand (Agrarian Utopia, Raksasad 2009); and stray cats in Istanbul (Kedi, Torun 2016). As companions to the films, we will read essays from post/decolonial media/science studies, visual anthropology, and environmental humanities.

SISP333 Advanced Research Methods in Science Studies
This course exposes students to qualitative research methods in science and technology studies. Methodology describes a process for conceptualizing, collecting, and organizing evidence. Part of this new course will be a survey of methodological traditions in science and technology studies and associated fields (sociology, anthropology, cultural studies, feminist and critical race studies, performance and design studies, philosophy and history of science) that guide the collection and interpretation of evidence about scientific knowledge and practices, the relationships between users and technologies, and broader scientific institutions and technical infrastructures. Specific methodologies include ethnography, archival and discourse analysis, social worlds analysis, comparative historical and genealogical analysis, abductive analysis, and visual culture and media analysis. The other main part of the course will culminate in presentation-ready small-scale individual and group research projects utilizing qualitative research methods.

SISP339 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution
The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances—animals, vegetables, and minerals; people and artifacts—the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual...
flux, no sooner glimpsed than gone. This metaphysical picture of infinitesimal flux was complemented by a new branch of mathematics, the infinitesimal calculus, which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorm. If there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

SISP340 Human Nature
The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals?
Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

SISP342 Queer Robotics: Cyborgs in Science Fiction & Anthropology
What do representations of robots and cyborgs in popular film, sci-fi literature, and cultural anthropology tell us about gender, sexuality, race, and what it means to be "human"? In this class we will use critical race studies, queer and feminist theory, disability studies, and science and technology studies (STS) to analyze representations of "cyborg" bodies in speculative fiction and ethnography. Our case examples explore the politics of the body through narratives of military research, artificial intelligence, sex work, urbanism and segregation, biotech research, prosthetics and athleticism, new reproductive technologies, and more. We will engage with poetry, film, visual art, and speculative fiction to explore how bodies are dreamed, crafted, and represented.

SISP343 Imitations of Life: Experimental Bodies at the Interface of Science and Culture
This seminar will examine scientific and cultural practices of corporeal simulation, or, practices of bodily substitution, imitation, and re/modeling. Topics examined will include: reproductive surrogacy; gender reassignment surgeries; experimental subject protocols; prosthetic enhancements; xenotransplantation; biometrics and alternative forms of bodily imaging; the use of nonhuman animals as human proxies; the rise of personalized medicine, and more. Students will engage with a wide range of case studies and theoretical materials from interdisciplinary perspectives. Special attention will be paid to the relationship between scientific discourses of "universality" and "particularity," where socio-cultural forms of difference (e.g., race, gender, disability, etc.) are at once ignored and exacerbated. While most of the material addressed in the class will relate to recent phenomena, we will also be attentive to relevant histories of corporeal differentiation and reimagining.

SISP349 Environmental Justice and Sustainability
The US Environmental Protection Agency defines environmental justice as "the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies." Although we still have a long way to go in achieving this goal, over the last fifty years a vibrant environmental justice movement of racially-diverse activists and international coalitions has struggled to create a more equitable and sustainable world. Specifically, they have worked to expose and end the vastly disproportionate impacts of environmental degradation, climate change, air and water pollution, waste disposal, drought, wildfires, and famine on Black communities, Indigenous communities, and other communities of color around the globe. In this course, students will examine the environmental justice movement, its historical development, its strategies and tactics, and the many contemporary environmental harms it strives to eliminate. Discussions, films, readings, and an independent research project will introduce students to topics including environmental racism, environmental health, (un)natural disasters, climate refugees, agricultural and industrial pollution, international waste export, seed imperialism, food sovereignty, water contamination, reproductive justice, environmental reparations, the extinction crisis, and just forms of sustainability.

SISP353 Health, Illness, and Power in America
In this class, we will explore the interlocking histories of health, illness, and power in America. Special attention will be paid to the ways in which discourses of the healthy body have undergirded notions of citizenship and belonging in the nation. We will consider how processes of disease, disability, and contagion have been imagined through the lenses of social difference, including race, gender, sexuality, and class. We will address civil institutions designed to manage individual and population health, and we will consider theories of political power in the making of the "modern" body.

Sample topics covered will include immigration policies and contagious disease scares; STDs and the politics of public health campaigns; physical fitness and the value of bodily labor under capitalism; the management of diseases that are symptomatic and those that are not; race- and gender-based approaches to medicine and medical difference; clinical trials and the ethics of human experimentation; regulations surrounding blood and organ donation; changing rituals of bodily hygiene; preventative medicine and the call to personal responsibility; mental health policies and institutions; and pride movements surrounding the "unhealthy" body.

SISP355 The 1918 Influenza Pandemic: A Research Seminar
This fall is the centennial of the 1918 influenza pandemic, which swept around the globe that year and caused an estimated 40 million deaths worldwide. It caused more deaths in the 20th century than any other event except World War II. In this seminar we will examine this pandemic from multiple perspectives with the goal of defining how understanding it changed from the time it occurred to the present. In class, we will examine contemporary journalistic and scientific accounts and various secondary sources, with the goal of establishing a starting point for student research projects that will be completed over the second half of the semester. We will explore sources in Olin Special Collections, various digital archives, Middletown and Connecticut State archives, and other collections as available. Possible outcomes for the class can be a paper, documentary, exhibition, or web resource.

SISP356 Afro-Caribbean Philosophy
This seminar focuses on the philosophical production of Afro-Caribbean thinkers since the middle of the twentieth-century. We focus on close readings of Frantz Fanon, Édouard Glissant, and Sylvia Wynter alongside others to consider a Caribbean approach to questions and problems of modernity, relationality, space, race, belonging, the human, creolization, language, anti-colonialism, and liberation. We consider the roots of some of these questions in the work of earlier thinkers such as Aimé Césaire, as well as contemporary influences of their work across and beyond the Caribbean. We will work closely to literary, scientific, and theoretical texts.

SISP357 AI, Algorithms, & Power
This course explores artificial intelligence (AI) as a cultural, sociopolitical, and literary object. Course readings will begin with the observations of anthropologists at the post-WWII Macy Conferences on cybernetics. Students will put algorithmic data mining and machine learning in historical context, exploring classification systems and intelligence testing. Students will also examine the reanimation of the artificial human in newer discourses of AI, such as big data and predictive policing, virtual reality and drone strikes in commercial and military operations, health and assistive technology, and play and labor on platforms like Mechanical Turk. Course texts will include speculative fiction on artificial life, social theories of simulation and virtuality, and new work from queer studies and critical race studies interrogating algorithmic bias and the testing and classification of humanity.

SISP360 Making the Psychological: Discovering, Manufacturing, Circulating
Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology’s knowledge is in being challenged— as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public’s and our own aspirations to expand consciousness and act otherwise. Students will develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

SISP365 Nature Description: Literature and Theory
What happens to the world when we describe it using language? What happens to language? How much can we really know about nature as it is, in itself, outside of our representational strategies? In what ways do different kinds of description—and the often unexamined assumptions that structure them—limit what we can see? Do different modes of description and figurative language do different things to the world? And what do they do in the world—what ideological or political work? How, in short, does language reflect, touch, and transform the material world?

This course will grapple with big questions about nature, language, race, class, history, science, literary form, and human minds, as well as the complex interactions between and among these. We will seek answers by attending closely to literary, scientific, and theoretical texts.

SISP366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences
Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies,
technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetsically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

SISP367 Life of Modern Fact

Facts aren’t born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

SISP370 Disease and Health in Modern Asia

While this course might seem highly focused and specialized at first glance, it is intended for students of all majors and backgrounds. It has two main goals. The first is to explore the influence of epidemics and diseases more broadly over the course of East Asian history while keeping a global context in mind. The focus is on China and Japan, but Korea will be included when possible. The second is to consider how historically, diseases and epidemics are best understood through multiple disciplinary approaches, including biology, epidemiology, anthropology, sociology, and iconology. Colonialism and empire—both Western and Japanese—are, of course, underlying themes throughout. We will examine several important historiographical and methodological approaches as well as some basic issues in the history of science and some important examples of specific diseases such as cholera, tuberculosis, and plague from different approaches using both secondary and primary sources.

SISP373 Religion, Science, and Empire: Crucible of a Globalized World

The development of modern science—and of modernity itself—not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistememes.

SISP374 Food Security: History of an Idea

The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

SISP375 Science and the State

Over the past two centuries, states have been among the most prodigious producers and consumers of scientific information. Broad areas of scientific inquiry—such as demography, economics, geography, and ecology—substantially developed in response to the need of states to manage their populations, their economies, and their natural resources. State-directed scientific and technological innovation has also played a critical role in the pursuit of national security and infrastructural development, most notably through the development of nuclear weapons, missiles, and an array of military technologies. Finally, states have turned to scientific experts to enhance the credibility and legitimacy of policy decisions. This course introduces students to literature in the history of science that explores the connections between systems of knowledge and state power. Themes developed include the tensions between expertise and democracy, secrecy and scientific openness; the relationship between political culture and scientific and technological development; and the role of quantification, standardization, and classification in producing political order.

SISP377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?
The semester will be divided into four sections. The first will explore the dominant, or "inflationary," version of the big bang hypothesis in relation to Christian and indigenous myths of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast "multiverse" in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies—that is, theories that posit a rebirth of the cosmos out of its fiery destruction—in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle "decides" upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

SISP382 Anthropocene as Modern Grand Narrative

The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's systems, where the Earth is now moving out of its current geological epoch (the Holocene) and into a "less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism versus uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale—one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

SISP384 Critical Approaches to the History of Disease and Epidemics

Epidemic disease is as much a part of the human condition as earthquakes, droughts, floods, heat waves and other natural hazards that can result in disaster. This course will examine four cases of epidemic disease: (tentatively) cholera, tuberculosis, and AIDS. While we will definitely be asking the classic historical question "what happened and how?" we also will be considering how different epistemological frameworks, metaphorical strategies, and historiographical assumptions have shaped past historians' understandings of these events, while exploring alternative approaches. Students will write a research paper as a final project on an epidemic disease of their choice using an approach that helps explore some little-examined dimension of that disease. Choices will not be limited to diseases caused by microorganisms, but also can include cancer, diabetes, and other diseases that arguably have reached epidemic proportions, whether past or present.

SISP385 Understanding Life and Mind

Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to
environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

SISP393 Materia Medica: Drugs and Medicines in America
This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

Sociology (SOC)

SOC151 Introductory Sociology
This course is an introduction to the systematic study of the social sources and social consequences of human behavior, with emphasis on culture, social structure, socialization, institutions, group membership, social conformity, and social deviance.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-SOC
Prereq: None

SOC202 Social Analysis
This course is an introduction to the major components of sociological analysis: the language of sociological inquiry, research techniques and methodology, types of explanation, and the relationship between theory and research.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: SBS-SOC
Prereq: SOC151

SOC212 Social Theory
Through close reading, discussion, and active interpretation, this course will critically examine the basic writings of classical and contemporary social theorists who have influenced the practice of sociology.
Offering: Host
Grading: OPT
Credits: 1.00
Gen Ed Area: SBS-SOC
Prereq: SOC151

SOC231 Sociology of Crime and Punishment
This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the American system of mass imprisonment is effective, and how we might envision improvements and alternatives.

Prereq: SOC151

SOC234 Media and Society
This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding, pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.

SOC240 Comparative Race and Ethnicity
This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different consequences. Through comparisons of Western and non-Western societies, we
SOC241 Mental Illness and Society
Psychiatric disorders are commonly viewed through a purely biomedical and/or psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private "personal trouble," is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.

Prereq: SOC151

SOC243 Being Together: Affect, Care and the Politics of Experimental Kinship
This course looks at unique and experimental forms of kinship, community, and intimacy through the implicit and explicit challenges they offer to the foundational role of the privatized family unit to civic and economic life. We will look at historical examples of collectives, communes, and intentional communities to explore the challenges and possibilities of alternative forms of being, living, and working together. This course will also focus on college as a perhaps unique context for work about and involving friendship and collaboration, and will involve students in creative and analytical projects. There will be a specific focus on digital culture and social media, aging and vulnerability, interspecies companionship, and the politics of affect.

Prereq: None

SOC244 Feminist and Queer Theories of Social Reproduction
This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abortion and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

SOC245 Intersectionality and Identity (FGSS Gateway)
Intersectionality has emerged as a central motif within both social analysis and political debate. We will examine the origins of this framework within black feminism and women-of-color activism, as well as the way this framework traveled to, and is used within, sociology and other disciplines. The course will also address critiques of intersectionality that have emerged within and outside of feminist theory, and extends the concept of intersectionality to think through intersections between various social identities and social institutions such as capitalism and colonialism.

SOC246 Social Movements
How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

SOC255 Sociology of Knowledge
To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge,
and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

SOC259 Cultural Studies of Health

Nothing is more fundamental to the human condition than our most basic right—the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice.

This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SOC260 Sound and Screen

This course explores contemporary developments in the study of media, focusing on three primary areas—music, video games, and the Internet—that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and "unpack" some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupations with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

SOC262 The Rise and Fall of the Nuclear Family

In the United States, the “American Dream” family has often been thought to include a heterosexual, two-parent household with 2.5 kids, a house in the suburbs, and a white picket fence. While this is no longer the dominant family form, this “ideal” still holds great symbolic meaning, and non-normative family forms continue to be stigmatized and pathologized or rendered illegitimate and not considered as family. This course will examine the changing dynamics of families in the US and worldwide. We will consider how families function both within and beyond the context of the nuclear family as well as the political, legal, and social implications of who counts as family. We will focus on how race, class, gender, and sexuality shape family life and we will explore themes including marriage promotion policy, the division of household labor, gender inequality, intergenerational families, non-biogenetic kinship, families of choice, and more. Course texts will include sociological, historical, and queer theory approaches, in addition to sources from popular media. Through reading and
engaging with literature on diverse family forms, this course aims to use a critical lens to approach the concept of the nuclear family and to consider the future possibilities of the family as a social institution.

SOC266 The Social Life of Data
All over the world, actions, feelings, and thoughts are becoming data. Divining future desires and anxieties, promiscuous digital networks collect and collate a wide variety of everyday data, marking populations as risky or profitable. Participation in these networks is frequently mandatory in order to access a wide variety of political, social, and economic opportunities. Even if you manage to delete your account or withdraw from these networks, digital systems leave ghostly activity traces or zombie profiles waiting to come back to life. The rise of these data systems offers profound sociological and philosophical challenges to how we understand social life, power, control, memory, conscious thought, and even the nature of humanity and the environment.

This course engages with the impact of data infrastructures and digital technologies in a non-deterministic fashion, which is to say that technical systems and structures, while powerful, do not fully determine social possibility. Focusing on historical, established, and emergent data systems, we look to understand technology as a field of affordance and prohibition, with feelings, thoughts, and politics dynamically interacting with rapidly modulating standards, norms, and methods. Course themes address a variety of theoretical topics that have been central to the social study of science and technology, including the efficacy of critique in encountering information processing systems.

SOC269 Bad Sex
In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, “Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations.” Brooks is far from alone in this critique of promiscuity. What is it about “casual encounters” and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

SOC275 The Hair Class
Hair does things. It covers and exposes us. We pluck, conceal, wax, curl, and otherwise manage it. Its presence and absence serve as sites of critical engagement, personal and cultural expression, and political strife. This course will explore the social significance of hair, wherever, and on whomever it grows (or fails to grow). We will discuss daily practices, politics, histories, and legends about the manipulation of human and animal hair. We will draw on social theory, visual and social analyses, and cultural commentary to understand hair follicles as both incredibly ordinary and fantastically bizarre. This is an advanced discussion-based research seminar that is writing-intensive.

SOC277 Bored in the House: Work, Leisure, and the Domestic Mundane
For many of us, the Covid epidemic fundamentally changed our relationship to the home: extended periods of isolation and social distance have crystallized an understanding of the domestic as undergoing a period of flux or perhaps even crisis. This course considers the boundary problems of labor, home, relationships, and free time while doing historical and contemporary research on boredom, disassociation, and play.

More than ever we must engage with the vanishing material and psychic separations between work and leisure, the badly needed reimagining of public and private not anchored in a spectral domestic privacy, and the foundational dynamics of class, race, sexuality, gender, capacity, and institutionalized violence that structure where we can live, work, and play. Special topics of focus will include boredom as a technique of torture, social media and the gamification of leisure, content moderation of sex and violence, and the domestication of travel and tourism.

We will also use this course as an exercise in boredom praxis. We will do a bit of thinking about what we do when we are bored, and why, and will try to sit with and direct our boredom in gently experimental ways. This also extends to critically thinking about how we do work in this class, and our techniques and tactics of maintaining leisure time in academia.

SOC280 Abolition and Social Praxis
This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

SOC288 The Medium and the Message
Do you like to draw autobiographical comics, record bedroom pop songs, make queer zines, write ChatGPT poetry, choreograph burlesque performances, design and print ugly posters, sew avant-garde garments, create absurdist TikToks, or produce niche podcasts? This seminar is for students who want to think through the sociological content, implications, and impact of their creative work. In the course, students will develop and make substantial progress on a creative project that addresses sociological themes in its form and/or content. Students need not have any formal training, but should have demonstrated experience in their preferred medium. Course texts will address sociological issues surrounding cultural production, including representation, dissemination, and professionalization. Class sessions will be divided between discussion of readings and example work, experimental exercises, workshopping, and student presentations.

To apply for the seminar, students should submit the following: 1) a description of the specific project they wish to develop over the semester, keeping in mind that they will be expected to make and share progress each week; 2) a sample of previous work that demonstrates familiarity with any necessary technology (software, instruments, tools, recording devices, etc.); and 3) a “bibliography” of personal influences (including any relevant readings, creative work, etc.).

SOC292 Death and Dying at the End of the World
Death looms large over life. The digital has given people unprecedented access to global media focused on death and dying, from far-flung calamities killing thousands to intimate gofundme pages for your friends’ cancer treatments. In an age of data-enabled prediction and preemption, death is capricious and untimely, remaining stubbornly resistant to scientific and philosophical certainty, despite ever more complex systems for death management. Meanwhile, circulating discourses of ecological and political catastrophe have proliferated thoughts of genocide, extinction, and planetary death. In this course, we look at contemporary encounters with death and dying at a variety of scales, from the search for death’s meaning/a meaningful death, to understanding death as a public feeling and inspiration for political imagination.

SOC299 The Future Perfect
Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

SOC300 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course’s animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as “queer” or “trans”? What constitutes a “queer” or “trans” reading of visual culture? How might various formulations of “queer” and “trans” relate to, put pressure on, and/or resist “aesthetics”? What is the relationship between an artist’s self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences’ efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist’s “identity” (asserted and/or imposed) have to do with their art? And what does a viewer’s “identity” (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the “lure” of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university. Offering: Host Grading: OPT Credits: 1.00 Gen Ed Area: SBS-SOC Prereq: None SOC313 Time, Masks, Mirrors: Aging in America Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the socio-cultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the “aging” mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others. Offering: Host Grading: A-F Credits: 1.00 Gen Ed Area: SBS-SOC Prereq: None SOC315 The Health of Communities Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown’s Community Health Center (CHC) & Moses Weitzman Institute. Offering: Crosslisting Grading: OPT Credits: 1.25 Gen Ed Area: SBS-SOC Identical With: CSPL314, SISP315 Prereq: None SOC316 Community Research Seminar Small teams of students will carry out research projects submitted by local community groups and agencies. These may involve social science, natural science, or arts and humanities themes. The first two weeks of the course will be spent studying the theory and practice of community research. Working with the community groups themselves, the teams will then design and implement the research projects. Offering: Host Grading: A-F Credits: 1.50 Gen Ed Area: SBS-SOC Identical With: ENVS316

SOC318 Imagining Difference: Social Science & Black Life
This class has two interrelated areas of focus: first, the racist habits of imagin(ing) Blackness’s presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in Black people’s quests for institutional inclusion in racial slavery’s afterlife. Focusing particularly on the careers of Ida B. Wells, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the often contradictory relationship between Blackness and institutional power that is discernible in empiricism’s primacy during the long era of postbellum Black inclusion. Rather than seeking evidence of Black artists’ and intellectuals’ departure from empiricism and its attendant violations, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, Black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions—particularly in their imaginings of Black women and queers. In considering the nexus of social science and Black life in this period, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Émile Durkheim, Jacqueline Goudsby, Saidiya Hartman, Katherine McKittrick, Brit Rusert, Autumn Womack, Alexander Weheliye, and others.

SOC319 Theories of Capitalism
Capitalism has profoundly shaped world history, acting as one of the primary drivers of social change, and working to shape a tremendous variety of social institutions ranging from colonialism to our sense of time. This course takes a critical approach to the study of capitalism, looking at the ways capitalism has intersected with and transformed the nature of social opppression (particularly in relation to nation, race, gender, and sexuality), as well as the way it works to shape everyday consciousness. Historical changes within capitalism will be explored, considering particularly the rise of corporate capitalism and of contemporary neoliberalism. We will examine a wide variety of theoretical approaches to capitalism, taking Marx’s thought as a jumping-off point for elaboration and critique. We will conclude by considering alternatives to capitalism that have been proposed in both historical and contemporary contexts, together with an examination of practical efforts to implement these possibilities.

SOC321 Disgusting? Revolting!
Who or what do we find utterly repugnant? Are we the nasty, vile ones? Is it possible that we are unconsciously attracted to which disgusts us? What might it take to turn disgust into desire, and vice versa? In what ways might disgust indicate not only disruption or transgression, but some kind of threat and alternative to the status quo? What might be lost or gained when the disgusting clean up their acts, or are shown to have been respectable all along? In this course we will explore the politics of filth, particularly in terms of the desires, attitudes, identities, and behaviors that elicit disgust. We will consider how disgust infuses political ideology—i.e., how people understand and approach the social groups that disgust them (for example, racialized immigrants, queers, fat people, and drug addicts), but also the wealthy, the privileged, the “basket of deplorables.” We will also explore the psychoanalytic relation of disgust to desire.

SOC322 The Sociology of Nina Simone
An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as “Mississippi Goddam” and “To Be Young, Gifted and Black” undoubtedly made social, cultural, and political contributions to American society. However, much of Simone’s personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone’s career, but ignited her passion to speak truth to power; and utilize cultural and sociological paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

SOC323 “Racing” Across Africa
Is Africa post-racial? Have you wondered how someone becomes Black/ African, white, ethnic, and/or native and its implicit hierarchies, which scholars refer to as racialization? When you think about race and racism, does Post-Independence (PI) Africa come to mind? If not, why is PI Africa removed from our understanding of race? How can we think about Africa today as always undergoing processes of racial imperialism and how does it intersect with sexuality, gender, and class? Lastly, how do we conceptualize Post-Independence Africa in relation to the African diaspora?

We will go from Ghana to Kenya, Nigeria to South Africa, to understand how race is articulated in these spaces during colonization and after formal colonization has ended. We will also gain theoretical language needed to refute raceless logic. These processes will help us recognize why PI Africa is perpetually marginalized within a globally racialized capitalist economy. This course will contribute to thinking about forms of solidarity in our own lives toward visions of decoloniality, equity, and justice for those racialized as Black, especially in Africa.

SOC324 Black Girl Magic?: Survival and Speculative Fiction in the Social World

"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag—cisgender, well-to-do, fit/thin, non-disabled, and/or famous—and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/queer studies, popular culture, political science, speculative fiction, and cultural sociology.

SOC326 Race, Fantasy and Fetish

What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to 'race plays,' this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

SOC350 Sociology of Knowledge

This course provides an in-depth exploration of the sociology of knowledge, a specialized field of sociology that investigates how social structures shape the production of knowledge and how knowledge, in turn, shapes society. The term knowledge must be understood broadly, encompassing multiple forms of human knowledge production, including but not limited to scientific knowledge, cultural products, and capitalistic ideologies. Knowledge is a shapeshifting social thing that takes on heterogenous forms, guises, and tongues. Sometimes knowledge wears the face of truth; other times, it dawns the cloak of lies. Knowledge has both ethereal and material forms and yet always wears the mark of its producers. Every piece of knowledge carries the imprint of the creatures and social forces that produced it—each is a tiny node in the transmission of culture and the reproduction of power. To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SOC352 Race, Immigration, and the U.S. Empire

Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by reifying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white, eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are granted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

SOC355 The Personal Is Social

How do social forces show up in our everyday lives? Which forces grab our attention, and why? When are we more inclined to see something as individual rather than social? What kinds of conclusions can we reasonably draw about the social world based on our individual experiences? In this seminar, students will read texts that use personal experience as a foundation for sociological observation, reflection, and insight. We will spend time thinking about the appeal and limitations of various methods, surveying a range of approaches to incorporating personal experience into scholarship, including memoir, autotherapy, and autoethnography. Students will practice these kinds of writing throughout the semester, culminating in a final paper that blends personal writing with sociological analysis.

SOC399G Advanced Research Seminar: Introduction to Critical University Studies

The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we’re here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through
- We will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government—the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

**SOC399H Advanced Research Seminar: Hot Mamas: Black Women, Sexuality, and Body Size**

Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of black women. We will journey our way through this course using the works of black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

**SOC399I Advanced Research Seminar: Assembling the Self**

This advanced research seminar is open to sociology majors in their senior year or in the second semester of their junior year and fulfills the capstone requirement for the major. The course is divided in two halves. In the first half, we will read a variety of autoethnographic texts, in which the authors use personal experience as a foundation for sociological reflection and insight. We will spend time thinking about the political and methodological benefits and limitations of autoethnography, surveying a range of approaches to incorporating one's experience into scholarship, and attending to the ways that autoethnographic texts respond to existing research and theory. In the second half of the class, students will develop a substantial and original autoethnographic essay, with class sessions focused on workshopping and presenting writing in progress.

SPANISH LANGUAGE AND LITERATURE (SPAN)

SPAN101 Elementary Spanish I
This introductory course is designed for students without prior Spanish language study. Students will develop basic receptive and productive language skills (reading, listening, writing, and speaking) along with an awareness of the various cultures of the Spanish-speaking world, including the US.
Offering: Host
Grading: Amp Graded
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: None

SPAN102 Elementary Spanish II
This course, the continuation of SPAN101, further develops basic language skills (reading, listening, writing, and speaking). The course incorporates readings and media from a variety of sources, allowing students to explore the cultures of the Spanish-speaking world.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: SPAN101

SPAN103 Elementary Spanish for High Beginners
SPAN103 is intended for students with prior experience in Spanish (and is considered the same level as SPAN 102). This language course places emphasis on the development of speaking, listening, reading and writing, within a cultural framework, so students can attain an intermediate level in the language (and subsequently enroll in SPAN 110 or 111).
To enroll in this course students must have placed into SPAN 102 or SPAN 103 on Wesleyan’s Placement exam. Enrollment for Juniors and Seniors is contingent upon space availability during drop/add period. This course is not linked to another class.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: SPAN101

SPAN110 Spanish for High Beginners
Intermediate-level language course following SPAN103, with emphasis on the development of four basic language skills (reading, listening, writing, and speaking) within a cultural framework.
This course is comparable to SPAN111 and can be followed by SPAN112. Those seeking to follow with SPAN113 require permission of instructor. A weekly electronic journal is required for this course.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: SPAN102 AND SPAN103

SPAN111 Intermediate Spanish I
This intermediate language course places continued emphasis on the development of reading, listening, writing, and speaking skills within a strong cultural framework. The sequence SPAN111 and SPAN112 seeks to expand students’ active and passive control of vocabulary and grammar and for students to gain experience in using formal and informal registers of Spanish.
Offering: Host
Grading: Amp Graded
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: None

SPAN112 Intermediate Spanish II
This course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion within a cultural framework that explores an array of topics connecting to other academic disciplines. Students will experience working with written texts and other media materials and produce a variety of written pieces.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: SPAN111
SPAN113 Intermediate-Advanced Spanish

Within a cultural framework focused on the Spanish-speaking world—especially Latin America—this course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion while providing the experience of working with written texts and other media materials. Students will explore an array of topics that connect to other academic disciplines.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: SPAN110 OR SPAN111

SPAN201 Spanish Play

Students will be in charge of directing and staging a play in Spanish with the assistance of a Spanish professor. The workshop will take place over 10 weeks. Minimum one hour per week, which will increase to 2 as the day of the opening approaches. Rehearsals will be split between activities including reading and commenting on the dramatic text and working on the music, which can be done collectively or in smaller groups, and workshopping and rehearsing the play. Although the play will be in Spanish, we will try to allow for a wider audience by providing a brief English translation of the plot.

Offering: Host
Grading: CR/U
Credits: 0.50
Gen Ed Area: HA-RLAN
Prereq: None

SPAN203 Spanish for Heritage Speakers

This course is designed to meet the specific needs of students who are heritage speakers of Spanish to increase their language skills and confidence. Students who take this course must have placed into SPAN112 or above. Emphasis is placed on the following: development of linguistic strategies that advance students’ written and oral expression beyond the colloquial level, grammatical and orthographic norms of Spanish, critical reading (reading for understanding and analyzing what is read), and expansion of vocabulary. The linguistic work will be conducted through course materials that explore, through a variety of literary and nonliterary texts, the use of Spanish in the U.S. Materials include a textbook or manual and topics related to the experience of Spanish speakers in the U.S.

Offering: Host
Grading: A-F

SPAN221 Introduction to Hispanic Literatures and Advanced Practice in Spanish

Poems, plays, essays, short stories, and films representative of various Spanish-speaking countries and different periods of literary history are used to improve speaking and writing skills and to introduce students to the fundamentals of literary analysis. It includes a formal review of recurring grammatical and rhetorical problems students have at this level in Spanish. The course is conducted exclusively in Spanish. Besides the three hours of class sessions with the professor, all students are required to attend a weekly one-hour conversation section with a Colombian or Spanish TA.

Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-RLAN
Prereq: None

SPAN225 Creative Writing in Spanish

This course offers students the tools to articulate their ideas and experiences in Spanish narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of short stories in Spanish and by working throughout the semester on crafting at least one short story or nonfiction piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the semester students will practice extensive writing, critical reading, and peer editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.

SPAN231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage
From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón’s "Spanish Hamlet" Segismundo; Lope’s spitfire diva Diana, the Countess of Belflor; and Sor Juana’s cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of marriage and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

SPAN232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America
This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

SPAN236 Cervantes
Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes’ art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

SPAN239 Rebels and Revolutions in Early Modern Spain
What does it mean to be a rebel? This course examines literary, visual, and historiographical representations of rebels and rebellions in early modern Spain. Students will examine the uprisings of aggrieved comuneros (proto-bourgeois revolutionaries) in Castile and of outraged moriscos (Muslims
converts to Christianity) in Granada and Aragon, the covert spiritual rebellions of crypto-Jewish conversas (Jewish converts to Christianity) and crypto-Muslim moriscas, as well as texts composed by women writers who rebelled against gender norms and Spain’s most famous playwright’s classic rebellion play. We will analyze the scathing testimonies of expelled moriscos and paintings that reimagine the pre-expulsion revolts of Valencian moriscos alongside gripping examples of local resistance to the moriscos’ banishment, an astonishing and unprecedented tragedy in Spanish history. The seminar will introduce students to a critical framework for analyzing visual and multilingual texts. Close readings of “rebellious” texts will acquaint students with both known and nameless rebels of Spain, as well as with the unresolved legacies they left behind.

SPAN251 Urban Fantasies: The City, Sexuality, and National Identity in the Modern Spanish Novel  
The novel as we know it today reached maturity in Europe in the 19th century against the backdrop of a rapidly changing social and economic context, with the city emerging as a “capital” coordinate (literally and figuratively) on the map of national cultures. The rapid growth of a powerful bourgeoisie is a defining aspect of this cultural dynamic, manifesting itself as it does through demographic changes, urban expansion, and the rise of a bourgeois aesthetic that will come to influence art, literature, and all other forms of cultural expression for decades to come. In Spain, these phenomena are reflected acutely by one of the nation’s greatest novelists, Leopoldo Alas (“Clarín”; 1852-1901). Through a close reading of Clarín’s “La Regenta” (1884-85), a uniquely insightful and polished work of epic scope that is widely regarded as one of Europe’s greatest modern novels, we will seek to evaluate how narrative and the cityscape form interlocking textualities within each of which family, the female, and the nation are protagonist, sexuality a central theme.

SPAN250 Modern Spain: Literature, Painting, and the Arts in Their Historical Context  
In this course, we study the so-called "masterpieces" of modern and contemporary Spanish literature, painting, and film (18th century to the present). The works chosen represent the major literary and cultural movements of the past three centuries: the Enlightenment, Romanticism, realism, and naturalism, the generations of 98 and 27, the avant-garde, neorealism, and postmodernism. As masterpieces, they have achieved canonical status through either the influence they have come to exercise over successive generations or their popular reception at the time of their production. In our close analysis of these works, we will interrogate the processes and conditions of canonicity. We will emphasize the relationship between cultural production and historical context, seeking to draw analogies at all times between the short stories, novels, poems, plays, paintings, and movies under consideration and the social, political, and economic milieu from which they emerged.

SPAN254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde  
This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca’s writing but to the potentially transformative power of language and literature in general.

Lorca’s writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca’s verse, plays, and high-profile initiatives intersect with his context in these terms.

SPAN255 Constructing Barcelona Through Its Margins: Contemporary Spanish Culture Through Catalonia  
This course seeks to examine the physical and cultural construction of Barcelona through the ways it has been understood across artistic mediums, social and historical periods, and political spectrums, especially along its margins. This marginality will allow us to look into contemporary Spanish culture from a new perspective, understanding the complexities that lie under the idea of a nation. The course also explores some of the tensions between modernization projects and cultural production during the 20th and 21st centuries, examining representations of the city in literature (poetry and prose), maps, films, performance, and photography.

SPAN256 City, Mobility, and Technology: Towards the Modern City in Spain  
Movements, itineraries, encounters--these are some of the elements that have characterized modern literature. From the Baudelairean figure of the flâneur to the car chases of popular movies like Bullit, the city is described from a series of journeys that create a representation of urban space. However, these narratives reveal more than a personal account of the city: they show the urban architectures that allow the movement in those spaces (ie, paths, roads, lighting) and in doing so they portray the development of the modern city.

With this framework in mind, in this course we will analyze the construction of the modern city in Spain through literary and filmic texts. We will pay special attention to Barcelona and Madrid, but we will also look at how other international cities are perceived and represented in Spanish literature. In doing so, we will explore how these authors understand the modern city and the international connections and influences that shaped it at specific historical moments.
SPAN257 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain

In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged as individuals and cultural formations. Although they represent discrete realities—not all Gypsies identify with flamenco and not all flamenco artists are Gypsies—correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain’s dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to foster a deeper understanding of the importance of the Roma community within the framework of European and Spanish culture and a deeper appreciation for the complexity of flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

SPAN258 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world’s dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders—the Strait of Gibraltar and the Rio Grande (Rio Bravo)—and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

SPAN259 Detective Fiction: Procedure and Paranoia in Spanish Narrative

The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective—a person who is generally outside the law and sometimes crazy or paranoid—help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

SPAN260 Between Word and World: Major Spanish Poets of the 20th Century

Our goal in this course is to study how the leading poets in 20th-century Spain use the lyric mode to negotiate the relationship between themselves and their community at key junctures in the nation’s history. In doing so, we will also identify and assess the various notions of community that arise in modern Spanish poetry, attempting to evaluate how those notions evolve or are affected by such events or movements as (1) the avant-garde and the second Republic (1920-1936), (2) the Civil War and the Franco regime (1939-1975), and (3) sweeping political and social transformations of the past 30 years as signaled by the country’s democratization, integration into the European Union, economic development, and by the massive influx of immigrants from Africa, Latin America, and Eastern Europe (1977-present). Key essays (critical and theoretical), some by the poets themselves, are included in the syllabus to provide critical tools for discussing how the public experience is lyricized through the intimate filter of the poet’s own sensitivity. We will seek to understand the role played by context in conditioning the decisions poets make in adopting the epic, elegiac, didactic, or testimonial mode of expression, to name just a few. The image of the poet standing at the crossroads of lyrical creativity—word—and historical circumstance—world—will be central to our critical inquiry.

SPAN261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator’s death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close
reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

SPAN262 Through Foreign Eyes: The U.S. in Spain in the 20th Century
Although the relationship between Spain and the U.S. has a long history that can be traced back to colonial times, during the 20th century, an extensive corpus of literature in which Spanish authors portray the U.S. prominently becomes visible. The appearance of this body of work gives rise to a series of questions: How do Spaniards see the U.S.? What are the consequences of this understanding? Why is there such interest in portraying the U.S. from a Spanish point of view? Of course, cultural and social definitions are constructions always limited to historic, social, and cultural events, be they of a military, political, or purely commercial nature. One could think that these portraits dwell on stereotypes; nonetheless, we are before a literary production that uses the U.S. to create a narrative about how Spain enters a global economic market through a cultural exchange. These are texts about traveling, the construction of the individual, and the shaping of a nation; texts that cross the boundaries of literary genres to define Spanish identity. We are before the construction of a narrative that questions the building of alterity and shapes the identity of modern Spain. In our approach to the main historic events that define the relationship between Spain and the U.S. during the 20th century, we will examine novels, poems, and movies that result from such events to analyze questions related to identity, globalization, localism, modernity, and nation. What we will engage in is, in fact, a debate about how we define ourselves, whether we are Spanish or American, through foreign eyes.

SPAN263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance
What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand “destiny”? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society.

In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Hispanophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles’ Antigone, Euripides’ Oedipus and Medea, Aeschylus’ Agamemnon, as well as figures from the Oresteia and from such epics as Homer’s Iliad and Virgil’s Aeneid. This course is taught in conjunction with Italian 263 and French 263. The final collaborative performance, scheduled during the Final Exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

SPAN264 Orientalism: Spain and Africa
Over the past several decades, North African and Middle Eastern cultures have become conspicuously important within the Spanish cultural arena. Translations of writers from Lebanon to Morocco abound in Spanish bookstores. Spanish writers have begun addressing North African and Middle Eastern issues with greater frequency, especially in their novels. The dramatic rise in the African immigrant population in Spain during the 1980s and 1990s, meanwhile, has been matched by a rise in press coverage of issues pertaining to Africa and the Middle East. These factors constitute the point of departure for our historical overview of the treatment of Islamic cultures in modern Spain, from early 19th century to the present. Guided by Edward Said’s seminal essay, ORIENTALISM, we will assess the extent to which (and the process by which) Spain passes from the Orientalized subject of European Romanticism (painting, literature, music) to an Orientalizing European power in the late 20th century. In doing so, we will seek to relate the representation of Islamic cultures in Spanish literature and painting to social, political, and economic factors, most important of which was Spain’s military invasion into Morocco in the late 19th and early 20th centuries. We will also survey changing attitudes among Spanish intellectuals with regard to the Islamic world and toward Spain’s Islamic heritage, the result, perhaps, of 20th-century modernization and, most recently, of Spain’s full integration, after Franco’s death, into Europe’s military and political structures. The tools for this study include works of literature primarily, but we will also focus on painting, historical essays, newspaper articles, and film.

SPAN265 History of Spanish Cinema for Spanish Speakers (CLAC.50)
Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: https://span301.site.wesleyan.edu/. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

SPAN267 Image/Word: Narrative and Photography in Contemporary Spain
The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization; that is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar, where students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life.

SPAN269 Appearing Acts: Visual Histories and Identity Construction Through Photography in Spain
In her reading of Plato’s “ Allegory of the Cave,” Susan Sontag finds a close bond between photography and the world, our cave. Photography, she says, shows us a new visual code that constructs narratives that “alter and enlarge our notion of what is worth looking at,” and in doing so can influence, guide, and condition our knowledge of the world. Keeping this in mind, when it comes to Spain, what kind of world does photography construct? How does the visual field influence and guide our knowledge of modern Spain? In this seminar, we will reflect on how photography has conceptualized social and national identities in Spain from the 19th century to the present, asking how images create, shape, and question the cultural and social archive. Through the examination of photographs, theories, and methods, we will draw a contextualized history of photography that will help us to consider its role in the interdisciplinary construction of Spanish identity.

SPAN271 Against Epistemicide: Latin American Critical Thought
This class explores seminal social and political texts that reconceptualize America Latina against the legacies of colonialism and Eurocentrism. We will focus on Liberation and Decolonial Latin American Thought in order to move from the idea of Latin America to that of Abya Yala. We will begin with the triad: La ciudad letrada by Ángel Rama, Culturas híbridas by Néstor García Canclini, and Colonialidad del poder, eurocentrismo y América Latina by Aníbal Quijano. We will then decolonize their own theories through the work of women thinkers such as María Lugones, Yuderkis Espinosa, Ofelia Schutte, Mary Louise Pratt, Linda Martin Alcoff, and Catherine Walsh.

SPAN273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters
Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra’s other Chile, César Aira’s Colón (Panamá), Fernando Vallejo’s Medellín (Colombia), and Mayra Montero’s eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904–1914), the Cold War (1947–1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

SPAN274 Insular Borders of Latin(x) America
Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire’s control of its remaining insular colonies in
the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the United States’ successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island “intra-colonial” (Joanna Poble) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai’i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Édouard Glissant’s concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

SPAN275 Multilingual Aesthetics in Latin America
This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as “modernismo,” “creacionismo,” “negrismo,” “indigenismo,” “neoindigenismo,” and “indianismo,” all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the “Festival de poesía: lenguas de América,” a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and “Spanglish” by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

SPAN276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

SPAN278 Dangerous Plots: Fictions of the Latin American Jungle
This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

SPAN279 Latin American Theater and Performance
This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

SPAN280 Screening Youth in Contemporary Latin American Cinema
This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

**SPAN281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature**

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as "Islas sonantes" (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

**SPAN282 Narratives of Crisis: Violence and Representation in Contemporary Latin American Culture**

How have Latin American literature, film, and performance of the past three decades articulated the many forms of violence in a region facing complex armed conflicts, wars deployed around the drug trade, and diverse forms of political unrest? Focusing on Colombia, Peru, Central America, and Mexico, we will investigate how contemporary cultural artifacts reflect on the linguistic, ethical, and social dimensions of subjectivity in times of crisis and provide productive analytical frameworks to examine violence, history, and memory in the region.

**SPAN283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile**

This course explores how poetry, novels, and films, produced during and after Chile's military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

---

**SPAN284 Tales of Resistance: Modernity and the Latin American Short Story**

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

**SPAN285 Asian Latino Encounters**

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin/x America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Dario, Tablada, Gómez Carrillo, Balmori, etc.). Then we will read various texts by Latin American writers who lived for some years in different parts of Asia throughout the twentieth century (e.g. Pablo Neruda in Southeast Asia, Octavio Paz in India, Araceli Tinajero in Japan, etc.). Finally, we will examine diverse works by writers/artists of Asian descent in Latin America as well as "Asian Latina/os" in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Latin America? How does Philippine literature in Spanish produced during the US colonial period modify our conception of what is "Hispanic," "Asian," and "American"? How do Asian Latin American and Asian Latinx writers and artists represent themselves through culture?

**SPAN286 Bolívar’s Interpreters: Nation Construction in the Americas**

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolivar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, ’30s, and ’40s, Bolivar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolivar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

SPAN287 Constructions of the Self
How does one define oneself? What forces are active in the creation of our personal identities? How much control do we exercise over these processes? What role do writing and literature play in the construction of notions of the self? While these questions are timeless and know no geographical boundaries, we will examine how several different Latin American and U.S. Latino authors have addressed these concerns in their art, with an eye toward understanding the cultural specificity of each of their propositions, as well as how writing itself becomes the subject of writing in the search for subjectivity.

SPAN288 Territories of Dwelling, Desire and Resistance in Latin America
This course seeks to examine the ways in which diverse geographical spaces in Latin America have been produced, negotiated, and contested from the past century to our times through cultural practices that construct them as territories of dwelling, desire, possession, dispossession, and resistance. We will focus on texts and practices—literature, film, performance, and the visual arts—that seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries, which in our times manifests itself through extractivist and other capitalist practices, and pay close attention to local modes of dwelling and the relationships among community, embodiment, gender, and desire. We will trace how these texts intervene in urgent debates about the destiny of rural lands, the uses and abuses of nature, and the place of rural peoples, the struggles for peasant and indigenous rights, environmental justice, and the construction of alternative modernities. We will focus particularly on the Andean and Amazon regions (mountains, rainforests) of South America, as well as other rural tropical areas.

SPAN289 Contact Zone: Introduction to Amazonian Narratives
Often, the Amazonian region has been considered a marginal space within the territorial limits of Peru, Colombia, Venezuela, and Brazil. However, this territory is and has been key for these nations’ past, present, and future. Beyond its outstanding biodiversity, the Amazon rainforest has housed for various centuries multiple and diverse native and non-native linguistic and ethnic groups. From the original Yanomami inhabitants to the contemporary European descendant citizens of Iquitos, the Amazonian territory has been a zone of contact where multiple cultural and cosmological views interact. In this class students will engage with a variety of materials, including literary works, travel diaries, films, and photographs that explore the Amazon rainforest: modern odysseys (La Vorágine), shape-shifting ghost stories (Las tres mitades de Ino Moxo), accounts of guerrilla warfare in the jungle (Naturaleza común), and apocalyptic prophecies (A queda do céu). By analyzing the literary and audiovisual archive resulting from multiethnic and multilingual interactions in the region, students will examine the role of the Amazon and its inhabitants in shaping the modern Latin American nations surrounding it. They will acquire a comprehensive understanding of the Amazonian region, its cultural diversity, and the complex issues it faces, such as racial and ethnic clashes, resource extraction, and the existential threat this poses to both human and non-human beings inhabiting it.

SPAN290 From the Muralists to the Narconovela: The Public Intellectual in Mexico
Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910–1917) and the Muralists (1920s–40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

SPAN291 Spanish American 'Modernismo' in a Global Context
The publication of Nicaraguan Rubén Darío’s AZUL... in 1888 is often considered to be the inaugural event of “modernismo,” the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanicophone world. In March 1916, about a month after Darío’s death, a magazine in the Philippines claimed that Darío also belonged—“spiritually”—to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

SPAN295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures
What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

SPAN296 Cuban Literature and Film: Imagination, Revolt, and Melancholia (CLAC 1.0)
This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late nineteenth century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin revolvere) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group Orígenes, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life. Reading materials and in-class discussions will be in Spanish. Hence, knowledge of advanced Spanish is required.

THEATER (THEA)

THEA105 Production Laboratory
This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions happen. All sections will participate in the backstage work of the Theater Department’s productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.
Offering: Host
Grading: A-F
Credits: 0.50
Gen Ed Area: HA-THEA
Prereq: None

THEA110 Drafting for Theatrical Design
This course is intended to provide students with a basic knowledge of computer drafting, for theatrical design and other performative arts. Students will learn the language of the line, the drafting standards for theater, as codified by the United States Industry of Theatre Technology (USITT), and the means to create accurate, measured drawings. We will cover topics including, geometry, line weights, scale, theatrical drafting conventions and symbols, ground plan drawings, elevation drawings, section drawings, dimensioning, page layout, and printing.

THEA114 Incarcerated Stories: Documenting In/Justice
Students in "Incarcerated Stories: Documenting In/Justice" will collaborate with formerly incarcerated individuals and their families to create performances of theater and music based on interviews, trial transcripts, prison memoirs, and other texts related to mass incarceration. Students will learn how to apply their skills as writers, performers, or musicians to community service and activism as they learn about the United States' criminal justice system and its position at the heart of systemic racism in America. The class will be taught remotely and the performances generated by the students and their formerly incarcerated collaborators will be disseminated as widely as possible, with the objective of amplifying marginalized voices to raise awareness of mass incarceration's social impact and the need for carceral reform. Due to the collaborative nature of this course, and its dependence on interaction with formerly incarcerated individuals and their family members who will be visiting the class remotely via Zoom, weekly online attendance is required.

THEA118 Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays
trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashaq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

THEA135F Documentary Performance: Theater and Social Justice (FYS)
This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course’s initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.

THEA143F Gospel, Rap, and Social Justice
Students in this course will collaborate with formerly incarcerated individuals on the creation of theater and music performances inspired by their collective reading of Dante’s Divine Comedy, Michelle Alexander’s The New Jim Crow, Anna Deavere Smith’s Notes From the Field, and a variety of texts documenting the impact of mass incarceration on communities of color. Our work will consider the ways in which current and formerly incarcerated activists have used gospel, rap, spirituals, and other forms of music and art to survive, heal, and advocate for change in the criminal justice system. The performances generated by the class will call attention to the relevance of Dante’s poem to contemporary issues of social justice with the objective of amplifying marginalized voices and raising awareness of the injustices embedded in the carceral state.

No previous performance experience is necessary to participate in the class, but students with vocal and instrumental musical skills are welcome.

THEA150 Introduction to Performance Studies
What is performance? Is it an event or an action? Is it what happens on a stage or in your living room? Furthermore, what does performance have to do with our understanding of how race, gender, sexuality or community function both historically and in the present? This course approaches theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking. Students will be introduced to the theoretical, critical, and creative field of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performances ranging from the play "Fairview" by Jackie Sibblies Drury, to "Fires in the Mirror" by Anna Deveare Smith, to the punk performance work of Sister Spit, and the story weaving work Spiderwoman Theater. In this writing-intensive course we will pay particular attention to queer artists and artists of color.

THEA172F Staging America: Modern American Drama (FYS)
Can modern American drama—as cultural analysis—teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncensored plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O’Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller,
Through three specific project-based assignments—1. object design, 2. garment integrating environmental justice paradigms by analyzing specific case studies, and 3. environmental design—students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.

**THEA199 Introduction to Playwriting**

This course provides an introduction to the art and craft of writing for theater. In the course of the semester, students will create plot and characters, as well as compose, organize, and revise a one-act play for the final stage reading. The course will help students develop an artistic voice by completing additional playwriting exercises, as well as reading and discussing classic and contemporary plays. The instructor and students’ peers will provide oral and written feedback in workshop sessions.

**THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern**

This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle’s Poetics and Plato’s Republic. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

**THEA183 The Actor’s Experience**

The Actor’s Experience is an introduction to the practices of acting in rehearsal with a director. It is held in conjunction with THEA281- Intro to Directing; students will be working directly with the student directors in that class. Basic aspects of staging, collaboration, script, and character analysis will be covered. Commitment to attending scheduled rehearsals is vital. Each actor will have the opportunity to perform in both a short-form scene (mid-term) and long-form scene (final), performed in front of the class and invited guests.

This class is a chance to be in community with other students interested in theater, and practice collaboration and care. Together students will consider why theater matters, and how theater-makers can offer more care to themselves, each other, and our audience. Students will participate in in-class staging exercises, outside rehearsals with peers, reading discussions, and viewing plays.

The Actor’s Experience is a half-credit class intended for majors and non-majors at varying levels of experience and is held in conjunction with the Intro to Directing class.

**THEA185 Text & Visual Imagination: Introduction to Eco Design for Performance**

Eco-scenography is an introduction to design for performance. In this course, students will learn the core principles of design for performance while exploring sustainability and environmental practices with an emphasis on understanding of materials, such as production cycle and manufacturing process, as well as integrating environmental justice paradigms by analyzing specific case studies. Through three specific project-based assignments—1. object design, 2. garment design, and 3. environmental design—students will train their visual imagination, as well as develop an aesthetic literacy and knowledge of performance design concepts and practice within eco-sustainable practices.
performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.

THEA204 A Nation and its Theater: Cultural and National Identity in Performance

In the wake of Black Lives Matter, the insurrection in January 2021 on our nation's capital, a global pandemic, and the Trump presidency, the very notion of what "America" is, has been, or ever was is being grappled with on a global scale. The nation is fractured in its sense of national and cultural identities and is struggling to imagine a collective future. This course examines the concept/model of a "national theater" and interrogates the cultural, historical, and political role these institutions play within their countries. It examines what role the theater can, should, or should not play within the formation, reinforcement or dismantling of national and cultural identities.

Through an examination of models such as the Teatro Nacional de Venezuela, the National Theater Company of China, the Uganda National Cultural Center, Ireland's Abbey Theater, and France’s Comédie-Française, this course looks at: (1) how politics, history, and culture give rise to/craft the shape of national theater agendas; (2) the role of national theaters in building/challenging/reinforcing national and cultural identities; (3) how government agendas and public funding can affect the role that national theaters play; and (4) how the colonial legacy of a European national theater model has influenced non-Western models.

Students will engage with theoretical and non-western notions of "nation," and debate the role/responsibility of a "national theater" to provide representation and inclusive/pluralist notions of cultural identity. Students will then look at historic attempts in the United States to create national theater concepts such as the Federal Theater Project, the Living Newspaper, and the American National Theater and Academy. For their final project, students will be asked to imagine/craft a proposal for a "National Theater" for the United States.

THEA210 Shakespeare

This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicalmedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

THEA211 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects

You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others’ work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

THEA213 Performing Arts Videography

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's Pina, Elliot Caplan's Cage/Cunningham, John Cohen's The High Lonesome Sound, and Peter Greenaway's Four American Composers.

THEA225 Latinx Theater in the U.S.: Analysis & Performance

This Latinx theater study and performance class will examine American-born playwrights of the Latinx Diaspora. Playwrights who are of Mexican, Cuban, Puerto Rican, and Dominican descent are just a few of the many Latinx identities in the United States. The goal will be to examine the specific cultural identities within the United States, their origins, experiences, and stories in this country. We will analyze and explore the universal resonance of these plays as well as their current relevance to contemporary American culture, both politically and socially. Students will be required to do monologue work and scene study for the performance portion of this course.

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymou, who have all collaborated with Balinese performers.

THEA221 Rescripting America for the Stage
This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of source materials related to all forms of American culture from the revolution to hip hop. Initially our primary source material for adaptation will be Herman Melville’s “Confidence Man.” We will examine a range of performance texts adapted from nontheatrical sources, including Lin-Manuel Miranda’s “Hamilton” and Dario Fo's subversive rewrite of Columbus’ voyages, “Johan Padan and the Discovery of the Americas.” Ancient Greek drama will also be studied for its dramatic structure and for its significance as a source for American adaptations such as Lee Breuer’s “Gospel at Colonus.” This course counts as a workshop and techniques course for the Writing Certificate.

THEA222 Neo-Futurist Radio: Experiments in Audio
This course will immerse students in the unique form of performance-making called Neo-Futurism as well as teach them how to create their own Neo-Futurist work for radio. The four key principles of Neo-Futurism are (1) you are who you are, (2) you are doing what you’re doing, (3) you are where you are, and (4) the time is now. These guiding principles shape honest, personal, timely, relatable stories that are crafted with compelling framing and presented in audio or on stage.

During the intensive, students will learn how to express their voice through the Neo-Futurist lens in writing exercises, study of specific works, and visits from members of the New York, Chicago, and San Francisco Neo-Futurist ensembles. Students will also be introduced to techniques of sound recording and editing (working primarily with the software Adobe Audition), in addition to expansive and experimental methods of developing sonic perspectives for their work. The course will culminate with students writing, performing, recording, and designing a small collection of Neo-Futurist audio plays to be featured in a special episode of the show “Hit Play” along with pieces from students at Oberlin College. These pieces will be developed throughout the course by methods of group critique, generative feedback, and sound designing sessions. Online Course. Special Schedule: 10 a.m.-12 p.m. + 1 p.m.-3 p.m. (1/10-11, 1/13, 1/16, 1/18, 1/20); 1 p.m.-5 p.m. (1/12, 1/17, 1/19, 1/23)

THEA223 Femme Fashion and Culture in America: 18th to 21st century

In this course, students will explore through a hands-on design approach the history of women's fashion and clothing in America and Europe. This history is long and diverse, with dress styles changing rapidly as the world and its expectations of women adapted and developed. In this course, you will study how social and economic change affected women's fashion in America—from the societal distinctions and separations of classes in the 18th century to the ready-to-wear era through the 21st century and the way it has shaped the female experience. We will analyze this through plays from each period, visual research, costume renderings, and materials research.

THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage

From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheatere, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón’s "Spanish Hamlet" Segismundo; Lope’s spitfire diva Diana, the Countess of Belflor; and Sor Juana’s cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will see the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance

What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

THEA235 Writing on and as Performance

This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and doing live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Hilton Als, Glenn Ligon, Claudia Rankine, Eve Sedgwick, Fred Moten, and Ann Pellegrini, this course will challenge students to craft ideas and arguments by enhancing critical reading skills, creative thinking, and clear writing. We will experiment with style and form from academic essays to performative writing, performance lectures, artist interviews, and free-form prose. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten), "gaps, overlaps, dissonances" (Sedgwick), and "listening in detail" (Vazquez).

THEA237 Performance Art
This course can be understood as an ephemeral, time-based art, typically centered on an action or artistic gesture that has a beginning and an end, carried out or created by an artist. It also contains the elements of space, time, and body. This hands-on course explores the history and aesthetics of performance art and how it relates to the performing arts (dance and theater). In a project-based format, students conduct performance assignments and conceptual research within the gaps that exist between performative art forms. The course focuses on analyzing and studying artists who used the concepts of chance, failure, or appropriation in their work.

THEA238 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World
Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated in the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders—the Strait of Gibraltar and the Rio Grande (Rio Bravo)—and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

THEA239 Songwriting Workshop
In this course, students will learn the basics of songwriting including form, lyric writing, chord progression, rhythm, storytelling, etc. We will focus first on "traditional" song form and its component parts (verse, chorus, bridge), and then branch out to less traditional and freer forms. We will discuss lyrics in depth and analyze lyric-writing techniques in various genres such as pop, rock, rap, musical theater, and others. As time, interest, and abilities allow, we will also delve into the world of music theory with an emphasis on function and structure. Students will be guided through practical matters such as transcription, recording, and publishing on social media platforms, so that they can apply the principles and guidelines discussed in class under real world circumstances.

THEA243 Chinese Theater and Drama
This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific authors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

THEA245 Acting I
This studio course will explore the fundamentals of acting and how they are applicable to all areas of life, regardless of vocation. A wide range of exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. Students will examine the creative process practically and theoretically, through exercises including games, improvisation, monologues, and scene work. Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play.
For more information on Acting I, please visit: https://youtu.be/IKS7g1DMD58

THEA246 Adornment: The Human Body on Display
Personal adornment has been important throughout history in demonstrating distinctive features of world cultures, creating forms and images that illustrate spiritual beliefs, as well as representing individuals or groups through the use of decorative elements.

In this course, we will explore the many ways adornment – through the manipulations of makeup, hair and millinery accessories - can create a profound transformation in the appearance of the wearer. These adornment techniques have been a source of fashionable expression for thousands of years - from the kohl rimmed eyes of the ancient Egyptians to the elaborate hairstyles of the Greeks and Romans, to the beauty marks that were popular with French nobility in the 18th century. Contemporary use of adornment can be seen in the constructed artistry of David Bowie’s alter egos for performance in the 1970s and Lady Gaga’s innovative use of prosthetic makeup for facial enhancement.

THEA248 Ethical Design for Stage and Fashion

Now more than ever we must look at the way we as consumers and large businesses are impacting our planet as well as the future of our planet. It has been estimated that 85 percent of our clothing ends up burned or in landfills each year and that the average American throws away about 81 pounds of clothing every year, and that’s just America! In this class students will tackle a variety of hands-on projects that will explore clothing, wig, hat and accessory construction using unconventional materials. Students will explore their personal habits as a consumer of “fast fashion” and the implications fast fashion has on our economy and planet, as well as inspecting the fashion industry and film industry participation in fashion waste. Students will also explore ways in which society can embrace sustainability and become more eco-friendly. By the end of the semester students will have a new or broader understanding of ethical and sustainable fashion and how to apply it to their everyday lives moving forward as well as a range of projects to demonstrate these learned skills. Some of the questions we will explore in this class: What does sustainable fashion mean? What is ethical fashion? Do we need ethical fashion? What are small and large ways we as individuals and large businesses can lessen our fashion waste?

THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde

This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca’s writing but to the potentially transformative power of language and literature in general.

Lorca’s writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca’s verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at http://span254.site.wesleyan.edu/ to review in detail the materials, objectives, and modes of assessment for this course.

THEA259 Face the Blank Page

A 13-week course for the beginning playwright. Students will read 12 plays and write essays on each one, in which they will explore the creation of the play. The why of it. Who is the main character, what do they want, what’s stopping them from getting it, and finally, what is the point of no return? Students will look at the time and society in which the play is placed. What obstacles were part of their world; what did they have to overcome, and what did they have to accept? Every play will also serve as a prompt for a writing exercise that students will be responsible for. Students will take a character or situation from the play and make it their own. Also, as a group, the class will write an original play. Each student will be assigned a scene, and week by week the play will come together. This collective creation will be inspired by a song; everyone will have the same song, and each student will continue the play based on the scene that preceded it. Each student will be a part of building the structure of the play and will be able to put their own stamp on it.

THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator’s death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

THEA263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand “destiny”? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and I talophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of
change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles’ Antigone, Euripides’ Oedipus and Medea, Aeschylus’ Agamemnon, as well as figures from the Oresteia and from such epics as Homer’s ”Iliad” and Virgil’s ”Aeneid.” This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

THEA266 Black Performance Theory

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheiye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong’o, and Daphne Brooks.

THEA267 Revolution Girl-Style Now: Queer and Feminist Performance Strategies

Looking to the rich cultural history of queer and feminist performance in the U.S., this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms “feminist” and “queer” come to determine a specific piece of theater or performance art. Is it the author’s own political affiliation that establishes the work as feminist? Is it the audience’s reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words “queer” and “feminist,” we will pair theoretical readings with theatrical sites. Authors and artists to be discussed will include Judith Butler, Paula Vogel, Holly Hughes, Beth Henley, Karen Finley, Samuel Delany, Nao Bustamante, Rebecca Schneider, Anna Deavere Smith, José Muñoz, Jill Dolan, Sylvia Rivera, Sharon Hayes, Sharon P. Holland, Bikini Kill, boychild, Lucy Lippard, Laurie Weeks, and Dean Spade.

THEA269 Introduction to Performance Studies

Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the “performance” as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA273 BlaQueer Sounds: Queer Negotiations in African American Music

The term “BlaQueer,” first coined by Tabais Wilson, is an invention of the intersectionality era; an acknowledgment of the unique and multifaceted experiences/identities formed at the nexus of racial, gendered, and sexual marginalization. In creating the portmanteau BlaQueer, Wilson underscores that, for people who are both Black and queer, these identities are inseparable, immutable, and irreducible. While the term BlaQueer, and by extension the
concept it represents, is fairly new, there are long histories of Black queer people navigating and negotiating identity, revolutionizing and contributing to discourses on race, class, and gender. This course offers an exploration of the BlaQueer expressions, movements, and (most importantly) people that transformed American culture through music. While this course follows a historical arc, the primary aim of this course is to engage BlaQueer musical lineages through a critical interdisciplinary academic lens; accordingly, this course incorporates gender/women’s studies, African American studies, performance studies, queer studies, and musicology.

THEA276 Body, Voice, Text: Theater and the Transmission of Experience
Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

THEA279 Music Theater Workshop
This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, “I Want/I Am” songs, extended musical sequences, act one finales, 11 O’clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the “rules” to suit their own creative instincts.

THEA280 Award-Winning Playwrights
With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

THEA281 Introduction to Directing
Intro to Directing provides an entryway into the mechanics and ethos of directing. Basic aspects of staging, script analysis, and planning the rehearsal process will be covered, as well as leading a room, working with actors, and developing the director’s voice and vision. This class is also a chance to deeply consider together the role of theater in the context of our current social, political, and environmental realities. Why take this class, NOW? Why choose to direct theater, NOW? How does theater as an industry need to change, and how can theater-makers offer more care to themselves, each other, our audiences? As a director, what role do we have to play in righting wrongs, providing alternate realities, creating new futures? This course is part of the Sustainability and Environmental Justice course cluster, and we will look at these questions in part through a sustainability lens, using Adrienne Maree Brown’s Emergent Strategy as our guide.

D1 is taught in conjunction with The Actor’s Experience. Majors and non-majors welcome. The class is not open to first years.

THEA285 Acting II: It’s All Greek to Me
This studio course will explore performance and adaptation of classical text. A wide range of exercises and techniques will be used to cultivate a sense of ease and freedom, and to develop the imagination, relaxation, concentration, focus, and technical skills required for heightened language and text. We will be utilizing Greek myths and characters as archetypes. The course will also include a devising portion, whereby the students will offer up an original contemporary take on their chosen archetype/myth via any style of performance, including song, poetry, monologue, scene, and film. Independent writing and attendance at Hadestown in Hartford is also required, and the course will end on March 8, 2023.

THEA292 Spectacles of Violence in Early Modern French Tragedy
The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts—many of which staged physical violence—were not only reflected but also actively participated in the debates surrounding the ‘troubles civils.’ In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

THEA297 Latin American Theater and Performance
This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

THEA301 Immersive Theater: Experimental Design, Material Culture and Audience-Centered Performance
This course offers a comprehensive exploration of Third Rail Projects’ approach to crafting and performing in immersive performance formats. Students will work closely alongside Co-Artistic Director Tom Pearson to explore Third Rail’s toolbox of techniques, including:

- Developing presence and clarity around audience engagement
- Remaining spontaneous and responsive to the changing landscape of an active audience
- Generating game play for crafting immersive scenes
- Understanding ritual, narrative, and audience initiation through the study of a scene from one of our immersive productions

THEA306 Techniques of the liar: Performance, Artifice, Fraud
This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

THEA308 Composition in the Arts
Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites—public, private, physical, and electronic—in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.
Offering: Crosslisting

THEA309 The Actor’s Work on Psychophysical Actions: A Nonrealist Approach
Konstantin Stanislavsky, who dedicated his life’s work to the elaboration of the first Western acting system, Stanislavsky viewed the acting conventions of Romanticism and melodrama as “false,” inadequate, and passé. As a proponent of realism, then an emerging theatrical genre, Stanislavsky sought to develop an acting system that would support the creation of “truthful” actions on stage. The late Polish director Jerzy Grotowski continued Stanislavsky’s research on the method of psychophysical actions. In response to the theatrical trends of his time, Grotowski’s own research aimed at freeing actors from the conventions and materials of realism. Instead of departing from dramatic literature, students in this course will learn how to create psychophysical actions using points of departure such as personal memory, short stories, poems, visual materials, objects, traditional song, and so forth. The goal is to guide them to create repeatable scores of psychophysical actions; select, extend, and/or omit specific fragments in their score; juxtapose text or song to the physical score; and use objects in a manner that is precise and expressive. During the second half of the semester, students will learn how to “edit” their scores of psychophysical actions in partner and ensemble work. This portion of the course provides actors with insight into directorial work, a knowledge that gives them greater autonomy in the creative process.

THEA310 Shakespeare’s Macbeth: From Saga to Screen
A close reading of Shakespeare’s play that will position the play in terms of its historical and political contexts and its relation to early modern discourses on the feminine, witchcraft, and the divinity of kings. We will begin with a consideration of the historical legends that constitute Shakespeare’s “sources,” then read the play slowly and closely, coupling our discussions with readings from the period, exploring how Shakespeare’s contemporaries thought of the political and cultural issues raised in the play. We will then compare how our contemporaries have recast these concerns by comparing scenes from films of MACBETH from 1948 to the present.

THEA311 Queer and Trans Aesthetics
This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course’s animating (and unfixed!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as “queer” or “trans”? What constitutes a “queer” or “trans” reading of visual culture? How might various formulations of “queer” and “trans” relate to, put pressure on, and/or resist “aesthetics”? What is the relationship between an artist’s self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences’ efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist’s “identity” (asserted and/or imposed) mean for an artist or viewer to describe an image, object, or performance as “queer” or “trans”? What is the relationship between an artist’s self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences’ efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist’s “identity” (asserted and/or imposed)
have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

THEA315 Stage Management
This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time and self-management, industry standards, union practices, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work or hinder it.

Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show.

Potential projects include: Creation of a prompt book, and templates to use while stage managing, calling a pre-produced theatrical piece, and interviewing a professional working Stage Manager

THEA316 Advanced Topics in Performance Studies
What does "theory" have to do with "performance"? Furthermore, what is the relationship between thinking and doing ("theory" and "praxis")? If performance studies shifts the frame from an emphasis on being to one of doing, then what does it mean to "do" theory? In this class we will explore works that orbit "the live." We will use performance as a lens to explore questions of liveness, what does it mean to "do" theory? In this class we will explore works that orbit "the live." We will use performance as a lens to explore questions of liveness, presence, the body, and affect. We will look to both live/recorded performances and recent work in the field of performance studies to explore the cultural significance of performance in our current moment and location.

Student projects will take the shape of semester-long critical research papers. This class is especially recommended for anyone interested in doing an honors thesis in Theater.

THEA318 Introduction to Viewpoints
In this studio class, students learn and are immersed in the Viewpoints—a vocabulary which breaks down the two dominant issues any performance-based artist deals with: Time and Space. Students practice the Viewpoints and learn a language for talking about what happens on stage. Through practice, students develop tools not only for their own individual work, but for collaboration, offering ensembles a way to quickly generate original work. While a form of movement improvisation, students will also apply the Viewpoints as a means to staging to text as well as generate composition pieces. This class is open to directors, actors, designers, dancers, choreographers, musicians, composers, and writers.

THEA322 Sounding Stories: Developing Contemporary Radio Drama
This course will examine the almost-150-year-old form of the radio drama and ask what its future might sound like. In the 20th century, radio dramas held a place of great influence in entertainment, politics, and revolutionary action. Streaming media of the 21st century has transformed the modern listening landscape, and with it, revitalized the prominence of audio storytelling while opening access to its development. Over the summer session, we will listen to modern approaches to radio drama production, explore their themes and inspirations, and create our own new works of audio theater.

Students will be introduced to sound recording and editing, the specificities of narrative development for audio, as well as experimental applications in the medium. Students will learn to use software (Adobe Audition) and the university’s foley/sound studio to craft their projects. Throughout the session, guest practitioners (WNYC, Audible, Spotify, Oral History Association) will visit the class to discuss their unique perspectives on the craft.

THEA327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern
The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to "train" citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grappling with demanding questions--legal, ethical, and moral: the "laws" of war; discrimination (based on gender, class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional engineering.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, Yael Farber, and movie adaptations.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

THEA346 Shakespeare's Islands
How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripheralization and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.

THEA351 Melodrama Since 1700
Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like Mozart’s Magic Flute, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator’s declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg’s Pierrot Lunaire. But slowly melodrama as a term began to take on connotations relating to one of comic opera’s central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in Mildred Pierce). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

THEA352 Following Fornés: Creativity, Intimacy, and Imagination
This course undertakes an investigation and application of the creative process of visionary iconoclast Maria Irene Fornés: a queer, Latinx playwright whose wildly idiosyncratic plays defied both convention and categorization. Fornés’ legendary workshops shaped a generation of playwrights, including Nilo Cruz, Caridad Svich, and Sarah Ruhl.

Students will engage with Fornés’ own creative process via her ephemera: in this case, the spoken fragments, outtakes, and audio marginalia left behind from the filming of her documentary collaboration with director Michelle Memran, “The Rest I Make Up.” As I work to compile and cohere this material into a book, the class will be applying it, directly, to the conception and creation of their own performance works.

Students who are interested in writing/directing/devising live works of performance are best suited to this class. No former experience necessary, but a willingness to create and share live work and writing on a weekly basis is required. Our work will be contextualized by assigned research and writing into Fornés as a key figure of the American theater, and will culminate in the presentation of our creative projects.

THEA354 Improvisation: Diasporic Modalities
Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/music, the environment, and our community? How do we honor the self in collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.

THEA355 Voice & Movement for Actors: Embodying Imagery and Language into Acting Text
In this advanced acting course students will approach acting text through a physical theatre lens, engaging with voice and movement pedagogies involving abstract imaginative use of the voice and body. These techniques will be used to connect the voice and body to image and text, and to build a physical vocal practice as a tool for professional actors. Personal exploratory and imaginative work will be applied to poetry and to contemporary scene work.

Prereq: THEA245
THEA357Z Space and Materiality: Performing Place
Scenography explores and shapes the material world in and through the performative event. In site-specific performances, it transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and direct understanding of the material potential and limitations of the four key elements involved in the scenographic project -- artistic design, the actor's body, local architecture, and time.

This course is divided into three units: (1) site-specific; (2) street performance; and (3) immersive theater. Each unit includes scholarly readings, assignments in performance and scenography, and specific showings. There will be two written responses for the course (5-to-7-page papers) on two of the works experienced at the festival that demonstrate the student's cumulative grasp of site specificity, scenography, and materiality. There will also be a final media journal showing.

Prereq: None

THEA359 Space Design for Performance
In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software.

THEA360 Media for Performance
This course examines the use of media and technology as it relates to dramaturgy and design for performance. Class time will be used for lecture, discussion, and experimentation, during which we will explore new technologies used in the industry, including projections, motion tracking, and software such as After Effects and Isadora. Throughout the semester, students will use the skills learned to create their own digital performances.

THEA362 Visualizing Black Remains
This advanced seminar engages African Diaspora critical thought and aesthetic production (visual art, performance, film, literature) that grapple with the appetite, effects, and stakes of representing Black remains. What does this visual reproduction make possible or obscure, and what is its relationship to violence? The class will also encourage students to think about the ethics of repatriation, repatriation in relation to forms of loss and dispossession that can neither be repaired nor visually evidenced (in conventional ways). In those instances, how do contemporary critical thinkers and as contemporary artists help us rethink loss, mourning, objecthood, violence, empathy, and repatriation?

THEA363 (Un)Popular Performances/Performances (Im)Populaires
In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland.

This course will use Drummond's notes as a guide to discover and examine other forms of evidence—both traditional and nontraditional—that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and readings will be in French.

THEA364 Friendship and Collaboration: In Theory, In Practice
How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, Black thought, and Indigenous epistemologies inform our own imaginations of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-
habitatators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA365 Greek Tragedy: Euripides
Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays—women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

THEA369 Performance Remains: Slavery in the Black Dramatic Imagination
As sociologist Orlando Patterson notes, “In the absence of historical records, one way to explore the inner lives of slaves is to exercise one’s literary imagination” (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire’s A Tempest (1969), a bold postcolonial adaptation of Shakespeare’s Tempest, to Winsome Pinnock’s Rockets and Blue Lights (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora
This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

THEA373 Afro-Pessimism, Gender, and Performance
This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe’s colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to “inanimate” things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer’s body’s disappearance/remain/e endow the West art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars’, artists’, and activists’ response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibitions, and film screenings.

THEA376 The Artist in the Community: Civic Engagement and Collaborative Dancemaking
Through both theoretical analysis and practical application, students will grow their understanding of community-based performance and collaborative artmaking. Grounded in readings and seminar discussions about the practice and process of community-based art, students will apply their learning through community-engaged research, job shadowing and interviewing campus employees, and developing creative projects with partnering campus staff. Through direct practice, students in the course will explore how collaborative performance can address local issues, spark community dialogue, and encourage civic participation—whether on a college campus, in a neighborhood or across a city.

Class meetings will take place virtually; student research and project development will be conducted in person. Note: This course includes a Spring Break travel opportunity to work on a Forklift Danceworks project. Details on travel logistics to come.

Prereq: None

THEA386 Musical Theater Performance
This studio course will explore the fundamentals of musical theater performance: how to analyze a script and song applying concepts such as given circumstances, actions, objectives, etc., based in Michael Chekhov and Stanislavski techniques; how to use dramaturgical research and original context to illuminate and create character; and how to prime the instrument for optimal performance. A wide range of vocal and physical exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. We aim to expand the performer's potential for transformation and expression, so that they may enter into any genre, style, or period of musical theater with ease and confidence.

Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play. This course will include exploring, analyzing, and performing solo songs and duets, and a module on the current state of the industry--including talks with professional artists, casting directors, and musical theater collaborators--culminating in a showcase, with potential collaborations with original work by fellow students and guest artists.

Course will also require supplemental viewings, independent rehearsals, and attendance at two live performances TBD.
Offering: Host
Grading: A-F
THEA390 Performance Ensemble
Since theater is an art of collaboration, this course will offer advanced acting, directing, and playwriting students an opportunity to develop their skills in an ensemble environment and to collaborate on creative practice. Students will explore creating text, embodying performance, and developing an understanding of dynamic space with the goal of engaging collaborative processes. Techniques of storytelling, negotiation of differences in communication, and developing a coherent and cohesive theatrical event will be explored. Students will go through all stages of research, improvisation, rehearsal, and analysis of preparing a theatrical performance for an invited audience in a workshop structure.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.
Offering: Host
Grading: A-F
Credits: 1.00
Gen Ed Area: HA-THEA

THEA391 The Live Event: Politics and Practice of Creating Site-Specific Performance
In this course students will consider the role of site in performance-making. We start the semester with the assumption that there is no site that is not specific: every place carries with it a political, social, and historical identity, as well as an aesthetic and an architecture. At the same time, we as artists and makers are driven by our own values and interests. How do we enter into a collaboration with a site to create a live event with meaning and impact, both for ourselves and for our audiences? From architect Maya Lin, whose interactive Vietnam War Memorial rewrote the function of a monument to be about personal encounter and shared reckoning, to artist Paul Ramirez Jonas, whose "Key to the City" project gave thousands of people access to private spaces across New York, to "Haircuts by Kids," a project of the Canadian theater company Mammalian Diving Reflex, in which third-graders are trained to offer haircuts to adults, artists across disciplines are devising diverse answers to this question.

This class combines seminar-style discussion with studio-style making. Students will engage with scholarship by Miwon Kwon, Paul Smith, Tania Bruguera, Claire Bishop, and Shannon Jackson among others, in order to contextualize the making of our own sited live event works that explore how space, place, and architecture play into questions of narrative, performance, and community. Short written responses to reading will be turned in throughout the semester. The class culminates in either a final paper or final, sited project (individual or collaborative) on campus or in Middletown.

WRITING (WRCT)

WRCT107 American English Pronunciation and Idioms
This course is designed for anyone who would like to explore American English at a deeper level. We will look at the sounds and speech patterns of various American English dialects, practice difficult-to-pronounce words, discuss the issues of one’s first language transferring into their other languages, and the oddities of idioms and colloquialism that don’t translate literally. This course is recommended for those wanting to learn more about American English as well as those who are planning to teach it.
Offering: Host
Grading: Cr/U

WRCT108F Real Reels: Exploring Documentary Film
Since the early days of film, the documentary form has grown and evolved as an attempt to capture the "real" onscreen. This course offers exposure to a broad array of documentary films and poses questions on topics ranging from story modes to spectatorship, criticism to ethics, propaganda to audio design. What can an immersion in the form teach us about the meaning of truth? What can it teach us about ourselves?

WRCT109F Writing About Your First Year in the United States (FYS)
This course is designed for incoming international students who would like to reflect on their first year in the United States while exploring U.S. academic writing formats, the philosophies of liberal arts education, their own bilingual identities, and other topics related to U.S. academia. Assignments will involve keeping a journal, reading and writing a variety of essays, pre-writing activities, academic vocabulary exercises, and advanced grammar analysis. The reading will focus on essays about immigrant experiences. Authors such as Amy Tan, Maxine Hong Kingston, Alain Mabanckou, and Ariel Dorfman will be included as examples of excellent essay writing and to provide materials for discussion. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the U.S. after middle school, and students whose dominant language is not English.

WRCT110F Academic Writing in the US for International Students (FYS)
This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Regina Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

WRCT111F Writing About Culture (FYS)
This course asks us to slow down and rewind a bit to consider what can an immersion in the form teach us about the meaning of truth? What can it teach us about ourselves?
In the age of social media, pithy critiques and quick reads circulate quickly. Whether on Twitter, Facebook, Instagram, or Reddit, the Internet provides a space for everyone to share their opinions on popular culture and current events. This course asks us to slow down and rewind a bit to consider what scholars in cultural studies might teach us when it comes to writing about
So, we will read sociology, history, and political theory alongside literary texts, inquiring into discourses of migration, mobility, and (un)belonging through an interdisciplinary and intersectional lens.

WRCT114F Why You Can’t Write (FYS)
Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course center the practice of writing. As such, students can expect to write, revise, and comment on classmates’ writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

WRCT115 Writing Mentoring
Have you ever wanted a personal writing collaborator? Someone who would meet with you privately to help you with your writing?

Your Writing Mentor will work with you on your particular writing concerns, whether you need help generating ideas, structuring your essay, improving sentence clarity and grammar, or managing your time. As mentors and mentees meet on a weekly basis, this program is designed for students who enjoy regular collaboration. If you participate, you will enroll in a .25 credit tutorial and have a peer assigned to meet with you throughout the semester.

We work with students of all writing abilities and in all disciplines. All services are free.

To apply for a writing mentor, contact the Ford Fellow at writingworks@wesleyan.edu.

WRCT115F Diffusion of Innovation (FYS)
Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of “Diffusion of Innovations.” Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world’s largest particle
accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

WRCT116F The Literature of Travel (FYS)
Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of ‘travel literature,’ including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT117F Instances of Collective Memory (FYS)
Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations— all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We’ll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

WRCT118F Off-Broadway: Contemporary American Playwriting (FYS)
This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashaq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

WRCT120F Uncertainty and the Future (FYS)
The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the “negative” side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)
Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students’ curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)
How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the “negative” side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.
WRCT133F Race and Representation (FYS)
This first-year seminar will introduce students to theories and understandings of race, racism, and racial inequality as debated in the academy and the public (US) sphere. So, too, will the course consider race as it is lived and represented in cultural objects such as film, literature, law, television, and music. Reading and writing will be heavily emphasized. Through regular writing activities, students will find comfort with and a voice for discussing a range of cultural texts, preparing them for everyday discussions about race in US culture.

WRCT135 Writing about Research: U.S. Style
This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT135F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)
This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.

WRCT136F TV as Cultural Touchstone (FYS)
Why do we watch TV? What makes a good show good? What does television do for us? This writing course focuses on television as a sociocultural phenomenon. We will scan TV history, from its precursors and twentieth-century origins through the present moment. Areas of focus will include the game show, the MTV music video, the soap opera, the half-hour sitcom, the late-night show, the hour-long drama, and reality TV (Real Housewives, RuPaul’s Drag Race). We’ll read some accompanying cultural and anthropological writing as well as story theory and TV criticism.

WRCT200 Integrative Learning Project 1: Crafting Your Digital Identity
Wondering about how you will explain your Wesleyan experience to someone who doesn’t get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your postgraduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you!
Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world’s most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT201 Writing Theory and Practice
Writing is central to education in the U.S., but how does someone learn to write? In this course, students will consider this question by reading theories of composition, debating key concepts of writing such as reflection, transfer, and translanguaging, as well as discussing scholarship out of cultural studies, literacy studies, genre studies, technical and professional writing, and public writing. Together we will explore the potential of writing education, carefully considering...
how we, as educators, can foster just and innovative writing education. As we read about writing instruction, literacy, and assessment, students will be expected to bring scholarship in dialogue with lived experience. To do so, they will engage in a number of praxis-based assignments, including group work to develop assignments, assessment practices, and curricular recommendations. The course will culminate in a final project of each students' design, that tackles the practicalities of teaching writing.

**WRCT202 Pedagogy for Teaching English to Speakers of Other Languages Tutors**

This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the U.S. every year. Students enrolled in this course will gain practical experience by committing to volunteering at Middletown public schools or SAWA while taking this course and are encouraged to continue their service afterward. There is a volunteering commitment of 2 hours/week minimum during the semester.

This course fulfills the Pedagogy and Practicum requirements for the Education Studies major and minor.

**WRCT203 Investigative Storytelling**

This creative writing workshop is designed for students who aim to craft new narrative work through investigative or documentary research. Students might create a play, a screenplay, poetry, fiction, creative nonfiction, a digitally driven project, or something else. We will study some existing investigative artworks--dramatic pieces by Moises Kaufman, nonfiction by Leslie Jamison, poetry by Robin Coste Lewis, documentary film by the Mayes brothers, long-form journalism by Nikole Hannah-Jones, and podcasts by Brian Reed. We will cover interview techniques, research strategies, issues of rights and intellectual property use, and structure/dramaturgy as we plan, research, write, and workshop material together. Class members will regularly share work-in-progress and offer feedback to one another. By the end of the semester, students will be well acquainted with best practices for crafting investigation-based pieces and will have completed full or partial drafts of their projects, depending on project scope. Students are expected to have some workshop experience.

**WRCT204 Extreme Landscapes of the Anthropocene**

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term "Anthropocene," questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from "capitalist ruins" to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of "non-judgmental attention" to their critical engagement with the Anthropocene.

**WRCT205 English Language Learners and US Language Policy**

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the U.S. legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

**WRCT206 Writing in Multiple Languages**

This course explores the theories and practices of writing in languages other than your native language(s). The course will cover additional language writing development theory, translanguaging (using more than one language at a time), multilingual writing identity, and ample opportunities to explore these topics
WRCT207 ELL Literacy Development
In 2021, in the state of Connecticut, approximately 14% of the K-12 population were English Language Learners (ELL) (https://portal.ct.gov/-/media/SDE/Performance/Research-Library/EL-DEMOGRAPHICS-10012020.pdf). This growing population includes students whose written languages vary considerably from English, students whose education has been interrupted due to the chaos of war and resettlement in the U.S., and students who have undiagnosed learning disabilities. This service-learning course focuses on an area of great need for this population -- English literacy. This course will offer students an opportunity to tutor ELLs for 20 hours during the semester while studying and applying the theories and best practices of ELL literacy development. In addition, this course will discuss best practices for teaching math to ELLs, lesson planning, classroom management, and other necessary skills for successful teachers in any field.

WRCT225 Creative Writing in Spanish
This course offers students the tools to articulate their ideas and experiences in Spanish narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of short stories in Spanish and by working throughout the semester on crafting at least one short story or nonfiction piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the
WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)
How does one re-create someone else’s life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence—from the archive, primary sources, secondary sources, and written shards of a life—to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713–1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamed of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

WRCT226 Ethnographies in Medicine
Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

WRCT228 The Art of the Personal Essay
The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays—what author and critic Philip Lopate calls “the self-interrogative genre”—helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others’ writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

WRCT228Z The Art of the Personal Essay
We all have stories to tell. But there is hard work in the act of transforming our intimate experiences into meaningful and captivating stories. This course dives into this labor by focusing on the craft of essay writing. Quite specifically, students will practice a variety of creative nonfiction writing techniques as a means of critically reflecting and analyzing personal experiences in order to produce essays that speak to readers in and outside of our immediate communities and contexts. Course assignments will include a writer’s journal, workshop letters to classmates, three short personal essays, and a final essay whose subject and style is decided by the writer. Readings will include essays published in the past 30 years by authors such as (but not limited to) Kiese Laymon, Jesmyn Ward, Jose Antonio Vargas, Zadie Smith, and Karla Villavicencio.

WRCT235 Calderwood Seminar in Public Writing: Radical Sustainability
The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven’t worked hard enough, or maybe we’ve been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges—extinction, climate change, and many others— as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

WRCT237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change
The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantle of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

WRCT250 An Introduction to Data Journalism
This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality—a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

WRCT250T First Person Singular
This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

This course is offered by 2020 Koeppel Journalism Fellow Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin’s bio can be found here: https://petergodwin.com/about/

WRCT250V The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn
In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated—“the media has been democratized”—and reviled—“the media is too fractured and people are living in information bubbles.” The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism. The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise.

This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, working on an individual project, and in collaboration with other students.

WRCT250W Topics in Journalism: The Art and Craft of Journalistic Nonfiction
Journalistic nonfiction uses the tools of the newsroom to create long-form stories that read like novels. Students will learn the skills to ensnare readers in any medium of narrative nonfiction writing, from articles and books to screenplays and teleplays. Journalists excel in conducting interviews and marshaling facts. But few journos ever master the art of narrative storytelling. Nonfiction book writers can wield a narrative arc to tell a story. But many book writers are weak on basic reporting. We will read the work of newspaper reporters who learned to write long-form narratives, and magazine writers who learned the skills of the newsroom. By semester’s end, students will know tools of both trades. We will hear from some of the writers about their work. To keep the focus on journalism, we will mostly skirt the genres of history and memoir. Students will write mostly in the third person, and primarily about events in living memory.

WRCT2526 Writing for Television
This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsise, and pitch a story idea with their “producing partners” to “network executives.” Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.

WRCT262 Practical Criticism

In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called “practical criticism.” Each week, he distributed a single poem to his students without revealing the poem’s title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards’s experiment for the twenty-first century. We will follow Richards’s protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students’ judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanual Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

WRCT265 Creating Children’s Books I

The goal of the course is to develop the skills necessary to create stories and sequential art specifically aimed at young readers. In an industry that welcomes unique voices and styles, there are underlying guidelines that inform children’s literature and typically apply to most picture books. The course covers the creation, style, layout, and pacing of sequential art as well as the structure, content, and specific considerations for writing manuscripts for children.

In addition to studying the craft of effective storytelling and visual narration, we’ll take a look at the business of publishing that will familiarize students with practices in the industry.

WRCT300 Integrative Learning Project 2: Website Incubator

Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you!

Throughout the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world’s most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT301 Promoting Early Civic Engagement: The Middle School Debate Project

Civic participation starts early. Students begin to find their place in public life in middle school. Debate can provide students with tools and a platform for expressing their ideas in public. Through debate, students learn to critically analyze texts, see multiple perspectives, and advocate for change to the status quo. This service-learning course pairs civically-engaged Wesleyan students with middle and high school teachers and students. Wesleyan students will design and test parliamentary debate training materials on our campus. Then, the class will help to implement the training materials at public schools in Middletown and Hartford. Our class will also mentor high school student apprentices who will help to run two interscholastic debate competitions. Wesleyan students will be assessed on their: 1. contributions to training materials, 2. preparation for mentoring and coaching sessions, 3. contributions to middle school debate competitions and campus trips, 4. reflection papers/presentations on effectiveness in working with public school partners, and 5. contribution to the class report: “Supporting Middle School Debate Collaborations in Connecticut.”

WRCT302 All the Feels: Affect Theory and Cultural Studies

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we witness and manage sensorial experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the seemingly individualized experience of feeling and the social world of power by introducing students to the vibrant field of affect studies. A recent “turn” in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to ultimately contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

WRCT303 Post Cold War Narratives of Migration to the U.S.

In this course, we will study post-cold war U.S. immigrant literature. Published in a period of shifting politics, particularly for racialized migrants, these texts illuminate new iterations of what it means to be and belong in a world where capital, labor, materials, products, and people were experiencing new forms of global im/mobility. We will read a variety of diasporic fiction from a range of localities to consider the ways imperialism, colonialism, militarism, religious proselytizing, and racial capitalism are in dialogue with the murky experiences of family, desire, loss, home, mobility, culture, trauma, and belonging. In doing so, we seek to understand how macro, micro, interpersonal, and intrapsychic experiences and institutions shape migratory routes and the stories that emerge across them. We will address literature through an interdisciplinary lens by reading fiction alongside sociology, history, economics, political theory, and more in order to consider what the world of the fictive can tell us about migration that other disciplines may not be able to articulate with such emphasis and attunement as literature.

WRCT304 Love and Other Useless Pursuits
What is love? Is it an emotion? A judgment? A way of coming to know ourselves or others? What is the point of love? Does it have a defined object, a purpose, or an end? Does it have a logic or does it defy logic? What good or evil can it do in the world? "Love and Other Useless Pursuits" is an upper level seminar that approaches these questions through a comparative history of literature, literary theory, and philosophical aesthetics. The authors we read will likely include Plato, Andreas Capellanus, Tullia d'Aragona, Margaret Cavendish, Immanuel Kant, Stendhal, Johann Wolfgang von Goethe, Ralph Waldo Emerson, Marcel Proust, Djuna Barnes, James Baldwin, Simone de Beauvoir, bell hooks, and Lauren Berlant.

WRCT305 The Critic and Her Publics
The critic and her public are difficult concepts to define or fix. The critic is not a creative writer, an academic, a journalist, or a reporter, yet criticism borrows from the protocols of all four professions. The critic's publics are not made up exclusively of scholars, specialists, artists, or lay readers, but span these divisions. The aim of this course is to trace the evolution of the critic, her function, her style, and her publics from the seventeenth century to the present. Readings will include essays by Jane Anger, Margaret Cavendish, Joseph Addison, Richard Steele, Eliza Haywood, John Dryden, Samuel Johnson, Matthew Arnold, Henry James, T.S. Eliot, Virginia Woolf, Walter Benjamin, José Ortega y Gasset, Jorge Luis Borges, Clement Greenberg, James Baldwin, Mary McCarthy, Roland Barthes, Susan Sontag, Elizabeth Hardwick, Edward Said, Toni Morrison, Renata Adler, Michael Warner, Anne Carson, Margo Jefferson, and Elf Batuman. The class will be linked with the Shapiro Center talk series, "The Critic and Her Publics," and the Shapiro Center Master Classes.

WRCT306 Foundations of Playwriting from the Global South
Cimientos (Spanish for "foundations") is a play development program run by NYC-based Latinx theater company IAT! Theater. Since 2001, this program has showcased authors from around the world. However, in most recent years, the experience of working with playwrights from Argentina, Chile, Colombia, Mexico, Kenya, and Uganda has opened up the possibility of addressing playwriting as a deterriorialized praxis in which political, thematical, and historical discussions intertwine with shared aesthetics and new forms to understand theater in the Global South. In this workshop-seminar, students will analyze canonical texts and unpublished plays from contemporary authors based in the Global South to participate in the discussion of decolonizing playwriting. Students will analyze critical scholarship on the Global South to trace a contemporary South-South relationship within playwriting as a literary and political device. Authors from the Cimientos program will join the class as guest speakers to prompt students to develop creative writing techniques. Students will present a draft of a short play that integrates the material covered in class.

WRCT308 Ancestral Writings: (Re)Tracing AfroCaribbean and Indigenous Frameworks for Creative Writing
Coined by Puerto Rican author Mayra Santos-Febres, "ancestral writing" elicits a reconceptualization of creative writing and its techniques from the point of view of our ancestors in Latin America, more particularly, the Afro-diasporic and indigenous. In this course, students will explore theoretical, literary, and cinematic material that encourages decentralizing creativity and writing as a political praxis. Concepts such as the ch'ixi in Aymara culture and biocultural memories from Andean indigenous nations will work as points of departure to develop decolonizing, anti-imperialist, and anti-racist writing techniques. Guest speakers, who include specialists in the Quechua language and Afro-Caribbean folklore, will encourage students to (re)formulate techniques for their creative writing. Students will analyze texts by Silvia Rivera Cusicanqui, Mayra Santos-Febres, Odi Gonzales, Frantz Fanon, Guaman Poma, Elicura Chihuialaf, and Solimar Otero, among others. Students will present a creative writing piece that puts into practice the material studied in class.

WRCT309 The 21st Century Novel
This course is designed to introduce you to some great works of contemporary fiction. The reading list is not meant to be comprehensive, nor do I claim that these are the very best of all the contemporary novels in the world, but the course should provide an orienting overview of various contemporary styles and themes, as well as, ideally, give you one or two new favorite books. We will experiment with organizing our study by time rather than nation or language (Does the category of "the 2010s novel" make as much or more sense than, say, "the American novel" or "the Francophone novel"?)--the reading list includes work from eight countries, half in translation. In exploring what if anything makes the 21st Century novel different, I don't have a particular theoretical perspective in mind, but if you are interested in one you can bring it up in discussion and apply it in your final paper.
We will neither ignore nor treat as an unfortunate if indispensable crutch the fact that four of our books will be read in translation. No one can read all books in their respective original languages; translation is how we experience international literature--we always read books from language contexts outside our own with a double focus, as texts produced by a doubled authorship. This dynamic is worthy of attention and appreciation in its own right. I am a translator, including of one book on the reading list; I will bring my translation experience into our discussions, but even when none of us knows the original language, we can engage more fully with the work by remembering the translator's role in the creation of what we're reading and considering the translator's choices.

WRCT310 Literary Movements: Conceptual and Experimental Fiction
The course seeks to examine the modern novel by focusing on fiction structured around a concept ("conceptual fiction") and fiction which deviates from the traditional modes of storytelling in a coherent enough way ("experimental fiction"). Together, we will examine novels and short stories in which an idea, an image, or metaphor directly informs the structure, plot, characterization, or all of the above of the work. We will also look at works of formal invention and/or subtle experimentation as far as they are constructed around a discernible and coherent pattern. There have been countless such works in the modern/
contemporary period and some of the notable practitioners include Virginia Woolf, Moshin Hamid, George Saunders, Cormac McCarthy, Carlos Fuentes, Toni Morrison, and John McGregor, amongst others have work in this “movement.” We will also look at critical essays around these books including from David Lodge, James Baldwin, and Victor Scholsvisky, amongst others.

We will study texts from some of these writers (Woolf, Hamid, Saunders, McCarthy) closely and try to determine what it means to create fiction around a "concept." Implicit in this inquiry would be the broader question of form, formal invention, and the vagaries of experimentation. What makes a novel unique? What new grounds does this novel or story break? Does the experimental mode help or hinder meaning? What makes a novel unique? How does structure distinguish a novel rather than plot or characterization, or, for that matter, ideas? What are the ways by which a novel can subvert the traditional form of the novel? What are the strictures of genre and how do they constrain or help expand the art of storytelling?

WRCT317 Writing and Drawing Comics
This is an intensive workshop course for students interested in making comics. We will read comic strips and books that vary widely in genre and style, and learn to identify and emulate cartooning techniques. This is a permission of instructor course. No comic experience is necessary, but students will be expected to create work each week, so some comfort with drawing/artmaking is encouraged. To apply, please email srwarren@wesleyan.edu with 2-3 samples that show both writing and drawing/artmaking (e.g., a creative essay and a selection of sketches, a painting and a poem, etc.).

WRCT350 Literature in the Age of Social Media
What does it mean to write, and to read, when the predominant form of self-expression for many of us resides in social media? What does it mean to construct a digital self, separate and apart from the selves that exist IRL? To interact primarily through the mediation of screens? In what ways do we commodify ourselves, and are we commodified? What risks do we run in revealing our inner most thoughts and feelings in an age of autocratic and capitalist surveillance, in which algorithms direct the attention once guided by more organic social forces? And how do all these issues affect the core mission of literature, which is to tell stories that reflect both the public self and the private one? We’ll examine all these questions through a collection of texts, ranging from novels (Megha Majumdar’s A Burning, Patricia Lockwood’s No One Is Talking About This, Tao Lin’s Taipei), essays (Jia Tolentino’s Trick Mirror, Samantha Irby’s wow, no thank you), and poems (Emily Berry’s “Paris,” Tommy Pico’s “Junk”). We’ll also consider these questions through some short writing assignments that ask students to engage in the creative act through the lens of social media.

WRCT357 Saving the Republic: Lessons from Plato for our Time
More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in The Republic, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of The Republic, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the Reacting to the Past curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play’s themes for today. Students will be assessed in five ways: 1. Content quizzes on The Republic, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing The Republic’s relevance for contemporary United States.

PRIZES

George H. Acheson and Grass Foundation Prize in Neuroscience • Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

Alumni Prize in the History of Art • Established by Wesleyan alumni and awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

American Chemical Society Connecticut Valley Section Award • Awarded for outstanding achievement to a graduating chemistry major.

American Chemical Society Undergraduate Award in Analytical Chemistry • Awarded for excellence in analytical chemistry.

American Chemical Society Undergraduate Award in Inorganic Chemistry • Awarded to an undergraduate student in inorganic chemistry to recognize achievement and encourage further study in the field.

American Chemical Society Undergraduate Award in Organic Chemistry • Awarded to a senior who has displayed a significant aptitude for organic chemistry.

American Chemical Society Undergraduate Award in Physical Chemistry • Awarded in recognition of outstanding achievement by undergraduate students in physical chemistry, and to encourage further pursuits in the field.

American Institute of Chemists Award • Awarded for outstanding achievement to a graduating chemistry major.

American Society for Biochemistry and Molecular Biochemistry Honor Society • The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

Ayres Prize • The gift of Daniel Ayres, Class of 1842, to the first-year student who attains the highest academic standing in the first semester.

Baden-Württemberg—Connecticut Sister State Exchange • A grant for one academic year’s study at a university in the German state of Baden-Württemberg, administered by the Connecticut Department of Higher Education.

Baldwin Fellowship • Established in 1952 by family and friends of Horace Reed Baldwin, Class of 1947, and awarded annually for study at law school to the member of the senior class who, in the opinion of the committee, shows the most promise of becoming an outstanding lawyer and public-spirited citizen.

Beinecke Scholarship • Awarded by the Sperry Fund for graduate study in the arts, humanities, and social sciences.

Bertman Prize • Established in memory of Bernard T. Bertman, associate professor of physics, by gifts from his colleagues, family, and friends, in 1970. Awarded to a senior majoring in physics who displays a particularly resourceful and creative approach to physics research.

Best Honors Thesis in Sociology Award • Established by the Department of Sociology to honor Herbert H. Hyman, distinguished scholar, pioneer in survey research methodology, and Professor Emeritus in the Department of Sociology. Awarded annually to students, whether sociology majors or not, who in the opinion of the faculty have written outstanding theses on a sociological topic.

Best Paper Prize in Sociology • Awarded annually to students who have written the best scholarly papers in sociology in the previous year.

Blankenagel Prize • Income from the John C. Blankenagel Fund, established in 1970, awarded at the discretion of the Department of German Studies to enrich educational offerings in the area of humanistic studies, or to assist a superior student in completing a project in German studies.

Boylan Award • Given by Jennifer Boylan in honor of her classmate, Annie Sonnenblick, the award recognizes an outstanding piece of creative nonfiction, journalistic work, or writing for general readers.

Bradley Prize • The gift of Stanley David Wilson, Class of 1909, in memory of Professor Walker Parke Bradley, to the senior or junior who excels in chemistry and particularly in special original work.

Bridge Builder Award • Awarded to a student and student group who have succeeded in strengthening the relationship between Wesleyan and the greater Middletown community.

Briggs Prize • Established in 1900 by the gift of James E. Briggs, to the student who has done the most effective work in intercollegiate debating.

Professor Samuel Hugh Brockunier Prize • Awarded for the best final essay on a social studies topic by a student in the Graduate Liberal Studies program.

Christopher Brodigan Fund Award • Established in memory of Christopher Brodigan, a Wesleyan student who died in an accident in his freshman year. The fund pays tribute to Christopher’s deep interest in Africa and to the public service he provided through teaching in Botswana prior to entering Wesleyan. Awarded to graduating seniors and recent graduates who plan to pursue public service or research in Africa.

Erness Brody Prize • Established in 2002 by Ann duCille in honor of Professor Erness Bright Brody, former chair of the African American Studies Program. Awarded annually to a senior African American Studies Program major for excellence in written expression.

Brunner Freshman Improvement Prize • The gift of William Evans Bruner, Class of 1888, to the student whose second-semester first-year record shows the greatest relative improvement over that of the first semester.

Butler Prize • The Butler Prize, established in 1991 in honor of retiring colleague Jeffrey D. Butler, is awarded for the best Honors thesis in African, Asian, or Latin American history.

Butterfield Prize • Established by the Class of 1967 and awarded to the graduating senior who has exemplified those qualities of character, leadership, intellectual commitment, and concern for the Wesleyan community shown by Victor Lloyd Butterfield, eleventh president of the University.

Camp Prize • Established in 1905 by the Board of Trustees in memory of Samuel T. Camp, trustee 1880–1903. Awarded for excellence in English literature.

Nancy Campbell/National Trust for Historic Preservation Summer Internship Program • Established by friends and admirers in honor of Nancy Campbell, wife of former Wesleyan University President Colin Campbell, in recognition of her national leadership in historic preservation, and awarded to rising juniors or rising seniors.

Frank Capra Prize • Established in 1983 to honor Frank Capra, Hon. 1981, the great American film director whose collected papers are in the Wesleyan Cinema...
approach to effective community service.

Cardinal Crest Award • Awarded to the member of the WSA who has given honor to his/her post on the WSA or one of its committees through his/her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Chadbourne Prize • The gift of George Storrs Chadbourne, Class of 1858, to that member of the first-year class outstanding in character, conduct, and scholarship.

Citation of Citizenship in the Department of Mathematics and Computer Science • Recognizes those students studying mathematics or computer science, whose contributions both aid the educational mission of the department and foster a sense of community that encourages and supports all members of the department.

Clark Fellowship • Established in memory of John Blanchard Clark by his parents, Mr. and Mrs. Donald L. Clark of Pittsford, New York; his sister, Catherine; relatives; and friends. Awarded annually to a qualified graduating senior of Wesleyan University for graduate study in a school of medicine. Recipients are judged by members of the Health Professions Panel on their potential for outstanding achievement, their promise of community leadership and public-spirited citizenship, and their scholastic record at Wesleyan.

Clee Scholarship • Established by friends and associates of Gilbert Harrison Clee, Class of 1935, late president of the Board of Trustees. Awarded annually to a member of the junior class, who will remain a Clee Scholar throughout his or her junior and senior years, who will have demonstrated high standards of leadership, a deep commitment to Wesleyan University, an interest in the broad implications of multinational business enterprises, a sensitivity to the need for a creative balance between the public and private sectors, and an intention to pursue a career in business. A specific objective will be to select individuals who exemplify the qualities that characterized Gilbert Harrison Clee as a humane person and as a leader.

Dr. Neil Clendeninn Prize • Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed his or her sophomore year and in that time have exemplified those qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

Cole Prize • Established through the gift of George Henry Walker, Class of 1881, in the memory of Charles Edward Cole. Awarded to the first-year student who shows the greatest ability in fiction or nonfiction writing.

Congress-Bundestag Youth Exchange for Young Professionals • This fellowship funded by the German Bundestag and U.S. Department of State, that annually provides 75 American and 75 German young professionals, between the ages of 18-24, the opportunity to spend one year in each other's countries, studying, interning, and living with hosts on a cultural immersion program.

Connecticut Higher Education Community Service Award • Established in 1993 by the Connecticut Department of Higher Education to promote community service leadership and activities by students at Connecticut's institutions of higher education. This award recognizes outstanding student contributions to the promotion of community service through projects that increase student participation in their college community and projects that develop a unique approach to effective community service.

Herbert Lee Connelly Prize • Given in 1980 by Mabel Wells Connelly in the name of her husband, a member of the Class of 1909 and alumni secretary, 1924–56. Supplemented by friends, relatives, and sons Hugh Wells and Theodore Sample '48, the fund provides income to be awarded annually to a deserving undergraduate who demonstrates an interest in English literature and an unusual ability in nonfiction writing.

CRC Award for Outstanding First-Year Chemistry Students • Awarded to an outstanding first-year chemistry student, based on grades in organic chemistry over the interval of the current academic year.

Critical Language Scholarship • An intensive summer program of overseas language and cultural immersion in one of 15 languages deemed critical to U.S. national security.

Christina Crosby Award for Social Justice Feminism • Awarded each year to a FGSS major who epitomizes Christina's dedication to social justice activism and scholarship (expressed in multiple ways - through thesis or essay writing, through activism on and/or off campus etc.).

Davenport Prize • Established in 1948 by the gift of Ernest W. Davenport in honor of his brother, Frederick Morgan Davenport, Class of 1889, for excellence shown by seniors in the field of government and politics.

Dorchester Prize • Established through the gift of Daniel Dorchester IV, Class of 1874. Awarded for the best thesis submitted to the English department.

W. E. B. Du Bois Prize • Awarded annually for academic excellence to a student majoring in African American studies.

Dutcher Prize • Established by gift of Arthur A. Vanderbilt, Class of 1910, in honor of Professor George Matthew Dutcher, for highest excellence in the history department.

Kevin Echart Memorial Book Prize • Awarded to the graduating College of Letters senior who best exemplifies the intellectual curiosity and range, the pleasure in colloquy, the capacity for admiration and skepticism, and the moral seriousness and love of books that we honored in our late colleague Kevin Echart and seek to foster in the students of the College of Letters.

Exceptional Program of the Year Award • Awarded to the coordinator(s) of an exceptional program, cultural event, speaker, or production that has had positive campus-wide impact.

William Firshein Prize • Awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry Department.

First-Year Leadership Award • Awarded to a first-year student who has demonstrated outstanding leadership or involvement in the Wesleyan community.

Susan Frazer Prize • Awarded annually to the student (or students) who has done the most distinguished work in the elementary and intermediate French language sequence.

Freeman Prize • Established in 1975 by Mansfield Freeman, Class of 1916. Awarded annually to a senior for excellence in East Asian studies.

Beulah Friedman Prize • This prize recognizes work of outstanding achievement by a student in the history of art. The prize is awarded to a member of the senior class.

Friends of the Wesleyan Library Undergraduate Research Prize • Established in 2017 to recognize research projects in any field (besides honors theses) in any field that demonstrate outstanding and creative use of Wesleyan’s library collections and resources.

Fulbright Fellowship • These grants are funded by the United States government under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act) and by many foreign countries. The grants, administered by the Institute for International Education, provide for one year of study at a university abroad.

Fulbright-Hays Doctoral Dissertation Research Abroad Grant • Awarded by the United States Department of Education to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of six to twelve months.

Fulbright Teaching Assistantship • Placement abroad providing classroom assistance to English-language teachers who also serve as cultural ambassadors for the United States.

Gay, Lesbian, and Sexuality Studies Prize • Donated by the Wesleyan Gay and Lesbian Alumni Association (GALA), this prize is awarded annually to the undergraduate who has done the best research and writing on a subject in gay, lesbian, and sexuality studies.

German Academic Exchange Service Fellowship • At least one fellowship per year for study at a German university. The German Academic Exchange Service is a private, self-governing organization of German universities, which promotes international exchange among institutions of higher learning.

German Pedagogical Exchange Service Assistantship/Fulbright Grant • A one-year teaching apprenticeship in Germany.

Giffin Prize • Established in 1912 by a gift of Mrs. Charles Mortimer Giffin, in memory of her husband, an honorary graduate of the Class of 1875. Awarded for excellence in the Department of Religion.

Akiva Goldman Prize in Screenwriting • Awarded to the graduating film studies major who has written the best full-length screenplay in the Department of Film Studies.

Barry M. Goldwater Scholarship • Awarded by the Barry M. Goldwater Scholarship and Excellence in Education Foundation to a college student who has outstanding potential and intends to pursue a career in mathematics, the natural sciences, or engineering.

Graduate Student of the Year Award • Awarded to a graduate student who has proven to be a vital and dynamic member of the Wesleyan community through taking on an active leadership role in campus life.

Graham Prize • The gift of James Chandler Graham, Class of 1890, awarded to a member of the graduating class for excellence in natural science.

Grant/Wilcox Prize • Awarded in honor of Connecticut filmmakers Ellsworth Grant and Roy Wilcox to the senior whose work in film and video best addresses significant environmental, social, or artistic issues.

James T. Gutmann Field Studies Scholarship • Established in 2007 by Lisette Cooper ’81, to honor her former professor and mentor, James T. Gutmann. Awarded to an especially promising major in earth and environmental sciences to support geologic field research expected to lead to a senior honors thesis.

Hallowell Prize • Established by friends and associates of Burton C. Hallowell, Class of 1936, former professor of economics and executive vice president of the University. Awarded annually to an outstanding senior in the study of social science, as determined by the governing board of the Public Affairs Center.

Sarah Hannah Prize • Offered in memory of Sarah Hannah ’88, in association with the Academy of American Poets, and awarded for an outstanding poem.

Hawk Prize • The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

Health Education Prize • Awarded annually to the graduating senior who best exemplifies the goals of Wesleyan’s Health Education Program, which are the promotion of healthy lifestyles and disease prevention. The student who is chosen for this prize has demonstrated commitment not only to his or her personal well-being but has also served as a role model to peers in the Wesleyan community and beyond.

Heideman Award • Established in 1972, in honor of Enid and Walter Heideman. Awarded annually to an undergraduate who has helped others in the Wesleyan community, in the tradition of the Heidemans.

Rachel Henderson Theater Prize • Awarded annually to that student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of his or her undergraduate career.

Holberg Fellowship • Established in memory of Jules D. Holzberg, professor of psychology, by gifts of his colleagues and friends. Awarded to a senior who intends to pursue graduate study in clinical or community psychology in recognition of the commitment to research and applied work on the resolution of social problems on the individual and collective level that is consistent with Professor Holberg’s lifelong professional interests and humanitarian concerns.

Horgan Prize • Established by the Department of English in honor of Paul Horgan, professor emeritus and writer-in-residence. Awarded to the student who has written the best short story of the year.

Ingraham Prize • The gift of Robert Seney Ingraham, Class of 1888, and his wife, for excellence in New Testament Greek or, in years when a course in that subject is not given, for excellence in a course in Greek elective for juniors and seniors.

Jessup Prize • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

Johnston Prize • The gift of David George Downey, Class of 1884, in memory of Professor John Johnston. Awarded to those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

Keasbey Memorial Scholarship • Awarded by the Keasbey Memorial Foundation on the basis of academic excellence and a strong record of extracurricular participation for two years of graduate study in England.

P. L. Kellam Prize • Established in memory of Priscilla L. Kellam ’83, by her husband. Awarded annually to a senior woman, under the age of 25, who has majored in East Asian studies and has traveled or plans to travel to China to further her studies.
Barry Kiefer Prize • In memory of Barry I. Kiefer to celebrate outstanding graduating PhD students in biology and molecular biology and biochemistry.

Leavell Memorial Prize—Film • Awarded annually to a senior film student who has done outstanding work in the major, and who best reflects the departmental goals of citizenship, scholarship, and the wedding of theory and practice.

Leavell Memorial Prize—Music • Awarded annually to a senior who has done outstanding work in music, and whose work manifests the ideals of the World Music Program in the Department of Music.

Leibergott-Lovell Prize • In honor of Professors Emeritus of Economics Stanley Leibergott and Michael Lovell. To be awarded to the best paper written in the current academic year that uses econometric techniques to analyze an economic problem. Established in 2011 by Bruce Greenwald; first awarded in 2012.

Leonard Prize • Given in 1917 in memory of William Day Leonard, Class of 1878, by his friends. Awarded annually to the member of the WSA who has given honor to his or her post on the WSA or one of its committees through his or her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Levy-Spira Prize • Awarded for distinction in Latin American studies. Established in 1992 in memory of Eduardo Levy-Spira ’82, by his family and friends.

Limbach Prize • Established in 1966 by Russell T. Limbach, professor of art, in memory of his wife, Edna Limbach. Awarded annually to the student who has contributed the most imaginative, generous, thoughtful, and understanding social service to the people of the city of Middletown and/or the Wesleyan community.

Lipsky Prize • The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unfailing kindliness, quiet dignity, and brilliant scholarship.

Littell Prize • The gift of Franklin Bowers Littell, Class of 1891, for excellence in one or more advanced courses in astronomy.

Luce Scholarship • The Henry Luce Foundation selects 18 graduates to spend a year in an Asian country and provides an experience that will broaden the participant’s perspective on his or her chosen career field.

Macmillan Scholar of Saint Andrew’s Society of the State of New York • Awarded by the Saint Andrew’s Society of the State of New York, this scholarship enables outstanding college graduates of Scottish descent to engage in a year of graduate study in Scotland.

John W. Macy Summer Internship in Public Administration • Established by friends and colleagues of John W. Macy, Class of 1938. Awarded to the junior who most clearly exemplifies, in the decision of the selection committee, the characteristics associated with John Macy: high intellectual ability, a capacity for sustained effort in difficult tasks, strong ethical standards, an ingrained sense of duty, and a commitment to public service as a worthy career.

Mann Prize • Established in memory of Albert Mann, Class of 1906, devoted alumnus and faculty member, by his daughters and their families. Awarded annually to the senior(s) showing the most outstanding achievements in the Romance languages.

George C. Marshall Scholarship • Awarded annually for two years of study at any university in the United Kingdom, on the basis of distinction of intellect and character as evidenced by both scholastic attainments and other activities and achievements; strong motivation and seriousness of purpose; and the potential to make a significant contribution to one’s own society.

Martius Yellow Award • Awarded for excellence in organic synthesis.

Roger Maynard Award • A memorial award to that senior scholar-athlete who best exemplifies the spirit, accomplishments, and humility of Roger Maynard, Class of 1937, former trustee.

James L. McConaughy Writing Prize • Awarded for a piece of nonfiction writing, on a topic in the social sciences or sciences, that is designed to interest general readers. Funds for this award were given originally by members of the Class of 1936 in honor of their classmate, James L. McConaughy, a former governor of Connecticut and president of Wesleyan University.

Richard McLellan Prize • Awarded annually to a junior who exemplifies those qualities that characterize the late Richard McLellan, director of the Career Planning Center and associate dean of the college: character, leadership, commitment to public service and diversity, wide cultural interests, and a sense of humor.

Priscilla Meyer Fund • Established in honor of Professor Priscilla Meyer’s teaching career at Wesleyan. Awarded to Wesleyan students who are the most dedicated to the study of topics related to Russia, Eastern Europe, or Eurasia.

Joan W. Miller Prize • Established by Professor Miller in 2008. It is awarded for the outstanding honors thesis in the College of Social Studies.

Richard A. Miller Summer Internship Grant • Awarded in honor of Woodhouse/Sysco Professor of Economics Richard A. Miller to students pursuing summer internships related to potential business careers.

George J. Mitchell Scholarship • Awarded annually for one year of graduate study in any discipline offered by an institution of higher learning in Ireland or Northern Ireland on the basis of superior records of academic excellence, leadership, and public service.

Monroe Prize • Established in 1985 by the Center for African American Studies in memory of John G. Monroe, director, scholar, and teacher in the Center for African American Studies and in the Theater Department. This prize is to be awarded annually to the Wesleyan sophomore or junior who, in the opinion of the review committee, submits the best scholarly essay in the field of African American studies.

Janina Montero Prize • Awarded annually to a Latino student who has promoted the health, visibility, and participation of the Latino community at Wesleyan. The individual should best exemplify personal integrity, leadership, and motivation; a strong interest in and knowledge of his or her background; and have maintained a high level of commitment to Wesleyan’s academic and intellectual enterprise.

David Morgan Prize • To be awarded annually to the senior major or majors in the College of Social Studies (CSS) and/or the history department who best demonstrated the integrity and commitment to community that characterized David’s 37 years of service to the CSS, his department, and to the University.

Peter Morgenstern-Clarens Social Justice Award • Awarded to a sophomore or junior with a demonstrated commitment to social justice issues.

Mosaic Award • This award recognizes the contribution(s) of a person or organization that has brought about cultural awareness and education on one or more of the following issues: race, ethnicity, culture, and/or sexual orientation.

Geraldine J. Murphy Prize • Established in memory of Geraldine J. Murphy, who was the first woman hired as a full-time instructor at Wesleyan (1957), the first woman promoted to a tenured position, and the first woman promoted to the rank of full professor. The prize is endowed by alumni of the Wesleyan Master of
Arts in Teaching program. Awarded to a student who has written an outstanding critical essay that focuses on short fiction or novels.

Needler Prize • Established by Sophie Needler, in memory of her husband, Bennett Needler. Awarded annually to one or two graduating seniors who have demonstrated excellence in Hebrew or Jewish studies.

NNK Award • Awarded for the best screenplay for an undergraduate film.

Carol B. Ohmann Memorial Prize • Awarded for excellence in feminist, gender, and sexuality studies.

Olin Fellowship • Founded in 1854 by the wife of Stephen Olin, president, 1839–41 and 1842–51. Later increased by gifts of their son, Stephen Henry Olin, Class of 1866 and acting president, 1922–23, and his wife, Emeline. Awarded in recognition of achievement in English. The fellowship supports supervised work in English outside of the Wesleyan course structure.

Outreach and Community Service Award • Awarded to the senior theater major who, through his or her work in the Theater Department, has done a significant service in the community.

Outstanding Collaboration Award • Awarded for a program that was successfully planned in the spirit of partnership and teamwork.

Parker Prize • Established in 1870 by the Reverend John Parker, trustee 1859–71. Awarded to a sophomore or junior who excels in public speaking.

Peirce Prize • Awarded in successive years for excellence in biology, chemistry, and geology.

Emily White Pendleton Scholarship • Established in 1979 by Ralph Darling Pendleton, founder of the Theater Department, in memory of his wife. Awarded annually to a dance major or to a student who is significantly involved in dance and who shows outstanding promise in the field.

Peterson Fellowship • Established in 1963 by bequest of William Harold Peterson, Class of 1907, for graduate study in biochemistry at Wesleyan.

Plukas Prize • Established in 1986 by John Plukas, Class of 1966, this prize is awarded to graduating economics seniors to be applied toward summer expenses, during which period each student will work under the supervision of a faculty advisor to convert an honors project into a publishable article.

Plukas Teaching Apprentice Award • Established in 1986 by John Plukas, Class of 1966, this prize is awarded for excellent service to the economics department as a teaching apprentice.

Gwen Livingston Pokora Prize • Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

Prentice Prize • The gift of Mrs. Elizabeth Brooks Prentice in memory of Professor George Prentice to that junior or senior who excels in German. This prize is given in alternate years.

The Wallace C. Pringle Prize for Research in Chemistry • Gift of Eleanor and Wallace Pringle and their family and friends. This prize is to be awarded annually by the chemistry department to a student for excellence in research.

Sophie and Anne Reed Prize • Established in 1968 by Leon Reed and his sons, S. Chadwick ’41 and Dr. Victor Reed, in memory of Mrs. Sophie Reed, for the best poem or group of poems.

Damain Garth Reeves Memorial Book Prize • Awarded to the first-year student who best embodies the personal and intellectual qualities of Damain Reeves, Class of 2000.

Rhodes Scholarship • Two years of study at Oxford University, awarded on the basis of high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership, and physical vigor.

Rice Prize • Awarded for excellence in mathematics to a senior.

Michael Rice Prize in Computer Science • Endowed in 2008 by the Fernando and Appapillai families in honor of Dr. Michael D. Rice and awarded to a senior for excellence in computer science.

Rich Prize • The gift of Isaac Rich, trustee 1849–72, in memory of his wife, and later supplemented by appropriations from the Board of Trustees. Awarded to those seniors whose orations are judged best in composition and delivery.

Robertson Prize • Awarded to a sophomore for excellence in mathematics.

Robins Memorial Prize • Established in 1969, in memory of George D. Robins (Class of 1898), by Frank D. Robins ’34 and Douglas H. Robins ’66, for excellence in history.

Steven J. Ross Prize • Established in 1979 as a gift of Steven J. Ross of Warner Communications. Awarded annually for the best undergraduate film, digital and/or virtual, made in the Film Studies Department.

Juan Roura-Parella Prize • Established in 1984 to be awarded annually to an undergraduate whose work represents the kind of catholic curiosity and general learning that Professor Juan Roura-Parella exemplified.

Rulewater Prize • Awarded for outstanding reflection and writing on an interdisciplinary topic in the Graduate Liberal Studies program.

Robert Schumann Distinguished Student Award • Established in 2007 by a gift from the Robert Schumann Foundation. Awarded to an outstanding student who demonstrates academic accomplishment and excellence in environmental stewardship through work at Wesleyan or the greater Middletown community.

Scott Biomedical Prize • Awarded to a member(s) of the molecular biology and biochemistry senior class who has demonstrated excellence and interest in commencing a career in academic or applied medicine.

Scott Prize • Established by Charles Scott Jr., MA, Class of 1886, and trustee 1905–22, in memory of John Bell Scott, Class of 1881, for excellence in modern languages.

Mary and John Sease Prize • Awarded for outstanding work in environmental science.

Sehlinger Prize • Established by the Class of 1965 in memory of Charles Edward Sehlinger III, who died in 1964. The award of a medical dictionary is given to a premedical student for excellence of character, community spirit, and academic achievement.

Senior Legacy Award • Awarded to a senior who has consistently demonstrated outstanding leadership throughout his or her four years in the Wesleyan community.

Frances M. Sheng Prize • Awarded for excellence in Chinese language and excellence in Japanese language.

Sherman Prize—Classical Studies • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Sherman Prize—Math • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.
Rae Shortt Prize • Established in memory of Rae M. Shortt. Awarded to a junior for excellence in mathematics.

Samuel C. Silipo Prize • Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

Silverman Prize • Established by gift of Elisha Adelbert Silverman, Class of 1922, and awarded to a member of the junior or senior class for excellence in chemistry.

Skirm Prize • Established by members of the Class of 1931 in memory of their classmate, Thomas H. Skirm, this prize is awarded to a government major early in his or her senior year, to recognize the best research or writing project done during the junior year.

Social Activist Award • Awarded to the individual or student group who best exemplifies the spirit of social activism and through whose efforts constructive social change ensued.

Annie Sonnenblick Writing Award • Established by the family of the late Annie Sonnenblick, Class of 1980, in 1992 as a complement to the annual Annie Sonnenblick Lecture. The prize provides financial support for a student who wishes to undertake an independent writing project during the summer between his or her junior and senior years.

Spinney Prize • The gift of Joseph S. Spinney, trustee 1875–82 and 1888–93, for excellence in Greek. Awarded for the best original essay on some aspect of Greek or Roman civilization.

Spurrier Award • The William A. Spurrier Ethics Award, established by Dr. James Case, given to the student who demonstrates in the field of ethics: sensitivity, insight, depth, and humor. Given in memory of William Spurrier III, chaplain and Hedding Professor of Moral Science and Religion.

Student Organization of the Year • Awarded to a student organization that has excelled in sustaining leadership, an active membership, and programmatic efforts that contribute to the larger Wesleyan community.

Studio Art Program Prize • Awarded to one or more students who show particular promise for success as demonstrated through performance in classes and general contributions to the department.

Taylor Scholarship • Awarded to a history major based on outstanding academic achievement and other qualities such as fine character, good fellowship, leadership, and service to the Wesleyan community.

Thorne Prize • Established by a gift of Elizabeth Moulton Thorne, in memory of her husband, Edward Lee Thorndike, Class of 1895, for excellence in psychology.

Tishler Teaching Award • Established by the family and friends of Dr. Max Tishler, professor emeritus of chemistry and University Professor of the Sciences, emeritus. Awarded annually in his memory to the best graduate teaching assistant in chemistry.

Elizabeth Verveer Tishler Prize—Art • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

Elizabeth Verveer Tishler Prize—Music • Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance. Two prizes are given annually: one for Western classical piano performance and the other for jazz piano performance.

David A. Titus Memorial Prize • Established by family, friends, and students in memory of Professor David Titus to support the summer studies of a deserving Wesleyan junior majoring in government, East Asian studies, or the College of Social Studies.

Shu Tokita Prize • Established by friends and relatives of Shu Tokita, Class of 1984, and awarded to students of color studying literature and in area studies with a focus on literature. The recipient will be selected on the basis of his or her application essay and commitment to the study of literature.

Tölölyan Fund for the Study of Diasporas and Transnationalism • Established in 2008 by Bruce Greenwald, professor of economics at Columbia Business School, in honor of Wesleyan Professor Khachig Tölölyan. The award funds the summer research of a junior with the best proposal for a thesis on the study of diasporic or transnational issues.

Trench Prize • The gift of Miss Grace A. Smith, in memory of William James Trench, trustee 1835–67, for excellence in the Department of Religion.

Truman Scholarship • A national competition funded by the United States government that provides scholarships for graduate study to juniors who have outstanding leadership potential and intend to pursue careers in public service.

Kenneth W. Underwood Prize in Social Ethics • Awarded to the College of Social Studies (CSS) student selected to discuss a paper on the subject of social ethics delivered by a guest scholar at one of the two annual CSS banquets.

United States Teaching Assistantship in Austria • One-year assistantship for teaching English in Austria, funded by the Austrian government.

Karl Van Dyke Prize • Awarded each year to one or more students majoring in physical science or having a predominant interest in physical science and technology who show outstanding achievement in academic work and a promise of productivity in a professional career.

Vanguard Prize • Established by black alumni in tribute to the black members of the Class of 1969, whose perseverance and pioneering leadership earned them designation as the Vanguard Class. The prize is awarded annually to a graduating senior who has achieved academic excellence and contributed significantly to maintaining Wesleyan’s racial diversity.

Walkley Prize • Two prizes, the gift of Webster Rogers Walkley, Class of 1860, in memory of David Hart Walkley, Class of 1878, for excellence in psychology. Awarded to those juniors and seniors who present the best reports or work embodying original research.

Watson Fellowship • Awarded by the Thomas J. Watson Foundation, to enable college graduates of unusual promise to engage in an initial postgraduate year of independent study and travel abroad.

Weidenfeld Scholarship • The Weidenfeld Scholarship supports all tuition fees and living costs associated with graduate study at Oxford University. It fosters European networks and promotes the post-university careers of its scholars through work placements, long-term mentoring, and engagement in leadership and conferences.

Weller Prize • The gift of Mrs. LeRoy Weller, in memory of her husband, LeRoy Weller, Class of 1899, to the student having the highest academic average for the sophomore year.

Wesleyan Animal Studies Prize • Awarded for the best thesis or senior essay on a subject in animal studies.

Wesleyan Black Alumni Council Memorial Prize • Established in 1986 by the Wesleyan Black Alumni Council in memory of deceased black alumni. The prize provides a summer stipend to support a deserving student engaged in independent study or community service related to the concerns of black people.
Wesleyan Fiction Award • A gift from Norman Mailer to the Wesleyan Writing Program, this award recognizes an outstanding piece of fiction written by a Wesleyan student.

Wesleyan Global Fellowship • Funded and administered by the Fries Center for Global Studies, this pilot one-year program supports several weeks of independent exploration in one or two countries outside the U.S. The prizes go to graduating seniors whose passion, imagination, and independence led to their being selected as university-wide nominees for the Watson Fellowship.

Wesleyan Memorial Prize • The gift of undergraduates in the Class of 1943 in memory of fellow students who made the supreme sacrifice in the Second World War, to the members of the junior class outstanding in qualities of character, leadership, and scholarship.

White Fellowship—Government • Awarded for excellence in government to a graduate or an advanced undergraduate in government.

White Fellowship—History • Awarded for excellence in history.

White Prize • Established in 1942 by Horace Glenn White Jr., Class of 1933, and increased in 1943 by friends in his memory. Awarded for advanced undergraduate study in economics.

M. G. White Prize • The Marni Goldstein White Award recognizes the best Honors Thesis written in American Studies each year.

Wilde Prize • Established in 1963 by Frazer B. Wilde, LLD, Class of 1958, awarded to a junior or senior for excellence in economics.

Winchester ENGL 201 Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best essay written in a section of ENGL 201 in the preceding calendar year.

Winchester Fellowship • Established in 1938, in memory of Professor Caleb Thomas Winchester, by his widow. Awarded to Wesleyan graduates for postgraduate work in English.

Winchester First-Year Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best scholarly essay written by a first-year student in any English department course in the preceding calendar year.

Wise Prize • The gift of Daniel Wise, DD, Class of 1859, for excellence in the philosophy department; for the best essay on moral science or on some subject in the field or values.

Herbert A. Arnold
MAA, Wesleyan University; PHD, University of Wurzburg
Professor of German and Letters, Emeritus

Robyn Kimberley Autry
BS, University of Colorado Boulder; MS, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Associate Professor of Sociology

A, H. Jerriod Avant
BS, Jackson State University; MFA, Spaulding University; MFA, New York University
Teaching Fellow
Sally Bachner  
BA, Reed College; MA, Princeton University; PHD, Princeton University  
Associate Professor of English

Hyejoo Back  
BS, Busan National University; MED, Busan National University; PHD, SUNY at Albany  
Associate Professor of the Practice in East Asian Studies

Ahmed M. Badr  
Adjunct Assistant Professor of Public Policy; Interim Director for the Patricelli Center for Social Entrepreneurship

Noah Baerman  
BM, Rutgers U School Arts; MM, Rutgers U School Arts  
Director, Jazz Ensemble

Martin Baemel  
MA, University of Alabama; MA, Ludwig Maximilians University; PHD, University of Chicago  
Assistant Professor of German Studies

Ralph F. Baierlein  
BA, Harvard University; MAA, Wesleyan University; PHD, Princeton University  
Charlotte Ayres Professor of Physics, Emeritus

Michele Bailetti  
BS, University Of Bologna; MSC, University of Turin  
Graduate Student, MATH-PHD; Visiting Instructor in Mathematics

A. George Bajalia  
BA, Northwestern University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Assistant Professor of Anthropology

B. Balasubrahmaniyan  
BA, University of Madras; MA, University of Madras; MPHIL, University of Madras; PHD, University of Madras  
Adjunct Associate Professor of Music

Charles Baraw  
BA, University of Vermont; MA, Middlebury College; MA, Yale University; MPHIL, Yale University  
Visiting Associate Professor in Liberal Studies

Charles Barber  
BA, Harvard University; MFA, Columbia University  
Associate Professor of the Practice in Letters

Rachael Barlow  
MA, Indiana University Bloomington; PHD, Indiana University Bloomington  
Visiting Assistant Professor, Education Studies; Adjunct Assistant Professor of Academic Writing; Associate Director for Assessment

Hilary C. Barth  
BA, Bryn Mawr College; PHD, Massachusetts Institute of Technology  
Professor of Psychology

Jeanine D. Basinger  
BS, South Dakota St University; MS, South Dakota St University  
Corwin-Fuller Professor of Film Studies, Emerita

Robert Baumgartner  
BM, The Catholic University of America; MFA, New York University  
Visiting Artist-in-Residence in Theater

Patricia L. Beaman  
BFA, University of Michigan; MA, New York University  
University Professor of Dance

Chris Bell  
BA, Brown University; MA, University of West Georgia; PHD, University of West Georgia  
David Scott Williams Visiting Assistant Professor of Psychology

Garrett Bennett  
Bassoon and Saxophone Instructor

Bethany R. Berger  
BA, Wesleyan University; JD, Yale University  
Research Fellow, Center for the Humanities

John R. Bergeron  
Recording Studio Production Instructor

Allan Berlind  
BA, Swarthmore College; MA, Harvard University; PHD, Harvard University  
Professor of Biology, Emeritus

Pedro Bermudez  
MFA, American Film Institute  
Assistant Professor of the Practice in Video and Audio Production

Allison Bernard  
BA, Middlebury College; MA, Columbia University; PHD, Columbia University  
Visiting Assistant Professor of East Asian Studies

Garry Bertholf  
BA, Colby College; MA, University of Pennsylvania; PHD, University of Pennsylvania  
Assistant Professor of African American Studies

Rachel Besharat Mann  
BSE, St Johns University; MS, Fordham University; PHD, Fordham University  
Associate Professor of the Practice in Education Studies

Jonathan W. Best  
BA, Earlham College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University  
Professor of Art History, Emeritus

David L. Beveridge  
BA, College of Wooster; MAA, Wesleyan University; PHD, University of Cincinnati  
Joshua Boger University Professor of the Sciences and Mathematics, Emeritus; Professor, Integrative Sciences, Emeritus; Co-coordinator, Molecular Biophysics

John E Biatowas  
BA, Colgate University; MA, University of Connecticut  
Director, Chamber Music Ensemble

John S. Biddiscombe  
BS, Springfield College Ma; MED, Slippery Rock University  
Adjunct Professor of Physical Education, Emeritus

Marina Bilbija
BA, University of Sarajevo; MA, University of Pennsylvania; PHD, University of Pennsylvania
Assistant Professor of English; Assistant Professor, African American Studies

Kate Birney
BA, Yale University; MT, Harvard University; PHD, Harvard University
Associate Professor of Classical Studies; Associate Professor, Archaeology; Associate Professor, Art History

Drew Black
BS, Syracuse University; MA, Kent State University
Adjunct Professor of Physical Education; Head Coach of Wrestling/Strength and Fitness Coach

Earl Bloodworth
Mentor-in-Residence

Amy B. Bloom
BA, Wesleyan University; MSW, Smith College
Shapiro-Silverberg University Professor of Creative Writing and Criticism; Emerita/us Professor of Creative Writing; Director, Shapiro Writing Center; Professor of the Practice, English

Reinhold Blumel
PHD, Technical University Munich
Charlotte Augusta Ayres Professor of Physics; Professor of Physics; Co-Coordinator, Informatics and Modeling

Elizabeth A. Bobrick
BA, Marlboro College; MA, Johns Hopkins University; PHD, Johns Hopkins University
Writing Consultant; Visiting Scholar in Classical Studies; Visiting Assistant Professor in Liberal Studies

David Bodznick
BS, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Washington
Professor of Biology, Emeritus

Abigail Huston Boggs
BA, Wesleyan University; PHD, University Calif Davis
Assistant Professor of Sociology; Assistant Professor, Education Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Philip H. Bolton
BS, Michigan State University; MAA, Wesleyan University; PHD, University of California, San Diego
Professor of Chemistry, Emeritus

John P. Bonin
BA, Boston College; MA, University of Rochester; PHD, University of Rochester
Chester D. Hubbard Professor of Economics and Social Science; Professor of Economics; Tutor, College of Social Studies; Professor, Russian, East European, and Eurasian Studies

Esam Boraey
MA, Cairo University
Visiting Instructor of Public Policy

Iris Bork-Goldfield
MA, Ludwig Maximilians University; PHD, Ludwig Maximilians University
Adjunct Professor of German Studies

Karl David Bouware
BBA, Baruch College; MA, Duke University; PHD, University Of Alabama
Assistant Professor of Economics

Richard W. Boyd
BA, University of Texas Austin; MAA, Wesleyan University; PHD, Indiana University Bloomington
Professor of Government, Emeritus

Eugene Bozzi
Percussion/Drum Instructor

Alexander Brakel
Visiting Scholar in History

Anthony Delano Braxton
John Spencer Camp Professor of Music, Emeritus

Katie Brewer Ball
BA, Occidental College; MA, New York University; PHD, New York University
Assistant Professor of Theater; Assistant Professor, African American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Nathan Brody
BA, University Of New Hampshire; MA, University of Michigan; MAA, Wesleyan University; PHD, University of Michigan
Professor of Psychology, Emeritus

A. Taeko Brooks
BA, University of Hawaii; MA, University of Hawaii
Visiting Scholar in East Asian Studies

E. Bruce Brooks
BM, Oberlin Conservatory; PHD, University of Washington
Visiting Scholar in East Asian Studies

Judith C. Brown
BA, University of California, Berkeley; MA, University of California, Berkeley; PHD, Johns Hopkins University
Professor of History, Emerita

Nancy Brown
Classical Trumpet Instructor

Mahogany L. Browne
MFA, Pratt Institute
Distinguished Writer in Residence

Neely Bruce
BMU, University of Alabama; DMU, University of Illinois Urbana; MAA, Wesleyan University; MMU, University of Illinois Urbana
John Spencer Camp Professor of Music; Professor of Music

Gillian Brunet
BA, Smith College; PHD, University of California, Berkeley
Assistant Professor of Economics

Joseph W. Bruno
BA, Augustana College; MAA, Wesleyan University; PHD, Northwestern University
Professor of Chemistry, Emeritus

Katherine Brunson
BA, Harvard University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Assistant Professor of Archaeology; Assistant Professor, East Asian Studies

Raquel Bryant
BA, Brown University; PHD, University of Massachusetts Amherst
Assistant Professor of Earth and Environmental Sciences

Richard V. Buel
BA, Amherst College; MA, Harvard University; PHD, Harvard University
Professor of History, Emeritus

Carycruz M Bueno
BA, Mount Holyoke College; PHD, Georgia St University
Assistant Professor of Economics

Ann Campbell Burke
AB, New York University; MA, Harvard University; PHD, Harvard University
Professor of Biology, Emerita

Stephen Busemeyer
BA, University of Hartford
Koeppel Journalism Fellow

Alisha Butler
BA, Yale University; MA, University of Maryland College Park; PHD, University of Maryland, College Park
Assistant Professor of Education Studies

Joe Cacaci
BA, Manhattan College; MA, Emerson College
Visiting Associate Professor of Film Studies

Furkan Cakmak
BA, Bogazici University; MA, Washington State University
Postdoctoral Research Fellow

Michael A. Calter
BS, University of Vermont; PHD, Harvard University
Beach Professor of Chemistry; Professor of Chemistry; Professor, Integrative Sciences

Ron Cameron
BA, Western Kentucky Uni; MAA, Wesleyan University; PHD, Harvard University
Professor of Religion

Peggy Carey Best
AB, Earlham College; PHD, Union Institute Grad School
Visiting Assistant Professor, Education Studies; Visiting Assistant Professor of Science in Society; Visiting Scholar in the Science and Society Program

Philip D. Carney
BA, Trinity College
Adjunct Professor of Physical Education; Head Coach of Men’s Crew

Sarah Kristin Carney
BA, Connecticut College; MA, Wesleyan University; PHD, CUNY The Graduate Center
Associate Professor of the Practice in Psychology

John F. Carr
BA, St. Michaels College; MAA, Wesleyan University; MFA, The Catholic University of America
Professor of Theater, Emeritus

Christine Celeste Caruso
BA, Fordham University; MA, Columbia University; MPH, Boston University; PHD, CUNY The Graduate Center
Assistant Professor of the Practice in the College of the Environment

Amanda Noel Cass
BA, Mount Holyoke College; PHD, Cornell University
Visiting Assistant Professor of Biology

Robert Cassidy
BA, Fitchburg State University; MA, Boston University; MA, Tufts University; MA, U.S. Naval War College; MA, French War College; PHD, Tufts University
Assistant Professor of the Practice in Center for the Study of Public Life

Jim Cavallaro
BA, Harvard University; JD, University of California, Berkeley; MA, University of California, Berkeley; PhD, Universidad Pablo de Olavide
Professor of the Practice, Allbritton Center for the Study of Public Life

Benjamin Chaffee
Associate Director of Visual Arts; Adjunct Instructor in Art

Sonali Chakravarti
BA, Swarthmore College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Professor of Government; Director, Allbritton Center for the Study of Public Life; Tutor, College of Social Studies

Wai Kiu Chan
BS, University of Hong Kong; MPHIL, University of Hong Kong; PHD, The Ohio State University
Professor of Mathematics

Yu-Chan Chang
MS, Louisiana State University; PHD, Louisiana State University
Teaching Fellow

Douglas K. Charles
BA, University of Chicago; MA, Northwestern University; PHD, Northwestern University
Professor of Anthropology, Emeritus

Eric Charry
BMA, New England Conservatory of Mu; MFA, Princeton University; MMU, New England Conservatory of Mu; PHD, Princeton University
Professor of Music

Qian Chen
MA, Wuhan University
Visiting Scholar in Philosophy

Christopher James Chenier
BA, Bard College; MA, University of Delaware
Assistant Professor of the Practice in Integrative Sciences and IDEAS

Barry Chernoff
BS, SUNY at Stony Brook; MS, Adelphi University; PHD, University of Michigan
Robert Schumann Professor of Environmental Studies; Professor of Biology; Professor of Earth and Environmental Sciences; Chair, Environmental Studies Program; Director, College of the Environment; Professor, Environmental Studies

Shawn Chi
BA, Huazhong University of Sci & Tech; MA, Peking University; PHD, University of Colorado Boulder
Visiting Assistant Professor of Economics

Tesia Childs
BA, Lees Mcrae College  
Visiting Instructor of Theater

Joan Cho  
BA, University of Rochester; MA, Harvard University; PHD, Harvard University 
Assistant Professor of East Asian Studies; Assistant Professor, Government

Alice Chriess  
BM, Oberlin College; MM, Oberlin College  
Assistant Professor of Music; Research Assistant (Gallarotti)

Mary Ann Clawson  
BA, Carleton College; MA, SUNY at Stony Brook; PHD, SUNY at Stony Brook 
Professor of Sociology, Emerita

Fiona Coffey  
Associate Director for Programming and Performing Arts; Adjunct Assistant Professor of Theater

Frederick M. Cohan  
BS, Stanford University; PHD, Harvard University  
Huffington Foundation Professor in the College of the Environment; Professor of Biology; Professor, Environmental Studies; Professor, Integrative Sciences

Lisa Cohen  
BA, Brown University; MPHIL, Yale University; PHD, Yale University 
Associate Professor of English; Associate Professor, Feminist, Gender, and Sexuality Studies

Karen L. Collins  
BA, Smith College; PHD, Massachusetts Institute of Technology 
Edward Burr Van Vleck Professor of Mathematics; Professor of Mathematics; Professor, Integrative Sciences

Stephen Edward Collins  
BA, Wesleyan University; MFA, University of Texas Austin 
Associate Professor of Film Studies

Demetrius James Colvin  
Adjunct Instructor, Education Studies; Director, Resource Center

Robert T. Conn  
BA, Dartmouth College; PHD, Princeton University 
Professor of Spanish; Chair, Latin American Studies; Professor, Latin American Studies

John Anthony Connor  
MA, Manchester University; MAA, Wesleyan University 
Professor of English, Emeritus

David Constantine  
BS, Eastern Nazarene College; PHD, University of Michigan 
Associate Professor of Mathematics

Stephen Anthony Cooke  
Visiting Scholar in Chemistry

Joseph David Coolon  
BS, Kansas State University; PHD, Kansas State University 
Associate Professor of Biology; Associate Professor, Integrative Sciences

Carla Coste Sanchez  
BS, University Of Puerto Rico; PHD, University of North Carolina at Chapel Hill 
Assistant Professor of the Practice in Chemistry

Ethan M. Coven  
BA, University of Rochester; MA, Yale University; MAA, Wesleyan University; PHD, Yale University 
Professor of Mathematics, Emeritus

Barbara H. Craig  
BA, The University of Maine; MAA, Wesleyan University; MPA, University of Connecticut; PHD, University of Connecticut 
Professor of Government, Emerita

Tom Crean  
MA, Wesleyan University 
Guitar Instructor

Martha Crenshaw  
BA, Newcomb College Tulane U; MA, University of Virginia; MAA, Wesleyan University; PHD, University of Virginia 
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought, Emerita

Pablo Cuellar  
BS, Universidad de Chile; MA, Universidad de Chile; MA, Boston University; PHD, Boston University 
Visiting Assistant Professor of Economics

Christine Marie Curley  
Visiting Assistant Professor of Psychology

Andrew S. Curran  
BA, Hamilton College; MA, New York University; PHD, New York University 
William Armstrong Professor of the Humanities; Professor of French

Walter Jr. Curry  
BA, Iowa State University 
Adjunct Associate Professor of Physical Education; Head Coach of Track Field (Men’s Women’s)

Jonathan Cutler  
BA, Tufts University; MA, Union Theological Seminary; PHD, CUNY The Graduate Center 
Associate Professor of Sociology

Jennifer D’Andrea  
Director of Counseling and Psychological Services; Faculty teaching in Liberal Studies

Udaya Raj Dahal  
MS, University of Connecticut; PHD, University of Connecticut 
Visiting Assistant Professor of Physics

Nathan Dame  
BA, Weber State University 
Visiting Artist-in-Residence in Theater

Logan M. Dancey  
BA, University Puget Sound; PHD, Univ. of Minnesota Twin Cities 
Associate Professor of Government

John Wesley Dankwa  
BA, University of Cape Coast; MA, University of Cape Coast; PHD, Wesleyan University 
Assistant Professor of Music
Norman Danner  
BA, University of California, Berkeley; PHD, Indiana University Bloomington  
Professor of Computer Science

Saida Daukeyeva  
BMU, Moscow State Tchaikovsky Conservatory; PHD, Moscow State Tchaikovsky Conservatory; PHD, School of Oriental and African Studies, University of London  
Assistant Professor of Music; Assistant Professor, Russian, East European, and Eurasian Studies

Anthony P. Davis  
BS, U.S. Coast Guard Academy; MS, Ohio State University; PHD, Wesleyan University  
Associate Professor of the Practice in Chemistry; Associate Professor of the Practice, Integrative Sciences

Natália de Paula Moreira  
PHD, University of São Paulo  
Postdoctoral Research Fellow, Wesleyan Media Project; Postdoctoral Research Fellow, Quantitative Analysis Center

Nuwan De Silva  
MS, Tennessee Technological University; PHD, Iowa State University  
Visiting Associate Professor of Chemistry

Anita Deeg-Carlin  
Associate Director for Intercultural Learning; Staff Per Course

Clara del Junco  
STEM and Data Education Librarian; Research Affiliate in Chemistry

Liana Christine DeMarco  
MA, Yale University; PHD, Yale University  
Mellon Postdoctoral Fellow in African American Studies

Stephen Henri Devoto  
BA, Haverford College; PHD, Rockefeller University  
Professor of Biology, Emeritus

Carolina Diaz  
BA, Universidad Católica de Chile; MA, Rutgers, The State University of New Jersey; PHD, Rutgers, The State University of New Jersey  
Assistant Professor of Spanish; Assistant Professor, Latin American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Daniel A DiCenzo  
BA, Williams College  
Adjunct Professor of Physical Education; Head Coach of Football

Lisa C. Dierker  
BA, Ohio State University; MA, University of Connecticut; PHD, University of Connecticut  
Walter Crowell University Professor of Social Sciences; Professor of Psychology; Professor, Education Studies

Kim Diver  
BA, Carthage College; MA, Syracuse University; PHD, Syracuse University  
Visiting Scholar in Earth Environmental Sciences

Lindsay R Dolan  
BA, Swarthmore College; MA, Columbia University; MPhil, Columbia University; PHD, Columbia University  
Assistant Professor of Government

Lisa A. Dombrowski  
BA, Wesleyan University; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison  
Professor of East Asian Studies; Professor, Film Studies

J. James Donady  
BS, SUNY at Stony Brook; PHD, University of Iowa  
Professor of Biology, Emeritus

Patrick Dowday  
BA, University of Pennsylvania; MA, University of California, Los Angeles; PHD, University of California, Los Angeles  
Visiting Scholar in East Asian Studies

Maeve Kathleen Doyle  
BA, Vassar College; MA, Bryn Mawr College; PHD, Bryn Mawr College  
Research Fellow, Center for the Humanities

Royette Tavernier Dubar  
MS, Brock University; PHD, Brock University  
Assistant Professor of Psychology

Ann duCille  
BA, Bridgewater State College; MA, Brown University; MA, Brown University; PHD, Brown University  
Professor of English, Emerita

Peter N. Dunn  
BA, University College, University of London; MA, University College, University of London; MAA, Wesleyan University  
Hollis Professor of Romance Languages and Literatures, Emeritus

Stephanie E. Dunson  
Visiting Assistant Professor in Liberal Studies

Alex Dupuy  
BA, University of Connecticut; MA, Brandeis University; MAA, Wesleyan University; PHD, SUNY at Binghamton  
John E. Andrus Professor of Sociology, Emeritus

Cem Duruoz  
Guitar Instructor

LaToya Eaves  
BA, North Carolina State University; BA, North Carolina State University; MS, Florida State University; PHD, Florida International University  
Menakka and Essel Bailey ’66 Distinguished Visiting Scholar in the College of the Environment

Ronald Ebrecht  
BM, Southern Methodist University; MM, Yale University  
University Organist, Emeritus

Sierra Clare Eckert  
BA, Swarthmore College; MA, Columbia University; MPhil, Columbia University; PHD, Columbia University  
Assistant Professor of English

Craig Edwards  
Traditional Fiddle Styles Instructor

Gabriel Logan Eggers  
BA, Princeton University; PHD, Georgia Institute of Technology
Visiting Assistant Professor of Earth Environmental Sciences

Emma Copley Eisenberg
BA, Haverford College; MFA, University of Virginia
Visiting Assistant Professor of English

Marc A. Eisner
BA, University of Wisconsin at Madison; MA, Marquette University; MBA, University of Connecticut; PHD, University of Wisconsin at Madison
Henry Merritt Wriston Chair in Public Policy; Professor of Government; Tutor, College of Social Studies; Professor, Environmental Studies

Douglas Elkins
BFA, SUNY Purchase; MFA, Hollins College
Associate Professor of the Practice in Dance

Benjamin Ross Elling
BA, Cornell University; PHD, Stanford University
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences

Perry C. Elliot
Violin Instructor

Frederick M. Ellis
BS, University of Massachusetts Amherst; MAA, Wesleyan University; PHD, University of Massachusetts Amherst
Professor of Physics; Emeritus Faculty in Physics

Ren Ellis Neyra
BA, Freed Hardeman College; PHD, SUNY at Stony Brook
Associate Professor of English; Associate Professor, African American Studies; Coordinator, Social, Cultural, and Critical Theory

Richard H. Elphick
BA, University of Toronto; MA, University of California, Los Angeles; PHD, Yale University
Professor of History; Emeritus; Professor of History, Emeritus

Merve Gul Emre
BA, Harvard University; MA, Yale University; PHD, Yale University
Shapiro-Silverberg University Professor of Creative Writing and Criticism; Director, Shapiro Writing Center

Paul H. Erickson
BA, Harvard University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Associate Professor of History; Associate Professor, Science in Society; Associate Professor, Environmental Studies

Kaisha Esty
BA, University of Nottingham; MA, University of Nottingham; PHD, Rutgers, The State University of New Jersey
Assistant Professor of African American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, History

Candice M. Eton
BA, New York University; BFA, New York University; PHD, Harvard University
Assistant Professor of Molecular Biology and Biochemistry; Assistant Professor, Integrative Sciences; Assistant Professor, Physics; Assistant Professor, Chemistry

Demetrius L. Eudell
BA, Dartmouth College; PHD, Stanford University
Dean of the Social Sciences; Professor of History

Emily Walters Eyestone
MA, Princeton University
Visiting Assistant Professor of French

Youssef Ezzyat
BSE, Princeton University; PHD, New York University
Assistant Professor of Psychology; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences

F

Brian C. Fay
BA, Loyola Marymount University; DPHIL, Oxford University; MA, Oxford University; MAA, Wesleyan University
William Griffin Professor of Philosophy, Emeritus

Hafiz M FazaleHaq
MA, University Of New Mexico; PHD, University Of New Mexico
Assistant Professor of the Practice in South Asian Language and Culture

Yaniv Feller
BA, Hebrew University; MA, Hebrew University; PHD, University of Toronto
Jeremy Zwelling Assistant Professor of Jewish Studies; Assistant Professor of Religion

Ni Ye Feng
BS, University of California, Los Angeles; PHD, Cornell University
Assistant Professor of Biology; Visiting Assistant Professor, Neuroscience and Behavior

Lucas Fernández
PHD, National University of Cordoba
Visiting Scholar in Physics

Adam Fieldsteel
BA, Brown University; MAA, Wesleyan University; PHD, University of California, Berkeley
Professor of Mathematics

David J. Finitsis
PHD, University of Connecticut
Visiting Assistant Professor of Psychology

John E. Finn
BA, Nasson College; J D, Georgetown University; PHD, Princeton University
Professor of Government, Emeritus

Sue C. Fisher
BA, California State Univ - Northr; MA, University of California, San Diego; MAA, Wesleyan University; PHD, University of California, San Diego
Professor of Sociology, Emerita

Joseph J. Fitzpatrick
BA, Harvard University; PHD, Duke University
Assistant Professor of the Practice in Letters; Assistant Professor of the Practice, Russian, East European, and Eurasian Studies

Zach Ramon Fitzpatrick
MA, University of Illinois at Chicago; PHD, University of Illinois at Chicago
Teaching Fellow

Octavio Flores-Cuadra
BA, Universidad Americas; MA, Universidad Americas; PHD, University of Pittsburgh
Adjunct Professor of Spanish
Douglas C. Foyle  
AB, Stanford University; MA, Duke University; PHD, Duke University  
Associate Professor of Government; Chair, Government

Erika Franklin Fowler  
BA, St Olaf College; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison  
Professor of Government; Director, Wesleyan Media Project

Michael A Fried  
BA, Brown University  
Adjunct Professor of Physical Education; Head Coach of Tennis (Men’s Women’s)

Harris A. Friedberg  
BA, Harvard University; PHD, Yale University  
Associate Professor of English

Michael J. Frisch  
PHD, Carnegie Mellon University  
Tishler Professor of Chemistry

Richard John Friswell  
Co-Director, Wasch Center Seminars

Albert J. Fry  
BS, University of Michigan; MAA, Wesleyan University; PHD, University of Wisconsin at Madison  
E. B. Nye Professor of Chemistry, Emeritus

Courtney Fullilove  
BA, Columbia University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University  
Associate Professor of History; Associate Professor, Environmental Studies; Associate Professor, Science in Society

Susanne Grace Fusso  
BA, Lawrence University; MA, Yale University; PHD, Yale University  
Marcus L. Taft Professor of Modern Languages; Professor of Russian, East European, and Eurasian Studies; Chair, Russian, East European, and Eurasian Studies

Leslie Gabel-Brett  
BA, Wesleyan University; PHD, City College  
Adjunct Assistant Professor of Public Policy

Priscilla E. Gale  
Voice Instructor

Giulio Gallarotti  
BA, Hunter College; PHD, Columbia University  
Professor of Government; Professor, Environmental Studies

Elaine M. Gan  
BA, Wellesley College; MFA, University of California, Santa Cruz; PHD, University of California, Santa Cruz  
Assistant Professor of Science in Society; Assistant Professor, Feminist, Gender, and Sexuality Studies

Daniella Gandolfo  
BA, Pontificia Universidad Catolica del Peru; MA, University of Texas Austin; PHD, Columbia University  
Associate Professor of Anthropology; Associate Professor, Latin American Studies; Co-Coordinator, Urban Studies

Matthew Carl Garrett  
BA, Bard College; MA, Stanford University; MPHIL, Cambridge University; PHD, Stanford University  
Associate Professor of English; Chair, English; Associate Professor, American Studies

Courtney Gaston  
BA, Centenary College La; MFA, University of Iowa  
Assistant Professor of the Practice in Theater

Caroline Gates  
BA, University of Arizona; MA, University of Virginia; PHD, University of Virginia  
Visiting Assistant Professor of French

Giaco Gates  
Jazz Vocal Instructor

C. Stewart Gillmor  
BS, Stanford University; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University  
Professor of History and Science, Emeritus

Martha S. Gilmore  
BA, Franklin & Marshall College; MSC, Brown University; PHD, Brown University  
George I. Seney Professor of Geology; Professor of Earth and Environmental Sciences; Co-Coordinator, Planetary Science

Megan H. Glick  
BA, Northwestern University; MA, Yale University; MPHIL, Yale University; PHD, Yale University  
Associate Professor of American Studies; Chair, American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science in Society; Coordinator, Disability Studies

Greg Goldberg  
BA, New York University; PHD, CUNY The Graduate Center  
Associate Professor of Sociology; Chair, Sociology

Eric Andrew Goldman  
Visiting Assistant Professor in Liberal Studies

Wei Gong  
BA, Beijing Language and Culture U; MA, The University of Hong Kong  
Associate Professor of the Practice in East Asian Studies

Bernardo Antonio Gonzalez  
BA, University of California, Berkeley; MA, University of California, Berkeley; MAA, Wesleyan University; PHD, University of California, Berkeley  
Professor of Spanish

Maryam Gooyabadi  
BA, Baruch College; BS, University of Colorado Boulder; MA, University of California, Irvine  
Assistant Professor of the Practice in Quantitative Analysis

Emily Gorlewski  
BA, Northern Illinois University; EDD, The University of Minnesota, Twin Cities  
Director, Study Abroad; Staff Per Course; Director, Study Abroad

Martin Gosman  
BBA, University of Wisconsin at Madison; MBA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Visiting Professor of Economics; Visiting Scholar in Economics

Peter S. Gottschalk
BA, College of the Holy Cross; MA, Univ of Wisconsin Fond Du Lac; PHD, University of Chicago
Professor of Religion; Professor, Education Studies; Professor, Science in Society; Coordinator Global South Asian Studies Prog; Coordinator, Muslim Studies

Laura B. Grabel
BA, Brandeis University; MAA, Wesleyan University; PHD, University of California, San Diego
Lauren B. Dachs Professor of Science and Society, Emerita

Claire Grace
BA, Brown University; MA, Middlebury College; PHD, Harvard University
Associate Professor of Art History; Associate Professor, American Studies

Roger Mathew Grant
BM, Ithaca College; PHD, University of Pennsylvania
Dean of the Arts and Humanities; Professor of Music

Vera K.B. Grant
CER, University of Freiburg
Adjunct Professor of German Studies, Emerita

Laura Grappo
BA, Wesleyan University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Anne F. Greene
BA, Radcliffe College; MA, Brandeis University
University Professor of English, Emerita; Special Advisor to the Provost

Nathanael Greene
BA, Brown University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of History

James P. Greenwood
BS, SUNY at Binghamton; MS, Brown University; PHD, Brown University
Associate Professor of Earth and Environmental Sciences

Daniel Mark Griffith
PHD, Wake Forest University
Visiting Assistant Professor, Quantitative Analysis Center; Visiting Assistant Professor of Earth and Environmental Science

Amy Grillo
AB, Brown University; EDD, Harvard University; EDM, Harvard University
Associate Professor of the Practice in the Allbritton Center for the Study of Public Life; Associate Professor of the Practice, Environmental Studies; Associate Professor of the Practice, College of the Environment

Erik Grimmer-Solem
BA, Brigham Young University; DPHIL, Oxford University; MPHIL, Cambridge University; MSC, London School of Economics and Political Science
Ezra and Cecile Zilkha Professor in the College of Social Studies; Professor of History; Co-Chair, College of Social Studies; Tutor, College of Social Studies; Professor, German Studies

Richard S. Grossman
AB, Harvard University; MA, Harvard University; MSC, London School of Economics and Political Science; PHD, Harvard University
Andrews Professor of Economics; Professor of Economics; Tutor, College of Social Studies

Lori Gruen
BA, University of Colorado Boulder; PHD, University of Colorado Boulder
William Griffin Professor of Philosophy; Professor of Philosophy; Chair, Philosophy; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Animal Studies

Matthew Guberman-Pfeffer
PHD, University of Connecticut
Visiting Scholar in Chemistry

Meera Gudipati
Flute Instructor

James T. Gutmann
BA, Amherst College; MAA, Wesleyan University; PHD, Stanford University
Professor of Earth and Environmental Sciences, Emeritus

Benjamin Haber
BA, New College of Florida; MPHIL, CUNY The Graduate Center; PHD, CUNY The Graduate Center
Assistant Professor of Sociology

Mary Alice Haddad
BA, Amherst College; MA, University of Washington; PHD, University of Washington
John E. Andrus Professor of Government; Professor of Government; Director, Office of Faculty Career Development; Professor, East Asian Studies; Professor, Environmental Studies

Nina Hagel
BA, Johns Hopkins University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Assistant Professor of Government; Tutor, College of Social Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Anthony W. Hager
BS, Pennsylvania State University; PHD, Pennsylvania State University
Professor of Mathematics, Emeritus

Gebremedhin Gebremeskel Haile
PHD, Chinese Academy of Scienc
Visiting Assistant Professor of Earth Environmental Sciences

Hrissi Haldezos
Associate Director of Student Accounts and Loan Services; Adjunct Instructor in Modern Greek

Carolyn F. Halsted
Piano Instructor

Geoffrey Hammerson
Visiting Assistant Professor in Liberal Studies

I. Harjito

Kolby Hanson
BA, Stanford University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Government
MA, Akademi Seni Karavitan
University Professor of Music

Ilana Yacine Harris-Babou
BA, Yale University; MFA, Columbia University
Assistant Professor of Art; Luther Gregg Sullivan Fellow in Art

Nick Hastings
BS, Brown University
Visiting Instructor in Earth and Environmental Sciences

Miyuki Hatano-Cohen
BA, Tohoku Gakuin University
Assistant Professor of the Practice in East Asian Studies

Anthony Ryan Hatch
AB, Dartmouth College; MA, University of Maryland College Park; PhD, University of Maryland College Park
Professor of Science in Society; Professor, African American Studies; Professor, College of the Environment; Professor, Sociology; Professor, Environmental Studies; Coordinator, Sustainability and Environmental Justice

Rachel Heng
BA, Columbia University; MFA, University of Texas Austin
Assistant Professor of English

Elizabeth (Beth) Ann Hepford
BA, University Of Kansas; MA, Arizona State University; PhD, Temple University
Assistant Professor of the Practice in TESOL; Assistant Professor of the Practice, Education Studies; Assistant Professor of the Practice, English

William Herbst
BA, Princeton University; MAA, Wesleyan University; MSC, University of Toronto; PhD, University of Toronto
John Monroe Van Vleck Professor of Astronomy, Emeritus

Daniel Hernández
BA, Institución Pontificia Universidad Javeriana; PhD, Stanford University
Visiting Assistant Professor of Spanish

Yuri Herrera
MFA, University Texas El Paso; PhD, University of California, Berkeley
Distinguished Writer in Residence

April Monique Hickman
AA, Casper College; MFA, Yale University
Assistant Professor of the Practice in Theater

Scott Higgins
BA, Oakland University; MA, Univ of Wisconsin Madison; PhD, Univ of Wisconsin Madison
Charles W. Fries Professor of Film Studies; Professor of Film Studies; Director, College of Film and the Moving Image; Chair, Film Studies; Curator of the Wesleyan Cinema Archives

Cameron Donnay Hill
BA, Yale University; PhD, University of California, Berkeley
Associate Professor of Mathematics; Associate Professor, Integrative Sciences

Patricia R. Hill
BA, College of Wooster; PhD, Harvard University
Professor of American Studies, Emerita

Christiaan Hogendorn
BA, Swarthmore College; PhD, University of Pennsylvania
Professor of Economics; Chair, Economics

Jay Clinton Hoggard
BA, Wesleyan University; MA, Wesleyan University
Professor of Music; Professor, African American Studies

Oliver W. Holmes
BA, City College; MA, University of Chicago; MAA, Wesleyan University; PhD, University of Chicago
Professor of History

Scott G. Holmes
BS, College of William and Mary; PhD, University of Virginia
Professor of Molecular Biology and Biochemistry; Chair, Molecular Biology and Biochemistry; Professor, Integrative Sciences

Abigail S. Hornstein
AB, Bryn Mawr College; MPHIL, New York University; PhD, New York University
Woodhouse/Sysco Professor of Economics; Professor of Economics

Steven W. Horst
BA, Boston University; PhD, University of Notre Dame
Professor of Philosophy; Professor, Science in Society; Coordinator, Christianity Studies

Justin Hosbey
PhD, University of Florida
Menakka and Essel Bailey ’66 Distinguished Visiting Scholar in the College of the Environment

Mark A. Hovey
BS, Ohio State University; PhD, Massachusetts Institute of Technology
Associate Provost for Budget and Personnel; Professor of Mathematics; Professor, Integrative Sciences

Wesley Dixon Howden
AB, University of Chicago; PhD, University of California, San Diego
Assistant Professor of Economics

Robert J. Hoyle
French Horn Instructor

Yu-ting Huang
BA, National Taiwan University; MA, National Taiwan University; PhD, University of California, Los Angeles
Assistant Professor of East Asian Studies

Elijah Huge
BA, Yale University; MAR, Yale University
Associate Professor of Art; Associate Professor, Environmental Studies

Meredith Hughes
BS, Yale University; PhD, Harvard University
Associate Professor of Astronomy; Associate Professor, Integrative Sciences

Lutz Hüwel
PhD, University of Gottingen
Professor of Physics

Liam Patrick Hynes-Tawa
BA, Brown University; MA, Yale University; PhD, Yale University
Visiting Assistant Professor of Music
Masami Imai
BA, U. of Wisconsin Eau Claire; PHD, University Calif Davis
Professor of Economics; Professor, East Asian Studies

Ledina Imami
BA, University Mich Dearborn; MA, Wayne State University; PHD, Wayne State University
Visiting Assistant Professor of Psychology

Anthony A. Infante
BA, Temple University; MAA, Wesleyan University; PHD, University of Pennsylvania
Professor of Molecular Biology and Biochemistry, Emeritus

Tushar Irani
BA, Colgate University; PHD, Northwestern University
Associate Professor of Philosophy; Associate Professor of Letters; Chair, College of Letters; Associate Professor, Education Studies

Ryuichiro Izumi
BA, Keio University; PHD, Rutgers, The State University of New Jersey
Assistant Professor of Economics

Elizabeth Anne Jackson
BA, Rutgers University; MA, University of Texas Austin; PHD, University of Texas Austin
Visiting Associate Professor of Portuguese

Jonathan Michael Jackson
BA, Harvard University; MSC, Pennsylvania State University; PHD, Pennsylvania State University
Teaching Fellow

Joyce Jacobsen
BA, Harvard University; MSC, London School of Economics and Political Science; PHD, Stanford University
Andrews Professor of Economics, Emerita

Anuja Jain
BA, University of Delhi; MA, University of Delhi; PHD, New York University
Assistant Professor of Film Studies

Hadel Jarada
BA, University of California, Berkeley; PHD, Harvard University
Assistant Professor of Letters

Ronald S. Jenkins
BA, Haverford College; EDD, Harvard University
Professor of Theater

Carlos Alberto Jimenez Hoyos
MA, Rice University; PHD, Rice University
Assistant Professor of Chemistry

Khalil Anthony Johnson
BA, University of Georgia Athens; MPHIL, Yale University; PHD, Yale University
Assistant Professor of African American Studies; Assistant Professor, Education Studies

Ruth Ineke Johnson
BS, University of Witwatersrand; PHD, Cambridge University
Associate Professor of Biology; Associate Professor, Integrative Sciences

William D. Johnston
BA, Elmira College; MA, Harvard University; PHD, Harvard University
John E. Andrus Professor of History; Professor of History; Chair, History; Professor, Environmental Studies; Professor, Science in Society; Professor, East Asian Studies

Catharine Judson
MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill
Visiting Assistant Professor of Classical Studies

Barbara Jean Juhasz
BA, Binghamton University; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Jeffrey L. Shames Professor of Civic Engagement; Professor of Psychology; Professor, Education Studies; Professor, Neuroscience and Behavior; Professor, Integrative Sciences; Coordinator, Civic Engagement

Robert Ira Kabacoff
BA, University of Connecticut; PHD, University of Missouri, St. Louis
Professor of the Practice in Quantitative Analysis

Emmanuel I. Kaparakis
Adjunct Assistant Professor of Quantitative Analysis; Director of Centers for Advanced Computing

Natasha Karageorgos
MA, Tomsk State University; PHD, CUNY The Graduate Center
Assistant Professor of the Practice in Russian, East European, and Eurasian Studies

Indira Karamcheti
BA, University Calif Santa Bar; MA, University Calif Santa Bar; PHD, University Calif Santa Bar
Associate Professor of American Studies; Associate Professor, Education Studies; Coordinator, Caribbean Studies

Dalit Katz
BA, Hebrew University; MA, Hebrew University
Professor of the Practice in Religion; Director, Center for Jewish Studies; Professor of the Practice, Fries Center for Global Studies

Marilyn A. Katz
BS, Columbia University; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Classical Studies, Emerita

J. Kehaulani Kauanui
BA, University of California, Berkeley; PHD, University Calif Santa Craz
Professor of American Studies; Professor, Anthropology

Kerwin Kaye
BA, University of Colorado Boulder; MA, University San Francisco; PHD, New York University
Associate Professor of Feminist, Gender, and Sexuality Studies; Tutor, College of Social Studies; Associate Professor, Sociology; Associate Professor, American Studies

Michael S. Keane
BA, University of Texas Austin; MS, University of Gottingen; PHD, University of Erlangen-Nurnberg
Professor of Mathematics, Emeritus

Anthony Bruno Keats
BA, Macalester College; MA, Tufts University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Associate Professor of Economics

Alex Keegan
BA, Brown University; MFA, Yale University
Visiting Assistant Professor of Theater; Visiting Assistant Professor of Theater

Camille Keeler
Manager of Scientific Facilities and Instrumentation; Research Affiliate in Chemistry

R. Lincoln Keiser
BA, Lawrence University; MA, Northwestern University; MAA, Wesleyan University; PHD, University of Rochester
Professor of Anthropology, Emeritus

Christine Kemp
BA, Skidmore College; MA, Bridgewater State College
Adjunct Associate Professor of Physical Education; Head Coach of Field Hockey

Shona Kerr
BMU, Cardiff University
Adjunct Professor of Physical Education; Head Coach of Squash (Men’s Women’s)

Scott M. Kessel
BA, Wesleyan University; MALS, Wesleyan University
Visiting Assistant Professor of Art; Drum Instructor

Melanie Khamis
BS, London School of Economics and Political Science; MS, University of Warwick; PHD, London School of Economics and Political Science
Associate Professor of Economics; Associate Professor, Latin American Studies

Yu Nong Khew
MAR, Southern California Institute of Architecture
Assistant Professor of Art

Roy E. Kilgard
BA, Valdosta St University; PHD, University of Leicester
Associate Professor of the Practice in Astronomy; Associate Professor of the Practice, Integrative Sciences

Jin Hi Kim
BA, Seoul National University; MFA, Mills College
Director, Korean Drumming Ensemble; Assistant Professor of the Practice in Music, Part-Time

Kyungmi Kim
MA, Yonsei University; MPHIL, Yale University; MS, Yale University; PHD, Yale University
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Patricia Klecha-Porter
BS, Ithaca College; MS, Springfield College Ma

Adjunct Professor of Physical Education, Emerita

Ethan Kleinberg
BA, University of California, Berkeley; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Class of 1958 Distinguished Professor; Professor of Letters; Professor of History; Editor-in-Chief, History and Theory

Joseph L. Knee
BA, SUNY at Binghamton; PHD, SUNY at Stony Brook
Beach Professor of Chemistry, Emeritus

Katja P. Kolcio
MA, University of Georgia Athens; MA, Ohio State University; PHD, Ohio State University
Associate Professor of Dance; Associate Professor, Environmental Studies; Associate Professor, Education Studies; Associate Professor, Russian, East European, and Eurasian Studies

Natasha Korda
BA, Columbia University; PHD, Johns Hopkins University
Professor of English; Director, Center for the Humanities; Professor, Feminist, Gender, and Sexuality Studies

Tsampikos Kottos
BA, University of Crete; MS, University of Crete; PHD, University of Crete
Lauren B. Dachs Professor of Science and Society; Professor of Physics; Professor, Integrative Sciences; Professor, Mathematics

Hari Krishnan
BA, University of Manitoba; MFA, York University; PHD, Texas Womans University
Professor of Dance; Chair, Dance; Professor, Feminist, Gender, and Sexuality Studies

Daniel Krizanc
BS, University of Toronto; PHD, Harvard University
Edward Burr Van Vleck Professor of Computer Science; Professor of Computer Science; Professor, Environmental Studies; Professor, Integrative Sciences; Co-Coordinator, Informatics and Modeling

Alex Kruckman
PHD, University of California, Berkeley; SB, Brown University
Assistant Professor of Mathematics

Timothy C.W. Ku
BS, University of Rochester; MS, University of Michigan; PHD, University of Michigan
Associate Professor of Earth and Environmental Sciences; Associate Professor, Integrative Sciences

David J. Kuenzel
DIP, University of Tubingen; MA, University of Washington; PHD, University of Washington
Associate Professor of Economics

Katherine M. Kuenzli
BA, Yale University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Art History; Professor, German Studies

Ulrich Kuhl
PHD, Philipps Universitat Marburg
Visiting Scholar in Physics
Ronald J. Kuivila
BA, Wesleyan University; MFA, Mills College
Professor of Music; Chair, Music; Director, Electronic Music and Recording Studios

Matthew M. Kurtz
BA, Reed College; MA, Princeton University; PHD, Princeton University
Professor of Psychology; Chair, Psychology; Professor, Neuroscience and Behavior

Basak Kus
BA, Bogazici University; MA, SUNY at Stony Brook; PHD, University of California, Berkeley
Associate Professor of Government

Gale Lackey
BS, West Chester University; MED, West Chester University
Adjunct Professor of Physical Education, Emerita

Maya LaLiberté
Visiting Instructor in Dance

Jeffrey Owen Lamson
Visiting Instructor of History

Jennifer Shea Lane
BA, Amherst College; MS, Smith College
Adjunct Professor of Physical Education; Head Coach of Softball

Robert P. Lane
BA, Colgate University; PHD, California Institute Tech
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Salvatore LaRusso
BMU, Eastman School Of Music; MS, Fairfield University
Director, Wesleyan Wind Ensemble

Allison Lazur
Tuba Instructor

Constance Leidy
BS, Tulane University; PHD, Rice University
Associate Professor of Mathematics

Charles C. Lemert
BA, Miami University Middletown; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
John E. Andrus Professor of Social Theory, Emeritus

Jeffers Lennox
BA, University of Toronto; MA, Dalhousie University; PHD, Dalhousie University
Associate Professor of History

Leo A. Lensing
BA, University of Notre Dame; MA, Cornell University; MAA, Wesleyan University; PHD, Cornell University
Professor of Film Studies, Emeritus

Tiphaine Leservot
BA, University of Caen; MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill
Associate Professor of French; French Section Head; Associate Professor, Letters

Han Li
BS, Nankai University; PHD, Yale University
Associate Professor of Mathematics

Leping Li
PHD, SUNY at Stony Brook
Visiting Scholar in Chemistry

Dan Licata
BS, Brown University; PHD, Carnegie Mellon University
Associate Professor of Computer Science; Vice-Chair, Mathematics and Computer Science

Richard W. Lindquist
BS, Worcester Poly Institute; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University
Professor of Physics, Emeritus

James Lipton
BS, U Nebraska Lincoln; MSC, Cornell University; PHD, Cornell University
Professor of Computer Science; Professor, Integrative Sciences

Mengjun Liu
BA, Beijing Normal University; MA, Nanjing Normal University
Assistant Professor of the Practice in Chinese

Roseann Liu
BS, New York University; EDM, Columbia University Teachers; PHD, University of Pennsylvania
Assistant Professor of Education Studies

Tony Lombardozi
Jazz/Blues Guitar Instructor

Donald E. Long
BS, Springfield College Ma
Adjunct Professor of Physical Education, Emeritus

Marc Robert Longenecker
BA, Wesleyan University; MA, Wesleyan University
Associate Professor of the Practice in Film Studies

Valeria López Fadul
BA, Yale University; MA, Princeton University; PHD, Princeton University
Assistant Professor of History; Assistant Professor, Latin American Studies

Susan F. Lourie
BA, Temple University; MALS, Wesleyan University
Adjunct Professor of Dance, Emerita

Rachel D. Lowe
Visiting Scholar in Chemistry

Joyce O. Lowrie
BA, Baylor University; MAA, Wesleyan University; PHD, Yale University
Professor of Romance Languages and Literatures, Emerita

Chia-Yu Joy Lu
BFA, National Taiwan Normal University; MA, University of Sheffield; PHD, Wesleyan University
Director, Chinese Music Ensemble
The Faculty

Antonio J. Machado
MS, Central University of Venezuela; PHD, George Washington University
Professor in the College of the Environment

Randall M. MacLowry
BA, Wesleyan University
Assistant Professor of the Practice in Film Studies and Co-Director of the Wesleyan Documentary Project

Amy MacQueen
BA, Columbia University; PHD, Stanford University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Urip Sri Maeny
DIPL, Indonesian Conservatory of Mus
Retired Artist-in-Residence, Dance

Clark Maines
BA, Bucknell University; MA, Pennsylvania State University; MAA, Wesleyan University; PHD, Pennsylvania State University
Professor of Art History, Emeritus

Victoria Ursula Manfredi
BA, Smith College; MS, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Assistant Professor of Computer Science; Assistant Professor, Integrative Sciences

Alyx Mark
BA, Southern Illinois Univer; MA, George Washington University; PHD, George Washington University
Assistant Professor of Government

Peter A. Mark
BA, Harvard University; MA, Syracuse University; MAA, Wesleyan University; PHD, Yale University
Professor of Art History, Emeritus

Anne Martin
Chief Investment Officer; Adjunct Professor of Public Life

Douglas Arthur Martin
BA, University of Georgia Athens; MFA, The New School; PHD, CUNY The Graduate Center
Associate Professor of the Practice in Creative Writing; Assistant Director, Creative Writing; Associate Professor of the Practice, Feminist, Gender, and Sexuality Studies; Associate Professor of the Practice, English

Naho Maruta
MA, University of Wisconsin at Madison
Associate Professor of the Practice in East Asian Studies; Associate Professor of the Practice, Fries Center for Global Studies

Bruce A. Masters
BS, Georgetown University; MAA, Wesleyan University; PHD, University of Chicago
John E. Andrus Professor of History, Emeritus

Joana Emy Matesan
MA, Arizona State University; PHD, Syracuse University
Associate Professor of Government; Tutor, College of Social Studies; Coordinator, Middle Eastern Studies

Paula Matthusen
BM, University of Wisconsin at Madison; MA, New York University; PHD, New York University
Professor of Music

Alexis May
BA, Wesleyan University; MA, University British Columbia; PHD, University British Columbia
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Leo Mayo
BS, Central Connecticut State University; MED, American Intl College
Adjunct Associate Professor of Physical Education; Head Coach of Cross Country

Robin Mazzola
BFA, Paier College Of Art
Costume Shop Manager; Adjunct Assistant Professor of Theater

Elizabeth McAlister
BA, Vassar College; MA, Yale University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Professor of Religion; Professor, African American Studies; Professor, American Studies; Professor, Feminist, Gender, and Sexuality Studies

Sean McCann
BA, Georgetown University; PHD, CUNY The Graduate Center
Kenan Professor of the Humanities; Professor of English

Barbara Ellen McClintock
Visiting Instructor of Writing in the Shapiro Writing Center

James W. McGuire
BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Government; Professor, Latin American Studies

Jodi McKenna
BA, Brown University; MED, St. Lawrence University
Adjunct Professor of Physical Education; Head Coach of Women’s Ice Hockey

Rashida Z. Shaw McMahon
BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Associate Professor of English; Associate Professor, Theater; Associate Professor, African American Studies

Chelsie McPhilimy
BA, University of Wisconsin at Madison; MFA, Ohio State University
Assistant Professor of the Practice in Dance

Michael Meere
BA, Northwestern University; MA, University of Virginia; MA, Universite Lumiere Lyon 2; MA, Universite de Paris - Sorbonne; PHD, University of Virginia
Associate Professor of French; Associate Professor, Medieval Studies

Laverne Melón
BA, Middlebury College; MS, SUNY at Binghamton University; PHD, Purdue University W Lafyte
Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences; Assistant Professor, Feminist, Gender, and Sexuality Studies

Maaza Mengiste
BA, University of Michigan; MFA, New York University
Professor of English

**Eva Bergsten Meredith**
BA, Franklin Pierce College
Adjunct Professor of Physical Education; Head Coach of Women’s Soccer

**Henry Dilonga Meriki**
BS, University of Buea; MPH, University of Buea; MS, University of Buea; PHD, University of Buea
Visiting Assistant Professor of Molecular Biology and Biochemistry

**Priscilla Meyer**
BA, University of California, Berkeley; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University
Professor of Russian Language and Literature, Emerita

**Giovanni Miglianti**
BA, University of Udine; MPHIL, University of Cambridge; MPHIL, Yale University; PHD, Yale University
Visiting Assistant Professor of Italian

**Cecilia Miller**
BA, LeTourneau College; DPHIL, Oxford University; MPHIL, University of St Andrews
Professor of History; Tutor, College of Social Studies; Professor, Medieval Studies

**Kathleen (Kate) E Miller**
BA, Tufts University; MA, Yale University; PHD, Wesleyan University
Visiting Assistant Professor of Environmental Studies; Visiting Assistant Professor of Earth and Environmental Sciences

**Richard A. Miller**
BA, Oberlin College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Woodhouse/Sysco Professor of Economics, Emeritus; Woodhouse/Sysco Professor of Economics, Emeritus

**Elizabeth Milroy**
BA, Queens University; MA, Williams College; PHD, University of Pennsylvania
Professor of Art History, Emerita

**Jennifer Mitchel**
PHD, Brown University; SB, Massachusetts Institute of Technology
Assistant Professor of Biology; Assistant Professor, Integrative Sciences

**Ben Model**
BFA, New York University
Visiting Professor of Film Studies

**Daniel Moller**
MS, Louisiana Technical University; PHD, Louisiana Technical University
Assistant Professor of the Practice in Integrative Sciences

**Marichal B Monts**
BA, Wesleyan University
Conductor, Ebony Singers

**J. Donald Moon**
BA, University Minnesota Mpls; MA, University of California, Berkeley; PHD, University Minnesota Mpls
John E. Andrus Professor of Government, Emeritus; Ezra and Cecile Zilkha Professor in the College of Social Studies, Emeritus

**Steven T. Moore**
BA, University of South Carolina; PHD, University of Michigan
Assistant Professor of Government

**Edward C. Moran**
BS, Pennsylvania State University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
John Monroe Van Vleck Professor of Astronomy; Professor of Astronomy; Chair, Astronomy Department; Director, Graduate Studies; Director, Van Vleck Observatory; Professor, Integrative Sciences; Co-Coordinator, Planetary Science

**Jill G. Morawski**
BA, Mount Holyoke College; MA, Carleton University; MAA, Wesleyan University; PHD, Carleton University
Willbur Fisk Osborne Professor of Natural Science; Professor of Psychology; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies

**Thomas J. Morgan**
BA, Montana State University; BS, Montana State University; MAA, Wesleyan University; MSC, University of California, Berkeley; PHD, University of California, Berkeley
Foss Professor of Physics, Emeritus; Research Professor in Physics

**Ishita Mukerji**
AB, Bryn Mawr College; PHD, University of California, Berkeley
Fisk Professor of Natural Science; Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences; Professor, Environmental Studies; Coordinator, Health Studies; Co-Coordinator, Molecular Biophysics

**Kate Mullen**
BS, Central Connecticut State University; MA, Springfield College Ma; MED, Springfield College Ma
Senior Woman Administrator; Adjunct Professor of Physical Education; Head Coach of Women’s Basketball

**John Murillo**
BA, Howard University; MFA, New York University
Associate Professor of English; Associate Professor, African American Studies

**Michelle Aaron Murolo**
BS, Clarion University of Pennsylvania; PHD, Yale University
Professor of the Practice in Molecular Biology and Biochemistry

**Russell D. Murphy**
BA, ST Johns College; MA, Boston College; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Government, Emeritus

**Wendi Field Murray**
BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona
Adjunct Assistant Professor, Archaeology; Adjunct Assistant Professor of East Asian Studies; Archaeology Collections Manager

**Janice R. Naegele**
BA, Mount Holyoke College; PHD, Massachusetts Institute of Technology
Dean of the Natural Sciences and Mathematics; Professor of Biology; Emeritus
Faculty in Biology; Professor, Neuroscience and Behavior; Professor, Integrative Sciences

**Christian Hart Nakarado**
BA, Yale University; MAR, Yale University
Assistant Professor of Art
The Faculty

Jesse Nasta
BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of the Practice in African American Studies

Valerie L. Nazzaro
BA, University of Connecticut; MA, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut
Associate Professor of the Practice in Quantitative Analysis

Louise C. Neary
BA, Boston College; MA, Boston College; PHD, University of Illinois Urbana
Adjunct Professor of Spanish; Co-Chair, College of Education Studies; Adjunct Professor, Education Studies

Howard I. Needler
BA, Oxford University; BS, Yale University; MA, Oxford University; PHD, Columbia University
Professor of Letters, Emeritus

Andrea Negrete
BA, University of Washington; MED, University of Washington; PHD, University of Virginia
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

David Paul Nelson
BA, Kalamazoo College; MFA, California Institute of Arts; PHD, Wesleyan University
Adjunct Associate Professor of Music

Ellen Nerenberg
AB, Stanford University; PHD, University of Chicago
Hollis Professor of Romance Languages and Literatures; Professor of Italian

Markus Neumann
BA, University of Mannheim; MA, University of Mannheim; PHD, Pennsylvania State University
Postdoctoral Research Fellow, Wesleyan Media Project; Postdoctoral Research Fellow, Quantitative Analysis Center

Marguerite Nguyen
BA, Duke University; PHD, University of California, Berkeley
Associate Professor of English; Associate Professor, Environmental Studies; Associate Professor, East Asian Studies

Tammy Vo Nguyen
BFA, The Cooper Union; MFA, Yale University
Assistant Professor of Art

Thahn Nguyen
BA, University of Houston; DBA, Case Western Reserve Univ; LLM, University of Pennsylvania; MA, Yale Divinity School; MA, Brown University; MBA, Northwestern University; MPA, Columbia University
Visiting Assistant Professor of Economics

Ruth Nisse
BA, Columbia University; PHD, University of California, Berkeley
Professor of English; Professor, Medieval Studies

Brian Hale Northrop
BA, Middlebury College; PHD, University of California, Los Angeles
Professor of Chemistry; Chair, Chemistry; Professor, Integrative Sciences

Stewart E. Novick
BS, SUNY at Stony Brook; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of Chemistry; Emerita/us Faculty in Chemistry; Professor, Integrative Sciences

Laurie Nussdorfer
BA, Yale University; MA, Princeton University; MSC, London School of Economics and Political Science; PHD, Princeton University
William Armstrong Professor of History, Emerita; Professor of Letters, Emerita

Nkiruka Jane Nwafor
BA, University of Nigeria; MA, University of Ibadan; PHD, University of Nigeria
Visiting Scholar in Art History

Okechukwu Charles Nwafor
BA, University of Nigeria; MFA, Nnamdi Azikiwe University; PHD, University of Western Cape
Assistant Professor of Art History

Alison L. O’Neil
BS, Binghamton University; PHD, Montana State University
Assistant Professor of Chemistry; Assistant Professor, Neuroscience and Behavior; Assistant Professor, Integrative Sciences; Assistant Professor, Biology

Kristin Oberiano
BA, Occidental College; MA, Harvard University; PHD, Harvard University
Assistant Professor of History

Chigozie John Obioma
BA, Cyprus International University; MFA, University of Michigan
Distinguished Writer in Residence

Suzanne OConnell
BA, Oberlin College; MS, SUNY at Albany; PHD, Columbia University
Harold T. Stearns Professor of Earth Science; Professor of Earth and Environmental Sciences; Chair, Earth and Environmental Sciences; Professor, Integrative Sciences

Jesse Moses Ofgang
BA, Western Connecticut State Univ; MA, Royal Conservatoire of Scotland
Bagpipes Instructor

Pavel V Oleinikov
Assistant Professor of the Practice in Quantitative Analysis; Associate Director, QAC

Donald B. Oliver
BS, Brandeis University; MAA, Wesleyan University; PHD, Tufts University
Daniel Ayres Professor of Biology; Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Maria-Christina Oliveras
BA, Yale University; MFA, National Theatre Conservatory
Assistant Professor of Theater

Rich Olson
BA, Cornell University; PHD, Columbia University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Allison Diane Orr
BA, Wake Forest University; MFA, Mills College
Research Fellow of the College of the Environment

María Ospina
BA, Brown University; MA, Harvard University; PHD, Harvard University
Associate Professor of Spanish; Associate Professor, Latin American Studies

Rosemary Elizabeth Ostfeld
BA, Wesleyan University; MA, Wesleyan University; MPHIL, University of Cambridge; PHD, University of Cambridge
Assistant Professor of the Practice Environmental Studies

Ákos A. Östör
BA, University of Melbourne; MA, University of Melbourne; PHD, University of Chicago
Professor of Anthropology, Emeritus

Eiko Otake
BA, SUNY Empire State College
Visiting Artist-in-Residence, Dance

Marcela Oteíza
BFA, University of Chile; MFA, California Institute of Arts
Associate Professor of Dance; Chair, Theater; Associate Professor, Theater; Associate Professor, College of the Environment; Associate Professor, Latin American Studies

Federico Augusto Pacheco
BFA, Texas A&M University
Visiting Instructor in Art

Teresita Padilla-Benavides
BS, Escuela Nacional de Ciencias B; MS, Centro de Investigacion y Estu; PHD, Centro de Investigacion y Estu
Assistant Professor of Molecular Biology Biochemistry; Assistant Professor, Integrative Sciences

Paula Paige
BA, Mount Holyoke College; MA, Middlebury College
Adjunct Professor of Romance Languages and Literatures, Emerita

George Mathew Paily
MSC, Indian Institute of Technology; PHD, Pennsylvania State University
Assistant Professor of the Practice in Physics

Tyrone S. Palmer
BA, Brooklyn College; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of English

John T. Paolletti
BA, Yale University; MA, Yale University; MAA, Wesleyan University; PHD, Yale University
Professor of Art History, Emeritus

Emmanuel Paris-Bouvret
Director, Language Resources and Technology; Director of Language Resources and Technology; Coordinator, Less Commonly Taught Languages; Adjunct Instructor in Romance Languages and Literatures

Paula C. Park
BA, Rutgers, the State University; MA, University of Texas Austin; PHD, University of Texas Austin
Associate Professor of Spanish; Associate Professor, Latin American Studies

Richard Parkin
BA, University of California, Berkeley; MFA, University of California, Los Angeles
Associate Professor of the Practice in Film Studies

Christopher Parlow
BA, Grinnell College; MA, University of Iowa; PHD, Duke University
Robert Rich Professor of Latin; Professor of Classical Studies; Chair, Archaeology; Professor, Archaeology; Professor, Art History

Pedro Pascual
Assistant Professor of the Practice in American Sign Language

Andrea L. Patalano
BA, Brown University; MA, University of Michigan; PHD, University of Michigan
Professor of Psychology; Professor, Neuroscience and Behavior

Rehana Patel
BA, Cambridge University; MA, Cambridge University; MS, University South Carolina; PHD, Wesleyan University
Visiting Associate Professor of Mathematics

Courtney J. Patterson-Faye
BA, University of Pennsylvania; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of Sociology

Peter C. Patton
BA, Franklin & Marshall College; MAA, Wesleyan University; MS, Colorado State University; PHD, University of Texas Austin
Alan M. Dachs Professor of Science, Emeritus

Mary Paul
BFA, University of Connecticut; MALS, Wesleyan University
Assistant Professor of the Practice in Theater

Katie Pearl
BA, University of Washington; MFA, Brown University
Assistant Professor of Theater

Justin Craig Peck
BA, Brandeis University; MA, University of Virginia; PHD, University of Virginia
Assistant Professor of Government

Areins Demar Pelayo
BA, University South Florida; MA, University of Illinois at Chicago; PHD, University of Illinois at Chicago
Visiting Assistant Professor of Philosophy

Gayle Pemberton
BA, University of Michigan; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of English, Emerita; Professor of African American Studies, Emerita

Michael James Perez
BA, University Texas Arlington; PHD, Texas A&M University
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Ana M. Perez-Girones
BA, University of Seville; MA, Cornell University
Adjunct Professor of Spanish; Spanish Section Head; Adjunct Professor, Education Studies

Krista Perks

BA, Wesleyan University; MA, Wesleyan University; PHD, University of California San D
Visiting Assistant Professor, Neuroscience and Behavior; Visiting Assistant Professor of Biology

Michelle Louise Personick
BA, Middlebury College; PHD, Northwestern University
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

George A. Petersson
BS, City College; PHD, California Institute Tech
Fisk Professor of Natural Science, Emeritus

Joel Pfister
BA, Columbia University; MA, University of Sussex; MA, University College, University of London; PHD, Yale University
Olin Professor of English; Professor of American Studies; Professor of English; Professor, American Studies

Ethan Douthart Philbrick
MA, New York University; PHD, New York University
Visiting Assistant Professor of Music

William R. Pinch
BA, University of Virginia; MA, University of Virginia; PHD, University of Virginia
Professor of History; Associate Editor, History and Theory; Professor, Environmental Studies

Victoria Pitts-Taylor
BA, Ohio University; PHD, Brandeis University
Professor of Feminist, Gender, and Sexuality Studies; Chair, Feminist, Gender, and Sexuality Studies; Professor, Science in Society; Professor, Sociology

Ulrich Plass
MA, University of Michigan; PHD, New York University
Professor of German Studies; Chair, German Studies; Professor, Letters

Juan Esteban Plaza
PhD, Stanford University
Andrew W. Mellon Postdoctoral Fellow

Scott L. Plous
BA, University Minnesota Mpls; PHD, Stanford University
Professor of Psychology

Catherine Poisson
BA, Sorbonne; MA, New York University; PHD, New York University
Associate Professor of French; Chair, Romance Languages and Literatures; Associate Professor, Feminist, Gender, and Sexuality Studies

David Pollack
MA, Harvard University; PHD, Harvard University; SB, University of Chicago
Associate Professor of Mathematics; Chair, Mathematics and Computer Science

Philip Pomper
BA, University of Chicago; MA, University of Chicago; MAA, Wesleyan University; PHD, University of Chicago
William Armstrong Professor of History, Emeritus

Gabrielle Piedad Ponce-Hegenauer
BA, University of Illinois Urbana; MFA, Johns Hopkins University; PHD, Johns Hopkins University
Associate Professor of Letters; Associate Professor, Feminist, Gender, and Sexuality Studies

Stéphanie Ponsavady
MA, University of Provence; MA, New York University; MPHIL, New York University; PHD, New York University
Associate Professor of French

Tyler Porter
BA, Kent State University; MA, Cornell University; PHD, Cornell University
Visiting Assistant Professor of Economics

Nadya Potemkina
DMA, The University of Memphis; MM, University Nthrn Iowa; MM, Ball State University
Adjunct Associate Professor of Music; Director of Private Lessons; Adjunct Associate Professor, Russian, East European, and Eurasian Studies

Christopher J. Potter
BA, University of Connecticut; MA, University of Connecticut
Adjunct Professor of Physical Education; Head Coach of Men’s Ice Hockey

Helen Mills Poulos
BS, Pepperdine University; MPhil, Yale University; MS, Pennsylvania State University; PHD, Yale University
Adjunct Assistant Professor of Environmental Studies; Adjunct Assistant Professor, Earth and Environmental Sciences

Joya Powell
BA, Columbia University; MA, New York University
Assistant Professor of the Practice in Dance; Assistant Professor of the Practice, African American Studies

Joyce Ann Powzyk
BS, Principia College; PHD, Duke University
Associate Professor of the Practice in Biology

Rex F. Pratt
BS, University of Melbourne; MAA, Wesleyan University; PHD, University of Melbourne
Beach Professor of Chemistry, Emeritus

Wallace C. Pringle
BA, Middlebury College; MAA, Wesleyan University; PHD, Massachusetts Institute of Technology
Professor of Chemistry, Emeritus

Liana Pshevorska
BA, University of Arizona; MA, University of Arizona; PHD, Princeton University
Associate Professor of the Practice in French; Associate Professor of the Practice, Fries Center for Global Studies

Justine Quijada
BA, University of Chicago; MA, Columbia University; PHD, University of Chicago
Associate Professor of Religion; Chair, Religion; Associate Professor, Russian, East European, and Eurasian Studies; Associate Professor, College of the Environment

Andrew H Quintman
BA, Hampshire College; MA, University of Michigan; PHD, University of Michigan
Associate Professor of Religion; Associate Professor, East Asian Studies

John G. Raba
BS, University of New Haven; MED, University of New Haven
Adjunct Professor of Physical Education; Head Coach of Men’s Lacrosse

Hari Ramesh
BA, Williams College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of Government

Felipe A. Ramirez
BS, Colorado St University; PHD, University of Michigan
Associate Professor of Mathematics

Alba Yanina Ramos
PHD, National University of Cordoba
Visiting Scholar in Physics

Julia A. Randall
BFA, Washington University; MFA, Rutgers University
Associate Professor of Art

Christopher Rasmussen
BA, University of Virginia; MS, University of Virginia; PHD, University of Arizona
Associate Professor of Mathematics

Wendy Rayack
BA, Oberlin College; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Associate Professor of Economics; Tutor, College of Social Studies

Seth Redfield
BM, New Eng Consv Music; BS, Tufts University; MS, University of Colorado Boulder; PHD, University of Colorado Boulder
Professor of Astronomy; Director, College of Integrative Sciences; Professor, Integrative Sciences; Co-Coordinator, Planetary Science

Joseph P. Reilly
BA, Trinity College; MBA, University of Rhode Island
Adjunct Professor of Physical Education; Head Coach of Men’s Basketball

Phillip G. Resor
AB, Dartmouth College; MS, University of Wyoming; PHD, Stanford University
Professor of Earth and Environmental Sciences; Professor, Education Studies

Giselle Padilla Reyes
BA, Wesleyan University; MA, Wesleyan University
Visiting Instructor of Chemistry

Julie Ann Ribchinsky
Cello Instructor

Michael D. Rice
BS, Western Mich University; MS, Western Mich University; PHD, Wesleyan University
Professor of Computer Science, Emeritus

Christopher T. Richards
Visiting Assistant Professor of French

Jeff Rider
BA, Yale University; MA, University of Chicago; PHD, University of Chicago
Professor of French; Professor, Medieval Studies

Robyn E. Ridley
BS, Columbia University; MS, University of California, San Diego; PHD, University of California, San Diego
Assistant Professor of the Practice in Integrative Sciences

Andrea Roberts
BS, Cornell University; MS, Polytechnic University; PHD, Wesleyan University
Professor of the Practice in Chemistry

Michael J. Roberts
BA, Cambridge University; MA, Cambridge University; MA, University of Illinois Urbana; MAA, Wesleyan University; PHD, University of Illinois Urbana
Robert Rich Professor of Latin, Emeritus

Sonia Faith Roberts
BA, Autonoma University of Madrid; MA, Autonoma University of Madrid; PHD, University of Amsterdam
Professor of Psychology; Professor, Feminist, Gender, and Sexuality Studies

Robert J. Rollefson
BA, University of Wisconsin at Madison; MAA, Wesleyan University; PHD, Cornell University
Professor of Physics, Emeritus

Jennifer S. Rose
BA, University of Rhode Island; MA, University of Rhode Island; PHD, University of Rhode Island
Professor of the Practice in the Center for Pedagogical Innovation; Director, Institutional Review Board; Director, Center for Pedagogical Innovation; Professor of the Practice, Education Studies; Professor of the Practice, Quantitative Analysis Center

Phyllis Rose
BA, Radcliffe College; MA, Yale University; MAA, Wesleyan University; PHD, Harvard University
Professor of English, Emerita

Robert Rose
BA, Lamar University; MA, Louisiana State University; PHD, Indiana University Bloomington
Postdoctoral Fellow in Computer Science

Rob Rosenthal
BA, Rutgers University; MA, University Calif Santa Bar; PHD, University of California, Santa Barbara
John E. Andrus Professor of Sociology, Emeritus

Michael S. Roth
BA, Wesleyan University; MA, Princeton University; PHD, Princeton University
President; University Professor

Joseph T. Rouse
BA, Oberlin College; MA, Northwestern University; MAA, Wesleyan University; PHD, Northwestern University
Hedding Professor of Moral Science; Professor of Science in Society; Professor of Philosophy; Chair, Science in Society; Professor, Environmental Studies

Dana Royer
BA, University of Pennsylvania; PHD, Yale University
Professor of Earth and Environmental Sciences; Professor, Environmental Studies

Mary-Jane Victoria Rubenstein
BA, Williams College; MA, Columbia University; MPHIL, Cambridge University; MPHIL, Columbia University; PHD, Columbia University
Professor of Religion; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Professor, Philosophy

Mirko Rucnov
BA, University Nevada Las Vegas; MFA, Columbia University
Assistant Professor of the Practice in Film Studies

Sasha Rudensky
BA, Wesleyan University; MFA, Yale University
Associate Professor of Art; Program Director, Studio Art; Associate Professor, Russian, East European, and Eurasian Studies

Ashraf H.A. Rushdy
BA, University of Alberta; MA, University of Alberta; PHD, Cambridge University
Benjamin Waite Professor of the English Language; Professor of African American Studies; Professor of English; Chair, African American Studies; Academic Secretary; Professor, Feminist, Gender, and Sexuality Studies

Donald M. Russell
Professor of Physical Education, Emeritus

Joseph Russo
BA, SUNY at Albany; MA, Brooklyn College; MPHIL, Goldsmith’s, University of London; PHD, University of Texas Austin
Visiting Assistant Professor of Anthropology

Matthew Francis Russo
Trombone Instructor

Irina M. Russu
BS, University of Bucharest; MAA, Wesleyan University; PHD, University of Pittsburgh
E. B. Nye Professor of Chemistry, Emerita

Peter Rutland
BA, Oxford University; DPHIL, York University
Colin and Nancy Campbell Professor in Global Issues and Democratic Thought; Professor of Government; Co-Chair, College of Social Studies; Professor, Russian, East European, and Eurasian Studies; Tutor, College of Social Studies

S

Iddrisu Saaka
DIPL, University of Ghana; MFA, University of California, Los Angeles
Assistant Professor of Dance

Roberto Saba
BA, University of Sao Paulo; MA, University of Sao Paulo; PHD, University of Pennsylvania
Assistant Professor of American Studies; Assistant Professor, History

Lily Leopold Saint
BA, University of Pennsylvania; PHD, CUNY The Graduate Center
Associate Professor of English; Coordinator, African Studies

Alejandro Salinas-Albrecht
BA, California State University, Northridge; MFA, University of California, Los Angeles
Assistant Professor of the Practice in Film Studies

Yoshiko Yokochi Samuel
BA, Aichi Prefectural Women’s Coll; MA, Michigan State University; MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Professor of Asian Languages and Literatures, Emerita

Edwin Sanchez
CER, Yale University
Assistant Professor of the Practice in Theater

Charles A. Sanislow
BS, Northern Michigan Univ; MA, Ball State University; PHD, Duke University
Professor of Psychology; Chair, Neuroscience and Behavior; Professor, Neuroscience and Behavior

Amrita Sanyal
BS, University of Calcutta; MA, Jadavpur University; MS, Purdue University
Lafayette
Visiting Assistant Professor of Economics

Hirsh Sawhney
BA, University of Michigan; MFA, Rutgers University
Assistant Professor of English; Director, Creative Writing

Ronald Schatz
BA, University of Wisconsin at Madison; MAA, Wesleyan University; MAT, Harvard University; PHD, University of Pittsburgh
Professor of History, Emeritus

Karl E. Scheibe
BS, Trinity College; MAA, Wesleyan University; PHD, University of California, Berkeley
Professor of Psychology, Emeritus

Jeffrey Schiff
BA, Brown University; MFA, University of Massachusetts Amherst
Professor of Art

Paul Schwaber
BA, Wesleyan University; MA, University of California, Berkeley; PHD, Columbia University
Professor of Letters, Emeritus

Vera Schwarcz
BA, Vassar College; MA, Yale University; MAA, Wesleyan University; PHD, Stanford University
Mansfield Freeman Professor of East Asian Studies, Emerita

Nancy L. Schwartz
BA, Oberlin College; MAA, Wesleyan University; PHD, Yale University
Professor of Government, Emerita; Professor of Government, Emerita

Anthony O. Scott
BA, Harvard University; MA, Johns Hopkins University
Distinguished Professor of Film Criticism

Stanley A. Scott
Banjo/Mandolin/North Indian Vocal/Guitar Instructor

Philip H. Scowcroft
BA, Harvard University; MA, Cornell University; PHD, Cornell University
Edward Burr Van Vleck Professor of Mathematics, Emeritus

John G. Seamon
BS, Columbia University; PHD, University of Massachusetts Amherst
Professor of Psychology, Emeritus

Damion Searls
AB, Harvard University; PHD, University of California, Berkeley
Distinguished Writer in Residence

Nathan A Seifert
BA, Amherst College; PHD, University of Virginia
Visiting Scholar in Chemistry

Olga Sendra Ferrer
BA, Universitat Autonoma de Barcelona; MA, North Carolina State University; MA, Princeton University; PHD, Princeton University
Associate Professor of Spanish

Petra Sertic
BA, Metropolitan State College; MA, University of Denver
Teaching Fellow

Megan Sesma
Harp Instructor

Guillermo Severiche
BA, Universidad Nacional de Cuyo; MA, Louisiana State University; MFA, New York University; PHD, Louisiana State University
Visiting Associate Professor of Spanish and Creative Writing

Francois Seyler
Assistant Professor of Economics

Anu (Aradhana) Sharma
BA, Eugene Lang College; MA, Columbia University; MA, Stanford University; PHD, Stanford University
Associate Professor of Anthropology; Associate Professor, Feminist, Gender, and Sexuality Studies

Malvika Sharma
PHD, Jawaharlal Nehru University
Visiting Scholar in Religion

Avner Shavit
PHD, Sorbonne Nouvelle University Paris 3
Silverberg Scholar in Residence

Gary Shaw
BA, McGill University; DPHIL, Oxford University
Professor of History; Associate Editor, History and Theory; Professor, Medieval Studies

Damien Francis Sheehan-Connor
BA, Amherst College; MD, Tufts University; PHD, University Calif Santa Bar
Associate Professor of Economics

Sadia Quraeshi Shepard
BA, Wesleyan University; MA, Stanford University; MFA, Hunter College
Assistant Professor of Film Studies

Meng-ju Renee Sher
BA, Wesleyan University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Physics; Assistant Professor, Integrative Sciences; Assistant Professor, Environmental Studies

Sanford Shieh
AB, Cornell University; BA, Cornell University; BA, Oxford University; PHD, Harvard University
Professor of Philosophy

Keiji Shinohara
Artist-in-Residence, Art; Artist-in-Residence, East Asian Studies

Cathy Shufro
AB, Brown University
Visiting Instructor of Public Policy

Anna Shusterman
PHD, Harvard University; SB, Brown University
Professor of Psychology; Co-Chair, College of Education Studies; Professor, Education Studies

Lauren Silber
BA, University of Connecticut; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Assistant Professor of the Practice in Academic Writing; Assistant Director of Academic Writing; Assistant Professor of the Practice, Feminist, Gender, and Sexuality Studies; Assistant Professor of the Practice, Education Studies; Assistant Professor of the Practice, American Studies; Assistant Professor of the Practice, English

Yaya Simakov
BA, Connecticut College; MFA, Temple University
Visiting Assistant Professor of Film Studies

Fred Simmons
Jazz Piano Instructor

Zaira Simone-Thompson
BA, The New School; MA, New York University; PHD, CUNY The Graduate Center
Assistant Professor of African American Studies; Mellon Postdoctoral Fellow in African American Studies

Michael Singer
BS, University Southern Calif; PHD, University of Arizona
Professor of Biology; Chair, Biology; Professor, Environmental Studies

Harry M. Sinnamon
BA, La Salle University; MAA, Wesleyan University; MS, Villanova University; PHD, University of Rochester
Professor of Psychology, Emeritus

Joseph M. Siry
BA, Princeton University; MAA, Wesleyan University; MAR, University of Pennsylvania; PHD, Massachusetts Institute of Technology
Kenan Professor of the Humanities; Professor of Art History; Co-Coordinator, Urban Studies

Gilbert L. Skillman
BA, University Kentucky Lexngt; MA, University of Michigan; PHD, University of Michigan
Professor of Economics; Tutor, College of Social Studies

Joseph P. Slaughter
BS, U.S. Naval Academy; MA, University of Maryland College Park; MA, U.S. Naval War College; PHD, University of Maryland College Park
Assistant Professor of the Practice in Religion; Associate Director, Center for the Study of Guns and Society; Assistant Professor of the Practice, History

Mark Slobin
BA, University of Michigan; MA, University of Michigan; PHD, University of Michigan
Winslow-Kaplan Professor of Music, Emeritus

Richard S. Slotkin
BA, Brooklyn College; MAA, Wesleyan University; PHD, Brown University
Olin Professor of English, Emeritus; Professor of English, Emeritus

Michael James Slowik
BA, Wesleyan University; MA, University of Chicago; MA, University of Iowa; PHD, University of Iowa
Associate Professor of Film Studies

Colin A. Smith
BA, New York University; PHD, University of California, San Francisco
Assistant Professor of Chemistry; Assistant Professor, Molecular Biology and Biochemistry; Assistant Professor, Integrative Sciences

Courtney Weiss Smith
BA, University Of Dayton; MA, Washington University; PHD, Washington University
Associate Professor of English; Faculty Director of Continuing Studies Curriculum; Associate Professor, Science in Society

Gay Smith
BA, University of Hawaii; MA, Wesleyan University; PHD, University of California, Los Angeles
Professor of Theater, Emerita

Victoria Smolkin
BA, Sarah Lawrence College; PHD, University of California, Berkeley
Associate Professor of History; Associate Professor, Russian, Eastern European, and Eurasian Studies; Tutor, College of Social Studies

Daniel Smyth
BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago
Assistant Professor of Letters; Assistant Professor, Philosophy; Assistant Professor, German Studies

David F. Snyder
BS, St. Lawrence University
Adjunct Professor of Physical Education, Emeritus

Peter Gordon Solomon
BS, North Carolina State University; MA, University of Connecticut
Emerita/us Faculty in Physical Education; Adjunct Professor of Physical Education

Ben Somera
BA, University Southern Calif
Adjunct Professor of Physical Education; Head Coach of Volleyball

Nancy Somera
BA, University Southern Calif; MS, University Southern Calif
Visiting Assistant Professor of Physical Education

Teresa Speciale
BA, Boston University; MA, George Washington University; PHD, University of Wisconsin at Madison
Visiting Assistant Professor of Education Studies

Elise Springer
BA, Wesleyan University; MA, University of Connecticut; PHD, University of Connecticut
Associate Professor of Philosophy; Associate Professor, Feminist, Gender, and Sexuality Studies

Nicole Lynn Stanton
BA, Antioch College; MFA, Ohio State University
Provost and Senior Vice President for Academic Affairs; Professor of Dance; Professor, African American Studies; Professor, Environmental Studies

Emily R. Stark
BA, Pomona College; MA, Tufts University; PHD, Tufts University
Assistant Professor of Mathematics

Francis W. Starr
BS, Carnegie Mellon University; MS, Boston University; PHD, Boston University
Foss Professor of Physics; Professor of Physics; Chair, Physics; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Director, Integrated Design, Engineering and Applied Science

Robert S. Steele
BA, Whitman College; MA, Wesleyan University; PHD, Harvard University
Professor of Psychology, Emeritus

Elizabeth Ann Stein
AB, University of North Carolina at Chapel Hill; MA, University of California, Los Angeles; MS, Northwestern University; PHD, University of California, Los Angeles
Visiting Assistant Professor of Government

Daniel Steinmetz-Jenkins
BA, Concordia College Or; MA, Reed College; PHD, Columbia University
Assistant Professor in the College of Social Studies; Assistant Professor, History

Steven E. Stemler
BS, University of Washington; MED, Boston College; PHD, Boston College
Professor of Psychology; Co-Chair, College of Education Studies; Professor, Education Studies

Philip E. Stern
BA, Wesleyan University; JD, New York Law School
Visiting Assistant Professor of Education Studies

Brian A. Stewart
BS, Stanford University; PHD, Massachusetts Institute of Technology
Professor of Physics; Professor, Environmental Studies; Professor, Integrative Sciences

William W. Stowe
BA, Princeton University; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University
Benjamin Waite Professor of the English Language, Emeritus

Tracy Heather Strain
AB, Wellesley College; EDM, Harvard University
Corwin-Fuller Professor of Film Studies; Associate Professor of Film Studies and Co-Director of the Wesleyan Documentary Project; Associate Director, College of Film and the Moving Image

Grace Anne Sullivan
BS, Buena Vista College; MA, University of Nebraska - Lincoln; PHD, University of Nebraska - Lincoln
Visiting Assistant Professor, Neuroscience and Behavior; Visiting Assistant Professor of Psychology

Sonia Sultan
BA, Princeton University; MA, Harvard University; PHD, Harvard University
Professor of Biology; Professor, Environmental Studies

Prof. Sumarsam
BA, Akademi Seni Karavitan; MA, Wesleyan University; PHD, Cornell University
Winslow-Kaplan Professor of Music; Professor of Music

Charlie Suriyakham
Clarinet Instructor

Andrew Szegedy-Maszak
Jane A. Seney Professor of Greek; Professor of Classical Studies; Chair, Classical Studies; Professor, Environmental Studies

T

Ying Jia Tan
BA, University of California, Berkeley; MA, Stanford University; MPHIL, Yale University; PHD, Yale University
Associate Professor of History; Associate Professor, East Asian Studies

Fumi Tanakadate
BA, Wesleyan University; MA, Manhattan School Music
Visiting Instructor in Music

Amy Cynthia Tang
BA, Harvard University; PHD, Stanford University
Douglas J. and Midge Bowen Bennet Associate Professor of English; Associate Professor of English; Associate Professor, American Studies

Erika A. Taylor
BS, University of Michigan; PHD, University of Illinois Urbana
Associate Professor of Chemistry; Faculty Director, McNair Program; Associate Professor, Environmental Studies; Associate Professor, Integrative Sciences

Tula Telfair
BFA, Moore College Of Art; MFA, Syracuse University
Professor of Art; Chair, Art and Art History; Professor, Environmental Studies

Kate TenEyck
BFA, Rhode Island School of Design; MFA, University of Hartford
Art Studio Technician; Adjunct Assistant Professor of Art

David Leipziger Teva
Adjunct Instructor of Public Policy; Director of Religious and Spiritual Life and University Jewish Chaplain

Mitali Thakor
BA, Stanford University; PHD, Massachusetts Institute of Technology
Assistant Professor of Science in Society; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, Anthropology

Kelly M. Thayer
BA, Regis College; PHD, Wesleyan University
Associate Professor of the Practice in Integrative Sciences

Ellen Thomas
BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
Smith Curator of Paleontology of the Joe Webb Peoples Museum of Natural History; Harold T. Stearns Professor of Integrative Sciences, Emerita

Jeremy Tiang
BA, University College Oxford; MA, Kings College London; MA, University of the Arts London
Teaching Fellow

Meltem Toksoz
BA, Ankara University; MA, University of Virginia; PHD, SUNY at Binghamton University
Visiting Associate Professor of History

Khachig Tölöyan
BA, Harvard University; MA, University of Rhode Island; MAA, Wesleyan University; PHD, Brown University
Professor of English and Letters, Emeritus

Damon Austin Tomlin
BE, Vanderbilt University; PHD, Baylor College of Medicine
Visiting Assistant Professor of Psychology

Jesse Wayne Torgerson
BA, Biola University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Associate Professor of Letters; Associate Professor, Medieval Studies; Associate Professor, History

Edward Torres
BA, Roosevelt University
Assistant Professor of the Practice in Theater

Elizabeth G. Traube
BA, Radcliffe College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of Anthropology; Chair, Anthropology; Professor, Feminist, Gender, and Sexuality Studies

Helen B. Treloar
BS, University of Melbourne; PHD, University of Melbourne
Associate Professor of the Practice in Neuroscience and Behavior

William L. Trousdale
Associate Professor of Physics, Emeritus

Yvonne Troxler
Piano Instructor

Min-Feng Tu
BS, National Tsing Hua University; MS, California Institute Tech; PHD, California Institute Tech
Assistant Professor of the Practice in Physics

Jennifer Tucker
BA, Stanford University; MPHIL, Cambridge University; PHD, Johns Hopkins University
Associate Professor of History; Director, Center for the Study of Guns and Society; Associate Professor, Environmental Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science in Society; Tutor, College of Social Studies

Alfred Turco
BA, Brown University; MA, Harvard University; PHD, Harvard University
Professor of English, Emeritus

Laura Ann Twagira
BA, Wellesley College; MA, Sarah Lawrence College; PHD, Rutgers University
Associate Professor of History; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, Science in Society

Patrick Tynan
BS, University of Massachusetts Amherst
Adjunct Professor of Physical Education; Head Coach of Women's Crew

Roman Utkin
MA, Kazan State University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of Russian, East European, and Eurasian Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies

Nikos T Valance
BA, Hunter College; JD, Fordham University; LLM, University of Arizona; MA, New School for Social Research
Visiting Assistant Professor of Economics

Alexander David Van Abel
BA, University of Wisconsin-Milwaukee; BFA, University of Wisconsin-Milwaukee; MS, University of Wisconsin-Milwaukee
Teaching Fellow

Libby Van Cleve
Oboe Instructor

Lauren Elaine van Haften-Schick
BA, Hampshire College; MA, Cornell University; PHD, Cornell University
Andrew W. Mellon Postdoctoral Fellow

Johan C. Varekamp
BS, University of Utrecht; MS, University of Utrecht; PHD, University of Utrecht
Smith Curator of Mineralogy and Petrology of the Joe Webb Peoples Museum of Natural History; Harold T. Stearns Professor of Earth Science, Emeritus

Muhammad Velji
BA, University of Toronto; MA, Carleton College; PHD, McGill University
Visiting Assistant Professor of Philosophy

Eirene Visvardi
BA, University of Crete; MPHIL, Cambridge University; PHD, Stanford University
Associate Professor of Classical Studies

Danielle Vogel
BA, Dowling College; MA, Naropa University; PHD, University of Denver
Associate Professor of English, Creative Writing

Greg A. Voth
BS, Wheaton College; MS, Cornell University; PHD, Cornell University
Professor of Physics; Professor, Integrative Sciences

Kevin Vrevich
BA, University of Wisconsin at Madison; MA, SUNY at Binghamton University; PHD, Ohio State University
Visiting Assistant Professor of History

John Kiarie Wa’Njogu
BED, Kenyatta University; MA, Ohio State University; PHD, Ohio State University
Visiting Professor of African Languages

Phillip B. Wagoner
BA, Kenyon College; PHD, University of Wisconsin at Madison
Professor of Art History; Professor, Archaeology

Peter Waite
BFA, Hartford Art School; MFA, School Art Institute Chgo
Visiting Assistant Professor in Liberal Studies

Tanner Ethan Walker
BA, University Calif Santa Crz; MA, Yale Divinity School; PHD, Brown University
Visiting Assistant Professor of Religion

Ao Wang
BA, Beijing University; MA, Washington University; PHD, Yale University
Associate Professor of East Asian Studies

Sofia Raquel Warren
BA, Wesleyan University
Visiting Writer in the Shapiro Writing Center

Marvin D. Warshaw
Viola Instructor

Henry Washington, Jr.
BA, Duke University; MA, Stanford University; PHD, Stanford University
Assistant Professor of Feminist, Gender, and Sexuality Studies

Takeshi Watanabe
BA, Yale University; PHD, Yale University
Associate Professor of East Asian Studies; Chair, College of East Asian Studies

Clifton Nathaniel Watson
BA, University of Connecticut; MA, North Carolina Central Univ; PHD, Fordham University
Director, Jewett Center for Community Partnerships; Adjunct Assistant Professor of Public Policy

Christopher S. Weaver
BS, Hobart and William Smith Colleges; CAS, Wesleyan University; MALS, Wesleyan University; SM, Massachusetts Institute of Technology
Distinguished Professor of Computational Media in the College of Integrative Sciences

Kari Weil
BA, Case Western Reserve Univ; MFA, University of Connecticut
Retired Artist-in-Residence, Theater

Stephanie Kuduk Weiner
BA, University Minnesota Mpls; PHD, Stanford University
Professor of English; Director, Academic Writing; Coordinator, Writing Certificate

Michael P. Weir
BS, University of Sussex; PHD, University of Pennsylvania
Professor of Biology; Professor, Integrative Sciences; Co-Coordinator, Informatics and Modeling

Matthew Weise
BS, University of Wisconsin-Milwaukee; MS, Massachusetts Institute of Technology
Visiting Artist-in-Residence in Film Studies

Charles August Weisenberger
CAS, University of Massachusetts Amherst; MA, University of Massachusetts Amherst; PHD, University of Massachusetts Amherst
Mellon Postdoctoral Fellow in Public History

Joseph Weiss
Margot Weiss
BA, University of Chicago; MA, Duke University; PHD, Duke University
Associate Professor of Anthropology; Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Coordinator, Queer Studies

Ruth Striegel Weissman
DIP, University of Tubingen; MAA, Wesleyan University; PHD, University of South Carolina
Walter Crowell University Professor of Social Sciences, Emerita

Sarah Wellons
AB, Princeton University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Astronomy; Assistant Professor, Integrative Sciences

Arthur S. Wensinger
MAA, Wesleyan University
Marcus L. Taft Professor of German Language and Literature and Professor of the Humanities, Emeritus

T. David Westmoreland
BS, Massachusetts Institute of Technology; PHD, University of North Carolina at Chapel Hill
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

Michael F. Whalen
BA, Wesleyan University; MS, Springfield College Ma
Frank V. Sica Director of Athletics and Chair, Physical Education; Adjunct Professor of Physical Education

Geoffrey H. Wheeler
BA, Dartmouth College
Adjunct Professor of Physical Education; Head Coach of Men’s Soccer

Duffield White
BA, Wesleyan University; PHD, University of Michigan
Associate Professor of Russian Language and Literature, Emeritus

Jennifer White-Jackson
BS, Gallaudet University
Visiting Instructor in American Sign Language

Ellen B. Widmer
BA, Wellesley College; MA, Tufts University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
Professor of Asian Languages and Literatures, Emerita

Sarah E. Wiliarty
BA, Harvard University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Associate Professor of Government; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, German Studies

Kim Williams
BA, C.W. Post Campus, LIU
Adjunct Professor of Physical Education; Head Coach of Women’s Lacrosse

Janice D. Willis
BA, Cornell University; MA, Columbia University; PHD, Columbia University
Professor of Religion, Emerita

Jon C. Wilson
Head Coach of Women’s Golf; Head Coach of Men’s and Women’s Golf

Bryan Winston
MA, St Louis University; PHD, St Louis University
Mellon Postdoctoral Fellow in Digital and Visual Storytelling

Krishna R. Winston
BA, Smith College; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University
Marcus L. Taft Professor of German Language and Literature, Emerita; Director, Susan B. and William K. Wasch Center for Retired Faculty; Professor, College of the Environment, Emerita; Co-Director, Wasch Center Seminars

Robert Wintsch
BA, Beloit College; PHD, Brown University
Visiting Researcher in Earth and Environmental Sciences

Roy H. Wiseman
Bass Instructor

Seren S. Witzke
BA, Mcmaster University; MA, Mcmaster University; PHD, University of North Carolina at Chapel Hill
Visiting Assistant Professor of Classical Studies

Pippin Wolfe
BA, Brown University; BS, Brown University; PHD, University of Massachusetts Amherst
Postdoctoral Fellow in Computer Science

Carol S. Wood
AB, Randolph Macon W College; MAA, Wesleyan University; PHD, Yale University
Edward Burr Van Vleck Professor of Mathematics, Emerita

Antonina Griecci Woodsum
BA, University of Massachusetts Amherst; MS, University of Massachusetts Amherst; PHD, Columbia University
Assistant Professor of American Studies

Mark A. Woodworth
BA, Wesleyan University; MALS, Wesleyan University
Adjunct Professor of Physical Education; Head Coach of Baseball

Jielu Yao
BS, Fudan University; MSC, National University of Singapore; PHD, University of Iowa
Postdoctoral Research Fellow, Wesleyan Media Project; Postdoctoral Research Fellow, Quantitative Analysis Center

Jeffrey Samuel Reisman Yelton
BS, University of Florida; PHD, Pennsylvania State University
Van Vleck Postdoctoral Fellow in Mathematics

Lauren Murphy Yeoman
BA, Tufts University; MFA, Columbia University
Assistant Professor of Theater

Gary W. Yohe
BA, University of Pennsylvania; MA, SUNY at Stony Brook; MPHIL, Yale University; PHD, Yale University
The Faculty

Huffington Foundation Professor of Economics and Environmental Studies, Emeritus

Iris Yoon
BA, Swarthmore College; PHD, University of Pennsylvania
Assistant Professor of Mathematics

Hanna Yousuf
BA, College of Wooster; MA, University of Wisconsin-Milwaukee; PHD, University of Wisconsin-Milwaukee
Visiting Assistant Professor of Neuroscience and Behavior

Chai-lun Yueh
Voice Instructor

Camilla Zamboni
MA, Ohio State University
Adjunct Assistant Professor in Italian; Assistant Professor of the Practice in Italian; Assistant Professor of the Practice, Education Studies; Assistant Professor of the Practice, Fries Center for Global Studies

Yared Zeleke
MFA, New York University
Visiting Assistant Professor of Film Studies

Balazs Zelity
BA, Budapest Business School; MA, Universite Catholique de Louvain; PHD, Brown University
Assistant Professor of Economics

Meiqing Zhang
MA, University of Chicago; MA, University Southern Calif; MS, University Southern Calif
Postdoctoral Research Fellow, Wesleyan Media Project

Xiaoxue Zhao
BA, Yale University; PHD, Yale University
Assistant Professor of Economics

Su Zheng
BA, Central Conservatory of Music; MA, New York University; PHD, Wesleyan University
Associate Professor of Music; Associate Professor, East Asian Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Xiaomiao Zhu
MA, Wesleyan University
Adjunct Professor of Asian Languages and Literatures, Emerita

Sebastian Zimmeck
LLM, University of California, Berkeley; MS, Columbia University; PHD, University of Kiel; PHD, Columbia University
Assistant Professor of Computer Science; Fellow in Applied Computational Data Analysis

Jason Platt Zolov
BA, Wesleyan University; MBA, Columbia University
Visiting Assistant Professor of Quantitative Analysis
WESLEYAN UNIVERSITY
CATALOG DISCLAIMERS

A copy of the lists of officers and faculty, as well as academic regulations, for the 2023-2024 issue of the Wesleyan University Catalog was prepared as of August, 2023. Information about fees and expenses, financial aid, and scholarships applies to the academic year 2023-2024. However, plans of study, course titles, fees, expenses, and other matters described herein are subject to change at the discretion of the University. Such changes may apply to matriculated students. University policies and guidelines for their implementation are published online at wesleyan.edu (https://wesleyan.edu).

As required by law, a copy of the Wesleyan University security report is available upon request. This report includes statistics for three previous years on specific reported crimes that occurred on campus, on property that is owned or controlled by the University, and public property within a reasonably contiguous geographic area to campus. The report also includes institutional policies concerning campus security, crime prevention, the reporting of crimes, University policy on alcohol and drugs, and many other related matters. A copy of this report is available at the Office of Admission, the Office of Public Safety, or the Public Safety website located at wesleyan.edu/publicsafety (http://wesleyan.edu/publicsafety/).

STATEMENT OF NONDISCRIMINATION

Wesleyan University admits students without regard to race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression, to all rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression in admission to, access to, employment in, or treatment in its programs and activities.
