As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebosity of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

GRST272 Introduction to History: Germany from Napoleon to the Berlin Republic

Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions.

We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

GRST273 Tatort - Window into Germany (CLAC.50)

Few television shows have become anchored in German cultural discourse as firmly as "Tatort," a weekly crime show produced and broadcast by public television since 1970. Watched by up to 40% of all potential viewers, new episodes are prominently reviewed in major daily newspapers and serve as a focus for discussions about German politics, culture, and society. Episodes have tackled questions of police brutality, immigration, gentrification, and the surveillance state, while also shining a light on Germany's changing conception of itself. Over the years, the show has attracted some of the major directors and actors from German-speaking regions, such as Wolfgang Petersen, Margarethe von Trotta, Dominik Graf, Sibel Kekili, and Götz George. In this course, we will watch current and canonical episodes of the show, using it as a way into discussions about Germany's past, present, and future.

GRST277 The Past is Our Present Problem: Post-1945 German Literature and Culture

The quarter century following Germany's unconditional surrender in 1945 saw a continued struggle between a desire to move on and rebuild a society and culture in ruins on the one hand, and efforts to own up to--and learn from--

Germany's recent Nazi past on the other. Literature, in particular, became one of the driving forces trying to understand how the Third Reich was possible, what happened to the remnants of Nazi ideology in the new Germanies, and what avenues forward there were for a language and literature so thoroughly complicit in the horrors of genocide and Holocaust.

In this course, we will explore how writers (re)configure, but also ignore, questions of personal and national identity, the function of language, the role of tradition, individual agency and social norms, or gender roles. With a main focus on West Germany, we will read some of the most important works of the time, ranging from so-called "rubble literature" of the immediate post-war years (Wolfdietrich Schnurre, Wolfgang Borchert) to texts trying to find ways to confront questions of guilt and responsibility (Günther Grass, Heinrich Böll) and to more radical attempts to reconfigure what literary art in German is able and obligated to say (Paul Celan, Peter Weiss). To complement the focus on West Germany, we will also read select texts from the other German-speaking countries: Austria (Thomas Bernhard, Ingeborg Bachmann), Switzerland (Max Frisch), and East Germany (Christa Wolf). In addition to close readings, we will engage with larger questions and cultural movements of the time, from debates between authors who left Nazi Germany and those who stayed, to the Gruppe 47 (Group 47) and its attempt to change the literary landscape between 1947 and 1967, to the increased politicization of literature and resurgence of debates of Nazism's staying power surrounding the social movements of the late 1960s. We will combine our readings with looks at historically significant moments such as the founding of two German states, the so-called economic miracle in West Germany, the conservative "restoration" efforts under chancellor Adenauer, or the election to the chancellorship of Kiesinger, a former Nazi bureaucrat with the Propaganda Ministry.

GRST279 Good, Evil, Human: German Fairy Tales and Their Cultural Impact

The collected folk tales of Wilhelm and Jacob Grimm have had a substantial impact on the cultural history of Germany and beyond. Despite our sense that we already know these texts, it is worth taking a closer look at their messages. Deceptively simple, these little tales communicate and negotiate extraordinarily important and complicated messages about what it means to be human, to behave in acceptable ways, to have and control unwelcome desires, and to (be able to) imagine a better world. We will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century.

GRST284 Frankfurt School Critical Theory, Then and Now

This course serves as an introduction to Critical Theory as first envisioned and practiced in the 1930s and 1940s by a group of European refugee scholars in New York and Los Angeles associated with the "Institute for Social Research," which later became known as the "Frankfurt School" (the city of Frankfurt being the location of its European origin and post-WW2 abode). Drawing on the German philosophical (Kant and Hegel), sociological (Weber and Simmel), psychological (Nietzsche and Freud), and Marxist (Engels, Marx, and Lukacs in particular) intellectual traditions, "Critical Theory" was intended to shed light on the genesis of capitalist class societies' inherently antagonistic and irrational makeup. Uncompromisingly interdisciplinary, the critical theorists explored phenomena such as authoritarian movements, mass media, propaganda, and the culture industry, and in doing so championed the significance of art and radical thought for the prospects of liberation from authoritarianism and alienated social relations. For the first generation of Critical Theorists (who must be distinguished from their less radical heirs, such as Habermas and Honneth), critique was not a purely academic exercise, but was pursued for the sake of radical social transformation and thus was sparked by a utopian impulse.

GRST288 The Human Condition: Arendt, Nietzsche, Marx

"God is dead," the philosopher Friedrich Nietzsche wrote at the close of the 19th century, "and we have killed him!" Nietzsche presents these words as being proclaimed by "a madman who in the bright morning lit a lantern and ran around the marketplace crying incessantly." Both the content of this famous quotation and its setting express a concern with the internal and external conditions under which modern humans live and make sense of their lives: without the certainty of divine guidance and order (internally), encountering one another only as impersonal buyers and sellers on the marketplace (externally). In this seminar, we will study three strikingly unique yet nonetheless intersecting ways of addressing the human condition after the death of god. We will start with Hannah Arendt's magisterial "The Human Condition" (1958), in which she presents the history of how in the Western philosophical tradition the active life (the *vita activa*, as distinguished from the *vita contemplativa*, the life of the mind) has been conceptualized. Drawing on Nietzsche's genealogical method, Arendt traces the genesis of concepts from their Greek, Latin, and Biblical origins to modernity. In doing so, she focuses on the activities of labor, work, and action: Labor is the "metabolism between humans and nature" (Marx), the process through which we appropriate the earth for our survival as a species; work is the transformation of the earth into a durable world; and plurality is the sharing of this world with others.

From Arendt's comprehensive conceptual history of the human condition, we will proceed in reverse chronological order to contextualize and challenge her

claims. Arendt singles out Nietzsche and Marx as the paradigmatic modern "life and labor philosophers" and foremost representatives of philosophical "naturalism," and we will first examine Nietzsche's account of the devolution of European morality to nihilism and his critique of Western metaphysics as a "life-denying" death-cult, and will then, in the final third of the semester, investigate Marx's attempts to historicize and rethink the interdependence of humans and their natural environment in terms of an alienation of practice and the transformation (necessitated by the capitalist "law of value") of human labor into an abstract power of domination over humans and, eventually, the whole planet.

GRST289 The Enlightenment You Don't Know (And What It Can Tell You about the Digital World)

Who am I? How and what can I know? Is what I perceive of and present to the world the truth? What can and should I do? Who knows what about me? Such questions are asked with increased urgency as the sheer mass of information makes reliable orientation impossible, as social relations become unstable, as uncontrollable actors gather ever more information about us, and as the (neo)liberal sense of self starts to dissolve under the pressures of new media and accelerating social and political processes.

This course proposes that, to look for ways to navigate this situation, we ought to turn to the 18th century, a time when old certainties and assumptions collapsed under the emergence of modernity and new, "enlightened" views of humans and their world were developed. During that time, thinkers and artists set out to redefine the self, obsessively observing the individual, its cognition, and its role in the world. In doing so, they invented the modern self, one with rich inner lives, a keen interest in the observable reality, proud of its abilities, and aware of its role as a social being and its observation by others. They created elaborate modes of paying attention, of reading the human being in its complexity. Acquiring insight into their ideas can help us see what is being lost and gained today. We will focus largely on the German 18th century since it produced some of the final instantiations of Enlightenment thought in a variety of disciplines.

In the first part of this course, we will read from a variety of disciplines that either were invented in the 18th century or underwent significant changes during that time, ranging from legal theory and natural sciences to philosophy and literature. In the second part, we will jump forward to the dissolution of this modern self in our current moment. We will engage with theory and digital art of the 21st century, exploring what it means to constantly be distracted, to be the focus of attention of algorithms, and to be confronted with a world which is both always at the disposal of our attention and always out of reach.

GRST290 Nietzsche - Science, Psychology, Genealogy

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout

his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

GRST291 Directed Research in European Studies

This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

GRST292 Reason and Its Limits

This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness--but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

GRST294 Civic Responsibility and Places of Remembrance: Historical Consciousness in Germany and Beyond

The Holocaust, Germany's STASI terror, resistance to dictatorships, debates about Germany's war memorials, and colonial history come to mind when we think of 20th-century Germany. In this seminar we will pursue the questions: What do we remember? How do we remember? What are places of remembrance, how are they created, and what functions do they have in

our society and for us personally? The term "places of remembrance" comes from the French (*lieux de mémoire*, literally, places of memory). This term was coined by the French historian Pierre Nora. For him, places of remembrance are not only material places, but also the so-called 'immaterial' places such as people, data and concepts that are anchored in people's collective memory and have an identity-forming function. In relation to Germany, places of remembrance can be specific places (like Weimar) or memorial sites (the Auschwitz concentration camp), but also buildings (Kaiser Wilhelm Memorial Church in Berlin), monuments (Bismarck Monument in Hamburg), people (e.g., names of people on street signs), events (Fall of the Wall), customs (Christmas) or symbols. The French sociologist Maurice Halbwachs, who was murdered at Buchenwald, described memories as a connective structure. They connect people socially and temporally. But not only individuals, also societies, nations and cultures remember (= collective memory). According to Halbwachs, crystallization points or places of memory are needed for this process. Like pieces in a mosaic, these form the identity of a culture, a nation, or a society. Their meaning and their perception can change over time. Some things can also be forgotten, but places of remembrance can help us avoid forgetting. With this caveat in mind, we want--among other things--to explore, discuss, and present "places of remembrance" and the role of memory culture in Germany and beyond.

GRST298 Marxism and Climate Crisis

Since the Communist Manifesto of 1848, the notion of "crisis" has played a prominent role in Marxist theorizing. Today's intensifying climate crisis is lending new theoretical and political weight to the Marxist critique of extractive and consumptive capitalist actions that transform nature into a means of production for ensuring ceaseless economic growth through the accumulation of capital. The consequences of this are not only the exhaustion of human labor-power but also of non-human nature (fossilized carbon, wild animal biomass, top soils, clean water, etc.). Our perspective for studying and understanding this transformation of nature will primarily be informed by a set of recent "eco Marxist" writings that break with traditional Marxist productivism in favor of an eco-critical analysis that reconceptualizes capitalism neither as an economic nor social system but rather as "a way of organizing nature" (J. Moore). In light of the Center's semester theme of Energy and Exhaustion, we will ask three sets of questions: historical (about the origins of the Capitalocene and of "fossil capital"); theoretical (how is Marx's "general law of accumulation" also a law of environmental depletion and planetary limits?); and political (traditional "Promethean" Marxism envisioned revolution as the full actualization of productive forces; what is the meaning of revolution in the age of natural exhaustion and climate crisis, when the limits of human historical agency are drawing closer with each new tipping point?).

GRST301 Advanced Seminar in German Literature: Poetry as a Way of Life

Who am I? What is the world? And what can language (not) do? Throughout its history, German poetry has returned, time and again, to asking these fundamental questions about a self, its relation to the world, and language's capacity to represent, influence, and constitute an I. Poetry serves as one of the central sites where the epistemological, moral, social, and aesthetic potential of mankind is negotiated. Lyric texts play a fundamental role in the creation and

exploration of the promises, problems, and paradoxes of modern notions of subjectivity, society, and art. Almost all of the most canonical German poems pick up on some or all of these issues, and we will read a selection from the 18th to the 21st centuries. The goal of this class is to provide students with an overview of German poetic traditions and to give students the tools to talk about poetry in German. We will explicitly engage with analytic terminology as well as aesthetic discourses. All readings, writings, and discussions in German.

GRST302 Forward, Without Forgetting: The GDR in Literature and Film

In 1949, postwar Germany officially split into two separate countries with the formation of the German Democratic Republic. Also known as East Germany, the GDR was isolated from the Western world for four decades, and it developed its own, equally rich, literary and cinematic cultures. By looking at a range of textual and visual sources, students will engage critically with ways of understanding this "other" Germany and its distinctive cultural expressions, ideology, and history, including the role of the government and the Stasi. The course also explores phenomena like the "Ostalgie" and retro-chic that manifested themselves after the Fall of the Wall in 1989. The readings include short stories, songs, and excerpts by and among others: Wolf Biermann, Johannes Becher, Günther de Bryn, Stefan Heim, Rainer Kunze, Brigitte Reimann, Claudia Rusch, Susanne Schädlich, Maxi Wander, Christa Wolf. Participants will view and discuss films and TV series produced before and after unification.

GRST303 German-Language Theater After 1945: Show, Teach, Remember

Theater has played an integral role in the development of German culture since the 18th century. Playwrights, directors, and producers have been able--indeed compelled!--to constantly negotiate and define theater's pedagogical role vis-à-vis the public and the political sphere. They had to ask how theater can and should (re)present the world on stage, and how the world on stage can and should relate to the audience and its world. German-language theater after 1945 additionally had to tackle questions about Germany's past, as well as the past of (its) theater traditions, the connection between visibility, aesthetics, and the power that had played such an immense role during the National Socialist era. In this course, we will read some of the most important and influential plays written and produced in the German-speaking countries since 1945, as well as influential theoretical texts. We will discuss such performance aspects as set designs, language, and acting techniques, and we will ourselves stage short excerpts in various styles as a way of gaining first-hand experience with the range of possibilities in this infinitely flexible genre.

GRST304 Punk, Pop & Politics in Cold War Germany

This course introduces artistic responses and positions developed in the face of social and political realities in a divided country after WWII until its reunification and subsequent rapprochement. We will explore this period through works by artists, musicians, and young German authors, including Joseph Beuys and his concept of society as a social sculpture; bands of the Neue Deutsche Welle, who paired German lyrics with punk and new wave music; and the representative painting styles of the Neue Wilde, young painters who left abstraction and

conceptual art behind to give expression to their observed reality. We will read contemporary texts that accompanied these developments in the form of literary writing (Rolf Dieter Brinkmann, Peter Glaser, Rainald Goetz) or as critical responses in newspapers, art journals, and pop magazines (Diedrich Diederichsen, Jutta Koether, Peter Bömmels), supported by excerpts from influential theoretical texts. Students will develop skills to critically engage these works and will apply these skills by preparing their own responses to works of art and cultural events.

GRST305 Oppression, Resistance, Despair: Attempting Change in Pre-Revolution Germany, 1830-1848

The 1830s-40s were a volatile moment in the history of German democracy and literature. After the defeat of Napoleon and the restoration of the old political order in 1815, authorities started rigorous and increasingly violent campaigns to oppress and destroy the budding (proto-) democratic and early nationalist movements. At the same time, the beginning of industrialization in the German-speaking world led to massive social upheavals, increasing poverty, famines, and the loss of entire economic sectors. In this context, authors of the Vormärz, the decades right before the March revolutions of 1848, became increasingly politicized, critical not only of their societies, but also the previous literary paradigms of Weimar Classicism and Romanticism. In their works, revolutionary in form and content, they fought for a better world and reflected on the need for resistance in the face of defeat and despair, the possibilities for a good life in an unjust world, and the role of art in political and social struggle. The course's main focus will be on Georg Büchner (1813-1837), whose works explore the tension between subjective agency and the destructive dynamic of history (Danton's Tod), idyll and insanity (Lenz), or individual life and structural oppression (Woyzeck). We will also engage with the function of humor and subversion in social critique (Heinrich Heine), the fight for a better status for women (Fanny Lewald, Louise Aston), and hugely problematic components of the rising German nationalism like anti-French and anti-Jewish sentiments.

GRST310 Newest German Literature and Film

This seminar is designed to introduce students to films and literary texts produced in the German language in the past few years. Because the materials we will read and watch are of recent vintage, they are not yet part of an established canon: What their significance is and how and why we should engage with them is far from settled. For this reason, this seminar will fulfill a twofold task: (1) It will critically engage with some of the most cutting-edge literary and filmic creative work currently being done in the German language; and (2) it will offer extensive opportunities to explore and critique how these texts deal with contemporary social issues such as the revival of nationalist, Islamophobic, and authoritarian politics, the European Union's crisis of legitimacy in the wake of the Covid-19 pandemic, or the new "social question" arising from the dismantling of the welfare state and the growing "precarization" of work.

GRST330 Nietzsche als Versucher (CLAC.50)

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

GRST332 The Racialized German Screen

In this course, we will examine filmic constructions of racial otherness in German cinema from early sound film until the present. The films in this course represent Asian, Jewish, Black, Native American, Romani, and Muslim characters. Some of these racialized character types are inextricably tied to Germany's history of war, migration, and asylum, including the post-WWII "war child," the West German guest worker, the former East German asylum seeker, and the twenty-first-century refugee. We will consider the parameters of national cinema, asking to what extent Germany's films can be seen as a projection screen for anxieties about racialized others, but also potentially fantasizing about cosmopolitan, multicultural Germany. While the majority of these productions are created by white German filmmakers, we witness a shift in more recent productions, where filmmakers of color step behind the camera to reclaim their narratives while employing their own strategies of representation. In addition to screening and analyzing films, we will read accompanying texts that will provide an aesthetic and cultural frame for interpretation.

Through careful film screenings, reading assignments, scaffolded analysis assignments, a presentation, and the creation of a final video essay, students will develop analytical skills in the viewing and interpretation of films and in writing original arguments about film history and cinema culture. Students will gain vocabulary for interpreting, analyzing, evaluating, and researching films in the context of the history that shaped and was shaped by them. No prior film studies knowledge is required, but the class discussions will take place entirely in German.

GRST335 Writing between Cultures: German Literature and Film by Authors of Foreign Descent

This seminar will introduce students to both literary texts and films by immigrants or descendants of immigrants, all of whom write in German, whether as their first or second language. Among the topics we will explore are homesickness, interactions with bureaucracy, use of and perspectives on language, questions of citizenship and identity, assimilation and integration, cultural misunderstandings, and encounters with bigotry and xenophobia. We will discuss works by Yoko Tawada, Aras Ören, Rafik Schami, Emine Sevgi Özdamar, Wladimir Kaminer, Vladimir Vertlieb, Saša Stanišić, and others as we consider what properties make their works part of the canon of German literature, or not. Films by Fatih Akin and Yasemin Samdereli are also included in this course.

GRST342 Empire, Memory, Translation: A Seminar on the Rings of Saturn

In this seminar, we will explore three themes: The lasting effects of European imperialism and colonialism in (mostly but not exclusively) Europe and their literary representations; the relationship between historical memory and fiction in these representations; and the role of translation in shaping the relationship between historical memory and fiction.

At the center of this course is W. G. Sebald's travelogue "The Rings of Saturn" ("Die Ringe des Saturn"), a work we will read in both its German original and its congenial English translation. Sebald's genre-defying narrative recounts the historical traces of empire, war, and colonialism in the observations and reminiscences of the protagonist's wandering through the de-industrializing landscape of England's Suffolk County during the early 1990s. Obsessively associating phenomena near and far in an almost paranoid fashion, Sebald's first-person narrator leads the reader to the devastations wrought in China during the Opium Wars and in the Congo during Belgian rule; the local and global effects of cycles of capital accumulation, resource exploitation, and climate change; and the challenges and pitfalls of memory's attempts to find an adequate narrative form for how the globally disparate effects of capitalist modernity are interlinked.

All discussions and papers will be in German, and readings will be in German and English, with a consistent focus on theoretical and practical questions of translating from German to English. We will proceed at a slow pace, with plenty of time to grant our superb primary text the time and attention it deserves. This course is designed for students who have taken GRST 213 or have spent a semester studying abroad in a German-speaking country. We will focus on developing critical writing, reading, interpretation, and translation skills in German. Since the quantity of reading is fairly modest, we will put much emphasis on regular writing and rewriting.

GRST350 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)

This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

GRST376 The Volksstueck Tradition

In this course we will be studying the Austrian and German genre of the Volksstück. As the name suggests, plays in this genre are intended to address the joys and sorrows of ordinary people in their everyday lives, both reflecting and commenting on the social life of their times. While 19th-century Austrian Volksstücke owed much to the conventions of the commedia del arte, the genre evolved in the 20th century into a form of critical social analysis. This evolution accompanied changing concepts of the "Volk," with salaried office workers coming to the fore during the Weimar Republic. The 20th-century Volksstücke written between the world wars present characters who in real life would likely become supporters of the Nazis. Starting in the 1960s, playwrights and audiences rediscovered the Volksstücke of the prewar period, and new authors emerged. Topics and stylistic features we will examine include the changing figurations of the "Volk," dialogue employing actual or synthetic dialect and colloquial language, the prevalence of inarticulateness or inauthentic speech, oppression and exploitation of women, shifts in class attitudes, and the increasing influence of the mass media. Interesting parallels to the Volksstück can be found in Norman Lear's long-running television series "All in the Family." Among the authors we will be reading are Johann Nepomuk Nestroy, Bertolt Brecht, Karl Kraus, Marieluise Fleisser, Ödön von Horváth, Rainer Werner Fassbinder, Martin Sperr, Wolfgang Bauer, and Franz Xaver Kroetz. All reading, writing, and class discussion will be in German.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-GRST**Prereq: **GRST213****GRST379 German Fairy Tales: Brüder Grimm and Beyond**

In this advanced-level German course, we will read selected fairy tales from the Grimm collection and other texts, investigate the historical context in which the Grimms undertook their ambitious project, learn about ways in which scholarship has framed fairy tales, and discuss adaptations of the fairy-tale tradition in films and texts of the 20th century in Germany and the US. Most readings and all discussions are in German.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-GRST**Prereq: **None****GRST386 German Romanticism: Disenchantment and Re-enchantment**

Famously, the sociologist Max Weber described the rational, enlightened age as "disenchanted": Unlike "the savage," he claimed, who uses "magical means" for manipulating "mysterious incalculable powers," the denizens of capitalist modernity use "technical means and calculation" to master "all things." At the same time, Weber indicated that the "process of disenchantment, which has been under way for millennia in Western culture," birthed abstract new enchantments: "Having lost their magic, the multiple gods of the past rise up from their graves in the form of impersonal forces, fighting for power over our lives and thus beginning anew their eternal struggle against one another." Against the backdrop of Weber's dialectic of disenchantment and re-enchantment, this course offers a representative overview of some of the key ideas, works, and authors of German Romanticism, a term that designates both a period that extends from about 1795 to 1848 and a style of creative and intellectual production that encompasses a remarkable diversity of phenomena, including the proto-avant-garde experiments with communal "sympoetry" and "symphilosophy" in the Early Romantic circles and the rise of "Dark Romanticism" that fuses a fascination with science and new technologies with a turn to the occult and demonic. In tracing the tensions between disenchantment and re-enchantment, we will consider works of literature, criticism, art, and music, including works by some of the key figures in the German intellectual and artistic tradition, such as Heinrich Heine, the Brothers Schlegel and the Brothers

Grimm, E. T. A. Hoffmann, Ludwig Tieck, Caspar David Friedrich, Robert and Clara Schumann, Franz Schubert, Karoline von Günderrode, Bettina von Arnim, Novalis, Annette von Droste-Hülshoff, and the young Karl Marx.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-GRST**Identical With: **COL315**Prereq: **GRST213****GRST390 Romanticism-Realism-Modernism**

In the study of German literature (and art), the terms romanticism, realism, and modernism designate a span of time extending from the "Age of Goethe" to the mid-20th century literary cultures of West Germany, East Germany, Austria, and Switzerland. In this seminar, we want to take a closer look at representative examples for each of the three categories: What kind of subject matters are prevalent in each respective period, what narrative, dramatic, and poetic devices and forms are typically employed? What distinguishes these periods from one another, how useful are these distinctions? What, finally, is the purpose of such periodizing of literature?

The purpose of this seminar is twofold: 1. It is intended to provide a historical overview of German literature by engaging with representative romanticist, realist, and modernist works of prose, drama, and lyric; 2. It is designed to critically probe the concepts of romanticism, realism, and modernism: How useful are these categories in making us understand the evolution of fiction, authorship and readership, literary subjectivity, or narrative form? What are some pitfalls of using these categories?

All readings, papers, and discussions will be in German.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-GRST**Identical With: **COL390**Prereq: **GRST213****GRST391 Weimar Modernism and the City of Berlin**

One of the most fascinating aspects of Weimar modernism is the emergence of new forms of perception and consumption, reflected in a new urban consumer culture that generated an ever-changing array of visual and aural stimulations. This changed reality was perhaps best captured by the young medium of film, but older media like literature and painting also responded to this modernist challenge. This course will examine not only exemplary works of literary and visual production from the Weimar period, but also other aspects of Weimar modernism, such as the development of radio, design, fashion, advertising, and architecture, emphasizing analyses of the new mass culture of entertainment, distraction, and "pure exteriority" (Kracauer) in combination with left-wing cultural and political criticism. The city of Berlin, then the third largest in the world and in many ways the international capital of modernism, will provide the main locus of investigation. All course readings, discussions, and assignments will be in German.

GOVT108F It's (Not) a Laughing Matter: Humor as Resistance and a Force for Social Change

Using a global perspective, this course will focus on developing critical thinking and writing skills as well as developing intellectual empathy. The students will learn to define issues within a broad cultural context and gain experience in evaluating and interpreting content in a variety of mediums. Students will interact with their classmates and actively participate in classroom activities to improve their ability to work in groups, think outside of the box, improve their writing, and develop their oral presentation skills.

The subject matter crosses disciplinary boundaries, linking the neuroscience of laughter with social science analyses about the power of humor. Students will be able to explain how humor can be a crucial tool to cope with painful and even repressive circumstances. They also will investigate how comedians and political activists use humor and other art forms to push for political and social change.

GOVT116F Good Books on Bad Wars (FYS)

This course explores war through some of the best books of theory, fiction, and nonfiction. The purpose of war is to achieve a policy that leads to a better peace after the war's end than the peace that existed before the war began. But the nature of war is to serve itself if policy does not guide and constrain war. This course begins with discussion of the best foundational works of theory to build an understanding of the epistemology of war. The students will subsequently read, analyze, and discuss some of the best works of nonfiction and fiction on bad wars when judged by quality of strategy, magnitude of losses, or duration of fighting. The book subjects range from the American Civil War to the post-9/11 wars. The readings and seminar discussions vary from the reasons why the wars began to the conduct and outcomes of the wars. This course lies

at the intersection of international relations, history, and conflict studies. It will increase the students' understanding of how policy, strategy, and war interact. A central aim of this seminar is to improve critical thinking and writing.

GOVT151 American Government and Politics

This course introduces the "building blocks" of American politics and government at the national level. It has four main parts: (1) foundations of our governmental system, (2) political institutions and the way they generate policy, (3) politics at the level of the individual citizen and the mechanisms that link the masses to elites, and (4) how all the factors come together in the making of public policy. We will scrutinize insider accounts of politics, scholarly work on governmental processes, and popular debates on issues and institutions. In addition, we will discuss why Americans are often so unhappy with their politics and politicians and the challenges faced by elected officials attempting to meet a wide scope of public demands. This course is designed specifically for first-year students.

GOVT206 Public Policy

"Public policy" describes the patterns of actions employed by the government to achieve a variety of social goals. Some of these actions may be of great consequence (e.g., incarcerating prisoners, providing income maintenance to the poor, preventing deaths from pollution or workplace hazards). This course provides a survey of several key public policies in the United States. It will begin with an exploration of the policy-making process, policy design, and policy evaluation. The remainder of the course will be devoted to the examination of several key public policy areas including criminal justice, education, social welfare, economic management, health care, and environmental protection.

regulation. By integrating theoretical debates and the historical evolution of core public policies, the course aims to develop analytical skills as well as an appreciation for the technical and political complexities of policy-making.

GOVT210 Calderwood Seminar in Public Writing: Law, Courts, and Policymaking in the US

In this course we will explore some of the most salient policy questions in contemporary American politics through a lens that puts law and courts at the center of inquiry. Among the topics we will cover are the place of judiciary in American democracy, hate speech and the First Amendment, criminal justice, immigration, surveillance, and privacy. In exploring these various topics, we will see how law is socially constructed by a myriad political, economic, and cultural forces, and how social phenomena are legally constructed as courts deliberate and decide on particular cases.

This is a writing-intensive course. Students will try their hand at public writing, working on op-eds, book reviews, and blog posts. They will read and edit each other's work.

GOVT220 US Political Economy: State, Markets, and the Dynamics of Change

The past century has witnessed dramatic changes in the US political economy. Many of these changes stemmed from the policies and institutions introduced during the New Deal, which created a foundation for a period of great prosperity in the immediate postwar period—a quarter century of steady growth, low inflation and unemployment, and declining inequality. Yet, by the mid-1970s, the nation was mired in stagflation and subsequent decades brought a significant departure from the earlier policy mix. The US entered a period of stagnant wages, growing inequality, and heightened vulnerability to a host of risks, all of which contributed to the severity of the financial crisis of 2007-08, the Great Recession, and the slow recovery thereafter. In this course, we will explore the critical role of policy and institutions in shaping economic performance, the factors that contributed to their erosion, and the factors that shape and limit the options available to contemporary policymakers.

GOVT222 Averting Catastrophe: Public Policy and Risk Management

COVID-19 revealed the weaknesses of the federal government's capacity to manage the risk of pandemics and the tragic ramifications. The U.S. faces several significant risks that, if poorly managed, could have significant implications for the economy, the environment, and public health. This course focuses on the government's role as risk manager. We will explore how public policies can be used to manage risk, mitigate the extent of damages to the environment, the economy, and public health, and avert catastrophic outcomes. After examining the concept of risk, decision-making under conditions of uncertainty, and competing policy instruments, we will turn to a number of case studies, including offshore oil spills, nuclear accidents, financial crises, the COVID-19 pandemic, and climate change. In each case, we will seek to better understand the factors that shaped performance and consider the implications for strengthening the government's role as risk manager.

GOVT232 Campaigns and Elections

This course introduces students to the style and structure of American campaigns and how they have changed over time. We also consider academic theories and controversies surrounding campaign "effects" and whether or not parties, media, campaigns, and elections function as they are supposed to according to democratic theory. Students will read, discuss, and debate classic and new scholarship in the field of political and electoral behavior. Students will also conduct research into different electoral contests in the United States at either the federal or state level.

Prereq: **None**

GOVT238 American Political Parties

This course explores the origins, purposes, roles, and consequences of political parties in the American political system. After a brief consideration of the broader theories behind political party systems, we will turn our focus to the party system in the United States. V. O. Key (1964) presented a tripartite definition of political parties that we will use to structure our exploration of parties for the rest of the course: party as organization, party in government, and party in the electorate. In these sections, we will address political party polarization, party identification, parties' fundraising, and many other related topics. From this rich examination of political parties in the U.S. context, we will discuss why parties exist and enable democracy, but also discuss their potential flaws and failures.

GOVT239 Racial and Ethnic Politics

This course will provide historical context on the development of race and racial attitudes, and demonstrate the crucial role that they play in contemporary politics with a particular focus on immigration, criminal justice, welfare, and housing policy. The assigned readings will examine how the mere presence of underrepresented racial groups in the United States has shaped policies in these arenas, and the way these policies have, in turn, shaped the material circumstances and the burgeoning identities of these groups. The course will also uncover the complex relationship between race, political participation, and public opinion.

GOVT250 Civil Rights and Liberties

This course introduces students to the development of civil liberties and civil rights law in the United States. We will focus primarily on the decisions of the Supreme Court that concern the First Amendment (including religious freedom, freedom of speech and expression, and freedom of the press), privacy and personal liberty, equal protection, voting, and representation. In this course, students will learn about the evolution of major legal doctrines governing civil liberties and civil rights. Students will also develop an understanding of the process of Supreme Court decision-making.

GOVT253 The American National Security State

In this course we will focus on the rise of the national security apparatus in the U.S. through the second half of the 20th century. This topic deals with political issues that are often characterized as "intermestic" because they occur at the point of intersection between domestic and international politics. Accordingly, we will examine the ways in which external forces influence internal state-building. We will also consider the choices and implications of policies designed to provide for what President Roosevelt famously called "freedom from fear."

GOVT261 Politics of Inequality

This course focuses on inequality along various identity-based dimensions in American politics. Students will leave with a deep understanding of when inequality is a normative concern, and how politics has created and has the power to alleviate inequality along class, racial, and gender divides. Specifically, the course will focus broadly on the level of inequality in these three areas, and the degree to which this has changed over time. We will explore both the political and social phenomena that have driven this inequality, and the ways they intersect and exacerbate the impact for those who share multiple stigmatized identities. Finally, students will, in their final papers, explore potential political policies that can help to reduce or even eliminate inequality.

GOVT271 Political Economy of Developing Countries

This course explores the political economy of development, with a special focus on poverty reduction. We discuss the meaning of development, compare Latin American to East Asian development strategies (focusing on Argentina, Brazil, Mexico, South Korea, and Taiwan), examine poverty-reduction initiatives in individual countries (including Bangladesh, Chile, and Tanzania), and evaluate approaches to famine prevention and relief. Throughout the course, we pay close attention to the role of procedural democracy, gender relations, market forces, and public action in promoting or inhibiting development.

GOVT274 Russian Politics

The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

GOVT275 Political Resistance to Dictatorships

The series of seminars is focused on different strategies of non-violent resistance against authoritarian regimes. We'll explore various aspects of building an efficient resistance movement—from fundraising to electoral strategies, from online communication to polling—based on best practices from countries all around the world. Pro-democracy activism and the fight against dictatorship is never an easy game to play; still, a lot can be derived from the existing experience to make it more efficient. But even if the resistance movement is successful, it doesn't guarantee a perfect democratic transition: resentment and disappointment often start to prevail in the society very soon. In workshops and role-playing games students will be encouraged to put together feasible transition plans for different countries.

GOVT277 Islamic Movements and Parties

This course examines the diversity of movements and political parties that take Islam as a reference point, and situates these discussions within broader debates around religion and politics. Through a variety of cases spanning from the Middle East and North Africa to Southeast Asia, we will explore the rise and evolution of different types of Islamic movements, and discuss different modes of mobilization, organization and interaction with the state and with other social and political actors. We will examine why some groups form political parties, and how they navigate the tensions between the needs of the party and the mission of the movement. We will consider how Islamic parties impact local and national politics, and in turn how they respond to shifting political terrains and challenges from within. The course will conclude with a reflection on "post-Islamism" and Western attitudes towards Islamic movements.

GOVT278 Nationalism

Nationalism is the desire of an ethnic group, a nation, to have a state of its own. Nationalism emerged as a powerful organizing principle for states and social movements in the 19th century and was integral to the wars and revolutions of the 20th century. This course examines rival theories about the character of nationalism and tries to explain its staying power as a political principle into the 21st century. It looks at the role of nationalism in countries such as the U.S., France, India, China, and Japan, and nationalist conflicts in Northern Ireland, Quebec, Yugoslavia, the former U.S.S.R., and Rwanda. The course is reading- and writing-intensive.

Offering: **Host**

GOVT278Z Nationalism

Nationalism is a political movement advocating self-rule for a community that sees itself as having a common identity and shared historical fate. To different degrees, ethnicity, language, religion, and culture have been used to demarcate the nation's boundaries. There are some 6,000 nations in the world but only 200 states, so competition for self-rule can be fierce. This course introduces the main theorists of nationalism as a response to the rise of capitalism, and explores its complex relationship with liberalism, socialism, and democracy. Why does nationalism persist—even as capitalist globalization makes national economies more open and porous? We explore both state-level nationalism, which ranges from war and genocide to protectionist trade policy, and everyday or "banal" nationalism, which expresses itself through food, music, and sport.

We start off with relatively familiar cases from the developed world—the US, Brexit, Northern Ireland, and Quebec, and the classic cases of France and Germany. We then look at decolonization in Africa and the genesis of genocide in Rwanda. The socialist world is represented by the multiethnic federations of the Soviet Union and Yugoslavia. We then look at nationalism in Japan and China, followed by the Arab world. Finally, we look at the role of the internet in the propagation of nationalism. Students will be expected to read all four assigned books before the start of the class, and will have to write a three- to four-page response paper on one of the books.

GOVT282 Activism in Exile

This course examines how social movements and political opposition groups adapt and adjust their activism when they are in exile. Through a variety of cases spanning from the Middle East to South Africa, we will explore what shapes diasporic activism and why some movements are more resilient than others. We will situate these discussions within broader debates around social movements and migration. After we consider what exile is, how different migration regimes emerge, and how conditions in the host states may vary, we will look at both cases of violent and nonviolent mobilization in order to understand what shapes diasporic activism. The course concludes with a reflection on what happens after exile, when movements and leaders return to their home country.

GOVT284 Comparative Politics of Western Europe

The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores

the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong German economy? How can we make sense of the Italian "second republic"?

GOVT298 Terrorism and Film

This course provides an overview of the major concerns and debates in the study of terrorism and political violence, and it uses the prism of cinema to further grapple with the complexity of political violence. We will explore the root causes of violence and the varied reasons why individuals and organizations turn to violent tactics. We will also discuss what policies are most effective and desirable, problematizing our understanding of security, and examining the implications of counterterrorism for civil liberties, human rights, and international law. The films assigned contextualize the theoretical issues and address the question of political violence from alternative perspectives: those of the perpetrators of violence, victims, soldiers, government officials, and police officers. In this immersive winter session, students are expected to watch the films outside of class, between the morning and the afternoon class session. Through the readings, films, discussions and assignments, the goal of the course is to help you understand the major controversies and debates surrounding terrorism, to equip you with the tools to critically engage with the media, academic and policy discourses on political violence, and to enhance your speaking, writing and analytical skills.

GOVT302 Latin American Politics

This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include: why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

GOVT303 War and Society

While most societies condemn physical violence between individuals, they condone and encourage collectively organized violence in the form of warfare. War is obscene, yet all modern societies have engaged in warfare. This course will examine war as a social, political, and historical phenomenon. We will look at the way in which wars have led to the consolidation of political power and the acceleration of social change, as well as the relationship between military service and the concept of citizenship. The course also examines the crucial role played by technology in the interaction between war and society. Films and novels will be examined to test to what extent these literary works accurately reflect, or obscure, the political, social, and technological logic driving the evolution of war. Our examples will include warfare in premodern society, the gunpowder revolution in early modern Europe and Japan, the American Civil War, colonial wars, World War I, World War II, Vietnam, and Iraq.

GOVT308 Comparative Urban Policy

Cities are home to more than half of the world's population, generate more than 80% of world GDP, and are responsible for 75% of global CO2 emissions. Once viewed as minor political players with parochial concerns, they are now--individually and collectively--major players on the global stage. This course will examine how cities are coping with the major policy issues governing our lives--from waste management and public safety to energy and housing policy. We will be examining how policies differ between big cities and small cities, what cities in the global north are learning from the cities in the global south, and how cities are bypassing toxic partisan politics in their nations' capitals to form global networks promoting positive change. The class will involve local field trips and participant observation to see how some of these urban issues are playing out in the city of Middletown.

GOVT312 Strategic Dilemmas in Politics

Politics is full of strategic interactions: politicians and voters, enemies and allies, office-holders and bureaucrats. But while the details might be different from issue to issue, the challenges are often the same. How can a large group cooperate on a common goal? How can you make a promise or threat credible? How can you learn someone's true intentions? This course uses in-class games and simulations to explore some of the key lessons that game theory can teach us about politics. There will be a bit of introductory game theory, but the focus will be on the intuition, not the method. The goal is to identify and analyze common strategic challenges in politics.

GOVT313 Civil Wars and Armed Groups

Since 1945, five times as many people have died in conflicts within countries (between governments and rebels/militias) than in conflicts between countries. This course digs into the big questions about civil wars: Why do they begin? Who participates? How do they end, and why do some never end? How do

combatants treat civilians, and why? Class will be primarily discussion-based, evaluating common answers to these questions, and the evidence behind them, from conflicts all over the world. Along the way, students will design their own research question and a strategy to answer it. The course is especially appropriate for sophomores and juniors who are potentially interested in writing a thesis, but relevant to any student interested in war and peace.

GOVT315 Policy and War through Film

This course explores how America's policies and wars interact with culture and identity. It combines films and readings to gain a deeper understanding of film as an artifact of culture, war, and identity. The course begins with a discussion of key foundational works to frame a common understanding about strategy, war, and American strategic culture. It then combines film viewings and critical scholarship to discover how the interpretations of America's wars through film shape American citizens' perceptions of war and their military. The films, readings, and seminar discussions will help students develop a better understanding of the differences between the realities and the perceptions of policy and war. This course lies at the intersection of international relations, history, and conflict studies. Participation in this course will increase the students' understanding of how U.S. policy, war, culture, and identity interact. It will also sharpen critical thinking and writing.

GOVT316 Wars of Resistance in Scholarship and Film

This course explores the theory, practice, and interpretation of wars that see ostensibly stronger powers wage wars against relatively weaker resistance movements. It combines scholarly readings and interpretive films to gain a deeper understanding of how and why resistance and insurgency can prevail when confronting adversaries who are numerically superior. Students will analyze the inescapable paradoxes that can make wars of asymmetry difficult for stronger states. The seminar discussions will develop a keener grasp of the logic that permeates wars where the weak resist invasion and occupation. This course intersects international security studies, history, and conflict studies. This course will improve knowledge about asymmetric wars and for critical analysis. Though there are no prerequisites, it is desirable that students have previously taken a course in conflict studies or war.

GOVT320 International Relations of South Asia

Since independence in 1947, the countries of South Asia have seen major wars, a nuclear arms race, dozens of small insurgent movements supported by neighbors, and complicated politics around identity, citizenship, and migration. At the core of these issues are questions about whether and how to transition a multiethnic, multireligious empire into nation states. This course will explore the major questions of war, peace, and politics in modern South Asia. Why did India and Pakistan fight three wars in the first 25 years of independence, but have largely avoided open conflict since? Why have some insurgencies escalated into major conflagrations while others have simmered at low levels for decades? How have religion and language shaped patterns of migration and citizenship, and been shaped by them in return? Along the way, students will design and conduct their own research on key issues in South Asian politics.

GOVT321 Topics in International Law

This course is a seminar on international cooperation and international law (IL) for students of international relations. The course's primary goal is to enhance students' understanding of how ILs facilitate or hinder international cooperation. The course has four modules: a) Introduction, b) IR theories on ILs, c) Application (Trade, Climate, Gender, Conflict), d) Future of ILs. The emphasis throughout the course is on the role of politics, understanding why ILs operate as they do, and recent episodes that illustrate the issues. Throughout the course, students will learn to produce concrete policy recommendations drawing from key research in the literature on ILs, practice giving others constructive feedback on peers' policy proposals and revise their own projects, and think critically about theories of international relations.

GOVT322 Global Environmental Politics

This course is an introduction to environmental politics for students of international relations. This course aims to enhance students' understanding of how international politics may affect environmental outcomes. The course has four modules: a) Introduction, b) IR theories and the environment, c) Application to select environmental issues, d) Policy implications. The introductory module presents several concepts that are important to understanding environmental cooperation. The IR theory module introduces canonical IR theoretical frameworks. Primarily, this module investigates how states' power dynamics, international institutions, domestic political systems, and NGO networks may explain the likelihood of international cooperation on environmental issues. The third module applies the theoretical concepts to real-world policy issues such as climate change, water air pollution, and endangered species. The final module focuses on the future of environmental cooperation among states. Assignments include an in-class quiz on key concepts, a role-based negotiation simulation, a podcast episode analyzing an environmental agreement of student choice, and a final exam. By the end of the semester, students think critically about environmental agreements by applying theories to policy examples.

GOVT323 Refugees in World Politics

The primary objective of this course is to provide students with i) an introductory overview of the political, economic, social, and security determinants of refugee flows; and ii) the political and social responses of receiving governments and societies to them. Using both historical and contemporary case studies, this course will highlight security concerns engendered by internal displacement and transnational migration. These include armed conflict, smuggling, trafficking, and terrorism. This course will also highlight the concepts of citizenship in receiving states, and the roles played by the international institutions in influencing state policies towards refugees.

GOVT325 Solving the World's Problems: Decision Making and Diplomacy

This course represents a hands-on approach to decision making and diplomacy. It is designed to allow students to take part in diplomatic and decision-making exercises in the context of international political issues and problems. Important historical decisions will be evaluated and reenacted. In addition, more current international problems that face nations today will be analyzed and decisions will be made on prospective solutions. Finally, various modern-day diplomatic initiatives will be scrutinized and renegotiated.

GOVT326 Political Consulting for International Business

This course is an applied course in political consulting skills for international business. It is designed for students who are directed toward a career in international business. Entry to the course requires a strong track record in prior involvement and or interest in international business. Emphasis will be placed on developing the most important political skills related to working in an international corporation. Learning will take place by applying what has been learned in real-life international business scenarios. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional environments. The course asks the class to function as a working committee of top executives trying to confront important international business challenges.

GOVT327 Experiments in International Development

Do policies designed to promote development around the world actually work? Do they sometimes produce effects we didn't expect? This seminar teaches the experimental method of social science research and applies it to these questions. Students will read examples of how social scientists have used experiments to study international development--broadly defined--including foreign aid, conflict and violence, illicit finance, elections, climate cooperation, trafficking in persons, and migration. Over the course of the seminar, students will design and analyze their own experimental research project and will write either an academic research article or an impact evaluation policy report. The seminar

is especially appropriate for any student considering a career in policy or social science.

Throughout this course, students will learn about experimental methods. They will also learn how to form a research question, conceptualize and measure variables, develop testable hypotheses, select an appropriate case/unit of analysis, write a literature review. These skills may be especially helpful for students who pursue an honors thesis or other original research project.

GOVT329 International Political Economy

How do domestic and international politics influence the economic relations between states, and vice versa? This course considers the role that governments and institutions play in the movement of goods, wealth, money, and people across borders. Sometimes political actors can intervene to improve the efficiency or equity of international markets, but sometimes self-interest can give rise to worse outcomes. This course explores topics such as globalization, trade, monetary relations, international institutions, debt, foreign direct investment, development, international migration, and the environment. Emphasis will be on understanding current events, including the recent trade war and sanctions.

Throughout this course, students will learn about survey research, statistical analysis, and interviews. They will also learn how to form a research question, conceptualize and measure variables, develop testable hypotheses, and select an appropriate case/unit of analysis. These skills may be especially helpful for students who pursue an honors thesis or other original research project.

GOVT330 Policy and Strategy in War and Peace

This course explores how the relations, relationships, and discourse between senior national civilian and military leaders influence the development and execution of policy and strategy in war and peace. In theory, the purpose of war is to achieve a political end that sees a better peace. In practice, the nature of war is to serve itself if it is not influenced and constrained by continuous discourse and analysis associated with good civil-military relations between senior leaders. This course begins with discussion of the key foundational works to build a common understanding. It then explores how civil-military interaction influenced strategy in war and peace for each decade from the Vietnam War to the present. The readings and seminar discussions also examine how the outcomes of wars influenced civil-military relations and the subsequent peace or wars. This course lies at the intersection of international relations, history, and conflict studies. Students will gain greater understanding of how U.S. policy

makers, strategy, and war interact, while honing their critical thinking and writing skills.

Prereq: **None**

GOVT333 International Organization

Why do international organizations (IOs) exist? Do they shape outcomes in international politics? Who runs international organizations? This course considers the role that institutions have played in addressing global problems since World War II. Some argue their role is trivial, since there is no international police force that can constrain states' behaviors. Others argue their role is profound, as institutions help states to overcome important barriers to cooperation. And just as in domestic institutions, the rules of IOs represent some interests more than others, creating opportunities for controversy and contestation. We will apply these theories to understand several institutions governing economic stability, environmental sustainability, human rights, security affairs, and global development. At the conclusion of the course, students will be able to explain why these IOs exist, how well they work, and what challenges they face in the future.

GOVT336 New Topics in International Political Economy

This course helps students understand how states cooperate in three new areas: global health, climate, and identity politics. The course introduces new IPE research on health, climate, and identity, focusing on these issues' relationships with interstate economic interactions. The course has four modules: a) IPE theory review, b) Global health and trade/intellectual property, c) Environmental protection and trade/foreign direct investment, d) Identity politics and globalization. After a brief review of IPE theories in the first module, the course will touch on specific topics of importance. For example, the health unit explores the relationship between intellectual property rights and global health outcomes, how trade policies affect states' responses to health crises, and how the global trade regime (i.e., the WTO) mediates those policy responses. The environment module investigates how economically developed countries use trade agreements to protect the environment and why some companies support climate actions more strongly than others. The identity module examines how gender, race, and ethnicity may shape individual preferences on globalization. In the process, students will apply IPE theories to understand new challenges the world faces. This course is designed for students who are already familiar with core concepts in IPE, including those who have previously taken GOVT 329. However, GOVT 329 is not a prerequisite.

GOVT337 Virtue and Glory: Classical Political Theory

How shall we think about public life, our "life of common involvements"? This course is a survey of premodern political theories, with attention to their major theoretical innovations, historical contexts, and contemporary relevance. Major themes will include the nature of political community and its relation to the cultivation of virtue, the relation of politics to economics, the origin of the ideas of law and justice, and the relation between knowledge and power and between politics and salvation. Readings will include Plato, Aristotle, Augustine, Aquinas, Machiavelli, and others.

GOVT338 Global Modern Political Thought

Modern political thought is defined by questions of the consolidation of state power, democratic governance, the rise of capitalism, and the legitimate uses of violence. Yet, these questions are intertwined with questions of colonialism, racism, and inequality. How does capitalism give rise to new ways of life across different times and places? What new forms of subjectivity arise with the consolidation of the nation-state, the emergence of new forms of communication, and the rise of the so-called autonomous individual? What is the relationship between democracy, empire, and colonialism? This course will consider the writings of thinkers such as Thomas Hobbes, John Locke, Jacques Rousseau, and Karl Marx in dialogue with Franz Fanon, Mao Zedong, B.R. Ambedkar, Mahatma Gandhi, Kwame Nkrumah, Enrique Dussel, and others. This course is required for political theory concentrators in the government major.

GOVT339 Contemporary Political Theory

How shall we get along? This course examines some important 20th and 21st century theories of politics. Major issues include the role of reason and emotion in grounding the basic principles of our political lives, the conceptual foundations of liberal and civic republican democracy, and critiques of liberalism from communitarian, critical theory, and postmodern perspectives. We will explore what political theory can be today. This course, together with GOVT337 and GOVT338, provides a survey of major Western political theories; at least two of these courses are recommended for students concentrating in political theory.

GOVT342 Questioning Authority: On the Politics of the Teacher-Student Relationship

What is the authority of the teacher in an era where the legitimacy of institutions and curriculum are under fire? Can hierarchical relationships between teachers and students be beneficial for learning and for political life? What are alternative conceptions of the teacher-student relationship? This course will explore different models of teaching within the history of political thought and beyond. From Socrates to the present, the context and manner of teaching has been just as important to political theorists as the content itself. The course will consider how questions of power, sexuality, risk, wisdom, and friendship inform different pedagogical styles and their implications for preparing citizens for democratic life. Readings include John Locke, Immanuel Kant, Alexis deTocqueville, John Dewey, Hannah Arendt, Mr. Rogers, Jacques Ranciere, Bernard Stiegler, Laura Kipnis, and others.

GOVT347 Political Freedom

Is political freedom about doing what you want as long as you don't hurt anyone else? Is it about collectivizing power or actively participating in governance? Is freedom an inherently individual practice or a necessarily collaborative one? A private or public matter? Does it depend upon rights or the transformation of social conditions? Does it emerge from political representation or direct democracy? Is capitalism the scene of human domination, human freedom...or both? Is freedom a concept, a principle, or a practice? What is the relationship of political freedom to power, equality, and community? What is the relationship of social identity to freedom--is it emancipatory or imprisoning? Is freedom something we even desire, or do we experience it as a burden? What happens when Dr. King meets Karl Marx, when John Stuart Mill meets Kate Bornstein, when Cathy Cohen meets Milton Friedman? In this course, we will pursue these kinds of questions through consideration of classics in Western political theory, contemporary writings, and some films. We will neither settle the question of what freedom is nor the question of how to produce it. However, we will deepen our appreciation of its importance and complexity.

GOVT348 Justice and Equality

To what extent and in what ways does justice require that people have (roughly) equal life prospects? That issue has become increasingly urgent as inequality has increased rapidly during the last 40 years or so. Although inequality in the US has grown faster than in most other (already developed) countries, the increase in inequality is widespread. At the same time, at the global level there has been a reduction of inequality as economic growth has delivered hundreds of millions of people from deep poverty. This class will examine the relationship between equality and justice. Our principal concern will be to assess how, in what ways, and among whom justice requires equality, but we will also look at the dynamics of inequality--how inequality has developed historically, the factors explaining the recent surge of inequality within countries while equality of life prospects has lessened globally, how growing inequality may be affecting domestic politics, and the policies that could address the issue of equality.

GOVT350 Law, Justice, and Democracy

In this course, we will explore law from a political-sociological perspective, in relation to the historical, political, and cultural contexts within which it exists. In the first part of the course, we will address the question "what is law?" by exploring a variety of theoretical approaches (Marxian, Weberian, and Durkheimian perspectives, legal formalism, legal realism, and critical legal studies). We will then move on to discussing the relationship between law and justice. In the third part of the course, we will talk about the politics of crime and punishment, exploring a number of key issues, including the birth of modern prison, rising incarceration rates in the U.S., the emergence of drug courts, and the politics of death penalty. In the fourth section, we will discuss the role courts play in constructing political and social reality. What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases. In the final section of the course, we will discuss law's place in the American system of government by exploring the evolving relationship between courts, the presidency, and Congress.

GOVT352 Deception and Democracy

What's the best way to tell if a politician is lying? According to the punchline of this old joke, you should simply determine whether their lips are moving. This course will undertake a more complex and nuanced analysis of political deception and democratic government. Is lying for political gain undemocratic? What ethical duties and obligations befall representatives and citizens within a democracy? Where do we draw the line between persuasion and deception? By examining the philosophical treatment and historical practice of political deception - from Plato's Myth of the Metals to Donald Trump's illusory trade deficit with Canada - we will broaden our understanding of various participatory, deliberative, and epistemic forms of democracy and their procedural and substantive commitments.

GOVT354 Marx and Marxism

What does it mean to "think like a Marxist" or "see the world as a Marxist" might? What are the fundamental concepts, categories, methods, and modes of inquiry we associate with the work of Karl Marx and those who consider themselves "Marxists"? What are the significant political, social, and theoretical problems that motivate scholars, activists, and citizens who participate in this ongoing tradition of thought and practice? This course will provide students with points of entry to make sense of these questions, placing particular emphasis on Marxism as a multifaceted and evolving method that rather than a dogmatic worldview that sets forth a series of rigid truth claims. Together, we will work to decipher some of the key texts produced by Karl Marx and others within the Marxist tradition. This will in turn enable us to parse out a diverse set of theoretical, historical, empirical, and normative questions, which, in addition to those above, include the following: 1. What is capitalism? How did Marx believe it worked, and how do contemporary Marxists believe it works in the present? What, if anything, is wrong with capitalism as a mode of social organization? What are the theoretical tools Marxists use to approach these questions? What are the diagnostic and prescriptive elements of the theory? 2. How do Marxists tend to explain contemporary socio-political pathologies like racialization, class domination, imperialism, fascist resurgence, environmental catastrophe, gender-based domination, or the degradation of democratic politics? What might this method allow us to see that other modes of inquiry cannot? 3. How, if at all, must Marxist styles of inquiry adapt in order to maintain their relevance as analytical tools? How have more contemporary Marxist thinkers expanded, modified, or critiqued the work of Marx in order to maintain the life of the tradition? Which new categories have been integrated into Marxist theorizing in recent decades, and to what effect? 4. What is insufficient with the Marxist method? What inevitably falls outside of its purview? Is this a fatal flaw or a problem to be corrected? Is it appropriate for us to ask that this method allow us to explain everything? 5. What is "Marxism" and how might it differ from the work of Marx himself? How do we link certain seemingly disparate literatures

together as a coherent movement? In other words, what makes "Marxism" an "ism"?

GOVT355 Political Theory and Transitional Justice

Transitional justice refers to the variety of legal, political, and social processes that occur as a society rebuilds after war; it includes war crimes trials, truth commissions, and the creation of memorials. Although the term "transitional justice" is a recent one, the philosophical issues contained within it are at the core of political philosophy. What kind of society is best? What is the relationship between political institutions and human nature? What does justice mean? The purpose of this course is to understand the issues of transitional justice from both practical and philosophical perspectives and will include case studies of World War II, South African apartheid, and the genocide in Rwanda.

GOVT356 Theorizing Subjection Beyond Contract and Consent

What modes of subjection does political life elicit from us, and how do they underpin and challenge our ideas of consent? Can we give genuine consent when we have already been subjected to parental authority? When we have unconscious desires we cannot avow? When we lack meaningful control over the norms that constitute our political, social, psychic lives? This class examines the centrality of the notion of consent to the liberal democratic order, and how it requires a prior mode of subjection that the liberal subject cannot knowingly or willingly consent to. In Unit 1, we read classic formulations of the liberal individual who consents to political rule (Locke, Hobbes, Rousseau). We look for the ways these theorists presuppose and disavow practices of subject formation that are beyond consent--parental authority, the informal authority of mores and norms, deception, precarity, ideology. We then read critiques of the social contract tradition that highlight the constitutive exclusions of liberalism, and ask how consent bears upon subjects that are constituted by the state as included others (Pateman, MacKinnon, West, Mills, Simplican). In Unit 2, we read critiques of the liberal subject that interrogate the possibility of genuine consent, examining issues of false consciousness (Marx, Marcuse), self-opacity and the unconscious (Freud, Benjamin), discursive constitution (Foucault), and performativity (Butler). We use these thinkers to interrogate the distinctions underpinning liberal notions of consent, such as autonomous and heteronomous, authentic and inauthentic, public and private. In Unit 3, we examine how the notion of consent is changing in our current political moment, in which the liberal democratic state is waning, but the notion of consent persists, such as under neoliberalism (Brown, Feher, Berlant), sexual assault (Kessel, Halley, Murray), and right-wing movements (Grattan, Anker). We close by considering what might be alternatives to and reconfigurations of this model of consent (late Foucault, Maxwell).

GOVT357 Saving the Republic: Lessons from Plato for our Time

More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in *The Republic*, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E.,

a crucial moment in Athenian democracy. Following a close reading of *The Republic*, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the *Reacting to the Past* curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on *The Republic*, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing *The Republic's* relevance for contemporary United States.

GOVT366 Empirical Methods for Political Science

This course is an introduction to the concepts, tools, and methods used in the study of political phenomena, with an emphasis on both the practical and theoretical concerns involved in scientific research. Designed to get students to think like social scientists, the course covers topics in research design, hypotheses generation, concept/indicator development, data collection, quantitative and qualitative analysis, and interpretation. Students will become better critical consumers of arguments made in mass media, scholarly journals, and political debates. The course is especially appropriate for juniors who are considering writing a thesis in government.

Prereq: **GOVT151 OR GOVT155 OR GOVT157 OR GOVT159**

GOVT368 National Security Law

In this course, students will learn legal concepts that govern law enforcement investigations and criminal prosecutions, and then explore how those concepts apply in the context of national security. The course will examine (1) the history and structure of the U.S. Intelligence Community; (2) differences between investigative tools such as search warrants and wiretaps in traditional and national security cases; (3) the history, role, and future of the Foreign Intelligence Surveillance Act; (4) how counterterrorism and counterespionage statutes operate; and (5) how prosecutors use classified information as evidence in public trials. Guest speakers and current events will inform part of the semester.

GOVT369 Political Psychology

This course explores the political psychology of individual judgment and choice. We will examine the role of cognition and emotions, values, predispositions, and social identities on judgment and choice. From this approach, we will address the larger debate regarding the quality of democratic citizenship.

GOVT371 Judicial Decision-Making

This course examines the roles judges play in American politics, with a particular emphasis on judicial decision-making. Topics include, but are not limited to: theories of judicial decision-making, the selection of judges, judicial empathy, and constitutional interpretation. Throughout the course, we will engage in a multidisciplinary discussion about the craft of judging, with a focus on political science theory and empirics.

GOVT372 Political Communication in Polarized Environments

Polarization in American politics heightens the communication challenges for those seeking to persuade, whether they be public officials, scientists, or citizens. This seminar will provide an in depth look at the barriers to persuasive communication and information dissemination in the age of polarization and what (if anything) is effective in cutting through partisan predispositions.

GOVT373 Congressional Reform

The modern Congress is often criticized for being too partisan, inefficient, and beholden to special interests. This seminar will examine the development of the modern Congress by focusing on the history of congressional reform. We will also evaluate proposals for reforming the modern Congress to remedy potential shortcomings in the lawmaking and ethics process.

Prereq: **None**

GOVT374 Seminar in American Political Economy and Public Policy

In 2023, the standoff over the debt ceiling threatened to have catastrophic consequences for the U.S. and the world economy. Why were the politics so complicated? Why were the stakes so high? This seminar explores the long-term fiscal challenges facing the United States grounded in a broader discussion of the postwar political economy. Although the nation exited World War II with a record level of debt, within three decades, the debt-to-GDP ratio had fallen by almost 80 percent. However, significant tax cuts in the 1980s and again in the 2000s, the growth of entitlement spending, and a series of shocks (e.g., two wars, the financial crisis, and the COVID-19 pandemic) brought about a great reversal. Within the next few decades, the national debt is projected to exceed 200 percent of GDP. By that time, interest payments will be the largest component of federal spending. Moreover, absent policy change, the trust funds supporting Social Security and Medicare will become insolvent, placing greater pressure on public finances. This seminar will explore the structure of federal finances, the politics of taxation, the growth of entitlements as a share of federal spending, the ways in which polarization has undermined the budgetary process, and the normative and practical implications of the debt. We will conclude with a discussion of competing reform proposals.

Prereq: **None**

GOVT375 American Political Development

This is a course about the big questions in American politics. What is it all about? What does it mean to be living under a text written more than two centuries ago? Is the very concept of development an oxymoron for constitutional government? This course introduces students to a scholarship and a method of analysis that melds the historical with the institutional, applied to understanding the evolving state/society relationship in American political life. We will examine the ways in which developing state institutions constrain and enable policy makers; the ways in which ideas and policy-relevant expertise have impacted the development of new policies; the ways in which societal interests have been organized and integrated into the policy process; and the forces that have shaped the evolution of institutions and policies over time. This seminar will provide an opportunity to survey the literature drawn from several theoretical perspectives in the field and to consider competing arguments and hypotheses concerning the development of the American state and its changing role in the economy and society.

GOVT376 Political Polarization in America

In the 1950s, political scientists feared that weak parties in the United States threatened democratic accountability. Today, many political scientists argue strong, ideologically extreme parties distort representation. Undoubtedly, things have changed, but why? Several possible culprits exist, including partisan gerrymandering, primary elections, the ideological realignment of the electorate, and changing congressional procedures. We will cover the possible explanations and try to decipher what explanation, or combination of explanations, is most convincing. While we evaluate the arguments for why polarization has increased we will also debate the merits and drawbacks of strong parties at the elite level. Finally, we will examine to what extent polarization among elected officials and activists reflects polarization in the public.

GOVT377 American Political Thought

This course will provide students with a thorough discussion of the main currents of American political thought. We will explore a selection of key texts and speeches that have helped to shape American political culture. Beginning with the Founders and ending with the contemporary era, we will cover moments of critical change between then and now. We focus on the intellectual battles of the past because, apart from being rewarding in themselves, they help us to think critically about contemporary politics. Accordingly, this course will emphasize how ideas give rise to individual identities, how they motivate political actors, and how they explain political outcomes.

GOVT378 Advanced Topics in Media Analysis

Government, corporations, campaigns, nonprofits, other organized interests, and sometimes individuals have a vested interest in knowing and reacting to media messages that affect them. To do so, they need information on what is being said, in what venue, by whom, and with what effect. This seminar will provide hands-on, in-depth experience with academic research involving media, including the type of advertising analysis conducted by the Wesleyan Media Project team. Students will be involved in various aspects of research, including data collection, data coding, literature reviews, data analysis and visualization, and writing/editing.

GOVT379 Access to Civil Justice

In this course, students will explore contemporary issues related to the public's ability to access civil legal advice, legal representation, and fair outcomes within our civil justice system. Students will be exposed to scholarship that highlights the difficulties the public faces when they have justice problems, including 1) exclusion from legal processes; 2) lack of resources; 3) lack of awareness of rights; 4) difficulty recognizing the nature of their problem; and 5) lack of confidence in the justice system. The course will culminate with student-designed research projects investigating and proposing solutions to an access to justice question relevant to a collaborating local, state, or national civil justice organization's work.

GOVT380 Public Opinion and Polling Lab

Survey research is a crucially important tool for understanding how everyday people think about any given topic. This is especially important to those studying government in a democracy as public preferences serve as a key guide to legislators and policy makers on how the government should function. However, there are a number of challenges that can make getting an unbiased assessment of the public's true beliefs difficult. This course is meant to serve as a more advanced hands-on seminar that will expose participants to the exciting and messy nature of survey research. More specifically, students will get first-hand experience designing surveys and analyzing the results but will also work through the many challenges in assessing public attitudes, including how to conceptualize and measure opinions and how to sample and weight data appropriately.

GOVT381 DeltaLab: Computational Media Analysis

The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.

GOVT384 Representation in Congress

This class will examine the nature of congressional representation both from the perspective of how individual members represent their constituents and how effectively Congress as a whole represents the diverse interests of the country. We will pay particular attention to how reelection motivates members of Congress's behavior and how increases in polarization and the centralization of power in the hands of party leaders has affected the nature of congressional representation. In addition, we will focus on the degree to which certain groups are over or underrepresented in Congress and the resultant consequences for policymaking and institutional legitimacy.

GOVT386 The Nuclear Age in World Politics

This course examines the role of nuclear weapons in world politics. Why do states acquire nuclear weapons? What are they good for? Do nuclear weapons make weak states more secure by leveling the playing field, or less secure by making them targets for annihilation? Are nuclear weapons a force for stability or instability? Are missile defenses defensive or offensive? Are these weapons still relevant, or is it time to rethink their usefulness? Topics include rational and extended deterrence, strategic doctrine, nuclear superiority, the stability-instability paradox, nuclear proliferation, rogue states, nuclear terrorism, missile defense, and Cold War crises.

GOVT387 Foreign Policy at the Movies

Recent research on public opinion has suggested that public attitudes about foreign affairs are informed by many non-news sources. This course examines the messages and information provided by movies with significant foreign affairs content. The questions considered are, What are the messages about international politics sent by the movies? Are these messages consistent with the understanding of the events and processes within the political science literature? What are the implications of movies and the information they provide for democratic governance? Students will watch the movies outside of class. Class periods will be devoted equally to discussion of the political science concepts and their portrayal in films.

GOVT389 Globalization in Practice: Activism in the Global Village

Globalization is considered by many to be the most powerful transformative force in the modern world system. Modernization and technology have effectively made the world a smaller place with respect to the interdependence and interpenetration among nations, which are greater today than at any time in history. But while most agree on the transformative power of globalization, many disagree on its nature and its effects on modern society. Liberals hail globalization as the ultimate means to world peace and prosperity. Leftists see it as a means of reinforcing the inequality and unbalanced division of labor created by modern capitalism. Still others, such as mercantilists and nationalists, see it as a source of political instability and cultural conflict. In the final analysis, globalization carries a variety of malign consequences but also produces

abundant means for advancing life on our planet. This class will approach globalization through an activist platform. Each student will be an activist and work on solving real world problems that are produced by globalization. But globalization has also generated a great many resources and outcomes that can be used by activists to solve these problems. Students will learn to use these as building blocks for a better world.

This class is heavily project-based. It applies theories and learning to real life situations. There is also much teamwork involved. The learning goals of this class are based on developing professional skill sets: problem solving abilities, consulting, team work, oral presentations, preparing functional memos, and working in professional activist environments.

GOVT390 Presidential Foreign Policy Decision-Making

In the realm of foreign policy, good choices can avoid or win wars, while poor choices can lead to disaster. Although analysts consistently evaluate the quality of US presidential foreign policy decision-making, the fundamental aspects of good and poor judgment remain controversial. This course starts with a consideration of the effects of both individual character and decision-making processes in determining the quality of foreign policy choices. The majority of the course focuses on these issues through the intensive simulations of foreign policy decision-making, with students taking on the roles of the major players.

GOVT393 The Politics of Authenticity

Is there such a thing as an authentic self? If so, can politics help us realize it? Fifty years ago, authenticity was a thriving political ideal, invoked by radical feminists, black liberation movements, gay and lesbian activists, Marxists and conservatives alike. Over the past four decades, however, political appeals to authenticity have come under heavy scrutiny. Some claim that appeals to authenticity inadvertently marginalized individuals who are not "true women," "real blacks," or "actual natives." Others argue that the idea of an authentic culture can be deployed to constrain individual members of cultural minorities. Where does authenticity reside--in gender, sexuality, experience, or culture--and how do we know which one is "real"? Is it worth faulting politicians for hypocrisy if there is no such thing as a "true self"? What becomes of certain emancipatory or justice claims--such as those coming from trans-politics or multiculturalism debates--without a notion of authenticity? In this course, we will discuss what authenticity is or might be, how it has been conceptualized in political theory and contemporary social movements, and why it has become an object of widespread suspicion and continuing appeal.

GOVT394 Law, Justice, and Democracy

This advanced research seminar will study law through a political sociological lens. Students will write a major term paper exploring a theoretical or empirical question.

We will ask: What is law? What does it mean to think of law as a social construct? We will explore how these questions have been answered by social theorists like Marx, Weber, Durkheim, and Foucault, and by legal scholars writing in the tradition of legal positivism, legal realism, and critical legal studies.

We will talk about the relationship between law and justice. What does it mean for laws to be unjust? What are the normative arguments that have been made about how to respond to unjust laws?

We will discuss how social phenomena get legally constructed. Who is a person? What constitutes speech? What constitutes religion? What is a crime? What is gender? Who is a criminal? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

We will spend some time on questions of crime and punishment. We will talk about the history of modern prison, and why the carceral state has expanded in the U.S. We will also talk about death penalty, and how and when the modern state kills.

Finally, we will talk about the place of courts in the American system of government, and policymaking.

GOVT395 Caste, Race, and Democracy

Drawing on the resources of social and intellectual history, political theory, literature, and social science, this seminar will explore the intimacies and differences between two forms of social differentiation: caste in South Asia and race in the United States. We will focus, in particular, on the relationships between caste formation, racial formation, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression.

GOVT396 Human Rights Advocacy: Critical Assessment and Practical Engagement in Global Social Justice

The core animating principles and practices of human rights are under threat. Will the global human rights movement be able to respond effectively? How could or should the movement advance the cause of global social justice most effectively? This seminar seeks to answer these questions by assessing global rights defense and social justice practice and by engaging in structured, self-critical human rights advocacy.

Among the issues considered in this seminar will be the following: What are the origins of the human rights movement? Has the movement been dominated by ideas from the West and elite organizations from the Global North? What does it mean to be a human rights activist? What is the role of documentation, legal advocacy, and social media in human rights advocacy? What are the main challenges and dilemmas facing those engaged in rights promotion and defense?

Students will be required to write several short reflection papers. The final project will be an exercise in developing a human rights advocacy project or supervised engagement in actual human rights advocacy in conjunction with the University Network for Human Rights (humanrightsnetwork.org). This class is limited to students already admitted to the Human Rights Advocacy Minor.

GOVT399 Citizens, Judges, Juries: Who Decides in Democracy?

The tensions between rule by the people, rule by elites, and rule of law are at the core of democratic theory. What is the proper balance among the three? Under what circumstances is one group of decision makers better than another? What happens when they come into conflict? This is an upper-level course in political theory designed for students who have taken GOVT159, The Moral Basis of Politics or an equivalent course in philosophy and related disciplines. We will focus on the following topics: the role of voting in liberal democracies, the Athenian jury system, deliberative democracy, referendum and initiatives, civil disobedience, and the role of juries in the U.S. criminal justice system.

GREEK (GRK)

GRK101 Introduction to Ancient Greek: Semester I

This course is an introduction to the rich and beautiful language of ancient Greek, the language of Homer, Plato, and Euripides. In the first semester students will begin to learn the grammar and syntax of the language and start developing the vocabulary necessary to appreciate and understand Greek with the goal of reading as soon as possible. Throughout the semester we will also explore some inscriptions and dip our toes into both Herodotus and biblical Greek.

This course is a prerequisite for GRK102.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

GRK102 Introduction to Ancient Greek: Semester II

This course is a continuation of GRK101. We will complete the study of Greek grammar and continue to develop vocabulary and reading skills. We will read selections from Sophocles, Euripides, Lysias, Apollodorus, Demosthenes, Aristotle, and Plato, among others.

Offering: **Host**

GRK205 Reading Greek Prose: Court Room Dramas, Selections from Athenian Oratory

In classical Athens there were no public prosecutors and no lawyers. Citizens took it on themselves to prosecute their political enemies, their wives' lovers, and violent offenders against family, friends, and state. Court cases are fascinating for the laws, political dynamics, social beliefs, animosities and gossip they bring to light. In this course, we will focus on selections from two cases in Greek and will also read additional cases in translation.

Prereq: **None**

GRK250 Body, Soul, and Afterlife Journeys in Ancient Greece (CLAC.50)

The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This CLAC course is connected to the Classical Civilization course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this CLAC course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Greek.

GRK252 Dionysiac Transformations: Gender, Violence, and Justice in Euripides' Hecuba

Euripides' "Hecuba" dramatizes the immediate aftermath of the Trojan War, as the victorious Greeks are waiting for favorable winds in Thrace--a no-man's-land. At this liminal time and space, we witness the "civilized" victors' abuse of power and the law against their female captives and the brutal revenge of the oppressed, culminating in literal transformation and loss of human form. Working with the Greek and secondary readings, we will explore the rhetoric and morality of power, justice, and empathy, how these shift within the plot, and how the dramatic medium itself may affect the audience's sympathies.

GRK290 Truths and Other Fictions

What makes for a good story? What makes for a good argument? Is deception ever beneficial?

In this course we will read selections from ancient Greek works in the original, ranging from Homer, tragedy, love-poetry, law-court speeches, sophistic treatises, and Platonic philosophy to explore whose truth prevails, whose story moves, and who is better for it. The precise selection of sources will depend on the composition of the student-group and previous familiarity with Greek texts.

For CLST Major requirements, this course can be used for the Literature and Performance track and the History, Politics, and Social Justice track.

GRK291 "Sexuality" in the Making: Gender, Law, and the Use of Pleasure in Ancient Greek Culture (CLAC.50)

The parent course (CCIV 281/FGSS 281) examines the construction of gender roles in ancient Greece and approaches gender as an organizing principle of private and public life in ancient Greek society by using literary, scientific, historical, and philosophical sources as well as material evidence. Issues addressed include: the creation of woman, conceptions of the male and female body, the legal status of men and women; what constitutes acceptable sexual practices and for whom (e.g., heterosexual relationships, homoeroticism, prostitution etc.); ideas regarding desire, masculinity and femininity, and their cultivation in social, political, and ritual contexts such as rituals of initiation, marriage, drinking parties (symposia), the law court, and the theater.

The textual sources used in the course cover a spectrum of genres: medical texts, Homer, lyric poetry, tragedy, comedy, law-court speeches, and philosophy among others. In the CLAC connected to this course students with some background in ancient Greek will read selections from these genres and will be able to compare different discourses and registers in the original. In the past, even through brief lexical examples--e.g., pointing at the use of *ta Aphrodisia* (the things/matters related to Aphrodite) in a culture that has no one term/concept for our notion of "sexuality"--students were intrigued by how different terms and discursive media in the original may offer access to perspectives, visions, and values that differ from and can, in turn, inform our own. The CLAC will create an opportunity precisely for this kind of access and a better informed and nuanced conversation.

GRK350 Body, Soul, and Afterlife Journeys in Ancient Greece

The connection between body and soul and their journey in the afterlife were at the center of how the ancient Greeks thought not only of mortality but also of the good life itself. This course is connected to the Classical Studies course titled "Death and Afterlife in Egypt and Greece" that will be taught in the fall by Kate Birney. The parent course explores the archaeology of death and burial in Egypt and Greece. It examines how the funerary practices and the very notions of death, the soul, the body, and the afterlife operated in these societies by drawing upon diverse evidence--archaeological, art historical, and mythological.

In this course students with some background in ancient Greek will read selections of the surviving evidence on death and the afterlife. Sources will be

drawn from diverse genres and periods: historiography, Homeric poetry, Platonic philosophy, and religious tablets. This diversity will offer a unique opportunity to identify different registers and to explore how language itself reflects and in turn shapes the ideas and practices for which it is used. We will thus be looking at: how different media and performances are used to express loss, hope, and heroism in the face of death; how social class, gender, and political ideology are reflected in these media and how they influence ideas about death and the afterlife; and, last, how we are to create adequate methodologies as "readers" of such diverse evidence.

The selections will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This course is conceived as appropriate for students on the advanced level of ancient Greek.

GRK355 Homer in Bronze Age Context

Although written down in the 6th century B.C., the Homeric epics offer a literary narrative that captures echoes of a Bronze Age world in transition, an era of globalization reshaped by collapse, migration, and war. Empires fell and pirates plundered. This course recontextualizes the original Greek texts of the "Iliad" and the "Odyssey" in this space.

Reading sections of the "Iliad" and the "Odyssey" in the original Greek, this course introduces students to the literary and linguistic structures of Homer and contemporary Mediterranean texts. We will examine Homeric language and scholarly approaches to structure, narrative, and cultural concepts (kinship, blood sacrifice, piracy, honor) in the context of Bronze Age Indo-European texts, from Hittite historical annals and poems, to Mycenaean Linear B tablets (the earliest-known form of Greek), as well as inscriptions from Archaic-period Greece.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

GRK365 Greek Tragedy: Euripides

Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

GRK367 The Great Greek Creation Myth: Hesiod's Theogony

In this seminar, we will read Hesiod's Theogony, the Greek creation myth, in the original ancient Greek and examine this fabulous work in light of other creation stories of the ancient Near East, Egyptian, and Hittite cultures by which it was influenced. Through examination of structural themes and motifs (how the universe was created and ordered, the role of violence, the origins of an application of justice, the creation of mankind, the shaping of women), we will discuss whether and how the Theogony diverges from other creation myths to establish or reflect values that can be said to be uniquely Greek. Discussion will be supplemented by passages from Hesiod's Works and Days, along with other creation myths and secondary scholarship.

HEBREW (HEBR)

HEBR101 Beginning Hebrew I

In the beginning, there was an old Hebrew language that was dead in the 19th century and then revived into a modern language. In this course you will begin your journey into a fascinating language that is used to read ancient as well as modern texts. From reading with vowels, to reading without vowels, from handwriting in script to typing in Hebrew (so that you will be able to use social media), Hebrew has always had something special and unique to offer. Students will not only be introduced to all aspects of reading, writing, and speaking the language, but also will be exposed to the language as embedded in its cultural context. To meet that end, students will attend the series of Contemporary Israeli Voices 2024, which brings to campus the most diverse and contemporary cultural voices as well as converse with native speakers over Lunch and Learn meetings. Those extra cultural events account for the additional half credit (with a total of 1.5 credit for this course). This course counts toward the minor in Jewish and Israel Studies.

Offering: **Host**

HEBR102 Beginning Hebrew II

In the second part of the Beginning Hebrew course, students will continue their journey to studying the Hebrew language, an old language that was dead in the 19th century and then revived into a modern language. Students will be introduced to all aspects of reading, writing, and speaking along with an emphasis on enlarging vocabulary, learning new grammatical concepts, writing short compositions, and further developing all language skills. Multimedia resources will be used to enhance listening and comprehension. Exposure to cultural material will also be explored through participation in the 18th Annual Ring Family Wesleyan University Israeli Film Festival 2025, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Participation in cultural events account for the additional 0.5 credit with a total of 1.5 credits for this course. This course counts toward the minor in Jewish and Israel studies.

HEBR201 Intermediate Hebrew I

In this course, students will continue their journey, exploring Hebrew on a higher level, both linguistically and culturally. Linguistically, students will master new

grammatical skills, work more intensively on their conversational skills, and type short papers in Hebrew. Culturally, students will be exposed to Israeli media and ongoing public discussions. This will include students participating in the 22nd Annual Contemporary Israeli Voices 2024 series, which will feature renowned international scholars and writers. Students will attend lectures, converse with native speakers over Lunch and Learn meetings, and write a short paper on each event. The cultural events will account for the extra half credit. The course counts toward the Minor in Jewish and Israel Studies.

HEBR202 Intermediate Hebrew II

In this course, students will continue their journey, exploring Hebrew on a higher level, both linguistically and culturally. Linguistically, students will master new grammatical concepts, read more complicated texts, work more intensively on their conversational skills by presenting a subject of their choice as well as participating in students' debates, and typing short papers.

To meet the cultural component, students will participate in the Seventeenth Annual Ring Family Wesleyan University Israeli Film Festival 2024, which brings to campus film premieres of the most diverse and contemporary films. In addition to attending film screenings, students will meet and converse in Hebrew with Israeli film directors, cinema critics, and professors who are also native speakers over Lunch and Learn meetings. Students will reflect upon the films by typing a short response paper. Participation in cultural events accounts for the additional half credit, with a total of a credit and half for this course. The course counts towards the Minor in Jewish and Israel Studies.

HEBR315 Hebrew in the Media: From National Literature to International Films and TV Shows (CLAC 1.0)

This new language course is offered as an enrichment opportunity to students with intermediate or advanced Hebrew skills who are interested in improving all their language skills and/or acquiring additional linguistic and cultural preparation for study abroad in Israel. Cultural activities including participating in the 23rd Annual Contemporary Israeli Voices 2024 and Lunch and Learn meetings with native speakers are part of the course. In addition, special writing workshops with internationally renowned Israeli scholars will be integrated into the course curriculum. The course explores the changes in Israeli society as it moves from national ideological literature to the exploration of new multicultural media such as films and TV shows and thus gaining international fame and inspiring widespread emulation. The course may be repeated for

credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. For more information, please check <http://wesleyan.edu/cgs/eventsprograms/clac/index.html>.

The course counts toward the minor in Jewish and Israel Studies.

HEBR413 Israeli Cinema (CLAC 1.0)

This Hebrew course will be linked to the film course, taught in English, entitled CJST 250: Eyes Wide Shut: The Eternal Presence of the Absent Arab in Israeli Cinema. This course is targeted toward students with very advanced knowledge of the Hebrew language. Students will mostly view the same films as the parent class, with special attention to the Hebrew language. We will analyze, discuss, and write on each of the films. The focus of the course will be to map the cultural and social changes in Israeli society reflected in the transformation in format and themes of Israeli films. Scholar visits will be part of the course, and students will attend a few cultural enrichment activities. This course may be

repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative; for more information, see <https://www.wesleyan.edu/cgs/eventsprograms/clac/index.html>.

HEBR414 Israeli Cinema (CLAC 1.0)

This most advanced Hebrew course can be taken either as a language enrichment course to the parent course, CJST223: Israeli Women Filmmakers and Israeli Society, or taken by itself independently as an advanced Hebrew course.

The focus of the course will be studying films made by female filmmakers.

Students will analyze, discuss, and write on the films with special attention to mapping the cultural and social changes in Israeli society as well as changes in films' formats and themes. Conversing in Hebrew with Israeli film directors and scholars during Lunch and Learn Meetings as well as attending the screening of films in Hebrew in the 18th Annual Ring Family Wesleyan University Israeli Film Festival and writing reflective papers on films will provide a cultural and social framework for the course. In addition, the course will include special workshops delivered by renowned Israeli filmmakers and scholars. The course may be repeated for credit. This course is part of Wesleyan's Cultures and Languages Across the Curriculum (CLAC) initiative sponsored by the Center for Global Studies. HINDI-URDU LANGUAGE (HIUR)

HIUR101 Introduction to Hindi-Urdu Language and Culture I

This course is an introduction to the modern standard form of Hindi-Urdu, the most widely spoken language in South Asia, with its manifestation in deeply rooted cultural contexts. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film (in particular recent Bollywood songs) to reinforce structures and vocabulary.

The goal of this course is to provide students with a solid foundation in Hindi-Urdu grammar and vocabulary, as well as the cultural awareness and practical experience necessary for basic, yet accurate and appropriate, communication in spoken and written Hindi-Urdu. This course is designed to develop students' ability in the four skills of language learning. Students will learn to confidently navigate a range of common social and "survival" situations in Hindi-Urdu target cultures. Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

Core objectives include: the development of communicative and interactional abilities in Hindi-Urdu on familiar topics related to daily activities; the development of analytical competence (analysis of language, critical thinking, etc.) and learner autonomy through linguistic analysis and reflection; and the development of sociocultural/intercultural awareness governing language use according to the appropriate target cultural norms.

HIUR102 Introduction to Hindi-Urdu Language and Culture II

This course is a continuation of Introduction to Hindi-Urdu Language and Culture I. It offers a balanced treatment of speaking, listening comprehension, reading, writing skills, and desi culture. Through scaffolding techniques, students will reach their potential zone of proximal development (ZPD), which is Novice-High, from their current ZPD, which is Novice-Mid.

At the end of the course, students will be able to communicate short, culturally appropriate messages on highly predictable, everyday topics that affect them directly. They will be able to produce lists and notes, primarily by writing words and phrases. They can provide limited formulaic information on simple forms and documents. These writers can reproduce practiced material to convey the simplest messages. In addition, they can transcribe familiar words or phrases, copy letters of the alphabet or syllables of a syllabary, or reproduce basic characters with some accuracy.

Students will get level-appropriate knowledge of the target culture, which is an essential ingredient of the course. All the material and activities will be presented through contextualized material. Students can understand key words, true aural cognates, and formulaic expressions that are highly contextualized and highly predictable, such as those found in introductions and basic courtesies. They will be able to understand words and phrases from simple questions, statements, and high-frequency commands.

Upon completing this course, students will have mastered the core constructions of Hindi-Urdu grammar and a large body of vocabulary and cultural knowledge necessary for many real-world interactions with Hindi-Urdu speakers.

HIUR201 Intermediate Hindi-Urdu Language and Culture I

This course is a continuation of Introduction to Hindi-Urdu Language and Culture II, which emphasizes written expression and texts in both Perso-Arabic and Devanagari script systems and familiarity with cultures of the South Asian diaspora. The goal of this course is to provide students with an opportunity to build upon their knowledge of the Hindi-Urdu language and culture and bring them up to the intermediate low/mid-level in all four skills: reading, writing, listening, and speaking.

At the end of this course, students will be able to successfully handle a limited number of uncomplicated communicative tasks in straightforward social situations. Students will be able to produce some of the concrete exchanges and predictable topics necessary for survival in the target-language culture. These topics relate to basic personal information; for example, self and family, some daily activities and personal preferences, and some immediate needs, such as ordering food and making simple purchases. Students will also be able to ask a few appropriate questions, creating and writing statements and formulating questions based on familiar material.

As listeners, students will be able to understand simple, sentence-length speech, one utterance at a time, in a variety of basic personal and social contexts. They will develop accurate comprehension with highly familiar and predictable topics. Intermediate-mid listeners may get some meaning from oral texts typically understood by advanced-level listeners.

As readers, students will be able to understand short, noncomplex texts that convey basic information and deal with basic personal and social topics to which the reader brings personal interest or knowledge, although some misunderstandings may occur. Readers at this level may get some meaning from short connected texts featuring description and narration, dealing with familiar topics.

HIUR202 Intermediate Hindi-Urdu Language and Culture II

This course prepares students to achieve intermediate low-to-high level speaking, listening comprehension, reading, and writing skills. With a strong emphasis on achieving proficiency in spoken Hindi-Urdu, students are encouraged to speak Hindi-Urdu as much as possible, both in and outside of the classroom. Enrolled students are encouraged to form study groups that meet regularly outside of class to practice conversation in Hindi-Urdu and to learn nuances of the culture.

Students will work with a variety of web-based materials to learn songs; watch short film clips and advertisements; and read letters, dialogues, song lyrics, poems, and short stories in Hindi-Urdu. This course will introduce students to many aspects of Hindi-Urdu-speaking cultures through authentic language use, and students will also have the opportunity to participate in the Hindi-Urdu language learning community on campus.

Standard text, course materials prepared by the instructor, and authentic materials (contextualized in the target culture) available on the internet will be used with equal emphasis on spoken and written Hindi-Urdu. The structure and conversations will be prepared in a variety of authentic contexts of Hindi-Urdu. Students are also offered extensive exposure to spoken language emphasizing speaking and listening at normal speed with near-native pronunciation and intonation. By the end of this course, the students will be at the intermediate-high level of the ACTFL proficiency scale. At this level student are expected to converse comfortably in colloquial Hindi-Urdu on a wide variety of familiar subjects.

HIUR251 Hindi-Urdu Language and Culture for Heritage Learners

This course is specifically designed for heritage learners of Hindi and Urdu who have some proficiency in these languages. Such students may speak or merely understand the heritage language(s) and are, to some degree, bilingual in English and the heritage language.

The course can be tailored to the specific needs of learners of both Hindi and/or Urdu; the content of the course will be selected according to needs and requirements of each learner. For this purpose, a needs analysis will be conducted at the beginning of the semester to learn the students' proficiency level and interests.

As part of this class, students will not only learn the language and culture in the class but also get a chance to practice the language and familiarize themselves through language tables and a native peer from the target community. Students will visit cultural/community centers to get a feel for the language and culture in practice.

HIUR303 Urdu Literature and Poetry (CLAC 1.0)

This course is specifically designed for students who have advanced skills in the Urdu language. The syllabus includes readings that range from classic to current traditions. You will read Mir Taqi Mir, Mirza Ghalib, Iqbal, Nasir Kazmi, Sadat Hassan Manto, Ishfaq Ahmad, Bano Qudsia, Abdullah Hussein, and many more. The main goal of the course is to familiarize you with Urdu literary traditions. You will also have opportunities to improve your expository and creative writing skills in Urdu by completing various projects and assignments. Course topics include the development of Urdu, Urdu poetry, and Urdu prose.

HISTORY (HIST)

HIST101F History and the Humanities (FYS)

This course offers first-year students an opportunity to explore the humanities from a variety of different disciplinary perspectives, traditionally Western as well as global, and to make connections between humanistic learning and history. The course is a small discussion seminar in which primary source materials, or classic texts, are used exclusively. An effort will be made to examine the interrelationship of ideas in the various disciplines and to compare history, literary analysis, philosophy, and theory as modes of inquiry and as ways of thinking about documents and texts. The course thereby aims to provide students with the critical tools by which to analyze texts produced in the remote or recent past. The course also serves a related purpose: to familiarize students with the heritage of Western historical tradition and to impart knowledge of the crucial role of history and the humanities as a component in general education. Students may take HIST101F without having to take HIST102F.

HIST103F From Protest to Revolution: A Middle Eastern History (FYS)

This seminar explores protests, rebellions, insurgencies, and revolutions that have shaped the history of the Middle East from the birth of the three

monotheistic religions to this day. Why do people rebel? We will seek answers in the context of religion, ethnicity, language, and race in the long and political history of this wide-ranging human geography. The main focus will be the agency of those who strived for change and modes of resistance, finishing with the 21st-century activism in labor, LGBTQ+, student, journalist, academic, and political Islamic mobilizations.

HIST104F Islam and Empire Through Fiction (FYS)

This first-year seminar will cover the three different empires of the Early Modern era (c. 1500-1800), encompassing much of the Muslim world: the Ottoman Empire in the core of the Middle East, Safavid Empire in Persia and beyond, and Mughal Empire in South Asia. Our aim is to analyze both common and divergent patterns and structures of imperial rule as well as shared imperial legacies and cultural resources. In addition to lectures and secondary background readings, students read and discuss fictional works, with a view to exploring "Islamic civilization" through literary voices of acclaimed authors. Reading fiction is to help us through the fragmentary nature of the sources used to reconstruct the major debates that surround the emergence and formation of Islamic empires in the Early Modern period. Questions of fictional narration, historical memory, and revisionist history will also be discussed.

HIST106F Black Reconstruction: The Origins of America's Racial Divide (FYS)

Voter intimidation, racial violence, an impeached president, an embattled Congress, threats of a civil war, and emboldened domestic terrorists are not a new phenomenon in American history. All have their roots in America's most violent, revolutionary, and contested era: Reconstruction. Beginning after the Civil War, Radical Republicans inside and outside Congress worked with free Black allies to found an American nation that lived up to its ideals. White domestic terrorists, backed by an increasingly recalcitrant Democratic Party, violently opposed the increased political power and civil rights of African Americans. In this first-year seminar, we will examine the contours of that contest, the world that it created, and the lasting influence of America's unfinished revolution.

HIST107F Life of the Modern Fact (FYS)

Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This course explores the tools and techniques that people have used to craft facts in varied domains of applied science, such as agriculture, climate modeling, epidemiology, and pharmaceutical production. The course also examines how broader social structures, such as law and community, helped produce facts as people shared, defended, and used them. We consider examples from the 17th century through the present day, including practices of nature study, classification, quantification, and experiment.

HIST108 Time Machines: Bringing the Past to the Present and the Future to the Past

In the course we will explore how ghosts of the past and imaginaries of the future haunt the present. We will do so by looking at the temporal disjuncture in canonical and seemingly concrete evidentiary categories of disciplinary history. In essence, we will see how they serve as time machines to bring the past into the present and the present to the future. The course will be organized around a variety of themes from ghosts, haunting, trauma, and historical injustice, through heritage, memory, and presentism, to technological imaginaries and the Anthropocene. In addition, we will look at the ways such imaginary time travel occurs in seemingly everyday sites as well such as supermarkets, films, and amusement parks.

HIST109F With Bold Knife and Fork: An Introduction to Food History (FYS)

This first-year seminar is an introduction to food history and food studies, two linked fields in which we ask how people have satisfied their appetites, and what their choices mean. This encompasses everything from the question of how agriculture began, to the question of what it meant to eat a Korean taco in Los Angeles in, say, 2014. Food history and food studies are vast fields, and in this seminar we will sample many versions of them. Because this seminar is designed for students just beginning college, it introduces a variety of academic approaches to food, from chronological analyses of how specific ingredients became important for specific populations, to the anthropological treatment of food and identity, to cultural histories informed by primary sources—that is, documents written by historical actors. We even read contemporary "food writing," including restaurant reviews, which are themselves historical documents of a sort. This course also has a strong chronological through-line, winding from the establishment of agriculture to the modernization and industrialization of global food ways.

HIST110F Been in the Storm So Long: Grassroots Movements and the Black Freedom Struggle (FYS)

Most civil rights narratives focus on Martin Luther King, Jr. and other prominent leaders of the civil rights movements. This course seeks to shift that narrative to young activists working on the ground in the struggle for Black freedom. These college students used grassroots organizing tactics, embedding themselves in local Black communities, to drive local politics and draw attention to larger systemic issues. We will look specifically at the work of the Student Nonviolent Coordinating Committee (SNCC), led by John Lewis and Stokely Carmichael, as they moved from the shock troops of the Southern freedom struggle to Black Power.

HIST112F Religion, Science, and Empire: Crucible of a Globalized World (FYS)

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

HIST116 Environmental History: Telling Stories in Place

This course introduces students to environmental history, the study of the changing relationships between humans and nature through time. We will consider how the natural world has shaped human history; how humans have transformed the environments they have moved through, made use of, and inhabited; and how ideas about nature have shaped people's interactions with the world around them and with one another. Focusing on both historiography and methods, we will read classic and recent work in the field and learn to conduct historical research. We will also pay attention to narrative and the writing of history, through reading, in-class workshops, peer editing, and trying different kinds of historical storytelling. The central assignment will be a short research paper in which students will practice environmental history through the study of a particular place.

HIST117 Chinese Cities

More than half of China's population now resides in cities. Within the next few years, China plans to accelerate the rate of urbanization by building sprawling cities and relocating more people into urban areas.

This course explores the history of Chinese cities from the imperial to modern age. Cities were centers of commerce, intellectual activity, and, in the words of historian and political scientist David Strand, "storehouses of political technique, strategy, and sentiment open to anyone with the understanding and the will to inventory to exploit them." We will study how cities supported massive populations with limited resources, inspired new forms of social organization, and transformed the political and social order of China.

HIST123F Cinema India: South Asia's Past on Film (FYS)

This first year seminar course examines the relationship of film and history in India. We will focus on how filmmakers represent the past and, alternatively, how films inform historical memory--especially in the context of the competing trajectories of nationalism, postcolonialism, and globalization. A central concern will be the historiographical challenges and opportunities of film. We will pay particular attention to Hindi cinema, including films produced by the Bombay/Mumbai ("Bollywood") film industry since the 1950s, though we will also consider the rise of "parallel" cinema. Feature films will range from classics like "Mughal-e Azam" (1960) and "Umraon Jaan" (1981), to lesser known works like "Shatranj ke Khiladi" (1977), "Mirch Masala" (1987), and "Hazaaron Khwahishen Aisi" (2005). We will also probe the critical and box-office success of relatively recent blockbusters such as "Lagaan" (2001), "Rang de Basanti" (2005), and "Jodhaa Akbar" (2008), comparing them to the ambivalent domestic and diaspora response to period dramas like "Dil Se" (1998), "Mangal Pandey" (2005) and "Laal Kaptaan" (2019).

HIST129 Philosophy and the Movies: The Past on Film

This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

HIST130F North American Borderlands (FYS)

North American Borderlands explores the physical, social, political, cultural, and economic spaces that borders create and purport to divide. The course

covers a long history and a wide variety of material - with subjects ranging from 17th-century contests between Algonquian peoples and Dutch traders along the saltwater frontier to the Gilded Age story of a Texas slave who reinvented himself as a Mexican millionaire, to the sulfur dioxide that blew up from U.S. power plants to fall as acid rain in Canada and sour relations between the two nations in the 1980s. By the end of the course, students will be able to recognize borderlands as distinctive spaces of conflict, exchange, dispossession, and opportunity.

HIST132 History of Energy

From fire to fossil fuels, humans are characterized by their ability to use more energy than other species. By capturing and releasing reservoirs of energy stored over the course of Earth's history, humans have increased their resource base, expanded global population, and modified the environments on which they have relied for subsistence.

This course introduces students to themes in the history of energy transitions, from photosynthesis to fire to the exploitation of fossil fuels beginning in the 19th and 20th centuries. By taking up the use of pre-industrial fuels, animal muscle, water, and wind, in addition to coal, oil, and gas, we will consider the ways humans have come to rely on cheap and abundant energy. In a broad survey of energy regimes, we will probe the effects of production and consumption of energy on politics, environment, economy, and society.

HIST141 Theories and Models

This class will focus on how theories and models are designed and regarded across the university curriculum--in the humanities, the social sciences, and the sciences. This topic is particularly pertinent to intellectual history, a subject that regularly uses texts from across the modern university curriculum as its primary readings. Given the range of intellectual history, both in terms of chronology and subject matter, intellectual history could be argued to be the subject best positioned to consider the process of making theory.

Questions to be addressed include: What are some of the unexpected results of the increased use of mathematics and computers even in the humanities and social sciences, not just in the sciences, and how has this changed the relationship of theory and models for each of these disciplines? To what extent does the debate about the refutability, the falsifiability--or truth status--of models indicate an ongoing need for theory? The specific modern academic subjects to be examined will be philosophy, economics, and physics. Thomas Kuhn's *THE STRUCTURE OF SCIENTIFIC REVOLUTIONS* (1962) will serve as a starting point for this study; however, most of the readings during the semester will be much more recent.

HIST143F Jesus Chicken: Business and Religion in America (FYS)

Summary: Although many Americans are aware of the religious identity of the fast-food chain Chick-fil-A (earning it the moniker of "Jesus Chicken" in some communities), there is nothing new about businesses that project a religious ethos. This First Year Seminar explores the blurry boundary between business and religion in America, examining the ways in which businesses use religion and the ways in which religious entities often function as businesses. Although this course primarily focuses on the Christian tradition, it will also examine the ways in which other religious communities (such as Jewish and Buddhist) approach the marketplace. Chronologically, the course spans the 17th to 21st centuries, paying special attention to the emergence of the market economy in the U. S. from 1800-1850 and the growth of consumer culture in the second half of the 20th century. This course will provide students with an introduction to historical methods and the critical study of religion, while focusing on developing collegiate-level reading, writing, and critical thinking skills that will form a foundation for any major at Wesleyan.

HIST151 Introduction to History: The "Russian World" Past and Present

The "Russian World" has become a central--though deeply ambiguous and contested--theme in contemporary political discourse both within and beyond Russia. This course will offer a survey of how different conceptions of the "Russian World" have been articulated and deployed over time by following the history of Russian lands and peoples from the eighth century to the present day. This course is one of the gateways to the history major and is intended especially for first- and second-year students. As an introduction to history, the course will introduce students to the discipline of history by examining the historical sources, concepts, theories, and methods necessary for reading and writing history.

HIST154 Introduction to History: Twelve Medieval People

This course is one of the gateways to the history major. It is also an introduction to the Middle Ages through a study of 12 exemplary medieval lives and minds, spanning a thousand years of history. We focus on people--bodies, minds, and souls--coping with history and creating sense for their world. The course will typically feature one person or pair per week, and by examining their writings or stories and the contexts in which these were produced, the nature of medieval life, the pressure on the self, the articulation of gender and ethics for the entire period will come into view. Among the figures studied are likely to be St. Augustine, Queen Brunhild, St. Anselm, Abelard, Heloise, William Marshal, King Louis IX, Dante, Catherine of Siena, Christine de Pisan, Joan of Arc, Margery Kempe, and Pope Pius II.

As an introduction to history course, we will also offer an examination of the basic concepts, techniques, and skills for reading, understanding, and writing history: documents and archives, text and context, sceptical inquiry, argument construction, and an interest in good and expressive writing.

HIST155 Cold War Environmental History

War remakes the natural world to support organized violence. Pervasive militarism renders its transformations permanent. In the context of the Cold War, the United States and the Soviet Union pursued competitive testing of nuclear weapons; engaged in proxy wars with devastating local effects; and embarked on extensive modernization projects in agriculture and public works. In many such projects, political antagonism masked commonality and collaboration in science and technology. In this course, we reckon with the persistent environmental effects of militarism by pursuing a global history removed from the ideological projections of its actors.

HIST156F Introduction to History: The Ottoman World (FYS)

This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans,

Anatolia, the Middle East, and North Africa emerged during the 20th century. At the center of the course is the transformation of the so-called classical Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be starting from the 15th century and end with the analysis of the making of the modern Ottoman society by the beginning of the 20th century before its imminent collapse. The late 16th-century transformations and the question of Ottoman "decline," on the one hand, and transformation to a modern state on the other, comprise the historiographical context to be addressed alongside basic historical patterns and events. A primary concern is to have students engage with critical issues not only in the study of Ottoman history, but also situating this history in the discussions on world history in general, and the history of the Middle East in particular.

HIST160 Intro to History: U.S. in the World Since 1776

Transcending the nation-state framework, this course foregrounds transnational and international frameworks to explore the United States' role in the world since 1776. We will explore the rise of the United States' vast settler colonial empire in North America, its vast overseas empire in the Pacific and Atlantic Oceans, and the role of the United States in international and global affairs in the 19th and 20th centuries. We will look both at the policies created by U.S. presidents, diplomats, and military leaders, as well as the experiences of Black, Indigenous, People of Color, and colonized peoples of the Global South who have been affected by the U.S. presence in the world. We will also underscore the importance of international organizations, non-state actors, and non-governmental organizations, such as the United Nations and the American Red Cross, that have shaped international society over the 20th century. Throughout the course, we will explore the themes of race and ethnicity, imperialism and colonialism, migration and immigration, nationalism and internationalism, self-determination and decolonization, militarism and development, and diplomacy and foreign policy.

HIST165 Introduction to History: Slavery and Abolition in the Atlantic World

Racial slavery was inextricably tied to the rise of both colonialism in the "New World" and global capitalism. It fueled a complete reorientation of world economic and political systems with consequences still evident today. Yet people on both sides of the Atlantic--Black and white--challenged the idea of racial slavery and its entrenched interests. The abolitionists succeeded in emancipating millions, but did not fully achieve their goals for human rights. In this course, we will examine the rise and fall of slavery in the Western Hemisphere, with particular attention paid to the North American mainland and Caribbean.

HIST167 Introduction to History: Yoga: A Global History

Yoga as a philosophical, religious, and ascetic discipline has shaped the lives of major world-historical figures, including the Buddha, the Mughal emperor Akbar, Mahatma Gandhi, and Steve Jobs. Though yoga is usually understood today as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced dramatic change over the millennia--not least with the rise of "postural" yoga in India from about 1000 CE, its systematization as "hatha yoga" by about the sixteenth century, and its growing popularity in the West since the

early twentieth century. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psycho-somatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis) as it spread from India to both the East and West.

HIST171Z Introduction to History: History of U.S. Social Movements

Online course: Monday through Friday 2-4pm with additional asynchronous lectures. This Introduction to History course examines the long history of movements for social change in the United States from the 1830s to the 1970s. Movements we explore will include abolitionism, women's rights, the black freedom struggle, modern feminism, and gay liberation. We will focus on the tactics used by social movements to achieve their goals, how social movements related to each other, how social movements changed over time, and how social movements interacted with the broader forces of American society, including politics, race, law, and religion. Students will be exposed to primary sources as well as selected secondary sources in the field. Given the winter sessions focus we will focus on 10 different U.S. social movements, with the first half of class devoted to the outline and history of each movement in a lecture format, and the second half based on a discussion of how the movement builds on and relates to other social movements and broader U.S. history.

HIST172 Introduction to History: Germany from Napoleon to the Berlin Republic

Germany witnessed more dramatic and radical changes in forms of government within the span of just 31 years (1918-1949) than any other modern society in history, yet today it is a model democracy and an anchor of peace and prosperity in the heart of Europe. Germans are credited for extraordinary achievements in the arts, sciences, and industry, yet they also produced some of history's darkest chapters. This introductory course surveys the fascinating and turbulent history of modern Germany to analyze the sources of these contradictions.

We will begin by locating the birth of modern Germany in the massive social and political upheavals of the Napoleonic era that set the stage for the rise of German nationalism and rapid industrialization. We will study the unlikely processes that resulted in German unification in 1871 and how Germany's nationalism, growing industrial power, and its deep internal divisions led to a policy of aggressive imperialism that contributed to the outbreak of the World War I. The course will analyze the profound impact of that war and defeat on German society, situating both the Weimar Republic and the rise of Hitler in that context. We will subsequently study Nazism, the World War II, and the Holocaust, as well as the ultimate destruction of Germany as sovereign state with its surrender and military occupation in 1945. The remainder of the course explores the phoenixlike rebirth of two competing German states in the Cold War and the subsequent parallel development and divergence of two German societies. We will conclude the course by analyzing the process that led to German reunification in 1990 and the lines of development of the "Berlin Republic" since that time. The aims of the course are to introduce students to historical primary sources, the skills of historical analysis, and the questions of historiography through a coherent introductory survey of modern German history.

HIST173 Intro to History: Heretics on Trial: The Holy Inquisition and Its Enemies

The Inquisition was among the most feared institutions of the early modern West. In its efforts to impose religious orthodoxy, it persecuted minorities, prohibited behaviors it deemed heretical--like magic and unbelief--and censored intellectual inquiry. Yet despite its resoluteness, the ability of the Catholic Church to impose control varied widely across time and place and was often met with equally firm resistance. This introductory course examines how the Catholic Inquisition functioned, from its origins in the medieval period to its final demise in the nineteenth century, paying particular attention to geographic and temporal specificities. From Cartagena de Indias to Lima, Goa, Rome, and Toledo, inquisitorial tribunals spanned a significant portion of the Atlantic world. The records produced by its scribes are some of the richest sources of the social, cultural, religious, and economic history of the era, yet they are also some of the most challenging to deal with, both epistemologically and morally. Historians have relied on Inquisition archives to reconstruct the lives of individuals and communities who left no other written records, all the while seeking to acknowledge that the records were produced under duress by officials who suspected the accused of the terrible crime of heresy. Through a wide range of primary sources like trial transcriptions, Inquisition "autobiographies," written confessions, censored books, and literary sources, students will both survey the lives of people who faced the Inquisition's scrutiny, while considering the role of violence, persecution, and resistance in the creation of the very records that allow for historical reconstruction.

HIST174 Introduction to History: European Reformations

An introduction to history course, European Reformations will provide an introduction to the concepts and tools for reading, writing, and enjoying history by examining the ideas and people who developed the Protestant Reformation, one of the most explosive changes in world history that continues to reverberate and affect lives and politics today. Centering on the ideas and politics of the European Reformation age, we will examine thinkers and problems within Catholic Europe that led to the crisis of the Reformation from around 1500. A focus on the ideas and actions of figures such as Luther and Calvin and the religious martyrs of the 16th century will be central, but we will also examine Catholic responses and the changing political and legal ideas that the Reformation produced.

HIST175 Intro to History: Resistance and Revolution in the Atlantic World, 1500-1850

The Atlantic Ocean created and destroyed empires. This course will explore those who fought against the expansion of imperial powers, including slaves who crossed the ocean involuntarily, Indigenous peoples defending their homelands, women who demanded equality, and pirates who constructed an alternative universe. The Atlantic revolutions (American, French, Haitian, and South American) set empires on fire and ushered in a new era of resistance to oppression.

HIST176 Introduction to History: Science in the Making: Thinking Historically About Science

This course introduces students to a range of perspectives--drawn from history, sociology, anthropology, geography, media studies, and literary studies, among others--on how to write about the history of science. Throughout, the emphasis is on understanding the relationship between the histories of science we can tell and the materials that our histories draw upon, from publications and archival documents to oral histories, material culture, and film. In addition to reading academic literature, students will gain practical experience working with historical sources and conducting original research. They will also familiarize themselves with new digital tools for presenting historical materials by developing a course website that showcases their research projects.

HIST177 Introduction to History: Yoga: A Global History

Yoga as a philosophical, religious, and ascetic discipline has informed the thinking of major world-historical figures as wide ranging as Siddhartha Gautama ("Buddha" or "wise one"); the Mughal emperor, Jalaluddin Muhammad ("Akbar" or "the great"); Mohandas K. Gandhi ("Mahatma" or "great soul"); and Apple Inc. founder, Steve Jobs. Though yoga is usually embraced as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced

dramatic change over the millennia. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psychosomatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis)--in the Indian subcontinent and beyond.

HIST179 Intro to History: Biodiversity and its Histories

Biodiversity loss may portend the next mass extinction, but what is biodiversity? Euro-American concepts of biodiversity have become a category of policy and politics at local, regional, national, and international levels. This course will track the development of these concepts from the 18th century to the present, paying special attention to the growth of natural history collections to document taxonomy, evolution, biogeography and ecology of species. How does the idea of living variation in genes, traits, species, and ecosystems relate to human and non-human beings?

HIST186 The Raj: India and Britain (Introduction to History)

This course examines the linked history of India and Britain from the 18th to the 20th century. The focus will be on the rise and demise of the British Empire in South Asia, commonly referred to as "the Raj," and how the experience shaped what it meant to be both Indian and British. Along the way we will learn how merchants from a remote island nation in western Europe managed to take control of the wealth and manpower of the Indian subcontinent; how Indians helped to build the Raj but gradually turned against it; and how in rebelling against the Raj, and reshaping it, Indians crafted new forms of social protest and political belonging.

This is an Introduction to History course intended mainly for first- and second-year students who are interested in the past and, perhaps, are even (though not necessarily) contemplating the history major. As such, it will introduce students to the discipline by reflecting on the nature of historical evidence, how to use an archive, and how to craft a historical argument.

"I do not think the war would have been won without the women.... Now women have to liberate themselves." The fighter Maudy Muzenda's reflection on the role of women in Zimbabwe's liberation war speaks to a broader pattern in global history. Women have been central to the radical transformation of societies in Africa, Asia, Europe, and the Americas from the early modern era to the present. In this course we will examine revolutionary women who took up arms and others who protested for improved working conditions, voting rights, sexual liberty, and human rights. Our cases will include the history of political revolutions in France, Cuba, Russia, and China, as well as in Zimbabwe. We will also explore the critical role of women in the global Industrial Revolution, the Suffrage Movement, the rise of international feminisms, and the everyday struggles of women in multiple sexual revolutions.

In this course we explore history as a critical endeavor. The aim is twofold: to reflect on the role history plays in making categories of contemporary debate appear inevitable, natural, or culturally necessary; to question underlying assumptions about the relationship between past and present that are so often taken for granted. We will examine both history's influence on politics and the politics of history as a discipline.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **COL189**Prereq: **None****HIST190 Introduction to History: Environment**

Humans have profoundly altered the character of Earth's environment since the advent of agriculture and settled societies some 10,000 years ago. This course is a study of the historical relationship between human beings and their habitats, with additional attention to arid lands as places of settlement, cultivation, and development. We explore how global problems such as climate change, biodiversity attenuation, and depletion of fossil soils, fuels, and water are linked to social problems such as economic inequality, food insecurity, conflict, and declining public health. The course reviews evidence of major environmental problems; considers how varied academic disciplines address them; and models a historical approach to understanding environmental change.

The course is divided into two parts: "Environmental Concepts," and "Case Studies." In Spring 2022, the case studies will be devoted to biodiversity.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **SBS-HIST**Identical With: **ENVS237, STS190**Prereq: **None****HIST191 Introduction to History: Pacific Worlds**

This introductory course explores the Pacific Ocean as a region of historical inquiry. With a strong viewpoint from the Pacific Islands, this course interrogates long held notions of the Pacific as a vast empty space, emphasizes the Indigenous Pacific, charts the rise of imperial powers, and follows the paths of Indigenous peoples, labor migrants, merchants, scientists, militaries, and tourists, among other historical actors. This course will cover the topics of race and indigeneity, gender and sexuality, militarism and tourism, and the environment, as well as colonialism, imperialism, and decolonization. Taking an expansive definition of historical text to account for the ways Indigenous peoples and migrants understand history, this course will include poetry, song, fiction, film, art, objects, and oral and living histories, and will explore varied methods and frameworks in the discipline of history.

This course introduces some of the cultural foundations of East Asia and how they have continued to resonate through history. We will be examining translated primary texts in history, literature, philosophy, and religion, mainly from China, Korea, and Japan. We will also be working with other media such as film and art. The course attempts to equip students with a basic fluency in interpreting ancient and modern materials from East Asia and identifying its cultural contexts.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-CEAS**Identical With: **CEAS207**Prereq: **None****HIST200 The Historian as Detective**

Whodunnit? In many ways, the craft of history is much like the art of detection. Historians arrive on the scene after the "crime" was committed. We look for traces, or clues, left behind. We try not to contaminate the crime scene. We pore over the evidence. We consider both motive and opportunity. We take note of silences. We keep an open mind. We seek the truth. And, as it happens, the professional historian and the professional detective--in fact as well as fiction--emerged roughly around the same time. We are like twins separated at birth. Perhaps if we are reunited, we might learn something new about each other, and ourselves. This course will draw upon classic (and not-so-classic) works of history, criminal detection, and detective fiction to better understand the importance of forensics and method in the discipline of history, as well as the importance

of history in the art of detection. Each week will pair a work of literature with a work of history, supplemented by key essays in historical methodology.

HIST201 Medieval Europe

This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity, its crusades and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the modern world, including the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

HIST207 Japan Since 1868: Society and Culture in Modern Japanese History

This course examines the history of Japan from roughly 1800 to the present. With a broad-ranging observation covering politics, economy, society, culture, and foreign relations, we will look at a variety of historical events that the Japanese people experienced. Our goal is not only to understand what happened when, but also to be concerned with how people at different historical stages saw the world around them. Major historical events, trends, ideas, and people will constitute the vital part of the course; however, we will also inquire into everyday life of ordinary people, whose names do not remain in historical records. We will use a wide range of materials including written sources available in the English language, films, literature, and comics.

HIST208 Digital and Visual Storytelling

During this seminar, we will develop a digital group project that addresses the question of remembering and denying pasts through the historical and critical relationship between carcerality, race, and storytelling in Connecticut. By engaging with contemporary forms of digital and visual storytelling (ArcGIS StoryMaps), this group project will work with the modalities of archival studies and digital humanities, accompanied by readings in critical race studies, visual and literary theory, and decolonial theory. We will first explore "remembering the past" through two post-Civil War Connecticut landmarks: The Church of the

Good Shepherd (1867-69), dedicated to Samuel Colt, and the Mark Twain House (1874), now a museum. Both architectures exist as pivotal markers for a new modern American narrative intertwined with legacies of slavery, manufacturing, firearms, and storytelling. We will then consider how to make visible denied "pasts" by conducting archival research on the formative period of the 1860s and 1870s and in respect of the Connecticut context. Centrally, valuable insights for the project development will be provided by the in-class meetings with scholars, artists, and archivists, whose work rethinks and challenges the bond between carcerality, race, and storytelling.

HIST209 Reenacting Justice: Guns in America

This seminar, developed in collaboration with visiting guest instructor Glenn LaVertu (Parsons), combines readings, discussion, archival research, storyboarding, project-based learning, legal analysis, and filmmaking in presenting new takes on an old genre: Westerns. We will read and watch Westerns alongside study of the development of the American legal system, considering the aesthetics of justice, narrative, and guns. Students will work on film and theater projects related to the manufacturing, use, and mythologization of "Old West" in popular culture, television, and film. Film projects will be screened and discussed at the Center for the Study of Guns and Society's annual undergraduate conference on Thursday, April 25, and Friday April 26, 2024, and at the presentation of "Stories of Carceral Connecticut," a celebration of student projects for the Mellon Foundation project, "Carceral Connecticut," on Friday, May 3, 2024. (Both events are required). The course will consider the aesthetics of storytelling, guns, and justice, as well as be a lab for creating and narrating new stories. Engaging with contemporary debates about Westerns as manifestations of American gun culture, the purpose of the project is to draw parallels between the way in which gun violence is portrayed in film, particularly period, Western movies, and the realities of gun violence today. The final project is an opportunity to expose multiple points of view regarding gun violence and justice and their socio-political effects, and to write and develop new scripts, storyboards, and film scenes, as well as study old ones.

Assignments and Grading System:

Grading is based on weekly assignments and participation, an in-class midterm on the readings, and a final project.

Requirements:

- Class Participation (20%): Regular attendance, submission of weekly 1-2 pg written critical reflections on assigned topics (e.g. a primary source, an advertisement or magazine article, a report about a field trip or movie, etc.) Participation in the April 25 evening student mini-film festival and April 26 all-day undergraduate research conference is required.

- Midterm (40%): In-class midterm on the readings and discussions (in class; Thursday before break).

- Final project (40%): (20% for the project; 10% on the written artist's statement; 10% for the presentation at the April 25 mini-film festival night and April 26 panel).

Required Texts

(Available for purchase at the bookstore, and available for free reading on Olin e-reserve through the Course Moodle).

- *Joyce, Justin A. *Gunslinging Justice: The American Culture of Gun Violence in Westerns and the Law* (Manchester Univ. Press 2018).

- Densley, James ed. *The Conversation on Guns* (JHU Press, 2023).

- Light, Caroline E. *Stand Your Ground: A History of America's Love Affair with Lethal Self-Defense* (Beacon Press 2017).

- McKeivitt, Andrew C. *Gun Country: Gun Capitalism, Culture & Control in Cold War America* (Univ of North Carolina, Chapel Hill, 2023).

Additional writings (e-reserve at Olin Library and on Moodle) are by Kelly I. Aliano, *The Performance of Video Games: Enacting Identity, History and Culture through Play* (2022); Vanessa Agnew et al, *Handbook of Reenactment Studies: Key Terms* (2023); and Priya Satia; Roxanne Dunbar-Ortiz; Richard Slotkin; Gillian Rose; Carol Anderson, Jennifer Carlson, Terrence H. Witkowski, Lindsay Livingston, Peter Boag, Joan Burbick, Jelani Cobb, and more.

HIST211 U.S. Labor History

How does the history of labor in the United States of America compare to that of other highly industrialized nations? For example, how did the system of slavery shape industrialization in the United States? Why were the socialist and communist movements much weaker in the U.S. than in Germany, France, and Italy, and why was there no major labor party in the U.S. as there was in England and Australia? Why have American workers been extraordinarily militant in job actions compared to their counterparts elsewhere? How have the religious convictions of the American people affected industrial relations? And why do Americans flinch at the word "class?" It is not a problem for the English, French, or Germans--what explains the difference?

HIST212 Modern Africa

What is African Modernity? We will examine this question as we survey the major historical transformations in Africa since approximately 1800. Important themes include: African political innovations, the abolition of the slave trade and its effects, European colonialism, African adaptation and resistance, nationalism and decolonization, and Africa's role in shaping major global events. We will also study the impacts of religious and social transformations amid rapid economic and political change. Finally, we will examine African visions for post-colonial development and how to shape the future of the continent.

During the semester we will also cover some of the issues surrounding African history as a discipline. No single course can cover more than a sliver of the complexity and variety in the continent. For this reason, we approach the study of Modern Africa as comparative history. However, students satisfactorily completing this course will be able to write knowledgeably about African history and will have the foundation necessary to undertake further study about Africa with sensitivity to the complexity of its recent past.

HIST217 Empires, Slavery, and Revolution: Africa to 1800

In this course we will examine the dynamic political and social histories of precolonial Africa. We will study the rise of kingdoms and empires such as Mali and Kongo, as well as revolutions in society from the technological development of iron production, to the emergence of trade networks, the development of ancient cities, the spread of religious healing and reform movements such as Cwezi spirit possession, and the role of gender in early African societies. Over the course of the semester we will also consider the impact of slavery and the first African encounters with Europeans. The methods for studying the early African past are interdisciplinary. You will have the opportunity to explore how ancient Africa has been imagined in the past by Africans and early Arabic and European observers, and how contemporary scholars write these histories. As we trace a history of early Africa in the world, we will consider several methods: the study of myths and oral traditions, linguistic and archaeological data, as well as ecological and archival records.

HIST218 Cities of Islam: Religion, Politics, and Urban Space

A survey of the history of major cities in the Middle East and North Africa. This course will trace the region's history through the foundation and development of the cities that served as the centers of significant political entities since 600 A.D. Each week will focus on the symbolism and functionality of urban space and architecture and the role of politics, religion, and global trade in the formation of one of the following cities: Jerusalem, Mecca and Medina, Baghdad, Cairo, Istanbul, Isfahan, Beirut, and Algiers. The course will seek an answer to the question of whether history shapes the cities or vice versa.

HIST219 Russian and Soviet History, 1881 to the Present

Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the

Soviet project; the role of the party and ideology in politics and everyday life; the nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

HIST220 Authority and Resistance: France Since 1870

Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little. This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

HIST221 History of Ecology

The word "ecology" has come to have many meanings and connotations: a scientific field dealing with the relation of organisms and the environment, a way of thinking about the world emphasizing holism and interconnection, a handmaiden of the environmental movement, to name a few. This course covers the history of ecology as a scientific discipline from the 18th-century natural history tradition to the development of population, ecosystem, and evolutionary ecology in the 20th century, situating the science in its cultural, political, and social contexts. Along the way, it traces the connections between ecology and economic development, political theory, ideas about society, the management of natural resources, the preservation of wilderness, and environmental politics. How have scientists, citizens, and activists made use of ecological ideas, and to what ends? How have they understood and envisioned the human place in nature? How have the landscapes and places in which ecologists have done their work shaped their ideas? Other major themes include the relationship between theories of nature and theories of society, ecology and empire, the relationship between place and knowledge about nature, the development of ecology as a professional discipline, the role of ecologists as environmental experts, the relationship between the state and the development of ecological knowledge, and the relationships among ecology, conservation, agriculture, and environmentalism.

HIST223 Chinese Eco-Civilization: History, Experience, and Myths

The course traces the historical roots of the ideas of eco-civilization, a policy platform that appeared in the twenty-first century by examining how Chinese agrarian civilizations and their nomadic neighbors transformed the bio-physical environment over the course of 3,000 years of history.

We will draw on translations of Chinese literary texts including poetry, classical prose, and novels to explore the relationship between power and social inequities as we explore the everyday politics of agrarian civilizations through China's transformation from feudal ages to the modern period. How did Confucian, Legalist, Buddhist, and Daoist teachings alter the dynamics of production and consumption? To what extent did traditional Chinese philosophies promote the ethos of ecojustice? Did competing regimes/dynasties create a sustainable political and economic system? Did bureaucrats improve the well-being of the population and maintain the balance of the ecosystem? Or did they deplete natural resources to meet their short-term needs?

HIST224 Modern China: States, Transnations, Individuals, and Worlds

This course examines China's turbulent transition to modernity. It covers the Ming-Qing transition, Manchu conquest of central Eurasia, China's conflict and engagement with the West, birth of China's first republic, and the People's Republic of China under Mao Zedong, Deng Xiaoping, and his successors.

The dramatic transformation of China spanning the late 19th century to the present day is the focus of this course. The Chinese people today continue to deal with the legacy of these reforms, wars, and revolutions, as China's leaders and people dealt with unprecedented challenges. The three central themes of this course are (1) the reconstitution of (a somewhat) unified China after decades of political upheaval, (2) China's vulnerabilities in the face of domestic troubles and threats from abroad, and (3) the challenges of maintaining a high-growth economy with scarce resources.

HIST225 Pirates, Traders, and Colonial Settlers in Maritime East Asia

Why is Maritime East Asia so contentious? Why is it emerging as the next global flashpoint? This course examines the historical roots of political tensions in Maritime East Asia by exploring the history of Taiwan. As early as the sixteenth century, merchant-pirates who dominated coastal China and Japan recognized Taiwan's strategic importance. For centuries, Dutch, British, American, and imperial powers used Taiwan as a springboard to gain a foothold in the Asia-Pacific region. Migrants from coastal China, who settled in Taiwan and Southeast Asia, worked with these imperial powers to colonize new frontiers and displace the indigenous population. The territorial disputes, economic rivalry,

and business empires that shape our global economic order arise from the centuries-long struggle for dominance over Maritime East Asia. These historical legacies served as the driving force for political change. Maritime East Asia and particularly Taiwan not only transformed into an economic powerhouse but also stand at the forefront in the struggle against authoritarianism.

HIST226 Queen Mothers, Unruly Women: Histories of Gender and Sexuality in Africa

The 1929 Women's War is a touchstone for women's history in Africa. By 'sitting on a man' women in Nigeria shocked colonial authorities and demanded economic rights and a public voice. These unruly women danced in protest and rioted (sometimes nude), but their actions were not uncommon sights for their African audience. African women across the continent had long wielded power as queen mothers, prophets, and traders. Others challenged the constraints of ordinary domestic life through their labor, dress, or spirit possession.

Gender and contested authority are central to everyday life and politics in Africa. In this course, we will study the history of political and domestic authority on the continent with special consideration for the ways in which gender, sexuality, and power intersect. These histories are diverse both in time and place. For this reason, this course will not present a single narrative of gender in African history. However, students who satisfactorily complete the course will be able to write knowledgeably about the major debates surrounding gender and sexuality in Africa. Major themes include: spiritual authority; domestic and sexual life; the division of labor; and the impact of colonial rule and post-colonial politics. We will examine how women (and also men) have grappled with these intricate social and political relations from the pre-colonial period into the post-colonial era.

HIST228 The Memory of Slavery in Monuments, Museums, and Media

This course will examine how Americans have remembered and forgotten their nation's troublesome history of racial chattel slavery. Monuments, museums, historic sites, archives, burial grounds, genealogical societies, and films have all contributed to the contested legacy of slavery in America. We will consider

how and why representations of slavery have changed over time and what those changes suggest about the larger society. We will ask how did representations of slavery and racism inform larger narratives of American identity? How did Black Americans respond to popular depictions of slavery, and create their own forms of public history? How did the memory of slavery inform the twentieth century Black freedom struggle? How does slavery continue to shape the contemporary United States, and how should we approach that legacy today? Students will also work with local museums and historic sites to produce projects focusing on the history of slavery in Connecticut.

HIST229 A Fair Country? Canadian Protests and Progress After 1900

From hockey to healthcare, Canadians define themselves by debates over what makes a fair country. This class will explore Canada's 20th century as episodes of resistance in the service of greater equality. From labor movements to protests against (and participation in) global conflict; from women's rights and the welfare state to social justice and environmentalism; from French nationalism and Quebec separatism to the Quiet Revolution and domestic terrorism; from racism to Indigenous resilience. Looming in the background is the American leviathan, a constant threat to Canadian social and political culture but also a foil against which the country can measure itself.

HIST230 Rome After Rome: Culture and Empire of Constantinople

Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capitol to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.

In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (<https://arcg.is/0e4Lb4>). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

HIST231 Guns and Society

Students will discuss some of the key questions that animate the emerging interdisciplinary field of gun studies, considering guns as objects and symbols and as sites of both shared and contested meanings in everyday life. Readings will include recent scholarship about the evolution of gun technologies and the changing place of guns in U.S. society, from the colonial era through to the present day, exploring how the history of guns in U.S. history is relevant to other histories, including studies of race, gender, class, labor and capital, social movements, and military and civilian life. Special focus will be put on visual studies, museum studies and public history, science and technology studies, public health, and legal history. Assignments include four shorter (2-page) papers and a 15-page final research paper. Each student, working in small groups, will also deliver a 10-minute presentation and have opportunities for site visits to local museums and gun violence memorials such as the Coltsville National Historic Park (Hartford), Springfield Armory National Historic Site (Springfield, Massachusetts), and the Connecticut Gun Violence Memorial (New Haven).

(This course is a prerequisite for individualized humanities "labs" designed for students to delve into a particular aspect of the topic of guns and society in a more applied way in the spring semester, through special projects that can include an individually designed research paper, a museum/archives project, a theater sketch, a podcast, a high school teaching module, an art project, an exhibit in a local museum, an oral history project, or a syllabus, among other possibilities to be discussed with the instructor.)

HIST232 Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity

Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, begging collectives, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

HIST234 The Making of the Modern Middle East

This course explores the modern history of the Middle East, from North Africa to Turkey to the Arabian peninsula, in order to provide students with a robust background in the making of each component of the historical Middle Eastern society, state, community, and individual. We begin with the Islamization of the region and move through various state formations, including the Ottoman Empire. The long 19th century of intense imperial modernization and nationalism sets the stage for the collapse of the Ottoman Empire, independence, and European colonialism in the region. The course finishes with the post-Ottoman national and post-colonial states in the Cold War and post-Cold era, tackling themes such as regional conflict, Islamism and mass politics, and military interventions.

HIST235 Magic, Witchcraft, and Miracle, from Saints to Salem

Until the "disenchantment of the world" in the 18th and 19th centuries, Europeans lived in a universe shot through with hidden and awesome power. God's action in the world was possible, but puzzlingly he often operated through other agents, through the saints and by miracle. On the other hand, humans were often tempted to appeal to other powers to get what they wanted, and the use of magic--some pagan in origin, some not--was a pervasive influence. The world was full of demons and even devils, who used illusion and magic to entrap people by possessing them or turning them toward witchcraft in exchange for wealth and health. Surprisingly, the occult was not all bad, and Catholics and later Protestants too wrestled with the question of what to accept and what to suppress. Magical forces did not fade with the Renaissance but actually grew alongside the first developments toward modern natural science in the 16th and 17th centuries. The necromancer joined the saint, the priest, and the witch as the faces of occult power. This course will take a broad look at the people and powers that filled the place where science and a lot of religion sit today. The course will survey medieval developments and will end in New England in the 17th century. The instructor will provide background and narrative history in order to place the readings into their appropriate context. In surveying the long history of magic and miracle in Europe, we shall ask such questions as: What exactly do these terms mean and how have the meanings changed? How far away from such a worldview are we today and did magic really end in the 17th century? And, if so, why? Who controlled the use of magic and how was its misuse identified and punished? Were the processes of law, inquisition, and prosecution fair or effective? Were there really witches or just witch hunts? Why

did people believe in miracles and magic? Who were the practitioners? Why did it all decline?

HIST236 Dante in His World: Politics, Poetry, Religion

Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante's own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

HIST237 Making New Worlds: Encounters on Turtle Island

From before the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, Turtle Island (North America) was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on Indigenous homelands with deep histories. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease). Throughout, we will focus on the persistence and resistance of Indigenous nations who protected (and still protect) their homelands and lifeways.

HIST239Z The Long 19th Century

Please note: Some readings and assignments will be due during winter break, prior to arriving on campus for Winter Session. Please visit the Winter Session website for the full syllabus -- <http://www.wesleyan.edu/wintersession>.

In 1787, the ratification of the Constitution established the United States of America as a republic in which power rested with the people. But the slim document left many fundamental questions unanswered. Would the overwhelmingly agricultural country be one of small yeoman farmers or large-scale plantations? Would the new nation limit western expansion to honor treaties with American Indian nations? Would the growing ranks of wage laborers in the nation's burgeoning cities have the same political rights as property owners? Would a nation founded on the shores of the Atlantic World pursue closer integration into global trade or protect its craftsmen and nascent industrial manufacturers? Could women make a claim to civic participation in a nation whose liberty they had helped win? Would a nation dedicated to freedom be able to reconcile the bondage of one-fifth of its population?

The Long 19th Century explores the history of the United States from the Early Republic to the Progressive Era (1787 to 1913), as an array of different groups and competing interests attempted answers to those questions. The period witnessed an incredible expansion of the United States from one of several imperial claimants in North America to the dominant power on the continent. Simultaneous to this expansion in geographic scope, the 19th century saw a shift in the scale of governance from a limited government to a powerful federal state that abolished property rights in slavery and intervened in struggles between labor and capital. In following that expansion and shift, this course explains the evolution of the modern United States.

HIST240 The United States in the 20th Century and Beyond

In 1903, the scholar, educator, and activist W.E.B. Du Bois wrote: "The problem of the twentieth century is the problem of the color line." Taking this prescient statement as a starting point, this survey course will introduce important themes in the history of the United States from the turn of the 20th century to today. By utilizing the constructs of race, class, gender, and sexuality (among others) as lenses through which to interpret events within and beyond national borders, we will come to understand the "modern" United States as a global archipelago, imperial war machine, and arbiter of political, social, and economic power. We will cover topics including, but not limited to: Jim Crow laws, immigration policy, the Civil Rights Era and Black Power movement, Indigenous self-determination and Red Power, mass incarceration, genealogies of feminism, LGBTQ+ rights, and the acceleration of climate change.

HIST241 We Were Eight Years in Power: The Reconstruction Era

Racial slavery was inextricably tied to the rise of both colonialism in the "New World" and global capitalism. It fueled a complete reorientation of world economic and political systems with consequences still evident today. Yet people on both sides of the Atlantic--Black and white--challenged the idea of racial slavery and its entrenched interests. The abolitionists succeeded in emancipating millions, but did not fully achieve their goals for human rights. In this course, we will examine the rise and fall of slavery in the Western Hemisphere, with particular attention paid to the North American mainland and Caribbean.

HIST242 World History

Using material culture, visual sources, primary texts, and articles, this course will give students a solid understanding of World History from the River Valley Civilizations, the Classical Period, and the Post-Classical Period, to the Early-Modern Period, the Long 19th Century, and the Contemporary Period. Emphasis will be placed on the development of major cultures around the world -- and there will also be discussion of how the major cultures fail to explain much of World History.

In practical terms, students will learn how to assess a broad range of historical sources from varied places and times; how to debate these works in class discussion; how to produce concise and precise reading notes based on an argument/counter-argument format; and how to work collaboratively on the group project.

HIST243 How to Make History, or the Art of History: Past, Present, & Future

History is one of the oldest of intellectual endeavors and through its many transitions and versions around the world it is unified generally by its literary and artistic character as much as by its research intensity. It is a study of finding out but also always about the telling. With the development of professional

historiography in the 19th century, the imaginative and creative aspects of making history have been spoken about less, but they have remained crucial parts of history's success. Today especially, it is important to understand the versions of history-making that have existed and the possibilities for students and other historians to make well-shaped, moving, decisive history. The course will examine the history of history-making, looking through its long history around the world to understand historiographical developments but also to give ourselves examples now for ways of writing history more effectively. The course will pay unusual attention to the possibilities of making history today, not only in the academy, but in fiction, in film, on television--everywhere that history is, in fact, made.

HIST244 The Ottoman World

This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans, Anatolia, the Middle East, and North Africa emerged during the 20th century. At the center of the course is the transformation of the so-called classical Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be starting from the 15th century and end with the analysis of the making of the modern Ottoman society by the beginning of the 20th century before its imminent collapse. The late 16th-century transformations and the question of Ottoman "decline," on the one hand, and transformation to a modern state on the other, comprise the historiographical context to be addressed alongside basic historical patterns and events. A primary concern is to have students engage with critical issues not only in the study of Ottoman history, but also situating this history in the discussions on world history in general, and the history of the Middle East in particular.

HIST245 Modern Latin America Since 1810

This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

HIST246 France at War, 1934-1944

Beginning with a Parisian riot widely understood to be a fascist insurrection in 1934, followed immediately by massive popular protests from the Left, France entered a decade in which it was at war with itself, often characterized as a Franco-French civil war. These were years of uncommon political engagement, disappointments, struggle, and multiple disasters. A divided France encountered the menace of another European war, concluding with its astonishing defeat in 1940 by Nazi Germany. This seminar explores the ideological antagonisms that shaped French life during the Popular Front, a broad alliance of the Left,

1934-1938, and during the German occupation, 1940-1944, when French authorities collaborated with the occupier. We will consider interpretation and memory of these dark years and draw upon documents, films, memoirs, and journalistic accounts.

HIST247 The Fall of Rome and Other Stories

The fifth-century fall of Rome to barbarian invaders is an idea that slowly crystallized over time. This course will examine the birth and development of this "fall"--one of the most persistent stories in history--using the very texts in which it was first articulated. We will work with selections from a range of authors--Suetonius, Eusebius of Caesarea, Ammianus Marcellinus, Augustine of Hippo, Jordanes, Procopius of Caesarea and many others--to connect the fall of Rome with other attempts to explain catastrophe and change. The course will conclude by surveying the persistence of the fall of Rome as an idea, through the medieval, early modern, and modern periods, right into contemporary discourse.

HIST248 Beyond the Vote: Race and American Democracy

The ideals of civic equality enshrined in the Declaration of Independence and the Fourteenth Amendment have rarely applied to African Americans. Yet African Americans continue to challenge the United States to live up to its own ideals of civic equality. This course will explore the ways in which African Americans and the issue of race have shaped the twin concepts of American democracy and American citizenship from the U.S. Constitution to the present.

HIST249 History of the End

How will it end? Scientific/political hubris, a nuclear event, an asteroid, environmental disaster, overpopulation, resource scarcity, commodity price spikes, riots, social chaos, social control? This course investigates how people have imagined apocalypse and post-apocalypse over time, on the premise that fantasies of the end provide a window into the anxieties of the societies that produce them. In spite of its orientation toward fictional scenarios, this is primarily a course about postwar American environmental and political thought, and the ways these inflect or are inflected by fantasy.

HIST250 World History since 1700

This class is a sequel to World History, History 242, which ends in 1700. It is not necessary to take the two semesters of World History in chronological order, or even to take both semesters.

Using material culture, visual sources, primary texts, and a textbook, this course will give students a solid understanding of World History from 1700 to the present. Emphasis will be placed on the development of major cultures around the world--and there will be extended discussion of how the major cultures fail to explain much of World History.

In practical terms, students will learn how to assess a broad range of historical sources from varied places and times; how to debate these works in class discussion; how to produce concise and precise reading notes based on an argument/counter-argument format; and how to work collaboratively on the group project.

HIST251 Empires in World History

Empires have dominated the political landscape across the globe for much of human history. But how did they come into being? More importantly, what strategies were used to maintain them? This course examines the history of five empires--Roman, Mongol, Ottoman, Aztec, and British--to see whether patterns emerge that might explain why a particular imperial project was successful and why it ultimately failed. In reviewing the history of each empire, we will discuss its ideology, military technology, economy, gender roles, and treatment of subject peoples to create a comparative framework in which to place empires in a global context.

HIST254 Science in Western Culture

This course offers an introduction to the history of the sciences between the late 17th and early 20th centuries, with the aim of understanding the varied ways of knowing that have come to be called "science" and how they have attained such an important status in shaping modern Western culture. To do so, we will both investigate key intellectual developments--such as Newtonianism, theories of energy and matter, and the rise of evolutionary thought--and consider these ideas in the cultural contexts in which they developed to better understand how people have "done science" in different times and places.

Throughout, we will pay attention to the relationships between science and other knowledge systems, between scientists and nonscientists, and between science and state power by exploring the changing nature of scientific authority, the cultural status of the scientist, and the connections among science, commerce, technology, and empire.

HIST255 The Vikings and the Viking Age, 700-1243

The Vikings erupted from their isolated northern homelands throughout Europe from the eighth century, and arguably reoriented European history both in the West, where they were instrumental in the history of the British Isles and France, as well as the East, where they were founders of the Russian kingdom. By 1100, they and their descendants had also established themselves in the Mediterranean, Italy, Sicily, and the Holy Land. This course will examine the reasons the Vikings emerged, and will explain their role not only as warriors, but as important merchants, administrators, and contributors to a robust European literary culture. They provide the perfect avenue by which to understand the creation of European culture and politics. The course will also act as an introduction to the dark age history of England, France, and Northern Europe.

HIST257 From Chocolate to Coca: Commodities and the Making of Latin America

Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America

from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

HIST258 Intimate Histories: Black Women's Sexuality

Black feminist theory teaches us that African American women have historically confronted racism and sexism in addition to other forms of oppression. How has this experience shaped the sexual lives of everyday black women and famous figures? This course places the sexual at the center of African American women's history. It will examine how regimes of violence have intervened in black women's sexual freedom, from intimate bonds to reproduction to same-sex desire. It will cover black women's resistance to these regimes; to their sexual agency in diverse spaces from the plantation to the porn industry. This course will also tackle the enduring impact of the Jezebel stereotype in the history of black women's sexuality. Using primary and secondary sources, this class will fundamentally investigate the significance of African American women's sexual history in the histories of American sexual, racial, gender, and class politics.

HIST259 Asians and Pacific Islanders in U.S. Empire

This course forefronts the diversity of experiences between and within the Asian and Pacific Islander communities in the U.S. empire both on the North American continent and in the Pacific. While political and social categories place Asians and Pacific Islanders within the same group, the groups' vastly varied experiences under U.S. empire makes it necessary to challenge the historical narratives that gloss over key contexts that continue to influence Asian American and Pacific Islander American experiences today. Thus, we will engage in an integrated, not conflated, history of Asians and Pacific Islanders, paying attention to the specificities of imperial experiences and their effects on race, class, gender, migration, and diasporic patterns. We will explore topics of immigration and migration, labor and trade, citizenship and belonging, race and indigeneity, gender and sexuality, war and militarism, religion and culture in various contexts, including cities such as San Francisco and New York, regions such as the Pacific Northwest and the American South, countries of the Pacific Rim including the Philippines and Vietnam, and the Pacific islands such as Guam, Hawai'i, and American Samoa.

HIST261 Enlightenment and Science

This course will examine the positive and negative ways that 21st-century science and technology have been impacted by the Enlightenment. In this earlier time, without government or private sources of funding for science, the emphasis on immediate outcomes became common. Practitioners of science often had to be showmen to attract attention in order to get funding. Through the study of contemporary news articles, this class will also consider such ethical choices, many of them to do with resource allocation, that we are facing in science, medicine, and technology today. It has been assumed that the modern age was drawn from the scientific method and the scientific advances of the Enlightenment. It was Émilie du Châtelet and Voltaire, both strong supporters of Isaac Newton, who, in the mid-18th century, chose the rational, scientific method as the marker of their intellectual age, the Enlightenment. This choice was adopted by their intellectual cohort, and in turn it was slowly accepted as the standard by European society overall. Thus Enlightenment science did not only lead to modern, 21st-century science, it also directly shaped modern attitudes toward the proper running of society and this continues until today. Yet, little work has been done on what it means to organize a society along scientific principles, especially given that this represented a sharp shift away from traditional decision-making on the state level, and a move towards secularization. How did this new, rational approach shift the priorities of European societies, particularly in terms of the distribution of resources? In the 18th century, there was also a desire by educated readers who were not themselves practicing science to learn more about both the history of science and contemporary scientific discoveries. In this century, emerging modern science was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans as well as privileged practitioners of science. Talented young men from less privileged backgrounds were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also active in scientific circles, perhaps most notably Margaret Cavendish, Émilie du Châtelet, and Caroline Herschel. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In both cases, science was discussed as a normal topic of discussion, not just a subject for specialists. However, the professionalization and specialization of the sciences in the 19th century led to mixed results—it certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly established manner. It also resulted in the end of educated people outside of the sciences considering science to be an area that they should know in order to be proper citizens, not just intellectuals. For centuries it was assumed that the modern age was drawn from the scientific advances of the European Enlightenment in the 18th century. Then, in the last few decades, many scholars started to attack what has been called the Enlightenment Project with its wholesale emphasis on science and rationality. Others have found that there were also valuable nonscientific achievements in Europe during the Enlightenment. However, there is a need to bring the scientific method and the technological advances of the 18th century back into the conversation about the science of that time and then of our own time. Given that we now live in an age both bettered and dominated by science and technology, it is of paramount importance to understand the origins of modern science and technology.

HIST261Z Enlightenment and Science

This course will be a study of how we, as a society, have obtained our views on science. The class will concentrate on the positive and negative ways that twenty-first-century science and technology have been impacted by the Enlightenment. In general terms, the long-eighteenth-century European Enlightenment is taken to be the marker of the modern age--when modern science emerged. The time has now come for a reconsideration of the complexity of science and the scientific method during the Enlightenment as a means of comprehending its direct impact on the modern age in which we are living today. This class will focus overall on the strengths and weaknesses that modern science, technology, and thus society have inherited from the Enlightenment.

This is not wholly a story of science and technology in the West, but a World History story. This class will highlight test cases and ethical choices--to give two modern examples, decisions about resource allocation, that of fossil fuels and vaccines--that we are facing today. These choices are not made simply on scientific, logical lines but also according to the preferences of society. In order to understand our current situation, we must inform ourselves about how we arrived at this situation. Two centuries ago, without government or private sources of funding for science, the emphasis on immediate outcomes in science became common. Practitioners of science (the term "scientist" was not used until the nineteenth century) often had to be showmen to attract attention in order to get funding. Likewise, by the twenty-first century, it is now almost impossible for scientists to get grants for pure research; winning applications have to stress immediate public outcomes in order to get funded. This effectively puts a stopper into the very source of new scientific ideas--pure science--and of virtually all new scientific break throughs, and this is a world-wide trend in the sciences.

In this class, we will examine crucial examples of the key scientific subjects that emerged during the Enlightenment, and social and political responses to these same scientific discoveries, from both the Enlightenment and Counter-Enlightenment, which stressed religion over science. We will read responses from non-practitioners of science at the time--educated people trying to make sense of emerging modern science in the midst of politically and economic troubled times. There was, in the eighteenth century, no safety net--such as unemployment benefits--for those who wanted to practice science in a time that there were no jobs in science. There was certainly no safety net for rest of society either. The parallels to our own time are self-evident: political polarization, closely linked to radically different views toward science, in the midst of epidemics and widespread financial distress.

Emerging modern science in the long eighteenth century was relatively open to new types of people, not just new ideas. During the Enlightenment, science and technology were being advanced by artisans in addition to well-connected practitioners of science. Talented young men from less privileged backgrounds were, for the first time, slowly able to gain access to the major scientific circles during the Enlightenment. A surprising number of women (in a time when women had virtually no legal rights apart from their male relatives) were also

active in scientific circles. Such accomplished women were rare during the Enlightenment but they should not be ignored. Margaret Cavendish, Emilie du Chatelet, and Caroline Herschel are prime examples of women practitioners of mathematics, physics, and astronomy respectively. Women were also the organizers of the intellectual salons in Paris and the political salons in London. In all these cases, even the political salons, science was discussed as a general topic of discussion, not just a subject for specialists. And those knowledgeable in the sciences were expected to make their work accessible to non-specialists. Later, however, the nineteenth-century professionalization of, and specialization in the sciences led to mixed results. It certainly allowed for a substantial increase in the scale of modern scientific work. Nevertheless, it also led to a less open attitude toward those not trained as scientists in the newly-established manner. Alas, it also resulted in the end of the belief that educated people outside of the sciences should know about it in order to be proper citizens. Overall, this class will address areas of commonality and difference between Enlightenment science and technology and modern science and technology, including lingering problems, as well as possible solutions suggested from past writings and experiences.

There will be many distinctive aspects of this class. One will be the intensive textual analysis of primary documents in class. Another will be the active participation of several guest speakers. There will also be a virtual visit to Special Collections, Olin Library, Wesleyan University.

HIST262 Atomic Africa: A Technological History of the Cold War

"Atomic Power Programme Moves Ahead: NUCLEAR REACTOR FOR GHANA" In 1962 the Ghanaian Times proclaimed Ghana's atomic ambitions. Strikingly, it was only two years after the West African nation raised the international alarm against France's nuclear testing in the Sahara. In the midst of the global Cold War, African activists, politicians and scientists called for an end to nuclear imperialism and struggled for political and scientific sovereignty. It was an era marked by the struggle for decolonization but also by the promise of a new technological age. As African politicians planned for an Africa of the future, they faced intense political pressures from both the U.S. and the Soviet Union. They also formed partnerships with China and Cuba, reshaping the international lines of Cold War cooperation and the nature of "development." Over the course of the semester, we will examine Cold War stories across the continent including the mining of uranium, the international Congo Crisis, the development of African radiation experts, the use of radio by liberation forces in Angola, the emergence of an African Jet Age, and the building of the Freedom Railway in Tanzania. In addition, we will examine how students, workers, and scientists negotiated the currents of the Cold War and responded in creative ways to produce their own Atomic Africa.

HIST263 Inside Nazi Germany, 1933--1945

This survey course seeks to give a firm historical grounding in the processes that led to Hitler's rise to power, the nature of the National Socialist regime, and the origins and implementation of policies of aggression and genocide. The basic premise of this course is that National Socialism was from the outset driven by

a belligerent and genocidal logic. The course will therefore critically analyze the racial, eugenic, and geopolitical ideology of National Socialism and the policies of discrimination, conquest, economic exploitation, and extermination that followed from it. At the same time, the role of structural factors in explaining these outcomes will also be explored in great depth. We will analyze how German society was shaped by Nazism, considering conformity and opposition in the lives of ordinary people in both peacetime and war. The course seeks to impart an awareness of the complex of factors that produced a regime of unprecedented destructiveness and horror, and it aims to develop a critical understanding of the ongoing problems of interpretation that accompany its history. Just as importantly, we will consider the continued relevance of the legacy of National Socialism and the Holocaust to our evaluation of national and international affairs in the 21st century.

HIST264 Waterways: Maritime World History

Human history has been shaped by the sea. Whether as a source of food, a frontier, a boundary, or a bridge, the sea has represented a site of both opportunity and danger. This course will examine the way humans have responded to their marine and maritime environments, both in terms of the technologies they have developed to navigate and exploit them but also insofar as the sea has shaped the way humans think about themselves. While our inquiry will extend into the deep past and the early development of human culture and civilization, we will focus on maritime history over the past millennium, the development of oceanic worlds, the rise of the "age of sail" between the 16th and 19th centuries, and the transformation of global navigation and politics with the rise of steam, diesel, and nuclear power.

HIST266 Visions of World Order: From the French Revolution to the Present

This course offers a survey of how social scientists, philosophers, and statesmen have understood and imagined global order from the late 18th century until the present. The course first examines interpretations of global order that emerged during the late 18th and 19th centuries: Cosmopolitanism (Immanuel Kant), Positivism (August Comte, Saint Simon), Nationalism (Giuseppe Mazzini), and Marxism. The course then turns to the first half of the 20th century by examining the international thought of W.E.B. Dubois, Marcus Garvey, Rosa Luxemburg, and Gandhi, while also discussing fascist and liberal internationalist views of world

order that emerged after World War I. The third part of the course discusses visions of Cold War order connected to American modernization theory (W.W. Rostow), neoliberalism (Friedrich Hayek), post-colonialism (Franz Fanon), Third Worldism, Neoconservatism (Jeane Kirkpatrick), and Systems Theory. The course concludes with the Post-Cold War period and how it has been imagined by such thinkers as Francis Fukuyama and Samuel Huntington along with a discussion of such topics as the global turn to nationalism, the Green New Deal, and the "New Cold War with China."

HIST267 Development in Question: Conservation in Africa

"Why not plant trees?" In 1977 Wangari Maathai started the Green Belt Movement, a popular environmental revolution, in Kenya. Then in the 1990s Nigeria Ken Saro-Wiwa fought for the rights of local communities against the multi-national oil industry. Like many African activists, scientists, and farmers, they placed African experiences at the center of environmental policy and conservation. Yet, popular images of the continent's environment in perpetual crisis blame African practices or disregard African efforts. Such depictions of "desertification" or "over grazing" have impacted international and governmental policy. Recent scholarship suggests that such common perceptions of the environment in Africa and conservation policy are misleading. This course will allow students to critically study the history of environmental management on the continent and the development of the idea of conservation. We will examine game park politics, the history of resource extraction, climate change, and other pressing environmental concerns. We will also study diverse African environmental perspectives from the guardians of sacred forests to activists such as Wangari Maathai and Ken Saro-Wiwa.

HIST268 The Origins of Global Capitalism: Economic History, 1400--1800

This course explores how the modern market economy came into being in Europe and why this system expanded outward to bring the rest of the world into its orbit by 1800. Among other things, it seeks to provide answers for why China's economy--perhaps the most sophisticated in the world before 1500--fell into relative stagnation and why Europe was the first region to develop mechanized industry and break out of a poverty trap that had restricted prosperity for millennia. The course begins by exploring late medieval European agriculture, market systems, institutions, and technology to reveal how the paths of economic development taken in Europe began to diverge fundamentally from those taken by societies in Africa, Asia, and the Americas. It will explore the role of the spice trade in the expansion of European influence abroad, the significance of new food and cash crops in the development of plantation systems and long-haul trade, the impact of organized coercion in the development of monopolies and monopoly companies, and the role of proto-industrial methods of production and colonial economies in the birth of the Industrial Revolution. The course aims to be accessible, broad, and comparative, drawing insights from many fields to consider the environmental, geographical, cultural, institutional, and political factors shaping the economic changes that have created modern capitalism.

HIST270 On Evidence: Archives, Museums, and Prisons

This course introduces an interdisciplinary study of the idea of evidence in connection to the modern development of archives, museums, and prisons, by setting this in a contemporary dialog with the discourses on state violence, incarceration, and refugeehood. This course will firstly establish historical and theoretical connections between carcerality, Western archival record-keeping practices (e.g., scientific grids, mugshots, taxonomies, and forms of surveillance), and museological frameworks developed during the transition from the 19th to the 20th century.

Furthermore, it considers how records, artifacts, digital data, bones, sites of "memories," oral traditions, embodied knowledge, or intergenerational trauma can become evidentiary material. Such inquiries are central to decolonial archival studies as they are critical for historically marginalized, racialized, and gendered subjects, whose claims to social justice, human rights, and cultural heritage are tied to the aftermaths of slavery, genocides, and colonialism. Our readings and discussions will specifically draw upon decolonial archival studies, digital humanities, visual studies, human rights discourse, Asian American studies, Black studies, and Indigenous studies, which have continuously challenged what constitutes evidence.

HIST271 Free the Land: Histories of Environmental Racism

This course will introduce students to the study and discussion of environmental racism and environmental justice in the United States that centers the histories and experiences of communities of color. Environmental racism is defined by Dr. Robert Bullard ("the Father of Environmental Justice") as "any policy, practice or directive that differentially affects or disadvantages (where intended or unintended) individuals, groups or communities based on race." This course expands and illuminates this definition through examinations of watershed moments--from the Transatlantic Slave Trade to struggles in the greater Connecticut River Valley today--in which communities of color in the United States bear the deadly brunt of toxic fumes, poisoned groundwater, nuclear waste, perilous disaster work, land theft, and the slow violence of biological extermination. Throughout the semester, we will read scholarly texts, engage primary sources, analyze popular and independent media, and study testimony and self-published materials from activists and eyewitnesses.

HIST272 Law, Court, and Crime in England, 600--1660

This course will discuss the nature and development of law, dispute resolution, custom, and rule in England from the arrival of the English on the island in the age of Arthur when feud and compensatory justice dominated. It will then examine the rise of royal power, local custom, and the common law in the 12th and 13th centuries, including the Magna Carta crisis. We will focus on the growing politicization of law and the development of courts and lawyers alongside new sorts of lawmaking in parliament and through the power of the king. The growth and challenge of royal and parliamentary power will frame the last parts of the course that anticipate the revolutionary crisis of the 17th century. Along the way, the course will ask, Who gets to make law, what is the role of writing in the development of custom and law, how did the English decide who was right and who wrong: calculation, testimony, jury, or ordeal? What were the forms of punishment and compensation employed, and what did this tell us of conceptions of the person: mutilation, execution, or incarceration? How did social status and gender shape expectations and outcomes in the legal process: Who could be a legal actor, a responsible malefactor, a property owner, or a slave; who could be judge and legislator? The course will be based on the examination both of recent scholarship and a wide array of primary sources such as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

HIST273 Well-Behaved Women Seldom Make History: Gender, Sex, and Power in Colonial America

When Laurel Thatcher Ulrich wrote that "well-behaved women seldom make history," she meant that colonial women who conformed to gendered and sexual expectations rarely emerged in the historical record. As such, the women who feature most prominently as individuals in the historical record of the colonial period are those who acted outside proscribed social norms. We will, therefore, look at the ways that colonial Americans attempted to police those prescribed social boundaries from the persecution of Anne Hutchinson, to their fascination with witchcraft, to their reification of white womanhood. As we will see, many used intimacy to shape the world they lived in even as they were left out of the formal aspects of governing. Finally, this course seeks to understand how early Americans both constructed those gendered expectations and how they served to reinforce the patriarchal, racial, and colonial hierarchies of early America.

HIST274 Crisis, Constitution, and War: the U.S.'s Early Decades

It is common today for Americans to fight over how to interpret the U.S.'s early decades. Specifically, recent decisions by the U.S. Supreme Court (some guided by originalist jurisprudence) have sparked vigorous debate over the meaning of the U.S. Constitution. This course not only examines the Constitutional Convention of 1787, but also the preceding years of unrest and crises such as Shay's Rebellion. Military history is another important focus of the course, and students will discuss the technological, operational, and social dynamics of the Quasi-War, Barbary Wars, and the War of 1812. Finally, this course also investigates how the U.S. struggled to exercise power in North America, as free

and enslaved peoples resisted its authority during the Whiskey Rebellion, Wars of the Northwest Territory, and Gabriel's Rebellion. One unique aspect of this course is its four-week long embodied learning exercise, as students "gather" in 1780s Philadelphia as constitutional convention delegates. What exactly they are gathering to accomplish is a matter of controversy, but ultimately the student-delegates will work through "sectional interests, backroom deal-making, personal rivalries, and foreign intrigue" as they attempt to approve a new constitution within the constraints of the era's historical context.

HIST275 Empires on Fire: Revolutions in the Atlantic World

This class will explore what historians have called the "Age of Revolutions." The ideas, ideologies, and actions that set empires aflame during the long 18th century formed an entangled revolutionary experience that spread from one part of the Atlantic world to the next. From England's "Glorious Revolution" in 1688 to the American, French, and Haitian revolutions at the end of the 18th century, and then on to the South American and Canadian uprisings in the early 19th century, this course will examine revolutions not as discrete events but as interrelated processes. By studying the perspectives of leading politicians, regular subjects and citizens, and marginalized groups, students will investigate the wide variety of revolutionary experiences.

HIST278 Visualizing Firearms History: An Applied Quantitative and Archival Approach for a Project-Based Expl

This project-based course provides a unique cross-disciplinary opportunity to study important historical questions surrounding firearms. Combining quantitative methodology in data science with qualitative research methods in history, students will answer questions they are passionate about based on existing datasets. Students will read, discuss, and write responses to the latest historical scholarship on the technological development of guns, firearms in media, gun violence statistics, and advertisements. Students will choose one of four datasets to research and analyze. These include data sets related to firearms patents since the 1820s, firearms in media (film, television, anime, games), firearms-related deaths, and advertisements of firearms. Students will develop skills in hypothesis testing and inferential statistical analysis alongside qualitative research methods used in history. The course offers one-on-one support and training in the skills required to complete a team-based final project. The final project will be hybrid between a research paper and also an exhibit (e.g., film, website, media, art installation). Students will present their work at the center's third annual undergraduate research conference (Spring 2025). Select students can apply to continue on as QAC summer apprentices and Baker Collabria Fellows in Data Analysis, and as CSGS NEH-funded summer history research fellows and as History thesis researchers.

HIST279 The Making of Modern Japan, 1500 to Present

In a global context, Japan emerged as a major player on the world stage after 1500. While in the midst of what later was called the Warring States Period (sometimes dated 1468–1600), Japanese traders and others maintained a broad network of commerce that included not only Korea and China but spread to

Southeast Asia. Europeans first reached Japan in 1543, and it was soon obvious that no European state had the military might to colonize Japan. These are the roots from which a modern Japan appeared that in the 19th and early 20th centuries militarized and set upon an imperial project until defeated at war in 1945. Since then, Japan has emerged as a postmodern, highly technological, pop culture-oriented, and aging country. One theme that will be examined across the semester is environmental change over the long term.

HIST280 The Industrial Revolution in Global Context: Economic History Since 1800

With the development of mechanized industry in the late 18th century, a productivity revolution was unleashed that would soon spread from Britain to continental Europe, North America, and Japan. By the early 21st century, three successive industrial revolutions had profoundly transformed these societies as well as the rapidly developing economies of East and South Asia. This course analyzes the historical forces driving this process. It begins by studying the transformation of Europe's overwhelmingly rural and agricultural economy into a predominantly urban and industrial one, looking closely at entrepreneurs, technology, and changing trading patterns during various phases of this process. The focus will be on Britain, Germany, the United States, and Japan, considering not only industrial development but also its broader implications, including colonial empire, great power rivalry, protectionism, economic depressions, and warfare, to highlight the complex relationship between economic and political power. The course will also analyze how industrial capitalism survived the disasters of the 20th century to drive a process of regional and global economic integration in the late 20th century. It will conclude by considering the opportunities and challenges posed to the mature industrial economies by the newly emerging industrial powers China and India.

HIST281 Global Economy: Germany and the World in an Age of Extremes, 1870-1957 (CLAC.50)

This Center for Global Studies discussion course explores the experience of globalization in the German-speaking world from the war of German unification in 1870 to the emergence of the European Community in 1957. It will analyze German imperialism and overseas investment before 1914; the deglobalization of the German economy in the First World War; the problem of reparations and other economic challenges faced by the Weimar Republic; and the impact of global protectionism and the Great Depression, the economic forces allowing the rise of Hitler, the economics of war, and the Nazi "New Order." We will explore the reasons for the ultimate failure of the German war effort and the country's catastrophic destruction and defeat in 1945, as well as Germany's postwar division and occupation as well as the gradual reconstruction and reintegration of the West German economy into a European and global division of labor beginning with the Bizone Agreement and GATT (1947), the Marshall Plan (1948), and the London German External Debt Agreement (1953), culminating in the Treaty of Rome (1957) creating the European Economic Community. The course will be using select German-language historical primary sources to explore this topic, supported by short secondary source narratives in both German and English pitched to intermediate to advanced German speakers/readers. Unlike the parent History lecture class (HIST 280: The Origins of Global Capitalism, 1800-present), this is a discussion course aimed at expanding vocabulary and practicing fluent discussions in the fields of history, politics, and economics.

HIST282 Histories of Ukraine

Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses a specific territory, it has also been a space where multiple communities--Ukrainians, Russians, Jews, and Poles--have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

HIST283 What Is Rationality?

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today. From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

HIST284 Death and the Limits of Representation

The disciplines of history, philosophy, and literature all hinge on the issue of representation. The ability to communicate ideas, visions, or arguments all depend on the ability to represent these abstract notions in a concrete and recognizable form. In this course we will problematize the basis of all three disciplines by exploring Death as the limit of representation: as that which is ultimately unknowable (or knowable only second-hand) and thus beyond representation. Indeed, what is the concept of the "ghost" but an attempt to represent someone who is dead in the recognizable form of the body that once lived. Yet, the ghost appears and disappears, is not bound by the laws of time or space, and is largely present in its absence. By exploring texts by such authors as Plato, Shakespeare, Poe, Derrida, Levinas, Mbembe, and Hartman, and studying historical events such as the "black death," the Middle Passage, and the Shoah, we will attempt to understand the project of representation and its limits.

HIST286 Photography and Law: Mugshots, Privacy and Publicity, Obscenity, Copyright, and Evidence

This seminar is designed as an introduction to the major developments in the legal history of photography in transatlantic (US-UK especially) society from the first law cases involving photography in 1840 through to contemporary legal debates about such topics as cameras in the courtroom, sexting, surveillance, photographing police, dash cam and body cam videos, admissibility of photographs as evidence, obscenity and moral boundaries of subject matter, and copyright. A range of secondary historical and theoretical writings will anchor the discussions, but the course will focus primarily on student analysis and interpretation of primary and archival sources (texts of legal cases, law reviews and dissertation, news articles, and documentary and video footage). Students will gain knowledge of how legal history has shaped the history of photography, and new perspectives on the historical origins of contemporary issues in photography and digital imaging. This course should be of interest especially to history majors and non-majors who are interested in law, photography, and culture and will also contribute to the "Visual and Material Studies" module in History.

HIST287 Science in Modernity and After: 20th-Century Science and Technology

The 20th century was a time of dramatic achievements in science, from nuclear physics to space exploration to gene sequencing. It also saw the emergence of many of the technologies that underpin our world today: atomic weapons, electronic digital computers, synthetic fertilizers, and high-yield crop varieties, to name a few examples. This course surveys these developments, focusing not only on the histories of specific ideas and techniques, but more broadly exploring the complex relationship between science and technology; the relationship between science, the military, and state power; the changing cultural and political influence of scientists and engineers; the institutions and places where science and innovation gets done; the globalization of science and technology; and the emergence of critiques of science and technology.

HIST289 God & Guns: The History of Faith and Firearms in America

This course examines the history of firearms and religion in the United States, ultimately seeking to understand the significance of gun culture within American Christianity and the powerful "God & Guns" story at the core of many Americans' identity. Beginning with an overview of colonial and revolutionary-era views of firearms and violence, the course examines the influence of slavery, gender, and the wars of the 20th century, paying special attention to the emergence of a masculine, warrior Jesus within evangelical and fundamentalist communities during the Cold War. Students will be challenged to consider the ways in which this story helps explain one facet of popular support for Donald Trump and to reflect on how firearms are central to the identity of many conservative American Christians.

HIST291 Gender and History: Global Feminist Theories and Narratives of the Past (FGSS Gateway)

What is a female husband? In the 1980s an increasing number of feminist scholars posed questions about the relationship between biological sex and gender roles. The African scholar Ifi Amadiume, who studied the history of female husbands in West Africa, asserted that such relationships between sex and gender needed to be studied in a global context. More than two decades after Amadiume's influential book "Male Daughters, Female Husbands: Gender and Sex in an African Society" (1987) was published, the scholarship on global gender and sexuality is vibrant and dynamic. These works have shown gender to be central to understanding society at different periods and geographical locations, but it is far from a universally understood category.

This seminar will introduce first- and second-year students to the history of gender, sex, labor, and feminist activism from a global and comparative perspective with readings from the history of Africa, the Americas, Asia, and Europe. We will also cover the development of influential theories in the field and how they apply to the writing of history. This course is especially appropriate for prospective history and feminist, gender and sexuality majors, though all students interested in using gender as category of historical analysis for their scholarly work in other fields are welcome.

HIST299 Mapping The Borderlands: The U.S./Mexico Border and Digital Storytelling

The U.S./Mexico border is not only a geographical boundary, but a complex mapping project, where governments and corporations project their visions of the landscape into policies and boundaries, only to run afoul of people, terrain, and climate. Therefore, this course will serve two interrelated functions: 1) to explore borderlands as a concept and spatial relations, particularly at the U.S./Mexico border 2) to use digital tools to tell spatial stories about the border. While the current location of the border is often naturalized as an ahistorical and timeless dividing line between the United States and Mexico, this course acquaints students with a long historical approach and competing perspectives on issues arising from the presence of the U.S./Mexico border/lands. Using monographs, first-hand accounts, film, and music, we will trace the recent history, politics, and culture of the borderlands, exploring topics like racialization, immigration, gender, place-making, and cultural exchange. At the same time, we will examine and apply digital methods that complement our understanding of the U.S./Mexico border.

HIST301 The Spanish Civil War, 1936–1939

The Spanish Civil War erupted during a decade in Europe marked by ideological tensions, economic and social crises, the weakness of democracies contrasted to the dynamism of dictatorial regimes, and an international climate that culminated in the outbreak of World War II. The ideological character of the civil war in Spain, which appeared to pit left vs. right, or democracy vs. fascism, or nation and religious faith vs. communism and revolution, captured the imagination of Europeans and spurred their involvement in the war. All of Europe's dangers seemed to have exploded in Spain, whatever the specifically Spanish factors that unleashed and defined the struggle. This seminar will examine the events in Spain and Europe's response to them through contemporary writings, such as journalistic and participants' accounts, diplomatic documents, memoirs, films, biographies, and general and specific studies from the 1930s to the present.

HIST302 Reproductive Politics and the Family in Africa

This course will introduce students to broad discourses and issues related to reproduction and the family in modern Africa. We will study maternal and sexual health and technologies of reproduction, but for us reproduction will be an object of historical inquiry. One of the driving questions for this course will be how reproduction has been given meaning socially. How have African societies understood abortion, infanticide, or other medical means of controlling fertility and childbirth? What has been the relationship between the family and the state? We will also examine ideas about sexuality and love, changing notions of parenthood, childhood health, and what constitutes an ideal family. Finally, we will interrogate how these ideas influenced health policy and political ideologies which, in turn, changed conceptions of motherhood, fatherhood, and the family.

HIST304 Middle East Intellectuals and Modernity

How have Middle Eastern intellectuals conceived and discussed modernity? We will use this question to analyze the variety in the history of thought in

Middle Eastern societies in the 19th and early 20th centuries. Modernization, formation of the modern state and issues of nationalism, imperialism and colonialism, main intellectual questions of the time, will form the framework as we analyze their political, social, and cultural impact on the production of knowledge in the Ottoman and post-Ottoman lands. As such it is NOT a history of the Middle East but rather a history of mentalities, organized around four thematic/chronological modules (Reform, Modern State and Constitutionalism/Panislamism, Nationalisms and Colonialisms) each representing a set of concepts, ideas, and movements as well as facts and problems, all of which will be compared to the larger world of modern state formation both in thought and practice. The principal aim is to familiarize students with the processes of modernization in the making of the modern Middle East.

HIST305 Coexistence and Violence in Europe: Jews, Muslims, Roma and their Neighbors

From the end of the 18th to the beginning of the 21st century, the territories of Central and Eastern Europe were transformed from imperial borderlands with religiously and ethnically diverse populations into homogenous nation-states. This course will examine the processes that remade these borderlands, along with the changing relations between the various ethnic and religious communities that dwelled within them. Students will consider examples of both peaceful coexistence and violent conflict among these populations, as well as the impact of the modern state, its institutions, and ideologies such as nationalism, liberalism, socialism, and fascism on these regions. Throughout the course, students will consider especially the history of Jewish, Muslim, and Romani minorities in light of major themes.

HIST306 We Were Eight Years in Power: Reconstruction and the Politics of Black Inequality

We Were Eight Years in Power examines the crucible of American democracy by looking at the struggle of African American rights following the Civil War. Debates in the period on the rights of African Americans continue to structure American ideas of race and citizenship to the present day. The foundations of American racial animus and systemic racism date to Reconstruction. We will explore both the periods of Reconstruction (1863-1877) and Redemption (1877-1910), its dark successor that saw the establishment of Jim Crow. We will discuss readings on the promise of interracial rule, Reconstruction in the north, the violent overthrow of racial equality, and the establishment of the color line in American law.

HIST307 The Economy of Nature and Nations

On many of the key environmental problems of the 21st century, from climate change to biodiversity conservation, the perspectives of ecology and economics often seem poles apart. Ecology is typically associated with a skeptical stance toward economic growth and human intervention in the environment, while economics focuses on understanding (and often, celebrating) human activities of production, consumption, and growth. At the same time, ecology and economics share a common etymology: both words spring from the Greek *oikos*, or household. They also share much common history. This course thus

explores the parallel histories of economics and ecology from the 18th century to the present, focusing on changing conceptions of the *oikos* over this period, from cameralism's vision of the household as a princely estate or kingdom, continuing through the emergence of ideas about national or imperial economic development, and culminating in the dominant 20th-century recasting of economics as being centrally concerned with problems of resource allocation. Simultaneously, the course explores connections between changes in economics and the emergence of ecological science over this period, from Enlightenment natural history and early musings on the "economy of nature," to the design of markets for carbon credits today.

HIST308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America

This course examines the history of American evangelicalism, seeking to understand the nature of its support for the presidency of Donald Trump. Beginning with a brief overview of religion in the colonial and revolutionary eras, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped 21st-century evangelicalism, and reflect on how the movement's view of American history contributes to its own sense of identity and purpose.

HIST309 The Idea of Nature: Theory and Practice

What is nature, that our minds are so full of it? Aristotle, the first naturalist in European intellectual history, called it an inner principle of change, and wove his observations of the natural world into the fabric of his philosophy; Darwin inherited a millennia-old tradition of thinking about change in nature and produced the theory of evolution we live with today. This seminar charts the long history of the idea of nature in European thought, moving between the histories of philosophy and what was once called "natural philosophy" and is now called "science." Along the way, we will meet the constituent parts of living "nature": animals (what are they, anyway? And are we them?), plants, and then, with the advent of microscopy, the cell itself. This course also explores the cultural life of the idea of nature, by devoting substantial time to a specific case study: the natural history museum, a creation of the Victorian period that has, for more than a hundred years, offered many people their first glimpse of the idea that nature is the kind of thing that has a meaningful past, and possibly a future as well. How did natural history museums explore evolutionary theory for the general public? How did they expand people's sense of time, and of the variety of species in nature? How did they court, and deal with, political and religious controversy? And how were they sometimes the beneficiaries of, and complicit in, the political and intellectual project of colonialism? We explore all these questions. Readings include Aristotle, Hans Blumenberg, Georges Canguilhem, Charles Darwin, Sigmund Freud, Pierre Hadot, Donna Haraway, Ursula LeGuin, Harriet Ritvo, Sophia Roosth, and Steven Shapin.

HIST311 The History of the Samurai

This course examines the history of Japanese warriors, known among other things as samurai and bushi, from their origins in ancient Japan to the dismantling of the samurai class after the Meiji Restoration in 1868. Through a combination of primary and secondary sources, we will trace the development of warrior power and identity, the rise of warrior power in medieval Japan, the domestication and bureaucratization of warriors during the Edo Period (1600-1868), and warrior discontent with socioeconomic change as one of the driving forces behind the Meiji Restoration. Other themes include the relationship between warrior government and adjudication, the use of Buddhism for legitimization, and male-male intimacy and sexual relations.

HIST312 Diggers and Discontents: Doing History from Below

History looks different when told from the perspective of those without power. This course will introduce students to the practice of "doing history from below," which includes finding the voices of the marginalized and illuminating the actions of those who fought against established power structures. Each week, we'll read about the discontented from the 17th to 19th centuries, including the poor, criminals, women, the enslaved, pirates, Indigenous nations, and workers. We will discuss how the very institutions of historical practice reify the status quo and elide the experiences of those who fought for alternate (and better) futures.

HIST313 Schemers and Redeemers: Capitalism and Christianity in the Early Republic

This course examines the intersection of two of the most significant themes in U.S. history: Capitalism and Christianity. Beginning with the Early Republic (1790s) and continuing through the mid-19th century, this course asks students to explore how Americans used their religious identities to negotiate and shape market activity and institutions (and in turn, how the marketplace shaped their religion). Students will investigate the varied ways in which religious women and men resolved tensions between gender, class, slavery, moral dogma, and market imperatives. Finally, this course will require students to reflect on how the early 19th-century U.S. experience informs our understanding of the relationship between capitalism and Christianity in 21st-century America.

HIST314 The Political Ascetic

This seminar will examine the historical significance of the ascetic, both as a figure in politics as well as an ideal that has radically transformed the way politics is understood. A key goal of the seminar is to examine the dialogue between Indian and European theories of asceticism over the longue durée. Readings will include reflections on asceticism by well-known figures like the Buddha, Krishna (in the Bhagavad Gita), Plato, Sankara, Schopenhauer, Nietzsche, Gandhi, Weber, and Foucault, alongside lesser-known writers like Kautilya, Bankim, Savarkar, and Sahajanand Saraswati.

HIST315 Global Histories: Problems in Scale, Scope, Depth, and Time

How big is too big? How far back in time can historians go? How best to understand the relationship between science and history? What counts as evidence? What accounts for the rise (or return, some would argue) of macro-history? What does it portend for the future of microhistory? This advanced seminar will examine the history and historiographical implications of macro-historical frameworks, including comparative history, world history, global history, deep history, and big history.

HIST317 The Great Game

The "Great Game" was first popularized by Rudyard Kipling in his classic novel "Kim" (1901), where it referred to spycraft in the service of empire. The term gradually came to refer to the struggle for "mastery" of Asia during the 19th century, mainly between the British and Russian Empires. Nowhere were the effects of this imperial rivalry more pronounced than in Pakistan and Afghanistan. More recently the term has been applied to grand strategy, global geopolitics, and espionage, more broadly in scenarios as wide-ranging as Cold War "containment," the global "War on Terror," the current US "pivot" to Asia, and China's "Belt and Road Initiative."

This seminar will examine the history of the Great Game--as both spycraft and great power rivalry--and its wider geopolitical reverberations. We will also examine an array of Great Game manifestations in popular culture. Readings will combine historical narrative and analysis with film, literature, art, and (yes) games.

HIST318 The Politics of Death: The Living, the Dead, and the State

This course will explore the intersections between the living, the dead, and the state, focusing on the ways that death and the dead body raise particular questions and problems for different kinds of political regimes. The course will examine the collisions between the state and the dead, both symbolic and material, by investigating spaces where the state and death intersect in revealing ways: cemeteries, cremation, monuments, rituals, and religious institutions and cultures. The course will also follow, borrowing anthropologist Katherine Verdery's term, "the political lives of dead bodies," the ways in which states mobilize dead bodies to reconfigure the political order.

HIST319 Crisis, Creativity, and Modernity in the Weimar Republic, 1918--1933

Born in defeat and national bankruptcy; beset by disastrous inflation, unemployment, and frequent changes of government; and nearly toppled by coup attempts, the Weimar Republic (1918--1933) produced some of the most influential and enduring examples of modernism. Whether in music, theater, film, painting, photography, design, or architecture, the Weimar years marked an extraordinary explosion of artistic creativity. New approaches were likewise taken in the humanities, social sciences, psychology, medicine, science, and technology, and new ideas about sexuality, the body, and the role of women were introduced. Nevertheless, Weimar modernism was controversial and generated a backlash that caused forces on the political right to mobilize to ultimately bring down the republic. This advanced seminar explores these developments and seeks to understand them within their political, social, and economic contexts to allow for a deeper understanding of Weimar culture and its place within the longer-term historical trajectory of Germany and Europe. This perspective allows for an appreciation of the important links between Weimar modernism and Imperial Germany, as well as an awareness of some of the important continuities between the Weimar and Nazi years.

HIST320 Visions of World Order: From the French Revolution to the Present

This course offers a survey of how social scientists, philosophers and statesmen have understood and imagined global order from the late 18th century until the present. The course first examines interpretations of global order that emerged during the late 18th and 19th centuries: Cosmopolitanism (Immanuel Kant), Positivism (August Comte, Saint Simon), Nationalism (Giuseppe Mazzini) and Marxism. The course then turns to the first half of the twentieth century by examining the international thought of W.E.B. Dubois, Marcus Garvey, Rosa Luxemburg and Gandhi, while also discussing fascist and liberal internationalist views of world order that emerged after World War I. The third part of the course discusses visions of Cold War order connected to American modernization theory (W.W. Rostow), neoliberalism (Friedrich Hayek), post-colonialism (Franz Fanon), Third Worldism, Neoconservatism (Jeane Kirkpatrick) and Systems Theory. The course concludes with the Post-Cold War period and how it has been imagined by such thinkers as Francis Fukuyama and Samuel Huntington along with a discussion of such topics as the global turn to nationalism, the Green New Deal and the "New Cold War with China."

HIST321 Media and Power in Latin America: From Quipus to Twitter

This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

HIST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present

Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike.

This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in *Tristes Tropiques* (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film *Fitzcarraldo* (1982).

HIST324 Homelands: Indigenous Worlds in North America

This class will investigate the story of Indigenous peoples discovering Europeans. It is a difficult story to tell, because few Indigenous inhabitants left written records describing what it was like when ships arrived on the shores and the men and women disembarked, established settlements, and began the process of expanding across the continent. Some encounters were peaceful, while others were violent. Every encounter, however, can be understood by studying Indigenous societies and their worldviews. Far from static and unchanging groups, Indigenous nations were constantly adapting to their physical and spiritual world. This class will use primary and secondary sources to explore North America from the Indigenous perspective, including the rise and fall of great societies before the arrival of Europeans, strategies of contact and exchange after 1500, and the quest to maintain authority and independence during the 18th and 19th centuries.

HIST326 Radical Mapping: History, Praxis, and Grounded Theory

From Indigenous trade routes in precolonial Louisiana to 21st-century digital commemorations of lynching sites, this advanced seminar will examine at the craft of mapping as a site of historiographical study and an opportunity to propose new ways of understanding time and space that center communities of color. We situate the rise of the professionalized fields of Western geography and cartography as a colonial practice, engage critical and resistant readings of historical maps, and convene in a collaborative studio model. Some questions we will explore include: What is a map, and what kind of power does the object and practice wield? How have communities of color been both enclosed

and liberated by spatial arrangements of earth, sea, and sky? What would it mean, in the words of David Harvey, to develop a "People's Geography?" What interventions are cutting-edge scholars making, and what methods are they using to articulate original historical research?

HIST328 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena

Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena--a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire--to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with "The Alexiad" through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

HIST330 Introduction to Public History: Working with Museums, Archives, and Historic Sites

This course will introduce students to the history, ideas, and best practices that shape the world of "public history." How do institutions like museums, archives, and historic sites balance the standards of formal academic scholarship with the demands of interpreting history for a larger public audience? What role do these cultural organizations play in the construction of larger historical narratives? What responsibilities do they have to their audience, stakeholders, and society? The course will turn on six key concepts that shape the world of public history: History and Memory, Inclusivity and Accessibility, Shared Authority/Inquiry, Agendas and Audiences, Legal and Ethical Frameworks, and Economics and Entrepreneurship. Through class readings, discussions, and field work, students will develop an understanding of not only the theories and ideas behind public history, but also the practical daily concerns public historians encounter on the ground. The course will help prepare students who are considering a career in museums, archives, historic sites, historic preservation, and the nonprofit sector. Students will also work with the Wesleyan University Special Collections staff to complete exhibits to be displayed in the Olin Library

HIST332 Race, Capital, and Sexual Consent

Race, Capital, and Sexual Consent will focus on the early 19th century through to the Progressive Era. It will explore racialized sexual markets, from what Black feminist historian Adrienne Davis has called "The Sexual Economy of American Slavery," to the Victorian-era marriage market, to continuing and emerging sex work and pleasure economies. This course will focus on areas of overlap, tension, and reinforcement within and between these racialized sexual markets. Fundamental to this class will be the question of if/how sexual consent is configured within these markets, and what this means in the broader evolution of American liberalism in the 19th- and early 20th-century U.S.

HIST334 Social History of Islam in Africa

The history of Islam in Africa spans 14 centuries, and Islam continues to play a central role in shaping contemporary African societies. In this course, we will examine the long social history of Islam on the continent. Islamic expression in Africa is diverse. We will explore the dynamic ways in which Islam has influenced local cultures and politics as well as the various ways in which individual Africans and African communities have made Islam their own. Topics of discussion include early trade and state formation; Islamic education, literacy, and conversion; the role of women in Muslim societies; Islamic cultural productions; Muslim responses to colonialism; and the contemporary development of political Islam. We will end the course by reflecting on the responses of Africans to contemporary changes in the wider Muslim world.

HIST335 Nature, Science, and Empire in Early Latin America

This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will

read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

HIST340 Policing and Power

This course examines the history of policing in the United States by considering the contexts and conflicts that birthed and shaped the modern carceral state, focused primarily on the late nineteenth century through the 1980s. Moving through five modules, it considers the origins of policing and imprisonment in Europe and the United States, policing as social control or social order, the role of police in constructing state power, policing in a transnational context, and the modern era of mass incarceration. These modules ask what police power is, what histories have shaped the limits or excesses of that power, and how law enforcement shaped American society, culture, and politics. We will pay considerable attention to how these histories can help us navigate contemporary debates around law enforcement and crime.

HIST341 Body Histories in Africa

African bodies have long generated intrigue and misunderstanding. Outside observers, such as missionaries, travelers, colonial administrators, and anthropologists, have documented practices such as scarification and spirit possession as they simultaneously rendered their African practitioners "other." All too often the body as an instrument for creative expression, ritual healing, or social action was lost in translation. More recently Western feminists have focused their attentions on female circumcision. The persistence of circumcision (for both girls and boys) and other bodily practices speaks to their enduring social value and symbolic meaning. What can we learn from these and other body histories in Africa? In this course we will examine embodied rituals such as spirit possession, which marks the body as a site for human engagement with the supernatural. The widespread practice is also a gendered technique of healing documenting shifting understandings of health and illness. In addition, we will study the practice of "sitting on a man" by which women addressed the body politic through dance and collective nudity. The revealed body in motion shamed men into action and has been employed in the 21st century to shame oil companies for their greed and environmental destruction. In this and other examples, we will approach the body as an archive: it is an archive in motion and subject to social renewal. Our embodied evidence will allow us to explore shifting histories of religion, art, sexuality, the economy, and politics from the precolonial era to the contemporary moment. By taking the body as our lens we will also learn new ways to examine the African past through histories of aesthetics, value, labor, hierarchy, and knowledge production.

HIST342 The Rise of the Conservative Movement in the United States Since 1945

"So inevitable, yet so unexpected," Alexis de Tocqueville declared, referring to the French Revolution of 1789. The same is true of the conservative movement that developed in the United States during the second half of the 20th century.

What is the nature of modern American conservatism? How and why did it emerge? What are its social bases? How has conservatism evolved in America since the 1930s? What sort of varieties and conflicts exist within the movement? How did mid- and late-20th-century American conservatives compare to earlier sorts of conservatism in America in the early Republic, the antebellum South, modern American liberalism, and political conservative parties in Europe and Britain? What is the historical significance of the movement?

HIST345 Media Revolutions: Color Television and the Humanities in the 1960s and 1970s

This course visits some of the groundbreaking TV series that presented humanities and sciences to global mass audiences in the 1960s and 1970s. Television emerged as a powerful cultural presence and with remarkable speed. From the late 1960s, the British Broadcasting Company, in partnership with PBS in America, created a series of television programs (partly to widen the audience market for new color television programming). This course focuses on the role of television as a still new, and potentially disruptive, medium. We will look at and discuss a range of British TV series from Kenneth Clark's "Civilisation" and "Monty Python's Flying Circus" (both 1969) to Jacob Bronowski's "The Ascent of Man" (1973) and Alistair Cooke's "America" (1972), John Kenneth Galbraith's "The Age of Uncertainty" (1977), and David Attenborough's "Life on Earth" (first aired in 1979). We will read and discuss works of art and media criticism around this time that laid the groundwork for major conceptual and theoretical remappings of the fields of cultural and visual studies. We also will explore the impact of television on art worlds and museums, looking at how 1960s' color television documentaries influenced the way that humanities are presented televisually up to today. This course satisfies requirements for the "Visual and Material Culture" module in history and major requirements for the Science in Society Program.

HIST348 Urban Histories of Latin America

Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the

city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

HIST350 Black New Orleans

New Orleans is a location on a map, a collective memory, and a metaphor. But most of all, New Orleans is and has been a site of Black cultural production for centuries. While the name often conjures images of Mardi Gras beads and Bourbon Street revelers, this intermediate level seminar unpacks the complex histories of Black communities beyond stereotypes popularized by mass media and tourism marketing. We will discuss topics such as airboat tours, so-called post-Katrina "resilience," voodoo priestess Marie Laveau, and more. Drawing inspiration from historian Jessica Marie Johnson's statement that "Black New Orleans Is The Center of The World," we will come to understand the Crescent City as a crucible and incubator of Black culture. The materials used in this course are as multifaceted as the city itself and include scholarly texts, primary sources, fiction, spoken word, music, and documentary film.

HIST351 Beyond 1619: Enslavement in the United States, 1619-1860

The recent publication of the New York Times' "1619 Project" has refocused attention on the history and lasting effects of enslavement in the United States. Discussion of slavery as America's "original sin," however, oversimplifies the complex, multifaceted, and adaptable nature of enslavement in American history. This seminar will provide students with a grounding in the extensive literature of slavery in the United States from 1619 to the outbreak of the Civil War. We will examine slavery as an economic system of labor exploitation, a racialized hierarchy that legitimized white supremacy, and as a site of resistance and cultural formation. We will explore, additionally, the lives of enslaved individuals alongside our study of the institution of slavery.

HIST352 The Communist Experience in the Soviet Union (CLAC.50)

Like the parent course, HIST353: The Communist Experience in the 20th Century, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

HIST353 The Communist Experience in the 20th Century

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

HIST353Z The Communist Experience in the Twentieth Century

More than thirty years have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the Communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union but also beyond it (in Eastern Europe and Asia). In the global conflict between Capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day's materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day's online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

HIST354Z Self and Text in Roman North Africa: Augustine's Confessions

The native North African Augustine of Hippo wrote the most influential autobiographical text in (so-called) Western literature. It remains the most brilliant text I have ever read: a mind-bendingly complex and yet fully coherent literary self. Let's read it together. Set between Carthage and Rome in 400, Augustine wrote just 10 years before the Eternal City would be sacked by the disaffected former legions of the empire (the Goths). Split between conqueror and conquered, civilization and apocalypse, Augustine wove humanity's existential and epistemological questions into a literary tapestry for the ages: Who am I? How do you speak? Who are you? How do I listen? Who are we? How do we know? At once memoir, critique of empire, philosophy, psychology, theology, personal history, criticism, and a letter, these **CONFESSIONS** require close, careful, focused, attentive readings from a diverse group of interpreters. Join our learning community and spend two snowbound weeks at Wesleyan with a book you will never forget.

HIST356 Between Worlds: Change and Continuity in Early Latin America

The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental, political, religious, legal, and social repercussions. Through the study of

chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

HIST357 Regulators: The Administrative State in Modern America

How much arsenic is permissible in drinking water? Should financial firms be required to hold on to some of the risky securities they issue? Can a company sell a jar of peanut butter that contains only 90% peanuts? In the modern United States, the answers to these questions are determined by the administrative state - a collection of dozens of regulatory agencies, bureaus, and commissions comprising millions of officials and staff. Historians, political scientists, and other scholars have long recognized the administrative state as an important site of governance. But unlike Congress, the courts, or the Presidency, most of us have little idea about what exactly the administrative state does, much less how these regulatory bodies came to have so much power and responsibility. EPA G-Men banging down doors in Springfield might get a laugh on "The Simpsons," but why do EPA special agents carry guns?

This course approaches the making of the administrative state as a central component in the history of the modern United States. The seminar begins in the late 19th century, when elected officials created commissions of experts in an attempt to govern an increasingly complex economy, and continues through the 20th century, with its bursts of new state authorities and responsibilities, before concluding in the present, asking what a long history of the administrative state can teach us about contemporary policy. To understand the context in which the administrative state emerged and evolved, we cast a wide net. Among other subjects, students will consider popular movements for environmental protection and worker safety, intellectual transformations in understandings of risk and public welfare, political fights over the scale and scope of the government, and biographies of regulators and the powerful institutions that they make up. Readings include classic texts and new scholarship across different disciplines, alongside contemporary journalism and novel approaches like podcasts - returning throughout the semester to the question of how we can tell an engaging and vital history of the administrative state. Toward that end, students will also explore a variety of different primary source materials throughout the semester before embarking on their own original research projects.

HIST358 The "Self" in Self-Determination: Personhood & Peoplehood in Empire & Decolonization

This seminar course will explore the historical literature on self-determination and decolonization movements in the twentieth century across the globe. Combining the fields of US imperial history, international history, global indigenous studies, and diasporic studies, this course will delve deep into the historical development of right of self-determination within and outside of imperial regimes. It interrogates how peoples articulated their sense of

"personhood" and "peoplehood" to claim political rights within the borders of nations and empires, as well as on the international stage. The course will also explore how decolonization as a concept transformed beyond the realm of law and personhood and encompassed culture, the environment, and lifeways.

HIST367 Life of Modern Fact

Facts aren't born; they are made. The challenge is to understand how people have come to think of facts as existing in the world independent of human intervention. This seminar explores the tools and techniques that people have used to craft facts. We consider examples from the 18th century through the present day, such as training manuals, films, and instruments. We also examine how broader structures such as social networks and the law help produce facts as people share, defend, and use them. Finally, this course encourages skepticism and creativity in the use of primary sources and the formulation of original research, questioning the givens of human knowledge.

HIST371 Fascism

This seminar aims to identify varieties and components of fascist ideologies and to undertake comparative analysis of European fascist movements in the first half of the 20th century. The initial focus will be on the several ways fascism has been defined and understood, including examples of how the term has been utilized to characterize certain governments and personalities. Specific attention then will be devoted to Italy, Germany, Spain, and France, with emphasis on Mussolini and Hitler and their regimes. Additionally, apparent linkages of fascism to post-1945 politics, such as the National Front in France, will be explored. Other fascist movements may be chosen as the subject of a major research paper. Materials for the seminar will include documentary sources, films, interpretive studies, and biographies.

HIST373 Language and Power in Latin America

What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From Indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region. The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of Indigenous peoples as social and political actors in contemporary Latin America.

HIST374 Food Security: History of an Idea

The Food and Agricultural Organization of the United Nations has held that "food security exists when all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life." This course is a history of food insecurity as a material condition and a geopolitical concept for explaining uneven access to provisions. Although we begin with the emergence of food security as a concept during World War II, we will spend the majority of the course studying other ways of organizing access to the means of subsistence. Topics discussed will include why human beings share food, the invention of agriculture, transportation infrastructure, international trade, food aid, agricultural research and development, poverty, conflict, and famine.

HIST376 Travel and Communication in Europe

This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

HIST378 LAND BACK! Indigenous Sovereignty Politics

This advanced research seminar will feature a look at the contemporary LAND BACK movement through current case studies with a focus on tracing the historical and legal genealogies of settler colonial land dispossession, indigenous land title, and self-governance issues bounded to territory (recognized and

otherwise). We will examine different historical periods, moments, geographical sites, and case studies to explore the complexities of life for Indigenous peoples in the Pacific Islands and North America subject to the authority of the United States in relation to land as a central part of exercising sovereignty. In relation to these themes, the course will also examine: Indigenous peoples' varied political statuses in settler colonial context; self-determination; structures of domination and resistance; Indigenous agency; Native nationalism and decolonization. Readings will focus on the recognition and assertion of collective land rights, treaty rights, as well as land claims, land recovery, and land reclamation.

HIST380 Transforming Bodies: Movement and Agency in West Africa

Dancers in West Africa embody human agency and transform historical worlds. As one elder farmer proclaimed: "Our ciwara have power[!]" Masked ciwara dancers on the Mande Plateau call upon the collective labor of farmers to produce rural life, and more recently, have responded to transformations of the agricultural landscape. They emphasize the power of the human body over agricultural machines. Elsewhere in West Africa, the Atsiagbekor dance energized and celebrated Ewe male soldiers by acting out scenes from the battlefield. The dance movements were also secret codes used during battle to give instructions. How and when to fight, defend, or retreat depended on this embodied communication. The accompanying loud drum music served an added purpose of instilling fear in enemy ranks because it created the impression of a mighty army on the march. Still performed, the dance now symbolizes Ghanaian cultural heritage and helps to shape local historical memory.

In this course we will examine the body as an active agent in West African social and political life. We will study the historical and contemporary meanings of laboring bodies through dance and everyday movement, such as women's pounding of fufu or stirring of toh daily meals. We will also reflect on the ritual enactment of enslavement or colonial rule as a means to subvert old power structures. The body in these cases was a tool for resistance. We will also unpack multiple interpretations for specific women's embodied protests such as "sitting on a man." Collective body movement was powerful, but individual bodies might also enact healing or express religious devotion. Spirit possession, for example, marked the body as a site for human interaction with the supernatural. In this and other examples, the body is an archive in motion and subject to social renewal. By taking the body and movement as a lens, we will explore shifting histories of labor, performance, gender, politics, aesthetics, and religion from the

pre-colonial era to the contemporary moment. We will also learn new ways to creatively move and narrate the African past and present.

HIST382 Anthropocene as Modern Grand Narrative

The Anthropocene refers to the new age in which humankind started to have a significant impact in altering or rupturing the Earth's systems, where the Earth is now moving out of its current geological epoch (the Holocene) and into "a less biologically diverse, less forested, much warmer, and probably wetter and stormier state." (Steffen, Crutzen, and McNeill 2007, Sciences Module, 614). This course begins by examining the debates on the definition and periodization. It then explores precursors to the concept of the Anthropocene, such as Confucian and Daoist writings on the taming of the natural environment for human needs, the catastrophism versus uniformitarianism debate, and contesting definitions of sustainability. Finally, it looks at how recent works of environmental history engaged with the concept of the Anthropocene and brought our attention to the impact of the transition from organic economy to carbon economy. Is the Anthropocene a new meta-narrative that professes to be the theory that explains all human activity? Is the Anthropocene a call to arms for environmental justice? Is the Anthropocene just a declensionist fairy tale—one that leads us down a dead end, throwing up our arms in resignation over the irreversible destruction of the natural environment?

HIST385 Science and the State

Over the past two centuries, states have been among the most prodigious producers and consumers of scientific information. Broad areas of scientific inquiry—such as demography, economics, geography, and ecology—substantially developed in response to the need of states to manage their populations, their economies, and their natural resources. State-directed scientific and technological innovation has also played a critical role in the pursuit of national security and infrastructural development, most notably through the development of nuclear weapons, missiles, and an array of military technologies. Finally, states have turned to scientific experts to enhance the credibility and legitimacy of policy decisions. This course introduces students to literature in the history of science that explores the connections between systems of knowledge and state power. Themes developed include the tensions between expertise and democracy, secrecy and scientific openness; the relationship between political culture and scientific and technological development; and the role of quantification, standardization, and classification in producing political order.

HIST389 Sachem School: Indigenous Lifeways and Settler Radicalism After 1600

In the 21st century, we face a series of interconnected reckonings: environmental collapse, economic disparity, racial inequality, and more. There were, and still are, alternative ways of organizing our economies, reframing our relationships with the land, and creating kinship networks that mitigate against inequality and enmity. This class will explore what settlers learned—and refused to learn—from the Indigenous societies they encountered after contact in northern North America. From Roger Williams's ideas of religious toleration in the 1640s to #landback today, settlers have at times demonstrated a willingness to learn from Indigenous lifeways and employ those lessons in ways deemed "radical" by Western standards. Understanding this history illuminates a path toward a future in which we continue learning from Indigenous nations and work to repair the damage settler societies have inflicted on each other and our world.

HIST390 The Redeemed Narrative: Microhistories in Early America

This course will guide students in thinking about American social history, the efforts by historians to recover the lived experiences of those who did not leave substantial archival documentation, through a close examination of examples of microhistory in early America. Microhistory, situated between the New Social History, influenced by the Annalists and British Marxists, and the Cultural

Turn, influenced by critical and linguistic theory, offers a unique opportunity to analyze the ways that early American historians creatively utilize evidence. We will pay particular attention to the ways that microhistory recovers histories of race and gender despite the paucity and problematic nature of archival sources. While students will receive a grounding in the theories of archival source interpretation, emphasis will be placed on the ways that historians have put those theories into practice. The course is designed to be an upper-level seminar, preparing students with the research tools to write their senior thesis or major capstone paper.

HIST392 The Acceleration of Europe: Mobility and Communication, 1000---1700

This research course explores the thesis that during the Middle Ages, Europeans began to move faster, to move more often, and, by doing so, transformed the nature of social life, cultural life, and the character of selves and minds in the world. The course will explore the material aspects of this, such as the nature and development of roads and bridges, ships and canals, inns and hospitality that sustained and encouraged advancing travel. Thematic importance will be given to the place of horses and horseriding in these developments. The course is about the history of communication and the idea that a particular sort of traveler was created through later medieval travel and became the means of cultural and psychological acceleration. The social and cognitive networks established through travel, including the exchange of letters and messages, linked the local to the national. Merchants, pilgrims, soldiers, judges, students, preachers, and bureaucrats became the means of spreading news, changing views, and speeding up the world. This course will expose students to methods and skills in the digital humanities such as network analysis, geographic information systems, and database analysis.

HIST393 Materia Medica: Drugs and Medicines in America

This course investigates the identification, preparation, and application of drugs and medicines in the United States, emphasizing the period before the 20th-century institutionalization of corporate research and development. Topics include early modern European prospecting for medicinal plants, the development of an international drug trade, and the formation of national pharmaceutical markets in the United States in the 19th century. Participants

will explore the production, circulation, and restriction of medical knowledge through local practice, public and private institutions, trade and commerce, and regulation. In addition to knowledge of the social history of drugs and medicines in the United States, students are expected to develop competencies in historical research using primary and secondary sources. The final weeks of the course are devoted to applying historical knowledge to contemporary debates in global public health, including international pharmaceutical research, drug development, and epidemic disease.

HIST395 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French *laïcité*, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

HIST396 The U.S. South: A Global History

When people think of the U.S. South, they often think of a place that's isolated and insular--a region cut off from the rest of the United States and the wider world. Yet nothing could be further from the truth. Throughout its history, the South has been deeply entangled in the world and in the larger processes of globalization. Few regions of the United States have been more connected or more cosmopolitan. This seminar explores the global history of the U.S. South from the early 1800s to the present. By tracing the transnational movement of people, ideas, and commodities, it seeks to understand how the world has shaped the South, and also how the South has shaped the world.

HIST397 United States Overseas Empire

The United States is an empire: an empire that expands beyond the North American continent into many islands across the globe. From Puerto Rico and the U.S. Virgin Islands in the Atlantic to American Samoa and Guam in the Pacific, the US remains an imperial power with unincorporated island territories, a euphemism for replacing the anachronistic term "colonies." The residents of these territories have truncated political rights; they do not have voting representation in U.S. Congress, and they cannot vote in U.S. Presidential elections. Though U.S. territories are usually footnotes in the grand narrative of

U.S. history, this course argues that they are integral to understanding the United States as a whole.

We will examine the history of how the U.S. acquired and governed the territories from the perspective of the islands themselves, emphasizing the local effects of U.S. colonial policies. We will analyze how U.S. foreign policy split indigenous peoples into separate political entities, how economic interests changed native political systems, how U.S. militarism affected the ecology of whole islands and the culture of territorial residents, and how public health policies racialized island peoples. We will also explore how self-determination and decolonization movements were stymied by the U.S. government, and how a whole host of other colonial policies and actions has affected and continues to affect the territories.

The course will cover islands currently under U.S. control, including American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, the United States Virgin Islands, and Hawaii. It will also examine former territories, Trust Territories of the Pacific, and occupied islands including the Philippines, Cuba, Haiti, the Dominican Republic, among others. With the changing nature of U.S. imperialism, we will also consider the United States expansive military base presence throughout the globe. The history of these islands can tell us much about limits of U.S. citizenship, about the growth of U.S. commerce and militarism globally, about patterns of migration and immigration, and about the changing discourse of race and indigeneity.

HIST398 Visions of the Future: Capitalism and Colonialism in the World's Fairs

This course will explore the history of the world's fairs from the 1851 Great Exhibition in London to the 1939 New York World's Fair. These events showcased the newest technologies that would revolutionize life and labor for millions of human beings around the world. They also presented to the public new consumer goods and forms of entertainment such as music, dances, and sports. Moreover, they were sites of competition for rising nations and empires. Each participant country brought artifacts that demonstrated their (often idealized) national characteristics and development. Western powers displayed colonial products and peoples to show how they had been advancing in their expansionist enterprises. The students will read works on the humanities and social sciences that delve into the meanings of the world's fairs. They will also analyze primary sources (texts, paintings, film, songs, cartoons, and more) which will allow them to ask their own questions about these events.

ITALIAN (ITAL)

ITAL101 Elementary Italian I

Italian 101 is the first half of a two-semester elementary sequence. Our emphasis is on the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. Grammar undergirds everything we do and say in this course; whether

or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will learn to talk about things in your own immediate environment, such as family, friends, daily routine, likes and dislikes, and you will learn how to handle basic social interactions such as meeting people, planning events, eating out, inquiring about other people's lives, and relating information in simple terms. We will explore roughly five units of the textbook; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance. Students are strongly encouraged to enroll in the continuation of the Italian Elementary sequence in Spring (Italian 102): language learning is cumulative and requires time and consistent effort. Italian 101 and Italian 102, taken together, will provide a strong linguistic foundation which is necessary to access Intermediate and Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.

ITAL102 Elementary Italian II

This course is the second half of a two-semester elementary sequence. Our emphasis is on the continuing development and strengthening of oral and written competence, and reading and comprehension skills. Specifically, you will master the linguistic skills necessary to describe and narrate simple events in the past and in the future, make comparisons, express possibility, express your point of view, and agree and disagree with the opinions of others. You will also reach a better understanding of culture, society, and everyday life in Italy as you develop the ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. By the end of this course, you can expect to be able to function quite ably and with assurance in day-to-day circumstances in Italian. We will explore roughly five units of the textbook; additionally, your linguistic and cultural experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance. Students are strongly encouraged to enroll in this course after taking Italian 101 to continue their Italian Elementary sequence: language learning is cumulative and requires time and consistent effort. Italian 101 and Italian 102, taken together, will provide a strong linguistic foundation--which is necessary to access Intermediate and Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.

ITAL103 Intensive Italian

Intensive Italian is a course designed for highly motivated students who wish to learn the basics of Italian language in one semester. The course emphasizes the development of basic oral and written competence, and reading and aural comprehension skills. In this course, you will master the linguistic skills necessary to function in day-to-day circumstances in Italian as you develop the ability to speak and understand Italian in a communicative and meaningful context.

The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture.

Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. We will use the textbook both in class and at home; additionally, your linguistic experience will be broadened by reading authentic texts and by viewing, listening to, and discussing cultural artifacts such as films, songs, and commercials. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance.

This course is particularly recommended for students with a background in other romance languages, such as Spanish, French, or Portuguese.

ITAL111 Intermediate Italian I

Italian 111 is the first half of a two-semester intermediate sequence. Authentic artifacts such as literary excerpts, films, newspaper articles, songs, and commercials constitute the starting points of this course. These include topics ranging from stereotypes and perceptions of Italy to significant moments in Italian history and politics, family and student life, employment, immigration/emigration, organized crime, and environmental awareness, all of which shed light on the rich diversity and complexities within Italy and offer a variety of opportunities to improve and refine your ability to speak and understand Italian in a communicative and meaningful context. The course also challenges you to recognize, explore, and understand cultural differences and similarities between your native culture and Italian culture. Grammar undergirds everything we do and say in this course; whether or not we are engaged in an explicit grammar exercise, you are always learning grammar that enables you to communicate effectively. Specifically, you will build on previously learned grammatical structures and acquire more complex ones that will allow you to improve your ability to relate information, narrate stories, make hypotheses, express your opinions, and debate the opinions of others, both in writing and in conversation. Class is conducted entirely in Italian. Because you will work collaboratively with your classmates and your instructor, your attendance, participation, and preparation are of the utmost importance. Students are strongly encouraged to enroll in the continuation of the Intermediate Elementary sequence in Spring (Italian 112): language learning is cumulative and requires time and consistent effort. Italian 111 and Italian 112, taken together, will provide a strong linguistic and cultural foundation--which is necessary to access Advanced courses at Wesleyan and to succeed in study abroad experiences in Italy.

ITAL216 Words and Sex: Storytelling, Censorship, and Boccaccio's Decameron

We will explore literary genres and representations of sex and gender in Boccaccio's Decameron. Through close readings of selected tales and cultural analyses of their trans-historical and transnational reception, we take the Decameron's words as point of departure for the study of storytelling and the politics of readership. As modern readers of Boccaccio's renowned and classic Medieval collection of short tales, we investigate the text's notions of love, gender, and sexuality by comparing and contrasting the Decameron with various other texts across varying media, from the works of Petrarch and Chaucer to the modern readings of D. H. Lawrence and Pier Paolo Pasolini, and from visual arts to digital humanities. Students are invited to creatively engage with these and other texts of their choice (and with approval of the instructor) in order to produce, by the end of the course, either a) an analytic blog post that may be published on the H-Net of the Transnational Italian Studies working group; or b) an individual or collective project inspired by Boccaccio's Decameron.

ITAL220 Italian Gaming Lab: Using Tabletop Games for Language Learning (CLAC.50)

Italian Gaming Lab is designed as a game-based Italian language laboratory that will focus on why and how tabletop games can be effective tools for language learning; examples will include board games, card games, and tabletop role-playing games (TTRPGs), an increasingly popular type of game that is based on collaborative storytelling in which participants either impersonate one or more characters or create and organize entire worlds.

In this CLAC course, we will explore how a game-informed pedagogy can work in Italian language and culture classrooms and to highlight analog gaming approaches that have worked inside and outside the language classroom. We will discuss the basics of Game-Based Learning (GBL) applied to L2 acquisition,

as well as play a series of games that can illustrate the gameful principles previously studies. Participants will discuss the application of gaming principles to L2 acquisition and create reports and playful presentations on their linguistic journey through play. The course offers students the opportunity to use language creatively and to develop critical knowledge within the rising and innovative field of Game-Based Learning and educational game design.

The course will be conducted in Italian, and games will be played in Italian.

Both intermediate/advanced learners of Italian (second-year level or above) and native speakers are welcome. If you are unsure about whether your language background is sufficient for the course, please contact the instructor.

ITAL221 Culture, Society, and History in Italy

This course is designed for students who have completed at least two years of college-level Italian or who have achieved equivalent competency through study in Italy. Our primary objective is to enhance students' speaking abilities and Italian cultural literacy through exposure to a variety of Italian texts and contexts. The course will be organized both thematically and chronologically, taking into consideration a group of three themes that could change from one year to the next. Some groups or themes that might organize the course include the following groupings: l'amore, la morte, e l'altro; la città, la campagna, i sogni; il passato, il presente, e il futuro. We examine these themes in literary texts, paying attention to the different genres, and in opera and film. Students are expected to participate actively in this seminar setting. Class is conducted entirely in Italian.

ITAL222 Ruin and Redemption: Narrating Twentieth-Century Italy

When fugitive far-left terrorist Cesare Battisti was extradited to Italy in January 2019 to serve out a life sentence for crimes committed in the late 1970s, he provided fresh evidence for the way that 20th-century events still cast long shadows into contemporary Italy. The events, their narration and re-narration over time tell the story of unresolved conflicts and overturned verdicts in a context characterized by repression, revisionism, and rehabilitation. In this course we study three historical events of the past century that continue to haunt contemporary Italian society, culture, and politics: fascism; civil war and resistance; and the political violence of terrorism in the 1970s and 80s. We approach these events by examining the ever-changing narratives about them. For each narrative we focus on specific issues (e.g., for fascism: the rise of fascism, racism and anti-Semitism, colonialism, Mussolini's cult of personality, the exaltation of war, fascist intellectuals, the art of the regime, etc.), but we use these as an entry point to articulate contradictions and complexity. We explore these narratives through various media and forms of expression: from films to novels, from landmarks to newspaper articles, from poems to billboards. By exploring how the polarizations of these narratives flow into the 21st century, we unveil the fractures and conflicting agents at the core of contemporary Italy.

The course is conducted in Italian. Authors include: Gianni Amelio, Marco Bellocchio, Italo Calvino, Liliana Cavani, Umberto Eco, Beppe Fenoglio, Dario

Fo, Natalia Ginzburg, Helena Janacsek, Primo Levi, Pier Paolo Pasolini, Luisa Passerini, Cesare Pavese, Rossana Rossanda, Roberto Rossellini.

ITAL223 Home Movies: Italian "Families" on Film

What is "the family" in an Italian social and cultural context? How has it changed over time? How has it responded to the transformations of Italian society since the time of the postwar economic miracle until today? Have its contours changed to adapt to new values? Has it fossilized existing values? Are families limited to flesh-and-blood kinship or are they constructed along lines of shared values and loyalty? This course seeks some answers to these questions through a sustained exploration of a variety of types of families as they are presented in Italian cinema from roughly 1950 until today. We will take stock of representations of the "traditional" family and the related social values, seeking to understand how Italian filmmakers, through their focus on the family, enter into the debate concerning tradition and change within Italian society, culture, and history. To that end, we will examine family dynamics along a broad spectrum of relative and intersecting aspects including affiliation, love, and rivalry; elective families (organized around crime syndicates, families constituted according to affinity); "failed" and "challenged" families and what that means; and examples of single-parent and same-sex families that seek to challenge conventional heteronormative paradigms. Along the way, we will recur to some critical readings (in sociology, history, and anthropology) that will help us frame our inquiry. This course is conducted in Italian. ITAL 223 is an appropriate course for anyone seeking an advanced class after ITAL112.

We will screen one primary film each week, which will anchor our discussions and serve as the basis for that week's activities. Students will also make 10-15 minute presentations on a secondary film that will serve as a "companion" to the primary text and will thicken our understanding of that week's themes.

ITAL224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

ITAL225 Italian/Middletown: Podcasting Middletown's Italian Treasures

This class uncovers Italian Treasures in Middletown, both on and off campus.

An advanced course in Italian that is as suited for fifth-semester students as it is for those returning from Bologna or who have already taken a course in Italian, we will explore Italian podcasts and podcasting in Italian before turning our attention to podcast production of our own. Our course begins with audio explorations of podcasts in Italian, which will allow us to examine a variety of themes and subjects (e.g., true crime, sports, health, politics, among others), conducting contextualized grammar review as we go. Alongside study of both the medium of podcasting and examples of Italian podcasts, we will learn about the history of Middletown's Italian community and conduct a hunt for Italian treasures to explore and study. How does Middletown's Italian past link to its present? And to Wesleyan? Where can we find Italian "treasures" on campus and off?

Throughout the semester, students will produce several short audio assignments, for which they will prepare (and submit) scripts. In service to all audio assignments, students will work on their pronunciation and diction with the Foreign Language Teaching Assistant from the University of Bologna. In addition to the brief audio assignments and scripts, major assignments include one 5-min podcast episode at midterm and one 7-min episode by the end of November. In the last week of class, students will collaborate on editing and producing a 55-min podcast that folds together all their individual chapters and includes music and linking narrative. This final podcast will be broadcast on Wesleyan's WESU.

ITAL226 The Cosmos of Dante's "Comedy"

In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

ITAL227 Devotion and Deception: Erotic Discourse from Dante to Petrarca

In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarca. Through a close reading of such texts as Dante's *Vita nova* (ca. 1295), Giovanni Boccaccio's *Decameron* (ca. 1353), and Petrarca's *Rerum vulgarium fragmenta* (often referred to as the poetry book par excellence: *il canzoniere*, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate 'love stories' in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

ITAL229 Roads to Rome: Italian Cinema from Neorealism to Today

Do all roads lead to Rome? In ancient times, people across the Mediterranean referred to Rome as *Caput Mundi*, "the capital of the [Western] world." In 1906, while living there, James Joyce wrote to his brother Stanislaus: "Rome reminds me of a man who lives by exhibiting to travellers his grandmother's corpse." Four decades later, in 1948, film critic Jean-Georges Auriol remarked: "At present, there is no doubt that Rome is the capital of cinema in Europe, if not the world."

This course offers a virtual journey to the Eternal City by means of a critical survey of Italian cinema from neorealism to the present. By analyzing fundamental films that take Rome as their setting and subject, we will discuss major trends in postwar Italian cinema as we explore the history of Italy from fascism to today. Through the works of Federico Fellini, Cecilia Mangini, Pier Paolo Pasolini, Paolo Sorrentino, Lina Wertmüller, and others, including several Academy Awards winners and nominees, we will address topics such as the legacy of World War II and the transition to democracy, traditional and queer notions of love, the relationship between Italy and the United States, Catholic religion and the Vatican, politics and organized crime, and the transnational representation and aestheticization of Italy.

This course is conducted in Italian.

ITAL231 Italian Colonialism and Its Legacies

This course is an introduction to the history and consequences of Italian colonialism. We will study literary and historical texts describing the social and political forces that led to colonization as well as writings by colonized people and their descendants in order to gain a balanced, comprehensive understanding of this often-overlooked moment in Italian history. Students will read futurist, fascist and postcolonial theoretical work and will examine Italian, African and Albanian cultural artifacts representative of the colonial experience. We will also discuss current debates about immigration in Italy and their relationship to this colonial history. Literary texts will include: Dell'Oro's *L'abbandono*; Cialente's *Cortile a Cleopatra*; Ali Farah's *Madre piccola*; Marinetti's *Mafarka futurista*; and work by prominent Italian scholars of colonialism such as Del Boca and Isnenghi. This course is conducted in Italian.

ITAL232 Italy at School: Biography of a Nation

Soon after the unification of Italy (1861), the Coppino Law extended primary school to five years, making it free of charge and mandatory for its first three years (1877). Edmondo De Amicis would subsequently depict these reforms in his best-selling novel *Cuore* (1886), a text that introduced some enduring features of school narratives but also many stereotypes, thus attracting constant criticism and inspiring several parodies of its moralistic underpinnings. Ever since then school narratives have become a key component of Italian culture, creating a genre that has thrived especially in the last three decades, with a number of both fiction and nonfiction books published by teacher-writers who have reflected on their experience.

In this course we will study Italy from the perspective of these texts about school that often originated within school walls themselves. In so doing, we will reconstruct the history of a relatively young country, Italy, through the institution that, like no other, has been given the responsibility of "making Italians." At the same time we will question the image of Italian society that school narratives have, intentionally or not, contributed to portraying. In addition to reading Lucio Mastronardi's *Il maestro di Vigevano* (1962), we will focus on a wide range of materials, including novels, memoirs, poems, popular songs, films, and works of art that, even in the absence of a unanimously acclaimed "classic" of the genre, have shaped the Italian collective imaginary. Materials will be organized around five poles that have been quintessential to the debate on school in Italy across politics and culture: characters (teachers and students, obviously, but also colleagues, classmates, and families), labor and working conditions (including themes such as precarious work, class conflict, labor rights), gender and identity (questioning traditional gender roles and discussing integration of migrants at school), places and geographies (addressing topics from school design to teaching in prisons, as well as center-periphery integration and north-south divide), and actions (both those of teachers and of students, such as obtaining a certification vs. passing a test, disciplining students vs. questioning teachers' authority, resigning from job vs. cutting classes). The course will be conducted in Italian.

ITAL233 Modern Italy on the Silver Screen: 1960–2015

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's *La dolce vita*, Pasolini's *Mamma Roma*, De Sica's *Matrimonio all'italiana*, Leone's *Il buono, il brutto, il cattivo*, Argento's *Suspiria*, Moretti's *Caro diario*, Ozpetek's *Saturno contro*, and Giordana's *Quando sei nato non puoi più nasconderti*. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

ITAL235 The Invention of Fiction: Giovanni Boccaccio's Decameron

In this course we read and discuss Giovanni Boccaccio's *Decameron* (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the *Decameron* as both a product and an interpretation of the world Boccaccio inhabited. We examine the *Decameron*'s tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

ITAL236 Inferno

In this course we read and discuss Dante's *Inferno* (ca. 1306-1309) and its afterlife. *Inferno* is the poetic description of Dante's (imagined or actual) journey through Hell. We study how its poetry and narrative embody the notions of love, sorrow, evil, guilt, redemption, and punishment. We examine the poem as both a product and an interpretation of the world it describes and of its radical otherness: its representation of the otherworld, its relationship with religion and faith, its fear of death, its obsession with the Devil. We inquire into Dante's inventiveness and poetic technique, reviewing his magisterial use of realistic and figurative language. We observe how *Inferno* casts its long shadow on modern culture: in the description of the horror of Nazi concentration camps (Primo Levi's memoir), or in the representation of the inauthentic life in consumerist society (Pier Paolo Pasolini's rewriting of *Inferno* in contemporary Italy). We investigate the challenges that Dante's text elicits when it migrates to visual and

cinematic arts (or to Disney comics), continuously camouflaging and adapting to different media. And we critically reflect on how, after seven hundred years, *Inferno* has not finished saying what it has to say. The course is conducted in Italian.

ITAL238 What's in a Name? Autobiography and Autofiction in Modern Italian Culture

This course explores the relationship between a person's (or a character's) identity and their name, examining the crucial relevance of naming and renaming practices in shaping individual identities and collective narratives through a wide variety of Italian texts. In the first module, we read Holocaust memoirs and contemporary short fiction and we listen to podcasts and songs by Black and Jewish Italian authors to analyze the nuanced ways in which names shape racial identity, from the derogatory act of name-calling and the deprivation of personal names to the empowering act of reclaiming one's name and narrative. In the second part of the course, we consider coming out stories and gender transition accounts, including graphic novels and feature films, to reflect on the impact of putting into words one's gender identity and choosing new names in individual journeys of self-discovery and affirmation. In our last module, we focus on the last twenty years of Italian literature to study one of its dominant genres (that some Italian critics polemically named a "disease"): autofiction, a blend between autobiography and fiction. For the final essay or project, each student will choose a recently published novel to read, analyze, and adapt or (partially) translate. This course is conducted in Italian.

ITAL241 Antonioni and Cinema of the Environment

From its earliest days, the cinema has sought to capture the wonders of the world: exotic landscapes, industrial inventions, and human prowess in the face of nature. At the same time, many important filmmakers--and particularly those in the Italian tradition--have mined their medium's capacity to register and comment upon environmental change. Few directors traversed the upheavals of the 20th century quite like Michelangelo Antonioni. Beginning with his early documentaries, we'll explore cinema's relationship to both the natural world and the built environment across Antonioni's long career. From the foggy landscape of the Po valley to the urban centers of Milan, Rome, London, and Los Angeles, we will assess the images produced by location shooting and realist techniques, but also by formal abstraction and non-narrative time. What might Antonioni's inclination toward abstraction and detachment ("Antoniennui," in a memorable pun) tell us about the world? How should we square his stylistic tendencies with his camera's attention to an environment under pressure? What lessons does his cinema hold for the present?

We'll approach these questions using the core methods of the humanities: close reading, careful viewing, and critical analysis. Along the way, we'll sharpen our understanding of film scholarship, and explore how to make critical (and creative) arguments about cinema and the environment.

ITAL245 Not Just Neorealism: Italian Cinema, its History and Politics (CLAC.50)

This 0.5-credit course is conducted in Italian and designed to supplement the English-language Italian cinema course "Not Just Neorealism: Italian Cinema, its History, and Politics" (RL&L 245). The presentations that are part of the requirements for the parent course (RL&L 245) will serve as our basis in this discussion-based section: Students will be responsible for screening films in addition to those required for 245, for presenting them, and, during the discussion sections in Italian, responsible also for linking them to the course material. Further, students enrolled in the CLAC will also make mini-presentations to the broader body of the students enrolled in the parent course only, linking the extra screenings to those that are part of the course syllabus, and enriching the discourse and knowledge base.

Students are required to be simultaneously enrolled in the parent course in order to enroll in the CLAC section. For this reason, enrollment is granted on a POI basis.

Students must have advanced competency in Italian: completed ITAL 221 or a course with a higher number, spent a semester (or more) in Wesleyan's Program in Bologna, or be linguistically proficient. For any questions about linguistic preparation, please contact the instructor.

Please note that at present this section is not acceptable as one of the nine required courses for the ITST major.

ITAL246 Crises and Emergencies in Modern Italy

The COVID-19 pandemic revived a longstanding concern in Italian theory about the relationship between rule of law and state of exception. This course draws upon biopolitics and cultural studies to investigate the relevance and ramifications of the emergency management paradigm in modern Italy. It also provocatively questions an established trend in public discourse, namely the rhetoric of the crisis: "crisi di governo," "crisi di valori," but also "emergenza migratoria," "emergenza ambientale," and so on. Why is Italy constantly in crisis? By relying on various genres of literature and on a wide range of media including films, songs, and social media, we will analyze artistic representations of these crises and emergencies, as well as the state responses to them. The critical exploration of case studies from four interconnected thematic areas revolving around issues of public health, power, body, and space will often unveil diverging narratives, allowing for reflections on the tension between safety and freedom, vulnerability and resistance, individual and collective memory, and truth and fiction.

ITAL247 Coming Out/Coming of Age: Narratives of Becoming in Italian Culture

By examining narratives of "becoming" in Italian literary and screen texts, we will work to read against a dominant "master" narrative of Italian culture that is cis-male, patriarchal, and "white." The literary and screen texts we will explore in depth include some "classic" narratives of coming of age in the Italian cultural tradition which we will lay alongside Italian cultural "coming out" narratives, some "classic," others less so. What can we learn from such adjacencies? What does one "come out" of with regard to either strand of inquiry? Is adolescence a "closet" out of which one emerges with a sexual identity? Does one come of age as an artist or "come out" as a practitioner of a particular artistic genre (filmmaker, poet, novelist)? How do artistic choices of practice subtend and inform sexual identity? What gets left behind in this "progress" of "becoming"? These are some of the questions we will address in this course, conducted in Italian.

ITAL249 Italian Filmmaking by the Book: Adaptations, Texts, and Contexts

This course explores the adaptations and transformations of Italian literary texts into their cinematic and televisual counterparts. We will principally study Italian narratives from the 20th and 21st centuries and their screen adaptations as a way of uncovering the modes and means by which Italian screen culture borrows from literary antecedents. Is the relation between literary texts and their screen adaptations a love story or bad romance? Is it characterized by a "faithfulness" to the text or a "betrayal"? Throughout the semester, students will acquire an enriched understanding of the assorted texts and their contexts by studying varied genres (short fiction, novels, nonfiction, detective stories), a variety of themes (crimes both real and imagined, petty and powerful; historical revisionism; personal and political dilemmas), and diverse geographical settings focusing principally on Southern Italy (including cities and islands reaching from the Mediterranean to the Adriatic).

All students in the course will study a common core of five author/director pairs. The core consists of "Il Gattopardo" (di Lampedusa/Visconti); "Io non ho paura" (Ammaniti/Salvatores); "L'amica geniale" (Ferrante/Costanzo); "Gomorra" (Saviano/Garrone/Sollima); and "Novelle per un anno/Caos" (Pirandello/Taviani). Additionally, students will, in consultation with the instructor, choose a sixth pairing from the list of the following titles, which will serve as the basis of their end-semester presentation as well as an element of the oral final exam: "Il giorno della civetta" (Sciascia/Damiani); "Il contesto/Cadaveri eccellenti" (Sciascia/Rosi); "I Malavoglia/La terra trema" (Verga/Visconti); "Padre Padrone" (Ledda/Taviani); "Quo vadis, baby?" (Verasani/Salvatores); "Acciaio" (Avallone/Mordini); "Il conformista" (Moravia/Bertolucci); "Todo modo" (Sciascia/Petri); "Minchia di re/Viola di mare" (Pilati/Maiorca); "Benzina" (Stancanelli/Stambrini); "Il padrino" (Puzo/Coppola); "La tregua" (Levi/Rosi); and "Le forme dell'acqua" (Camilleri/Sironi). Students may also care to consider literary texts from earlier historical periods: Basile's 16th-century "Il cunto de li cunti/Il racconto dei racconti" (Garrone) and Collodi's 19th-century "Pinochio" (with adaptations by Disney, Benigni, and Garrone). This course will be conducted in Italian. This course is appropriate for all students who have completed ITAL 112 or whose placement exam indicated a course numbered ITAL 221 or higher.

Students are encouraged to put the lengthened winter break to good purpose. All students are expected to read the first book of Ferrante's Neapolitan quartet, "L'amica geniale," during the winter break. It is a long novel, but students will find that the Italian is not challenging. Any edition in Italian will be fine (e.g., electronic, print, used, etc.). Reading in advance of the semester will facilitate students' workload as well as keep Italian flowing during the lengthy pause. It is further greatly recommended that students read di Lampedusa's "Il Gattopardo" in advance of the semester. If students have already taken an Italian course numbered 221 or higher, or have already studied in Italian, it is recommended that they read "Il Gattopardo" in Italian. Any edition will serve.

ITAL256 Medieval Gigs: Saints, Scholars, Sailors, Sinners

A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages. For those staying closer to home, like clerics and other literate "Italians," we review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

ITAL260 Castles of Cards: Italian Romance Epic Storytelling Lab

Celebrated authors of 20th-century Italian literature such as Italo Calvino and Gianni Celati have included in their works several features of Renaissance romance epic, from the importance of orality and the idea of sharing stories with a community of listeners to multi-threaded narratives and a playful attitude to the world of storytelling. The current popularity of fantasy literature and TV series puts us in an ideal position for the study of the chivalric romance and for an exploration of the continuities and the differences between past and present literary forms. In this course we focus on canonical and less canonical texts of the Italian Renaissance epic and their modern rewritings. After a multimedia investigation of Andrea da Barberino's "Guerrin Meschino," Luigi Pulci's "Morgante," Boiardo's "Innamoramento de Orlando," Ariosto's "Orlando Furioso," and Tasso's "Gerusalemme liberata" along with their rewritings by authors such as Bufalino, Nori, Celati, Calvino, and Giuliani, we will take inspiration from Calvino's "Il castello dei destini incrociati" to transform the classroom into a storytelling lab. The same deck of tarot cards that Calvino used for his book will

help us to take part in a role-playing game and create a collaborative story that will gradually unfold throughout the semester. The class aims both at studying the Italian romance epic in order to reenact it creatively and also at using this collaborative rewriting as an interpretive tool to explore Renaissance literature from within.

ITAL263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' Antigone, Euripides' Oedipus and Medea, Aeschylus' Agamemnon, as well as figures from the Oresteia and from such epics as Homer's "Iliad" and Virgil's "Aeneid." This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

ITAL267 Female Dicks: Police, Detectives, and Private Investigators in Contemporary Italian Culture

Through the act of detection and "solution" of a crime, classic detective stories and police procedurals often serve as consoling narratives, knitting up the unraveled social fabric and seeing that justice will either be served or promised. In solving the crime, the detective--sometimes called a "dick" in the classic American hard-boiled detective literature--often restores order to social chaos. What changes when women--female dicks--conduct the investigation? Do women investigators, as agents of detection, uphold existing (patriarchal) power structures, dynamics, and epistemologies? Challenge them? Transform them? These are some of the themes we will contemplate as we study Italian "gialli" published since 1995.

We will concentrate on three different types of female dicks: la Deferente (the deferential), la Scomoda (the disquieting, uneasy), and la Vendicatrice

(the vindicator). We will read novels in several different book series privileging Bologna as a location; further, we will also explore films and television series, trying to plumb the relationship of these Italian screen texts to the phenomenon of global and transnational noir.

This course is conducted through the medium of Italian and is suitable for anyone who has already taken a fifth-semester course (or one that is more advanced) on the Middletown campus or who has participated on the ECCO Program in Bologna. If you have questions about whether this is the course for you, please contact the instructor.

ITAL289 The Mediterranean Archipelago: Literary and Cultural Representations

"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands--both fictional and real--as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevitc's statement that "the Mediterranean is not only geography," we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto's Island of Alcina to Goethe's Capri), narrative stratagem (from Homer's Phaeacia to Boccaccio's Rhodes), literary protagonist (from Deledda's Sardinia to Murgia's Sardinia), political concept (from Plato's Atlantis to Campanella's Taprobane), and existential condition (from Cervantes's Cyprus to Cavafy's Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands' inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogey, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

JAPANESE (JAPN)

JAPN103 Elementary Japanese I

This course is designed for those who have no previous experience studying Japanese. The objective of this course is for students to acquire communicative and functional skills in Japanese. You will learn the basics of speaking, listening, reading, writing, orthography, and sociolinguistics (when to say what and why) of modern Japanese. Textbook Genki Lesson 1 - Lesson 8 will be covered. Each of the 8 lessons covered in this course includes new vocabulary items and expression patterns related to topics such as time, shopping, daily activities, travel, family, and expressing opinion. In addition, students will learn to read and write 46 basic hiragana and katakana syllables and approximately 86 Kanji (Chinese characters). Class meets daily, five hours per week, and includes weekly TA sessions.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CEAS**

Prereq: **None**

JAPN104 Elementary Japanese II

This course is a continuation of JAPN103, and will approach elementary-level Japanese from two angles: form (grammar) and context (social usage). Students will continue to enhance their fundamental skills in Japanese, with a focus on describing thought and action, expressing intent, and developing intercultural and interpersonal communicative abilities (apologizing, giving/receiving advice, making requests, etc.). The course will continue to emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 9 - Lesson 16 will be covered and 123 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN103**

JAPN205 Intermediate Japanese I

This course will approach intermediate-level Japanese from two angles: form (grammar) and context (social usage). Students will learn complex expressions, such as communicating regret, respect (honorifics/humbling), passive experiences, and causative forms. The course will emphasize reading, writing, speaking, and listening skills, and will familiarize students with various aspects of Japanese culture through the textbook and other media and study materials. Textbook Genki Lesson 17 - Lesson 23 will be covered and 107 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN104**

JAPN206 Intermediate Japanese II

This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including the geography, speech

styles, technology, sports, and food of Japan. Students will also learn various strategies in conversation: asking questions, apologizing, asking for favors and expressing gratitude, asking for advice and getting information, and expressing one's thoughts. Lesson 1- Lesson 5 from the textbook Tobira will be covered and 176 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN205**

JAPN217 Third-Year Japanese I

The primary goal of this course is to enable students to acquire Japanese language proficiency through integrating four skills: speaking, listening, reading, and writing. Lesson 6 - Lesson 9 from the textbook Tobira cover different topics, including religion, pop culture, traditional performing arts, and education in Japan. The class meets three hours per week.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN206**

JAPN218 Third-Year Japanese II

This course aims to develop the four language skills (reading, writing, speaking, and listening) by addressing a variety of topics, including convenient things, history, traditional crafts, and nature of Japan. Students will also learn various strategies in conversation: conveying information, talking about past events, explaining how things are made, and extending one's dialogue. Lesson 10-Lesson 13 from the textbook "Tobira" will be covered and 141 additional kanji will be introduced.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN217**

JAPN219 Fourth-Year Japanese: Conceptualizations of Identity in Contemporary Japan

Enrolled students and faculty will determine the twice-weekly, 80-minute class meeting times together.

This course involves close readings of modern literary texts, attention to current events reported in the media, and examinations of visual materials and critical discussions in Japanese. Placing Japan in a global perspective, the course addresses the following three main themes surrounding Japan in comparison to the world.

(1) Issues pertaining to the modern Japanese family (declining birthrate, aging society, women's social advancement)

(2) Bioethics (regenerative medicine, cloning, reproductive choices, life-extending and end-of-life care)

(3) Identity (questions of "Japanese-ness," as well as issues faced by so-called "gaijin," immigrants, refugees, biracial/bicultural individuals, and resident Koreans or "zainichi")

*These themes are subject to change.

Offering: **Host**

Grading: **OPT**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN218**

JAPN220 Fourth-Year Japanese: Advanced Japanese through Contemporary Fiction, Essays, and News Reports

In this course, taught completely in Japanese, students will read original works of short fiction, essays in Japanese by well-known contemporary authors, and newspaper and magazine pieces. We will also include several movies and/or television dramas. We will explore various genres and popular themes in Japanese literature and consider style and voice. Through the works we look at, students will also be introduced to advanced Japanese grammar, expressions, patterns, kanji, and vocabulary.

Offering: **Host**

Gen Ed Area: **HA-CEAS**

Prereq: **JAPN219**

JAPN229 Debating Japan and the World in Japanese

Tied to courses being offered in the CEAS, students in this course read related literature, scholarly articles and blogs, watch videos and films, and debate in Japanese about current events and issues surrounding Japan, Asia, and the world. Guest Japanese speakers may visit the class. Some possible themes are foodways, educational systems, Japanese relations with other Asian countries, identity and stereotypes, and cultural appropriation. However, an overarching focus will be on the history and current dynamics of Japanese-American relations. All materials, reading and writing assignments, and discussion will be in Japanese, with some comparative materials in English, and some translation by students into English. Native speakers of Japanese are strongly encouraged to participate.

JAPN230 Contemporary Japanese Politics in Japanese

This seminar is a discussion-based class designed for advanced language learners and native speakers of Japanese. We will discuss a wide range of contemporary topics in Japanese society and politics. All texts, discussions, and assignments will be in Japanese. Diverse texts will be used—for example, newspaper, magazine, and academic journal articles as well as video broadcasts and web resources.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **None**

JAPN285 Translating Modern Japanese Song Lyrics (CLAC.50)

This course offers students the opportunity to build skills and experience as translators of cultural texts by producing Japanese-to-English translations of the lyrics to select modern Japanese popular songs. Students will formulate their own individual translations of the assigned song each week, and then work together in class sessions to amend and further develop those translations, learning from each other's choices and strategies in order to arrive at the most effective rendering possible. Successful completion of JAPN 218 required; heritage learners, native speakers of Japanese, and others with advanced Japanese language skills (both spoken and written) are welcome in the course, with advance permission from the instructor.

KOREAN (KREA)

KREA153 Elementary Korean I

Elementary Korean will introduce students to written and spoken Korean. Taught by a native-speaker instructor, the course is useful to students who may have spoken Korean at home as well as to those students who have no previous experience with the language.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **None**

KREA154 Elementary Korean II

Elementary Korean II is the second part of the elementary course in Korean. Students will develop communicative skills in speaking and listening, but increased attention will be given to reading and writing.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **[KREA153 or LANG153 or ALIT153 or EAST153]**

KREA205 Intermediate Korean I

Intermediate Korean I is the first part of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CEAS**

Prereq: **None**

KREA206 Intermediate Korean II

Intermediate Korean II is the second half of the intermediate course in spoken and written Korean. Various functions of more complex grammar patterns will be introduced in a variety of sociocultural contexts. Upon the completion of this course, students will be able to demonstrate higher levels of balanced communicative skills in speaking, reading, writing, and listening.

Offering: **Host**

KREA255 Modern History and Culture of Korea: From Imperialism to Two Koreas (CLAC.50)

This course will serve as an introduction to the more recent history and culture of Korea; South Korea's rebirth from the remnants of a devastating war into a globalized country whose cultural influence has grown drastically since the 2000s. We will be discussing politics and diplomacy, economic development and industrialization, the growth of mass culture, and social changes concerning Korean women and family. Key topics will include the colonial period, the Korean War and national division, the struggle for democracy, and Korean pop culture. Course material will include films, dramas, and literature on these topics.

This course will be conducted in Korean. Students who have either completed three years of Korean or meet the language fluency equivalent are encouraged to take this course. Native speakers of Korean are also welcome.

KREA262 Korean Music from Shamanism to Television (CLAC.50)

This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

LATIN (LAT)

LAT101 First-Year Latin: Semester I

Conquer Latin in two semesters! Acquire a basic vocabulary and build your skills with essential grammar as you develop your ability to read passages in Latin from the principal classical authors—including Cicero, Vergil, and Ovid. This first semester covers half the textbook. In the second semester (LAT 102), you will complete the textbook.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT102 First-Year Latin: Semester II

Continue your conquest of Latin by completing your acquisition of a basic vocabulary and essential grammar.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **LAT101**

LAT104 Intensive Introductory Latin

Learn Latin in a semester with this intensive introduction to grammar and syntax. Readings in original authors help illustrate and reinforce the fundamental principles of the language in preparation for more advanced reading at the intermediate level. Recommended for students wanting accelerated Latin acquisition or those with some background wanting a quick review.

Offering: **Host**

Grading: **OPT**

Credits: **1.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT201 Catullus and Cicero: Love and Life in Republican Rome

A selection of the poems of Catullus and portions of Cicero's "Pro Caelio" as a reflection of life in late Republican Rome, with a particular emphasis on the intersection between the lives of Catullus, the young Caelius, and their mutual love-interest Lesbia/Clodia. This course is intended for students with one year of college Latin or the equivalent (normally three to four years of high school Latin) and includes a thorough review of Latin grammar and syntax.

This course will fall under the Literature and Performance track.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT202 Latin Lyric Poetry

In this intermediate-level Latin course, students will continue to develop their facility with the Latin language and their understanding of Roman literary history through a reading of selections of Latin lyric and elegiac poetry, two corpora that are both heavily influenced by earlier Greek models and show a remarkable degree of Roman ingenuity. The work of Horace and Catullus will provide an entry point into this fascinating material. We will then turn to work by the elegists Propertius and Tibullus, as well as shorter poems by Ovid. Throughout the course, we will also be investigating a number of questions. What is lyric poetry, and to what extent must Latin lyric poetry be read as a continuation of the Greek lyric tradition? How do Roman authors take Greek models and rework them to address the interests of their contemporary audience? How and for whom were these poems performed, and how does this affect the way we read this corpus? To facilitate our discussion we will be reading translations of a number of Greek lyric songs and of Latin lyric poetry by Seneca and Statius, some examples of modern lyric, and scholarly literature. In addition to our daily reading in Latin, we will undertake a careful review of Latin grammar, as well as long-term translation and commentary assignments.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT203 Latin Prose: Roman Letters

An introduction to the reading of classical Latin prose, the course will include a review of Latin grammar and syntax. Students will read selections from the letters of Seneca the Younger and Pliny the Younger. Seneca, a distinguished philosopher and statesman of the Neronian period, uses his experiences in contemporary Rome as texts from which to derive simple philosophical messages. Pliny recounts events from the life of an Italian aristocrat of the first century CE, including an eyewitness account of the eruption of Vesuvius. The course will begin slowly, with the aim of gradually acclimatizing students to the rhythms and stylistic and syntactical patterns of Latin prose. The emphasis will be on understanding and translating the Latin, but we will consider the social and cultural background to the texts we read.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT221 Roman Comedy

It has long been recognized that Plautus and Terence displayed widely different comic styles: Terence was an artist; Plautus, an untutored genius. We shall examine this difference through a critical reading of selected plays in their divergent literary and historical contexts.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT230 Love and Suffering in Ancient Rome (CLAC.50)

In this CLAC course students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-CLAS**

Identical With: **CGST231**

Prereq: **LAT102**

LAT251 The Age of Nero

Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT254 Apuleius: THE GOLDEN ASS

Fast-paced, magical, sexy, and bizarre, Apuleius' *GOLDEN ASS*, or *METAMORPHOSES*, contains more than enough rowdy episodes to keep us entertained for a semester. The novel tells the story of the feckless Lucius, the man-turned-ass whose encounters with the residents of Thessaly range from the vulgar to the weird to the sublime. Our goals, in addition to reading and understanding the Latin, include tracing prominent themes and becoming acquainted with recent relevant scholarship.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT281 Roman Satire: Juvenal

Roman satire, as practiced by Lucilius, Horace, Persius, and Juvenal is a strange hybrid: it combines social criticism, literary parody, philosophical rumination, and obscene burlesque, a self-consciously "humble" genre set in the framework of dactylic hexameter, the meter of high-flown Homeric and Vergilian epic. It

is among a small minority of ancient literature which directly addresses itself to the humbler aspects of the everyday lives of Roman citizens. This course on Roman satire will focus on Juvenal, the last practitioner of Roman verse satire. We will begin the course with a selection of short readings from each of the four Roman satirists in order to orient ourselves with standard topics of Roman satire (including dining, country vs. urban life, the body, sex, and gender roles) and differentiate the approaches. We will spend the rest of the semester exploring Juvenal's seminal works: his first and second book of Satires, wherein he situates himself as a figure marginalized by a new order of foreign interlopers, powerful gender deviants, and tyrannical patrons and emperors, as well as Satire 10, his caustically philosophical take on the "Vanity of Human Wishes."

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT301 Petronius

Follow the down-and-out Roman Encolpius as he embarks on a titillating tour of the Mediterranean, persecuted (with impotence!) by the phallic god Priapus. Join him as he attends the longest dinner party in Latin literature, a class-crossing affair including nouveau riche, citizens, slaves, freedmen, and foreigners. In addition to reading the Latin, we will examine issues of scholarship, from the title (Satyricon? Satyricon?), to the genre, to sexuality, to class and status.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT330 Love and Suffering in Ancient Rome (CLAC .50)

In this CLAC course, students with some background in ancient Latin will read selections of the extant sources on love and suffering in Roman myth, history, and thought. The sources that we will cover will be drawn from diverse genres and periods: historiography, epic poetry, lyric poetry, and comedy. This diversity will offer a unique opportunity to students to identify and analyze the intersections of age, class, status, gender, and ethnicity and the way they shaped Roman ideology on "love." We will be looking at how cultural practice shapes language, how ideology shapes law, and how literature challenged cultural norms of love and marriage, all the while unpacking and interrogating the Roman belief that love had no place in the citizen life dedicated to serving the state: love produces suffering. In turn, we will reflect on the ideological shift in the last 150 years that has come to dominate "western" beliefs on love and marriage, that is, "all you need is love," over family, friends, and society, despite the obstacles: suffering produces love.

The selections of readings will be drawn primarily from what the students read in translation in the parent course. The final selection will be based on the level of the students. This CLAC is conceived as appropriate for students on the intermediate and advanced level of ancient Latin.

Prereq: **LAT102**

LAT331 Vergil: AENEID 2

Vergil's Aeneid book 2 is almost cinematic in its tragic, poignant, and frenetic depiction of the fall of Troy, from looming threat of the Trojan Horse to the firing of the city, rooftop battles, and the violent loss of loved ones while the gods

manipulate events with petty disdain for human life. Students will read book 2 in its entirety in Latin, and the rest of the work in English. The purpose of this course is to continue to develop skills in reading Latin poetry and to continue the study of Latin grammar with close reading and critical analysis.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT335 Martial

This half-credit course will explore a variety of themes in Martial's "Epigrams." Underappreciated today, the "Epigrams" depict friendships, rivalries, sexualities, ethnicities, violence, gender roles, professions, aspirations, and failures in a sharp social commentary on the imperial Roman world. In addition to weekly translation, we will survey the latest scholarly literature on Martial's corpus.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **HA-CLAS**

Prereq: **None**

LAT351 The Age of Nero

Nero: artist or monster (or both)? This course will focus on the personality and politics of the emperor and the reaction he evoked in contemporary and subsequent accounts of his reign, concentrating especially on the powerful picture of Nero and the Neronian regime painted by the Roman historian Tacitus in his "Annals," with supplementary evidence from Suetonius's "Life of Nero," imperial inscriptions, and visual propaganda. Topics discussed will include Tacitus as a historian, public and private life in Neronian Rome, how to die well, and whether Nero really sang of the Fall of Troy while Rome burned.

LAT353 Demagogues and Tyrants in the Roman Historians

Reading selections from Livy's *ab Urbe Condita*, Sallust's *Bellum Catilinae*, and Tacitus' *Annales* we will consider these historians' depictions of tyrants and demagogues (e.g., the Tarquins, Catiline, Tiberius, Nero) throughout Rome's political history, their views on the interactions between these controversial figures and the Senate and people of Rome, and their narratives describing the circumstances behind their rise and fall. At the same time, we will explore the role of fact vs. fiction, propaganda, and bias in the writing of Roman history through comparative analysis with contemporary sources and inscriptional evidence.

LAT360 Constructing Masculinity and Identity in Roman Elegy

This course will explore the ways in which Roman elegists used the genre of their poetry to construct a literary alternative to Roman masculinity and mores. Propertius, Tibullus, and Ovid each developed a masculine persona that rejected career politics and militarism in favor of the battlefields of love, creating a

culture war between the status quo and a new Roman masculinity. The course will include weekly translation and secondary readings.

LAT375 Set in Stone: Reading Roman Life through Inscriptions

Inscriptions are our tweets from the ancient Romans. From the alphabets scrawled by school children on wax tablets to the curse tablets of scorned lovers and the biographical epitaphs on funerary monuments lining the roads leading into Roman cities they provide an intimate view of daily life in the ancient world, while public inscriptions document the political, religious, and social workings of the Roman state. This course will survey a representative sampling of the Latin inscriptional record from the earliest period through the Empire, including examples of laws, decrees, and religious dedications, Augustus' Res Gestae, and the methods employed in inscribing objects.

LATIN AMERICAN STUDIES (LAST)

LAST121 Tales of Resistance: Modernity and the Latin American Short Story (In English)

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, as well as immigration to Europe and the United States.

LAST126 Intro to History: Heretics on Trial: The Holy Inquisition and Its Enemies

The Inquisition was among the most feared institutions of the early modern West. In its efforts to impose religious orthodoxy, it persecuted minorities, prohibited behaviors it deemed heretical--like magic and unbelief--and censored intellectual inquiry. Yet despite its resoluteness, the ability of the Catholic Church to impose control varied widely across time and place and was often met with equally firm resistance. This introductory course examines how the Catholic Inquisition functioned, from its origins in the medieval period to its final demise in the nineteenth century, paying particular attention to geographic and temporal specificities. From Cartagena de Indias to Lima, Goa, Rome, and Toledo, inquisitorial tribunals spanned a significant portion of the Atlantic world. The records produced by its scribes are some of the richest sources of the social, cultural, religious, and economic history of the era, yet they are also some of the most challenging to deal with, both epistemologically and morally. Historians have relied on Inquisition archives to reconstruct the lives of individuals and communities who left no other written records, all the while seeking to acknowledge that the records were produced under duress by officials who suspected the accused of the terrible crime of heresy. Through a wide range of primary sources like trial transcriptions, Inquisition "autobiographies," written

confessions, censored books, and literary sources, students will both survey the lives of people who faced the Inquisition's scrutiny, while considering the role of violence, persecution, and resistance in the creation of the very records that allow for historical reconstruction.

LAST200 Colonialism and Its Consequences in the Americas

Why does colonialism matter to the fields of American Studies, Latin American Studies, and Caribbean Studies? What have been the consequences of colonialism for peoples of the Western Hemisphere? This course offers a transnational approach to the study of colonial modernity through a comparative analysis of colonial ventures and their far-reaching consequences. With a focus on the interactions of Indigenous, European, and African peoples, the course introduces a diverse range of issues and topics, such as the organization of production, including chattel slavery, indenture, and free labor; imperial competition and state formation; emancipation struggles; and Indigenous sovereignty.

LAST218 From Chocolate to Coca: Commodities and the Making of Latin America

Bananas, silver, and coffee connect Latin America to consumers across the globe. From the discovery of massive silver deposits in Potosí in the 16th century to the growth of the illegal drug industry in the 20th century, these commodities have shaped how people work and eat, not only in Latin America but worldwide. Everyday goods like sugar or rubber have also given rise to political revolutions, environmental destruction, scientific discovery, and new literary and artistic movements across the region. How do commodities shape the societies that produce or consume them? What commodities are shaping today's global economy? Is it possible to extract these goods in a sustainable way?

This course combines approaches from anthropology, history of science, and environmental history to study key commodities in the history of Latin America from the colonial period until the present day. It will examine the ways in which various material goods linked local actors to broad networks of production and consumption of an increasingly interconnected global economy. The course will pay particular attention to how these relationships irretrievably changed local communities and to the ways in which historical actors contested, adapted to, or transformed production and consumption regimes.

LAST219 Latin American Economic Development-Macro

In this course, we try to understand the differential economic development of Latin America as a region and its countries in particular. Our lens of analysis is employing economic tools but also draws on other disciplines such as history and sociology. The course covers a broad range of economics and

introduces you to aspects of macroeconomics, microeconomics, international economics, labor and development economics. Initially, we will study different ways to measure development in Latin America. We will then begin our journey to identify reasons and causes for various development outcomes of the Latin American region and differential economic success and failure of specific countries. In the first half of the semester we will examine the historical background and endowments, policies of export-led growth and import-substitution, the debt crisis and the subsequent stabilization. We will cover the financial crisis of the late 1990s and the early 2000s. Then we will turn our focus to the recent years and challenges to economics growth in Latin America and Latin American countries. Here, we will assess trade, investment climate, poverty, and inequality in the region. The situation and policies addressing the informal economy, education and health in Latin America will be discussed in detail. Thereafter, we will analyze gender and ethnicity in the context of Latin American development.

LAST229 Between Worlds: Change and Continuity in Early Latin America

The conquest and colonization of the Americas challenged long-held assumptions about geography, time, history, nature, theology, and humanity for both indigenous societies and Europeans. Modern scholars have described the encounter either as an earth-shattering moment of revolutionary intellectual reverberations or, alternatively, as one of limited and slower impact.

This course examines the ways in which diverse actors in the Iberian colonial world confronted change and continuity in their societies. In particular, it seeks to understand how they approached the conquest and its environmental,

political, religious, legal, and social repercussions. Through the study of chronicles, graphic materials, poetry, omens, grammars, and maps, we will look at how missionaries, indigenous scholars, scientists, and nuns interpreted the forces transforming their communities. We will pay particular attention to the traditions and practices that they mobilized to explain the past and convey its present and future significance. Major themes include religious conversion and its consequences, the emergence of new social and ethnic identities under colonial institutions, linguistic change, and the writing of history.

LAST232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America

This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is expected, a willingness to engage it closely (textually and historically) is essential.

Prereq: **SPAN221**

LAST240 From the Banjo to Dembow: Afro-Caribbean Music in Motion

This course analyzes the global circulation of Afro-Caribbean musicians, dancers, audiences, musical styles, and even musical instruments from the beginning of European colonialism to the present day. We will seek to understand the political interconnections between the Caribbean and the wider world by focusing our attention on specific "musical itineraries." These will include, among others, the creation of the banjo by enslaved people in the Caribbean and the instrument's role in black resistance in North and South America, the musical aftershocks of the Haitian Revolution in Cuba and Louisiana, the production of black internationalist politics at weekly "reggae" dances led by Jamaicans in early 20th-century Costa Rica, and the rise of reggaetón between Panama, Puerto Rico, Cuba, the Dominican Republic, and the United States.

We will question how these musical itineraries propelled black political movements and shaped larger ideas about race, nation, diaspora, and the

meaning of "the Caribbean" itself. No prior musical knowledge is required for this course.

LAST241 Asian Latino Encounters

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin/x America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Darío, Tablada, Gómez Carrillo, Balmori, etc.). Then we will read various texts by Latin American writers who lived for some years in different parts of Asia throughout the twentieth century (e.g. Pablo Neruda in Southeast Asia, Octavio Paz in India, Araceli Tinajero in Japan, etc.). Finally, we will examine diverse works by writers/artists of Asian descent in Latin America as well as "Asian Latina/os" in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Latin America? How does Philippine literature in Spanish produced during the US colonial period modify our conception of what is "Hispanic," "Asian," and "American"? How do Asian Latin American and Asian Latinx writers and artists represent themselves through culture?

LAST242 Histories of the Caribbean: New Questions, Methods, and Vantage Points

This course explores some of the most exciting new trends in historical scholarship on the Caribbean. We will consider how recent scholars of the Caribbean have turned a critical eye to existing methods and reimagined "archives" as they have crafted new stories about gender, sexuality, race, the environment, and the rise of modern capitalism. In this way, we will question how these new directions in Caribbean studies have reshaped the study of history more generally. We will use a wide geographic lens in order to gain an expansive vision of the circuits of the Greater Caribbean, stretching from Antigua, Guadeloupe, Barbados, Martinique, Jamaica, Trinidad, Guyana, Cuba, Puerto Rico, and Haiti into the wider Atlantic world.

LAST245 Modern Latin America Since 1810

This lecture course explores some of the main themes of Latin America's modern history from the beginning of the independence movements in the 19th century until the present day. In particular, it traces the contentious processes of state-formation and the creation of national and regional identities. Governments, elites, and popular movements fought over questions of race, economic development, and inequality in their attempts to formulate a particular vision of the nation. We will contextualize these struggles in global economic transformations and pay particular attention to the rise of the United States as force in the region.

LAST252 Race and Nation in Latin America

How does race operate in Latin America, and in what ways does it intersect with the concept of nation and national belonging? The regions we call Latin America and the Caribbean have, since the first human encounter between "Old" and "New" Worlds of the 15th century, been often understood as places of mixture—both cultural and biological. From at least the early 19th century, when independent nations in the region began to emerge from colonial rule, intellectuals, statesmen, and citizens alike have had to contend with "race" and its inextricable connection to the concept of "nation." This course aims to introduce students to the history of race and national formation in Latin America and the Caribbean, from the wake of the independence movements of the early 19th century to the present. It draws on historical, anthropological, and literary approaches to identifying, analyzing, and interpreting the varied meanings of race and nation throughout the region.

LAST258 Bolívar's Interpreters: Nation Construction in the Americas

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

LAST259 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders—the Strait of Gibraltar and the Río Grande (Río Bravo)—and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

LAST260 Neotropical Aquatic Ecosystems: Their Importance, Sustainable Use, and Conservation (CLAC 1.0)

(English translation below Spanish text) El curso de Ecosistemas Acuáticos Neotropicales permitirá a los estudiantes buscar información y discusión sobre la diversidad y complejidad de los ambientes acuáticos en la América tropical. Comenzaremos a aprender definiciones, características, distribución y ejemplos de humedales, lagos, ríos y muchos otros hábitats acuáticos en todo el neotrópico. El origen del sistema hidrológico. Evolución de las principales cuencas: Amazonas, Magdalena, Orinoco y Paraná. El Paleo Orinoco-Amazonia: Importancia geológica y biótica. Dinámica geológica. Evidencia geológica y biológica. Hipótesis evolutivas de la fauna piscícola. Evolución del paisaje amazónico como parte del conocimiento para comprender los diversos procesos y patrones de riqueza y distribución de la biodiversidad. Los humedales (sabanas inundadas) de Colombia-Venezuela como ejemplo de humedales neotropicales. El Pantanal brasileño y las llanuras colombo-venezolanas como "áreas de criadero" para la biota acuática y terrestre y su importancia para el mantenimiento de la biodiversidad. Los estudiantes también leerán y buscarán información sobre el Sistema Fluvial Orinoco como ejemplo de estudio. La importancia biótica, el desarrollo sostenible y la conservación. Identificar los factores antrópicos que afectan al sistema. El desarrollo social y económico, y las contribuciones a través de los Programas de Evaluaciones Acuáticas Rápidas (RAP's) como metodología para producir información que permitió proponer áreas para la conservación de la biodiversidad. Terminamos con un análisis de los recursos y la importancia pesquera de las principales cuencas neotropicales: Amazonas, Orinoco y Paraná-Paraguay. Seguridad alimentaria. Ejemplos de ríos en riesgo.

This course will examine why the Orinoco and Amazon basins in South America harbor a biological richness much larger than other river basins around the world. About 50% of all higher plant species of the world are included in these basins. Data on vertebrates showed that about 3,000 freshwater fish species, thousands of birds (migratory and local), and hundreds of amphibians, reptiles, and mammals have been found so far in those basins geographically included in six countries: Bolivia, Brazil, Colombia, Ecuador, Peru, and Venezuela. We will examine the key factors that have affected their historical-geological development, the actual richness, and the threats to sustainable development and conservation. We will ask questions about the nature and interactions of the key factors and agents that harbor and transformed the high ichthyological and other aquatic biota diversity, reflected by the wide range of landscapes and aquatic ecosystems included in those basins. We will try to identify fragile aquatic ecosystems depending upon the biological richness, endemism, importance for local communities, and potential threats. We will examine the current trends in the fisheries, forest exploitation, and agriculture for human consumption, noting that stocks of many species of fish are in steep decline, and that current fishing practices are not sustainable. Finally, the major impacts and threats faced by the fishes and aquatic ecosystems of the Orinoco River Basin are discussed with the purpose of studying potential plans for sustainable development. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST265 Multilingual Aesthetics in Latin America

This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety

of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

LAST266 Latin American Theater and Performance

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

LAST272 Cubanidad: Diaspora, Exiles, and Cultural Identity in Cuban Literature and Film

This course will examine shifting notions of Cubaness, or "cubanidad," from the 19th century to the present times from a diasporic framework. We will discuss writings by/about African slaves, Chinese indentured laborers and migrants, and Spanish immigrants in Cuba, as well as Cuban exiles in the U.S. and Spain from the 19th century to the beginning of the 20th century. Through a variety of literary texts and films, we will then study select cases of European exiles who visited Cuba in the 1930s and '40s, the later massive waves of Cuban migration to the U.S. after the Revolution, and the more recent immigrants who have settled in Cuba.

LAST273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters

Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra's other Chile, César Aira's Colón (Panamá), Fernando Vallejo's Medellín (Colombia), and Mayra Montero's eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904--1914), the Cold War (1947--1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

LAST274 Insular Borders of Latin(x) America

Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire's control of its remaining insular colonies in the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the

United States' successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island "intra-colonial" (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai'i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Edouard Glissant's concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

LAST276 Body, Voice, Text: Theater and the Transmission of Experience

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

LAST277 The Secret Life of Waste: Trash in Latin American Art & Literature

From space junk to microplastic particles found in human blood, man-made waste and pollution are ubiquitous. What are the effects of waste on the environment? What can the decomposition of waste create and/or undo? What is the afterlife of waste? Is waste apocalyptic? Through figures such as rotteness, radioactivity, mutation, and zombies, we will explore the ways in which Latin American art and literature try to answer some of these questions by imagining living amidst the remnants of hyperconsumption and by exploring the unforeseen effects that coexisting with waste could have upon the land and the body. We will study a wide range of visual and literary engagements with trash from novels, poetry, comics, and films to environmental art projects. Artists and writers may include Cecilia Vicuña, Daniel Lie, Samanta Schweblin, Fernanda Trias, Vik Muniz, H. G. Oesterheld, Javier Campos, and Alejandro Durán, among others.

LAST278 Dangerous Plots: Fictions of the Latin American Jungle

This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

LAST279 Christianity and Globalization

This course focuses on recent developments in global Christianity. We will look at various interlinked dynamics: the rise of spirit-filled Evangelicalism, especially Pentecostalism, faith-based humanitarianism, child-sponsorship programs, and themes of militarism such as spiritual warfare. We will pay attention to the role of U.S. power in the world and how the narratives that various Protestant Christians tell through their writings and media shape life across international spaces. We will sample a variety of methods in how one studies the field of Christianity. These will include historical, sociological, and anthropological methods, all of which challenge traditional scholarly accounts (meaning those in the field of church history) in order to expand our understandings of Christianity in the modern period.

LAST280 Screening Youth in Contemporary Latin American Cinema

This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

LAST281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as "islas sonantes" (sounding islands) because

of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

LAST283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile

This course explores how poetry, novels, and films, produced during and after Chile's military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

LAST288 Territories of Dwelling, Desire and Resistance in Latin America

This course seeks to examine the ways in which diverse geographical spaces in Latin America have been produced, negotiated, and contested from the past century to our times through cultural practices that construct them as territories of dwelling, desire, possession, dispossession, and resistance. We will focus on

texts and practices--literature, film, performance, and the visual arts--that seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries, which in our times manifests itself through extractivist and other capitalist practices, and pay close attention to local modes of dwelling and the relationships among community, embodiment, gender, and desire. We will trace how these texts intervene in urgent debates about the destiny of rural lands, the uses and abuses of nature, and the place of rural peoples, the struggles for peasant and indigenous rights, environmental justice, and the construction of alternative modernities. We will focus particularly on the Andean and Amazon regions (mountains, rainforests) of South America, as well as other rural tropical areas.

LAST290 Current Environmental Issues in Latin America (CLAC 1.0)

(English translation below Spanish text) Este curso proporcionará información histórica y actual sobre el desarrollo de temas ambientales en América Latina. La información se dividirá en la evaluación del uso del medio ambiente durante los periodos precolombino y colonial (a); y b) período moderno. Se discutirá la organización, estructura y gobernanza del medio ambiente. El desarrollo de políticas públicas, planes de gestión, factores que se deterioran y los posibles usos sostenibles del medio ambiente y sus recursos. Leeremos literatura interdisciplinaria incluyendo: académica, informes, documentos oficiales gubernamentales y proyectos de ONG dedicados al diagnóstico, desarrollo y uso o nuestros recursos en América Latina. Por último, se estudiarán casos particulares de países latinoamericanos como Argentina, Brasil, México, Costa Rica, Perú y Venezuela. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español.

This course will provide historical and current information on the development of environmental issues in Latin America. The information will be divided into assessing the use of the environment during (a) pre-Columbian and colonial periods and (b) the modern period. The organization, structure, and governance of the environment will be discussed, as will the development of public policies, management plans, factors that deteriorate, and the potential sustainable uses of the environment and its resources. We will be reading interdisciplinary literature including academic, reports, official governmental documents, and NGOs' projects dedicated to the diagnostic, development, and use of resources in Latin America. Finally, particular cases of Latin American countries such as Argentina, Brazil, Mexico, Costa Rica, Peru, and Venezuela will be studied. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST291 From the Muralists to the Narconovela: The Public Intellectual in Mexico

Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

LAST292 Spanish American 'Modernismo' in a Global Context

The publication of Nicaraguan Rubén Darío's *Azul...* in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

LAST295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures

What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

LAST296 Colonial Latin America

This course studies the history of Latin America and the Caribbean from pre-conquest times to the emergence of independence movements in the early 19th century. Lectures will explore the key environmental, cultural, economic, political, and religious transformations that shaped colonial societies throughout the region. Beginning with the formation of indigenous and Iberian polities before 1492, we will consider how early modern colonial governance functioned and evolved throughout the period of Spanish and Portuguese rule in the Americas. Through an array of primary and secondary sources we will reconstruct the lived experiences of a diversity of actors across the colonial world. We will pay particular attention to the methods and approaches that scholars have used to understand the history of the region.

LAST298 Food Security and Environmental Conservation (CLAC 1.0)

(English translation below Spanish text) En este curso los estudiantes investigarán información y discusión sobre la seguridad alimentaria y el uso del medio ambiente en una selección de países de América Latina. Haremos

preguntas sobre la base de la producción y disponibilidad de alimentos. También examinaremos la información disponible de las agencias públicas y privadas sobre los programas establecidos por los países para garantizar la seguridad alimentaria de sus habitantes y el uso sostenible y la conservación del medio ambiente. Discutiremos conceptos como: La soberanía alimentaria y la seguridad como un sistema alimentario en el que las personas que producen, distribuyen y consumen alimentos también controlan los mecanismos y políticas de producción y distribución de alimentos; La nutrición como normas mundiales y particulares de consumo de alimentos; La justicia social relacionada con la accesibilidad de los alimentos; y el derecho humano a una alimentación adecuada y a la libertad del hambre como uno de los objetivos del milenio de las Naciones Unidas. El estudiante revisará casos particulares en América Latina. El curso se presenta en un formato de lectura/discusión en el que todas las lecturas, escritos y discusiones estarán en español.

In this course students will research and discuss food security and the use of the environment in a selection of Latin American countries. We will ask questions about the basis of food production and availability. We will also examine the available information from public and private agencies about programs established by countries to ensure the food security of their inhabitants and the sustainable use and conservation of the environment. We will discuss concepts such as: food sovereignty and security as a food system in which the people who produce, distribute, and consume food also control the mechanisms and policies of food production and distribution; nutrition as a global and particular standard of food consumption; social justice related to the accessibility of food; and the human right to adequate food and freedom from hunger as one of the United Nations' objectives of the millennium. Students will look at particular cases in Latin America. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LAST302 Latin American Politics

This course explores democracy, development, and revolution in Latin America, with special attention to Argentina, Brazil, Cuba, and Nicaragua. Questions to be addressed include: why has Argentina lurched periodically from free-wheeling democracy to murderous military rule? Why is authoritarianism usually less harsh, but democracy often more shallow, in Brazil than in Argentina? How democratic are Latin America's contemporary democracies? What accounts for the success or failure of attempted social revolutions in Latin America? Why did postrevolutionary Cuba wind up with a more centrally planned economy and a more authoritarian political system than postrevolutionary Nicaragua? How much progress has each of these countries made toward creating a more affluent, educated, healthy, and equitable society?

LAST315 Cuban Literature and Film: Imagination, Revolt, and Melancholia

This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin *revolvere*) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afro-Cubanismo, ethnographic literature, the avant-garde aesthetics

of the group *Orígenes*, *Marvelous Realism*, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

LAST320 Media and Power in Latin America: From Quipus to Twitter

This interdisciplinary seminar explores how media technologies have shaped Latin American societies and politics from the colonial encounter to the dawn of the digital age. Investigating the local histories of indigenous forms such as the Andean knotted quipu and scribal texts, along with newspapers, radio, photography and social media, we examine how Latin Americans made and used these technologies to assert power, claim status, and launch protests. Through brief theoretical readings and historical case studies, we explore such themes as the relationship between colonialism and the written word, the enduring legacy of alternative indigenous literacies, the importance of rumor and oral communication in societies with low literacy rates, and the role of mass media in identity formation and contemporary social movements.

Structured in part as a lab, the class will be organized around producing a physical and digital exhibition of Latin American media materials available in Wesleyan's collections, to be displayed for the broader university community and beyond. We will produce this exhibition over the course of the semester, integrating individual research projects into our broader collective project that will be conducted as a collaborative/team effort. Along the way we will experiment with hands-on activities that might include making quill pens, setting type, and operating a printing press, take field trips to examine rare media materials first hand, and learn from on-campus experts as we develop our public exhibition.

LAST321 Secrets, Lies, and Fictions in the Americas

In 1964, historian Richard Hofstadter underlined the spread of a "paranoid style" in American politics. Although Hofstadter's description seems more appropriate today than ever, in an increasingly interconnected global order the role of misinformation, uncertainty, manipulation, and conspiratorial imaginaries in shaping and limiting democracies and public spheres cannot be exclusively assigned to any particular locale. From a continental standpoint, this course offers analytical tools to explore the political complexity of lies, secrets, and fictions in both the United States and Latin America since the mid-twentieth century to this day. By studying a series of cases—including the Guatemalan civil war, the assassination of John F. Kennedy, the Pentagon Papers, the U.S. intervention in the Middle East, the "dirty war" in Latin America, censorship in socialist Cuba, the arrest of Augusto Pinochet in London, Wikileaks, hacker practices in the early days of internet, or Cambridge Analytica—we will address the relations between surveillance, spectacle, and conspiracies (both factual and imagined) in the contemporary techno-political landscape. Moreover, the course emphasizes the speculative and theoretical potentials of art and literature when it comes to understanding socio-political phenomena. Beyond distinctions between truth and falsehood, fictional constructions are key to our collective capacity to imagine alternative worlds. By mapping out the ways in which fictions circulate as such or rather as truthful versions of reality, we will problematize the limits and uses of truth, lies, and official and alternative narratives, as well as the

power of states, corporations, individuals, and collectives to direct attention and frame information.

LAST322 Exploration, Conquest, and Insurrection: The History of the Amazon 1542 to Present

Dark, wild, primitive, Edenic and infinitely wealthy: the Amazon has been many things in many times and places. From the disgruntled Spanish conquistadors who first traversed the jungle's rivers in search of cinnamon, to the 19th-century scientific expeditions of enlightened explorers, to contemporary environmentalists, the Amazon remains a mysterious object of inquiry. It still incites the imagination of travelers, filmmakers, and politicians alike.

This seminar investigates the multiple ways in which the Amazon and its peoples have been portrayed in chronicles, scientific writings, and film. We will confront the historical circumstances, motives and ideologies that prompted each of these depictions and how, in turn, they shaped the colonization of the region. We will pay close attention to genre, and to themes such as cross-cultural encounter, imperialism, and the representation of indigenous societies. We begin in 1542 with the chronicle of Francisco de Orellana. As the first Spaniard to navigate the entire length of the Amazon River, Orellana influenced how Europeans imagined the jungle well into the 19th century. Subsequently, we apply readings in history of science and anthropological theory to Claude Lévi-Strauss account of Amazonian tribes in *Tristes Tropiques* (1955). Students will then conduct independent research into a representation of their interest. Possible topics include scientific expeditions in the region, the jungle and modernization, global warming, or human rights. Finally, we will reflect on the Amazon as a metaphor for the human condition with Werner Herzog's film *Fitzcarraldo* (1982).

LAST335 Nature, Science, and Empire in Early Latin America

This seminar will introduce students to a diversity of scientific practices that flourished in the Hispanic World between 1400 and 1800. We will begin by analyzing how a debate known as the "polemic of Spanish Science," together with the Black Legend conditioned the ways in which colonial Latin American science was traditionally approached. From available studies we will then survey some of the significant contributions to botany, astronomy, medicine, and metallurgy of Mesoamerican and Andean civilizations. From there we will read an array of primary and secondary sources in order to reconstruct the varied, and often eclectic knowledge gathering and knowledge making practices that missionaries, humanists, and crown-officials devised to understand the natural world. We will pay close attention to their particular goals and methods and the manner in which they were influenced by the encounter with foreign peoples, the dynamics of conquest and colonization, the movement of books and commodities, and institutions of censorship and patronage.

LAST343 Empires of Captivity: The Resurgence of Atlantic Slavery in the Age of Emancipations

The dawn of the 19th century was marked by a series of challenges to Atlantic slavery, epitomized first by the unprecedented victories of the Haitian Revolution and then by the implementation of municipal bans and bilateral treaties that sought to limit the international trade in African captives. Yet seemingly paradoxically, this same period saw the rapid expansion of new zones of enslavement stretching from the U.S. South to Cuba, Brazil, and beyond. Proslavery forces mobilized across these jurisdictions in order to reverse the tide of abolition and to participate in (or simply to profit from) a burgeoning illegal trade in captives. Meanwhile, people of African descent who were enslaved or re-enslaved during this period built upon the precedent of emancipation in Haiti and other antislavery jurisdictions as they mounted claims to freedom for themselves, their families, and their communities. They continuously pushed forward the halting pace of general emancipation, laying the foundations for struggles for recognition and restitution that continue to the present day.

LAST344 The Haitian Revolution Beyond Borders

In 1791, enslaved people rose up against their masters in the French colony of Saint-Domingue, at the time the most profitable plantation society in the world. Thirteen years later, their efforts would culminate in the declaration of independence of Haiti, a nation founded on the pillars of antislavery, anticolonialism, and racial equality. This course investigates the regional and global significance of this revolution through its interconnections with Haiti's neighbors in the Caribbean and across Latin America. First, we will look at the immediate implications of Haiti's founding for the fate of New World slavery during the Age of Revolutions. Next, we will consider Haiti's long-term impact on national identities, racial formations, and future revolutionary struggles in the Americas over the course of the 19th and 20th centuries.

LAST348 Urban Histories of Latin America

Cities have occupied Latin American writers, artists, and scholars since the early decades of the sixteenth century. Mapped on to preexisting settlements of indigenous importance, colonial cities became the center of Iberian administration in the New World. They imparted justice, granted citizenship rights, set the standard of civility and religious orthodoxy, and held the promise of economic improvement. The preeminence of cities in Latin America continued into the modern period. Mexico, Buenos Aires, and Rio de Janeiro became opulent and unequal metropolitan centers in the nineteenth century. Unconstrained growth brought about the megalopolises of our current day.

This seminar will explore Latin America's major urban centers in significant moments from the pre-Hispanic period until the present day. Through chronicles, travel narratives, photography, legal writings, newspaper archives, maps, and film we will reconstruct the many dimensions of urban culture in the region. The course will be organized thematically and geographically. We will begin by studying the ways in which Latin American writers have understood the role of

the city, and its dwellers, in shaping the trajectory of their various nations. We will pay particular attention to themes like the city and modernity, the everyday experiences of urban residents, racial, gender, and social inequality, the city as a site of historical memory and violent contestation, the environmental challenges of urban growth, and the rise and fall of counter-cultural and protest movements.

LAST373 Language and Power in Latin America

What is a perfect language? Societies across the globe, in different times and places, have sought to answer this question. In the process they have posited a diversity of theories about the relationships among language, individual and group identity, social harmony, religious devotion, and political power. This seminar investigates the ways in which Latin American societies, from the colonial period until the present, grappled with the problem of language and its ability to shape their communities. From Indigenous polities, to the imperial monarchies that conquered and colonized the Americas, to the nation-states that emerged in the 19th century, all have had to confront the realities of a diverse and profoundly multilingual region. The course will be organized around representative case studies. It will draw from a variety of fields (e.g., linguistics, philosophy, history, anthropology, and history of science) to consider how language served as either a resource or an obstacle to be surmounted in the creation of ideal religious, political, and intellectual communities in Latin America. Significant themes include the role of language in conquest and colonization, the development of cultural institutions to regulate and standardize language usage, the prevalence of bilingualism in many regions, the proliferation of literacy campaigns as a hallmark of the revolutionary governments of the mid-20th century, and the emergence of Indigenous peoples as social and political actors in contemporary Latin America.

LAST383 Venezuela: The Effect of Oil Discovery on People, the Environment, and on Democracy (CLAC 1.0)

(English translation follows below) Este curso examinará los factores clave que han afectado el desarrollo de Venezuela y su entorno desde el período precolonial hasta el presente. Dividiremos la historia de Venezuela en dos períodos críticos: antes y después del descubrimiento de petróleo. Haremos preguntas sobre la naturaleza y las interacciones de los factores y agentes clave que transformaron a Venezuela de una colonia a la de un país económicamente

independiente. Al examinar los períodos económicos anteriores y posteriores al petróleo por separado, aprenderemos que los factores clave, como la agricultura, el uso de la tierra y la influencia colonial europea, cambiaron drásticamente, transformando así muchas instituciones sociopolíticas. Los contrastes incluirán la resiliencia y la erradicación de enfermedades, los derechos humanos y la esclavitud, la propiedad de la tierra, la salud humana, los impactos en la biodiversidad y la salud humana, y la protección de las culturas indígenas. En última instancia, examinaremos los factores que han llevado al colapso de la democracia. Leeremos una literatura interdisciplinaria que incluye antropología, religión, sociología, ciencias ambientales, derecho e historia. El curso se presenta en un formato de lectura / discusión en el que todas las lecturas, escritos y discusiones serán en español.

This course will examine the key factors that have affected the development of Venezuela and its environment from the pre-colonial period to the present. We will divide the history of Venezuela into two critical periods: before and after the discovery of oil. We will ask questions about the nature and interactions of the key factors and agents that transformed Venezuela from a colony to that of an economically independent country. By examining the pre- and post-oil economic periods separately, we will learn that the key factors, such as agriculture, land use, and European colonial influence, changed dramatically, thereby transforming many sociopolitical institutions. The contrasts will include resilience to and eradication of diseases, human rights and slavery, land ownership, human health, impacts on biodiversity and human health, and protections of indigenous cultures. Ultimately we will examine the factors that have led to the collapse of democracy. We will read an interdisciplinary literature that includes anthropology, religion, sociology, environmental sciences, law, and history. The course is presented in a reading/discussion format in which all readings, writings, and discussions will be in Spanish.

LANG141 Elementary Modern Greek

The course is an introduction to the language and culture of modern Greece. The fundamentals of reading, writing, and speaking are taught. We start by learning the Greek alphabet and sounding out basic words and expressions. We then progress to acquiring useful vocabulary; practicing in-class dialogue exercises; and eventually constructing original sentences for use in conversation. In addition, we examine different aspects of Greek culture including modern Greek literature in translation, the Mediterranean Diet, contemporary Greek history, and Orthodox Christian spirituality and holiday customs.

Credits: **0.50**

Gen Ed Area: **HA-LANG**

Prereq: **None**

LANG142 Elementary Modern Greek II

The course builds upon the language skills acquired in LANG 141. Students learn how to count, tell time, and give directions in Greek; compose short descriptive essays in the target language; and translate passages into English. Student-led conversation hours outside of class provide further opportunity to practice speaking and to explore interests such as Greek music, social media, and travel. In class, we also examine historical and cultural topics including life in contemporary Athens, the Greek War of Independence, and the story behind the modern revival of the Olympic Games.

LANG160 Introduction to Tamazight: The Native Language of North Africa and Beyond (CLAC.50)

This course will introduce students to the language (sounds and script) and culture of the Amazigh people, an ethnic group (commonly known as Berbers) native to North Africa and West Africa, specifically Morocco, Algeria, Tunisia, Libya, Mauritania, northern Mali, and Niger, with some oases in Egypt and the Canary Islands.

The Tamazight language--the alphabet of which is called Tifinagh--has been a written language for almost 3000 years, although it was disrupted throughout history due to various invasions and conquests of the area. The Tuareg people of the Sahara desert in Northern Africa, and as of late Morocco and Algeria, have been using the Tifinagh alphabet (oldest dated inscription from about 200 BC) and the Tamazight language as a secondary national language.

The objectives of this course are: 1. To introduce students to the sounds and script of Tifinagh; 2. To teach students basic conversation and essential elements of the Tamazight language; and 3. To familiarize students with the culture of the different Amazigh peoples.

LANG233 Introduction to ASL / English Interpretation (CLAC 0.5)

Having completed course work in Beginning ASL I, II and Intermediate I, II, students who have demonstrated a strong interest in continuing their studies at a more sophisticated and challenging level may find this course work interesting pursuant to becoming a professional, credentialed Sign Language Interpreter.

This experience will provide students with a working knowledge of the profession of interpreting including the Code of Professional Conduct, certification criteria, the roles and responsibilities of a professional interpreter and discussions of the role of the interpreter in a variety of professional settings including educational, medical, legal, the performing arts, counseling, and rehabilitation.

Students who attend this course demonstrate that they are able to express in ASL, with some confidence, routine and everyday experiential topics within a conversational format with some elaboration. They demonstrate clear and accurate signing and fingerspelling at a moderate rate of speed.

This coursework uses a process-oriented approach for applying the essential cognitive strategies for interpretation. These strategies include organizing and manipulating visual images, analyzing message for meaning, and self-monitoring for message accuracy. This experience serves as a transition from language learning to beginning interpretation.

LANG250 Visual Gestural Communication

The Visual Gestural Communication course (VGC) is an introduction to communication mostly based on iconicity via gestures. Students will use body movements in performance-like activities to model people's actions in the real world or in imaginary universes, facial expressions to convey feelings and emotions as well as some ideas and concepts, hand gesticulations to represent objects and concepts. Students will practice their non-verbal (aka not based on language) communication in diverse settings on a variety of topics taking into account different perspectives and sensibilities in the world: countries, cultures, languages, minorities, genders, ages, etc. Students will also be exposed to a stylized form of signed language used by the Deaf community in international settings, commonly called International Sign Language. This course does not require previous exposure to American Sign Language.

Prereq: **None**

LANG290 Intermediate American Sign Language I

This course is the third (3rd) of six American Sign Language (ASL) courses encompassing two terms for Elementary, two for Intermediate, and two for Advanced. The two Intermediate ASL courses are an introduction to communication in ASL. You will expand your vocabulary and enhance your grammar while starting to get a basic understanding of the Deaf experience. The course will be taught primarily in ASL and with clarifications in written English as needed. Interactive activities in class and homework assignments will provide you with ample opportunities to practice communication in ASL as much as possible. Because of the absence of a standardized written system for ASL, you will complete many of the assignments by recording yourself on video.

Gen Ed Area: **NSM-MATH**

Prereq: **MATH121**

MATH132 Elementary Statistics

Topics included in this course are organizing data, central measures, measures of variation, distributions, sampling, estimation, conditional probability (Bayes' theorem), hypothesis testing, simple regression and correlation, and analysis of variation.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH133 Intermediate Statistics

This class continues the study of statistics begun in MATH 132. Topics will include experimental design, ANOVA, multiple regression, non-parametric tests, and further topics as time permits. This course is an ideal continuation for students who have taken MATH 132 or who got a 4 or 5 on the AP Statistics exam and who wish to deepen their statistics knowledge.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH132**

MATH134F Mathematical Thinking (FYS)

In this course we seek to illustrate for the students that mathematics is an organic way of thinking, with a beauty and elegance of its own, that also includes its essential applications to many concrete physical models. Students will learn the techniques of mathematical writing, as well as take a survey of important mathematical topics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **None****MATH211 Problem Solving for the Putnam**

This course will explore the problems and problem-solving techniques of the annual William Lowell Putnam mathematical competition. Particular emphasis will be placed on learning to write clear and complete solutions to problems. The competition is open to all undergraduate students.

Offering: **Host**Grading: **Cr/U**Credits: **0.25**Gen Ed Area: **NSM-MATH**Prereq: **None****MATH221 Vectors and Matrices**

This is a course on the algebra of matrices and vector spaces. It emphasizes a concrete approach to the material. Topics include solving systems of linear equations, vector algebra, matrix algebra, properties of invertible matrices, determinants, the vector space \mathbb{R}^n and its subspaces, dimension, and linear transformations. It concludes with a discussion of eigenvalues, eigenvectors, and matrix diagonalization. If time permits, additional topics such as the dot product, the Gram-Schmidt process, and basic aspects of vector spaces will be discussed.

MATH 221 and MATH 223 cover very similar material, but they are intended for students with different experience in mathematics. MATH 221 takes a more concrete approach to the material, and it is suitable for students who have not yet engaged with proof-based mathematics. MATH 223 takes a more theoretical approach that is appropriate for students who have taken proof-based math courses already or for students with strong mathematics backgrounds who are willing to learn how to read and write proofs in parallel with linear algebra. MATH 221 and MATH 223 fulfill the same requirement for the mathematics major, and students need only select the option that is best suited to their current background in mathematics.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **MATH122****MATH222 Multivariable Calculus**

This course treats the basic aspects of differential and integral calculus of functions of several real variables, with emphasis on the development of calculational skills. The areas covered include scalar- and vector-valued functions of several variables, their derivatives, and their integrals; the nature of extremal values of such functions and methods for calculating these values; and the theorems of Green and Stokes.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **None****MATH223 Linear Algebra**

This is a first course on linear algebra. It emphasizes a theoretical approach to the material. Topics include vector spaces, subspaces, dimension, linear transformations and matrices, determinants, eigenvalues and eigenvectors, and diagonalization of linear operators. If time permits, additional topics such as inner product spaces, Hermitian and unitary transformations, and elementary spectral theory will be discussed.

MATH 221 and MATH 223 cover very similar material--they are both linear algebra courses--but they are intended for students with different experience in mathematics. MATH 223 takes a more theoretical approach that is appropriate for students who have taken proof-based math courses already or for students with strong mathematics backgrounds who are willing to learn how to read and write proofs in parallel with linear algebra. MATH 221 takes a more concrete approach to the material, and it is suitable for students who have not yet engaged with proof-based mathematics. MATH 221 and MATH 223 fulfill the same requirement for the mathematics major, and students need only select the option that is best suited to their current background in mathematics.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **MATH122****MATH225 Introduction to Real Analysis**

In this rigorous treatment of calculus, topics will include, but are not limited to, real numbers, limits, sequences and series, continuity and uniform continuity, differentiation, the Riemann integral, sequences and series of functions, pointwise and uniform convergence of functions, and interchange of limiting processes. MATH228 or comparable experience in writing mathematical proofs is strongly recommended for success in this course.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)****MATH226 Complex Analysis**

This course will present the basic properties of complex analytic functions. We begin with the complex numbers themselves and elementary functions and their mapping properties, then discuss Cauchy's integral theorem and Cauchy's integral formula and applications, Taylor and Laurent series, zeros and poles and residue theorems, the argument principle, and Rouche's theorem. In addition to a rigorous introduction to complex analysis, students will gain experience in communicating mathematical ideas and proofs effectively.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)****MATH228 Discrete Mathematics**

This course is a survey of discrete mathematical processes. Students will be introduced to the process of writing formal mathematical proofs, including mathematical induction. Topics may include set theory, logic, number theory, finite fields, permutations, elementary combinatorics, or graph theory.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**Prereq: **None****MATH229 Differential Equations**

This course is an introduction to the theory of ordinary differential equations. Topics will include existence and uniqueness theorems as well as techniques to solve systems of equations, with applications in pure mathematics and related fields such as physics, chemistry or biology.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 AND MATH222) OR (MATH222 AND MATH223)**

MATH231 An Introduction to Probability

This course teaches the basic theory of probability. Although the notions are simple and the mathematics involved require only a basic knowledge of the ideas of differential and integral calculus, a certain degree of mathematical maturity is necessary. The fundamental concepts to be studied are probability spaces and random variables, the most important ideas being conditional probability and independence. The main theorems we will study are the law of large numbers and the central limit theorem.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH222 AND MATH228**

MATH232 Mathematical Statistics

This course covers the basic notions of estimation, hypothesis testing, regression, analysis of variance, experimental design, and other topics in statistics from a rigorous mathematical perspective. This material will be supplemented by various case studies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH231**

MATH233 Stochastic Processes

This course provides a rigorous introduction to the theory of stochastic processes. Topics include a review of basic concepts of probability theory (probability spaces, random variables, expectation), Markov chains, Poisson processes, random walks, and Brownian motion. In tandem, the workshop section taught by the Hazel Quantitative Analysis Center (QAC) will provide practical skills in R programming. These workshops are geared towards novices in programming and will detail ways to computationally tackle more complex, real-life stochastic processes. Students entering the course should have completed MATH231, and be comfortable with multivariable calculus and linear algebra.

Offering: **Host**

Grading: **A-F**

Credits: **1.50**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH231**

MATH241 Set Theory

This course covers ordinal and cardinal numbers, cardinal arithmetic, theorems of Cantor and Schroeder-Bernstein, introduction to Zermelo-Fraenkel set theory, Axiom of Choice, and some infinitary combinatorics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH242 Topology

This course is an introduction to topology, the study of space in a general sense. We will approach topology through knot theory, the study of embeddings of a circle in a 3-dimensional space.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **None**

MATH243 Mathematical Logic

This course is an introduction to mathematical logic, including first-order logic and model theory, axiomatic set theory, and, as time permits, Goedel's incompleteness theorem.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH244 Topology: Point Set

This is an introduction to general topology, the study of topological spaces. We will begin with the most natural examples, metric spaces, and then move on to more general spaces. This subject, fundamental to mathematics, enables us to discuss notions of continuity and approximation in their broadest sense. We will illustrate topology's power by seeing important applications to other areas of mathematics.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH246 Applied Topology

This course teaches the main concepts in Applied Topology. Students will learn to apply nonlinear methods to analyze the shape of data sets. These approaches are drawn from classical topology and focus on the shape in one of two ways: they either 'measure' it, that is count the occurrences of patterns within the data set; or build combinatorial representations of the data set. As an example of the former, we will look at persistent homology, whereas the latter will be represented by mapper. The topics covered include: basic notions from topology, simplicial complexes (Cech complexes, Vietoris-Rips complexes, etc.), homology, persistent homology and applications, mapper.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH223**

MATH247 Applied Linear Algebra

This is a course on topics in linear algebra that are the foundations of modern data science and machine learning. Topics include dimensionality reductions, matrix decompositions, elementary spectral theory, multivariate optimizations, and their applications to machine learning such as gradient descent and support vector machines.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 OR MATH223) AND MATH222**

MATH252 Differential Forms

This class will be an introduction to differential forms, a central tool in modern topology, geometry, and physics. The course begins where MATH222 ends, with Green's theorem, the divergence theorem, and Stokes' theorem. All of these theorems are special cases of one theorem, known as the general Stokes' theorem, about integration of differential forms. The objective of the first part of the course will be to understand and prove this theorem. We will then discuss manifolds and what can be learned about them using differential forms, concentrating on de Rham cohomology.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 AND MATH222) OR (MATH222 AND MATH223)**

MATH255 Advanced Topics in Real Analysis

Topics to be addressed include convergence of sequences and series of functions, spaces of functions and their topologies, the Lebesgue integral (on the line) and its basic convergence theorems, and Fourier series.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH225**

MATH261 Introduction to Abstract Algebra

This course is an introduction to abstract principles based on the special properties of the integers, rational, real and complex numbers. The course will cover general algebraic structures as well as their quotients and homomorphisms, with emphasis on fundamental results about groups and rings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH221 AND MATH228) OR (MATH223 AND MATH228)**

MATH262 Advanced Topics in Abstract Algebra

This second course in abstract algebra will cover fields and polynomial rings, as well as Galois theory and the insolubility of the quintic polynomial. Additional topics will be covered as time permits.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH261**

MATH264 Algebraic Geometry

This course is an introduction to algebraic geometry, the study of the geometric structure of solutions to systems of polynomial equations. These may take the form of lines, circles, parabolas, ellipses, hyperbolas, elliptic curves, lemniscates or Cassini ovals.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH261**

MATH271 Error-Correcting Codes

Nowadays messages are sent electronically through different kinds of communication channels. Most of these channels are not perfect and errors are created during the transmission. The object of an error-correcting code is to encode the data so that the message can be recovered if not too many errors have occurred. The goal of this course is to introduce the basic mathematical ideas behind the design of error-correcting codes. It makes use of algebraic techniques involving vector spaces, finite fields, and polynomial rings. These techniques will be developed in this course so that prior knowledge is not necessary.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH221 OR MATH223**

MATH272 Elementary Number Theory

This is a course in the elements of the theory of numbers. Topics covered include divisibility, congruences, quadratic reciprocity, Diophantine equations, and a brief introduction to algebraic numbers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH273 Combinatorics

This course will present a broad, comprehensive survey of combinatorics. Topics may include partitions, the topic of inclusion-exclusion, generating functions, recurrence relations, partially ordered sets, trees, graphs, and min-max theorems.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH274 Graph Theory

A graph is a set V of elements called vertices and a set E of pairs of elements of V called edges. From this simple definition, many elegant models have been developed. Indeed, graph theory is essential to applications of computer science to network analysis and planar mapping.

This course will be an introduction to graph theory and its applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH228**

MATH283 Differential Geometry

This course is an introduction to the classical differential geometry of curves and surfaces in Euclidean 3-space. Topics from global differential geometry and extensions to higher dimensions will be considered as time and the background of the students permit.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **(MATH222 AND MATH221) OR (MATH222 AND MATH223)**

MATH284 Euclidean and Non-Euclidean Geometry

Euclid developed an axiomatic system to describe plane geometry in 300 BC. This system is fundamental to our understanding of mathematics today. In this course, we will compare and contrast plane geometry and its axiomatic system with several beautiful geometries, including spherical, elliptical and hyperbolic geometries, and their applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MATH**

Prereq: **MATH222 AND (MATH221 OR MATH223)**

MATH285 Introduction to Lie Theory

Lie theory is a fundamental area of mathematics, with many applications to physics and other sciences. In this course, we will study the basics of elementary Lie theory. This course will focus on matrix groups, which have concrete descriptions and include all of the Lie groups that commonly arise in applications. Topics covered in this class will include the algebra and topology of matrix groups, Lie algebras, matrix exponentiation, and applications.

MATH500 Graduate Pedagogy

The elements of good teaching will be discussed and demonstrated through lectures, practice teaching sessions, and discussions of problems encountered in the actual teaching environment. The staff consists of faculty and experienced graduate students. An integral part of the course is a required one-day workshop BEFORE the first day of formal classes.

Training in pedagogy in the first semester of attendance is required for all incoming Wesleyan MA and PhD students who have not already fulfilled this requirement at Wesleyan. BA/MA students are not required to get training in pedagogy but may choose to do so.

MATH509 Model Theory

This course will emphasize model theoretic algebra. We will consider the model theory of fields, including algebraically closed, real-closed, and p-adically closed fields; algebraically closed valued fields; and also general questions of definability in fields. As time permits, we will consider more recent applications of model theory in number theory and arithmetic geometry. Ideally, the student should understand what it means to be first-order definable and should have the equivalent of a year's study of abstract algebra. To study various applications, it will be necessary to assume certain results from the areas of application--that is, without proving them ab initio.

MATH513 Analysis I

MATH513 and MATH514 constitute the first-year graduate course in real and complex analysis. One semester will be devoted to real analysis, covering such topics as Lebesgue measure and integration on the line, abstract measure spaces and integrals, product measures, decomposition and differentiation of measures, and elementary functional analysis. One semester will be devoted to complex analysis, covering such topics as analytic functions, power series, Mobius transformations, Cauchy's integral theorem and formula in its general form, classification of singularities, residues, argument principle, maximum modulus principle, Schwarz's lemma, and the Riemann mapping theorem.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MATH514 Analysis I

MATH513 and MATH514 constitute the first-year graduate course in real analysis, complex analysis and functional analysis. Topics may include power series, Mobius transformations, Cauchy's integral theorem and formula, maximum modulus principle, Schwarz's lemma, Riemann mapping theorem, Lebesgue and other measures, and Fourier transforms.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

MEDIEVAL STUDIES (MDST)

MDST125 Love, Sex, and Marriage in Renaissance Europe

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

Offering: **Crosslisting**

Grading: **A-F**

 Identical With: **RL&L123, COL123, FGSS123**
 Prereq: **None**

MDST125F Love, Sex, and Marriage in Renaissance Europe (FYS)

This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level

research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

MDST125Z Love, Sex, and Marriage in Renaissance Europe

This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (N.B. Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about "homosexual" love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. MDST128 Rome After Rome: Culture and Empire of Constantinople

Rome did not fall. Rome was swallowed by a new idea of what it means to be Roman when, in the fourth century, the empire left its own founding city behind and moved the capitol to the newly-minted city of Constantine, Constantinople. This course gives students a hands-on introduction to one of the most astounding sociopolitical transformations in human history, tracing out the cultural, political, and economic trajectories of the Roman empire of the Middle Ages.

In exploring the textual and material relics of this medieval metropolis on their own terms, students apply and publish their research interests on the collaborative place-based interactive teaching encyclopedia Constantinople as Palimpsest (<https://arcg.is/Oe4Lb4>). For their final project students will design a unit for a high school history course, using Constantinople as Palimpsest to introduce the diversities and paradoxes of life in the city of New Rome.

MDST131 Introduction to Western Art I: Ancient to Medieval

This course introduces the art and architecture of the Western world during the ancient and medieval periods. The artistic traditions of the Near East, Europe, and the wider Mediterranean will be surveyed from the prehistoric era to ca. 1400 CE. Questions of style, content, function, and cultural and historical context will be examined alongside such perennial concerns as religion, rulership, social class, luxury, and the definition of art within its ancient and medieval milieus.

Credits: **1.00**

Gen Ed Area: **HA-ART**

Identical With: **ARHA109**

Prereq: **None**

MDST151 European Architecture and Urbanism to 1750

This course is an introduction to architecture and related visual art as an expression of premodern Western European civilizations, from ancient Greece through the early 18th century, including Roman, Early Christian, Byzantine, early medieval, Romanesque, Gothic, Renaissance, and Baroque architecture, landscapes, and cities. The focus is on analysis of form in architecture and the allied arts. Emphasis is on relationships between style and patronage. In each era, how does architecture help to constitute its society's identity? What is the relationship between style and ideology? How do architects respond to the works of earlier architects, either innovatively or imitatively? How do patrons respond to the works of their predecessors, either locally or distantly? How are works of architecture positioned within those structures of power that the works, in turn, help to define? How do monuments celebrate selected aspects of history and suppress others? How were the major buildings configured, spatially and materially? Emphasis will be on continuities and distinctions between works across time, seeing Western traditions as a totality over centuries. Lectures and readings convey different historiographic approaches to these issues.

MDST203 Introduction to the Hebrew Bible (Old Testament)

The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

MDST204 Medieval Europe

This introductory lecture course is a history of European politics, culture, and institutions from the end of the Roman Imperial era through 1520. Within a chronological framework we will focus on the creation of kingdoms and government; the growth and crises of papal-dominated Christianity, its crusades

and its philosophy; the rise and role of the knight, lady, and aristocratic culture; masculinity and gender relations; the crises of the later Middle Ages, including the Black Death, heresy, mysticism, and war. These all contributed to the beginnings of the modern world, including the Renaissance and the Reformation, events that ended the medieval period. We will also at least glance at the borderlands of Europe, the edges of Islamic and Orthodox worlds.

MDST207 Chaucer and His World

In this course, we will read Chaucer's fascinating dream-visions, *The Book of the Duchess* and *The House of Fame* and his best-known work, *The Canterbury Tales*. We will also read selections from Chaucer's sources and consider how he adapts these texts in his own literary works. Some of the topics we will explore are the various genres of Chaucer's poetry (allegory, epic, romance, satire), medieval ideas about psychology and dreams, the ideology of chivalry, Chaucer's reinvention of the classical world, and views of gender and sexuality. All readings will be in Middle English, so we will read slowly and carefully, with attention to the language.

MDST209 Mosque and Cathedral: Islam and the West, c. 600-1500

This course examines the interaction between the Islamic world and medieval Europe from the perspective of art and architecture, from late antiquity and the rise of Islam through the end of the Middle Ages. Our approach will seek out both intersections and comparisons: while attending to the borders, crossings, and overlaps that existed between medieval Christendom and the Islamic world, this course will also stage comparisons of key themes specific to these traditions, chief among them the picturing of divinity, the status of a sacred text, the organization of sacred space, and the practice of luxury. We will survey a series of historical encounters, including Byzantine Iconoclasm, the Crusades, and trade and diplomacy in general, before culminating in Renaissance Italy. Special emphasis will be reserved for key geographies of exchange, including Spain, Sicily, North Africa, and the Holy Land. Consideration will be given to the media of architecture, mosaic, painting, relief sculpture, decorated books, ivory, metalwork, and textiles. Questions of geography, ethnicity, the other, the idol, cultural translation, and the status of text vs. image will be threaded throughout.

MDST211 Magic, Witchcraft, and Miracle, from Saints to Salem

Until the "disenchantment of the world" in the 18th and 19th centuries, Europeans lived in a universe shot through with hidden and awesome power. God's action in the world was possible, but puzzlingly he often operated through other agents, through the saints and by miracle. On the other hand, humans were often tempted to appeal to other powers to get what they wanted, and the use of magic—some pagan in origin, some not—was a pervasive influence. The world was full of demons and even devils, who used illusion and magic to entrap people by possessing them or turning them toward witchcraft in exchange for wealth and health. Surprisingly, the occult was not all bad, and Catholics and later Protestants too wrestled with the question of what to accept and what to suppress. Magical forces did not fade with the Renaissance but actually grew alongside the first developments toward modern natural science in the 16th and 17th centuries. The necromancer joined the saint, the priest, and the witch as the faces of occult power. This course will take a broad look at the people and powers that filled the place where science and a lot of religion sit today. The course will survey medieval developments and will end in New England in the 17th century. The instructor will provide background and narrative history in order to place the readings into their appropriate context. In surveying the long history of magic and miracle in Europe, we shall ask such questions as: What exactly do these terms mean and how have the meanings changed? How far away from such a worldview are we today and did magic really end in the 17th century? And, if so, why? Who controlled the use of magic and how was its misuse identified and punished? Were the processes of law, inquisition, and prosecution fair or effective? Were there really witches or just witch hunts? Why did people believe in miracles and magic? Who were the practitioners? Why did it all decline?

MDST213 Cross, Book, Bone: Early Medieval Art, ca. 300-1100

This class surveys the art and architecture of early medieval Europe, beginning with the multicultural world of Late Antiquity, the decline of the Roman Empire, and the spread of Christianity, before continuing through the glory of Byzantium, the rise of Islam, and the development of Germanic kingdoms in Northern Europe. Style, content, function, and historical context shall be examined across monuments of architecture, sculpture, mosaic, manuscripts, painting, and the luxury arts. Questions of religious practice, political messaging, and cross-cultural translation shall be threaded throughout, for example: Could one picture God? How might divinity be conceptualized and accessed? How might one best picture a ruler? How did early medieval Europe define both art and the figure of the artist? How might we see dialogue, overlap, and/or competition between the art and architecture of Islam and Christianity, among other religious traditions? The art historical periods considered will include Late Antique, Byzantine, Umayyad, Abbasid, Migration, Insular, Carolingian, Mozarabic, Ottonian, Anglo-Saxon, and Viking art.

MDST214 Introduction to the New Testament

The purpose of this course is to provide an introduction to writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, one of the chief aims of the course being the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

MDST215 Religion and Politics in Early Christianity

The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

MDST219 Northern Renaissance Art

The Northern Renaissance, roughly ca. 1400-1600, was a period of thrilling transition in Europe and profound change for the Western tradition of art and architecture. For art history, the period's many paradigm shifts include the rise of oil painting, the spread of the printing press and print media, the growth of middle-class patronage, the Protestant Reformation, radical developments in the practice of portraiture, an increasingly global worldview and mentality, the foundations of what might be referred to as an art market, and a fundamental revision of the purpose and definition of both art and the artist. This course explores these and other histories as they played out within panel painting, book painting, the sumptuous arts (e.g., tapestries and metalwork), printing, sculpture, and architecture, focusing mainly on France, the Low Countries, Germany, and England. We will begin within the late medieval world of Burgundy, Prague, and Germany before progressing through such key artistic personalities as Sluter, Broederlam, the Limbourgs, Campin, van Eyck, van der Weyden, Fouquet, Riemenschneider, Lucas van Leyden, Bosch, Dürer, Grünewald, Altdorfer, Cranach, Holbein, and Bruegel. Such a narrative will be equally enriched with less familiar and less canonical works. Threaded throughout are questions of mimesis, realism, skill, medium, and the growing cult of genius, as well as the relationship with the Italian Renaissance, the Mediterranean, and the expanding globe.

MDST220 Love and Loss in Medieval and Early Modern French Literature and Culture

The interconnected themes of love and loss encompass others such as desire, passion, friendship, death, separation, and grief. This course introduces students to the uses of these themes in French literature of the medieval and early modern periods by reading a range of texts, from the courtly romance and lyric poetry, to the essay, the novella, and theater. We will examine how men and women treat these themes, and we will be especially sensitive to the ways in which women write in genres traditionally dominated by men. Topics of study will include the body, virtues and vices, marriage, sexuality, seduction, chastity, and violence. We will also place emphasis on improving French pronunciation and on developing oral presentation and written skills. Readings, papers, and discussions will be in French.

MDST221 Mystical Visions, Medieval Women, and the Performance of Early Music

This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to

be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Various "medievalisms"--modern interpretations of the medieval--are explored, to show how musicians continue to interact with early practices in new and exciting ways. This allows us to talk not only about performers of historical early music, but also about composers like Kaija Saariaho, folk groups like Vulcan's Hammer and Folkal Point, and pop artists like Janelle Monáe and Florence Welch. The creation of medievalist music for films and video games is also relevant, as an arena where musicians reimagine the medieval for new audiences.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MDST222 Early Renaissance Art and Architecture in Italy

This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

MDST223 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

MDST226 The Cosmos of Dante's "Comedy"

In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

MDST227 What Can the Middle Ages Teach Us About Nature?

Today nature is at the center of our preoccupations. This course will go back to a time before human beings thought they were the masters of nature, when nature was at the same time teaching and allegory, metaphor and science. We will explore the different functions of nature in bestiaries, poems, romances, and herbaria from the Middle Ages to the beginning of the Early-Modern period (in modern French translation). We will be able to see a real herbarium in the Special Collections & Archives. Students will also visit the Davison Center for the Arts and the Joe Webb Peoples Museum to explore visual representations of nature as well as scientific displays. During the semester, students will put together a herbarium that will be displayed in an exhibition at the end of the semester.

MDST228 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History

This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic *EL CID* (12th-13th century); the bawdy and highly theatrical prose dialogue known as *LA CELESTINA* (1499); the anonymous *LAZARILLO* (1554), the first picaresque novel; and María de Zayas's proto-feminist novella *THE WAGES OF VICE* (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

MDST229 Fight like the French: Debates, Quarrels and Polemics in French Culture

In the age of "fake news" and polarization, knowing how to debate is essential. The French are notoriously practiced in debate; the importance of public opinion and the figure of the public intellectual have made French society as a whole particularly prone to the agonistic discussion of ideas. This course will survey foundational aesthetic and political debates in French culture from the 15th century to this day, focusing on those that were led by writers, philosophers, and intellectuals and that have entered French literary and cultural history. The course will show how controversies mark and make paradigmatic changes in the cultural landscape, advancing the arts and sciences and voicing political dissent. Throughout the course we will read literary works, treatises, letters, and newspapers.

MDST230 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes

Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

MDST231 Cuneiform to Kindle: Fragments of a Material History of Literature

This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

MDST232 Obscure Enigma of Desire

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

MDST236 Don Quixote: How to Read the Ultimate Novel

No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

MDST237 Dante in His World: Politics, Poetry, Religion

Dante Alighieri is one of the great figures of European history and culture. He has been famous since his life, especially for his poem "The Divine Comedy," including its depictions of the Inferno, Purgatory, and Heaven. It reveals his massive intellectual knowledge and his deep and complex commitments. It might be less well known that he was also an active politician and a political theorist, as well as a student of literature and style.

This course will examine the body of his work and use it to outline some of the great political, moral, and religious crises of Europe around the year 1300, a moment closely connected to the very idea of the Middle Ages. Important course themes will include the question of the political balance of church and state, the role of mysticism and philosophy in expressing ethics, and the uses of history, theory, and poetry in seeking the good life. Readings will focus on Dante's own writings, including "The Divine Comedy," "The New Life" (La Vita Nuova), and "On Monarchy."

MDST238 Mystics and Militants: Medieval Women Writers

In this class we will read a wide range of works written by European women between ca. 1100–1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

MDST241 Your Revolutionary Life: Biography as Political Power from Antiquity to Modernity

Death is not enough to turn a life into a political movement. That translation requires a story. This course asks why, since Gandhi, few leaders have successfully drawn upon the power of adopting a revolutionary approach to living as a means of effecting political, social, and cultural change. A student-centered collaborative pedagogy equips students with the tools and concepts to collectively workshop principles drawn from a wide range of examples of revolutionary living from the period known as the middle ages; from well-known and widely imitated examples such as the Buddha, the Prophet, and the Christ, to lesser-known examples including cross-dressing nuns, hermits on pillars, desert mothers, begging collectives, and much more. Students will then apply the ways these past lives were remembered and transmitted to contemporary movements such as Occupy Wall Street or the Black Lives Matter CHOP in Seattle. Course assignments consist of short essays, presentations, and a self-designed final project that can be analytical, creative, or demonstrative.

MDST245 The Invention of Fiction: Giovanni Boccaccio's Decameron

In this course we read and discuss Giovanni Boccaccio's Decameron (ca. 1353), a collection of 100 short stories traded by an "honest brigade" of 10 Florentine men and women. They tell each other these stories while sheltered in a secluded villa as the plague of 1348 rages in Florence. We study the Decameron as both a product and an interpretation of the world Boccaccio

inhabited. We examine the Decameron's tales and narrative frame as a point of entry into the cultural and social environment of medieval Italy. We look at its scurrilous, amusing, and provocative innuendos as traces of erotic, religious, ethnic, and cultural questions. We investigate the sexual exuberance of many of Boccaccio's tales and the tension between "high" and "low" culture. We consider the development of mercantilism and literacy in early-modern Europe and its emerging virtues of wit and self-reliance. We review the dynamics of composition and reception in manuscript culture and the book's adaptation into different media, from illuminations to film. And by impersonating the 10 Florentines, we will reenact their pastime of telling stories and appreciate Boccaccio's remarkably modern sensibility and unsurpassed art of writing fiction. This course is conducted in Italian.

MDST247 Devotion and Deception: Erotic Discourse from Dante to Petrarca

In this course, we will investigate the ideology, content, and material forms of love literature from Dante Alighieri to Francesco Petrarca. Through a close reading of such texts as Dante's *Vita nova* (ca. 1295), Giovanni Boccaccio's *Decameron* (ca. 1353), and Petrarca's *Rerum vulgarium fragmenta* (often referred to as the poetry book par excellence: *il canzoniere*, ca. 1374), we will unveil the literary and fictitious nature of medieval erotic literature. We will explore the origins of love poetry in medieval France and its subsequent interpretation and rewriting in Italian courts and comuni. We will inquire into the cultural constructions of the medieval notion of the lyrical self and how it still has an impact on our own notion of consciousness. We will study the forms, themes, and characters that populate 'love stories' in the Middle Ages. We will analyze the dynamics of composition, circulation, and reception in manuscript culture. Our close analysis of the texts as they have been preserved in manuscript form will help us gauge the differences between medieval and contemporary ways of writing, reading, and loving. This course is conducted in Italian.

MDST254 Cervantes

Cervantes is known chiefly for *DON QUIXOTE*, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. *DON QUIXOTE* also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about *DON QUIXOTE*, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

MDST255 The Vikings and the Viking Age, 700-1243

The Vikings erupted from their isolated northern homelands throughout Europe from the eighth century, and arguably reoriented European history both in the West, where they were instrumental in the history of the British Isles and France, as well as the East, where they were founders of the Russian kingdom. By 1100, they and their descendants had also established themselves in the Mediterranean, Italy, Sicily, and the Holy Land. This course will examine the reasons the Vikings emerged, and will explain their role not only as warriors, but as important merchants, administrators, and contributors to a robust European literary culture. They provide the perfect avenue by which to understand the creation of European culture and politics. The course will also act as an introduction to the dark age history of England, France, and Northern Europe.

MDST257 Knights, Fools, and Lovers: An Introduction to Medieval and Renaissance French Culture

The study of history and past literature provides intellectual, psychological and emotional resources that make one more resilient in adapting to new circumstances, enable one to see new possibilities of being-in-the-world, and provide new capacities for self-understanding. A knowledge of the European past, moreover, can be an advantage for people seeking to study, live, or work in Europe. This course will help students develop those resources and knowledge through a study of various forms of short fiction and poetry from the French Middle Ages and the Renaissance (12th-16th centuries). We will focus on the representations of human relations, above all romantic relations and their inherent conflicts of power, in these works. We will also view a couple of historical films in order to develop our visual imagination.

MDST258 Medieval Gigs: Saints, Scholars, Sailors, Sinners

A friar preaching to birds, a scoundrel passing as a saint, a nun conversing with Jesus, a Greek hero sinking into hell, a scholar talking to the dead, and a merchant exploring uncharted territories: We find unusual professional figures gigging in Italy circa 1300. In this course we explore medieval alterity through the voices of its most illustrious representatives: from Francis of Assisi to Dante Alighieri, and through a variety of other workers in the Italian economy. We examine various aspects of medieval religious culture ranging from mystical visions to the institutional politics of the Church. We consider the development of mercantile capitalism and its emerging virtues of wit and self-reliance. We track seafarers as they encounter the Other during their maritime voyages. For those staying closer to home, like clerics and other literate "Italians," we review the dynamics of composition and reception from orality to manuscript culture. We observe how medieval culture is embodied through different media, from manuscript illuminations to film. And by combining micro- and macro-perspectives, we approach the Italian Middle Ages from a broad aesthetic, historical, and socio-anthropological standpoint.

The course is conducted in Italian. Authors include Francis of Assisi, Catherine of Siena, Angela of Foligno, Giotto, Dante Alighieri, Francesco Petrarca, Giovanni Boccaccio, Marco Polo, and Christopher Columbus.

MDST268 The Origins of Global Capitalism: Economic History, 1400--1800

This course explores how the modern market economy came into being in Europe and why this system expanded outward to bring the rest of the world into its orbit by 1800. Among other things, it seeks to provide answers for why China's economy--perhaps the most sophisticated in the world before 1500--fell into relative stagnation and why Europe was the first region to develop mechanized industry and break out of a poverty trap that had restricted prosperity for millennia. The course begins by exploring late medieval European agriculture, market systems, institutions, and technology to reveal how the paths of economic development taken in Europe began to diverge fundamentally from those taken by societies in Africa, Asia, and the Americas. It will explore the role of the spice trade in the expansion of European influence abroad, the significance of new food and cash crops in the development of plantation systems and long-haul trade, the impact of organized coercion in the development of monopolies and monopoly companies, and the role of proto-industrial methods of production and colonial economies in the birth of the Industrial Revolution. The course aims to be accessible, broad, and comparative, drawing insights from many fields to consider the environmental, geographical, cultural, institutional, and political factors shaping the economic changes that have created modern capitalism.

MDST272 Law, Court, and Crime in England, 600--1660

This course will discuss the nature and development of law, dispute resolution, custom, and rule in England from the arrival of the English on the island in the age of Arthur when feud and compensatory justice dominated. It will then examine the rise of royal power, local custom, and the common law in the 12th and 13th centuries, including the Magna Carta crisis. We will focus on the growing politicization of law and the development of courts and lawyers alongside new sorts of lawmaking in parliament and through the power of the king. The growth and challenge of royal and parliamentary power will frame the last parts of the course that anticipate the revolutionary crisis of the 17th century. Along the way, the course will ask, Who gets to make law, what is the role of writing in the development of custom and law, how did the English decide who was right and who wrong: calculation, testimony, jury, or ordeal? What were the forms of punishment and compensation employed, and what did this tell us of conceptions of the person: mutilation, execution, or incarceration? How did social status and gender shape expectations and outcomes in the legal process: Who could be a legal actor, a responsible malefactor, a property owner, or a slave; who could be judge and legislator? The course will be based on the examination both of recent scholarship and a wide array of primary sources such as law codes, court record books, advice manuals, literature, treatises on law, and the practical documents from lawyers in courts and judges that are plentiful in medieval, Tudor, and Stuart England. The course provides a background to the sources of law in early America as well as other common law countries around the world.

MDST310 Muslims, Jews, and Christians: Convivencia in Medieval Iberia

For eight centuries, Muslims, Jews, and Christians lived side by side as neighbors on the Iberian Peninsula in a carefully negotiated state of coexistence known as "convivencia." While much of the written record is full of enmity, religious polemic, and mutual suspicion, the artistic record tells another version, of lives lived in close proximity giving rise to shared cultural practices, artistic tastes, and long interludes of mutual well-being.

This seminar will explore the works produced by the pluralistic societies of medieval Iberia from the perspectives of art, architecture, history, archaeology, literature, and music. As we study renowned monuments such as the synagogues of Toledo, the Alhambra, and the Way of St. James, we will learn to decode elements such as dress and home decor, food and hygiene, and gardening and agriculture, to expand our picture of culture and lived experience. Finally, we will ask why "convivencia" ultimately failed, and how the medieval Iberian experience can enlighten our own uneasy attempts at building a multicultural, multi-confessional society.

MDST311 The Body in Medieval Art

Medieval thinkers theorized the body in ways vastly different from how human bodies are conceptualized and defined today in the twenty-first-century West. Indeed, the "medieval body" was not at all a stable or monolithic entity, but rather a shifting constellation of ideas and practices that waxed, waned, and coexisted throughout the European Middle Ages, c. 400-1400. The diversity of medieval attitudes toward the body helped inform its representation in art, which, simultaneously, was also dependent upon conventions of craft, medium, artistry, preciousness, and style. "Body" signals not only earthly bodies--sexed, fleshly, corruptible, and soon to decay--but also the soul (equally fragile), as well as heavenly, angelic, and divine bodies, including that of Christ. This course analyzes medieval strategies of representing these bodies while situating them in their respective intellectual and cultural environments. Primary-source materials will be contextualized by secondary literature, and our inquiries will remain cognizant of gender-, sexuality-, race-, and performance-critical methods. The bodies examined will include, and are not limited to, saintly, gendered, racialized,

clerical, monstrous, virginal, heretical, sickly, healthy, courtly, resurrected, and uncircumscribable bodies.

MDST312 The Medieval Beast

How did medieval writers think about the distinction between human and animal? This course will begin with the categories of soul and body, ruler and ruled, speech and noise--among others. We will also read about human-animal hybrids like werewolves and bird-men in order to think through some of these binaries. Texts will include bestiaries (encyclopedias of animals), treatises on hunting, beast-fables from Christian, Muslim, and Jewish traditions, Marie de France's "Lais" and "Fables," Chr tien de Troyes's "Knight of the Lion," "Sir Gawain and the Green Knight," and Chaucer's "Parliament of Fowls."

MDST313 Medieval Manuscripts

Medieval manuscripts were dense, considered gatherings of text and image, and they are among the richest of artifacts bequeathed to us by the Middle Ages. Manuscripts both crystallized and intervened in many of the key intellectual, religious, and aesthetic foundations of medieval Europe. To step into a luxurious medieval manuscript--into its script, its miniatures, its marginal decoration, its scribbles, its little monsters and unexpected grotesques, its tears and signs of use--is to probe a particular artform, distinct to pre-modernity, in which the definition of painted image and written word differed markedly from later centuries of the Western tradition. Throughout, basic questions of the relationship between text and image, and the linguistic and the pictorial, repeatedly beg attention. How were these books made, who used them (if they were used at all), how did the reading process unfold in the medieval period, and how did pictorial decoration assist in revealing--or, perhaps, obscuring--truth? These questions, and more, will inform this seminar's systematic inquiry of the making, function, and layout of the medieval book, from its Late Antique origins to the 15th century advent of printing.

MDST315 The Politics of the French Language and the Birth of the French State

Today, the advantages of national borders and monolingual language policies are being trumpeted all across the world. And yet, the study of premodern languages and literatures reveals that the history of national languages has always been a multicultural affair. In this course, we will look at the case of the French language, particularly the establishment of French as a literary language through strategies of legitimization. Starting with an examination of the first text written in the language that would later become French, from the 9th century, we will then go on to study (in modern French) a series of medieval and early-modern poems, plays, treatises and essays that borrow from other languages and literatures, even as they establish French as a literary and a national language. The final portion of this class will include a meditation on the status of French language in contemporary Francophone countries based on Derrida's essay "Le monolinguisme de l'autre."

MDST321 Dialogues of Love: A Close Reading

Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

MDST330 Lancelot, Guinevere, Grail: Enigma in the Romances of Chretien de Troyes

Chretien de Troyes, the greatest writer of medieval France, was the first to tell the stories of Lancelot and Guinevere's fatal passion and of the quest for the Holy Grail. Written at the height of the Renaissance of the 12th century, his Arthurian tales became the basis for all future retellings of the legend. We will read these tales in depth, paying particular attention to their enigmatic quality.

MDST350 History as Tragedy: Genre, Gender, and Power in the Alexiad of Anna Komnena

Why did it take until the 11th century for a woman to write a work in the genre of history? What did it take for Anna Komnena--a renowned student of ancient literature, mathematics, astronomy, and philosophy, and a princess of the East Roman (Byzantine) Empire--to finally break into this most gendered of genres? And, how has Anna Komnena's accomplishment been received? This course will spend an entire semester delving into this deeply literary history, and its influence from the Middle Ages to the present. Students will engage with "The Alexiad" through close intertextual readings, critical scholarship in history, relevant work in theory, and digital research methods.

MDST353 Race, Ethnicity, and Religion in Medieval Literature

Why do white supremacists celebrate the European Middle Ages as a lost era of racial and religious purity? This course approaches that question by considering the emergence of medieval ideas of race, ethnicity, and religious difference. We will also think through the meaning of these categories in medieval studies. Our

focus will be on a selection of texts dealing with encounters--real and imaginary--of Western European Christians with cultures from the Mongol Empire to the Jewish communities in their own territories. The readings will begin historically with the Crusades and the gruesome chronicles written by Christian, Muslim, and Jewish authors. We will move on to religious polemics, travel accounts, and romances: fictions that re-imagine the past in terms of exoticized sexuality, racial transformation, cannibalism, and nationalist fantasy.

MDST354Z Self and Text in Roman North Africa: Augustine's Confessions

The native North African Augustine of Hippo wrote the most influential autobiographical text in (so-called) Western literature. It remains the most brilliant text I have ever read: a mind-bendingly complex and yet fully coherent literary self. Let's read it together. Set between Carthage and Rome in 400, Augustine wrote just 10 years before the Eternal City would be sacked by the disaffected former legions of the empire (the Goths). Split between conqueror and conquered, civilization and apocalypse, Augustine wove humanity's existential and epistemological questions into a literary tapestry for the ages: Who am I? How do you speak? Who are you? How do I listen? Who are we? How do we know? At once memoir, critique of empire, philosophy, psychology, theology, personal history, criticism, and a letter, these **CONFESSIONS** require close, careful, focused, attentive readings from a diverse group of interpreters. Join our learning community and spend two snowbound weeks at Wesleyan with a book you will never forget.

MDST360 The Mediterranean Archipelago: Literary and Cultural Representations

"Islands which have / never existed / have made their ways / onto maps nonetheless" (Nicholas Hasluck). In this course, we study Mediterranean islands as geographical, textual, and metaphorical spaces. We focus on specific islands--both fictional and real--as case studies for the aesthetic, political, and metaphysical implications of insularity, while also aiming to present the Mediterranean as a spatial, historical, and cultural network of relationality and conflict. Elaborating upon Predrag Matvejevitc's statement that "the Mediterranean is not only geography," we approach Mediterranean insularity not only in cartographical representations (from Greek geographers to Arab cartographers), but also as poetic topos (from Ariosto's Island of Alcina to Goethe's Capri), narrative stratagem (from Homer's Phaeacia to Boccaccio's Rhodes), literary protagonist (from Deledda's Sardinia to Murgia's Sardinia), political concept (from Plato's Atlantis to Campanella's Taprobane), and existential condition (from Cervantes's Cyprus to Cavafy's Ithaca). We engage in a diachronic and synchronic exploration of Mediterranean islands' inherent dialectic between resistance and occupation, identity and assimilation, marginality and integration, zoological extinction and speciation, inbreeding and metissage, autochthony and allogeny, linguistic conservatism and creoleness, territorial boundedness and internal division. Our approach will also be archipelagic and include methods and concepts from historical linguistics and dialectology to diplomatic history and postcolonial poetics.

MDST363 (Un)Popular Performances/Performances (Im)Populaires

In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

MDST373 From Courtly Love to Cannibalism: Medieval Romances

Romance is the narrative form of medieval sexualities and courtly love, but it also gives literary shape to social worlds in which a protagonist switches genders, skin color changes with religion, and a dog might be the hero of a narrative. In this course, we will begin with texts that date from the Romance's origins in 12th-century France and continue with the form's development up to the well-known Middle English texts of the 14th century, including Sir Gawain and the Green Knight set at King Arthur's court. Some of the topics we will consider are Romance's engagement with "chivalry," the religious and racial conflicts of the Crusades, and of course, Christian mysticism and the Holy Grail.

MDST376 Travel and Communication in Europe

This course will explore the character of travel and communication networks, patterns, technologies, and ideas in Europe in the medieval and early modern periods. Students will therefore learn the concept of travel and mobility, whether commercial, cultural, or bureaucratic, and the concept of notable reconfigurations and acceleration of exchange in this period. Beyond ideas, the networks they linked to will be prominent. These include technologies such as the bridge, road, and wayfinding, as well as cybernetic creations like the riding horse (with iron shoes and complex needs); the development of institutions of hospitality, like the monastery, the hostel and the inn; and the adaptation of writing to facilitate motion and communication. Due attention will be paid to exotic travel such as crusading, pilgrimage and warfare; however, routine business travel will be key, such as the trips required by law, by trade, by the search for money, and the desire to see family.

Methodologically, the course will focus on the idea of networks and the techniques of the digital humanities. Thus, text mining for information; mapping

in GIS (Geographic Information Systems); and analyzing network relations will be important additions to the usual historical skills of reading and writing essays.

MDST378 Visionary Journeys through Sacred Landscapes: Japanese Art of Pilgrimage

This course examines the ways in which religious paintings were used and viewed in medieval Japan. Emphasis will be laid on images of sacred landscapes and the visionary journeys they inspired. Though primarily conceived as fundraising tools and advertisements aimed at inspiring viewers to undertake a physical journey to the illustrated site, these images became sacred in their own right and were approached by worshipers as one would approach the enshrined deity of the represented site. They also allowed spiritual travel through the images, providing virtual pilgrims with the karmic benefits of actual pilgrimage without the hardships of travel.

Each week we will immerse ourselves in a sacred site, reading about its history, deities, religious practices, and unique benefits. We will then look at how these were given visual form and the artistic language developed to endow these visual representations with the power to inspire and move contemporary audiences.

MDST390 Directed Research in European Studies

This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

MOLECULAR BIOLOGY AND BIOCHEMISTRY (MB&B)

MB&B101F The Personal Genomics Revolution (FYS)

The first draft of the human genome sequence was published approximately 15 years ago, having taken more than a decade to complete at a cost of approximately three billion dollars. With incredible advances in sequencing technology, accompanying analysis tools, and maturation of sequence databases, we have arrived at the beginning of an era of "personal genomics." Today, individuals can have their genomes sequenced in a few hours for a few hundred dollars! This course explores the kinds of information contained within one's genome and the various ways in which genome sequences can be used for improving quality of life. Students will conduct original research to explore societal attitudes about the use of personal genomics for the purpose of making lifestyle choices (dating, diet, vocations, etc.); establishing notions of personal identity (race, gender, nationality, etc.); creating new social networks (based on genetic kinship); or prolonging life span (and revolutionizing medicine). As part of this research, students will also consider ethical issues (e.g., privacy, discrimination) surrounding the use of personal genomics, as well as how education might impact societal attitudes on particular applications of this technology. As this is an FYS course, student work will focus on developing skills in scholarly writing, which will include peer evaluations of other student writing and production of a final scholarly paper based on the results of their research project.

Gen Ed Area: **NSM-MBB**

Prereq: **None**

MB&B103 Copernicus, Darwin, and the Human Genome Project

Much of art and philosophy is inspired by the question: What does it mean to be human? The project of science has provided rational explanations of human identity that threaten our self-perception as special beings—beginning with the Copernican revolution and discoveries about our unspecial place in the universe. In this course, we will discuss three paradigms arising from modern molecular biology that provide perspective on the lines between living and non-living, human and non-human life, and human and machine by exploring the science of DNA, evolution, and the Human Genome Project, respectively. As part of both discussions, we will consider how society negotiates with science, as depicted in politics and popular art, ethical issues pertaining to the advancement of scientific (e.g., reproductive, genetic) technologies, and plausible resolutions to the tension between science and society that arise from a detailed understanding of

the scientific method. Little or no background knowledge in science/biology will be assumed.

MB&B155 Tiny Organisms with a Big Effect: The Microbiome

With the advent of advanced sequencing technology, we are able to characterize the microflora that lives on and inside of multicellular organisms, including humans. It follows that there are still many unknowns with respect to the function and dynamics of relationships between bacterial communities and their hosts. These bacterial communities, colonizing humans and other organisms with millions of microbes, have captured the interest of the public. Popular news outlets have made the disparate claims that the right human microbiome can act as a panacea and the wrong microbiome is such a calamity that it can destroy an individual's health. This course will look at the true nature of the microbiome, to the extent that current research has revealed. We will discuss both normal and abnormal bacterial community compositions and any related disease states. Similarly, we will cover changes in microbiome composition over time and with respect to host development. In class, we will also consider the microbiomes

of other organisms and how the presence and composition of the microbiome relates to disease states and/or life history.

MB&B181 Principles of Biology I: Cell Biology and Molecular Basis of Heredity

This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from the genetic code in DNA through protein synthesis and function. Topics include DNA replication, chromosome dynamics, transcription, translation, and gene regulation. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including transport across cell membranes, cellular energetics, protein sorting, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology. This course will require about 10 hours per week of engagement. Students should enroll separately in MB&B/BIOL191 Principles of Biology 1 - Laboratory.

MB&B181Z Principles of Biology I: Cell Biology and Molecular Basis of Heredity

This course presents an exploration of the contemporary view of the cell and an introduction to the molecules and mechanisms of genetics and gene function. The course will have two major themes. First, we will focus on the central dogma of molecular biology, describing the process of information transfer from genetic code in DNA through protein synthesis and function. Topics include DNA replication and repair, chromosome dynamics, RNA transcription, protein translation, gene regulation, and genomics. Second, we will focus on cell theory and the underlying molecular mechanisms of cellular activity, including cell signaling, energetics, cell motility, and cell cycling. Lectures will stress the experimental basis of conclusions presented and highlight important details and major themes. The course will also emphasize problem solving approaches in cell and molecular biology.

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL181Z**

Prereq: **None**

MB&B182 Principles of Biology II

This course covers biological principles at tissue, organ, organismic, and population levels of organization. We will review how animals regulate their internal environment to control or adapt to changes in temperature, salt levels, nutrients, levels of oxygen and carbon dioxide, and the presence of infectious agents. We will examine the molecular, cellular, and tissue mechanisms that underlie the hormonal, neuronal, and behavioral processes that underlie these responses. We will learn how these systems develop in the embryo. At the population level, we will review evidence for evolution, including the tenets of Darwin's theory of evolution by natural selection. We will also discuss the nature and importance of variation among organisms, stochastic processes in evolution, and modern theories of speciation and macroevolution. Finally, the course addresses ecological aspects of population biology, including patterns and processes that inform the distribution and abundance of biodiversity, population growth, organisms' responses to environmental variation, and interactions among species. Each of the topics of the course is explored from a comparative viewpoint to recognize common principles as well as variations among organisms that indicate evolutionary adaptation to different environments and niches.

Offering: **Crosslisting**

Grading: **OPT**

MB&B191 Principles of Biology I--Laboratory

This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL191**

Prereq: **None**

MB&B192 Principles of Biology II: Laboratory

This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. A specific emphasis will be placed on science communication.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL192**

Prereq: **[MB&B191 or BIOL191]**

MB&B193 Principles of Biology I Laboratory (Online)

This laboratory course, to be taken concurrently with MB&B181 or BIOL181, provides experience with techniques used in cell biology and molecular biology. These include polymerase chain reaction (PCR), electrophoresis, enzyme assays, and spectrophotometry.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL193, NS&B193**

Prereq: **None**

MB&B194 Principles of Biology II: Advanced Topics

This course provides an optional supplement to the introductory course in physiology, development, evolution, and ecology (BIOL182, which should be taken concurrently). It is designed for highly motivated biology students who seek to enrich their understanding by engaging with current research in an intensive seminar setting. Students in BIOL194 will read and discuss recent journal articles that probe in greater depth some of the subjects covered in BIOL182. Weekly meetings will consist of a short lecture by the professor followed by group discussion of the readings.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL194**

Prereq: **BIOL181 or MB&B181**

MB&B198 Principles of Biology II Laboratory _ Online

This laboratory course, designed to be taken concurrently with BIOL182 or MB&B182, will introduce students to experimental design, laboratory

methods, data analysis, and empirical approaches to developmental biology, physiology, ecology, and evolution. Laboratory exercises use the techniques of electrophysiology, microscopy, computer simulations, and analyses of DNA sequence data. Some exercises will include exploration of physiological processes in living animals.

Offering: **Crosslisting**

Credits: **0.25**

Gen Ed Area: **None**

Identical With: **BIOL198, NS&B198**

Prereq: **BIOL192**

MB&B207 Introduction to Biophysics

This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS207**

Prereq: **PHYS116**

MB&B208 Molecular Biology

This course is a comprehensive survey of the molecules and molecular mechanisms underlying biological processes. It will focus on the cornerstone biological processes of genome replication, gene expression, and protein function. The major biomacromolecules--DNA, RNA, and proteins--will be analyzed to emphasize the principles that define their structure and function. We will also consider how these components interact in larger networks within cells to permit processing of external and internal information during development and how these processes become perturbed in disease states.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL208**

Prereq: **MB&B181 AND MB&B182**

MB&B209 Research Frontiers in Molecular Biology and Biochemistry

This course of weekly discussions of current research is for students who have completed the MB&B or BIOL introductory series. Discussions will be informal in nature and cover topics of current interest in molecular biology and biochemistry, emphasizing possibilities for future research areas for the students.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-MBB**

Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182])**

MB&B210 Genomics: Modern Genetics, Bioinformatics, and the Human Genome Project

Genetics has provided a foundation for modern biology. We will explore the classical genetics and go on to consider how genomics has transformed this field. This course is intended to introduce students to the fields of genetics and genomics, which encompass modern molecular genetics, bioinformatics, and the structure, function, and evolution of genomes. We will discuss important

new areas of research that have emerged from the genome projects, such as epigenetics, polymorphisms, transgenics, systems biology, stem cell research, and disease mapping. Students will also discuss bioethical issues we face in this new postgenome era.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL210**

Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B212 Principles and Mechanisms of Cell Biology

The cell is the smallest structural and functional unit of an organism. The primary goal of this course is to understand the structure, organization, regulation and behavior of cells, because with this perspective one can begin to ask complex questions including: why does mutating a protein cause a cell to malfunction and how does this cause tissue malfunction or disease? We will examine the cell mainly in the context of the multicellular organism--where cells respond to as well as regulate their local environment. Hence, this course provides students with a firm foundation in cell biology as we examine eukaryotic cell structure, organelle function, cell adhesion and motility, signal transduction and cell differentiation, cell survival and apoptosis, and consider how these mechanisms integrate to generate coherent cell behaviors. Published research will be discussed throughout the course in order to build students' understanding of research in cell biology. Lectures, assignments and assessments include opportunities for students to develop a broad and deep knowledge of cell biology, gain understanding of the scientific process of inquiry, experimentation and interpretation, and develop skill in analytical and critical thinking and scientific writing.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL212**

Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B223 The Molecular Basis of Cancer

Cancer is a group of diseases characterized by unregulated cell growth and tissue invasion. This course will focus on the molecular events that lead to cancer. We will cover topics in both molecular and cellular biology and genetics that are relevant to understanding the differences between normal and cancer cells. Particular focus will be placed on oncogenes and tumor suppressor genes, DNA damage responses, the p53 signaling pathway, cell cycle regulation, and the molecular basis of cancer therapies. This course will utilize both the textbook and primary scientific literature in the study of cancer.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Identical With: **BIOL223**

Prereq: **MB&B181**

MB&B228 Introductory Medical Biochemistry

This introductory course will focus on the essential concepts of biochemistry important to students interested in the health professions, including the chemical and biological foundations of cellular metabolism and related disease states. Major topics will include the structure and function of biological molecules in the human body (proteins, carbohydrates, fats, nucleic acids, vitamins), enzyme catalysis, cellular signaling, and digestion, absorption, and processing of nutrients for energy and growth.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL228**

Prereq: **[MB&B181 or BIOL181] AND CHEM251**

MB&B231 Microbiology

This course will study microorganisms in action, as agents of disease, in ecological situations, and as tools for research in molecular biology, genetics, and biochemistry. Particular emphasis will be placed on new ideas in the field.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL231**

Prereq: **BIOL182 OR MB&B208**

MB&B232 Immunology

In this introduction to immunology, particular emphasis will be given to understanding both the innate immune response and its agents as well as the acquired immune response mediated by B and T cells. Cellular and antibody responses in health and disease will be addressed, along with mechanisms of immune evasion by pathogens, autoimmune disease, and cancer.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL232**

Prereq: **([MB&B181 or BIOL181] AND [BIOL182 or MB&B182]) OR [MB&B208 or BIOL208]**

MB&B233 Cellular Mechanisms of Gene Regulation and Gene Editing Tools

This course will explain the mechanisms of gene expression in eukaryotes. Then we will define the main and current techniques used for gene editing (CRISPR/Cas9, TALEN, site director mutagenesis, CRE/Lox recombination). Discussions will include how these technologies can be used to optimize organisms for health, food, and energy applications. Ethical use and current regulations of gene editing tools will also be considered.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Prereq: **MB&B181**

MB&B235 Microbiology Laboratory

This laboratory, to be taken concurrently with MB&B231, is an essential part of learning microbiology. Techniques in general and specific areas of microbiology including recombinant DNA procedures involving microorganisms will be taught.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-MBB**

Prereq: **None**

MB&B237 Signal Transduction

Cells contain elaborate systems for sensing their environment and for communicating with neighbors across the membrane barrier. This class will explore molecular aspects of signal transduction in prokaryotic and eukaryotic cells. Topics will include membrane receptors, GPCRs, kinases, phosphorylation, ubiquitination, calcium signaling, nuclear receptors, quorum sensing, and human sensory systems. We will integrate biochemical functional approaches with structural and biophysical techniques.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **BIOL237**

Prereq: **[MB&B208 or BIOL208]**

MB&B241 Informal Science Education for Elementary School Students I

This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary age children in an afterschool program taking place at five local elementary schools. The classroom components include writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Identical With: **CHEM241**

Prereq: **None**

MB&B242 Informal Science Education for Elementary School Students II

This service-learning course will focus on designing and implementing original, effective, and engaging science-based lesson plans for elementary age children in an afterschool program setting at five local elementary schools. The classroom component includes writing, testing, and critiquing lesson plans and organizing a once-a-semester event, Science Saturday. Members of the class are required to volunteer weekly, co-lead Science Saturday, complete individual work, and organize meetings for projects outside of class. This course is a continuation of CHEM241.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM242**

Prereq: **None**

MB&B265 Bioinformatics Programming

This course is an introduction to bioinformatics and programming for students with interest in the life sciences. It introduces problem areas and conceptual frameworks in bioinformatics. The course assumes little or no prior programming experience and will introduce the fundamental concepts and mechanisms of computer programs and examples (e.g., sequence matching and manipulation, database access, output parsing, dynamic programming) frequently encountered in the field of bioinformatics.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL265, COMP113, CIS265**

Prereq: **[MB&B181 or BIOL181]**

MB&B266 Bioinformatics

This course is an introduction to bioinformatics for students with interest in the life sciences. The course is similar to BIOL265 but only meets in the second half of the semester (with BIOL265) and is designed for students with programming background, ideally in Python. The course introduces problem areas and conceptual frameworks in bioinformatics and discusses programming approaches used in bioinformatics such as sequence matching and manipulation algorithms using dynamic programming, clustering analysis of gene expression data, analysis of genetic nets using Object Oriented Programming, and sequence analysis using Hidden Markov Models, Regular Expressions, and information theory.

Offering: **Crosslisting**

Grading: **A-F**

MB&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **NS&B303, MB&B523**

Prereq: **(CHEM251 AND CHEM252 AND [MB&B208 or BIOL208])**

MB&B306 Epigenetics

Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-MBB**

Identical With: **MB&B506**

Prereq: **MB&B181**

MB&B307 Molecular Biophysics Journal Club I

This course includes presentation and active discussion of a series of current research articles in the field of molecular biophysics and biophysical chemistry from journals including but not limited to the Biophysical Journal, Biopolymers, Current Opinion in Structural Biology, Journal of Biomolecular Structure and Dynamics, and the Annual Review of Molecular Biophysics and Biomolecular Structure.

Offering: **Crosslisting**

Grading: **Cr/U**

Credits: **0.50**

Identical With: **MB&B508, CHEM508, PHYS318, PHYS518, CHEM308**

Prereq: **None**

MB&B309 Molecular and Cellular Biophysics

This course is an integration of the physical and chemical principles underlying biological systems from molecules to cells. The objectives are to develop an understanding of the underlying biological and physical principles that inform biophysical methods (e.g., protein-protein interaction studies, enzyme kinetics, spectroscopy, structural biology), how these concepts and techniques can be used to address open scientific questions, and how to critically evaluate their use in scientific literature. Particular emphasis will be placed on the biophysical concepts underlying studies of proteins, enzymes, and metalloproteins.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM309, CHEM509, MB&B509, PHYS339, PHYS539**

Prereq: **None**

MB&B310 Mechanisms of Protein Trafficking Within Eukaryotes

This course surveys the mechanisms of protein trafficking and sorting within eukaryotic cells with an emphasis on the major protein exocytosis pathway.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **None**

Identical With: **MB&B510**

Prereq: **[MB&B208 or BIOL208] OR [BIOL212 or MB&B212]**

MB&B311 Genomics Analysis

This course is an introduction to genomics and analysis for students with interest in life sciences. It introduces current applications of genomics techniques, covers how to build a genomics workflow, and introduces statistical analyses in R programming language. This course assumes little or no prior programming experience and will provide hands-on experience in taking raw next-generation sequencing data through a custom workflow and ending with analyses in R statistical software. This course emphasizes hands-on computational methodology, bioinformatics data analysis, and interpretation of quantitative information. The primary method of evaluation is through written work and weekly homework assignments and the course will increase students skill in

scientific writing and scholarship. Classes will consist of lectures, discussion groups and cloud based computational projects designed to train transferable skills in big data analysis. Lectures, labs, assignments and assessments will promote deep knowledge in genomics and informatics, gaining understanding in the scientific process, thinking analytically and critically about biological questions, and formulating original ideas and testing them with big data. Skills gained during the course will include quantitative, statistical and graphical tools, scientific writing, oral communication and deep thinking about ethics in a genomics-enabled world.

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL310, CIS310**

Prereq: **MB&B181 OR BIOL181 OR BIOL181Z**

MB&B313 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function

This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **NSM-MBB**

Identical With: **MB&B513**

Prereq: **None**

MB&B315 The Regulation of Ribosome Biosynthesis

This course will focus on understanding one of life's original, and still greatest, feats: namely, how cells make proteins. Since early life forms evolved ribosomes several billion years ago, their synthesis, regulation, function, and evolution have been at the core of all aspects of biology.

This act of protein translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course, we will investigate the biosynthetic pathways that are involved in effecting protein synthesis from various approaches. Both prokaryotic and eukaryotic systems will be considered, including the questions of how ribosome biosynthesis and activity is relevant to genetic diseases, cancer, cell growth, and antibiotic activity.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **NSM-MBB**

Identical With: **MB&B515**

Prereq: **[MB&B208 or BIOL208]**

MB&B316 Advanced Topics in Structural Biology

This course will examine how researchers use the tools of structure determination to explore current fundamental questions in the biological sciences. Beginning with a short history of the field of structure biology, we will examine the benefits and limitations of various techniques used to study

protein and DNA structure. We will read primary literary sources on a number of contemporary topics for which structural biology has made important contributions. This may include (but is not limited to) microbial pathogenesis, immunology, gene regulation, membrane protein biology, neurological signaling, signal transduction, and metabolism. This course will explore how the study of structural biology contributes to our understanding and treatment of human diseases, including the development of drugs and other therapeutic interventions.

Offering: **Crosslisting**

Grading: **A-F**

Gen Ed Area: **NSM-MBB**

Identical With: **MB&B516**

Prereq: **None**

MB&B317 Advanced Topics in Recombinant DNA

The breaking and rejoining of DNA molecules is at the heart of so many cell biological processes, including adaptive immunity, the common emergence of new viral variants (such as the flu), the fundamental life cycle of other viruses (such as retroviruses), the prevention of aneuploidy in reproductive cells, the production of chromosomal rearrangements in cancer cells, and the repair of damaged DNA. Used as a tool by molecular biologists, recombinant DNA has led to tremendous insight into cell function, development, and disease. Recombinant DNA methodology is growing in its capacity to precisely change the genes carried by organisms, which has important implications for both the food industry and medicine. In this half-semester course, we will examine primary literature that touches on how recombination between DNA sequences is utilized within cells and as a research tool by humans to promote new genetic outcomes.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-MBB**

Identical With: **MB&B517**

Prereq: **None**

MB&B321 Biomedical Chemistry

This course is designed to explore the molecular basis of disease and treatment options. Topics will reflect the importance of chemistry and biochemistry in the advancement of medicine today and will include treatment of metabolic disorders, rational drug design, and mode of drug action. A large portion of the course will be dedicated to learning computer programs used in computational drug design as part of a final drug design project.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Identical With: **CHEM321**

Prereq: **(CHEM251 AND [CHEM383 or MB&B383])**

MB&B322 Mechanisms of Protein Trafficking Within Prokaryotes

This course surveys the mechanisms of membrane protein topogenesis and protein secretion within E. coli, the quintessential prokaryote, where sophisticated genetic and biochemical analysis has been possible. The course surveys the primary literature with student presentations and a written final examination.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **None**

Identical With: **MB&B522**

Prereq: **[MB&B208 or BIOL208] OR [BIOL212 or MB&B212]**

MB&B325 Introduction to Biomolecular Structure

This course aims to provide a framework for understanding three-dimensional structures of proteins, nucleic acids, and their complexes. The first half of the course emphasizes structural modules and topological patterns in major classes of proteins and nucleic acids. The second part of the course covers novel structural motifs, such as helix-turn-helix, zinc-finger, and leucine zipper, that are responsible for recognition of specific nucleotide sequences in nucleic acids by proteins. Analysis of structures using tools available on the Web and independent exploration of protein and nucleic acid databases are strongly encouraged.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-CHEM**

Identical With: **CHEM325**

Prereq: **None**

MB&B328 Topics in Eukaryotic Genetics: Transcription

This half-semester course will follow two principal themes: We will examine the use of genetic methods in current biological research and apply these methods to address questions about the regulation of gene expression in eukaryotes. Our examination of transcriptional regulation will lead us into the related topics of gene organization, chromosome structure, and signal transduction.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **None**

Identical With: **MB&B528**

MB&B333 Gene Regulation

This course aims to develop a genome perspective on transcriptional gene regulation. The genome sequence, now completed in a number of organisms, is described as a blueprint for development. More than simply a parts list (i.e., genes), this blueprint is an instruction manual as well (i.e., regulatory code). A next critical phase of the genome project is understanding the genetic and epigenetic regulatory codes that operate during development. Through a combination of lectures and discussion of primary literature, this course will explore current topics on promoters and transcription factors, chromatin structure, regulatory RNA, chromosomal regulatory domains, and genetic regulatory networks. We will discuss various "Omics" tools, and in particular, sequencing-based strategies that provide information about the transcriptome and epigenome. We will also discuss current models on how transcriptional regimes unfold during the activation (or silencing) of genes, and how these processes become disrupted in various diseases. Finally, we will consider stochastic attributes of gene regulation that challenge "all or nothing" perspectives on cellular states (e.g., perspectives that genes are either "on" or "off," or that cells are either "differentiated" or not). An overarching theme is how genomes encode and execute regulatory programs in response to environmental and developmental cues.

Prereq: **MB&B181 OR BIOL181**

MB&B334 Stochastic Biology: Randomness and Order in Gene Regulation

While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stem cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B335 Protein Folding: From Misfolding to Disease

Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B340 Practical Methods in Biochemistry

This course centers on currently used techniques for protein separation, characterization, and purification, such as ultracentrifugation, gel electrophoresis, and chromatography. These topics will be introduced within the general context of the behavior of macromolecules in solution. The relative stability of proteins in different media, the forces stabilizing protein structure, and the interaction of proteins will be discussed. We will explicitly consider different techniques used to study proteins. Relatively novel techniques to be discussed include surface plasmon resonance, microarray methods and mass spectrometry, and single molecule microscopy. In the course, we will go through three or four different protein purification protocols and discuss the methods used in each one. We will also touch upon the commonly used spectroscopic techniques used to characterize proteins, including absorption, fluorescence, and circular dichroism. The course will focus on biochemical techniques and understanding the physical principles underlying these techniques and will also discuss tactics for optimizing established isolation and purification procedures and for isolating and characterizing an unknown protein.

The course content is appropriate for advanced undergraduates (juniors/seniors) and beginning graduate students from chemistry, biology, molecular biophysics or MB&B.

MB&B375 The Cell-Division Cycle and Cancer

This course will cover a broad range of topics that are related to the process of cell division. We will discuss how the cell cycle is executed and regulated in a variety of eukaryotic systems. Major consideration will be applied to discussions of cancer and the defects in cell-division regulation that underlie this disease. Some of the topics include growth factors, signaling pathways, apoptosis, cyclin-dependent kinases as cell-cycle regulators, transcriptional and posttranscriptional control of cell-cycle genes, DNA replication, DNA damage checkpoints, and tumor suppressors.

MB&B381 Physical Chemistry for the Life Sciences

The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MB&B382 Practical and Theoretical NMR

Nuclear magnetic resonance (NMR) is an extremely powerful and flexible technique that can be used to analyze molecules sized from just a few atoms up to tens of thousands of atoms. This course will provide an introduction to how NMR spectroscopy works and background on the important theoretical aspects relevant for the most common NMR experiments. Time will be spent gaining practical experience in conducting NMR experiments both during and outside class. The ultimate goal of both the theoretical and hands on sections of this course is to enable you to correctly select and perform NMR experiments necessary to characterize molecules. In addition to learning how NMR hardware is used to produce spectra, we also cover important tasks like sample preparation and the finer points of data processing that will help you get better data. Beyond simple one-dimensional experiments, we will discuss a number of different multidimensional NMR experiments for determining the structures of small organic molecules, including COSY, HSQC, HMBC, and NOE. Furthermore, you will learn how protein structures are solved using 2D and 3D experiments, and how the motion of those proteins can be measured at the atomic level.

MB&B386 Biological Thermodynamics

This course is addressed to undergraduate and graduate students interested in biological chemistry and structural biology. The course presents thermodynamic methods currently used to relate structure to function in biological molecules.

Topics include binding curves, chemical ligand linkages, binding polynomial, cooperativity, site-specific binding processes, and allosteric effects. Several models for allosteric systems, such as the Monod-Wyman-Changeux model, the induced-fit model, and the Pauling model, are analyzed in detail. Applications of these models are illustrated for functional regulation of respiratory proteins and for protein-nucleic-acid complexes involved in control of gene expression.

MB&B395 Structural Biology Laboratory

One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using

typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

MB&B506 Epigenetics

Basic genetics states that individuals with different DNA sequences express different traits. However, a large number of permanent and heritable changes to cells and organisms occur in the absence of changes to DNA sequence. Such epigenetic mechanisms explain a variety of disparate observations, including the ability of a zygote to develop into dozens of distinct cell types in multicellular organisms using one common DNA blueprint, the observation that grandchildren of individuals subject to famine have higher rates of metabolic defects, and the ability of neurons to mediate formation of long-term memories. In this course we will use a variety of examples from cell biology and genetics to examine the template-dependent processes governing the perpetuation of discrete phenotypes. Topics will include the molecular biology of prions (infectious proteins) and environment-induced alterations in gene expression that may be transmitted to offspring.

MB&B513 Molecular, Proteomic, and Cell Biological Analysis of Telomere Composition and Function

This course will focus on a critical feature of the eukaryotic cell known as the telomere, or linear chromosome end. We will discuss the diverse set of critical molecular mechanisms affected by and involving telomeres including chromosome segregation, cellular aging, meiotic gamete production, and cancer progression. We will also focus on the physical architecture of the telomere, how this architecture dynamically alters in different biological contexts, and the types of molecules known to associate with telomeres in multiple model organisms including yeast and human cells. An emphasis will be placed on experimental strategies used for identifying new components of the telomere complex and for understanding telomere function during normal and diseased cellular states.

MB&B515 The Regulation of Ribosome Biosynthesis

This course will focus on understanding one of life's original, and still greatest, feats: namely, how cells make proteins. Since early life forms evolved ribosomes several billion years ago, their synthesis, regulation, function, and evolution have been at the core of all aspects of biology.

This act of protein translation is remarkable, not only for its efficiency and fidelity, but also for the sheer complexity of the reaction, including the wide variety of molecules (e.g., mRNAs, tRNAs, rRNAs, proteins, amino acids) that need to be harnessed for its execution. In this course, we will investigate the biosynthetic pathways that are involved in effecting protein synthesis from various approaches. Both prokaryotic and eukaryotic systems will be considered,

including the questions of how ribosome biosynthesis and activity is relevant to genetic diseases, cancer, cell growth, and antibiotic activity.

MB&B516 Advanced Topics in Structural Biology

This course will examine how researchers use the tools of structure determination to explore current fundamental questions in the biological sciences. Beginning with a short history of the field of structure biology, we will examine the benefits and limitations of various techniques used to study protein and DNA structure. We will read primary literary sources on a number of contemporary topics for which structural biology has made important contributions. This may include (but is not limited to) microbial pathogenesis, immunology, gene regulation, membrane protein biology, neurological signaling, signal transduction, and metabolism. This course will explore how the study of structural biology contributes to our understanding and treatment of human diseases, including the development of drugs and other therapeutic interventions.

MB&B517 Advanced Topics in Recombinant DNA

The breaking and rejoining of DNA molecules is at the heart of so many cell biological processes, including adaptive immunity, the common emergence of new viral variants (such as the flu), the fundamental life cycle of other viruses (such as retroviruses), the prevention of aneuploidy in reproductive cells, the production of chromosomal rearrangements in cancer cells, and the repair of damaged DNA. Used as a tool by molecular biologists, recombinant DNA has led to tremendous insight into cell function, development, and disease. Recombinant DNA methodology is growing in its capacity to precisely change the genes carried by organisms, which has important implications for both the food industry and medicine. In this half-semester course, we will examine primary literature that touches on how recombination between DNA sequences is utilized within cells and as a research tool by humans to promote new genetic outcomes.

MB&B520 Topics in Nucleic Acid Structure

This course focuses on the principles of nucleic acid structure. The scope of this course is to go beyond the common DNA structures such as B-DNA and A-DNA helical structures. The course will concentrate on other DNA structural motifs such as branched DNA, supercoiled DNA, triplex DNA, and quadruplex DNA. Physical characterization of these structures as well as the functional implication of these structures (in terms of DNA replication, transcription, telomeres, etc.) will be discussed extensively. Discussion will also center on the forces that stabilize these structures, such as H-bonding and stacking interactions. The course will also cover other important DNA structural motifs such as curved or bent DNA as found in A-tracts and the relevance of these structures in promoter recognition and gene expression. Important RNA structures, such as ribozymes and pseudoknots, will be discussed. We will also discuss the significance of DNA structural motifs in eukaryotic genomes and the application of bioinformatic tools to search for these motifs.

MB&B523 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

MB&B534 Stochastic Biology: Randomness and Order in Gene Regulation

While much of biology is discussed with assumptions of "determinism" (e.g., the cell is instructed to express a transcription factor that activates a downstream gene in a deterministic and entirely predictable way) and "homogeneity" (e.g., a population of cells all behaving synchronously in the same way), there is a growing appreciation that many biological outcomes are, in fact, statistical phenomena and stochastic in nature. In this half-credit module, we will discuss stochastic behavior in biology from the perspective of gene expression. A focus will be on emerging molecular and cellular techniques that enable observation of stochastic behavior at a single-cell resolution, thus permitting researchers to characterize molecular behavior as it actually occurs, as opposed to averaging a behavior across a population of otherwise diverse individuals. Insights on stochastic behaviors have far-reaching implications in biology, challenging long-held perspectives on transcription, replication, signal transduction, enzymatics, disease states (such as cancer), stem cells, cell differentiation, aging, and adaptive evolution. This course will focus primarily on one of these: stochastic behavior in transcription and chromosome dynamics and its implications to understanding cell and tissue behavior.

MB&B535 Protein Folding: From Misfolding to Disease

Amyloidogenesis, the process by which proteins and peptides misfold to form amyloid fibers, is at the root of several different diseases, including Parkinson's disease, Alzheimer's disease, mad cow disease, and type II diabetes to name a few. This course will focus on current research in the field that seeks to understand why a functional, well-folded protein adopts the misfolded amyloid form. In the course of discussing the misfolded nature of these proteins, we will review central elements of protein structure and stability to better understand the protein-folding landscape and the process of misfolding. We will also discuss how the process of misfolding leads to the different diseases and disease

pathologies. We will read current literature that studies the molecular nature of these diseases and discuss the strategies used to detect, identify and study these misfolded proteins in the body and in the test-tube.

MB&B581 Physical Chemistry for the Life Sciences

The course is concerned with the basic physicochemical principles and model systems essential to understanding, explaining, and predicting the behavior of biological systems in terms of molecular forces. The course integrates fundamental concepts in thermodynamics, kinetics, and molecular spectroscopy with the structures, functions, and molecular mechanisms of biological processes. The objectives of the course are to (1) familiarize life science students at the advanced undergraduate and beginning graduate level with basic physicochemical laws, theories, and concepts important to the life sciences; (2) provide a working knowledge of mathematical methods useful in life science research; (3) develop a critical perspective on explanation of biological processes and understanding biological systems; and (4) survey the main applications of physical chemistry in the life sciences. Theory, methodology, and biophysical concepts are distributed throughout the course.

MUSIC (MUSC)

MUSC102 World Music

This course will explore the diversity and range of musical expression around the world, mapping styles across Asia, Africa, Europe, and the Americas. We will immerse ourselves in a combination of extensive listening to recordings and viewing videos, reading, discussion, in-class performances, and attending relevant cultural events. The world as a whole will be surveyed and regional traits will be identified. Emphasis will be placed on specific pieces, musical instruments, artists, genres, and countries; discovering cross-cultural commonalities and differences; and understanding histories and processes of globalization. Assignments will consist of quizzes on the listening material, Moodle Forum posts, recording and concert reviews, and midterm and final group or solo projects. Three parallel goals will be pursued: 1) to become literate in a broad range of music from around the world; 2) to become familiar with a variety of approaches to understanding music from around the world; and 3) to experience the creative formation of a global music community in microcosm through midterm and final projects.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC103 Materials and Design

Materials and Design is an introduction to some of the elements of musical notation within the Western European musical tradition. Its primary aim is to provide students with a vocabulary and set of tools with which they can describe their experience of music, broadly understood. Focused on music's formal construction and operation within a specific cultural practice, the course also encourages critical listening and thinking skills across genres and geographies. It presumes no prior musical knowledge or training.

This particular version of Materials and Design (Spring 2025) is an experimental version that examines how musical notational and theoretical practices are often encoded in digital audio workstations by teaching Ableton Live alongside introductory music theory. The class culminates in final creative projects developed over the course of the semester. Additional lab sessions outside of class are required for developing both theory and software skills. Prior experience with Ableton or digital audio tools are not required.

Offering: **Host**

Grading: **A-F**

MUSC103Z Materials and Design

Materials and Design is an introduction to some of the elements of musical notation within the western European musical tradition. Its primary aim is to provide students with a vocabulary and set of tools with which they can describe their experience of music, broadly understood. Focused on music's formal construction and operation within a specific cultural practice, the course also encourages critical listening and thinking skills across genres and geographies. It presumes no prior musical knowledge or training. Unlike the Fall and Spring versions of MUSC 103, this version of Materials and Design is expanded in terms of scope and the level of student engagement. In the case of the former, the summer terms will allow for vibrant discussions about the history of musical "materials"--instruments, natural resources, and people--as well as how these materials are "designed"--notational practices, improvisation, the formation of canons, accessibility related to class, gender, sexuality, race, and place of origin. In the case of the latter, whereas the Fall and Spring versions of the course are designed for the quick acquisition of a specific skill set, the immersion format of the summer course will allow for greater and more individualized exploration, including independent and group listening assignments, improvisation exercises, discussion posts, and more.

MUSC104 Rhythms of the World: An Introduction to Rhythm, Meter, and (Musical) Time

In MUSC 104, students explore the diverse ways people around the world use rhythm and time in musical expression. Through a combination of experiential learning and theoretical investigation, students will discover what rhythmic models reveal about music cultures and how these models resonate in us when we put them into practice. Our direct interactions with varied musical traditions will deepen students' rhythmic skills, broaden their musical creativity, and provide a foundation for deeper engagement in Wesleyan's musical offerings.

MUSC105 MF DOOM and Pierre Henry

This course will explore the relationship between hip hop and musique concrete by investigating the works of MF DOOM and Pierre Henry. The music of both employs the full range of sound through techniques of turntablism and sound sampling. In this course, we will explore the basic processes of sampling and field recording and use the compositional methods of DOOM and Henry in the creation of our own pieces. In this process, we will also examine the role of these methods in the history of hip hop and musique concrete. Course work will consist of weekly writing assignments and discussions plus monthly creative compositional assignments. Any choice of sampling software may be used in the completion of those assignments.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC106 A Thousand Years of Music History

This course will offer a history of European art music from the early Middle Ages to the present day. Featured composers will include Hildegard, Machaut, Strozzi, Bach, Handel, Mozart, Beethoven, Debussy, Stravinsky, Beach, and Cage. Students will relate course content to art, architecture, and literature of the

periods, as well as to major economic and historical events. We will explore the technical workings of music and together build a vocabulary for analyzing music and articulating a response to it; music will be interpreted as a cultural phenomenon. By the end of the semester, students should be equipped for a lifetime of informed listening.

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC108 History of Rock and R&B

This course will survey the history of rock and r&b (broadly defined as a conglomeration of loosely connected popular musical genres) from their origins in the 1940s and '50s through the early 1990s. Three parallel goals will be pursued: to become literate in the full range of their constituent traditions; to experience the workings of the music industry by producing group projects; and to become familiar with a variety of theoretical approaches to the music, confronting issues such as economics of the industry, race relations and identities, youth culture and its relationship to American popular culture, and popular music as a creative, cultural, and social force. For the midterm and final projects, the class will form a music industry in microcosm (musicians, journalists, producers, video and sound engineers, visual artists), resulting in audio and video releases and a magazine.

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC109 Introduction to Experimental Music

This course is a survey of recent and historical electronic and instrumental experimental works. MUSC 109 begins with early experimentalists and germinal works of John Cage, then quickly moves to a wide range of composers working with idiosyncratic electronics, invented instruments, intermedia, sound art, and many other areas of sound exploration and inquiry.

Artists works include (and are not limited to) Henry Cowell, Earle Brown, Christian Wolff, Morton Feldman, Anthony Braxton, La Monte Young, Terry Riley, David Behrman, Gordon Mumma, Alvin Lucier, La Monte Young, Muhal Richard Abrams, George Lewis, Roscoe Mitchell, Robert Ashley, Steve Reich, Philip Glass, Meredith Monk, Laurie Anderson, Arthur Russell, John Zorn, and Julius Eastman. The course includes discussions of recent work by composers, performers, and sound artists such as Pamela Z, Tristan Perich, Guillermo Galindo, Lesley Flanigan, Jace Clayton (DJ /rupture), Holly Herndon, Raven Chacon, Jennifer Walshe, and Object Collection.

The course includes lectures, demonstrations, and performances, and occasional visits by special guests.

MUSC110 Introduction to South Indian Music

This course will introduce students to one of the world's great musical traditions, one that has been part of Wesleyan's renowned World Music Program for more than 60 years. Students will learn beginning performance techniques in melody

(raga) and rhythm (tala), the cornerstones of South Indian music. Through a listening component, they will also learn to identify important ragas (melodic modes). Lectures will cover a wide range of topics, including karnatak (classical) music, temple and folk traditions, music in South Indian film, and pop music. Readings and lectures will also provide the historical and cultural context for this rich and diverse musical world and will prepare students for the fullest possible enjoyment of the annual Navaratri Festival in October.

MUSC115 Introduction to North Indian Music

This course will introduce students to North Indian Hindustani classical music, one of the two classical musical traditions of India. Students will learn about the basic concepts of melody and rhythm--the cornerstones of Indian music. Through listening components, they will also learn to sing the basics and identify important ragas (melodic modes) and tal (rhythm). Lectures will cover a wide range of topics, including Hindustani (classical) music, light classical music genres, folk music traditions, music in Bollywood film, and contemporary pop music. Readings and lectures will also provide the historical and cultural context for this rich and diverse musical world.

MUSC116 Visual Sounds: Exploring the Landscape and Architecture of Musical Notation

This course examines a diverse range of musical works seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the 9th century? How do 1960s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater.

One of the reason composers started to experiment with open scores in the 1950s and '60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students. No prior knowledge of musical notation or instrumental expertise is required. Meetings will involve discussion of a wide range of readings with the goal of expanding understanding of multiple relationships between music and visual materials.

Learning Objectives:

- To gain familiarity with the diversity of forms of musical notation.

- To recognize the variable relationships between inspiration, transcription, performance, and recordings.

- To consider musical notation as a form of design, a language code, and a form of translation.

- To develop creative processes and understand the creative processes of others.

MUSC117 Musicking Body

"What is this thing called music?" asks Christopher Small in his book "Musicking" (1998) and observes, "Music is not a thing at all but an activity, something that people do." Taking a cue from Small's concept of "musicking"

as an inherently social and physical process, this course will explore the role of the human body in the act of music performance and the creation of musical meaning. We will discuss interdisciplinary approaches to the study of music as embodied experience, drawing insight from fields as diverse as philosophy, feminist and performance studies, anthropology, ethnochoreology, and ethnomusicology. We will examine the modes, aesthetics, and cultural connotations of bodily expression, movement, and gesture in a variety of music and dance traditions worldwide--from Sufi-shamanic rituals in Central Asia to Indian classical vocal music, and from drumming and martial arts in East Asia to African American popular genres. By engaging with a range of theoretical perspectives and case studies of embodied sounds, we will reflect on the corporeal, sensory aspects of music performance and perception, the tacit nature of learning and transmission, the intersections of human musicking with the environment and technology, and the ways in which the musicking body is entangled with the physical, social, spiritual, and political forces that shape our lives.

MUSC118F Bob Dylan and His World: Sources and Legacies (FYS)

Bob Dylan's songwriting, recordings, and performances in the 1960s are widely recognized as causing a seismic shift in American music and in the youth counterculture. He did not exist in a vacuum, though, and drew deep from the wells represented by songwriter Woody Guthrie, mountain ballad singer Jean Ritchie, and blues musician Robert Johnson, among many others. His meeting with the Beatles and subsequent world tour with the Band caused unforeseen reverberations, such as the Beatles moving into increasingly sophisticated lyrical territory and Aretha Franklin covering a song by the Band. Many artists covered Dylan songs early on (Stevie Wonder, Sam Cooke, the Byrds, and Sonny and Cher), and many credited Dylan with opening up new avenues of creative expression, including Joni Mitchell, who has been recognized as one of the most inspiring and accomplished singer-songwriters of any era. In this course we will explore (1) the sources of Dylan's art; (2) Dylan's albums, performances, and films throughout his career, with a primary focus on the 1960s; and (3) artists

who have been touched by Dylan's legacy, including those outside of North America. We bypass hero worship in favor of understanding cultural and social currents that enable individuals like Dylan to blossom. In addition to collecting, interpreting, analyzing, and presenting evidence as part of written scholarly arguments, which will be stressed throughout the semester, either the midterm or final project may take the form of a creative work other than a paper.

MUSC119F Jazz in the 1960s (FYS)

The 1960s were a turbulent but stimulating time for the world of jazz. The R&B-based soul jazz movement was at its peak and often at odds with the still-developing avant-garde aesthetic. Certain other influences, such as those of Brazilian and African music, were becoming widespread in jazz for the first time. Older forms of jazz like bebop, big band music, and traditional jazz (aka "Dixieland") were struggling to remain viable and relevant. Rock music's surge in popularity was threatening the commercial solvency of jazz while acting as a musical and cultural force to which all jazz musicians had to react in some manner. Meanwhile much of this decade's jazz is inexorably linked to the political and social upheaval of the era, particularly those aspects relating to Black Americans' sense of identity and struggles for equality.

In this course, we will broadly explore the various movements that made up the jazz of this decade. We will delve more deeply into the music of some of the most important figures in jazz during this time, such as Art Blakey, John Coltrane, Miles Davis, Ornette Coleman, Charles Mingus, Stan Getz, Rahsaan Roland Kirk, Jimmy Smith, Yusef Lateef, and Sun Ra. We will study musicians who typified a particular movement, those who assimilated several into a personal style, and those who moved freely among factions. All the while, we will be contextualizing the music within the social and political climate of the decade and the broader artistic and commercial landscape of music at the time.

MUSC120F Music, Place, and Culture: An Exploration of African American Soundscapes and Traditions (FYS)

This course will explore African American soundscapes and traditions through the lens of New Orleans, a cradle of jazz, brass bands, Mardi Gras celebrations, and more. From the historically significant grounds of Congo Square to the mean streets of the Calliope; from the moving voice of gospel singer Mahalia Jackson to the edgy flows of southern hip-hop artist Mystikal; from the sweet trumpet sounds of jazz pioneer Louis "Satchmo" Armstrong to the emphatic full body twerk of bounce artist Big Freedia; from the inspiring soulful sounds of Tank and the Bangas to the powerful sonic echoes of parading brass bands, New Orleans is a place where music and culture bubbles up from the streets and travels throughout the world.

New Orleans is also a place of perpetual marginalization stemming from systemic racist policies that often lead to life-threatening forms of policing and gentrification. These policies disproportionately affect the very African American communities that provide the world such rich, and sometimes healing, iconic sounds. New Orleans serves as an ideal place--bearing strong African American musical roots--to study the manner in which culturally invested people

understand, negotiate, and produce space musically. Course participants will immerse themselves in the varied genres of African American music-making traditions through reading and writing assignments, in-class discussions, active music listening, video screenings, creative projects, and possible guest artist engagement. Music genres to be studied include jazz, gospel, soul, funk, blues, hip-hop, rap, zydeco, and bounce.

MUSC122 Sample, Remix, Reuse, and Replay: Approaches to Musical Adaptation in Audiovisual Culture

Many of the musics we listen to and encounter are palimpsests, collages, and assemblages. Texts are layered upon and juxtaposed against pre-existing texts, creating polyvocal dialogues and contrasting and complementary systems of meaning. This class introduces students to questions and controversies of adapted and remixed musical media in 20th and 21st century society, analyzing the ways music and other texts and materials (e.g., paintings, plays, places, novels, technologies, genres, historical events, preexisting music) are adapted through processes of revision, remix, remediation, sampling, restaging, and reinterpretation to create new layers of meaning. The course will consider the roles of film, television, video games, music video, digital audiovisual formats and technologies, and related audiovisual media. We will journey from the recycling of preexisting classical music in video games to the remediation and transmission of live operas to the movie theater screen in the MET Live in HD series, from compositions that translate the visuality of iconic paintings into sound to the practice of remix and sampling in hip hop culture, from the digital adaptation of operatic conventions in Final Fantasy VI to cover versions that complicate listeners' expectations of gender performance, from the live performance of video game soundtracks by a symphony orchestra in Video Games Live and Pokémon: Symphonic Evolutions to the compilation mixtape scores of Hollywood films, and from Tan Dun's Internet Symphony for the YouTube Orchestra to how the urban neighborhood of Washington Heights in New York City is repurposed, staged, and cast as a central character in In the Heights or how American political history is adapted and revitalized in Hamilton. Themes in the course include, among others, the changing roles and responsibilities of musicians in an age of digital globalization; the power of musical media and referential texts to structure human experience; and the role of the composer and listener as manipulators and interpreters of musical meaning across comparative audiovisual texts. This seminar draws on the classroom community's interdisciplinary backgrounds and interests as well as readings and case studies that cross and challenge disciplinary boundaries. Students can achieve success in this course without previous musical knowledge.

MUSC122F Writing about Sound: What the audible can teach us about our world

Sound speaks volumes, even if what it tells us can be tricky to put into words. If we listen critically, sound can teach us important lessons—like how technology is evolving, society changing, and what it means to be human. That is why sound has recently preoccupied the academic study of music, visual arts, media, ecology, race, disability, architecture, economics, and the history of science. Touching on each of these areas, this course blends core texts and case studies in the interdisciplinary field of sound studies to offer something interesting to all students, regardless of their chosen major. As part of Wesleyan's first-year seminar program, the course has two aims: to explore how philosophers, ethnographers, practitioners, and journalists have written about sound; and to help students cultivate good habits for putting their own arguments into writing. There are no prerequisites to join the class, and assignments will focus on developing weekly reading responses into longer-form essays.

MUSC124F Mapping Culture (FYS)

What is a culture, how can it be intimately wrapped up in a location, and how can that be mapped out to better understand its inner workings? In the face

of globalization and pervasive online communities, what can conventional wisdom--"location, location, location" and "All politics is local"--tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location. From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip-hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti) and social formations. Haight Ashbury (San Francisco) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models as students embark on their own to map out a culture of their choice as their midterm and final projects, using Google maps, Story Maps, or some other interactive multimedia format. Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC125 Music and Downtown New York, 1950-1970

This course will explore the history, interconnections, and simultaneous flourishing of four distinct music communities that inhabited and shaped downtown New York during two particularly rich decades in American culture: Euro-American experimentalists; African American jazz-based avant-garde; blues and folk revivalists; and Lower East Side rock groups. Much of the course will be devoted to understanding their points of convergence and divergence, especially in conversation with broader currents of the time (e.g., the Civil Rights Movement and related notions of freedom, shifting youth subcultures, and avant-garde aesthetics). We will read about and listen to recordings of a wide variety of musicians, identify aesthetic and cultural trends, and study the local industry that supported them. Student research, interpretation, and writing will be emphasized throughout the semester.

MUSC126F Poetry and Song (FYS)

Students will read poems by major poets in English (including Yeats, Shelley, Shakespeare, many living poets) and study settings of these poets by composers (Ives, Barber, Britten, etc.). We will also study the lyrics of many recent popular songs that can be read as poetry, including lyrics of Steely Dan, Patti Smith, and of course The Beatles. The final topic of the class will be, pro and con--did Bob Dylan deserve the Nobel Prize for Literature?

MUSC127 C-Pop in the Shadow of a Rising China

Explore the emotional aspect of a rising China and understand the inner feelings of contemporary Chinese youth through C-pop. How did "red songs" from the Cultural Revolution become popular songs in the 21st century? How did an "extremely soft and feminine" voice threaten the Chinese Communist Party? Why do songs from the "jazz capital of the Orient" trigger nostalgia? How do underground rock and punk bands negotiate their existence? How is rap in China different from that of the US or anywhere else? How do Chinese artists deal with LGBTQ issues and ethnic minority issues in popular music? Why do TV variety shows matter? What future is there for China's burgeoning "internet songs"? Popular music in a rising China presents complex issues of state-sponsored popular culture intersecting with bottom-up popular taste and desire, the repressive collective "we" intersecting with the resilient individual "I" in artistic expressions, the imagined "ancient China" intersecting with contemporary sound and technology, and the intensifying nationalistic sentiment intersecting with China's expanding global ambition. This course offers students opportunities to explore aesthetic, political, and cultural meanings expressed in China's popular music from the 1980s to the present. Chinese language knowledge is not necessary.

MUSC128F Music and the Moving Image: From Music Video to Film to Digital Media (FYS)

On August 1, 1981--the day that a cable TV channel playing music videos 24/7 made its debut--the inaugural video aired on MTV by the band The Buggles announced to viewers, "Video Killed the Radio Star." Since the launch of MTV, music videos have shaped popular culture, and their production, narrative, multimodal, and editing aesthetics have influenced other musical screen media, including film, commercials, television title sequences and end credits, film trailers, live concert films, video games, YouTube fan remixes and more. The development of digital new media technologies made the production technologies once only accessible to commercial record labels and production companies available to fans and consumers on their computers, cameras, and mobile media devices. This course explores the relationships between music and moving images (e.g. television, film, computer, video games, mobile media, digital media), and how the music video format has influenced modes of music making, performance, reception, and circulation. Music videos have shaped the aesthetic style of a wide range of screen media genres, serving as a form of branding popular music and artists, introducing experimental and avant-garde techniques to a mass audience, and facilitating participatory fan musicking. This course thinks deeply about several key issues concerning music and moving images (e.g. virtuality, identity politics, cross-cultural exchange, participatory musicking, fandom, virtuosity, adaptation, branding, liveness, nostalgia), examining how screen media with their visual and auditory content can be listened to and read as cultural texts.

Case studies in this seminar range from the history, genre expectations, and experimentalism of music videos to ethnographic filmmaking, from the visual album (Beyoncé's *LEMONADE*) to fan produced video game music machinima, from the sound design of documentary film to the movie musical, from Hollywood compilation soundtracks to the pace, camera angles, and dance sequences of post-MTV Bollywood film, from 8-bit video game sound to the music pedagogy of children's television programs (Sesame Street's "Geometry of Circles" scored by Philip Glass), and from the use of pre-existing music in television commercials (United Airlines' use of George Gershwin's *RHAPSODY IN BLUE*, Michael Jackson's "Billie Jean/New Generation" for Pepsi), video games (*ETERNAL SONATA*, *TETRIS*), and mobile media apps (the Clapping Music app, the John Cage Prepared Piano app) to expressions of Indigenous musical modernity (Tanya Tagaq's multimedia collaboration *NANOOK*, the Anishinaabe singing mobile game app *HONOUR WATER*, the soundscapes of the Iñupiat Alaskan Native video game *NEVER ALONE*).

MUSC129 The Art of Listening

Over the 20th century, the advent of electronic sound recording and transmission triggered rapid changes in all forms of auditory culture. We will examine this evolution through the different approaches to listening that emerge with the concepts of soundscape, sound object, sound art, and sound design. We will give particular attention to the artists and composers who explicitly shaped these concepts through their work. This includes figures such as writer William S. Burroughs, composer John Cage, singer Bing Crosby, pianist Glenn Gould, theatre director Elizabet LeCompte, filmmaker Walter Murch, artist Max Neuhaus, composer Pauline Oliveros, guitarist Les Paul, composer R. Murray Schafer, and theorist Pierre Schaeffer. In addition to readings, listenings, and viewings, class members will perform works by composers such as Maryanne Amacher, John Cage, Alvin Lucier, and David Tudor and create sound works of their own. The class should be of interest to anyone who anticipates working with sound in their creative endeavors, whether as a musician, artist, dancer, or filmmaker.

MUSC130F Wagner and Wagnerism: Richard Wagner's Music and Influence from the 1840s to the Present (FYS)

Richard Wagner is perhaps the most influential composer who ever lived. Not only an influence on every musician who followed him, he has also had enormous influence on literature, the theatre, visual arts, and even politics. His music is beautiful but controversial. His ideas range from the most exalted, idealistic visions of the future and human possibility to some confused political notions and a particularly virulent antisemitism. In the words of one of his countless biographers, "Humanity has paid dearly for the Wagnerian patrimony." He was a particular favorite of Hitler, but also of W.E.B. Du Bois. Can Wagner and his legacy be redeemed? Should it? The first step is to understand exactly what this complicated man and his long shadow are all about.

MUSC133F Caribbean Connection: Music and Culture of Trinidad and Tobago Music (FYS)

MUSC 133F will examine the history and development of three major genres of music from Trinidad and Tobago: Calypso, Soca, and Chutney music. In this course we will explore issues relating to culture, tradition, colonialism, gender, identity, religion, and sexuality in Trinbagonian party music. We will survey scholarly material as we listen and analyze the lyrical and visual components found in popular music videos, as well as the party/fete arena, to gain a better understanding of how these styles of writing and visual portrayals have shaped Carnival music today. Additionally, we will begin this course with an introductory examination of the musical traditions within some of the Spanish, French, Dutch, and English-speaking Caribbean, ending the course by probing the many ways Caribbean countries connect culturally and historically.

Although this is not a performance-based course, students would have a firsthand opportunity to play the steelpan and auxiliary percussion instruments as we learn about the invention of the instrument, as well as hear directly from Trinbagonian musicians and other Caribbean musicians via zoom.

Some styles of music explored in this course are: Tamboo bamboo, calypso, soca, chutney, chutney-soca, Jamoo, shango (orisha), tassa drumming, rhythm sections (folk drumming), steelpan, extempo, parang (parranda), parang-soca, zess, zouk, ska, rocksteady, reggae, reggaeton, afro-cuban, merengue, bachata, and vodou-jazz.

N.B. This course is open to ALL students and requires no prior knowledge of or experience in Caribbean music.

MUSC201 Tonal Harmony

This course continues the work of Materials and Design, with a greater focus on the analysis of Western European music from the Common Practice period (1700-1900). Through activities such as model composition, listening assignments, and written exercises, students will deepen their understanding of harmony, melody, and form idiomatic to music of the late Baroque, Classical, and early Romantic periods. Although the repertoire for the course is drawn predominantly from Classical music as a specific cultural practice, other topics for elaboration will include jazz and popular music, musical theatre, and others

at the suggestion of the students. In weekly labs, students will acquire greater agility with sight-singing, dictation, and keyboard skills, using solfège.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC103**

MUSC202 Theory and Analysis

This course focuses primarily on two aspects of Western tonal music: harmony and form. Harmony is the study of chords: their individual qualities and configurations, their relative importance and function within a given musical context, and ways of moving between them. We will review the treatment of diatonic harmonies and then expand our palettes through sonorities that borrow from or lead to new key areas. Forms, treated in the latter part of the course, are common patterns of repetition and contrast used to structure diverse musical works from pop tunes to symphonies. Working from detail to whole, we will learn how composers and songwriters construct motives, melodies, songs, and large-scale pieces. In addition to these topics on pitch relations and structure, this course contains a short unit on rhythm and meter. While we'll focus predominantly on European art music repertoire, we will also examine how harmony, rhythm, and form function in other musical traditions. Assignments and activities will include reading texts by composers and scholars, analyzing scores and recordings, composing, listening, singing, and keyboard playing.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC201**

MUSC203 Chromatic Harmony

This course is an investigation of the tonal system as it functions in extreme situations: selected highly chromatic passages in Mozart, Beethoven, and Schubert; the more adventurous compositions of Chopin and Liszt; Wagnerian opera-drama; and late-19th-century works in which the tonal system approaches collapse (Hugo Wolf, early Schoenberg). Recently developed models from the music-theoretical literature will be introduced. Chromatic harmony will be considered from both technical and expressive points of view.

MUSC208 Post-Tonal Music Theory

At the dawn of the 20th century, European composers began to experiment with a radically new and completely decentered tonal language. Leaving the practice of tonality behind them, these composers used unorthodox numerical relationships to create formal links and motivic connections between the sounds of their compositions. Post-tonal theory represents the body of scholarship that attempts systematically to examine the formal procedures and properties associated with this modernist music; it also represents one attempt to understand the relationships between musical pitches that hold outside the framework of tonality. This course will serve as a general introduction to post-tonal music theory and will also serve as an introduction to the music of the Second Viennese School: Arnold Schoenberg, Alban Berg, and Anton Webern. Beyond the music of these composers, we will also contemplate applications of post-tonal theory to more recent music.

MUSC219 I am the Loudest Sound in This Room // I am the Softest Sound in This Room

I am the Loudest Sound in This Room // I am the Softest Sound in This Room (MUSC 219) examines the use of feedback-based systems in performance, composition, and sound art. Particular emphasis will be given to the creation and exploration of recursive systems, starting with Alvin Lucier's seminal work *I am Sitting in a Room*. The class will overlap with explorations of instrument design, acoustics, orchestration, improvisation, idiosyncratic electronic systems and programming, and performance. Students will be encouraged to create original work as part of the class. The class will use softwares such as Max/MSP, Reaper, and other systems as necessary for the class.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC220 Composing, Performing, and Listening to Experimental Music

This is a first course in experimental music composition with a focus on live electronic and electroacoustic music. The course uses freeware tools such as SuperCollider 3, Spear, and Audacity to enable students to work from their own computers. The course introduces those aspects of acoustics, psychoacoustics, and audio engineering relevant to composing music, designing interactive electronic instruments, and conceiving self-sustaining sound installations. Course work consists of weekly creative assignments taking the form of both short, original compositions and realizations or transcription of works by others, and two larger compositional projects. The online class session focuses on technical issues, while the extended session allows time for audition and discussion of assignments and relevant compositions from the literature.

Offering: **Host**

Prereq: **MUSC109**

MUSC222 Sound Art, Music, and Interactive Media

The focus of this course is on creative projects in digital media conceived in relation to historical considerations of these same techniques. Recording, amplification, and radio transmission have exerted a profound effect on musical practices of all forms since the beginning of the 20th century. In the period immediately after World War II, composers and artists began to focus on changing the relation of composers, performers, and listeners to sound in response to those techniques. We will consider those artistic strategies and the role they have played in shaping musical genres such as musique concrete, serial and spectral composition, interactive computer music systems, circuit bending, and entirely new genres such as sound, video, and performance art. Student

projects will be focused on the creation of music, installations, and performances that respond to those ideas and issues. Our primary tool for those projects will be MAX/MSP/Jitter, a software environment designed to enable the composition of real-time interactive sound, video, and network connections.

The fundamental goal of this course is to develop the combination of technical skills and historical awareness needed to creatively engage the ever-expanding accumulation of data and social media that is currently enabling a new period of change in artistic practice.

Offering: **Host**

Grading: **A-F**

Identical With: **DDC223**

Prereq: **MUSC103 OR MUSC201**

MUSC225 Sound Systems and Chamber Electronics

A course in live electronic music centered on the transformation and spatial redistribution of sound. Coursework includes individually creating interpretations of fixed media work (by composers such as Eliane Radigue, Luc Ferrari, Robert Ashley) for specific spaces using a sound system designed for that space and that piece. Collectively we will prepare realizations of ensemble pieces that played a pivotal role in the development of this music (such as John Cage's *Cartridge Music* and David Tudor's *Rainforest IV*). Term projects will take the form of concert music or sound installation or other hybrid forms.

On a technical level we will explore different generations of electronic

instruments and instrumentation drawn from Wesleyan's World Instrument Collection. This ranges from found objects such as slinky's and bird calls to Moog and Arp synthesizers and guitar pedals and other idiosyncratic synthesis devices. We will expand this vocabulary with digital sound techniques using SuperCollider 3, a free music programming environment that extends the DIY sensibility to software.

Offering: **Host**

Prereq: **None**

MUSC226 Field Recording

Behind every sound we hear while listening to music, watching television, playing games, or browsing the internet, an incredible amount of thought went into how to best capture and reproduce it. There are so many amazing sounds, and having the skillful ingenuity to capture those moments, often outside the convenience of a studio, is key to ensuring the ephemeral sonic elements in

our world are incorporated into the lives of anyone who wants to listen. The practices discussed in this course will be focused on both the flexibility and practical considerations of creating from a home studio in the 21st century, and framed to fit a range of artistic and professional endeavors such as album production, broadcasting, ethnographic documentation, and sound recording for visual media. This course will illuminate every step of that process, from choosing equipment for making a particular recording, to editing, cleaning up, and mastering the deliverable result, while also touching on specific historical and technical elements of recording technology. By the conclusion of this course, students will have the foundations to share the sounds they hear--in the way they want them to be heard--with the world.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **HA-DDC**

Prereq: **None**

MUSC227 Sound Production

Presenting art conceived as sound goes far beyond setting up a pair of speakers. With the immersive potential of new audio technologies, artists are empowered to think outside the box and create unique super-systems to express themselves. These endless possibilities can be immensely exciting or potentially overwhelming, depending on how much an artist is able to internalize where art and technology overlap. This course will prepare creative thinkers to incorporate audio into their work by establishing a fundamental understanding of modern speaker/transducer designs and configurations, FOH mixers and large-scale audio routing/processing technologies, control interfaces/protocols for producing and interacting with sound, basic room acoustics and strategies on maximizing the potential of a space, and methods of incorporating microphones/live audio into a project. By the end of this course, students will have the tools they need to set up and manage unique and complex audio systems, and better realize their relationship between art and technology.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **HA-DDC**

Prereq: **None**

MUSC230 Music Theater Workshop

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts.

MUSC232 Instrument-Body

The ancient Greek word *organon* meant both instrument and sense organ, hence the development of a shared word in English for organ (as in a Hammond B3 organ) and organ (as in a kidney). This etymological overlap opens onto a set of generative questions into the nature of instruments: Are they inside or outside the body? Is the body an instrument? If the body is an instrument, who plays it? If an instrument is outside the body, what kind of object is it--a fetish? a prosthetic? an enhancement? an extension? a tool? a commodity? a technology?--and what does it do to the player? Can experimenting with new body-instrument relations become a pathway towards re-organ-izing the body and its relations? Instrument-Body is both a seminar and a studio course that takes these questions as a point of departure for creative and critical experimentation. We will read widely across the fields of musicology, art history, performance studies, queer studies, and critical race studies to investigate questions of instrumentality, embodiment, and technology. In addition, we will create performances across three units: "make an instrument," "break an instrument," and "make yourself an instrument." Students who already play instruments are encouraged to enroll, as are students that have no preexisting relationship to musical instruments.

MUSC240 Visual Sounds: Exploring the Landscape and Architecture of Musical Notation

This course examines a diverse range of musical works seeing their notation as a process of translation, transformation, provocation, and imagination. Tracing a thread from medieval notations through to contemporary scores, we investigate the shifting tensions between the sonic and the visual over the long arc of music history. Why were sounds inscribed in the ninth century? How do 1960s scores reflect the radicalism of their era? Connections across centuries help shed light on musicians for whom the creative potential of notation surpasses its descriptive and prescriptive functions. Featured composers will include Hildegard of Bingen, Guillaume de Machaut, La Monte Young, George Brecht, Earle Brown, John Cage, Cornelius Cardew, Cathy Berberian, Yoko Ono, Pauline Oliveros, Mark Applebaum, and Claudia Molitor. Complementary materials comprise visual art, concrete poetry, and live theater. One of the reasons composers started to experiment with open scores in the 1950s and 60s was to develop a kind of musical notation that could be read, and therefore performed, even by those who did not identify as musically literate. This course is, accordingly, open to all students. No prior knowledge of musical notation or instrumental expertise is required. Meetings will involve discussion of a wide range of readings with the goal of expanding understanding of multiple relationships between music and visual materials. Learning Objectives: To gain familiarity with the diversity of forms of musical notation. To recognize the variable relationships between inspiration, transcription, performance, and recordings. To consider musical notation as a form of design, a language code, and a form of translation. To develop creative processes and understand the creative processes of others.

MUSC241 Mystical Visions, Medieval Women, and the Performance of Early Music

This course challenges the traditional male-dominated history of early music by focusing on the women who commissioned, performed, heard, and composed music in pre-modern times. Discovering love lyrics that express desires, conflicts, and sufferings that seem equally true today helps collapse the notion of linear time. In addition to finding similarities across centuries, we will draw from multiple disciplines, including comparative literature, religion and cosmology, and gender and sexuality studies. An interdisciplinary approach will guide our investigation of the mystical and visionary aspects of medieval music. Topics to be explored include communal music-making practices, authorship, power and politics, and the multiple civic and social functions of music. We investigate how the music of worship differs from that of romance, public ceremony, and private entertainment. These inquiries help to cultivate skills not only to appreciate our musical heritage but also to better understand contemporary social and cultural practices.

Various "medievalisms"--modern interpretations of the medieval--are explored, to show how musicians continue to interact with early practices in new and exciting ways. This allows us to talk not only about performers of historical early music, but also about composers like Kaija Saariaho, folk groups like Vulcan's Hammer and Folkal Point, and pop artists like Janelle Monáe and Florence Welch. The creation of medievalist music for films and video games is also relevant, as an arena where musicians reimagine the medieval for new audiences.

Coursework involves learning through performance, examination of manuscripts, research, writing, transcription, and editing. There are also weekly listening assignments and readings.

MUSC242 Baroque and Classical Music

This discussion-based seminar provides an overview of the history of Western European music from the Baroque and Classical periods (roughly 1600 to 1800). More than a survey course, however, it engages students in some of the significant debates around the character and function of music, with a special focus on music's role in defining the modern era. Together, we will consider (and in some cases, reconsider) the following questions: How does music express? What were some of the paradigms for conveying meaning with music? Why does music feature so prominently in contemporaneous discourses as varied as the natural sciences, aesthetics, rhetoric, and others? By the end of the semester, students should expect to acquire some techniques for articulating their experience of music and relating that experience to compositional procedures idiomatic to the style. Repertoire to be considered will include works by Monteverdi, Lully, J.S. Bach, Haydn, Mozart, and Beethoven. We will also devote time to exploring the role of this music in cultural exchanges in Asia and the Americas. Faculty with musical notation is expected.

MUSC243 Music of the 19th Century

The nineteenth century is a time of great change--politically, socially and artistically. We will study many of the major composers, and major trends, through their relationship to Richard Wagner. Wagner's life intersects with almost every major figure in nineteenth century music, in one way or another, and his legacy defines much of the twentieth century, extending all the way to today. In addition to European composers, we will study selected composers in the United States as well. Europeans include Beethoven, Chopin, Berlioz, Schubert, Liszt, Louise Ferenc, Brahms, Arthur Sullivan, and Hugo Wolf. Americans include Frank Johnson (the first published African American composer), Louis Moreau Gottschalk, and "the Beethoven of America," Anthony Philip Heinrich.

MUSC244 Music of the 20th Century

In the 20th century, European and American art music (classical music in common parlance) became increasingly fragmented. Composition splintered into diverse idioms and methods: the minimalism of Steve Reich, impressionism of Claude Debussy, and indeterminacy of John Cage, to name only a few. Often, the proponents of one school vehemently rejected the techniques of the others. Perhaps as a result of such schisms, the audience for classical music--particularly contemporary composition--diminished in size, to the point that critics were hailing the "postclassical era" by the 1990s. The concert hall ceased to be a showcase for contemporary compositions and became a kind of museum devoted to preserving (and occasionally reinventing) canonic works of the past. Commercial popular musics such as jazz and rock eclipsed classical music in audience appeal and relevance. While some composers attracted listeners through their interface with folk and popular musics or with film (e.g., Aaron Copland, Leonard Bernstein), others preferred to cultivate small but devoted audiences of initiates for their challenging works (e.g., Milton Babbitt, Arnold Schoenberg). Meanwhile, the advent of mass-produced sound recordings enabled music from distant times and places to be preserved, transported, and heard on demand, with profound consequences for the creation, performance, and consumption of music. In this course, we will explore the many trends that have marked classical musicking in the 20th century. Through extensive listening assignments and primary source readings, we will meet many of the century's influential composers, performers, critics, record producers, pedagogues, patrons, and listeners. In discussions and writing, we will explore what the past century's legacy means for us as musicians and listeners today. While previous experience with music is useful, it is not a requirement for success in this course.

MUSC245 Music in the United States in the Nineteenth Century

The musical culture of the United States in the nineteenth century is very rich and diverse. American composers of the period are far better, and more interesting, than is generally assumed. This course will focus on music of the concert hall, church music, and popular music. Composers studied will include Anthony Philip Heinrich ("the Beethoven of America"), George Bristow, Francis "Frank" Johnson (the first published African American composer), and the early compositions of Amy Beach, Charles Ives, and others whose careers spill over into the twentieth century.

This course will explore cultural settings and key elements in development of the orchestra as a performing force, conducting as an art form, organology, and music history, by means of tracing the evolution of a single genre: the symphony (from 1750s through 1950s). Preliminary list of composers includes J. Haydn, W. A. Mozart, M. Martines, L. v. Beethoven, J. Bologne, F. Schubert, F. Mendelssohn, H. Berlioz, P. Tchaikovsky, J. Brahms, A. Dvorzak, A. Beach, L. Farrenc, G. Mahler, J. Sibelius, F. Price, W. Grant Still, R. Vaughan Williams, D. Shostakovich, S. Prokofiev.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-MUSC**Prereq: **None****MUSC248 Music in Outer Space**

Very few people have traveled out of the Earth's atmosphere, but many composers have voyaged extensively in the conceptual realms of outer space. Throughout human history, musicians have been inspired by the "harmony of the spheres," knowledge of the universe, celestial bodies, and planetary motion. From Pythagorus, Boethius, Philippe de Vitry, John Dunstaple, Johannes Kepler, Gustav Holst, Györgi Ligeti, John Cage, Judith Weir, Alvin Lucier, Brian Eno, Karlheinz Stockhausen, Sun Ra, and Jeff Mills to the 1977 Voyager Golden Record, Hawkwind, David Bowie, the Grateful Dead, Pink Floyd, John Williams, Kraftwerk, and the Beastie Boys, we explore the importance of constellations to musical creativity, and the ways in which cosmic sounds have influenced artists. The course will approach the topic through various interpretative lenses. Readings are drawn from a wide range of sources--theoretical, scientific, poetic, and experiential. Discussion topics will include theories relating to the music of the spheres, the study of geometry and proportion, astro-acoustics, sonification, the use of metaphor (in naming the planets in our solar system, lunar and solar imagery), and the influence of imagined and documented sounds of space on composers past and present. Students will each construct their own soundscape of space in the near future. Musicians, astronomers, theorists, and composers: All are welcome.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-MUSC**Prereq: **None****MUSC249 Calderwood Seminar in Public Writing: Music Journalism and Public Musicology**

The internet has revolutionized how people consume music, how they read and write about it. This course will offer an introduction to music journalism as a practice of public musicology, one that has become central to contemporary life. Students will analyse and apply techniques used to write about music for the wider public, learn how to develop ideas, sharpen critical skills, and complete a series of reporting assignments. We will look at the history and function of music criticism, assess different kinds of music writing, discuss changing perceptions of music as a public art form, and the role of journalism in cultural preservation. The class will write and collaboratively edit a series of reviews, and make a short radio feature in collaboration with WESU (88.1FM). The reviews will focus on recordings, live events, and books on musical cultures. Students will have the opportunity to engage with professional music writers, which will help to prepare them for later work in music journalism, or in arts or media organizations.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-MUSC**Prereq: **None****MUSC250 Film and Folk Music of India**

What is film music culture in India? What is folk music in India today? How do these genres interact and influence one another? Most research on the music of India has focused on the classical systems. However, for many people, the most important musical expressions found in their personal and social lives are film and folk musics. Even though film music is considered to be entertainment, it reflects almost all aspects of Indian music and culture. Students will be introduced to the culture and heritage of India. Film and folk music will be analyzed with reference to ancient and modern musical treatises. Topics covered will include the diverse cultures within India and its global diaspora. Students will be encouraged to sing or play the pop and folk songs of India.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-MUSC**Prereq: **None****MUSC252Z Expressions of Indigeneity in Music and Sound**

What would an opera about Thanksgiving composed by a Native American artist sound like? To explore the politics of representation in Indigenous sound and music, this course draws students into a global dialogue about Indigeneity. Topics include the interplay of tradition and modernity, the impact of colonization, music production and consumption, and the politics of knowledge production through various media. In addition to reading and listening assignments, the students will engage in a local ethnographic project--creating an Indigenous sound map in the locale of their choice. For the final project, informed by readings and listening in class, students can choose their formats, either a research project, a creative project, or a combination of both.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-MUSC**Prereq: **None****MUSC261 Music and Modernity in China, Japan, and Korea**

This course examines the relationships between music and modernity in China, Japan, and Korea and the interactions between the impact of Western music and nationalism and contemporary cultural identities. In particular, it explores the historical significance of the Meiji restoration on Japanese music tradition; the Japanese influence on Chinese school songs; the origins of contemporary music in China, Japan, and Korea; the adaptation and preservation of traditional music genres; and the rise of popular music and the music industry. We will focus on the cultural conflicts encountered by East Asian musicians and composers and their musical explorations and experiments in searching for national and individual identities in the processes of nation-building and modernization. The course aims to provide knowledge on East Asian music genres, insight on the issues of global/local cultural contacts, and a better understanding of music's central role in political and social movements in 20th-century East Asia.

This course is open to intermediate learners, advanced learners, and native speakers. The discussion topics will be broadly approached, utilizing various music video examples as vehicles to deeper social, religious, and cultural understanding. These various music examples are from ancient to current Korean music practices. Historically, Korean music was integrated with dance, literature, art, song, and ceremony. Therefore, music (sound) was not separated from other

elements but was essential to daily life, community activities, religious practice, artistic collaboration, costumes, food, and the very soul of the Korean people. Traditional Korean music is imbued with the history of court ritual, folk village stories, and myths, in addition to religious rituals of Confucianism, shamanism, and Buddhism. The music is central to a broad range of cultural, social, and humanitarian aspects of Korean life.

Korean traditional music has been evolving for over 2,000 years, and it is now rapidly moving in many directions with contemporary life and influence from Western culture. Historically, music was created as a group activity by village people oftentimes working with a spiritual leader shaman. Currently, the most acceptable music is created and performed by individual performers as a repertoire for TV programs. In the 21st century, as society changes, Korean music is changing also, with differing values of popular culture brought in through recordings, film, and of course the internet. Young musicians go beyond traditional music and are developing a new repertoire that mixes Western instruments or electronics with various traditional instruments. This is a new Korean identity. Newly created Korean ensembles and bands such as K-pop are successfully beginning to dominate the international music scene. In contrast to the formerly inner-looking "Hermit Kingdom," Korea has now entered into instant global communications with the production of more individual music in various styles.

MUSC272 History of Jazz in American Culture

This course will provide students with a broad-based literacy in the history of jazz while examining its significance and impact within American culture. As a musical style, jazz has been a staging ground for working out some of the most defining issues and aspects of American culture, including the dynamics of race relations, the articulation of gender roles and class distinctions, artistic expressions of freedom and democracy, the creative possibilities of the encounter of European- and African-based cultures on American soil, assimilation versus appropriation, and an extraordinarily influential aesthetic of cool. Jazz was the dance and listening music of choice for most Americans from the 1920s through the '50s, until it was displaced and pushed to the margins by rock and soul in the 1960s. But it has remained an inspiration for diverse artists in rock and rap up to the present day, including Kendrick Lamar's jazz-drenched "To Pimp A Butterfly" and Janelle Monae's 21st-century Afrofuturism deeply indebted to Sun Ra.

We will explore the early 20th-century origins of jazz in New Orleans, its rise as America's popular dance music in the 1920s and '30s, a shift to a more concert art-oriented form in the 1940s and '50s (representing the epitome of cool and hipness), avant-garde expressions of the 1960s (representing a new kind of universal spirituality), its move into rock and the growth of artist-based

collectives of the 1970s, and its emergence in hip-hop samples in the 1990s. We will learn about major artists and their classic recordings, including Billie Holiday, Thelonious Monk, John Coltrane, and Miles Davis, among many others, as well as new directions from recent generations (bringing in guest music department faculty). We will immerse ourselves in a combination of listening to recordings, viewing videos, reading, discussion, and in-class performances. Throughout the semester we will pursue the parallel goals of using jazz history to understand American history and vice versa. This is a jazz history course with a difference, able to accommodate curious newcomers as well as aficionados and those interested in social and cultural dynamics as well as the musical materials.

MUSC273 BlaQueer Sounds: Queer Negotiations in African American Music

The term "BlaQueer," first coined by Tabais Wilson, is an invention of the intersectionality era; an acknowledgment of the unique and multifaceted experiences/identities formed at the nexus of racial, gendered, and sexual marginalization. In creating the portmanteau BlaQueer, Wilson underscores that, for people who are both Black and queer, these identities are inseparable, immutable, and irreducible. While the term BlaQueer, and by extension the concept it represents, is fairly new, there are long histories of Black queer people navigating and negotiating identity, revolutionizing and contributing to discourses on race, class, and gender. This course offers an exploration of the BlaQueer expressions, movements, and (most importantly) people that transformed American culture through music. While this course follows a historical arc, the primary aim of this course is to engage BlaQueer musical lineages through a critical interdisciplinary academic lens; accordingly, this course incorporates gender/women's studies, African American studies, performance studies, queer studies, and musicology.

MUSC275 Music and Downtown New York

This course will explore the history and flourishing of four distinct music communities that inhabited and shaped downtown New York City during two especially rich decades (the 1950s and 60s): urban blues and folk revivalists; an African American jazz-based avant-garde; Euro-American experimentalists; and Lower East Side rock groups. These four vanguard musical movements--at the heart of major cultural shifts at the time, with reverberations and legacies that remain relevant up to the present day--are an essential part of U.S. history. We will uncover their points of convergence and divergence, especially in conversation with broader contemporaneous currents, including the Civil Rights Movement and related notions of freedom, shifting youth cultures, music and

politics, and avant-garde aesthetics. Drawing from primary sources, we will read about and discuss recordings of a wide variety of musicians, view a broad cross-section of film, identify aesthetic and cultural trends, and study the local industry that supported them. A key theme will be the importance of a place. Projects throughout the semester can include written papers, recordings, artwork, culture mapping, or other creative endeavors somehow related to each of the four topics.

MUSC277 Jazz Avant-Gardes

What is an avant-garde and what does it mean in the context of jazz? This course will explore this question focusing on the 1950s and 60s and beyond. We will take a holistic approach, examining the music and its surrounding community within the broader social and cultural currents of the times. These currents include European-inherited avant-garde aesthetics, the increasingly urgent civil rights movement and changing conceptions of freedom, artist collectives, and Afrofuturism. Three key artists will provide a focal point: Ornette Coleman, Cecil Taylor, and Sun Ra. Others will expand our view, including Thelonious Monk, John Coltrane, Alice Coltrane, the Art Ensemble of Chicago, Anthony Braxton, Yoko Ono (a non-jazz artist who contributed to an experimental sensibility in NYC), and others. We will immerse ourselves in a combination of reading, listening to recordings, viewing videos, discussion, and some in-class performances. Throughout the semester we will pursue the parallel goals of using this movement in jazz to expand our understanding of avant-garde movements in general and using historical avant-garde movements to expand our understanding of how the phenomenon has played out in jazz. The first two weeks will function as a Jazz 101 boot camp, so no prior experience in jazz is necessary.

MUSC279Z Music and Wellbeing

IN-PERSON COURSE: 10:00am-noon and 4:00pm-6:00pm, Monday through Friday. Please note: Students should expect some readings and assignments to be due during winter break, prior to the beginning of Winter Session class meetings. Music has been, and continues to be, an essential component of the practices of traditional healers in most indigenous cultures. Methods vary greatly from culture to culture, and from ancient to modern times. Hindustani (North-Indian art) music is unusual in having a very well-established written record, as well as an oral history. But although knowledge of the medicinal effects of Hindustani musical tones and modes was once integral to understanding and selecting the rags (melodic systems) that make up this music, much of this knowledge has been lost. The sarangi (North-Indian viol) is an instrument closely associated with musical healing. Oral history transmitted through generations of sarangi players makes it possible to trace a lineage of music's medicinal purposes back to the Mughal era.

This course draws on my experience and knowledge as a Hindustani music scholar and an eighth-generation sarangi player from a hereditary musical family to open up a space for the development of community-focused performance methodologies. It looks at ways that my inherited tradition can provide a model for musical healing in contexts outside of India. Acknowledging the capacity for music to activate and influence autonomic system responses, components of the course involve research into the neuroscience of musical healing, public health initiatives, and the relationship to composition and to improvisation.

An integral part of the course, the "lab" will teach you strategies for listening and learning songs composed in rags. It will include structured breathing and yogic-postural forms, combined with healing strategies drawn from diverse sound-based creative practices. Borrowing tools from ethnomusicology, music-therapy, and medical anthropology, the course will extend the listening part of the lab to draw comparisons and analyze music healing practices. In addition, students will be encouraged to investigate, compare, and draw parallels to their own culture(s) and the discipline of music(s) they belong. Detailed and guided listening will make it possible for you to integrate emerging understandings of the relationships between ritual, music, and the health care. The course goal is to broaden your understanding of music as therapy, while raising awareness of the cultural processes that are constructed through musical practice. Syllabi for Winter Session courses will be posted to <https://www.wesleyan.edu/wintersession/courses.html> as soon as they are available.

MUSC290 Research Skills in Ethnomusicology--IRL & Digital

This course provides an introduction to research methods in ethnomusicology, a discipline that studies all types of music (and sound), both in real life and digital, from diverse humanistic and social scientific perspectives. The course is organized around weekly hands-on exploratory and empirical mini projects moving from virtual field to real-world fieldwork to interviewing musicians to digital sound-mapping and music video editing, from learning about Wesleyan's wide-ranging music ensembles to writing album reviews to "composing" an ethnography, which will offer orientation to a discipline that has been central to Wesleyan's approach to music and sound for over 60 years.

MUSC291 The Gendering of Music in Cross-Cultural Perspective

This course presents a critical examination of issues explored and debated in recent studies of gender, sexuality, power, identity, and music from diversified music traditions, including Western art music, popular music, and world musics. Drawing upon interdisciplinary discourse on theories of feminism and gender, gay and lesbian musicology, as well as queer theory in ethno/musicology, through case studies and analysis of various musical examples, we will investigate the following topics: women's multiple roles in the historical and contemporary practices of music; desire, sexuality, and women's images in music; and how gender ideology, contextualized by sociocultural conditions, both constructs and is constructed by musical aesthetics, performance practice, creative processes, and the reception of music.

MUSC293 Mapping Culture

What is a culture? How can it be intimately wrapped up in a location and how can that be mapped out to better understand its inner workings? In the face of globalization and pervasive online communities, what can conventional wisdom--"location, location, location" and "all politics is local"--tell us about the importance of actual places in cultural formations? We will first orient ourselves with a wide range of music-mapping projects, as well as projects that directly address the significance of a location (Nile Project, Playing for Change). From a base in the interdisciplinary field of ethnomusicology, we will then examine how scenes and subcultures can congeal in particular places and times, mapping them in New York City's Lower East Side (punk), Greenwich Village (urban folk revival), and South Bronx (early hip hop). Deploying a broad conception of culture, we will cover other art forms (e.g., graffiti and other street art) and social formations. Haight-Ashbury (SF) 1960s counterculture, Laurel Canyon (L.A.) 1970s singer-songwriters, Chicago 1980s post-disco house, and London 1980s post-punk goth will provide complementary case studies. These examples will provide models before students embark on their own to map out a culture of their choice as their final project, using either Google Maps or Story Maps.

Readings on theories of place and of subcultures will provide blueprints for issues to be explored, including how group identity and a sense of community can be locally constructed and the significance of physical in-person contact in a world of increasingly virtual relationships.

MUSC294 Queer Opera

Opera is a total art: It weds elaborate fashions with scene design and lighting to create incredible dramas set to music. For this reason, opera forces us to think interdisciplinarily about the narratives it portrays. Every action, every emotion, every decision and recognition in the drama is conveyed to the audience in multiple and sometimes contradictory ways. Operas are also fantastic living experiments in the performative representation of human sexuality. In addition to all of the love and sex that occurs explicitly on the opera stage--and there is plenty of that--operatic narratives also bear witness to changing structures of normativity; regimes of social control are thematized, sometimes lampooned, and often transgressed within the drama, and operas allow us to see how this unfolds within an interconnected ensemble of media. This course serves to introduce students to the world of the opera stage and, through that world, the foundational texts of queer theory. Together we will explore operas from the 17th century to the present day, opera theory of the past century, and queer theory of the past three decades to ask what these bodies of knowledge have to teach each other.

MUSC295 Global Hip-Hop

Over the past two decades, hip-hop, in its various facets of rap, deejaying, dance, visual art, fashion, and attitude toward authority, has gradually taken over as a primary medium of expression for youth around the world. Used as mass entertainment, elite aesthetic statement, social and political commentary, tool for education and social change, vehicle for economic opportunity, and as the core of a cultural movement, hip-hop has proven malleable enough to thrive embedded in scores of different languages and cultures around the world and effectively speak to local needs. Yet its local manifestations have also managed to retain their membership in a global hip-hop culture.

In this seminar we will study the global spread of hip-hop from an interdisciplinary approach, examining its varieties of expression from aesthetic, cultural, social, musical, linguistic, kinetic, economic, and technological perspectives. We will first come to an understanding of the rise and dispersion of hip-hop culture in the United States. Then, beginning with France, where it first took hold, we will move around the world examining local case studies and their more global implications.

MUSC296 Soundscapes of Islam

From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

MUSC297 Music of Central Asia: From Throat-singing to Heavy Metal

The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

MUSC308 Composition in the Arts

Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide

range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

MUSC309 The Winslow Archives: Composition, Education, History

Richard Winslow taught at Wesleyan from 1949 to 1983, where he was the key figure in establishing the World Music Program and Wesleyan's continuing commitment to experimental music. In retirement, he remained very active as a composer and thinker. His long life ended in 2017, a few months short of his 100th birthday. In 2019, the family donated his papers and other materials to the Wesleyan archives; these have now been processed, and a basic but complete finding aid is available at https://archives.wesleyan.edu/repositories/sca/resources/richard_k_winslow_papers.

Partly to honor his work, but mostly because he was such an extraordinary composer and thinker, Wesleyan is initiating a more detailed study of the archival materials, together with a series of performances. This seminar helps students gain a closer familiarity with Winslow's life and work through hands-on study of manuscripts, correspondence, and recordings. It will be of interest to composers, who will study Winslow's techniques as revealed in sketches, scores, and annotations; to musicologists and historians, who will help construct a complete chronology of Winslow's life and especially of his activities as a Wesleyan professor; and to archivists, librarians, and digital humanists, who will gain first-hand experience with the problems that attend categorizing, describing, and disseminating archival materials in a variety of media.

MUSC405 Private Music Lessons for Nonmusic Majors

Private instrumental and vocal lessons meet once a week at a regularly scheduled time. Permission of the instructor is required. Students contract to

take 12 lessons. Each instructor sets his or her criteria for accepting students. Returning students may register during pre-registration. Students new to the Private Lessons Program must contact the instructor to determine whether an interview during the first week of classes is required. This course may be repeated four times for credit towards graduation regardless of section or combination of sections.

Each section is for different instrument or voice lessons. Please see each section for the instrument/voice lessons taught by that instructor. (Section 01 is only for Bass lessons). A full list of instructors and their instruments can be found under the Private Lessons section of the Music Department website.

In most cases the student needs to provide their own instrument. Piano and drums are available to students for lessons, and certain other orchestra instruments may be available to private lessons students.

Course Fee: \$780 for 12 lessons billed through the Student Account. Financial support may be available for those who qualify. Please see the Music Department web site under Private Lessons for details.

MUSC413 Korean Drumming and Creative Music Ensemble

This course is an experiential, hands-on percussion ensemble with the predominant instrument in Korean music, the two-headed janggu drum. Students will learn to play a range of percussion instruments including janggu, barrel drum (buk), hand gong (kwenggari), and suspended gong (jing).

Through the janggu, drumming students gain first-hand experience with the role music plays in meditation and the benefits it offers to develop a calm, focused group experience. In the end they integrate their focused mind, physical body energy, and breathing through a stream of repetitive rhythmic cycles.

The students will be introduced to traditional folk and court styles of janggu drumming. The ensemble plays pieces derived from tradition and new ideas, and creates new works exploring imaginative sounds on their instruments. If there is an opportunity during the semester, the students will have a creative collaboration with a dancer(s) or musician(s) from other cultures. The ensemble will experience a deep respect for the diverse cultural backgrounds of the students developed from the efforts of teamwork and creating music together.

through Korean drumming. The semester will end with a live performance for the public.

MUSC414 Korean Drumming and Creative Music Ensemble Advanced

This class offers more advanced techniques for those students who have taken the beginner course or who have some basic experiences in Korean drumming or who have long-term drumming experiences of any other cultures including Western drum set. Attendance and additional practice time are mandatory. In comparison to the beginner class, the advanced class will play rapid, vigorous, and seamless rhythmic patterns on janggu, buk, and kwenggari. Students are expected to be creative in utilizing materials given during the semester.

Each student will focus on a lengthy solo work on any of these instruments, as well as ensemble playing. Students will explore both traditional and new emerging styles of Korean drumming. In the end, they will integrate their solos in the ensemble piece and create a new piece. The ensemble will experience a deeper level of drumming from contributing solo work to the ensemble and the efforts of teamwork. They will learn about group activity in music-making through sharing ideas and assisting each other. The semester will end with a live performance(s) for the public.

MUSC416 Beginning Taiko--Japanese Drumming Ensemble

This course introduces students to Japanese taiko drumming. The overarching goal of this class is to gain a broad understanding of Japanese culture by studying the theory, performance practices, and history of various genres of classical, folk, and contemporary music traditions. Students will gain a better understanding of the spirit behind the matsuri (festival) and Japanese performance arts through learning basic taiko technique and one or two pieces on the Japanese taiko drum. Students should wear clothes appropriate for demanding physical activity (i.e., stretching, squatting, various large arm movements). Students with a musical background might find MUSC 417 Intermediate Taiko to be a suitable alternative, as it covers the same theoretical and historical content but at an accelerated pace and includes additional repertoire.

MUSC439 Wesleyan University Orchestra

The Wesleyan University Orchestra is a student-community ensemble that is open to everyone with a passion for orchestral literature. Prospective members should have an intermediate-to-advanced skill level of performance on an orchestral instrument. The orchestra performs music from all genres and time periods, ranging from the 18th-century "classics" to contemporary academic and popular compositions. The orchestra presents three concerts each year: a "masterworks" program in early December, often featuring one of the department's private lessons instructors or a guest artist as a soloist; a children's concert in early March; and the Student Concerto Competition

concert in early May. The orchestra occasionally collaborates with the Wesleyan Concert Choir. For more information about the orchestra visit: <https://orchestra.site.wesleyan.edu/>

Offering: **Host**

Grading: **A-F**

MUSC441 Piping Performance: An Exploration of Artistic Expression through the Pipe Organ

With the ability to create the most delicate and jarring of timbres, and to fill the space with "other-worldly" soundscapes, the pipe organ is a vehicle that transports one toward artistic and musical growth. This course will introduce students to the history and development of the instrument, while fostering other musical skills and studies that assist each student to find their voice as an artist-creator.

This multi-track course allows students to select their focus in one or more organ-related disciplines: improvisation, composition, performance practice, repertoire playing, church music, musicological research, etc. Students utilize their growing knowledge of the organ to complete three musical performance or research-related projects that they develop over the course of the semester. Final projects are publicly presented. A lab time in the form of private lessons, consultation, and individual practice is required.

MUSC444 African Popular Music Performance

This course aims at bringing together students with diverse musical skills to explore the riches of African popular music (broadly defined to include a range of styles such as highlife, hiplife, hip-hop, dancehall, reggae, azonto, and gospel highlife) through performance. Popular music, first and foremost, is an urban genre. Its origins go back to the early 1900s when, because of European presence in the coastal areas of West Africa, and later spreading to other parts of the continent, new musical instruments, ideas, and imaginings became available. Today, popular music is the driving force of the music industry in Africa. Through intensive studio practice, reading, listening, viewing, and individual and group rehearsals, the goal of the course is twofold: to develop proficiency in African pop music performance and to become familiar with the intellectual discourse on African popular music, its interactions with traditional African music, and its role in the formation of generational identities. The course is fundamentally performance-based; hence, enrollment is limited to skilled musicians with some proficiency in singing and the following instruments: guitar, keyboard, drum sets, bass guitar, saxophone, trumpet, and trombone.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC445 West African Music and Culture: Beginners

This is a performance-based course that focuses on West African music.

The course is designed to provide a practical and theoretical introduction to traditional West African music and culture. Students experience the rhythms, songs, movements, and languages of Ghana and its neighboring countries through oral transmission, assigned readings, film viewing, and guided listening to commercial and/or field recordings. This interdisciplinary approach to learning is in keeping with the integrated nature of drumming, dancing, singing, and hand clapping in West Africa. Students learn to play a range of instruments, including drums, metal bells, and gourd rattles.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC446 West African Music and Culture--Intermediate

This course is designed to build on the skills developed in MUSC445. The beginner repertoire is reviewed, and more demanding call-and-response patterns are learned, along with new, more challenging repertoire. Students may be asked to perform on and off campus.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC445**

MUSC447 West African Music and Culture--Advanced

This course is designed to build on the skills developed in MUSC445 and MUSC446. Complex repertoire is learned and brought to a higher performing standard. Students experience the intricacies of dance accompaniment while drumming and singing with the advanced West African dance class. The student ensemble will be asked to perform on (and possibly off) campus.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **MUSC446 OR MUSC445**

MUSC448 Ebony Singers: Gospel Music

This course will be a study of African American religious music through the medium of performance. The areas of study will consist of traditional gospel, contemporary gospel, spirituals, and hymns in the African American tradition. The members of the group will be chosen through a rigorous audition (with certain voice qualities and characteristics).

MUSC451 Javanese Gamelan--Beginners

Dominated by colorful bronze percussion instruments, the Gamelan ensemble features gongs, bronze and wooden xylophones, drums, and vocalists. Other instruments include bowed- and plucked-string instrument and flute. Some of the instruments date back to the 12th century in Java, Indonesia. The main content of the course is the instruction of various levels of difficulty in the playing techniques of different instruments and singing. Previous formal music instruction is not necessary.

Offering: **Host**

Identical With: **AFAM390**

Prereq: **None**

MUSC457 Jazz Orchestra I

This course is for those with commitment to the American musical tradition called jazz. Skill and experience are highly desirable but, consistent practice is the biggest prerequisite. Small and large-ensemble repertoire composed by Duke Ellington, Charles Mingus, Thad Jones, Thelonious Monk, Charlie Parker, Fletcher Henderson, John Coltrane and many other composers will be deeply engaged. Intensive practice and rehearsal of the compositions, as well as class presentations of readings, will lead to development of ensemble and solo skill. The commitment to rehearsal of the compositions, as well as listening and reading assignments, will culminate in an end of semester public concert.

Prereq: **None**

MUSC459 Methods of Improvisation Ensemble

The ensemble is open to musicians of all backgrounds, stylistic orientations, and traditions seeking to develop their improvisational abilities. All instruments are welcome. Weekly rehearsals will explore improvisation from a method-based perspective in order to develop the skills needed to create spontaneous compositional works as an ensemble. Each student will learn how to develop their musical foundational skills to be able to create unique rhythmic and sonic environments as both a soloist and an ensemble member. Traditional notations will not be used. Instead, graphic- and prose-based notations will be employed to facilitate the forging of a musical language unique to the ensemble.

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC461 Sound Systems: The How of Hearing

Since the late 19th century artists, corporations and composers have all proposed, developed, presented, and occasionally commercialized physical systems that reconfigure how sound can be experienced. The early impact of the entertainment industry ranged from the introduction of stereo to movie theaters in Walt Disney's *Fantasia* to the development of close miking for the crooning of Bing Crosby to McCune sound service's introduction of stage monitors for the benefit of Judy Garland. Artists and composers used related methods to propose entirely new understandings of how music can be. Futurist Luigi Russolo's *Intonarumori* of 1913 proposed an Art of Noise, while Pauline Oliveros' concept of deep listening developed listening as a foundational form of music making. R. Murray Schafer's concepts of soundscape and acoustic ecology project a music of environmental relations mediated through sound, while Maryanne Amacher's sound characters create individual sounds understood as capable development and change beyond the expanse of any one performance or composition.

This class will be a performing ensemble focused on "sound systems" as musical instruments and musical practices performing live and fixed media sound pieces through sound systems we will configure for different sites on campus. Together with developing the technical skills required to mount these pieces, we will also investigate and discuss the varied musical, social, acoustical, and psycho-acoustical understandings of music and sound that influenced their shaping.

Prereq: **MUSC109**

MUSC463 Teaching Music Lessons to Children in Local Schools

This is a service-learning course. Wesleyan students will teach private and small group music lessons to local children. These sessions will be augmented by a weekly classroom session in which readings and the student teachers' journals will be discussed. Some of the Wesleyan Department of Music's private lesson instructors may visit to answer questions and guide the student teachers through the issues, musical and extra-musical, that the lessons will raise.

Written assignments will include responses to weekly readings, regular journal entries, and an end-of-semester paper. There will also be a recital by the school children at the end of the semester.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC464 Laptop Ensemble

This course promotes knowledge and skills in live electronics performance, cultivates new musical repertoire for the group, and increases public awareness of new forms of working music technology while developing overall technological and troubleshooting proficiency. The course accomplishes this through regular rehearsals as well as a combination of required group and "satellite" performances. A range of repertoire is curated over the course of the semester involving new pieces created for the ensemble, as well as the reinterpretation of historical works using live electronics.

Offering: **Host**

Grading: **A-F**

Offering: **Host**

Grading: **OPT**

MUSC505 Topics in Applied Ethnomusicology/Public Musicology

Work in applied ethnomusicology and public musicology includes a wide range of activities and formats, including: blog posts, magazine articles, public community music performances, tweets, podcasts, pre-concert and public lectures, forensic testimony, and the development of digital open-access tools and resources.

What unifies these and many other possible forms is a desire by scholars to convey the cultural relevance and influence of music by engaging audiences outside the academy. Many are concerned with the social responsibility of the university, and developing methods and projects to collaborate with and give back to the communities in which we live, work, and research. The seminar will also address what the tools, methods, and values of the interdisciplinary field of digital humanities can offer applied ethnomusicology and public musicology. We will apply a suite of open-source analytic, pedagogical, networking, research, and presentation tools developed by digital humanists to our own projects. Through readings and research-creation projects we will better understand the work of institutions for cultural preservation, the role of activist and political scholarship, how to write accessibly for all readers, and how to convey our ideas in a number of different formats (e.g. blogs, "think pieces" or online articles, pre-concert lectures, open-access digital archives and research webspaces).

Offering: **Host**

Grading: **A-F**

Prereq: **None**

MUSC506 Reading Ethnomusicology

As one of the two core introductory courses to ethnomusicology, this course lays a general intellectual groundwork for MA students with a concentration in ethnomusicology through in-depth reading of some of the most important writings in ethnomusicology. Focusing on both intellectual history and current issues, the course evolves around the key concepts and themes that have defined, expanded, or challenged the field. Students will critically and comparatively discuss the approaches and contributions of each work they study. At another level, this course also aims at broadening students' knowledge of world musics through studying a wide range of music ethnographies.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC507 Practicing Ethnomusicology

This course provides a broad introduction to the research methods of ethnomusicology. The theory and practice of musical ethnography are examined, including techniques of face-to-face and remote fieldwork, ethnographic writing, research ethics and representation, bi-musicality, approaches to the transcription and analysis of musical sound, ownership, repatriation, and dissemination of ethnographic materials. Students acquire practical skills of ethnography-based research.

MUSC513 Improvisation in Cross-Cultural Perspective

This course will explore musical improvisation around the world from a variety of theoretical and practical perspectives. Readings on theories of improvisational

processes, as well as on specific musical traditions in the United States, India, Indonesia, Africa, and elsewhere, will complement practical transcription and analysis projects.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC515 Mapping Music as/in Motion: The Cartographies and Circulation of Aural Culture

Music circulates, moves, and is mapped through places, pathways, materials, bodies, and technologies. Together, we will encounter a series of conceptual frameworks and case studies that map the nodes, pathways, boundaries, and movements of sonic phenomena and musical life. How do the movements of music and musicians, the places they occupy, and the boundaries they negotiate communicate spatial information about music practices? How they circulate physically and virtually? What are the different methods that ethnomusicologists use to represent and map these circulating sounds? This seminar not only discusses the physical cartography and circulation of music cultures, but also, the virtual spaces music moves through. In the opening decades of the 21st century, new media practices and Web 2.0 modalities (e.g. Spotify, YouTube, Twitter, Facebook) have enabled new cartographies, patterns, and pathways of circulation, and engendered new approaches to participatory musicking. The seminar also raises questions of how technologies and modes of mobility interface with categories of identity, race, and gender.

In-class discussions foreground the role of movement and how musical movement is mapped and represented. The seminar addresses such topics as: musical movements by way of travel, habitation, refuge, trade, ghettoization, migration, or telecommunication; sonic geography; the ways sounds and music flow and vibrate through, in, and among places (e.g. urban streets and neighborhoods, spaces of protest, music scenes, performance venues); composition as travel writing; why some musics and musical actors are more mobile than others; how travel and migration shape music-making and musical senses of place; how the maps and cartographic representations of places are redrawn as music and musical actors move and aural culture makes claims to space; the place of border theory, cartography, migration studies, transnationalism, and human geography in ethnomusicology; the impact of travel, tourism, festivals, and tours on local music scenes; mobile media and technologies; how subversive and DIY cartographies of music cultures and their movements offer alternative representations to conventional social and political customs; and how the spatiality and materiality of musical mobility is experienced through aural, tactile, visual, and haptic sensations.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC517 Sex/Gender/Queerness in Music and Music Scholarship

This seminar is designed to involve all music graduate students, namely students in composition, ethnomusicology, and performance concentrations, from both MA or PhD programs. This course will examine the major ideas in the recent feminist, gender, and queer studies in the fields of composition, ethnomusicology, musicology, and popular music studies. The class will explore varied approaches in critical re/presentation of femininity/masculinity/transgender/queerness in composing, listening, performing, and analyzing music and sound. We will consider the significance of engaging feminism, gender studies, and queer studies in our varied relations with music. In so doing, each

member of the class will have the opportunity to design their own final creative project and to develop a dialogue with the ideas presented in the readings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC518 Music and Embodiment

This course will explore the role of the human body in music performance, transmission, and perception. Through discussion of interdisciplinary literature on embodiment, analysis of cross-cultural case studies, and ethnographic projects describing their embodied engagements with music, students will examine the biological and cognitive foundations of human musicality, the cultural and social dimensions of music as embodied practice and experience, and the body politics of musical expression and participation. Topics covered will include the role of movement and gesture in singing and instrumental playing; the interrelation of instrument morphology, body techniques, and music structure; the interplay of sound, space, and architecture; and intersections between human musicking, technology, and the environment.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC519 Current Issues in Ethnomusicology

This course concentrates on current scholarship, intellectual issues, and music ethnographies in ethnomusicology. It challenges the students with contemporary theoretical debates among ethnomusicologists, such as music and identity, music and gender, race and power, music and technology, and music and decolonialization. The course will closely examine the impact of interdisciplinary approaches on music ethnography through critical analysis of the readings.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-MUSC**

Prereq: **None**

MUSC520 Explorations in Musicology

What is Musicology? How and why do scholars write about music? This course will investigate some of the motivation for making music a scholarly object of inquiry. After reviewing some of the methodologies through which scholarship has been constructed (archival research, reception history, historiography, practice-led research), we will assess and discover new ways to write about music and the cosmos. This topic will serve as a prism through which musicological debate can be understood, and contrasted with ethnomusicological and other approaches. We will draw on a range of musicological approaches and frameworks--cultural, historical, scientific, and environmental studies, posthumanism, mythology, and countercultural spirituality.

Course Objectives:

- To gain familiarity with diverse thinking about music inspired by the great beyond
- To understand some of the reasons why musicians turn to cosmology

- To develop cross-cultural understandings of the collaborations of musicians and astronomers

- To explore celestial motion as a form of design, or a mode of rationalizing

- To use musicology tools to find new ways of analyzing phenomena

Offering: **Host**

MUSC521 Seminar in Interdisciplinary Studies

The course, one of the four core PhD seminars in ethnomusicology, examines a number of disciplines as they relate to general current theoretical issues and the interests of ethnomusicology. Visitors from other departments will present their disciplinary perspectives.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **None**

Prereq: **None**

MUSC522 Seminar in Comparative Music Theory

In this seminar we will take a deep dive into historical texts of music theory from the 18th, 19th, and early 20th centuries. Because of its significant overlaps with physics, acoustics, aesthetics, and philosophy, music theory can serve as an important site for any inquiry into the history of ideas. Particularly distinctive in music theory of the 18th century and beyond are the linkages that join the empirical and physical sciences with speculative discourses on beauty and subjectivity. In addition to covering major figures in the canonic history of Western music theory after 1700, this seminar will focus in particular on moments of colonial encounter and exchange that occurred through music theory; our aim will be to understand how the modern, Western self was in part fashioned through its investigation of non-Western musical systems. For their final papers, students are encouraged to draw on their own research interests, placing them in dialogue with the historical texts and methodological concerns that we will explore together this semester.

NEUROSCIENCE & BEHAVIOR (NS&B)

NS&B149 Neuroethology: Sensory Basis of Animal Orientation and Navigation

This course is about the sensory and neuronal processes underlying the ability of animals to orient in and move through their environments. We will consider the basic functions of sensory and nervous systems that underlie the remarkable abilities of animals to orient themselves in personal space, move through their home range, and move through the world in long-distance migrations and in homing. Animals from invertebrates through fish, birds, and mammals will be considered. The format of the course will be seminar/discussion and some lectures with heavy student participation. The course is intended for first-year students with high school-level courses in at least two of the following: biology, chemistry, or physics.

Offering: **Host**

NS&B213 Behavioral Neurobiology

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

NS&B220 Cognitive Psychology

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory,

knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

NS&B222 Sensation and Perception

This course explores our perceptual systems and how they create and shape our experience of the world around us. We will consider the neurophysiology of perceptual systems as well as psychological approaches to the study of perception, covering all of the human senses with a special emphasis on vision. Class demonstrations will introduce students to interesting perceptual phenomena.

NS&B224 Hormones, Brain, and Behavior

Hormones coordinate the anatomical, physiological, and behavioral changes necessary for developmental, seasonal, and diurnal transition in animals. These molecules have profound effects on the development of the brain and on adult brain function. How do hormones orchestrate brain assembly and the expression of specific behaviors? How do behavior, social context, and the environment influence hormone secretion? This course will provide a critical survey of our understanding of the relationship between endocrinology, the brain, and behavior in a variety of animal systems. Select topics include insect metamorphosis; sexual differentiation of the vertebrate brain and behavior; reproductive and aggressive behavior in birds, lizards, and rodents; song learning and song production in birds; and the effects of hormones on sexual behavior and cognitive function in primates, including humans. The exploration of a variety of systems will provide students with an appreciation of the ways in which the relationships between hormones and behavior vary across species, as well as the extent to which these relationships are conserved.

NS&B225 Cognitive Neuroscience

This course provides an introduction to cognitive neuroscience—the study of how the brain enables the mind. We will begin with an overview of the neural substrates of cognition and the tools for understanding the structure and function of the human brain. Then we will cover neural processes that support sensory perception and attention, memory, motor control, language, executive control, and emotional and social functioning. We will also discuss mechanisms of brain evolution, development, and repair, and their implications for various diseases and disorders.

Offering: **Crosslisting**

NS&B228 Clinical Neuropsychology

This introductory course will examine the relationship between brain functioning and cognition, behavior, and emotion through the study of human brain disorders. The course will begin with a brief overview of basic human regional neuroanatomy, followed by an exploration of neuropsychological assessment and intervention (its history, rationale, goals, and procedures). These topics will provide a foundation for the discussion of more specific topics in neuropsychology (e.g., traumatic brain injury, dementia, psychiatric disorders, cerebrovascular disorders, seizure disorders, learning disabilities, autism) and the role that neuropsychologists play in the evaluation and treatment of individuals with these disorders.

NS&B238 Psychological Theories of Learning and Motivation

The goals of this course are to help students develop practical, evidence-based skills for effective classroom learning, understand and appreciate research on the neuroscience of learning and motivation across species, and apply theories of learning and motivation to understanding human behavior. Course objectives for achieving these goals include: implementing evidence-based practices; dispelling myths about learning; explaining mechanisms of memory consolidation and factors that modulate it; distinguishing between and identifying components of operant and classical conditioning; and explaining how each theory of motivation can be used to understand why people behave in certain ways.

Offering: **Crosslisting**

NS&B239 Functional Anatomy of the Human Brain

The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being

of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Host**

NS&B243 Neurohistology

The aim of this course is to study the microscopic structure of the nervous system. Structural and functional relationships between neurons and glia, as well as the organization of major brain regions (cortex, hippocampus, and cerebellum) will be examined. In addition to traditional histological preparations, modern techniques including confocal microscopy and immunohistochemistry will be studied and performed. Laboratory exercises will include the preparation and visualization of microscopic slides using a variety of techniques. While this course will focus on mammalian nervous system, skills learned in this course will be applicable in a variety of research models.

Prereq: **BIOL182 OR BIOL182Z AND NS&B213**

NS&B245 Cellular Neurophysiology

This neurophysiology course is mostly a study of how neurons send, receive, and integrate the signals that produce nervous system activity. Using the tools of electrophysiology (the electrical recording and manipulation of neurons), we can better understand synaptic plasticity, neuronal oscillations, and network activity. In the last module of the course, students will use their knowledge of a diversity of voltage-gated channels, neurotransmitter systems, and neuron categories to better understand the neurophysiology of epileptic seizures and sensorimotor systems and locomotion. We will also examine articles about human-machine interfaces that are being developed in the diagnosis and treatment of epilepsy as well for the restoration of motor activity and somatosensation.

Offering: **Crosslisting**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B247 Laboratory in Neurophysiology

The course is designed to teach techniques and offer independent research experience. Students study living nervous systems and measure the electrical signals at the heart of nervous system function. In the first part, experiments include intracellular recordings of rest and action potentials, synaptic transmission, sensory coding and integration in simple nervous systems.

Students learn surgical and electrophysiological recording techniques working with invertebrate and cold-blooded vertebrate animals including crayfish, mollusks (Aplysia), leeches, fish, and amphibians. In the second part of the course, students will use these techniques in novel, independent research projects.

Offering: **Crosslisting**

Identical With: **BIOL250, NS&B555**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B251 Laboratory in Basic Practices in Neuroscience

This course will provide students with the knowledge and some tools to solve problems in neurobiology. Topics covered include a fundamental review of neurobiology and approaches in neuroscience research methods, behavioral studies, tissue/cell preparation, and histology/microscopy.

Students will learn how the applications of advanced neuroscience techniques have answered fundamental questions in neurobiology and neurophysiology. Modern approaches and their applications will be discussed, including behavioral studies, tissue preparation and analysis, histology, and microscopy.

The learning outcomes will be assessed by a project, oral presentation of the project, written laboratory class reports (lab notebooks), and a lab practicum.

Offering: **Host**

Gen Ed Area: **NSM-NSB**

Identical With: **BIOL251**

Prereq: **NS&B213 OR BIOL213 OR PSYC240**

NS&B252 Cell Biology of the Neuron

Understanding the cellular biology of neurons is critical for understanding neurological disorders as well as neuropharmacological methods for treating the nervous system. In this course, we will explore how neurons function, focusing on structure-function relationships of the molecular building blocks of neurons. We will examine the basic cell biological mechanisms that underlie the formation, function, and plasticity of neurons and circuits. Areas studied will include cytoskeleton, cellular polarity, synapse formation, synaptic transmission, inter- and intra-cellular transport, neuronal plasticity, and regeneration. This course is designed to follow on from NS&B213 Behavioral Neurobiology.

Offering: **Host**

Grading: **A-F**

NS&B254 Comparative Animal Behavior

In this survey course, we explore a wide range of animal behaviors at the proximate and ultimate levels of analysis. Main topics include: the principles of communication, genetic regulation of behavior, neuroethology, biological rhythms, hormones and behavior, reproduction, and animal cognition. Students gain foundational knowledge by engaging with textbook readings and traditional lectures. Students practice self-directed inquiry, peer-assisted learning, and scientific communication through in-class work sheets, group discussions, take-home assignments, and presenting topics of their choosing. Finally, students will learn about research and the academic career path through scholar highlights, interacting with guest speakers, and reading primary literature.

NS&B257 Neurogenetics

Genes are the basic functional units of heredity. This course is an introduction to the study of genes and their role in shaping neuronal structure, neuronal function, and behavior. We will learn about classic and modern approaches used to probe the relationship between genes and behavior, with a focus on studies using model organisms (e.g., flies, mice, worms). We will discuss the molecular genetics of neurological disorders with high heritability and the use of genetic tools to treat these conditions, and we will consider the ethics surrounding treatment and diagnosis of these disorders. Student assessment will include short written responses, in-class quizzes, and exams.

NS&B299 Waves, Brains, and Music

Pressure waves bounce against the ear, and we create perceptions called sounds from them. We organize sounds to make music, making more waves, and the cycle goes forward. This course will provide an introduction to the fraction of these phenomena that can be measured and analyzed, focusing on the mathematics of signal analysis, auditory physiology, and the physiology of musical perception and production. Periodic waveforms include musical tones and the voltage fluctuations that can be measured from brains. The first third of this course (waves) is an introduction to the quantitative analysis of periodic waveforms, with the goal that the student will have a better understanding of how to interpret the analysis of both musical sounds and neuronal recordings. The second part of the course (brains) examines the known mechanical processes (physiology) by which the mammalian brain analyzes the periodic waveforms that we interpret as sound. The third part of the course uses these lessons to examine original research articles about the neuroscience of music, that is, how neuronal networks produce musical perception.

NS&B302 Neurobiology of Aging

This course is designed to explore the intricate relationship between the aging process and the nervous system. As our population ages, understanding the underlying neurobiology of aging becomes increasingly important. This course delves into the physiological, cellular, and molecular aspects of how the nervous system changes over time and the impact of these changes on cognition, behavior, and overall well-being.

This course will introduce the student to the study of aging (gerontology) and the effects of normal aging and pathological aging on the nervous system. We will discuss general concepts of aging, and biochemical, physiological, and behavioral age-associated changes in the motor, sensory, cognitive, and neuroendocrine systems. By the end of the course, the student should have a clear understanding of what aging is and what effects it has on normal brain function. In class, I will introduce the topic with slide presentation and after that, we will discuss the topic based on the scientific article discussion. After the last class, students will have extensive opportunities for feedback and will write a project and present it in class as an oral presentation. Student evaluation will include weekly quizzes, project, a midterm and final exams, and class participation/attendance.

Course Objectives:

By the end of this course, students will:

1. Gain a Comprehensive Understanding: Develop a comprehensive understanding of the neurobiological processes associated with aging, including neurodegenerative diseases.
 2. Explore Structural Changes: Examine structural changes in the aging brain, such as alterations in neuron density, synapse formation, and brain volume.
 3. Analyze Functional Changes: Analyze functional changes in the aging nervous system, including changes in memory, cognition, sensory perception, and motor function.
 4. Study Neurodegenerative Diseases: Investigate common neurodegenerative diseases associated with aging, such as Alzheimer's disease, Parkinson's disease, and age-related macular degeneration.
 5. Explore Cellular and Molecular Mechanisms: Explore the cellular and molecular mechanisms underlying age-related changes in the nervous system, including oxidative stress, inflammation, and genetic factors.
 6. Examine Potential Interventions: Review potential interventions and strategies to promote healthy aging and delay or mitigate age-related neurobiological changes.
- Offering: **Host**

NS&B303 Receptors, Channels, and Pumps: Advanced Topics in Membrane Protein Structure and Function

Membrane proteins constitute one-third of all cellular proteins and one-half of current drug targets, but our understanding of their structure and function has been limited in the past by technological obstacles. In spite of this, the past 10 years have yielded a wealth of new membrane protein structures that have helped to uncover the mechanistic underpinnings of many important cellular processes. This class will examine some of the new insights gained through the various techniques of modern structural biology. We will start with a general review of membrane properties, structural techniques (e.g., x-ray crystallography, EM, NMR), and protein structure analysis. We will then look at common structural motifs and functional concepts illustrated by different classes of membrane proteins. Students will read primary literature sources and learn how to gauge the quality and limitations of published membrane protein structures. These tools will be generally applicable to evaluating soluble protein structures as well.

NS&B304 Glia: Not just neuronal glue!

Historically, neuroglial cells (i.e., astrocytes, oligodendrocytes, and microglia) were considered the space-filling cells of the brain, simply the brain's "glue." Later, their primary role was considered metabolic support of neurons (e.g., buffer extracellular potassium, recycle neurotransmitters, myelination, etc.). However, the notion of glia as inert bystanders has recently been revised. It is now accepted that glial cells play critical physiological roles in normal nervous system development and function, including controlling brain wiring, modulation of synaptic transmission, regulating blood flow, and serving as the brain's lymphatic system just to name a few functions. Moreover, glia contributes to a variety of neurological disorders such as epilepsy, glioma, multiple sclerosis, neurodegenerative diseases, and psychiatric disorders like major depressive disorder and schizophrenia. Hence, these underappreciated cells are long overdue recognition. This is an interdisciplinary course in which students will engage in a focused, in-depth exploration of how glial cells contribute to neurological and psychiatric disorders. Lectures by both basic scientists and clinicians will highlight recent research on the molecular mechanisms by which glial cells contribute to the establishment and progression of neurological and psychiatric disorders.

This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes, students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include quizzes and assessments for a lay audience, a midterm and a final exam, class participation, and attendance.

Course Objectives:

1. Describe the development, histology, and normal physiological function of glial cells.
 2. Describe the role inflammation plays in neurological and psychiatric conditions.
 3. Describe the role traumatic brain injury plays in neurological and psychiatric conditions.
 4. Describe the role genetics plays in neurological and psychiatric conditions.
 5. Describe the physiology, pathology, and disease mechanisms of neurological and psychiatric conditions.
 6. Demonstrate effective written communication skills to construct a succinct "News & Views" style summary of a primary research report for a lay audience.

NS&B316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

NS&B317 Neuroethics

Ethics, or morality, is one of the complex features of human behavior. This course will explore "Neuroethics" from two perspectives: (1) the neuroscience of ethics (i.e., the role of the human brain in ethical or moral behavior) and (2) the ethics of neuroscience (i.e. the ethical implications of manipulating the brain). The first perspective will relate to the premise that human morality is embodied in and operates based on the principles of the functional architecture of the brain, in particular, the cerebral cortex. The course will examine the organization and neural networks, especially of the association cortices (prefrontal Cortex: ventromedial, dorsolateral and orbitofrontal cortex; the cingulate cortex; temporal association cortex; and the inferior and superior parietal lobes). The course will review studies on the development of moral values in children and their neural underpinnings, leading to studies of the functions of the adult brain in moral or ethical decision-making. Topics such as the neural basis of resolving the "Trolley Problem," neuroeconomics, altruism, poverty, forgiveness, and compassion will provide the basis for this discussion. We will evaluate from a neuroscience perspective questions such as determinism and free will, and the sense of "self"—ideas that have played a significant role in ethical theories. Based on this body of knowledge, we will look at emerging ethical issues arising from technological developments that allow for manipulating the normal and diseased brain. A variety of questions will be examined, including brain imaging and privacy; enhancement of normal brain function through chemical, electrical, and electromagnetic stimulation; implanted neural interfaces; restoring brain damage; and neuroscience and the law.

NS&B320 Neuroscience of Learning and Memory

One of the fundamental functions of our nervous system is to encode and store memories, which allows us to survive and shape our personal identities. In this course we will cover different animal models of learning and memory, which have been useful tools to understand maladaptive memories underlying neuropsychiatric and neurological disorders such as post-traumatic stress disorder, substance use, and Alzheimer's disease. We will look in detail at how neurons and neural circuits change and respond when an organism learns something new or recalls a past experience. This course will also involve detailed discussions related to sex differences in both learning behavior and the biological basis of memory processes. The central focus of the course will be integrating current work in basic cellular and molecular neurobiology with the experimental psychology of learning and memory.

NS&B323 Biochemistry of Neurodegenerative Disease

Broadly defined, neurodegenerative disease occurs when a specific class of neuron dies and thus fails in its biological action. In this course, we will delve into the many different, intricate ways neuron death can occur and cause disease. From the chemistry of neurotransmitters, aggregation of proteins, and the collapse of neuromuscular junctions, many areas of the neurobiology can go awry. The focus of the course will be on understanding the complex interplay of small molecules and proteins that keep neurons healthy and functional. In this course, we will use current primary literature and lecture to understand the varied topics. This course aims to improve skills in reading and analysis of primary literature as well as the written and oral presentation of scientific findings.

NS&B328 Chemical Senses

The least well understood of the senses, chemical sensation, is key to survival and behavior of many species. This course covers the structure and function of sensory neurons in both the gustatory and olfactory systems, as well as in chemosensory irritation. We will examine coding of sensory information to understand how higher cortical areas interpret stimuli. We will look at a variety of animal models and discover common organizing principles across phyla. Emphasis will be placed on the cell biology of these systems. Students will participate in reading, analyzing, and presenting recent studies from different areas within chemical sense to highlight recent findings and where the emphasis in chemosensory research is focused.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-NSB**

Identical With: **BIOL328**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

NS&B329 Neural Costs of War

This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **PSYC329**

Prereq: **None**

NS&B335 Behavior Genetics

This is a seminar exploring the role of genetic variation in behavioral tendencies in both humans and non-human animals. A discussion-based seminar format will cover topics including selective breeding for behavioral traits in non-human animals, evolutionary theories for natural selection of behavioral traits, research methods in behavior genetics, and ethical concerns within behavior genetics research. We will discuss the history and paradigm shifts in the field behavior genetics and critically evaluate empirical work evidencing the role in genetics in a variety of psychological and behavioral traits such as aggression, political orientation, and mental health.

Offering: **Crosslisting**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Identical With: **PSYC335**

Prereq: **PSYC105**

NS&B341 Psychology of Human Memory

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

Offering: **Crosslisting**

Grading: **A-F**

NS&B344 Developmental Biology of the Nervous System

Near the top of the list of unsolved mysteries in biology is the enigma of how the nervous system constructs itself. Here is a part of our body that can make us feel happy, sad, amused, and in love. It responds to light, touch, and sound; it learns; it organizes movements; it controls bodily functions. An understanding of how this structure is constructed during embryonic and postnatal development has begun to emerge from molecular-genetic, cellular, and physiological studies.

In this course, we will discuss some of the important events in building the brain and explore the role of genes and the environment in shaping the brain. We will also discuss some disorders and dysfunctions that may happen during the neurobiology of development, such as cerebral palsy, autism, and attention-deficit hyperactivity disorder (ADHD). We will also discuss developmental disorders resulting from developmental processes that have gone astray. This is a reading-intensive seminar course emphasizing classroom discussions, with readings from a textbook and the primary scientific literature. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based

on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a mid-term and a final exam, and class participation.

NS&B347 Mammalian Cortical Circuits

The mammalian cortex is where conscious perception and thought is generated, but the mechanistic details governing those processes are not well known. Studies of those circuits have revealed a heterogeneity of neuronal classes in the cortex and their proposed roles in these processes. Detailed wiring diagrams of local and long-distance cortical circuits are emerging, colored with dynamic connections that are helping us understand the cortex with these reverse-engineering strategies. Most of the readings for this course will be taken from the recent primary literature; areas of the cortex that will be studied include sensory cortex as well as studies of hippocampal cortical circuits.

NS&B351 Neurobiology of Learning and Memory

Animals as varied as sea slugs and humans display a number of types of learning, ranging from the capacity to acquire species-specific behavior to the ability to form arbitrary associations. Just as varied are the philosophies governing the choice of how to best study the neurobiology of learning and memory. Through lectures, class discussion, student presentations, and a critical reading of the primary literature, the advantages and disadvantages of these various approaches will be investigated. While the specific focus of this class will be on learning and memory, other ways in which the brain learns will also be explored. Normal brain ontogeny relies to some extent on invariant cues in the animal's environment, making this process somewhat analogous to learning. In fact, the neural substrates for learning are likely to be a subset of the basic steps used during brain development. Moreover, the developmental rules guiding brain assembly place constraints on the what, how, and when of brain function and learning. Therefore, this course will also cover select topics in basic developmental neurobiology.

NS&B357 Sex and Gender: From Synapse to Society

From movies like Think Like a Man to songs like "God Made Girls," from federal policies to gender reveal parties, much of our experience is defined by an ideology of gender dichotomy and an endorsement of fundamental sex differences in behavior. But does science agree? The field of neuroscience is bursting with research that both supports and questions inherent differences

in the brains and behavior of men and women. In this course we will be taking an open and critical look at this scientific literature. We will begin by clarifying what it means, biologically, to be male/female, determine the limits to these definitions, and evaluate how these biological elements (genes/hormones/anatomy) interact with our environment and society to influence our behavior and gender identity. Additionally, we will evaluate nonhuman animal and human data regarding sex differences in behaviors (e.g., aggression, verbal communication) and neuropathological states (e.g., addiction, autism spectrum disorder). Student evaluation will include effortful participation, biweekly concept checkpoints, a final paper/presentation, and weekly editorials.

Gen Ed Area: **None**

Identical With: **BIOL357, FGSS357**

Prereq: **BIOL182 AND NS&B213**

NS&B358 Neurobiology of Movement

This course is designed to take a comparative approach to understanding the major motor systems of the brain and will cover the basic elements of motor "control." However, the motor system does much more than contract muscles. Even the most basic movements such as walking require whole-body coordination that must be learned and adapted to our environment. During active sensation, motor systems even modulate our sensory perceptions. Much of what we have learned about motor systems comes from animals as diverse as crickets, electric fish, and birds. This course uses a comparative approach to understand the functions various brain regions contribute to our active lives.

Gen Ed Area: **NSM-BIOL**

Identical With: **BIOL358**

Prereq: **NS&B213**

NS&B360 Neuroplasticity and Neurogenesis in Health and Disease: Molecules, Cells, and Circuits

This course will examine structural and functional neuroplasticity in the nervous system. The ability of the nervous system to reorganize itself by forming new connections, strengthening existing connections, or pruning away old synaptic connections is regulated by our environment, both within the body and the external world. We'll examine critical periods in development when sensory experiences change and sculpt the wiring of the brain, learn how the birth of new neurons changes across the lifespan, and discover how adult neurogenesis is altered by the aging process, physical exercise, stress, and neuropsychiatric disorders, such as epilepsy and Alzheimer's disease. We'll also learn about potential stem cell therapies for enhancing brain repair and plasticity after brain injuries. Students will prepare for class by reading scientific papers and reviews on the topic. In class, I will introduce the topic with slide presentations, and after that we will discuss the topic based on the scientific article discussion. After the classes students will have extensive opportunities for feedback and will be requested to write a simple paragraph for the next class and/or answer a small quiz, based on the new knowledge acquired. Student evaluation will include weekly quizzes and/or assessment, a final exam, and class participation.

NS&B373 Exploring the Brain-Body Interface: The Neuroscience of Basic Survival

Basic survival depends on the brain's regulation of fundamental behaviors and physiological pathways, such as eating, drinking, breathing, digestion, cardiac

function, and thermal regulation. How do the brain and body communicate with each other to achieve homeostasis, different physiological states, and what goes awry in disease? How have different animals adapted to thrive under challenging environments, such as extreme temperatures, hypoxia, and resource scarcity?

In this advanced seminar, students will take a deep dive into the exciting research taking place at the brain-body interface. We will explore the main components of the peripheral nervous system, such as the vagus nerve and the dorsal root ganglia, that act as gatekeepers into our internal and external sensory worlds. We will also explore pathways in the central nervous system that regulate our basic bodily functions. By reading primary literature and review papers, as well as participating in in-class discussions, students will gain deep knowledge of this burgeoning field of neuroscience. Through short written assignments and oral presentations on topics of their choosing, students will gain skills in scientific writing and scholarship as well as in oral communication of scientific information.

NS&B390 Experimental Investigations into Reading

Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

Offering: **Crosslisting**

PHIL154 What Is Rationality?

What does it mean to be rational? Although this question has traditionally been the province of philosophy, reference to reason and rationality is also pervasive in the modern social and behavioral sciences. Humans are rational creatures--or, if they are not in practice, they should be. This course takes an expansive view of rationality and its history, tracing how the concept has changed over time, and critically examining its significance in the sciences and broader culture today.

From the role of reason in human flourishing and civic discourse in the ancient world, to early modern conceptions of logic as "the art of thinking," to Cold War attempts to build machines that might reason more reliably than frail humans, this exploration of reasoning and rationality explores several interlocking themes: the relationship between reason and other facets of the mind, especially emotion; conceptions of reason as an evaluative vs. a calculating faculty; the role of reason in human judgment; the relationship between rationality and rules; the relationship between choosing rationally and choosing ethically; and the fraught history of attempts to formulate universally valid principles of rationality.

PHIL160 Philosophy and the Movies: The Past on Film

This course examines how films represent the past and how they can help us understand crucial questions in the philosophy of history. We begin with three weeks on documentary cinema. How do documentary films achieve "the reality effect"? How has the contemporary documentary's use of reenactment changed our expectations of nonfiction film? Much of the course is devoted to classic narrative films that help us critically engage questions about the depiction of the past. We think about those films in relation to texts in this history of philosophy and contemporary film theory.

PHIL185F Reasonable Disagreements: Science, Philosophy, Magic, & Society (FYS)

Much of contemporary social and political discourse revolves around science--with many assuming that science is rational, objective, true, and the ultimate source of knowledge. As a result, it would seem unreasonable to believe in things like astrology, magic, alchemy, and other non-scientific ideals, or even to suggest that science might not be as objective, rational, or true as we might think. In this class we will explore different historical and philosophical approaches to distinguishing "legitimate" forms of inquiry and knowledge, considering the ways that our contemporary perspectives on science have been shaped by a long history of philosophy, "natural" philosophy, magic, theology, and "pseudosciences." We will investigate issues and concepts within and about science, including topics such as the nature of theories, the nature of scientific progress, and the relations among science, values, and society.

PHIL201 Philosophical Classics I: Ancient Western Philosophy

This course provides an overview of the development of Ancient Greek and Roman philosophy, from its inception in the 6th century BCE through to Socrates, Plato, Aristotle, the Epicureans, and the Stoics. In exploring this material, we will touch on all or nearly all of the central concerns of the Western philosophical tradition: metaphysics, epistemology, ethics, politics, aesthetics, religion, and logic. Our focus in class will be on the close analysis of primary texts. Students must be willing to engage with readings that are fascinating but at the same time dense, difficult, and perplexing. The course requires no prior experience in philosophy and should be of equal interest to students who are pursuing or intend to pursue other majors.

PHIL202 Philosophical Classics II: Early Modern Philosophy from Descartes Through Kant

Can we ever hope to attain certain knowledge of the external world? Can we know ourselves? How is our mind related to our body? Are our senses more reliable than our intellect? Or is it the other way round? Can we have science without a belief in God? These are some of the questions that excited the philosophical imagination of the major intellectual figures of the early modern period, an era of unparalleled collaboration between science and philosophy. In this course we will examine how the Scientific Revolution encouraged philosophers toward radical innovation in epistemology and philosophy of mind, laying the foundations for our own modern conceptions of natural law, scientific explanation, consciousness and self-consciousness, knowledge and belief. We will be reading, analyzing, and arguing with some of the most influential works in the history of Western philosophy, including Descartes' *MEDITATIONS*, Locke's *ESSAY CONCERNING HUMAN UNDERSTANDING*, Hume's *ENQUIRY CONCERNING HUMAN UNDERSTANDING*, and Kant's *CRITIQUE OF PURE REASON*.

PHIL206 Community-Engaged Philosophy: Teaching the Search for a Good Life

In this half-credit course, students who have successfully served as discussion facilitators for PHIL210: Living a Good Life will learn how to teach an abbreviated version of the course to local high school students in a nine-week voluntary after-school program. Having been trained in this special approach to discussion facilitation for their fall semester work in PHIL210, students will be able to deepen their knowledge of both course content (philosophy) and their facilitation skills through guided experiential learning. Course topics will focus on the skills of learning through close observation and reflection on one's teaching (reflective practice), understanding one's students (adolescent development, cultural consciousness), and pedagogical knowledge regarding lesson planning, student engagement, developing productive classroom climate, promoting self-directed learning, and authentic assessment. Students must have served as discussion facilitators/leaders for PHIL210.

PHIL207 Live Like a Philosopher

Philosophy in the ancient world was viewed not simply as a discipline or body of doctrine but as a way of life. In this project-based learning course, we will study and put into practice the theoretical views of four schools of ancient philosophy in the Greek and Roman world: Platonist, Aristotelian, Epicurean, and Stoic. After some preliminary work introducing ourselves to each of these schools, the majority of this course will be divided into four units. In each unit, students will "live like a philosopher" by incorporating the thought of each school into their daily lives. The aims of this course are to test the viability of these philosophical theories, consider how they may be put into practice, and explore how they may illuminate for us what it means to lead a well-lived life.

PHIL210 Living a Good Life

For many philosophers, Eastern and Western, philosophy has been more than an effort to answer fundamental theoretical questions. It has been an activity aimed at changing one's orientation to the world and, thus, how one lives one's life. We will explore Chinese, Greco-Roman, and contemporary versions of the idea that philosophy should be seen as a way of living a good life. How does philosophical reasoning interact with lived practice? How do views about metaphysics or psychology lead to ethical commitments? Despite their differences, Confucians, Daoists, Aristotelians, and Stoics all agreed that philosophy should aim at making us better people. Can such an idea still get traction in today's world?

This course will typically have a large-group lecture each Monday, smaller breakout sections with the instructors on Wednesdays in which the texts and ideas will be discussed, supplemented by smaller weekly student-led dialogue sessions on Fridays. For details about the structure of the course and a syllabus of class meetings, along with the locations of plenary lecture sessions, breakout sessions, and dialogue sessions, please see this year's course website and past versions of the course at the following link: <https://livingagoodlife.com>.

Students who would like to explore the ancient Chinese and Greek texts on which the course draws are encouraged to enroll in either of two, optional 0.50-credit classes that are associated with our course: PHIL151 Living a Good Life: Chinese Lab; and PHIL152 Living a Good Life: Greek Lab. These courses will expose students with no prior background to the Classical Chinese and Greek languages. See their separate entries in WesMaps for more information.

PHIL211 Critical Philosophy of Race

What is race? Can philosophy account for it or describe it? This class will serve as an introduction to the field of philosophy of race, and examine the general crises or problems that race and racism raise for philosophical projects and methods. We will explore topics such as the ontology of race, its relationship to other social formations like class and gender, its foundations in violence, and its fugitive possibilities. We will read work from classical philosophers of race--like Charles Mills, Linda Alcoff, and David Haekwon Kim--and from scholars at the margins of philosophy--like Gloria Anzaldua, Adrian Piper, and Fred Moten.

Identical With: **AFAM211**

Prereq: **None**

PHIL212 Introduction to Ethics

This course will begin with some ancient questions about values. We find that two ancient approaches to right living (Platonic-Stoic and Aristotelian) differ radically over how much experience or society can teach us about what is good. Yet both insist that moral life is essentially connected to individual happiness.

Turning next to modern ideas of moral action (Kantian and utilitarian), we find that they both emphasize a potential gulf between individual happiness and moral rightness. Yet, like the ancients, they disagree over whether morality's basic insights derive from experience.

The last third of the course explores more recent preoccupations with ideas about moral difference, moral change, and the relation between morality and power. Especially since Marx and Nietzsche, moral theory faces a sustained challenge from social theorists who allege moral norms and judgments serve hidden ideological purposes. Some have sought to repair universal ethics by giving an account of progress or the overcoming of bias, while others have argued for plural or relative ethics. Ecological critics have challenged moral theorists to overcome their preoccupation with exclusively human interests and ideals. What kinds of moral reflection might be adequate to problems of global interdependence?

Students will come to understand the distinctive insights and arguments behind all of the positions considered, to recognize more and less cogent lines of response to them, and to shape their own patterns of moral reasoning through careful reflection.

PHIL213 Introduction to Existentialism

This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldua, and Frantz Fanon. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

PHIL214 Reasoning About Justice

This course introduces students to the disciplined study of philosophy through reflection on justice and the grounding and authority of claims invoking justice. The central theme of the course is that conceptions of justice and its authority cannot be understood or established in isolation. The meaning and authority of claims about justice and injustice can only be established through inferential relations to other philosophical issues, for example, concerning reason, knowledge, reality, agency, and identity. These issues will be explored through reflective engagement with classic treatments of these issues by Plato, Hobbes, Kant, and more contemporary philosophical work. The contemporary readings include discussions of distributive justice (concerning access to resources and opportunities); the interplay between gender, race, and conceptions of justice; and whether justice and injustice can be assessed comparatively without reference to a comprehensive, ideal social order.

PHIL214F Thinking with Animals (FYS)

Non-human animals are all around us but often we don't think about them, and more often than not, we don't consider thinking with them. Some people continue to believe that animals don't think at all. In this course we will explore our relationships with other animals, what we think of living with and around them, what we imagine they think about living with and around us. We will use philosophical, scientific, and literary texts to help us explore our complex relationships with other animals.

PHIL216F Whither Democracy? Introduction to Political Philosophy (FYS)

The course introduces students to some of the major philosophical perspectives that continue to inform contemporary social and political thought. We begin with the two paradigmatic arguments for obedience to the state and arguments for civil disobedience given by Plato and Dr. Martin Luther King Jr. We then look at

the main justifications for obedience to the state--the social contract, freedom and equality (by looking at the topic of work and a universal basic income)--and then explore the contemporary crisis of democracy. We then conclude by exploring civil disobedience as the legacy of Dr. King in light of Tahrir Square/ Occupy Wallstreet/BLM.

PHIL218 Personal Identity and Choice

This course explores philosophical reflections on the problem of personal identity and its relationship to matters of choice and freedom. How do certain experiences and thoughts and physical materials compose oneself? Am I the same person over time even through complete transformations of experience, thought, and material? Can I choose which elements of my existence to count as essential? Some argue the concept of a unified and enduring self partakes of illusion; at the other extreme, some argue for the permanent integrity of individual souls. Regarding choice and freedom, we find a related debate, ranging from those who deny free will altogether to those who define humanity's essence in terms of choice and agency. Might we coherently say that some human selves can have more integrity and others less? What gives a measure of meaningful coherence to a person's life? Similarly, can we distinguish some choices as more free than others? What makes for meaningful choice? Besides serving as an introduction to philosophical reasoning, the course will draw interdisciplinary connections on themes such as social identities, religious experience, political freedom, and legal responsibility.

PHIL222 Global Philosophy

Philosophy is not now, nor has it ever been, narrowly confined to one culture, tradition, or civilization. As European and then American power reached around the world in recent centuries, so too have Euro-American philosophical traditions acquired a global audience, but other philosophical traditions did not disappear. These other ways of approaching philosophy have been re-emerging or reconstituting themselves--sometimes drawing on and sometimes contesting assumptions from the Euro-American traditions--in what can loosely be called our post-colonial world. This course asks what "philosophy" means in these different contexts and explores how philosophy was and is done within various traditions. In addition, we probe and assess distinct approaches to making philosophy more global, which at the very least must mean more cognizant of the presence of multiple ways of doing philosophy.

PHIL231 Reason and Paradox

This course is an introduction to philosophy, logic, and conceptual issues underlying the foundations of the natural and social sciences. We will examine and analyze a range of patterns of reasoning that lead to surprising, even alarming, conclusions. These go from fallacious arguments whose mistakes can be clearly pinpointed, to conceptual puzzles whose resolution leads to insights about reasoning, to four genuine paradoxes for which there are no clear solutions at all. Most of these paradoxes have been known since antiquity: Zeno's Paradox, about the concepts of space, time, and motion; the Liar Paradox, about the notions of truth and reference; the Sorites Paradox, about the notion of vagueness; and a surprise paradox to be announced in class. The analysis of fallacies and puzzles leads to the study of deductive logic. On the basis of a working knowledge of logic, we will be in a position to see how the paradoxes challenge both the fundamental assumptions that we make in thinking about the world and the very assumptions that underlie rational thought itself.

PHIL233F Bodies and Experiences (FYS)

Philosophers study the world with their minds. But who says that they should only discuss "mental" stuff such as concepts, rationality, or logic? This course is about bodies, and about the experiences that we have in virtue of those bodies. We will explore a variety of contemporary philosophical topics that have bodies and experiences at their center. These include the experience of skilled movement when we dance or play a sport, having a physical disability, or being shamed for our body size. We will discuss the ways we experience race, gender, sex, and sexual orientation. We will learn what makes a question distinctly philosophical and what methods philosophers follow to answer it. But most importantly, we will learn to be OK with the fact that there might be no true answer at all.

Offering: **Host**

Grading: **OPT**

PHIL250 Thinking By Analogy: The Philosophical Use of a Literary Form

"Juliet is the sun!" So says Romeo, but what does it mean to say someone is the sun? Presumably, Juliet is the sun in being the source of warmth, life, and light in Romeo's world. Yet Juliet is of course not the sun in being an object of astrophysical study, or a giant ball of burning gas. Romeo's claim works, it seems, through a curious interweaving of being and not-being; of sameness and difference.

Analogical thinking serves as a source of illumination in all human cultures, and is a pivotal method of comparative and critical inquiry across a range of diverse fields. It facilitates the exploration of abstract themes in literature, aids in drawing insightful inferences in scientific discovery, navigates the complexities of case precedents in legal reasoning, and supports the crafting of compelling ethical arguments. This course will examine the art of analogy as a tool for philosophical understanding and creative thought, tracing its development in the history of philosophy through to its contemporary applications. Roughly half of the semester will focus on premodern perspectives on analogical thinking and verbal image-making, with an emphasis on the contributions of Plato and Aristotle. The remaining half will focus on later works of philosophy and literature that theorize about or employ analogical methods. Our interest throughout will be in how such thinking helps address issues surrounding the nature of reality, representation, and interpretation.

PHIL251 Classical Chinese Philosophy: Chinese Lab (CLAC.50)

This 0.5 credit course is conducted in Chinese and designed to supplement the standard English-language Classical Chinese Philosophy (PHIL205) course. Students must have taken PHIL205 in the past or be enrolled in it simultaneously. The course will have two main foci: introducing students to modern and contemporary Chinese-language debates about Chinese philosophy and exploring in greater depth the meaning of key passages from the classical works students are reading in translation in PHIL205.

Both advanced learners of Chinese (fourth-year level or above) and native speakers are welcome. Familiarity with classical Chinese is desirable but not required. Assignments will include presentations in Chinese and some written work in English; evaluation will be tailored to each student's language background. If you are unsure whether your language background is sufficient for the course, please contact the instructor.

PHIL252 Nietzsche - Science, Psychology, Genealogy

This course offers an intermediate survey of Friedrich Nietzsche's mature philosophical writings. Nietzsche's thought is centrally concerned, throughout his career, with a cluster of classical philosophical questions--does human life have meaning? What makes an action right or wrong? Can we comprehend the true nature of reality? What undergirds our normative judgments (of beauty or justice)? We will be especially concerned with tracking Nietzsche's reflections on the impact of modern science (especially the advent of Newton's mechanical physics and Darwin's evolutionary biology) on our conceptions of value and meaning in human life.

PHIL253 Nietzsche als Versucher (CLAC.50)

The term "Versucher" combines three meanings: (i) a writer of essays, (ii) a maker of experiments and hypotheses, and (iii) a tempter who seductively tests convictions and provokes latent desires. Friedrich Nietzsche draws on all these senses when he proposes "Versucher" as "the not-undangerous name [he] dares to bestow" on the "philosophers of the future"--a coming generation of free spirits who will (finally) be capable of appreciating and continuing his intellectual legacy (Beyond Good and Evil, §42).

This course will interrogate Nietzsche's conception of a philosophical Versucher and examine how this concept might apply to Nietzsche himself: as an experimenter with literary style and genre (including the essay form) and as a polarizing cult figure who has attracted the fascination of generations of teenagers and the most diverse (often diametrically opposed) ideological movements. How is it that Nietzsche inspires such passionate attachment in such radically different readers? What is it about his philosophical style and literary form that cultivates a feeling of intimacy and fierce allegiance while also admitting such aggressively divergent interpretations? To explore these questions, we will read and discuss excerpts from Nietzsche's writings and correspondence alongside texts by his friends and interlocutors--such as Richard Wagner, Paul Rée, and Nietzsche's unrequited paramour, Lou Andreas-Salomé. We will also look at prominent cases of his cultural reception--notably by the Nazi party (due to the influence of Nietzsche's sister, who was a party member) and simultaneously by opponents of totalitarianism such as Robert Musil, Karl Löwith, and Walter Kaufmann.

This course is part of the Fries Center for Global Studies' Cultures and Languages Across the Curriculum (CLAC) initiative. It is taught in German and associated with COL290/PHIL252 "Nietzsche - Science, Psychology, Genealogy," though students can take either course independent of the other. No background in philosophy or literature is required for this course, but advanced-intermediate (B2+) reading and spoken German is a must.

PHIL254 The Rationalist Tradition in Early Modern European Philosophy

This course offers an intermediate-level survey of the Rationalist tradition in Early Modern European Philosophy. Broadly speaking, Rationalism (with a capital 'R') is the view that human reason can deliver insight into significant philosophical truths, without relying on sense experience. We will explore varieties of this methodological commitment in connection with several core topics - including the existence of God, the nature of the human mind (or soul), its relation to the body, and the possibility of empirical knowledge. We will read texts by René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, Baruch Spinoza, G.W. Leibniz, and Emilie Du Châtelet.

PHIL255 Moral Psychology

Moral psychology is the study of our minds that is aimed at an understanding of how we develop, grow, and flourish as moral beings. In this course we will examine historical and contemporary texts from philosophy, psychology, and spiritual writings that deal with the nature of the good life for human beings, the development of virtues, and the cultivation of ethical understanding and moral sensibilities. Emphasis will be both on careful understanding of the texts and on the attempt to relate the theories discussed to our own moral lives.

PHIL257 Human Nature in Chinese Thought

This is a course on theories and practices regarding human nature in the history of Chinese traditions, such as Confucianism, Daoism, Legalism, Buddhism, and Neo-Confucianism. What does it mean to be a human? Do all humans have something in common? How should we conduct our lives with respect to those common characteristics? Thinkers from both Western and Eastern traditions have offered their own distinctive and thought-provoking answers to those questions.

In the West we are more familiar with the concept of "rational animal" which remains the classical understanding of human nature since the time of Plato and Aristotle. In the history of the Chinese tradition, however, very different approaches towards human nature were adopted, such as the concepts of sympathy, effortless action, no-self, and original enlightenment. Together they can offer us some new insights into the concept of human nature beyond just rationality.

PHIL258 Post-Kantian European Philosophy

In this study of 19th- and 20th-century philosophy in Europe (primarily France and Germany), special attention will be devoted to the interpretation of modern science, its significance for understanding the world as distinctly modern, and

ourselves and the world as natural (or as transcending nature). Related topics include the scope and limits of reason, the role of subjectivity in the constitution of meaning, the place of ethics and politics in a science-centered culture, and the problems of comprehending historical change. Philosophers to be read include Kant, Hegel, Marx, Nietzsche, Husserl, Heidegger, Weber, Marcuse, Habermas, and Foucault. The course is designed to introduce students to a very difficult but widely influential philosophical tradition and will emphasize close reading and comparative interpretation and assessment of texts and reasoning. This course meets the Social, Cultural, and Critical Theory Certificate's requirement in philosophical origins of theory.

PHIL259 Neo-Confucian Philosophy

This course presents critical discussion of issues central to Neo-Confucian (11th--19th centuries CE) philosophers that in many cases are still central in East Asian thought today. Topics will include the relation between knowledge and action, Neo-Confucian conceptions of idealism and materialism, and the connection between Neo-Confucian philosophy and spirituality. While our primary focus is on China, we will also look at distinctive Neo-Confucianism issues in Korea and Japan.

PHIL260 Reading Mencius in Chinese (CLAC.50)

This course offers students the opportunity for guided reading of the original, classical Chinese text of the great Confucian classic Mencius (or Mengzi). Advanced (fourth-year level or above) competence in Chinese (including native Chinese competence) is required for the class, but previous experience in classical Chinese is not. The pace of reading and language of discussion will be determined based on student enrollment.

PHIL261 Philosophical Classics III: Post-Kantian Analytic Philosophy

This course focuses on the development of a central strand of European and American philosophy after Kant: the analytic tradition of philosophy. The philosophical orientation, problems, and methods of this tradition animate much of contemporary philosophy, and this course aims to provide a basic grounding in this tradition, and thereby a gateway to current mainstream philosophizing. Topics include: logic, mathematics, science, necessity, thought, knowledge, and reality.

PHIL262 Phenomenology and Existentialism

In this course, we will study and discuss two interrelated and complementary schools of thought in Western philosophy: phenomenology and existentialism. We will cover both history and contemporary debates, as well as

phenomenology-inspired research in cognitive science, psychology, and neuroscience. Roughly half the course will be devoted to the origins of phenomenology and existentialism, setting the main views within their historical context. The other half will discuss contemporary philosophical debates and scientific research, for example in artificial intelligence and robotics, involving phenomenological approaches.

PHIL264 Japanese Philosophy

This course traces the development of lines of thought from the Heian Period (794-1185) to the 21st century. Students will consider Japanese forms of Buddhism (including Zen) and Confucianism, as well as Japan's native tradition of Shinto. Students will also gain familiarity with the confluence of these traditions in the samurai (Bushido), and later incorporations of Western thought by the Kyoto School. The final section of the course, focused on Japanese aesthetics, invites students to engage in Japanese philosophy as a way of life.

PHIL265 Postanalytic Philosophy: Science and Metaphysics

The analytic movement in early 20th-century philosophy distinguished the domain of philosophy from that of empirical science. The sciences were empirical disciplines seeking facts, whereas philosophy primarily involved the analysis of linguistic meaning, often using the resources provided by formal logic. Criticisms of this conception of philosophy and its relation to the sciences have shaped much of the subsequent development of anglophone philosophy. This course will examine closely some of the most influential later criticisms of the early analytic movement and the resulting reconceptions of philosophy as a discipline. The central themes of the course cut across the fields of epistemology, metaphysics, and the philosophy of language and mind. Special attention will be given to philosophy's relation to the empirical sciences, since this has been a prominent issue raised by the criticisms of the early analytic movement. Among the philosophers most prominently considered are Quine, Sellars, Davidson, Putnam, Dennett, Kripke, Brandom, and Haugeland.

PHIL267 History and Limits of Aesthetic Theory

This class will engage significant contributions to Aesthetic Theory in the West from antiquity to the modern period along three dimensions: theoretical, critical, and historical. From a theoretical standpoint, we will address perennial questions in aesthetics, such as what makes something a work of art in the first place, what it means for art to be "beautiful" or otherwise "successful," how differences in media condition and contribute to artistic meaning, what genera are and how they evolve, whether and how art can be ethically or politically significant, why we care about fiction, why and how we "enjoy" tragic plays or horror films, and how artistic tradition can (and should) inform individual works. From a critical standpoint, we will consider how works of art contemporaneous with each theoretical account either reinforce or challenge its specific proposals. And from a historical standpoint, we will seek to understand how aesthetic theories both respond to the specificities of their own epoch and situate themselves relative to the artistic and aesthetic traditions of their predecessors. Readings will include texts by Aristotle, Hume, Kant, Lessing, and Hegel.

Prereq: **None**

PHIL269 Modern Aesthetic Theory

As a philosophical discipline, aesthetic theory initially coalesced around a cluster of related issues concerning the nature of beauty and the norms governing its production, appreciation, and authoritative assessment. Beginning in the nineteenth century, however, both art and aesthetics undergo a conspicuous yet enigmatic shift, signaled by (among other things) Hegel's declaration that "art, in its highest vocation, is and remains for us a thing of the past." Rather suddenly, classical accounts of beauty, genius, aesthetic experience, and critical taste are beset by anxieties about the autonomy and significance of aesthetic praxis in human life and, subsequently, by a series of challenges to the tenebosity of traditional aesthetic categories--author, text, tradition, meaning and interpretation, disinterested pleasure, originality, etc. Our aim in this course is to track these conceptual shifts and to interrogate the rationale behind them. (This course complements, but does not presuppose COL 266: History and Limits of Aesthetic Theory.)

PHIL270 Environmental Philosophy

This course offers philosophical resources for understanding and addressing environmental concerns. At the same time, we will recognize how ecological insights challenge some of the most influential ideas in the European philosophical tradition--human-centered and individualist accounts of existence, agency, knowledge, and value.

Shared questions may include:

Is there a coherent way of distinguishing "nature" from the non-natural?

What can we understand about non-human experience and value?

How do people become motivated to recognize and respond to problems whose effects play out in far-away or unfamiliar bodies?

How do concepts of moral responsibility apply to climate change?

How does environmentally directed action relate to social justice?

When there are ecological impacts attached to choices that are conventionally seen as matters of personal liberty (such as food choices, living arrangements, reproductive choices), how do we constructively engage with one another?

Despite near consensus about our times being rife with environmental crises, concepts like "environment" and "nature" defy any straightforward account. Similarly, it seems even when people come together around problems of injustice and unsustainability, they may not share any clear positive account of justice or of sustainability.

Rather than be defeated by the lack of shared foundational concepts, students will become familiar with at least three patterns of critique--each of these being not a theory or kind of information but a set of skills with perceptual, conceptual, and dialogical aspects. These three patterns of critique are ecological critique, standpoint critique, and sustainability critiques, and they correspond roughly to three traditional domains of philosophy: inquiry into being (metaphysics), inquiry into knowledge and understanding (epistemology), and inquiry into norms and ideals for action (ethics).

Understanding these three patterns of critique allows students to address emerging environmental problems more effectively, recognizing the intertwined relations among empirical inquiry, moral accountability, and social justice.

PHIL271 Data, Privacy, and Ethics

Paying for items at the grocery store has become automated thanks to self-checkout stations. Grabbing a coffee at McDonalds involves plugging an order onto a screen. These and other new technologies positively and negatively impact society. For instance, many of these now automated procedures were once occupations, and research shows that automation is displacing jobs that would normally serve underrepresented communities. What's more is that these machines store your information: what you bought, how many items, and

at what time you made the purchases. The internet and various social media websites store even more information that is bought and sold to companies and organizations. Thus, should it be permissible for automation to replace workers? What is and isn't moral use of such information? Who is responsible if a machine does something wrong? Are there scenarios in which an organization should not have access to data? In this class, we will explore these questions and other normative questions on data-driven technologies by way of case studies on particular topics. We will explore the following topics: data ownership, surveillance and privacy, algorithmic bias and its solutions, misinformation, 'the black box problem,' opacity in machine learning, and societal implications of automaton. Authors to be read include Emmanuel Mesthene, Cathy O'Neil, Wendell Wallach, Frances Haugen, Sina Fazelpour, David Boonin, and more. Some relevant movies that touch on these topics include Chappie, Coded Bias, the Minority Report, and the Great Hack.

Prereq: **None**

PHIL273 Philosophy of Law

This course will consist of four sections. We will start by understanding what law is by looking at a classic debate within the philosophy of law between natural law and legal positivism (whether law and morality are connected). We will then look at adjudication, the different methods that judges use to interpret laws and we will do this by looking at famous, recent supreme court judgments. We will then look at freedom of religion cases and think about whether religious practices should be exempt from general laws that normally applies to everyone. We will end with the largest section of the course: the legal regulation of freedom of speech and then connect it to freedom of speech on the internet.

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

PHIL274 Self & Social Transformation

Racism, sexism, and classism are deeply ingrained in our habits and feelings. It seems that in order to change objective conditions we need to change ourselves and our communities. But given that our habits and feelings are often unconscious and resistant to change, how do we philosophically go about doing this? This class tries to answer this question. It starts theoretically with ancient Greek and ancient Chinese virtue ethics as well as Foucault's later work on self-transformation. It then takes these concepts/theories and sees them in action in contemporary movements of self/community transformation. We start with a paradigmatic political activist movement of self-transformation: the Black feminist transformative justice movement with the goal of prison abolition. But as we progress, we will explore less obvious and seemingly more mundane movements of self- and community transformation such as Saba Mahmood's

dawa movement from Egypt, Weight Watchers, and finally "ballroom" culture from Detroit. Anthropological ethnographies of these movements will help show how we can self-reflexively shape our own habits and transform ourselves.

Prereq: **None**

PHIL277 Feminist Philosophy and Moral Theory (FGSS Gateway)

This course explores the dialogue between feminist concerns and moral theory. It will explore not only how moral theory might support certain central feminist insights and aims but also why some feminists cast doubt on the project of "doing moral theory." Does the language of existing philosophical moral theories (reason, fairness, equality, utility, human nature, rights) sufficiently allow articulation of feminist problems? If not, how can feminist moral theorists move us beyond the grip of familiar gender-loaded oppositions? After surveying a range of perspectives on feminism and philosophy, we will give a deep reading to three book-length developments of feminist ethics: one from a Kantian perspective, one focused on care, and one focused on virtue ethics. As a gateway course for the FGSS program, this course serves to introduce critical thinking about the construction of gender and the intersection of gender with race, ethnicity, class, and sexuality.

PHIL278 Political Philosophy

The United States incarcerates more people than any other country in the world. Over 2 million people are caught in the criminal justice system today. A disproportionate number of those incarcerated are people of color, particularly black, Latino, and indigenous men. Women, too, are a growing part of the prison population, as are queer, transgender, and gender-nonconforming people. Children, particularly impoverished black youth and, increasingly,

immigrants, are funneled into correctional supervision. In this course we will ground philosophical explorations of freedom and captivity by exploring the vexing problems faced by those who are incarcerated.

PHIL280 Theory, Critique, Politics

The subject of this course centers on two questions in 20th century continental philosophy. First, what can theory bring to our understanding of politics? Second, what is the role of critique for political judgment? We will begin with Kant for an understanding of the meaning of "critique" that many 20th century continental philosophers draw upon. Following this introduction, the course will be split between German philosophers and French philosophers to allow us to understand the tensions and convergences between the two camps. The German philosophers we will read are Heidegger, Adorno, Herbert Marcuse, and Ernst Bloch. For the French philosophers, we will read Jean-Paul Sartre, Simone de Beauvoir, Maurice Merleau-Ponty, and Michel Foucault. By the end of the course students will be able to assess how different thinkers attempted to resolve the relationship of the philosopher to political society.

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

PHIL281 Africana Political Philosophy 1800s-1970

This course aims to introduce students to both the critical and the constructive dimensions of Africana political thought. Through our readings and discussions, we will assess the claims that Africana thinkers have made upon the polity, how they have defined themselves, and how they have sought to redefine the basic terms of public life away from either slavery or colonization. Among the themes that we will explore are the relationship between slavery and democracy, the role of historical memory in political life, the political significance of culture, the connections between "race" and "nation," and the tensions between claims for black autonomy and claims for integration, as well as the meaning of such core political concepts as citizenship, freedom, equality, progress, power, and justice. As we focus our attention on these issues, we will be mindful of the complex ways in which the concept of race has been constructed and deployed throughout historical periods and its interrelationship with other elements of identity such as gender, sexuality, class, and religion. Furthermore, we will attend to differences across black geographies from the Americas to the Caribbean, and parts of Africa.

PHIL282 Reason and Revelation: An Introduction to the Philosophy of Religion

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

PHIL286 Philosophy of Mind

This class is a philosophical investigation into the nature of the mind. We will explore such questions such: What kinds of beings are capable of having mental states? Can non-human animals or computers think and feel? What is it to be conscious, and can the subjective, first-personal experience of consciousness be adequately captured by a scientific theory? How do our minds represent the world? By what mechanism do our thoughts, feelings, and desires get linked up to the things around us? We will ask these questions with the goal of shedding light on our nature as thinking, feeling beings, and on the relation of our inner lives to the physical world.

Offering: **Host**

PHIL290 Philosophical Logic

This course will study the philosophical and conceptual foundations of deductive reasoning, developing into an exact theory of the fundamental principles of such reasoning. A subsidiary aim is to equip the student with the necessary background for reading contemporary philosophical texts.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHIL**

Prereq: **PHIL231 OR PHIL230**

PHIL291 Reason and Its Limits

This course offers a close study of Immanuel Kant's magnum opus, the Critique of Pure Reason, supplemented by related writings by Kant and some secondary literature. Kant observes that the history of philosophy is rife with disagreements, even though philosophers purport to traffic in necessary truths disclosed by reason alone. This scandalous fractiousness calls into question reason's ability to offer substantive insights into necessary truths. Kant's "critique" aims to vindicate reason by distinguishing, in a principled manner, the sorts of things we can know with certainty from those that lie beyond the limits of human understanding. His central thesis, "transcendental idealism," holds that "reason has insight only into what it produces after its own plan" (Bxiii). In other words, we can indeed be certain of key structural features of reality such as its spatiotemporality and causal interconnectedness—but only because those features are, in some crucial sense, mind-dependent. This class will explore in detail the arguments for these claims as well as prominent interpretations of their philosophical upshot.

Prereq: **PHIL202 OR PHIL231**

PHIL296 Philosophy of Psychology

How does the mind work? So-called "computationalists" think that the mind (and the brain) works as a computer, which first forms and manipulates symbols (usually called "mental representations") according to rules, and then issues "commands" to guide behavior. On the other hand, the "5E" (Ecological, Embodied, Embedded, Enactive, Extended) approach rejects the computer analogy. 5E theorists insist that minds, and minded organisms more generally, cannot be understood in isolation from their environment. Cognition doesn't happen "in a vacuum," and it isn't separable from action. As a consequence, the mind can extend beyond the boundaries of our skull and even of our whole body. This course is devoted to comparing and contrasting the computationalist and the 5E approaches to cognition. We will examine similarities and differences, assumptions and commitments with respect to core debates at the interface of philosophy, psychology, and cognitive science such as, for instance, the nature of visual perception.

Identical With: **CEAS298**

Prereq: **None**

PHIL298 Feminist Epistemology

Traditionally, the project of theorizing about knowledge (including concepts such as justification, belief formation, and rationality) assumes that such an enterprise is possible even if one ignores the context and situation of the knower: Philosophers can theorize about, say, belief formation, even if we ignore who is forming the belief--that is, we can ignore their educational, socio-economic background, gender, ethnicity, race, and disability status. Feminist epistemologists question this assumption: They think the context and situation of the knower is relevant for knowledge acquisition and generation. In this course, we will specifically focus on scientific knowledge, since science is typically assumed to be 'pure' and 'isolated' from socio-political and cultural influences. Some questions we will address include the following: Is the notion of scientific objectivity gendered? Is rationality gendered? In what ways can the process of scientific theorizing be more equitable? Do the ideals and standards of science themselves need to change? This course will study the work of Linda Alcoff, Elizabeth Anderson, Sandra Harding, bell hooks, Helen Longino, Maria Lugonés, Alison Wylie, and more.

PHIL301 Du Châtelet's Philosophy of Science

Émilie Du Châtelet was a respected and lauded natural philosopher, mathematician, and physicist during her time. She published an essay on fire in 1739 alongside Voltaire, and published two editions of her work on physics and philosophy, namely the Foundations of Physics, in 1740 and 1742. After Du Châtelet's death in 1749, her former math tutor collected and submitted for publication her translation and commentary of Newton's Principia. It was successfully published and remains the leading translation of Newton's work today in France. Despite her success in the 18th century, Du Châtelet has been a neglected, and she remains an understudied figure in the history and philosophy of science since the 20th century. This course seeks to critically examine Du Châtelet's philosophy of science taking into account the authors with whom she engaged (Newton, Leibniz, and Descartes in particular) as well as the current state of scholarship concerning her work. The main text of study will be her Foundations of Physics, and the main topics of discussion will include the following: principles of knowledge, hypotheses, method, space and time, matter, motion, and gravity. Alongside the Foundations of Physics, we will also read Katherine Brading's Émilie Du Châtelet and the Foundations of Physical Science.

PHIL302 Catching Glimpses: Perceiving Infinitesimals in the Scientific Revolution

The rise of mathematical natural science in the early modern period marked the dissolution of objective reality as it had previously been known. Since Aristotle, perceptible objects had been understood to be enduring substances whose identities were inscribed in their very being and which retained these identities through change. The mechanistic worldview of the 17th and 18th centuries exploded this stable order into a telescoping multiplicity of material systems, from the infinitesimally small to the infinitely large. Rather than encountering a world of enduring and identifiable substances--animals, vegetables, and minerals; people and artifacts--the perceiver was instead confronted with fleeting constellations of homogeneous matter in a perpetual flux, no sooner glimpsed than gone. This metaphysical picture of infinitary flux was complemented by a new branch of mathematics, the infinitesimal calculus,

which proved immensely successful both in uncovering new theorems and in modeling empirical phenomena.

Both the metaphysics and the mathematics of the new science were, however, rife with paradox. If material objects not only harbor a microscopic substructure but are, in fact, divisible without end, then we are faced with pluralities of pluralities without any underlying unities--parts of parts of parts...and not a whole among them. Conceptual instability afflicted the infinitesimals used in calculus, as well. In some contexts they were treated as very small but non-zero quantities, in others as strictly zero--provoking one critic to call them "ghosts of departed quantities."

In conjunction with the CHUM theme "Ephemera," this class will study the philosophical turbulence induced by the new science--in particular, by the mechanical philosophy and infinitesimal calculus. We will pay special attention to its consequences for the philosophy of perception. Aristotle compared perceptible objects to signet rings impressing their distinctive forms on the receptive wax of the human sensorium. But if there are no enduring substances or determinate forms, how are we to understand our perceptual relation to the world? How must perceptual experience be reconceived so as to accommodate the fleetingness and flux of material phenomena? And how is it that, though we are awash in ephemera, we nevertheless enjoy an (illusory?) impression of endurance and stability?

PHIL303 Plato's REPUBLIC

"The safest general characterization of the European philosophical tradition is that it consists of a series of footnotes to Plato." This declaration, famously made by Alfred North Whitehead in the early 20th century, seems especially true of Plato's Republic. No other work in the Western tradition can lay claim to setting the tone so influentially for the development of philosophy as a discipline. Almost every branch of philosophical thought we are familiar with today--on matters of ethics, politics, moral psychology, epistemology, metaphysics, and aesthetics--receives a major formulation in this text. This seminar will be devoted to a close reading of each of the 10 books of The Republic alongside various perspectives that have been taken on this magisterial work in contemporary philosophy, journalism, and literature. We will focus on The Republic primarily as a work of moral psychology by investigating the topical question of the dialogue: Why is it better to live justly rather than unjustly? For Plato, a just life is one governed by the pursuit of wisdom or learning, and this he believes will also be a psychologically healthy one. By contrast, a life governed by the indiscriminate pursuit of power--the life of a tyrant--is psychologically corrupted. These are bold claims. What is Plato's argument for them? In raising this question, we will consider the political project Plato embarks upon in the Republic in constructing a just society, as well as connected issues he raises in the dialogue concerning the nature of human motivation, the distinction between belief and knowledge, the distinction between appearance and reality, the importance of a proper education to the human good, and the role of art and beauty in furthering the common good. Alongside Plato, we will read various works of secondary literature, journalistic pieces, and works of fiction this semester, all inspired by The Republic.

PHIL304 Infinity and the Mathematization of Nature: Early Modern Perspectives

The "mathematization of nature" is a hallmark of the so-called "scientific revolution" in sixteenth- and seventeenth-century Europe. By privileging quantitative methods for measuring and explaining natural phenomena, thinkers broke with the largely "qualitative" forms of explanation typical of the Aristotelian tradition. Especially with the development of new mathematical methods--notably, advances in algebra, analytical geometry, and the development of infinitesimal calculus--the scope and explanatory power of natural philosophy was considerably extended. At the same time, however, new puzzles arose about how the pristine models of abstract mathematics could apply to the messy reality of concrete nature. This question was especially pressing in connection with new mathematics' exploitation the notion of infinity: infinite series, infinite extensions, infinitesimally small quantities, and even infinities greater than other infinities. Should we take the successful application of such infinitary mathematics to natural phenomena to imply that nature itself harbors an infinity of infinities? And how must we reconceive the cognitive powers of the human mind to make room for the fact that infinity has ceased to signify the unknowable as such and has instead become a primary tool for producing scientific knowledge?

In this seminar, we will examine some of the most prominent Early Modern applications of infinitary mathematical methods in the study of natural phenomena as well as central debates about what sense, if any, can be made of these procedures and their apparent success.

PHIL306 Sophist, Statesman, Philosopher: Plato's Later Metaphysics and Politics

How is it possible to speak falsely? Plato connects this question with a puzzle he inherits from the great pre-Socratic philosopher Parmenides: to speak falsely is to speak about what is not; but in speaking about what is not, we ascribe being somehow to not-being, which sounds like a contradiction. This seminar will focus on the metaphysical, epistemological, and political issues generated by Parmenides's puzzle and explore Plato's solution to them in two of his later-period works: the Sophist and the Statesman. In the process, we will see how Plato rethinks his theory of forms in these dialogues, how he learns to let go of Socrates, how a sophist should be distinguished from a philosopher, and how all of this is relevant to politics and the art of ruling.

PHIL321 American Pragmatist Philosophy: Purposes, Meanings, and Truths

This course sketches and evaluates an American tradition of more or less overtly pragmatist thinkers in philosophy and the human sciences, stretching roughly from Emerson and Peirce at the beginning; through William James, George Herbert Mead, and John Dewey in the heyday of the pragmatist public intellectual; to recent and current writers as diverse as Cornell West, Robert

Brandom, Richard Rorty, Ian Hacking, and Ruth Millikan. These thinkers offer variations on the premise that all meanings gesture not only backward to facts and things but also forward to the practical circumstances and purposes of interpreters. As purposes shift, so do meanings, and as meanings shift, so does truth—for whether we accept a claim as true depends above all else on its meaning. Pragmatist theories have been subjected to frequent caricature as implying that ideas can mean whatever we take them to mean or that what is true varies according to what each individual finds convenient and expedient to believe. What does it mean, then, to retain a sense of respect for truth? While some pragmatist accounts do explicitly deflate the importance of the concept of truth, others claim not only to respect truth but to offer an account of truth that allows us to inquire more clearly into the evolving but real meaning of moral judgments, religious and aesthetic claims, psychological attributions, and other deeply contested candidates for human belief.

PHIL327 Progressive Confucianism and Its Critics

Contemporary "Confucianism" designates a diverse set of philosophical, social, political, and religious approaches that are rooted in traditional East Asia and are playing significant—and increasing—roles in the modern world. "Progressive Confucianism" designates a subset of these approaches, emphasizing the ways that the Confucian tradition has developed throughout the centuries and arguing both that modern Confucianism must continue to develop, and that a properly developed Confucianism has much to contribute to contemporary philosophy and to modern societies. This seminar will explore the background out of which progressive Confucianism has emerged; its distinctive approach and key contributions to Confucianism and to global philosophy more generally; and central criticisms that it has faced, with sources ranging from more conservative (or even fundamentalist) Confucians to liberals and progressives.

PHIL340 Human Nature

The idea of "human nature" plays an important role in all sorts of explanations, but what does it mean? What is it to be a human? Are we just rational animals? Do some humans have different natures than others? Is it possible for us to change our nature or is it innate? Are we products of nature, nurture, or some combination? Are humans fundamentally evil or good? By examining philosophical, historical, religious, theoretical, and scientific literatures, this course will examine various answers to these questions.

PHIL344 Horror in Black Philosophy

This class will trace notions of horror through the history of Black philosophy, through close readings of works such as W.E.B. DuBois's *Souls of Black Folk*, Sylvia Wynter's "Unsettling the Coloniality of Being/Power/Truth/Freedom," Calvin Warren's *Ontological Terror*, and Denise Ferreira da Silva's *Towards a Global Idea of Race*. We will then examine Black horror films in the context of this philosophical lineage. We will pay special attention to the use of concepts of ineffability, inarticulability, and unintelligibility in the articulation of Blackness and anti-Black violence, and connect these concepts to the aesthetics and phenomenology of horror.

PHIL347 Ethics, Ecology, and Moral Change

People commonly recognize that in facing global climate crises, we need to change our habits and practices. Yet our activities are bound up with our perceptions and with our embodied experience of value and possibility. This seminar dives into recent attempts to radically rework our ways of understanding and inhabiting the world. As the flip-side of environmental alienation is alienation from our embodiment, our sessions will incorporate movement and other challenges to sedentary classroom habits.

Given an account of thinking and action as always actively embodied and embedded in our surroundings, we will consider the hypothesis that shifts in action emerge together with shifts in perception. Radical accounts of metaphor and its uptake will help us develop accounts of perceptual change. Our readings will follow a variety of metaphorical directions, including animism and animacies, affordance and hyperobject, process, event and intra-action, native and other, inflammation and balance, dwelling and death, consumption and sustainability. How -- and with what risks and unexpected outcomes -- can these patterns of recognition help in orienting us to the challenges of environmental interdependence and volatility?

This course benefits from collaborative visits with philosopher-dancer Jill Sigman, via Wesleyan's Creative Campus Initiative. Sigman will co-shape discussion and activities during at least two of our sessions.

PHIL350 Radical Self-Care

This is a higher-level seminar on philosophy as a way of life that will explore how the notion of self-care has been developed and deployed throughout history by several political theorists and activists, including Mohandas Gandhi, MLK Jr., Nelson Mandela, Audre Lorde, Angela Davis, bell hooks, and Sara Ahmed.

When conducted in the present day, reflection on how one should live naturally requires attending to matters of sociopolitical concern, such as healthcare inequities, environmental degradation, wealth disparities, and prison reform. An investigation into the links between personal and social well-being has so far been something of a lacuna in the field of philosophy as a way of life, though in a variety of formulations and across several traditions, practices of self-care and self-formation have typically been seen as continuous with (and even a prerequisite for) a robust engagement with others and the pursuit of social justice causes. We will explore the connection between these two domains in this course. As a project during the semester, students will be asked to engage in a cause that matters to them by implementing selected ideas from the thinkers and activists that we'll be studying.

PHIL351 Deconstruction and Politics

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

PHIL352 Black Thought and Critical Theory

This course follows Stuart Hall's insistence in "What is this 'Black' in Black Popular Culture?" that the theoretical articulations of "blackness" are always "conjunctural." We will investigate how black thought has been conjoined with critical theory through phenomenology, pragmatism, Marxism, semiotics, and psychoanalysis. In our readings of a variety of 20th- and 21st-century thinkers, we will elaborate the philosophical richness and contradictory tensions embedded in the notion of "blackness" at specific historical and theoretical conjunctions. How is "blackness" useful for social theory? Must we assume there is a transhistorical identity to "blackness"? In what ways does "blackness" conjoin with the conceptualizations of gender, sexuality, class, and religion? Black thought and critical theory is the provocation that we attend to the tensions these questions raise. In this course, we will read the works of James H. Cone, Cornel West, Hortense Spillers, Saidiya Hartman, Sylvia Wynter, Denise Ferreira da Silva, Frank Wilderson, Calvin Warren, Tommy J. Curry, Stuart Hall, and Frantz Fanon.

PHIL353 Blackness in the Anthropocene

To deny the "unprecedented" geological impact of humans' force on nature is now practically untenable. Theorists in the humanities, nonetheless, remain unimpressed with what this "new era" has afforded us in terms of critical potential. From accusations that what we now call the "Anthropocene" has merely established a hegemony of brute facts at the expense of critique, to concerns about the multiple ways in which the term continues to obscure catastrophic socio-ecological relations, it is fair to say that the scenes of the "Anthropocene" are still contested terrains. The aim of this course is to investigate the Anthropocene's many forms of socio-political erasures and theoretical "blind-sights." We will examine the ways in which Anthropocenean discourses have been powerful at disavowing racial antagonism in our current ecological crisis. More specifically, in this course, will study the ecological negative effects on black communities around the globe with the aim to questions the shortcomings of ethics in Anthropocenean times. We will explore questions like "who are 'recognizable/legitimate' victims in environmental disasters," "do events like hurricane Katrina or the migration crisis teach us anything about our human condition," and "what is the 'post' in post-humanism." We will read philosophical works ranging from Immanuel Kant and Baruch Spinoza to Rosi Braidotti and Karen Barad.

PHIL354 Ecologies of Attention: Biosemiosis, Attunement, and Ethics

We consider variants on biosemiotic accounts of meaning, following one thread through Emerson to Nietzsche, another from Peirce and James to Bateson (Ecology of Mind, 1972) and Gibson (Ecological Approach to Visual Perception, 1979), and a third through contemporary indigenous thinkers and anthropologists attempting to bridge scientific ecology and animist panpsychism--Kimmerer, Whyte, Kohn, Ingold, Strathern. While most of the texts here focus on the nature of meaning as a living process, they are also in constant dialogue with normative concerns, being both motivated by subversive or non-humanist ecological values and inspiring distinctive insights about how to lead meaningfully connected lives.

PHIL358 Decolonial Theory

Decolonial/Post-Colonial theory has always been a creatively different way to approach topics of social justice. This course has four parts. The first quarter will be both about defining what post-colonialism is through foundational texts, but also differentiating its methodology from liberalism and Marxism. We will then apply this knowledge by looking at how decolonization/post-colonialism feminism thinks differently about equality and freedom. In the second half of the course, we will focus on contemporary and cutting-edge readings on how decolonial/post-colonialism can help us think differently about our degraded environment and the looming climate crisis. The third quarter of the course links together Indigenous sovereignty and environmentalism, and we end the course with a look at the new internationalism about climate justice.

PHIL362 Origins of the Human Mind

Since classical antiquity, philosophers have often characterized human beings by way of contrasts between ourselves and nonhuman animals, particularly in terms of mental abilities humans possess and nonhuman animals (putatively) lack, such as reasoning and language. Only recently, however, have the sciences--particularly evolutionary biology, cognitive psychology, anthropology, and cognitive ethology--begun to offer the tools needed to characterize differences in the cognitive tool kits of different species and to attempt to piece together hypotheses about how human minds differ so greatly from those of our nearest relatives, the great apes, in spite of our genetic similarity and the comparatively brief period since the time of our last common ancestors. In this course, we will read several recent works by philosophers and scientists presenting theories of the evolution of distinctively human cognition.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PHIL**

Prereq: **None**

PHIL363 Philosophy of Perception

Roughly, perception is the cognitive activity embodied creatures engage in in order to find out things about their environment. In the most basic sense, perception involves conscious awareness of something other than ourselves, which causally depends on sensory organs (our eyes, ears, nose, etc.) being stimulated by something external to our physical body. In this course, we will explore the several different "levels" at which philosophers think about perception and the different questions being asked. At the metaphysical level, the central question is: What kind of "things" do we perceive? What is perceptual awareness of? At the epistemological level, we will deal with the question: can we gain knowledge about the world through perception? Finally, at the psychological level, we will ask: How do the psychological processes--studied

by sciences like cognitive science, neuroscience, physiology, etc.--relate to the metaphysical and epistemological questions?

Offering: **Host**

Grading: **A-F**

Prereq: **None**

PHIL366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

Gen Ed Area: **HA-PHIL**

Prereq: **None**

PHIL383 Mind, Body, and World

This seminar in the metaphysics of mind and meaning begins with the philosophical and scientific background to cognitivist conceptions of mind and artificial intelligence. Both classic and recent criticisms of cognitivism and early AI emphasize the role of bodily movement and skill, language, social normativity, and engagement with and within the world as integral to conceptualization and understanding. These themes will then be explored constructively in some recent

reconceptions of cognition as embodied and social-pragmatic, and of language and other conceptual repertoires as integral to bodily involvement in the world and with one another.

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **HA-PHIL**

Identical With: **STS383**

Prereq: **None**

PHIL385 Understanding Life and Mind

Philosophical conceptions of mind and language are now typically "naturalistic" in the sense that they take these phenomena to be part of the natural world and understandable scientifically. Naturalistic conceptions of mindedness (and many of the sciences of mindedness) still mostly take their lead from a Cartesian tradition of understanding mindedness as an "internal" representation of an "external" world, now located in the brain or central nervous system rather than an immaterial soul. This advanced seminar instead explores the possible philosophical significance of recent developments in evolutionary and developmental biology for understanding mindedness. The course takes up four primary themes: organism/environment entanglement; relevant background from the recent emergence of an "extended evolutionary synthesis;" reconceptions of mindedness as ways organisms inhabit and respond to environments rather than as internal representations; and the evolution and development of language as a form of evolutionary niche construction that coevolves with human organisms and ways of life.

PHIL390 Topics in Metaphysics

Philosophy, especially in the European tradition, has perennially been interested in necessary features of reality, and in the nature of necessity itself. It has also been inveterately invested in rationality, and in discovering its nature. Is there such a thing as necessity that stems from rationality? One answer that has had much staying power is that logic and its laws frame the most fundamental type of necessity: it is impossible, for example, that there both is and isn't anything that travels faster than the speed of light in vacuum, for any such supposed situation violates the logical law of non-contradiction, and so is in a sense not really intelligible. (Except possibly in Australia.) This seminar is an examination of this answer through discussion of views of two seminal figures in modern European philosophy: Immanuel Kant and Gottlob Frege. We will focus on a recently prominent style of reading Kant as inheriting and transforming Aristotle's hylomorphism, and on the ways in which some proponents of this style of interpretation see Frege's conception of logic as closer to that of G. W. Leibniz. We will assess the extent to which such interpretations may be sustained by the actual writings of the philosophers just mentioned, as well as how well they hold up philosophically.

PHYSICAL EDUCATION (PHED)

PHED101 Tennis, Beginning

This course is designed for those who have had no formal instruction in tennis. Basic grips and stroke technique will be taught for the forehand, backhand, serve, and volley. Also covered will be equipment selection, court etiquette, and proper scoring of games, sets, and matches. The introduction of basic doubles formation will also be included. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED102 Tennis, Intermediate

This course is designed for those who have taken beginning tennis and have learned the basic grips and strokes. The intermediate group will have a more detailed analysis of stroke technique. Ladder match play will give students the opportunity to learn singles and doubles strategy. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED104 Golf

This course is designed to teach the basic information necessary to play and enjoy the game of golf. Each classroom period is spent teaching beginning golfers to play the game correctly from the start: mastering the pre-swing, fundamentals

of grip and aim, addressing the ball, and swing technique. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED106 Fitness, Beginning

This course is designed to meet the needs of the individual interested in establishing a self-paced exercise program. The emphasis of this course is on the development of cardiovascular endurance. Individuals are instructed how to determine personal work-load levels and pace themselves during various classroom aerobic activities. Participants also receive additional instruction in strength training. Cardiovascular activities include fast walking, jogging, aerobic exercise, rope jumping, interval training, and rowing ergometer work. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED107 Inner Game of Golf

Golf is traditionally taught with verbal instruction from the teacher to the student. The students in this class will be taught with learning by feel. Through this unique approach, students will learn that their natural swing is already present within themselves and they simply need to allow it to come out. Through various drills and learning techniques, students will also discover that enjoyment of golf comes first, success comes second. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED112 Advanced Olympic Weightlifting and Powerlifting

The focus of the class will be on advanced weight room techniques. Half of the quarter will emphasize the art of Olympic weightlifting, including the clean and jerk and the snatch movements. The other half of the quarter will emphasize the art of powerlifting, including the three power movements--squat, deadlift, and bench press. Safety in these advanced techniques is always prioritized.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED118 Strength Training, Introduction

This course is designed for the individual who is unfamiliar with or has had no experience in programs focusing on building body strength. This course includes an introduction to the strength-training facilities at Wesleyan, proper strength-training techniques, and various elementary training programs. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED119 Strength Training, Advanced

This course is designed to meet the needs of students who are sincerely involved in strength training, body building, and/or competitive lifting. The course will include the use of four weight-lifting machines and instruction in competitive

lifting techniques. There will also be discussion and demonstration of various progressive resistance modes that develop muscular strength and endurance. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED120 Swimming, Beginning

The objective of this course is to equip students with basic water safety skills and knowledge to make them reasonably safe while in, on, or about the water. We will introduce skills designed to improve stamina and basic coordination and to increase individual aquatic abilities. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED121 Swimming, Advanced Beginner

This course is designed to build upon the skills learned in beginning swimming. Emphasis is placed on improving the overhand crawl stroke with rotary breathing. Students will be introduced to the basic skills needed to learn the backstroke and breaststroke. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED122 Swimming for Fitness

This program is designed for the lap swimmer who is interested in learning and applying cardiovascular conditioning and training to swimming. Instruction is given in breathing exercises and pacing techniques. Individual work-load levels are determined, and self-paced programs are centered around those levels. Various training techniques are discussed and used in the program. A course prerequisite is the ability to swim 25 yards (any stroke) continuously and comfortably. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED123 Lifeguard Training

This course is designed to teach potential lifeguards the skills and knowledge needed to prevent and respond to aquatic emergencies. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED124 Squash

This course is geared toward the beginner but may be taken by those who have played some before. Basic grips and strike technique will be taught for the forehand, backhand, serve, and volley. Also covered will be safety precautions, court etiquette, and proper scoring of games and matches. The intermediate player may not get much attention the first two weeks while the beginners learn

the basics. The first class of each quarter will meet in the lobby of the Freeman Athletic Center. Students must have their own racket and goggles.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED125 Table Tennis

Table tennis (also known as ping-pong) is a racket sport derived from tennis but distinguished by its playing surface being on top of a stationary table, rather than a court on which players stand. Table tennis uses paddles, vs a strung racket, a small hollow plastic ball, and a net. While played in basements the world over, this course will teach you how to play the sport competitively. It will address technique, strategy, and rules and we will learn how to play both singles and doubles. Table tennis is played in so many different settings from backyards at home to rec rooms at work, and from university all the way to the Olympics. This is the perfect course to learn the sport from scratch or hone existing skills for social events, networking opportunities, or the sheer fun of playing.

Basic paddles and balls will be provided. Non-marking shoes are required.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED127 Tabata/Fitness Training

Tabata/fitness training is a program designed to enhance an individual's competency at all physical tasks. The student will perform exercise elements successfully at multiple, diverse, and randomized physical challenges. Areas of fitness will include cardiovascular endurance, stamina, strength, power, speed, balance, agility, and coordination. The start-stop training design is based on 20-second bursts of high-intensity workout followed by a 10-second rest. Each high-intensity burst/rest is repeated 4–8 times. The course will provide challenging workout programs that provide the health benefits of cardiovascular workouts with high- to moderate-intensity training and/or high- to moderate-intensity interval training. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED130 Skating, Beginning

This introduction course to ice skating will include lectures as well as work on ice and covers all basics of skating. Progress is self-paced. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED133 Interval Training

Interval training involves a series of low- to high-intensity exercise workouts interspersed with rest or relief periods. This course includes a variety of cardio drills and resistance training exercises designed to challenge and improve cardio and muscular strength while maintaining a strong core. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED137 Rowing for Fitness

This course is designed to introduce individuals to the use and benefit of rowing as a lifetime fitness activity. Through the use of the Concept II rowing ergometer, students will be taught proper rowing technique, conditioning, injury prevention, and ways to include rowing as a part of an overall exercise program. No previous rowing experience is necessary. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED138 Indoor Cycling

Indoor cycling, as an organized activity, is a form of exercise with classes focusing on endurance, strength, intervals, high intensity (race days), and recovery that involves using a special stationary exercise bicycle with a weighted flywheel in a classroom setting. During the class the instructor simulates the ride. Together you travel on flat roads, climb hills, sprint, and race! This is a truly fantastic cardiovascular class. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED139 Running for Fitness

This course is an introduction to the basic principles of a fitness running program. The training program will be individualized for each student based on individual goals. Topics will include proper training techniques, running gear, injury prevention, and stretching. All levels of running welcome. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED140 Racketlon

Racketlon combines tennis, badminton, squash, and table tennis into one sport. It is racketsports' answer to other combination sports such as triathlon or decathlon. Very commonly played in Europe, opponents play each of the sports to 21 points, and the winner is the person with the highest total points. Racketlon is also played in a doubles format where teams of two opponents play against each other. This class will introduce students to each of the four racketsports and how to play them in combination within the sport of racketlon. As a capstone experience, the class will play both a singles and a doubles racketlon. Previous racketsport experience will be valuable in this class, but is not required. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED142 Yoga for Fitness

This yoga class is designed to improve the health, performance, and mental acuity of students interested in improving their level of fitness. The class will

blend balance, strength, flexibility, and power in a fitness format. This practical and user-friendly style of yoga is accessible, understandable, and achievable by individuals at any level of fitness. Attendance is required. The first class in each quarter will meet in the lobby of Freeman Athletic Center Lobby. This class meets in the second quarter.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED145 Indoor Cycling and Yoga

This is a combination class that warms up your body with some sun salutations, strengthens your lower body with a cycling ride, and then stretches your hard-worked muscles with yoga asanas. Yoga and indoor cycling are natural complements to one another because each exercise has a mental and a physical component and trains your body while developing mind/body awareness. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED147 Hatha Yoga

This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercise aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered: Warm-up: Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).

Stretching: Standing Separate Leg Stretching Pose - Dandayamana-Bibhaktapada-Paschimotthanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit)

Spine Strengthening, Sit up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit). Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana (Sanskrit), Blowing in Firm Pose - Kapalbhati in Vajrasana (Sanskrit). Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Prereq: **None**

PHED148 Hatha Yoga

This is a beginning yoga class with no previous experience needed. The class will consist of 26 postures and two breathing exercise aimed at improving your posture and alignment, balance, and strength. Posture and exercise covered:

Warm-up: Standing Deep Breathing - Pranayama (Sanskrit), Half Moon Pose - Ardha-Chandrasana (Sanskrit), Awkward Pose - Awkward Pose (Sanskrit), Eagle Pose - Garurasana (Sanskrit), Balancing, Standing Head to Knee - Dandayamana-Janushirasana (Sanskrit), Standing Bow Pose - Dandayamana-Dhanurasana (Sanskrit), Balancing Stick - Tuladandasana (Sanskrit).

Stretching: Standing Separate Leg Stretching Pose -Dandayamana-Bibhaktapada-Paschimotthanasana (Sanskrit), Triangle Pose - Trikanasana (Sanskrit), Standing Separate Leg Head to Knee Pose - Dandayamana-Bibhaktapada-Janushirasana (Sanskrit), Focus Tree Pose - Tadasana (Sanskrit), Toe Stand - Padangustasana (Sanskrit), Dead Body Pose - Savasana (Sanskrit), Wind-Removing Pose - Pavanamuktasana (Sanskrit), Spine Strengthening Sit up - Pada-Hasthasana (Sanskrit), Cobra Pose - Bhujangasana (Sanskrit), Locust Pose - Salabhasana (Sanskrit), Full Locust Pose - Poorna-Salabhasana (Sanskrit), Bow Pose - Dhanurasana (Sanskrit).

Opening: Fixed Firm Pose - Supta-Vajrasana (Sanskrit), Half Tortoise Pose - Ardha-Kurmasana (Sanskrit), Camel Pose - Ustrasana (Sanskrit), Rabbit Pose - Sasangasana (Sanskrit), Spine-Twisting Pose - Ardha-Matsyendrasana(Sanskrit), Blowing in Firm Pose - Kapalbhathi in Vajrasana (Sanskrit).

Bring a mat, towel, and your own water. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **None**

Prereq: **None**

PHED152 Outdoor Hiking

Hiking is merely walking on a footpath, whether on a neighborhood path or a more adventurous trail that involves some climbing. Hiking is a moderate cardiovascular activity. Common benefits include weight loss, prevention of osteoporosis, decreased blood pressure, and relief of back pain. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED155 Speed Agility Plyometric Training

Learn to increase your cardio by speed and quickness. Agility training focuses on foot speed, quickly changing direction and improving reaction to visual cues. Plyometrics is an explosive movement to build muscle. The two will be combined to enhance the over all body conditioning. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED157 Pickleball

Pickleball is a paddle sport with combined elements of tennis, badminton, and ping pong, and played on a doubles badminton court. The net is similar to a

tennis net, but is two inches lower. The game is played with a hard paddle that is similar to table tennis and usually made up of graphite or composite. The ball is comparable to a whiffle ball.

The game can be played in either singles' or doubles' matches. For new players, the basics of the sport are easy to learn. Typically, one session of three or four games is all that it takes to grasp the basics.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED159 Cross Training Fitness

This class will use dynamic warm-up, dynamic flexibility, bodyweight, dumbbells, free weights, kettlebells, interval training, cardio/fitness machines, aquatic training, core training, and neuromuscular training in a fun, progressive way so students have a variety of ideas to implement to stay fit for life. The first class of each quarter will meet in the lobby of Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED170 Sculling

This course is designed for those students that have completed the introductory Rowing for Fitness course (PHED137). It gives them the opportunity to take these skills to the water and learn a fitness activity that can last a lifetime. The first class of each quarter will meet in the lobby of the Freeman Athletic Center.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **PHED137**

PHED195 Theory of Coaching

This course is designed to introduce students to the basic principles and theories of coaching. Students will become familiar with coaching philosophies, coaching objectives, leadership, and motivation styles. Students will also be introduced to team management and planning techniques, evaluation tools, training techniques, and risk management concerns for coaches. This course has no prerequisite and is open to all students.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.25**

Gen Ed Area: **None**

Prereq: **None**

PHED201 Practicing Mindfulness Techniques During Activity

This course will provide students with an introduction to mindfulness and teach them mindfulness tools they can use to better self-regulate their emotional states and manage the stress-reaction cycle so many college students find themselves in.

Mindfulness can be brought to any activity. In this course, students will practice different mindfulness techniques through various types of physical activity such as walking meditation, yoga, and time in nature, to name a few. Part lecture, part activity class, students will acquire skills that aid in reducing stress caused by

many of life's major stressors: time, people, sleep, work/academics, roles, food, pain, change, fear, panic, and anxiety.

PHYSICS (PHYS)

PHYS105 Calderwood Seminar in Public Writing: Radical Sustainability

The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

Identical With: **ENVS235, WRCT235**

Prereq: **None**

PHYS107 Life in the Cell from a Molecule's Perspective

What does DNA look like when it is not condensed into chromosomes? How do partners in molecular processes find each other? If a molecular motor "walks," how does it take a step? We will explore these major topics in molecular biophysics by discussing primary scientific literature. Emphasis will be placed on revealing the ways in which our understanding of biological processes can be improved by understanding the underlying physics. Students should have a broad high school science background, familiarity with quantitative and algebraic concepts, and a desire to incorporate quantitative thinking into verbal discourse. Writing is a core element of the course.

Gen Ed Area: **NSM-PHYS**

Identical With: **MB&B117**

Prereq: **None**

PHYS111 Introductory Physics I

This course, along with PHYS 112 in the spring semester, is an introduction to the fundamental principles of physics. Employing trigonometry and algebra the goal is to provide tools for the quantitative understanding of a wide variety of phenomena, with many examples taken from the life sciences. The lab PHYS 121 is recommended. Since algebra is an important prerequisite for PHYS 111, we strongly recommend that all students take a diagnostic test prior to the start of the course. It can be found at <https://www.khanacademy.org/math/algebra/test/subject-challenge?modal=1>

Taking this "Course Challenge" will take 30-45 minutes and leave you with a good idea of where your algebra skills might need review. Follow-up guided lessons can be chosen at this website.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS112 Introductory Physics II

This is the second of two non-calculus courses covering fundamental principles of physics. The emphasis is on developing a conceptual understanding of the physical processes that govern our universe. Proficiency in elementary algebra, vector algebra, trigonometry, and arithmetic is required. The lab PHYS122 is recommended.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS111**

PHYS113 General Physics I

This course is the first term of a general physics course with calculus, recommended for students interested in majoring in the sciences. With the focus on Newtonian dynamics, PHYS 113 seeks to develop both conceptual understanding and the ability to use this knowledge to obtain quantitative predictions of how the universe works. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of mechanics. The associated lab, PHYS123, is highly recommended.

PHYS113 and PHYS116 are part of a sequence of courses that lead into the physics major. PHYS113 is a pre-requisite for PHYS116; therefore, students must take them in sequence.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS116 General Physics II

This course is the second term of a general physics course with calculus, recommended for students interested in majoring in the sciences. The focus is on the physics of charged particles, including an introduction to the concepts of electric and magnetic fields. Students will develop both conceptual understanding of how charged particles give rise to both electricity and magnetism and the ability to use this knowledge to quantitatively describe the behavior of these particles in a variety of contexts, including electrical

devices. Through a collaborative and interactive classroom experience, students develop problem-solving skills and a mathematical description of electricity and magnetism. The associated lab PHYS124 is highly recommended; any student wishing to major in physics should enroll in PHYS124, since it is a requirement for the major.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS113**

PHYS121 Introductory Physics Laboratory I

This laboratory course provides experience with phenomena discussed in PHYS111 lectures. While this course is not required by the Physics Department, students planning to enter the health professions should be aware that a year of physics WITH LABORATORY is usually required for admission. Consult your major advisor if you are in doubt about similar requirements in your field. Each laboratory is limited to 16.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS122 Introductory Physics Laboratory II

This course provides laboratory experiences for students taking PHYS112.

This laboratory course teaches students how to obtain, process, and evaluate data and compare these data with quantitative models of how our world works.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS123 General Physics Laboratory I

This laboratory course provides experience with phenomena discussed in PHYS113 lecture, integrating calculations with the experiments. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS113. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS124 General Physics Laboratory II

This laboratory course is designed to be taken in conjunction with PHYS116. Students will get hands-on experience with physical systems that demonstrate the principles being studied in PHYS116. Hands-on experience helps in developing physical intuition, a deeper understanding of the course material, and the world around us. The emphasis in this course is on experimental technique and the proper identification, appreciation, and handling of experimental error.

PHYS170 Introduction to Mechanical Design and Engineering

This course will provide a hands-on introduction to design and engineering. Students will engage in individual and team projects in a studio environment where we seek to develop a shared practice and understanding of the engineering design process. We will study biological organisms to find inspiration for design of hoppers, swimmers, and climbers. Students will build skills using computer-aided design (CAD) software and using tools for fabrication and prototyping including laser cutting and 3D printing. We will also hone skills in identifying which scientific and engineering principles need to be understood to achieve design goals.

Offering: **Crosslisting**

Grading: **Cr/U**

Gen Ed Area: **NSM-CIS**

Identical With: **IDEA175, CIS175**

Prereq: **None**

PHYS207 Introduction to Biophysics

This course will introduce students to major topics in biophysics with an emphasis on the statistical physics of biological systems at the microscopic or molecular level. Topics covered will include molecular motors, self-assembly, and single-molecule manipulation. Students will learn how physical arguments and reasoning can provide significant insight into the design and function of biological systems. While this course is geared toward students who have had a full year of calculus-based physics, relevant concepts in biology and chemistry will be introduced as needed. No detailed knowledge of biology or chemistry beyond the high-school level is required for this course.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **MB&B207**

Prereq: **PHYS116**

PHYS210 How Things Fail: Mechanics and Materials

This lab/lecture engineering course is a foundational cornerstone of structural analysis and mechanical design. It will provide students with a theoretical and practical understanding of static equilibrium force systems, material response to loading, and analysis of failure modes for each of the fundamental types of stress and strain (axial, flexural, and torsional). These skills are vital for students from a range of disciplines, including mechanical engineering and architecture. The final project will require the design, implementation, and performance testing of an optimized structural system model, such as a truss bridge, building, or other structure.

PHYS213 Waves and Oscillations

The properties of periodic motion recur in many areas of physics, including mechanics, quantum physics, and electricity and magnetism. The ubiquity of oscillatory motion in biological and chemical systems, as well as engineering, provides interdisciplinary importance for developing the formal description of periodic motion. We will explore the physical principles and fundamental mathematics related to periodic motions. Topics will include damped and forced harmonic motion, normal modes, the wave equation, Fourier series and integrals, and complex analysis. Principles and techniques developed in this course are central to many subsequent courses, particularly Quantum Mechanics (PHYS214, PHYS315), Classical Dynamics (PHYS313), and Electricity and Magnetism (PHYS324). An important component of this course is to develop the ability to use mathematical software packages to graph expressions, solve equations, and obtain numerical solutions to differential equations.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS116**

PHYS214 Quantum Mechanics I

This course provides an introduction to wave and matrix mechanics, including wave-particle duality, probability amplitudes and state vectors, eigenvalue problems, and the operator formulation of quantum mechanics.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **(PHYS213 AND MATH221) OR (PHYS213 AND MATH223)**

PHYS215 Special Relativity

This calculus-based half-credit, half-semester introduction to Einstein's theory of special relativity promotes both a qualitative understanding of the subject and a quantitative problem-solving approach.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **None**

PHYS217 Nonlinear Dynamics and Chaos

The techniques of nonlinear dynamics and chaos have been proven useful for a variety of disciplines, ranging from astrophysics to population dynamics. This course provides an introduction with applications.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Prereq: **PHYS213**

PHYS219 Introduction to Contemporary Physics

This course examines the foundations of modern physics, including special relativity, the building blocks of matter, the fundamental interactions and gravity, and recent views of the universe such as entanglement, supersymmetry, strings, and dark matter and dark energy.

Offering: **Host**

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **NSM-PHYS**

Prereq: **(PHYS113 AND PHYS116)**

PHYS313 Classical Dynamics

This is a course in classical mechanics at the intermediate level that utilizes problem solving instruction and learning. It approaches Newtonian mechanics from a more advanced point of view and introduces Lagrangian and Hamiltonian dynamics.

Offering: **Host**

Grading: **OPT**

Identical With: **PHYS513**

Prereq: **(PHYS213 AND MATH221 AND MATH222 AND MATH122)**

PHYS315 Quantum Mechanics II

This course will expand the formalism of quantum mechanics to include spin and angular momentum in three dimensions. The quantum theory of identical particles will be developed and applied to multi-electron atoms.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PHYS**

Identical With: **PHYS515**

Prereq: **(PHYS214 AND MATH223) OR (PHYS214 AND MATH221)**

PHYS316 Thermal and Statistical Physics

Thermodynamics and statistical mechanics are pillars of physics.

Thermodynamics provides a framework through which we can understand the rules for the conversion of energy and matter from one form to another. As we will learn, every transfer of energy results in the conversion of some energy into an unusable form. Using the tools of thermodynamics, we can establish limits for the amount of useful work that can be extracted from any process. These limits have important implications for the quest to achieve sustainability in our use of energy and materials. As we learn about thermodynamics, we will spend some time exploring this real-world application of the material covered.

Likewise, statistical mechanics provides us with a set of tools for understanding how the behavior of individual atoms and molecules impacts the properties and behavior of materials that can be observed in our daily lives. Our approach to this material differs from many previous physics courses and requires a mixture of statistical and counting skills, coupled with physical intuition for the nature of matter. In addition to explaining phase transitions, critical phenomena, and the statistical nature of fermions and bosons, the tools of statistical mechanics are essential for understanding phenomena like evaporative cooling and the greenhouse effect. We will explore the conditions that lead to these phenomena and discuss the role they may play in a comprehensive approach to sustainability.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**Gen Ed Area: **NSM-PHYS**Identical With: **PHYS516**Prereq: **PHYS214****PHYS317 Molecular Biophysics Journal Club I**

Identical With: **CHEM377**

Prereq: **CHEM251**

PHYS395 Structural Biology Laboratory

One of the major catalysts of the revolution in biology that is now under way is our current ability to determine the physical properties and three-dimensional structures of biological molecules by x-ray diffraction, nuclear magnetic resonance (NMR) spectroscopy, and other spectroscopic methods. This course is designed to familiarize students with current research techniques in biochemistry and molecular biophysics. Students will perform spectroscopic investigations on a protein that they have isolated and characterized using typical biochemical techniques, such as electrophoresis, enzyme extraction, and column chromatography. The course will provide hands-on experience with spectroscopic methods such as NMR, fluorescence, UV-Vis absorption, and Raman as well as bioinformatic computational methods. All of these methods will be applied to the study of biomolecular structure and energetics. This course provides a broad knowledge of laboratory techniques valuable for independent research at the undergraduate level and beyond.

Historically, physics and mathematics are closely related. Physics uses powerful tools developed by mathematicians, while physicists, investigating the actually existing universe, provide mathematicians with new concepts and ideas to explore. This way, many mathematical techniques, and even entire areas of mathematics, developed from the need to solve certain real-life problems posed by physical reality. The purpose of this course is to give students an overview of the powerful array of mathematical tools available for the solution of physical problems. Starting with the presentation of tools of complex analysis, we will apply them to the solution of ordinary and partial differential equations. We will encounter Fourier and Laplace transforms and will study the Green's function method for the solution of bound and scattering problems. We will also look into the elements of Group Theory and apply it to angular momentum in quantum many-body systems.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **None**Prereq: **MATH222 AND MATH223 AND PHYS313 AND PHYS315 AND PHYS324****PHYS566 Electrodynamics**

PORT156 Portuguese (Romance Language Speakers) II

This course is the continuation of a yearlong course in intensive Portuguese. The second semester will concentrate on mastery of grammar points, with increasing attention to readings, writing, and cultural topics. Music, poetry, short stories, Internet resources, video, and journalism are integrated with the textbook.

PSYCHOLOGY (PSYC)

PSYC105 Foundations of Contemporary Psychology

This course will include an introductory-level presentation of ideas and research findings in the major areas of psychology. It will serve as both preparation for upper-level courses in psychology and as a valuable contribution to students' liberal arts education. This course will help students discover what psychology is and what psychologists do. Not only will students learn the basic content of psychology, but the course should help them to think critically about such everyday issues as, In what ways are we like other humans, and how do we differ? What do babies perceive and think? Why do we dream? Content areas include history of psychology, methods of psychological research, biological basis of human behavior, motivation and emotions, learning and memory, sensation and perception, cognitive and social development, personality, intelligence, and psychopathology.

PSYC111 Myth, Magic, and Movies

We will examine how the mythic is made and what purposes myth and magic serve in modern culture. Guided by classic psychoanalytic ideas, we will seek to understand both the conscious and unconscious power of myths. The seven volumes in J. K. Rowling's HARRY POTTER series will be the core texts for the course, and we will explore how these texts were transformed by the eight Potter movies.

Prereq: **None**

PSYC112F Psychoanalysis Then and Now: From Freud to Psychosocial Studies (FYS)

Psychoanalysis appears to be little more than an anachronism within the context of modern Psychology, and yet it nonetheless is leading a surprising afterlife--at once defunct as an institutional player and yet at the vanguard of cultural theory and clinical psychology practice. This course traces the trajectory of Psychoanalysis from its origin in Freud's theory of unconscious mental processes and his talking cure to its current manifestations in the field of Psychosocial Studies. We consider how psychoanalysis is an inherently critical practice with the capacity to uniquely situate an individual in relation to social forces that have influenced their personal development, without reducing a person to their social context and/or family history. The course begins with exploration of foundational psychoanalytic concepts (the unconscious, transference, resistance, the drives) and moves to consider the dimensions of social-unconscious processes in groups, institutions, and nations. We also explore how psychoanalysis can inform the psychosocial study of subjectivity, ideology, the intergenerational transmission of trauma, and current sociopolitical issues.

PSYC113F What is "Typical?" Diversity in Human Development (FYS)

Much of psychological research aims to describe & understand human behavior by studying how typical people think or act in typical circumstances. However, quite a lot can be learned by looking beyond the average and examining the variability of human behaviors, experiences, and abilities. This First Year Seminar will explore the ways that atypical development, neurodivergent minds, and non-normative populations can broaden our understanding of human development. Students will develop academic writing skills while critically engaging with psychological research.

Prereq: **None**

PSYC114F Race in Everyday Space: The Psychological Impacts of Racism (FYS)

"We are all products of a racialized society, and it affects everything we bring to our interactions" (Oluo, 2018, p. 15). This seminar uses psychological theory and research as well as interdisciplinary scholarship (e.g., ethnic studies, history, sociology) to critically unpack this statement. Through the semester we examine the nature and experience of racially marginalized communities in the United States, and engage in critical analysis of the ways in which systems of power affect the everyday lives of racially marginalized communities. As a First Year Seminar, this course will emphasize the continued development of written and verbal communication skills.

PSYC115F Your Brain on College: Applying Neuroscience to College Life (FYS)

This course introduces first-year students to reading, writing, and discussing research in neuroscience. We will cover topics related to how the brain perceives and changes in response to experiences that are common in college or university, including building friendships, learning new information, time management, and coping with stress. Students will be encouraged to apply research to their own experiences through several short writing reflections. Students will also develop an APA-style literature review over the course of the semester.

Offering: **Host**

Prereq: **None**

PSYC116F How our Bodies and Minds Shape our Social and Physical Lives

Over the past few decades, psychology has embarked on a serious journey to understand how our minds influence our bodies in ways that are important for our health. However, alongside this journey runs another, equally fascinating one, exploring how our bodies can influence our minds in ways that are important for our social lives. Throughout this course we will examine key insights from both these perspectives. First, we will investigate how the ways in which we think and feel can influence physiological processes that shape our health. Then, we will take a look at how our physiological states can shape our minds by influencing how we think and feel, and the judgments that we form about ourselves and others. We will explore these topics by taking a critical look at some of the most provocative and, at times, controversial methods, ideas, and findings that have emerged from this field of scientific inquiry. This course will involve lecture, readings, visual media, and in-class discussion.

PSYC117F Psychological Science and the Good Life (FYS)

How can we use psychological science to help improve our coping, resilience, and well-being? We are in an intense period of adjustment - historical change in how society functions, a recent shift to a world with Covid-19, and, for you, the transition to Wesleyan and college. Fortunately, psychological science has given us many helpful research findings about how the mind and brain work, how to improve well-being, and how to change our own behaviors and mindsets for a better life. In this course, we will learn about the scientific findings that point us toward well-being, and we will practice the skills that are supported by such evidence. The aim of the course is to leave with a better understanding of psychological science, a toolkit of research-supported practices we can use in our everyday lives, and a supportive community.

Prereq: **None**

PSYC118F Social Psychology of Close Relationships: Examining Human Connections (FYS)

This course introduces first-year students to reading, writing, and discussing research in social psychology focused on relationships. We will cover topics pertaining to experiences that are common in college or university, including friendships, love, attraction, romantic relationships, family relationships, and group dynamics. Students will learn to review, understand, and critique research studies in social psychology. Students will be encouraged to apply research to their own experiences through several short writing assignments, group

activities, and class discussions. Students will also develop an APA-style research paper over the course of the semester, which will be presented during class.

PSYC119F Conflict Resolution for College Students (FYS)

Human interaction inevitably results in conflict. Yet not all conflict is destructive; at times conflict can lead to growth. The college years are replete with examples of interpersonal conflicts, such as those with roommates, friends, family, professors, employers, and strangers. In addition, students may be part of a team or organization and conflict can happen at the organizational level as well. Further, individuals and organizations are embedded within different cultural contexts, which can also yield conflicts with other cultures in terms of values and priorities.

This course will focus on the psychological causes and consequences of interpersonal, intergroup, and intercultural conflict. Topics discussed will include the role of power, status, trust, communication, and social identity as well as different models of negotiation and mediation. Students will learn about various theories related to the causes of conflict along with practical strategies for navigating conflict in ways that are constructive.

Offering: **Host**

Prereq: **None**

PSYC120F Stress, Trauma, and Resilience (FYS)

This First Year Seminar uses examples of stressful and traumatic exposures to war-time combat and interpersonal violence drawn from literature, film, and real life, to study the continua of changes to psychological and biological mechanisms involved in the human response to life threatening experiences. Psychiatric diagnosis of the response to stress and trauma are introduced and the utility and limitations of the descriptive approach are considered. Key mechanisms studied include those from the psychological domains of fear and anxiety, memory and cognition, habits and reward processing, and social processes. Alterations in these mechanisms are used to illustrate the manner in which trauma alters human behavior in ways that can be both adaptive and problematic. Students in this course also learn how to methodically read, interpret, and explain findings from scientific journal articles; oral presentations developed in class are used to create outlines for written assignments throughout the semester that, in turn, serve as building blocks for a final paper.

PSYC121F The Brain: Fact or Fiction?

Dopamine fasting, bio-hacking, and nootropics, oh my! It seems like every day experts present us with a new method to "fix" or "understand" our brains. But, how do we assess what is true in the world of neuroscience? In this course, we will discuss some common misconceptions about the brain perpetuated in the media and discover the origins of these common myths. Not only will we learn some neuroscience, but this course will also teach the basics of assessing scientific claims. Students will get practice reading primary scientific articles, writing accurately about psychological research, and critiquing brain science as depicted in their favorite (or least favorite) media, from podcasts to science

fiction. Assignments will include two short writing assignments and one long paper that will be written throughout the duration of the course.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC138F Masculinities (FYS)

This course offers an interdisciplinary approach to the study of masculinities, focusing on the difficulty of disentangling the (social-) scientific questions of what men are (and how they come to be that way) from the interpretive question of what masculinity means. We will survey a range of perspectives from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, anthropology, feminist studies, and queer theory that describe and attempt to account for masculinities. In order to understand how these scholarly accounts might fit together to form a more comprehensive interpretive framework, we will also be engaging in critical analysis of examples from contemporary television and film that will help us to understand the role that representation plays in our cultural constructions of masculinity.

Prereq: **None**

PSYC200 Statistics: An Activity-Based Approach

This course will introduce the concepts and methods used in the analysis of quantitative data in the behavioral and life sciences. The approach will emphasize activity-based learning. Lectures will be used for the initial presentation and wrap-up of topics, but most class time will be devoted to activities in which students perform analyses. The topics covered will include descriptive statistics, sampling distributions, estimation, hypothesis testing, analysis of variance, and regression.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

PSYC201 Psychological Statistics

This course provides a general introduction to the use of statistics in everyday life and in psychological research. Special emphasis will be placed upon the development of critical thinking skills for evaluating the validity of statistically-based claims found in the media and in published research. In addition, the course will focus on the practical application of statistics and the logical connection between various analytic techniques. Both descriptive and inferential statistics will be discussed, and students will learn to clean and analyze data using Microsoft Excel and specialized statistical software (e.g., SPSS and/or R).

PSYC202 Qualitative Research Methods in Psychology

The goal of the course is to introduce students to basic research strategies for investigating human thought and behavior, with a focus on qualitative methods. The course provides detailed introduction to different qualitative methods, including interview, observation, case study, content analysis, archival, life history, and narrative techniques. Attention is given to the framing of research questions, design of studies, the ethics of psychological research with humans,

and assumptions about human nature. The course is problem- and project-based, providing hands-on research experience.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC205 Research Methods in Psychopathology

How do psychological researchers study unusual and distressing human experiences? This combined laboratory and lecture/discussion course provides an introduction to methods used in the study of clinical and subclinical phenomena. With an emphasis on methodological pluralism in the 'psy' disciplines, the course covers both quantitative and qualitative approaches, exploring the intersections between diverse modes of inquiry. Throughout the semester, students conduct a team research project on a psychological topic of the group's choosing, proceeding through each stage of the research process. Along the way, we consider the historical context of psychological science, as well as contemporary debates about the nature of psychopathology. We also think critically about the relationship between research methods and the topic(s) under investigation, asking questions such as: Why do psychologists use the methods that they use? How is research in psychology different from research in the other sciences and humanities?

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC206 Research Methods in Cognitive Development and Education

This course introduces students to translational research in psychology--research that draws on psychological science to inform practice. The first third of the course will cover basic research methods, fulfilling the requirement for the major and preparing students to critically read, interpret, and engage in research. Then, we will investigate a series of case studies in which people have attempted to take basic research in developmental science and apply it to education settings. Example research-based interventions we might choose to study include mindfulness, growth mindset, early numeracy, reading instruction, teacher development, and anti-bias education. We will ask questions like: Which aspects of the research did the interventions account for, and which aspects were set aside? What are the factors that facilitate or block the use of research in practice? How are research-based interventions evaluated, and how do the outcomes of those evaluations affect our interpretations of the original research findings? What tradeoffs are made when putting research findings into the real world? How do seemingly small details about how interventions are designed and implemented affect the research-practice interface? Through our discussions, we will cover some core topics located at the bridge between research and practice such as practitioner expertise, science communication, participatory action research, educational design, and implementation science.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

PSYC213 Research Methods in Social Psychology

The course examines research methods and techniques used in social psychology, including observation, correlation, and experimentation. Students will learn about study design, research ethics, and how to collect and analyze data, as well as effective ways to report results. All students are expected to undertake a research project.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC214 Research Methods in Sleep Research

Have you ever read an empirical research article and wondered where the authors got the idea for their research study? Have you ever thought about how researchers decide on which participants to select and what questions to ask of their study participants? How can we assess the value of a theoretical idea based on empirical evidence? And why might there be conflicting findings when researchers test the same phenomenon?

This course is designed to help students explore these and other questions related to research methods in psychology, with a focus on sleep research. This is an interactive lecture and lab-based course. Through a series of hands-on lab assignments, students will acquire the necessary skill set to be able to critique, analyze, and design psychological research. Students will explore both qualitative and quantitative methodological designs used in psychological research (e.g., experiments, interviews, and surveys). Additionally, students will gain skills in conducting basic statistical analyses (e.g., correlation, t-test, ANOVA). The course will culminate with a final project in which students will design an original research study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC216 Research Methods in Diversity Science

This course introduces students to the research methods important to conducting scientific inquiry into topics related to inequality, oppression, and disparities in life outcomes across a broad range of experiences of marginalization (e.g., gender, race, sexuality, and the experiences at the intersections of these domains). In the process of introducing research methods pertinent to diversity science, we also discuss foundational and contemporary research in diversity science.

Offering: **Host**

Prereq: **PSYC105 AND (PSYC200 OR PSYC201 OR QAC201 OR ECON300 OR MATH132)**

PSYC220 Cognitive Psychology

Cognitive psychology, a major branch in the field of psychology, is the scientific study of human adult mental processes. The goal of this course is to provide a broad introduction to the issues, methods, and phenomena that characterize the field. These will be brought to life with selected examples of influential empirical studies and, occasionally, practical applications. In seeking constraints on theories of how the mind works, we will draw primarily on studies of adult human behavior (e.g., reaction time, task accuracy), individuals with localized brain damage (e.g., visual agnosia), and measures of brain activity (e.g., as inferred using fMRI techniques). Computer models and nonhuman animal studies will also be considered. Broad topics will include attention, perception, memory, knowledge, reasoning, and decision making. The course is lecture-based but will incorporate discussions, demonstrations, video, and group activities.

Offering: **Host**

Grading: **A-F**

PSYC239 Functional Anatomy of the Human Brain

The human brain is an organ with the consistency of firm Jell-O, weighing about 2.5 pounds in an adult. It is made of 86 billion neurons and approximately the same number of non-neuronal cells. Contrary to common misconceptions, we use all the neurons in our brains, not just a small fraction of them from the regions dedicated to the function being performed. Brain cells organize in distinctive anatomical structures, which are interconnected through complex circuits that control nearly every function of the body, such as learning and memory, thinking, consciousness, and aesthetic appreciation. Its malfunction results in a variety of diseases, including senility, mood disorders, and motor/sensory dysfunctions. This course will examine in some detail the complex organization of the brain and how it performs some of its basic functions. The course will familiarize students with the medical terminology and neurological concepts for a general understanding of the human brain and spinal cord, being of special interest for pre-med students, NS&B, biology, and psychology majors; and anyone simply interested in how the brain works.

Offering: **Crosslisting**

Prereq: **[NS&B213 or BIOL213 or PSYC240]**

PSYC240 Behavioral Neurobiology

This course will introduce the concepts and contemporary research in the field of neuroscience and behavior. The course is intended for prospective neuroscience and behavior majors (for whom it is required) and for biology and psychology majors who wish a broad introduction to neuroscience. The initial few weeks will be devoted to fundamental concepts of neuroanatomy and neurophysiology. Subsequent classes will deal in-depth with fundamental problems of nervous system function and the neural basis of behavior, including neurotransmitter systems; organization of the visual system and visual perception; the control of movement; neurological and neuropsychiatric disorders; the neuroendocrine system; control of autonomic behaviors such as feeding, sleep, and temperature regulation; the stress response; and language, learning, and memory. Experimental results from a variety of species, including humans, will be considered.

PSYC245 Psychological Measurement

This course will discuss various approaches to the measurement of psychological constructs such as intelligence and personality. Topics covered will include ability tests (e.g., IQ tests), achievement tests (e.g., classroom assessments),

and diagnostic clinical assessments (e.g., the draw-a-person test). Strengths and weaknesses associated with various methods of measurement (e.g., self-report vs. performance measures) will also be discussed. Special attention will be given to the criteria used to critically evaluate the psychometric quality of measurement instruments. Students will learn the steps necessary to develop psychometrically sound, practically useful, and legally defensible tests.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC246 Behavior Change, Clinical Interventions and Health Promotion

This class will review the current science and historical context of mental and physical health behavior change approaches across three levels of intervention: the self, the individual, and society. Major topics will include fundamental behavioral principles, basic elements of empirically supported individual treatments (e.g., cognitive behavioral therapies, interpersonal therapy), and the design and evaluation of population-level health interventions. Lectures, readings, and clinical examples will illustrate both the theory and step-by-step practice of evidence-based approaches to behavior change across levels. Assignments may include a self-monitoring exercise, in-class role plays, a group project, an exam, and brief writing assignments. This course is designed to introduce students to a broad range of contemporary approaches to psychological and behavioral treatments; however, it will not provide the skills needed to implement psychological interventions.

Offering: **Host**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC248 Adolescence and Emerging Adulthood

This course takes a global, cultural perspective to the study of human development during adolescence (ages 10–18 years) and emerging adulthood (ages 18–25 years). Students will gain a deeper understanding of key aspects of psychosocial functioning during these two developmental age periods. The course approaches adolescence and emerging adulthood as periods of both opportunity and vulnerability. Topics include cognitive development, love and sexuality, media, peer relationships, and risk and resilience. Class activities and assignments provide opportunities for students to actively engage with the material presented and discussed in class. Students also will have the opportunity to participate in a cross-cultural experience, culminating in a class documentary on a selected topic related to adolescent and emerging adulthood development.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC249 Psychology of Sexual and Gender Diversity

There is a wide range of variability in sexuality and gender. This course reviews psychological research on the experiences of people with various sexualities, gender identities, and gender expressions, as well as how people come to develop beliefs about sexuality and gender.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC250 Personality

What does personality mean? Can you measure it? Who studies it and why?

This course is designed to give a deeper understanding of these questions that psychologists interested in personality study, how they study these in a scientific manner, and how they use this knowledge to help others.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC251 Psychopathology

This course provides an overview of psychopathology, the study of "abnormal" behavior or mental disorders. From various theoretical perspectives, the ways that abnormality is defined will be considered. You will learn what we know and don't know about the phenomenology, diagnosis, and causes of mental disorders. Major domains of psychopathology, the symptoms and behaviors associated with common mental disorders, and the mechanisms hypothesized to be involved with them will be covered. The ways that different paradigms steer the development and implementation of treatments will be examined. This course is not designed to help resolve personal experiences with mental illness. This class will challenge widely accepted ideas about mental illness. You will learn to think critically about how mental illness is understood by society, mental health professionals, and clinical researchers.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

PSYC253 Educational Psychology

This course will focus on three major topics and how they relate to current educational policy debates. The first topic will be an examination of the fundamental purpose of school. We will discuss theoretical and empirical perspectives on why schools exist and ways in which school purpose varies by school type (e.g., public, private, charter) and location (e.g., by state and country). The second topic to be covered relates to the implementation of school mission. In this context, we will reflect on how theories of child development, student motivation, classroom management, and pedagogy inform instructional practice. Finally, the third major topic that will be covered is how to determine whether schools are achieving their stated goals. We will examine the appropriate (and inappropriate) uses of assessment for understanding whether students are learning, whether teachers are effective, and whether a school has a positive or negative climate.

PSYC259 Discovering the Person

This course surveys major developments in psychology and psychiatry from 1860 to the present. Through readings and lectures, the course introduces the major schools, theories, and systems in the American "psy" sciences. We examine the kinds of persons who were "discovered," the techniques of discovery, the extensions of psychological ideas to institutions and policy formulations, and the consequences of these discoveries for public as well as private life. We examine phenomena that were located, catalogued, and explained by these sciences, including rationality, gender, cognition, personality, race, emotion, psychiatric disorders, development, intelligence, and the will. Attention is given to the scientific grounds of investigations and the empirical evidence sought in the century-long process of discovering and naming psychological kinds. Readings include primary source documents, histories, and philosophical analyses.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Identical With: **AMST259, STS259**

Prereq: **PSYC105**

PSYC260 Social Psychology

What leads us to become attracted to one person rather than another? How does prejudice develop, and how can it be reduced? Can psychological research help protect the environment and, if so, how? This course offers an overview of classic and contemporary social psychology, covering topics such as group behavior, friendship, stereotyping, conformity, obedience, and conflict resolution.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC261 Cultural Psychology

Through essays, novels, videos, and film, we will explore the intersection of culture, ideology, and psychology. We will examine how gender, ethnicity, and class are interwoven in the social fabric and individual identity. Employing feminist, psychoanalytic, and deconstructive interpretive methods, we will try to decipher the many ways we inscribe ourselves in culture.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC262 Cultural Perspectives on Mental Health

The study of mental health/illness is increasingly recognized as conditioned by a wide range of interconnected cultural and social factors that profoundly influence subjective experiences. This course seeks to understand the cultural, social, structural, and environmental determinants of mental health, with particular emphasis on cultural and social diversity in a North American context. Some major questions that will be considered are: How do different cultures view mental health and illness? Why do some ethnic groups readily accept mental health care while others generally avoid the psychiatrist or psychologist at all costs? How does bicultural or multicultural identity and minority status affect one's psychological development? How do continuing social disparities related to race, gender, sexual orientation, and social class impact one's mental health and well-being? What is the impact of social media use on mental health? Readings will draw from the growing body of research literature, and examples from popular arts and media will be incorporated as supplemental material for class discussion. Students will review current treatments and participate in class discussions. Students of all backgrounds will be encouraged to explore mental health and illness with a broadened cultural and critical perspective.

Offering: **Host**

Grading: **OPT**

Prereq: **PSYC105**

PSYC266 Psychology of Communities: Identity, Activism, and Social Engagement

This course serves as an introduction to community psychology. Students will read about, research, and discuss major topics in the field, including the ecological framework, diversity paradigms, social change, and empowerment.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC267 Global Mental Health

During the past half-century, mental health professionals have increasingly explored the international reach and cross-cultural relevance of their work. Practitioners have traveled from country to country in order to work with local populations, including those experiencing traumatic circumstances such as war and natural disasters. Professional organizations such as the American Psychological Association have developed guidelines and recommendations for multicultural competence. Researchers have investigated the cross-cultural epidemiology and expression of mental health challenges; for example, according to the World Health Organization, one in four people across the globe will experience a mental disorder at some point in their lives.

What does it mean to establish the global prevalence of mental disorders? Is psychological distress, including the distress that results from traumatic exposure, experienced and interpreted in the same way in all cultural contexts? While some scholars have argued that mental disorders are a global epidemic requiring a uniform, universal response, others have suggested that the exportation of psychological discourse and approaches from Western countries has eclipsed local expressions of distress and indigenous healing traditions. This course will explore these questions and controversies using the tools and frameworks of multicultural psychology. We will place particular emphasis on the social, cultural, structural, and environmental determinants of mental health. We will address mental health disparities between high- and low-income countries, as well as the meanings of psychiatric explanatory models in advantaged and disadvantaged communities. Populations of focus will include migrants, refugees, internally displaced persons, and the urban homeless. Throughout the course, we will explore the growing research in the field of indigenous psychology, which promotes local knowledge, as well as the structural competency movement, which emphasizes the socio-institutional origins of health disparities.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Credits: **1.00**

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105**

PSYC277 Psychology and the Law

This course will offer an introduction to the range of topics that are of concern both to psychologists and to members of the legal profession. We will investigate how psychologists may enter the legal arena as social scientists, consultants, and expert witnesses, as well as how the theory, data, and methods of the social sciences can enhance and contribute to our understanding of the judicial system. We will focus on what social psychology can offer the legal system in terms of its research and expertise with an examination of the state of the social science research on topics such as juries and decision making, eyewitness testimony, mental illness, the nature of voluntary confession, competency/insanity, child testimony, repressed memory, and sentencing guidelines. In addition, this course will look at the new and exciting ways legal scholars and psychologists/social scientists are now collaborating on research that looks at topics such as the role of education in prison, cultural definitions of responsibility, media accounts and social representations of crime and criminals, death penalty mitigation, and gender/race discrimination within the criminal justice system. This course will introduce students to this field, especially to the growing body of applied and theoretical work and resources available for study and review. Students will be encouraged to explore the connections between issues of social science and the law, translating legal issues into social scientific research questions that can then be examined more closely in the literature.

PSYC286 Contemporary Literacy: What Does It Mean to Be Literate in the 21st Century?

What does it mean to be literate in the 21st century? Through this course, students will delve into the process of literacy development and explore the implications of our global technological society for literacy development and literacy education. Topical explorations will include the cognitive and neuroscientific development of literacy, adolescent literacy considerations, media and digital literacy, and the potential effects of an ever-increasing digital society on literacy abilities and functions. Critical literacies, including critical media literacy, will be explored as a special topic.

Students will embark on an investigation into the abilities of American schools and educational media developers to meet dynamic, contemporary literacy demands by evaluating multiple forms of literacy tools aimed at children and teens. The course will also provide a discussion of research standards in the field of literacy and encourage critical evaluation of empirical research.

PSYC287Z Understanding Inequality: Psychological and Educational Perspectives

This class focuses on recent work by psychologists, economists, and education researchers examining the effects of growing inequality on our collective mental health and on the school-related performance of children in particular. One class theme is that U.S. economic inequality has grown substantially in the past few decades, so that we now have one of the highest levels of inequality of any advanced industrialized country in the world. A second key theme is how few Americans are aware of the extent of these changes and their effects on the well-being of children and adults. The course also focuses on the nature of the "American Dream" and how distorted perceptions of social mobility affect many Americans' concerns about inequality. The overall class concentrates on how these economic realities and related psychological misperceptions have combined to create a cascade of negative psychosocial and educational consequences, ranging from "deaths of despair" in adults, to increased mental health issues in children, to the growing polarization of educational opportunities and outcomes at all ages. Among the topics that will be covered are: the growth of wealth and income inequality in U.S. (including comparisons with other advanced, industrialized countries); psychological research on how people perceive and misperceive inequality; the moral nature of inequality in

relation to thinking about distributive justice; the psychological literature on the consequences of inequality; and, finally, the limitations of a meritocracy for addressing these consequences. This course fulfills the Category 1 requirement for the Education Studies Major and Minor, and an elective credit for the Psychology Major.

Offering: **Crosslisting**

Gen Ed Area: **SBS-EDST**

Identical With: **EDST211Z**

Prereq: **None**

PSYC288Z Zero to Infinity: The Psychology of Numbers

What are the origins of mathematical thinking, and why do some people become experts while others get nervous calculating a tip? Before children are ever taught formal mathematics in a classroom, they are confronted with situations where they must use their intuitive understanding of numbers, geometry, and space to successfully navigate their environments. Yet, individual differences in math achievement emerge early in development and often persist throughout children's education. In this course we read and discuss both foundational and cutting-edge articles from cognitive science, education, and psychology to understand how mathematical thinking develops. We will also tackle questions such as: How do culture and varying social contexts affect numerical understanding? What do we know about gender differences in math achievement? How do stereotypes, prejudice, and math anxiety affect math performance? This class will involve a blend of synchronous class-time meetings and asynchronous work.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-EDST**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC293 Towards Antiracist Psychological Science

What does it mean to conduct "antiracist" studies that "decenter whiteness"? What investigative practices are warranted and what scientific foundations are necessary for doing innovative, antiracist research? This course takes up these questions, grounding exploration of scientific practices in a fuller understanding of psychology's history and epistemology. We examine past practices that fostered and sustained racist beliefs, consider race theories, and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These and related concepts along with historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **PSYC105**

PSYC295Z The Science of Happiness

(This course is being offered as a blend of synchronous class meetings and asynchronous work involving small group discussions.) Positive psychology is the study of human happiness. The field has compiled an enormous research base offering evidence of the fundamental components of well-being and flourishing. While former work used a narrow, Western definition of happiness, the discipline later broadened its focus to include traditionally Eastern concepts such as social harmony and compassion. More recently, the field has been redefined through second-wave and third-wave positive psychologies, both of which seek to break free from the binary concepts of "positive" and "negative" in favor of a dialectic approach, while utilizing concepts of flourishing through suffering found in indigenous psychology, and including models for systemic change found in social work, sociology, and economics.

This course will trace the history and development of positive psychology from its inception to the current state of the field, using a positive psychology text supplemented by journal articles. Core concepts will be discussed and critiqued. It will require students to keep "flourishing Journal" and complete out-of-class activities for personal reflection upon and practice of individual experiences of happiness. Additional course requirements include shorter and longer reflection papers, in-class discussion, and a final project.

Offering: **Host**

Grading: **OPT**

Credits: **1.00**

Prereq: **None**

PSYC303 Social Media and Development: Constructing the Self Online

Humans typically develop their view of themselves, or their self-concept, through interactions with others in their community. For adolescents, this takes place typically within school environments and other community institutions as they begin to rely less on their parents. With the dawn of social media, these interactions are taking place on a global scale with increased anonymity. How does this social and technological change impact how teens and young adults form their views of themselves? What implications do these changes have for adults who work with adolescent populations? This course will explore these questions, illuminating an understanding of the accepted model of self-concept development and the impacts of social media. Students will also explore related concepts of self-esteem and social development. This course will use empirical research to examine and critique the overall negative view of social media usage amongst adolescents, and train students to probe commonly accepted viewpoints using careful scholarship. The course will provide a discussion of research standards in the field of social media research and encourage critical evaluation of empirical research.

Offering: **Crosslisting**

Grading: **A-F**

Credits: **1.00**

Identical With: **EDST333**

Prereq: **None**

PSYC304 Celebrating Learner Differences: Creating Inclusive Classrooms Using Research

How do humans develop the capacity to learn? This course will focus on the dynamic influence of the cognitive, social emotional, and demographic factors involved in this process, using a research-based framework. Students will be encouraged to evaluate the learning process throughout K-12 educational settings and will explicitly learn to read and critique research in the learning

sciences. Students will also evaluate the utility of research in different learning settings and the effectiveness of associated pedagogical tools and strategies.

The course will begin with a discussion on learning sciences research and explicit instruction for research evaluation. Topical considerations will include the development of human memory, executive function, attention, and other cognitive processes that underlie learning and information processing. Students will also explore background factors, including socioeconomic status, and social emotional factors, including motivation and emotion, as predictive and associated factors for learning and information processing.

This course fulfills the Category 1 requirement for the Education Studies Major and Minor. It satisfies the ELECTIVE only requirement for the PSYC major.

PSYC311 Children's Learning from Media

Children are surrounded by media that aim to teach them, from television shows that introduce Spanish, to books that promote kindness, to apps that explain the biological world. How do children learn from the wide range of educational media they encounter? In what ways do media set the stage for children's expectations about the world? And does our modern, digital era suggest a shift in children's education? In this course, we will explore theoretical questions and empirical research to better understand how children learn from media and how different forms of media affect cognition and behavior. We will focus primarily on infancy and early childhood as periods of tremendous growth and increasing exposure to media, but will also discuss media use during middle childhood and adolescence. We will consider topics that have been well-studied and important questions that remain unanswered in the field. We will also turn a critical eye to the historical lack of representation (i.e., race, gender, disability, sexual orientation, family structure, etc.) in children's media and discuss necessary changes. Throughout the course, we will engage critically with empirical research, develop ideas for testing unanswered questions, and practice communicating about research to the public.

PSYC312 Family Transitions Across the Life Span

This seminar aims to provide an overview of normative and non-normative family transitions from adolescence through adulthood. Grounded in a life-course perspective, this course examines theories and recent findings related to family transitions. Topics include "modern" dating, relationship formation and dissolution, staying single, parenthood and remaining "child-free," family structure changes such as marriage, divorce, remarriage, and widowhood, as well as grandparenting, empty nesting (and refilling), and the "sandwich generation." From this course, students will learn developmental theories related to transitions across the life course, and be able to critically analyze recent research on family transitions.

PSYC313 Psychology of Power, Status, & Inequality

Differences in power and status can be found in almost every society around the world. This course will provide an introduction to power and status by focusing on the theories and methods that contemporary psychologists use to understand these fundamental aspects of social life. First, we will explore who is more likely to gain power and status (e.g., personality characteristics of powerholders); the methods that people use to do so (e.g., asserting one's dominance or expertise); and the influence of power and status on basic psychological processes, such as attention, emotion, and perception. The second part of the course will review the potential consequences of power and status on various aspects of our lives, from decision-making and goal pursuit to interpersonal and intergroup relationships, as well as health and well-being. Throughout the course we will discuss not only how power and status dynamics give rise to inequality, but also how their effects may, in turn, be shaped by the degree of inequality in a given society. The course will involve lecture, discussion, and readings of relevant primary sources.

PSYC316 Schizophrenia and Its Treatment: Neuroscientific, Historical, and Phenomenological Perspectives

The goal of this seminar will be to critically investigate the concept of schizophrenia as a unitary disease construct, from historical, neuroscientific, and phenomenological approaches, and the implications of these views for our understanding of treatment of the disorder. How are we to make sense of a psychiatric disorder that has changed so substantially in definition over time, with wide interindividual difference in symptom expression and functional outcome, a wide array of competing theories regarding etiology and biological mechanisms, and correspondingly diverse treatment interventions? We will engage these questions through three separate units that will evaluate the disorder from three different levels of analysis: (1) readings in the history of psychiatry and the perspective they cast on schizophrenia as a unitary disease concept; (2) an analysis of contemporary work in neuroimaging and experimental cognition in the disease and the current status of creating a coherent account of neurocognitive mechanisms of the disease, as well as a neurocognitive approach to novel interventions; and (3) new work on understanding the experience of the disease from first-person accounts and the systematic analysis of these accounts as a window to understanding heterogeneity in the disease and novel approaches for therapy.

PSYC317 Seminar in Adoption & Culture

This seminar uses psychology theory and research, as well as interdisciplinary scholarship from across the social sciences and humanities, to critically examine the psychological experience of being adopted. We will examine the nature and experiences of adoption, including international, domestic, transracial, and same-race adoptions. We will draw on critical scholarship that highlights systems of power and questions the established "truths" of adoption (e.g., adoption as saving an orphan). Further, we will examine the ways in which belonging to a minoritized culture, race, or ethnicity impacts the ways in which individuals experience adoption. Example topics include adjustment, birth family, identity, migration, and well-being.

PSYC318 Culture and Subjectivity

This is a course about neoliberal culture, its distinctive social and psychological characteristics, and possible alternative conceptions of the social and forms of subjectivity in the 21st century. Neoliberalism is a contested signifier that designates both an economic program and a cascade of cultural changes that began coalescing and accelerating in the early 1980's and has continued to exert an influence that has only recently been challenged by the resurgence of nationalism ushered in by the Trump era which has reverberated across the globe. Over the course of its development, neoliberalism has had widespread ramifications not only as an economic doctrine that spurred and intensified globalization but also as a cultural ideology that has influenced self-concept and modes of social relating. This course focuses on the concept of human subjectivity and how subjectivity appears within a neoliberal horizon. The critical psychologist Thomas Teo states, "society, culture, and history provide forms (molds) of subjectivity, whereby (developing) individuals have the agency to sometimes choose, expand or change forms, and in rare circumstances, they may even be able to transcend these forms. Under normal circumstances, however, humans adapt, (ful)fill, and actively 'suture' into these forms, allowing for variations and new actualizations." To elucidate the current cultural molds informing neoliberal subjectivity, the historical development of neoliberal economic doctrine and its implementations will be studied, followed by an examination of neoliberal cultural products (e.g. Serial TV and Social Media) considering both their content and form. Finally, recent reactionary phenomena will be considered in relation to the effects of neoliberalism as well as what social and subjective alternatives exist within our current indeterminate conjuncture.

PSYC322 Psychology of Decision-Making

We make decisions all the time. The vast majority of decisions have little consequence, though some are monumental and can deeply affect our lives. The broad goal of this course is to explore the science of judgment and decision-making. We will leverage concepts and research from the fields of psychology, neuroscience, and economics to understand how an individual makes judgments and decisions, why these decisions are subject to bias, and whether humans are "rational" decision-makers. Along the way, we will examine major questions that have guided decision research, consider domains where decision-making could be improved, and think of practical applications of course concepts to everyday life. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite (plus any courses listed under individual sections), as this is an upper-level course (that relies on student contributions) in the Psychology Department.

Offering: **Host**

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC327Z Psychology of Conflict Resolution

This course will focus on the psychological causes and consequences of interpersonal, intergroup, and international conflict. Topics discussed will include the role of power, status, trust, and social identity. Students will learn about various theories related to the causes of conflict, as well as practical techniques for navigating conflict, including negotiation, mediation, and facilitation.

Gen Ed Area: **SBS-PSYC**

Prereq: **None**

PSYC328 Current Research in Early Childhood

Early childhood is widely seen as a time when the environment exerts particularly strong influences on individuals, with large effects on children's risk or resilience for healthy developmental outcomes. Research in this area provides a way to consider and evaluate claims about this developmental period. What knowledge does society need about this period to promote healthy development for all children? Where do children learn social skills? Why do children play with some toys but not others? How does timing affect the impact of early interventions? What foundational skills help all children learn to read? By what mechanisms does economic poverty affect development?

This advanced seminar will explore current research in early childhood. We will focus on the period from birth to five years, drawing on empirical work in developmental psychology, cognitive science, and education to discuss major topics and debates. These include cognitive and academic foundations for later schooling; emotional development and social skills; social identity and sense of self; self-regulation and executive functions; play; adverse factors in development; risk, resilience, and vulnerability; culture, socioeconomic status, and poverty; developmental neuroscience; early childhood education; and public policy. Guest visits by experts in some of the areas will complement our readings and discussions.

Prereq: **None**

PSYC329 Neural Costs of War

This course focuses on stress reactions that result because of exposure to war, combat, and related atrocities. You will learn about the diagnosis of PTSD, including its development and history. There is a strong emphasis on the neural and cognitive mechanisms for stress-related psychopathology and the overlap of psychological and neural systems with the damaging effects of traumatic brain injury. While interactions of these mechanisms with social and cultural processes are considered, the primary emphasis is on the neural and cognitive mechanisms. To be fully prepared for this course, students should have a solid grounding in neuroscience and behavior, as well as basic psychopathology.

PSYC330 Engaging Antiracist Psychological Science: From History and Theory to Practice

Responding to calls for antiracist psychological science, this seminar explores what it means to design and conduct that science. What does it mean to conduct "antiracist" studies that "decenter whiteness"? The exploration of scientific practices is grounded in gaining a fuller understanding of psychology's history, epistemology, research practices, and influence on social policy. Upon surveying past practices that fostered and sustained racist beliefs, we examine race theories and explore key concepts including reflexivity, positionality, diversity, elite capture, race theory, indigenous psychologies, and social justice. These historical, philosophical, and theoretical analyses are engaged to locate research methods and professional practices that move toward realizing antiracist science. The course incorporates lab activities, 6 papers, and a final project that engages a key concept or practice of antiracist psychology.

PSYC332 Seminar in Cognitive Neuroscience

This seminar is an in-depth analysis of the ways that scientists study the neural basis of cognition in humans. Topics to be covered include the representation of visual categories, the neural influence of attention, episodic memory, theories of spatial cognition, and decision-making. Through reading and discussion of primary research articles, we will evaluate the methods and theoretical debates in each domain, while recognizing and integrating common themes that link across the field. Students will also learn how to work with simple computer models and simulations (using Python), in order to gain a strong foundation in the computational principles that underlie recent advances in the field of cognitive neuroscience.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-PSYC**

Prereq: **None**

PSYC334 Seminar in Social Neuroscience

One of the most complex functions we (and other animals) exhibit is the ability to interact with other members of our species. Social behavior, in turn, depends on processes at scales ranging from the entire nervous system down to the effects of individual hormones and genes. This course will examine phenomena such as facial processing, attributions of agency and mental states, aggression,

dominance, social isolation, in-group/out-group identification, and group decision-making.

To understand these concepts, we will discuss experimental findings that employ a variety of methods, ranging from behavioral studies to physiological assays, but with particular emphasis on methods from cognitive neuroscience. As we discuss primary research in the field, students will not only gain insight into the specific social behaviors covered, but a broader understanding of research approaches in psychology and neuroscience. Foundations of Contemporary Psychology (PSYC 105) is strongly recommended as a prerequisite.

PSYC335 Behavior Genetics

This is a seminar exploring the role of genetic variation in behavioral tendencies in both humans and non-human animals. A discussion-based seminar format will cover topics including selective breeding for behavioral traits in non-human animals, evolutionary theories for natural selection of behavioral traits, research methods in behavior genetics, and ethical concerns within behavior genetics research. We will discuss the history and paradigm shifts in the field behavior genetics and critically evaluate empirical work evidencing the role in genetics in a variety of psychological and behavioral traits such as aggression, political orientation, and mental health.

Prereq: **PSYC105**

PSYC338 Masculinities

This course examines masculinities and the psychology of men using theories and research findings. We survey a range of perspectives on men and masculinity, drawing from evolutionary theory, cognitive psychology, psychoanalysis, social psychology, and queer theory. We will ask how the psychological attributes associated with men relate to private life and public spaces, and whether our enactments and conceptions of masculinity have changed over time. Exploration of these questions will be informed by both psychological research and close analysis of media representations; the course thus emphasizes methods for examining representations of masculinity in science and the media.

Gen Ed Area: **SBS-PSYC**

Prereq: **PSYC105 OR [FGSS209 or ENGL208]**

PSYC339 Psychology of Human Sexuality

This course introduces the psychology of human sexuality in its evolutionary, physiological, reproductive, and social contexts. We'll explore various psychological theories of human sexuality, as well as sexual motivations, sexual anatomy, sexual response, sexual pleasure, gender and gender identity, sexual orientation, sexual behavior, sexuality across the life span, safe sex, and consent.

In addition, this course covers contemporary issues that may arise each week, such as sex education, gender diversity, and sexual orientation. In light of the current political climate, it is anticipated that politically sensitive topics may

be discussed in class to sort out myths from evidence supported by scientific research.

The course emphasizes current research in psychology, sexology, and sociology and will be inclusive across cultures, races, ethnic groups, gender, sexual orientation, and relationship orientation. This course is also intended to be responsive to student questions and to provide a space for discussions in a non-judgmental, inclusive, and accepting environment.

PSYC340 Seminar on Migration and Child Development

How do the current politics of borders and citizenship impact the well-being of migrant children, youth, and families? How do U.S. immigration policies intersect with what research tells us about what children need to thrive? Is there a role for psychologists to inform today's discourse on immigration policy? These are a few of the questions that we will be exploring throughout our time in this class.

Through class readings, discussions, and course assignments, we will examine why and under what circumstances children and families migrate to the United States. We will explore how various parts of the migration experience relate to child and adolescent development. Together we will analyze contemporary immigration policies through the lens of developmental psychology. Students will learn to grapple with the opportunities and limitations of developmental science to inform immigration policies that matter for the day-to-day lives of immigrant children and families.

PSYC341 Psychology of Human Memory

This seminar course is designed to provide students with an in-depth exploration of the psychological science of human memory. We will examine current issues and theories in human memory research and the methods by which human memory is explored. Both classic and contemporary research findings from the disciplines of cognitive psychology, cognitive neuroscience, and neuropsychology will be brought together to paint a picture of the current understanding of human memory. Topics to be covered include different memory systems and frameworks (e.g., working memory, semantic memory, episodic memory), remembering and forgetting (e.g., phenomenal experience of remembering, various mechanisms of forgetting), reality/source monitoring (e.g., memory attributions, true and false memories), the influence of emotional and social factors on memory (e.g., social remembering), and memory in clinical populations.

PSYC347 Science of Suicide Risk & Prevention

This course will explore the science of suicide research, prevention, and intervention. Topics will include terminology, epidemiology, historical and contemporary theories of suicide, ethical and methodological challenges to suicide research, risk and protective factors, empirically supported approaches to prevention and intervention, suicide in the media and popular culture, and emerging issues and controversies in the field of suicidology. In many ways, the field of suicide research is young and knowledge is rapidly changing. Special attention will be paid to novel methodological advances in clinical psychological science. The course will use books, empirical articles, class discussion, critical thinking, exams, and writing assignments to accomplish its learning objectives. This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness nor will it address assessing suicide risk among friends or family members.

PSYC351 Your Brain on Drugs: The Neuroscience Behind Drugs of Abuse and Addiction

Substance use disorder (colloquially known as drug addiction) is a pervasive disease that has touched countless lives. In order to understand the disease, one must first understand the mechanism of actions of addictive substances. This course will cover several major classes of abused drugs (nicotine, alcohol, amphetamines, cannabis, psychedelics, etc.) through a combination of lectures and discussion of current research articles studying these substances and their effects on the brain. Societal influences on the conception of addiction and addiction treatment will also be discussed. This course is largely discussion based, with a final project on a drug of choice.

PSYC358 Seminar in Intergroup Peace and Conflict

This seminar is an in-depth analysis of key psychological readings on the topic of intergroup peace and conflict. Topics covered include key psychological theories in intergroup relations used to articulate the reasons and sources for intergroup conflict (i.e., Social Identity Theory, Realistic Group Conflict Theory), topics covering how intergroup conflict is perpetuated (i.e., revenge, collective memory and collective victimization), strategies to reduce conflict and promote peace (i.e., contact theory, norm interventions, intergroup dialogues, protest), and behaviors that ideally progress beyond conflict (i.e., apologies, forgiveness, reconciliation, reparation). Additionally, the course examines philosophies of peace. Students in the course will not only discuss psychological strategies that are used to move toward peace, but critically consider/reconsider what a peaceful society means and what one would actually look like. Through reading and discussion of theoretical and experimental research articles, we will not only evaluate the methods scholars use to study these real-world issues, but also critically analyze and deconstruct the theoretical underpinnings influencing how psychologists approach and evaluate intergroup conflict and peaceful societies.

PSYC359 Making the Psychological: Discovering, Manufacturing, Circulating

Psychology aims to explain human experiences and thoughts, including unconscious ones. Using scientific methods, psychology produces valid representations of human nature, names them, and circulates that knowledge for both its truth value and usefulness to society and individuals. Despite much success in these aims, the validity of much of psychology's knowledge is in being challenged - as evidenced in recent concerns about the reproducibility of experiments. We will examine the epistemic grounds of psychology's truth claims and consider alternative models that understand the truth claims to be enactments, constructions, or ideologies that rehearse cultural beliefs. Case studies of science-based knowledge eventually found to be inaccurate or exaggerated (priming research; the power pose) are used to examine how some truth claims are generated and challenged, and cases of robust research are used to explore how some truth claims acquire credibility inside and outside the laboratory. We ask, too, how these claims travel to be taken up as new ways for individuals to experience the self and social world, and examine the public's and our own aspirations to expand consciousness and act otherwise. Students will

develop case studies of psychological knowledge, its validation, circulation, and effects in the world.

PSYC386 Advanced Research in Sleep

This advanced research course is designed to provide students with an in-depth understanding of how to critique and analyze psychological research. Specifically, we will focus on research within the field of sleep and psychosocial functioning. This seminar course takes an intensive lab-based approach. Students will have access to a comprehensive dataset that includes assessments of stress, anxiety, depression, physical activity, interpersonal relationship quality, personality, procrastination, and chronotype. Based on this data, students will be expected to commit to a semester-long project, which involves analyzing data and reporting findings on a self-selected topic. Upon completion of this course, students will have a strong working knowledge of the field of sleep and psychosocial functioning. This course also provides opportunities for students to develop analytical, writing, critical thinking, and presentation skills. Students also will gain data analytic skills using the Statistical Package for the Social Science (SPSS) program.

Offering: **Host**

PSYC390 Experimental Investigations into Reading

Experienced readers can easily recognize thousands of words. The mental dictionaries of these readers are efficiently organized to allow rapid and seemingly effortless word recognition. There are still many unanswered questions about the processes involved in visual word recognition. In this class, students will work together with the instructor to design and carry out an experimental investigation relating to reading and word recognition. The semester will provide students with a chance to integrate all aspects of the experimental process: idea formation, experimental design, data collection and analysis, interpretation, write-up, and presentation.

PSYC392 Behavioral Methods in Affective Neuroscience

This research methods course teaches experimental design and methods in experimental psychopathology using tools to conduct behavioral research in cognitive-affective neuroscience. Course material includes studies from the contemporary psychopathology research literature, with a focus on cognition-emotion interactions. Methods taught will vary by semester and individual research projects and will include statistical procedures (e.g., repeated measures ANOVA), tools for conducting research and analyzing data (e.g., computer programming for stimuli presentation and data processing), and neuroimaging techniques (e.g., event-related potential). There is high expectation that those enrolled in this course will take initiative to extend their learning to areas for which they have specific interests related to the course objectives. Students are also expected to work independently.

PSYC393 Advanced Research in Cognition and Neuropsychiatric Illness

Students in this advanced undergraduate research course will work in teams on novel and ongoing research studies focused on understanding neurocognitive dysfunction and its treatment in neuropsychiatric illness. Students will be matched to a research project and will participate in different aspects of this research including background literature review, acquiring elementary skills in neurocognitive and symptom assessment, and collecting and/or analyzing extant data using SPSS. Students may also be involved in learning cognitive training procedures.

PSYC396 Advanced Research on Culture and Emotion

This course offers an in-depth examination of how culture (e.g., cultural values, norms) influences the emergence, experience, expression, and social consequences of emotions. Students will work in a team on a semester-long research project on culture and emotion (e.g., envy, humiliation, shame, happiness). The course includes advanced theoretical and empirical literature. The readings and research projects will give special attention to how gender intersects with culture in emotional experience and expression. Students will also learn how to adapt methods (e.g., narrative approaches, diary studies, field experiments) and techniques (e.g., adjustment of research measures to specific cultural communities, translation) to study emotions in their cultural context.

PSYC397 Advanced Research in Clinical Psychology

This advanced research course provides students the opportunity to conduct supervised research in clinical psychology, specifically in the area of suicide and self-injurious behaviors. Depending on the semester and student interests, tasks may include study design, data collection, clinical interviewing, data management, data analysis, and manuscript preparation. Weekly lab meetings will focus on current topics in clinical research and will include student presentations. All students will complete a research paper in journal article format. It is expected that those enrolled in this course will work independently and take initiative to extend their learning in the areas most consistent with their interests.

Note: This course is not designed to resolve personal experiences with suicidal thoughts, suicide loss, or mental illness, nor will it address assessing suicide risk among friends or family members.

QUANTITATIVE ANALYSIS CENTER (QAC)

QAC150 Working with SQL and Databases

Many of you have heard of studies that analyzed Twitter messages and predicted some phenomena--spread of flu in New York, consumer confidence index, and so on. Behind the success of these studies are the systems for data storage and retrieval. A regular user can access only the latest nine days of tweets. Any study that aspires to analyze longer periods has to deal with the issues of storing the observations and retrieving them later for analysis. The goal of this course is to show you how to do that--how to connect to various types of databases and how to retrieve and update your data. We will start with relational databases; learn SQL, the language used to query and update the data; and explore the latest developments in the database field--Hadoop and MapReduce.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC151 Working with Excel and VBA

Many of us know Excel for its spreadsheets: a quick and easy way to store some information, share it, and maybe make some charts. The goal of this course is to show you the more advanced features of Excel. We will write code in Visual Basic for Applications (VBA), learn how to import data from external databases and Web-based resources, create custom menus to interact with a user, and examine how Excel can be used in business decision making.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC153 Working with Mathematica

This course introduces students to Mathematica's computing environment and all the basic features of the software. Starting with basic operations and computations, students will be introduced to graphics, visualization, and mathematical computations and will learn through a series of hands-on lab exercises to use the Mathematica programming language for modeling and data analysis. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, a basic calculus background, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-QAC**

Prereq: **None**

QAC154 Working with MATLAB

The content of this course focuses on learning the basics of utilizing MATLAB to program and solve basic problems. We will operate on the assumption that students have no prior experience with programming. The goals of the course will be to develop algorithmic thinking, problem solving, and quantitative skills within the context of MATLAB. The course will cover essential mechanics of programming, many of which are common to all programming languages, as well as some selected advanced topics. With the expectation that students with a broad background with various motivating factors lead them to enroll in

the course, students will be invited to apply the skills learned in the course to completing the culminating final project related to their specific interests.

Offering: **Host**

Grading: **OPT**

Prereq: **None**

QAC158 Working with Stata

This course introduces students to programming, data management, and analysis with Stata. Through a series of hands-on lab exercises, students learn to work with a variety of data formats and use Stata's programming capabilities to effectively manage and analyze their data, with an emphasis on data exploration and visualization. While there are no prerequisites, a basic familiarity with computing tools, an understanding of descriptive statistics, and a willingness to make mistakes and learn from them is expected.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **None**

QAC159 Working with High Performance Computing (HPC) Tools

This is a cross-disciplinary course designed to introduce students to UNIX and learn how to perform calculations/analysis in a high performance computing (HPC) environment. We assume students have a basic understanding of computing, but no prior experience with working with UNIX or HPC is expected. All students will gain experience working on Wesleyan's High Performance Computing cluster. We will learn to work in a UNIX environment, how to write BASH scripts, and how to schedule and complete our work in a multiuser HPC environment. In the second part of the course, we shift the focus to parallel computing. We introduce CUDA devices used for parallel computing, and work to convert a serial program into its parallel version. Students will develop and implement a project of their choosing, which may involve UNIX and HPC combined with any area of interest. Anticipating the course will be taken by students studying a broad range of disciplines brought together by a common interest in HPC, individualized support and feedback will be provided at several checkpoints throughout the course. Students will gain insight into the many ways UNIX and HPC are crossing traditional disciplinary boundaries to advance research in a variety of fields, expanding the possibilities in our data-driven era.

Offering: **Host**

Grading: **OPT**

Credits: **0.50**

Gen Ed Area: **SBS-QAC**

Prereq: **COMP112**

QAC171 Business Modeling with Excel

Broadly speaking, this course is about evidence-based decision-making. It is intended for students with a background in Excel and VBA who want to learn how to use spreadsheets to develop business and financial models and communicate the results. Model building is different from the usual Excel skills as it focuses more on the analytical/mathematical aspects than on data wrangling and requires some basic familiarity with economic/financial models and data analysis tools. We will start with problems where the inputs are deterministic and we must decide on optimal allocation of resources. We will then advance to problems with stochastic inputs and explore solutions either through simulation or through optimization of goal functions. Through this work we will develop the appropriate programming skills (e.g., VBA) and learn to effectively use Excel to implement our models and display the results of our analyses.

QAC190F Big Data, Big Promises, Big Problems? (FYS)

This seminar explores the transformation of the modern data landscape from its pre-datafication beginnings in the early 90s to the contemporary age of "big data." Throughout this transformation, various sectors of society, including healthcare, education, business, urban planning, governance, sustainability, media, science, and art, have experienced unprecedented opportunities for growth and advancement. However, alongside these opportunities, significant challenges have arisen, including privacy concerns, fairness and bias issues, data governance, and model interpretability, all of which have far-reaching implications. The seminar provides a systematic exploration of the characteristics of the "big data" landscape, its impact on the production and distribution of goods and services, and its "data ethics" implications. We will explore the promises, and problems, of our data-driven era, paving the way for informed discussions and critical thinking in our fields of study.

QAC201 Applied Data Analysis

In this project-based course, you will have the opportunity to answer questions that you feel passionately about through independent research based on existing data. You will develop skills in generating testable hypotheses, conducting a literature review, preparing data for analysis, conducting descriptive and inferential statistical analyses, and presenting research findings. The course offers one-on-one support, ample opportunities to work with other students, and training in the skills required to complete a project of your own design. These skills will prepare you to work in many different research labs across the University that collect empirical data. It is also an opportunity to fulfill an important requirement in several different majors.

QAC203 Hollywood and Big Data

Taught by a media research executive with a long industry experience this course is designed to provide students with an introduction and understanding of how the media industry is using data to make decisions that shape the art landscape of our times. Data around consumer behavior--what, how and why people are watching--has exploded recently and is extensively used in making decisions about what TV shows and movies to produce, how to promote them and how to make them. The course will explore how the media industry quantifies different kinds of content, the ways in which people watch and pay for that content, and how value is attributed across the media landscape. Students will be introduced to essential "media metrics" (e.g. viewership, box office, engagement) and learn to evaluate different data sets for their integrity and representative insights. Visiting media executives will discuss how data informs their jobs ("evidence-based decision making"). Assignments will include written briefs based on different data sets and a final project presentation highlighting skills in analyzing and presenting insights extracted from media research data. By the end of this course, students will be familiar with key decision-making tools in the media industry and be able to analyze and understand the impact on media output

QAC204 Visualizing Firearms History: An Applied Quantitative and Archival Approach for a Project-Based Expl

This project-based course provides a unique cross-disciplinary opportunity to study important historical questions surrounding firearms. Combining quantitative methodology in data science with qualitative research methods in history, students will answer questions they are passionate about based on existing datasets. Students will read, discuss, and write responses to the latest historical scholarship on the technological development of guns, firearms in media, gun violence statistics, and advertisements. Students will choose one of four datasets to research and analyze. These include data sets related to firearms patents since the 1820s, firearms in media (film, television, anime, games), firearms-related deaths, and advertisements of firearms. Students will develop skills in hypothesis testing and inferential statistical analysis alongside qualitative research methods used in history. The course offers one-on-one support and training in the skills required to complete a team-based final project. The final project will be hybrid between a research paper and also an exhibit (e.g., film, website, media, art installation). Students will present their work at the center's third annual undergraduate research conference (Spring 2025). Select students can apply to continue on as QAC summer apprentices and Baker Collabria Fellows in Data Analysis, and as CSGS NEH-funded summer history research fellows and as History thesis researchers.

QAC211 Digging the Digital Era: A Data Science Primer

The course introduces students to the practice of what has come to be known as data science. Using a multidisciplinary approach and data from a variety of sources that cover any aspect of everyday life--from credit card transactions to social media interactions and Web searches--data scientists try to analyze and predict events and behavior. The first part of the course defines the area and introduces basic concepts, tools, and emerging applications that will include a broad introduction to machine learning tools and algorithms. It will include a brief mathematical background and introduction to modeling across disciplines. In part two of the course, we work on data acquisition and management and introduce appropriate programming and data management tools. In part three, we concentrate on basic analytical and visualization techniques as we explore and understand the emerging patterns. Using a learning-by-doing approach in a computing laboratory, students will learn how to write computer programs in R to access, organize, and analyze data through a series of small projects designed to illustrate the application of the techniques we develop for a variety of data sets and situations. The class will include hot topics like big data, privacy, and ethical issues around data, to name a few. Students will also engage in a semester-long project where they will address their own research questions working with "messy data."

Credits: **1.00**

Gen Ed Area: **SBS-QAC**

Prereq: **None**

QAC220 Applied Vectors and Matrices

An introduction to the mathematics of matrices and their application in traditional and modern methods of data analysis and scientific computing. The course promotes an interdisciplinary approach, and topics may include:

- Coordinate transformations in data visualization, iterated patterns in mosaics and art
- Use of least squares approach with linear solvers for regression, as well as image alignment
- PCA-decomposition of computer images (the "eigenfaces" example)
- Matrix decomposition methods: Singular Value Decomposition and Non-negative Matrix Factorization
- Dimensionality reduction and data compression
- Matrix operations in deep learning.
- ChatGPT and word vector embeddings

Students will use R for most of the computational tasks, and Mathematica for symbolic math and deep learning.

Prereq: **MATH121**

QAC231 Introduction to (Geo)Spatial Data Analysis and Visualization

Geographic information systems (GIS) provide researchers, policy makers, and citizens with a powerful analytical framework for spatial pattern recognition, decision making, and data exploration. This course is designed to introduce social science and humanities students to spatial thinking through the collection, management, analysis, and visualization of geospatial data using both graphical and command line-based spatial analysis platforms. Classes will consist of short lectures, hands-on training, group projects, critiques, and class discussions. Weekly readings and assignments will build skills and reinforce concepts introduced in class. The course will culminate in a group project developed through student-driven inquiry and including geocomputation. Readings across multiple disciplines will allow students to comprehend the breadth of applied geospatial thinking in today's research arena. The course is part of Wesleyan's Digital and Computational Knowledge Initiative and is aimed at students with limited or no prior GIS experience.

Offering: **Host**

Prereq: **None**

QAC232Z Mapping the Pandemic

The COVID-19 pandemic has altered the global community's daily relationship with space and movement, both at a hyperlocal scale of social distancing to a global scale of disease spread. Spatiotemporal visualizations in the form of maps and apps have allowed us to watch the worldwide spread of COVID-19 and keep tabs on local case counts in our own spaces. Geographic information systems (GIS) provide citizens, researchers, health care providers, and policy makers with a powerful analytical framework for visualization, data exploration, spatial pattern recognition, response planning, and decision making within our life in the time of COVID-19. This course is designed to develop spatial thinking and visualization skills relevant to COVID-19. Students will look at (and critically evaluate) existing maps and apps related to the current pandemic, create their own maps and apps, and critically evaluate their classmates' maps and apps. Class meetings will consist of case study lectures/discussions, instructor-led skill-building workshops, studio work sessions, and presentation/critique sessions. Spatial data collection, management, analysis, and visualization will occur within a cloud-based GIS (ArcGIS Online). Readings prior to the first class will establish a baseline for student comprehension of the breadth of applied geospatial thinking in today's research arena. The course is aimed at students with limited or no prior GIS experience.

QAC234 Working with Remote Sensing Data with Applications in Social Science Research

The last decade has seen an increase in application of remote sensing data in social science research: nighttime light data is used to support research into economic development and urbanization, measurements of pollutants serve as a proxy for economic activity, digital elevation models are used by historians to reconstruct most probable locations of ancient roadways, and archeologists use image analysis to discover ancient sites. This course will introduce students to the universe of publicly available remote sensing data products and will teach the students how to work with the remote sensing data (e.g., using Google's Earth Engine and its scripting platform). Topics covered in the course include the manipulation of geometric features, making of maps and animations of environmental variables, generation of time series for geographic regions, and operations on aerial photography.

QAC239 Proseminar: Machine Learning Methods for Audio and Video Analysis

In this course, students are introduced to machine learning techniques to analyze image, audio, and video data. The course is organized in three parts, and in each part we will first introduce how these nontraditional data can be converted into appropriate (mathematical) objects suitable for computer processing, and, particularly, for the application of machine learning techniques. Students then will learn and work with a number of machine learning algorithms and deep learning methods that are effective for image and audio analysis. We will also explore major applications of these techniques such as object detection, face recognition, image classification, audio classification, speaker detection, and speech recognition.

QAC241 Introduction to Network Analysis

This is an interdisciplinary hands-on course examining the application of network analysis in various fields. It will introduce students to the formalism of networks, software for network analysis, and applications from a range of disciplines (history, sociology, public health, business, political science). We will review the main concepts in network analysis and learn how to use the software (e.g., network analysis and GIS libraries in R) and will work through practice problems involving data from several sources (Twitter, Facebook, airlines, medical innovation, historical data). Upon completion of the course, students will be able to conduct independent research in their fields using network analysis tools.

QAC250 An Introduction to Data Journalism

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality—a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

QAC251 Data Visualization: An Introduction

This course will introduce students to the principles and tools necessary to present quantitative information in a visual way. While tables and graphs are widely used in our daily lives, it takes skill to deconstruct what story is being told. It also takes a perceptive eye to know when information is being misrepresented with particular graphics. The main goals of the course are for students to learn how to present information efficiently and accurately so that we enhance our understanding of complex quantitative information and to become proficient with data visualization tools. Beginning with basic graphing tools, we will work our way up to constructing map visualizations and interactive graphs. This course will require a substantial amount of computation in R. No prior programming experience is necessary, but learning does require willingness and time.

QAC301 Statistics Education Practicum

This course will serve students who are pursuing their undergraduate degree in a variety of disciplines but who want to expand their skills in statistics and applied data analysis in preparation for a future career. It will also serve students who are currently pursuing independent, quantitative research at the undergraduate or graduate level. The course will center on personal interaction in support of introductory statistics students. Active peer mentoring and supporting experiences will be based on the theory that good teachers (and learners) of statistics need to be developed, as opposed to being trained. In line with this theory, this hands-on course will provide an intensive opportunity to build specific knowledge regarding teaching and learning in the area of data-driven statistical inquiry. Students enrolled in this course will (1) attend statistics-mentoring development sessions (one hour per week); (2) provide one-on-one support for introductory statistics students during workshop-oriented class sessions (three hours per week); (3) lead small group-mentored meetings for five to six statistics students (one hour per week); and (4) monitor and critique progress on applied data assignments (one hour per week). In addition to these hands-on experiences, students will pursue a project aimed at furthering the field of statistics education. Projects may take the form of course evaluation, content/conceptual curriculum development, or translation of educational statistical software materials.

Similar to QAC380 (Introduction to Statistical Consulting), this course is aimed at providing students with an opportunity to enhance their statistical skills beyond the introductory level.

QAC302 National Education Equity Lab Teaching Fellowship

This course is for students serving as Teaching Fellows for a National Education Equity Lab course, which provides college courses to Title I and Title I-eligible high schools nationwide. Students will oversee a single course section for one of the offered classes, with responsibility to manage up to 25 high school students in a once-weekly Zoom meeting, as well as prep and grading time. Specific time assignments for sessions with high school students and required Teaching

Fellow group meetings will be scheduled at the same time every week based on availability. This course counts for practicum credit in the EDST program.

Offering: **Crosslisting**

Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-EDST**

Identical With: **EDST405**

Prereq: **None**

QAC305 Exploratory Data Analysis and Pattern Discovery

The course introduces the theory and practice of exploring, describing, summarizing and detecting patterns of interest in complex datasets. Various approaches including aggregation, clustering, data visualization, and latent variable modeling will be employed. This course will give students an opportunity to develop computational skills (primarily in R) and to learn how to discover and interpret relationships in unstructured observational data. The applications and examples for this course will be broad and relevant to many fields of study.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **QAC211 OR ECON300 OR GOVT367**

QAC307 Experimental Design and Causal Inference

The course provides the foundations and statistical thinking to design, collect, and analyze experimental data and introduces appropriate techniques for observational data when causal inference is the objective of the analysis. Throughout the course, we introduce and compare various experimental designs. We will discuss sample size and power calculations as well as the advantages and disadvantages of each of these designs. With observational data, we will explore difference-in-difference models, propensity score matching techniques, regression discontinuity designs. This course gives students the opportunity to develop further their computational skills as we learn how to describe, interpret, control, and draw inferences from experimental and observational data.

Offering: **Host**

Prereq: **QAC201 OR PSYC200 OR MATH132 OR ECON300**

QAC311 Longitudinal Data Analysis

Work across different fields, from medicine and public health to social sciences and education, often involves the collection and analysis of longitudinal data--combination of cross-sectional and time series (repeated measures for the unit of observation) data. This rich data structure provides opportunities to explore questions that could not be addressed with simpler data sets, but at the same time requires special considerations because we are analyzing observations that are not independent. The course introduces students to appropriate graphical exploration of the data and the specification and estimation of fixed and random-effects models. It also develops the basic framework for difference-in-differences models and explores their applications.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON300 OR GOVT367 OR PSYC200**

QAC312 Hierarchical Linear Models

Research questions cannot always be explored by collecting data with independent observations. Sometimes this is due to limitations or constraints on the data collection method, and other times our questions pertain to data that are measured at both the individual and group levels (e.g., patients from

different hospitals or students from different schools that belong to different districts). Hierarchical linear models (HLM), also called multi-level or mixed models, explicitly model such nested data structures and address analytical and estimation issues not accounted within the framework of the classical linear model. Using data sets from different fields of study (e.g., education, medicine, and health) students will learn to formulate multilevel research questions, estimate and critically examine HLM applications.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Gen Ed Area: **NSM-QAC, SBS-QAC**

Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON300 OR GOVT367 OR PSYC200**

QAC313 Latent Variable Analysis

The course is an introduction to latent variable modeling. Students will learn the fundamental statistical methods for structural equation modeling (SEM), including principal component analysis, confirmatory factor analysis, path analysis, and SEM for both quantitative and binary observed variables. In addition, students will learn the basic components of SEM, such as assumptions, testing model fit and indices of fit, testing competing models, estimation methods, and issues in model identification. Students will learn to develop structural equation models using AMOS, R, and/or Mplus statistical software.

Offering: **Host**

Grading: **A-F**

Credits: **0.50**

Prereq: **[QAC201 or GOVT201 or PSYC280 or NS&B280] OR QAC380 OR ECON300 OR GOVT367 OR PSYC200**

QAC314 Survival Analysis

Survival or event history analysis focuses on modeling and analysis of time-to-event data--such as onset of a disease; duration of a strike; failure of a biological, physical, or social system; or recidivism). This course introduces students to survival and hazard functions, the analysis of censored data using parametric and non-parametric estimation methods; compares survival curves for different groups; and discusses competing risk models. The emphasis is on the applications of the different methods with the objective of broadening computational skills in R and/or SAS and to reinforce statistical writing and communication. These skills will be applied to a variety of problems in political science, public health, engineering, and medicine.

Offering: **Host**

Grading: **A-F**

QAC320 Applied Time Series Analysis

Understanding and modeling the past allows us to extract insights in our areas of study that are not possible to extract without time series data. This course is an introduction to the theory and practice of time series analysis. We will learn to identify and model the components of a time series process, and to properly model relationships among variables over time. By emphasizing the practical applications of time series analysis, the course will give students an opportunity to further develop computational skills and learn how to develop forecasting models, and to make inference using time series data.

Offering: **Host**

QAC323 Bayesian Data Analysis: A Primer

This course introduces the applied principles of Bayesian statistical analysis. The Bayesian paradigm is particularly appealing in research where prior research and historical data are available on parameters of interest. This course will teach students appropriate techniques for analyzing data of this nature as well as broaden computational skills in R. The course will lay the foundation for Bayesian data analysis that students can use to further develop skills in decision making.

Offering: **Host**

QAC378 DeltaLab: Computational Media Analysis

The content of this course focuses on Wesleyan Media Project media data, including advertising and local television news, and exposes students to a variety of computational ways of making that data more accessible through computational analyses and visualization. Projects are often but not exclusively group-based and draw upon the range of different disciplinary perspectives. Students will engage with the instructors and other lab members once a week for updates on their projects, will attend skill demonstration meetings and smaller group sessions to facilitate lab knowledge transfer, and will engage regularly in hands-on work with the data.

QAC381 QAC Praxis Service Learning Lab

As a service learning lab, this course provides students with an opportunity to further develop their abilities to analyze data and apply their knowledge and statistical computing skills as they work closely with nonprofit community partners on data analytic projects. Students in the course will identify research questions of interest to the community partner, gather and manage data, conduct statistical analyses, and interpret and summarize results. The service component involves providing statistical consulting to community partners by formulating and completing data analytic projects, the results of which may be used to improve services, identify areas requiring increased services and areas in which services can be made more efficient, as well as improving data collection, data reporting, and organizational functioning.

QAC385 Applications of Machine Learning in Data Analysis

The course provides a broad overview of machine learning algorithms and focuses on their application in data mining. Building on a basic background of regression analysis, and following a learning-by-doing approach, students are introduced to data mining tools and techniques that are used to identify patterns and relationships in large and complex data. While the emphasis is on intuition and application rather than theoretical results, through different case studies, students are introduced to the fundamentals of the different methods and learn how to conceptualize a problem, analyze it using appropriate tools, and communicate their results.

QAC386 Quantitative Textual Analysis: Introduction to Text Mining

We encounter computerized processing of text in almost every field of life. Google tries to infer the meaning of our search queries, online review engines try to extract information about what products are popular with the users, and across different fields scholars analyze text for insights into the processes and phenomena they study. This course will introduce you to the skills necessary to mine text for information and knowledge. You will learn how to use Python to retrieve text from a variety of sources, how to use regular expressions to identify which pieces of text are useful to your study, and how to use techniques from data mining to analyze the processed text to extract information and for classification and prediction.

RELIGION (RELI)

RELI115F Theorizing Religion with Zombies (FYS)

This course introduces students to theories in religious studies in order to investigate the intellectual and cultural histories of two highly influential and essentially religious ideas: the zombie and the apocalypse. We will critically trace their representations in popular culture in order to explore writings in biblical narrative, history, modernity, monster theory, alterity, gender, capitalism, race, epidemiology, film theory, and media studies. We will begin with ancient texts, move to the history of the concept of the zombi in Haiti, and then trace the trope of this modern monster and its various meanings into the contemporary moment.

RELI151 What is Religion? Inconvenient Behavior, the End Times, & UFOs

Is the American flag sacred? Does secularism protect religion from the government or the government from religion, or neither? Why did the FBI assault the Branch Davidians' compound near Waco, Texas thinking it was a cult, while those inside viewed the government as serving the anti-Christ? Why do many scholars of religion scoff at the idea of studying those who believe in UFOs but not those who believe in deities? This class will introduce you to the ways in which we study religions by reading critical case studies including those about Muslims debating the hijab, scholars who take seriously claims about the paranormal, and freedom of religion court cases. This is not a survey of world religions (and once you've taken What is Religion?, you'll know why we don't teach that at Wes). You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world that will help you ask informed questions about other religious traditions that you might encounter.

Offering: **Host**
Grading: **OPT**

Credits: **1.00**

Gen Ed Area: **SBS-RELI**

Prereq: **None**

RELI151F What is Religion? JewBus, Museums, and the First Amendment (FYS)

Why did the FBI assault the Branch Davidians' compound near Waco, Texas, thinking it was a cult, while those inside viewed the government as serving the anti-Christ? Can one be Buddhist and Jewish at the same time? Are museums religious spaces? Does secularism protect religion from the government or the government from religion? This class will introduce you to the ways in which we study religions by reading critical case studies, including those about Muslims debating the hijab, the treatment of sacred objects in museums, and freedom of religion court cases. This is not a survey of world religions, and once you've taken What is Religion?, you'll know why we don't teach that at Wes. You will also have a critical set of intellectual tools for understanding the role of religion in the contemporary world.

RELI167 Introduction to History: Yoga: A Global History

Yoga as a philosophical, religious, and ascetic discipline has shaped the lives of major world-historical figures, including the Buddha, the Mughal emperor Akbar, Mahatma Gandhi, and Steve Jobs. Though yoga is usually understood today as a timeless set of disciplines that inculcate spiritual and physical well-being, it has experienced dramatic change over the millennia--not least with the rise of "postural" yoga in India from about 1000 CE, its systematization as "hatha yoga" by about the sixteenth century, and its growing popularity in the West since the early twentieth century. The aim of this course is to introduce students to the rich global history of yoga, to foster an understanding of and appreciation for the philosophical and psycho-somatic dimensions of yoga, as well as the political and cultural transformations that shaped and were shaped by yoga (and prominent yogis and yoginis) as it spread from India to both the East and West.

RELI173F Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies (FYS)

Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, and environmental legal frameworks with language that invokes the Mother Earth. This seminar will explore the social, legal, and metaphysical aspects of eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, pantheist, monist and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Erndl 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S folks? Engaging emerging podcasts, shamanic documentaries, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke Mother Earth, the Pachamama, or the Goddess to self-regulate the ecologically destructive practices of our late-stage capitalism?

RELI174 Jesus Chicken: Business and Religion in America (FYS)

Summary: Although many Americans are aware of the religious identity of the fast-food chain Chick-fil-A (earning it the moniker of "Jesus Chicken" in some communities), there is nothing new about businesses that project a religious ethos. This First Year Seminar explores the blurry boundary between business and religion in America, examining the ways in which businesses use religion and the ways in which religious entities often function as businesses. Although this course primarily focuses on the Christian tradition, it will also examine the ways in which other religious communities (such as Jewish and Buddhist) approach the marketplace. Chronologically, the course spans the 17th to 21st centuries, paying special attention to the emergence of the market economy in the U. S. from 1800-1850 and the growth of consumer culture in the second half of the 20th century. This course will provide students with an introduction to historical methods and the critical study of religion, while focusing on developing collegiate-level reading, writing, and critical thinking skills that will form a foundation for any major at Wesleyan.

RELI176F Morality and Health: Religion, Bodies, and Biomedicine (FYS)

We often think of religion and medicine as diametrically opposed. Faith, prayer, and alternative health methods can seem incompatible with science and biomedical care. Yet, throughout most of human history, religion and health have been intimately intertwined. And they still are. The ways that we treat our bodies--individual and collective--are often influenced by religious ideas, moral systems, and embodied spiritual practices. This course explores differing religious approaches to life, personhood, and death. We will ask how race, gender, and sexuality intermix with religiously derived ideas about morality and health. Readings will cover birthing, dying, healing pilgrimages, self-help, organ transplantation, Artificial Reproductive Technologies, vaccination, and more.

RELI177F The Black Atlantic, A Religious Interpretation (FYS)

The world as we know it is shaped by The Black Atlantic. This phrase centers the forced movement of enslaved Africans from Africa to the Americas and Europe as the center of a set of complex forces: European global expansion, land expropriation, indigenous extermination and, of course African enslavement. But Africans were not solely objects of dehumanizing subjugation and property. Africans co-created this world through material practices, traditions of knowledge, and meaning making summed up in the word religion. This course will both introduce students to the themes of Black religions formed in and through the Black Atlantic, and specific communities, for example, Rastafarianism, Islam, Buddhism, and Pentecostalism. Students will read scholarly articles and engage multi-sensory sources and first-person accounts of both themes and communities. All resources will be provided in class or via Moodle.

RELI185F Reasonable Disagreements: Science, Philosophy, Magic, & Society (FYS)

Much of contemporary social and political discourse revolves around science, with many assuming that science is rational, objective, true, and the ultimate source of knowledge. As a result, it would seem unreasonable to believe in things like astrology, magic, alchemy, and other non-scientific ideals, or even to suggest that science might not be as objective, rational, or true as we might think. In this class we will explore different historical and philosophical approaches to distinguishing "legitimate" forms of inquiry and knowledge, considering the ways that our contemporary perspectives on science have been shaped by a long history of philosophy, "natural" philosophy, magic, theology, and "pseudosciences." We will investigate issues and concepts within and about science, including topics such as the nature of theories, the nature of scientific progress, and the relations among science, values, and society.

RELI201 Introduction to the Hebrew Bible (Old Testament)

The Hebrew Bible is one of the most influential texts in the world. From antiquity to the present, it has served as a source of philosophical, literary, and artistic reflection. It is a fascinating document, combining narrative, poetry, law, prophetic proclamations, and puzzling parables. What kind of book is the Hebrew Bible? Who wrote it and why? How do we approach such a text across the distance of time? Through a systematic reading from the very beginning, we will place the Bible in its historical context while giving special attention to the philosophical and literary questions it raises: Is obedience to authority always justified? Why do good people suffer unjustly? What is God's gender? In answering these and other questions, you will gain an understanding of the ways contesting interpretations make authoritative claims.

RELI204 Invoking the Earth Mother: Ecofeminisms and Indigenous Spiritual Ecologies

Over the past 50 years, a radical reshaping of our relationship to the organic world has infused national economic strategies, United Nations discourses, indigenous land rights movements, environmental legal frameworks, and a subtle mainstreaming of neopagan ritual practices and goddess worship in the Americas. This seminar will explore the social, legal and metaphysical aspects of myriad eco-feminist and indigenous spiritual ecologies. We will explore these worldviews and ritual practices from animist, pantheist, monist, and panentheist perspectives, with a particular focus on gender constructs, implicit and explicit, within these movements. What is the relationship between the 1970s environmental movement and the rise of Goddess worship in the U.S.? Between the United Nations and Amazonian ayahuasca practitioners? Legally, Should Trees Have Standing (Stone 1972)? Politically, Is the Goddess a Feminist (Hiltebeitel & Erndl 2000)? Is Mother Earth, ultimately, empowering for LGBTQ2S folks? Engaging emerging podcasts, shamanic documentaries, social manifestos, and provocative religious studies texts, students will wrestle with a profound set of humanistic questions that may prove crucial to our survival as a species, namely: under what circumstances do we successfully invoke the gods to self-regulate the ecologically destructive practices of our late-stage capitalism? Who invokes who, how and when, shared where? To whom do we tend to listen on these matters, and why are they quaked to speak?

RELI205 Dharma, Karma, and Living with the God/dess/es: Hindu Lives

Through fiction, autobiography, biography, art, a comic book, a city, and a village, this course explores some of the myriad understandings of what it is to be Hindu. In an effort to introduce students to Hindu culture and religion, a number of approaches shall engage the questions, What is Hindu dharma? and What is it to be Hindu? The class will also investigate the issue of "Hinduism," a term created in the 19th century to identify a Hindu "religion" rejected by many 21st-

century Hindus. This issue expresses just one of many arising from the Indian experience of contact with the West. Overall, the course immerses students in the lives of Hindu individuals and communities so that we, as a class, can draw our conclusions about Hindu practices and meanings in different political, mythic, social, and cultural contexts.

RELI206 Neo-Confucian Philosophy

This course presents critical discussion of issues central to Neo-Confucian (11th--19th centuries CE) philosophers that in many cases are still central in East Asian thought today. Topics will include the relation between knowledge and action, Neo-Confucian conceptions of idealism and materialism, and the connection between Neo-Confucian philosophy and spirituality. While our primary focus is on China, we will also look at distinctive Neo-Confucianism issues in Korea and Japan.

RELI207F Who is the Dalai Lama? (FYS)

This First Year Seminar introduces the institution of the Dalai Lama of Tibet and the individuals who have filled that role from a wide range of sources and perspectives. Topics include regional histories of Buddhism; the unique Tibetan tradition of recognized reincarnations (tulku) and the Buddhist philosophical principles that support it; and a survey of prominent Dalai Lamas from the 15th century to the present day. The seminar examines the activities of the current Dalai Lama in his role as traditional Buddhist teacher, political leader, and international superstar, through the lenses of the PRC government media, Indian exile communities, and the modern West. Later classes will also address issues of Western and Chinese forms of Orientalism and myth-making about Tibet. Readings include the writings of past and current Dalai Lamas as well as supporting secondary literature.

RELI208 Sex and Sexuality in Islam

Islamic societies have long traditions of commentary about the body and sexuality. Medieval Islamic texts are replete with references to homosexual and

erotic love that challenge the assumption, common today, that Islamic society is restrictive by its very nature. In this course, we will explore how the body and connected understandings of sex and sexuality have been conceptualized by Muslims, both historically and in the contemporary world. Instead of essentializing the Islamic "viewpoint" on the body, we will survey the variety of opinions and ideas about the body that Muslims have held. We will draw on the Quran, early Abbasid erotic poetry and literature, Islamic medical manuals, philosophical works, belles-lettres, and contemporary sources, in order to trace how different understandings of the body and sexuality have unfolded over time. In particular, we will focus on the notion of complementarity between the sexes, the role of marriage and procreation, the effects of medical theories on understandings of bodily health and illness, the ethical and legal frameworks governing sexual conduct, and the references to homoeroticism, pederasty, and female same-sex desire found in Arabic and Persian love poetry and literature. While the course primarily focuses on the premodern period, it will also delve into contemporary Islamic discourses.

RELI209F Religion, Science, and Empire: Crucible of a Globalized World (FYS)

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism: it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

RELI212 Introduction to the New Testament

The purpose of this course is to provide an introduction to writings of the earliest Christians that came to be included in the New Testament. These writings will be examined critically with respect to their social-historical origin, religious content, and place within the development of early Christianities. Interpreting early Christian texts constitutes the most important task in the study of the New Testament. We will, therefore, focus on a close reading of the New Testament in light of historical situations and social contexts in the Greco-Roman world, one of the chief aims of the course being the acquisition of critical skills in reading and understanding the New Testament. In the process, we will necessarily engage secondary scholarship and wider theoretical interests, thereby providing students with a general introduction to the academic study of religion.

RELI213 Refugees & Exiles: Religion in the Diaspora

Recent years have seen the on-going tragic refugee crisis, with millions of people being displaced because of war and ecological disasters. This course deals with the meaning of refuge, exile, and diaspora through three perspectives: philosophical, historical, and literary. What does it mean to be forced to leave one's home? How is it possible to make sense of such a tragedy? What creative power can diaspora muster to the rescue of culture? In our search for answers, we will examine a variety of case studies including the contemporary refugee crises in the Middle East, the border between the United States and Mexico, the black transatlantic, and the destruction of the temple in the Hebrew Bible. This course is a project-based Service Learning in which all assignments are geared toward the final project, in which each student will produce a radio show based on an analysis of a refugee crisis of their choice. These shows will air on WESU 88.1 FM Middletown. To learn more and listen to previous seasons of last year's radio shows visit <https://reli213.site.wesleyan.edu>

RELI215 Religion and Politics in Early Christianity

The first four centuries of the Christian era will illustrate the lively twists and turns of social experimentation that set the stage for the emergence of the Christian religion. This course will be concerned with fundamental arenas of intellectual and social conflict, including constructions of Christian myths of apostolic origins and authority; the appropriation of the Jewish epic; the challenge of gnosticism; the domestication of Greek philosophy; interpretations of sexuality and gender; experiences of martyrdom and prosecution; theological reflections on human nature and society; and the ways Christians were seen by Romans. The objective will be to grasp the beginnings of the Christian religion as a human achievement of cultural consequence.

RELI216 Jesus Through Jewish Eyes

In this course, we explore the visual and textual representations of the vexed relation between Jews and Christians throughout history. Looking at the various ways in which Christianity and Judaism define themselves vis-à-vis the other allows us to understand what mechanisms of cultural appropriation, subversion, and hidden polemics are at work. Special attention will be given to the figure of Jesus as a point of artistic and theological contention. How do artistic representations change our understanding of religious themes? What is at stake for each religion in the encounter with the other? What are the political implications of theological debates? Is this dialogue needed, or even possible, in our post-secular age?

RELI217 The Environment, The Bible, and Moral Debate

The environment is a pressing concern for many people and is the center of much modern debate. Within this debate, many people draw on biblical texts for a source of religious or moral superiority. These biblical texts have been used to support many different, and often contradictory, arguments within the environmental debate. So what does the bible actually say about the environment? Is there a singular "biblical" view about what the environment is and how one should treat it? This course aims to look at how the bible has been used in environmental debate and then look at the texts cited, analyzing both in a modern and ancient context.

RELI218 The Cosmos of Dante's "Comedy"

In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle

Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RELI219 Online and #IRL: Digital Media, Power, and Religion

From meditation apps and Zoom church to TikTok witches and spiritual influencers, religion and spirituality pervade the Internet. Yet digital media reflects social, economic, and political negotiations of power that often elude our scrolling eyes. This course critically examines digital media and religion by asking how the "power" of digital infrastructures affects religion. Together we will map different platforms and mediators (social media, material technologies, and corporate gatekeepers) that shape "power" and "religion" online. We will survey how religious practitioners navigate digital media through case studies of ex-Evangelical Twitter users, Hindu mega-temple live streams, ritual smartphone apps, and more. We will discuss "spiritual machines" and ask, "Has digital technology become a new god?" This course takes an interdisciplinary approach and engages research from technology studies, media studies, and religious studies. Students will also examine methods, ethics, and theories of studying digital religion and develop their own digital religion case studies.

RELI222 Identity and Jewish Literature: Sexuality, Race, and Gender

What, if anything, is Jewish literature? What, if anything, does it tell us about the history of the people called Jews? This course explores those questions through a variety of sources from Jewish writers, including Sholem Aleichem, Cynthia Ozick, Franz Kafka, I.B. Singer, and others (flexible based on student interest). Through these readings, we will explore how Jewish literature relates to broader questions of sexuality, race, gender, colonialism, etc., as well as specific questions of Jewish history, like the Holocaust and the state of Israel. All works will be read in translation and no previous knowledge of Jewish studies or Judaism is required.

RELI223 Jewish Identity in the Ancient World

Jewish Identity is not monolithic but instead, wonderfully, varied, and diverse. The Hebrew Bible gives a multitude of accounts of how many different identities within the course of history came to be and through analyzing these accounts, this course will aim to answer the questions of: What did Jewish Identity look like in the time period of ancient Israel? What variety of identities can be seen in the Hebrew Bible itself? What key historical events aided in the development of different identities in the ancient world? What was the process of identity formation in the ancient world? Is that process of identity formation different than how one might construct identity today? Is it right to even speak of Jewish Identity in 600-700 years in which the Hebrew Bible was written?

RELI224 Zen Buddhism Across East Asia: Teaching and Practice

In this course, we will examine Zen/Chan Buddhism in history and in its contemporary practice. We will trace how Zen Buddhism sprouted from Chinese religious traditions in the Tang Dynasty (618-907), flourished in the Song Dynasty (906-1279), and then spread to other East Asian countries such as Japan and Korea. Then, we will pay attention to the ways in which Zen Buddhism found its way to modern Western society, through figures such as D. T. Suzuki and Okakura Kakuzo since the 19th century.

Course readings consist of primary sources of Zen Buddhism, which are available in English translation. A wide range of texts will be read closely, from early manuscripts discovered in Dunhuang to contemporary works inspired by Zen Buddhism, supplemented by secondary scholarship. We also investigate how Zen Buddhism has been expressed in garden designing, poetry, tea ceremony, and as a way of life in contemporary Western society. A field trip to a Zen meditation center will be organized during the course.

RELI225 Socialist Utopias: Transcendence and Religion in Communist States

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx and some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangoes became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

RELI229 Tibetan Religion

This course serves as an introduction to major themes of Buddhist thought and practice within the cultural and historical framework of Tibet and the wider Himalayan world. In doing so, it examines various approaches to the study of religion and questions traditional definitions of categories such as "religion" and "Buddhism" themselves. Beginning with a close study of Patrul Rinpoche's classic 19th-century guide to Tibetan Buddhism, the early part of the course focuses on the doctrinal foundations of the tradition. This is followed by a historical and more critical examination of Tibetan religious history, proceeding from Buddhism's Indian antecedents and its initial arrival in Tibet during the seventh century through the present day. The course will explore a wide range of Tibetan

religious cultures and practices including Buddhist ethics, systems of monastic and ascetic life, ritual activities, sacred geography and pilgrimage, lay religion, as well as the status of Tibetan Buddhism under Chinese occupation and in the West. It will also examine the lesser-known communities of Tibetan Muslims and Christians inside Tibet and in exile. The majority of readings will consist of primary texts in translation, and will concentrate on Tibet's rich narrative literary tradition. These will be supplemented by secondary literature on the study of religion and Tibetan Buddhism.

RELI230 Cinematic Encounters: Muslims and/in/of the West

Please note: students will be required to view all films prior to the first day of class, and to submit pre-session assignments. Examining contemporary films by and about Britons, Indians, Pakistanis, Afghans, and Black and white Americans offers the opportunity to challenge the simplistic binaries of West versus Islam upon which popular representations often rely. We will pay attention to the aesthetic choices made by directors and screenwriters as they depict themes of Muslim emigration, European imperialism and colonialism, religion and secularism, terrorism and state violence, representations of gender, and issues of multiple belonging. Particular analytic emphasis will be given to the concept of nationalism. Films that may be included are "The Outpost," "The Kingdom of God," "The Battle of Algiers," "Lagaan," "Zero Dark Thirty," "The Beauty Shop of Kabul," "Restrepo," "Khuda ke Liye," "My Name Is Khan," "Malcolm X," and "AmericanEast."

RELI241 Cults, Crusades, Jihad, and Multiculturalism: On (Non)Religious (In)Tolerance

"More people have died in the name of religion than any other cause on Earth."

Is this true? If not, why do so many people believe it? Even if it is not true, a great many people have died for causes propelled by religious ideologies and sentiments. Then again, a great many people have been killed because of their religious identities and associations. How do religious traditions generate emotions of empathy, suspicion, antagonism, and/or indifference? And how do secular traditions promote similar emotions toward specific religions and toward religion in general? This course will investigate what these dynamics tell us about various religions in different cultures--specifically those of South Asia and the United States--and how some social ideologies allow only for specific religions or all religions. We will explore these in the context of the so-called "cult" of the Branch Davidians in Waco, Texas; the pogrom against Muslims by Hindu nationalists in India; various jihads in Afghanistan, Pakistan, and India; and the role of imagined Muslims in the language of tolerance among the American republic's founders.

RELI242 Introduction to Buddhist Thought and Practice

This course will introduce significant aspects of Buddhist thought and practice, primarily as it manifested through the literature of India, South Asia, and East Asia. It begins with an overview of the historical Buddha's life and the development of early Buddhist ideas and practices. The course then introduces the Mahayana or Great Vehicle tradition that began to emerge around the first century BCE, as well as later forms of esoteric Buddhism known as Tantra. The course concludes with the development of modern Buddhism in Asia and its manifestation in the West. Readings consist mainly of primary Buddhist texts in translation, which are supplemented as necessary by works of secondary scholarship. The course broadly examines the topics of Buddhist philosophy and ethics, monastic and ascetic life, meditation and ritual practices, and the material culture of Buddhist societies, including artistic traditions, architecture, and book culture.

RELI250 Islamic Movements and Modernities

No background is required for this seminar. The so-called Islamic State once grabbed headlines daily with criminal acts primarily committed against other Muslims, but also against non-Muslims. Its violence overshadowed even al-Qaeda and the Taliban in media coverage. This seminar will track the development of these groups as well as the many more Islamic movements that reject violence and seek peaceful social change. Indeed, many Muslims object to the name "Islamic State" because they recognize the group as neither Islamic nor a legitimate state. The seminar examines how specific Muslim communities in the Middle East, Europe, South Asia, and the United States have engaged the modern conditions of Western imperialism, nationalism, and globalization and shaped their own forms of modernity. The seminar also investigates the increasingly digital, transnational, and intercultural realms of Muslim experiences.

RELI252 The Five Rachels: Jewish Women in Contemporary American Culture

The course will focus on five iconic contemporary female TV characters, actors, and creators; American, Jewish, and incidentally--or not--sharing the same name: Rachel. Rachel Green ("Friends"), Rachel Berry ("Glee"), Rachel Menken ("Mad Men"), and Rebecca Bunch ("Crazy Ex-Girlfriend"), played by Rachel Bloom, and

Midge Maisel ("The Marvelous Mrs. Maisel"), played by Rachel Brosnahan. These five complement each other and offer us a panoramic view of the American Jewish female experience: discrimination, inclusion, the generational gap, and their relationship with Israel. In addition, they allow us to explore the three most common stereotypes associated with the Jewish woman: the Jewish nose, the Jewish mother, and the Jewish American princess. We will discuss the conflicts and the societal shifts these characters embody, and how they define themselves, their Jewishness, their femininity, their unique surroundings, and place in history.

RELI255 Heretics and Heresy

What is religion all about? Is it fundamentally about belief, truth, or God? About understanding, revelation, or salvation? Is religion about one's origins, identity, or destiny? Is it about what one does or is supposed to do? How would we ever know? And who gets to say so? This class will explore the emergence of "heresy"--notions of error--in the construction of religious belief and practice in ancient Christianity, and how "heretics" became central to the way Christianity defined itself in relation to Jewish and Greco-Roman religious traditions. We will examine these issues, in part, by reading a number of remarkable, and recently discovered "heretical" texts from antiquity and early Christianity, including the Gospel of Thomas, the Gospel of Mary, the Gospel of Judas, the Gospel of Truth, and the Cologne Mani Codex.

RELI263 God & Guns: The History of Faith and Firearms in America

This course examines the history of firearms and religion in the United States, ultimately seeking to understand the significance of gun culture within American Christianity and the powerful "God & Guns" story at the core of many Americans' identity. Beginning with an overview of colonial and revolutionary-era views of firearms and violence, the course examines the influence of slavery, gender, and the wars of the 20th century, paying special attention to the emergence of a masculine, warrior Jesus within evangelical and fundamentalist communities during the Cold War. Students will be challenged to consider the ways in which this story helps explain one facet of popular support for Donald Trump and to reflect on how firearms are central to the identity of many conservative American Christians.

RELI270 Magical Money and Enchanted Capitalisms

In the early days of the 20th century, Max Weber foresaw that with the rise of capitalism and modernity, the world would become increasingly disenchanted. Now, with the turn of the 21st century, people all over the world experience capitalism as a realm of enchantment. In Malaysia, ghosts possess factory workers; in South Africa, capitalism produces zombies; and in Bolivia, mines eat their miners. Instead of Weber's "iron cage," we live in a world of "voodoo economics" where Korean shamans conduct ceremonies to bless new businesses, Russian psychics curse business competitors, and prosperity theology preaches that God will make you rich. This class explores the enchantment of the financial sphere, combining theory on the disenchantment of modernity (Max Weber) and commodity fetishism (Karl Marx, Sigmund Freud, William Pietz) with ethnographic accounts of how capitalism and the economy become mystified and enchanted.

RELI271 Secularism: Godlessness from Luther to Lenin

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism

in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a *realpolitik* approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

RELI272 Ethics After the Holocaust

The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human after Auschwitz. In this course, we will investigate how the Holocaust orients contemporary discussions on questions of guilt, forgiveness, and evil. What does it mean to remember, to forgive, and to forget? Can one ethically represent the Holocaust in art? We will explore these questions using various sources, including works by Hannah Arendt, Adorno, and Emmanuel Levinas, as well as museums, memorial sites, and cinematic representations.

RELI272F Ethics After the Holocaust (FYS)

The philosopher Theodor Adorno declared, "To write poetry after Auschwitz is barbaric." The Holocaust is a challenge to our understanding of modern society, ethics, and what it means to be human. We will engage films, graphic novels, art, and philosophical works as we try and grapple with the contemporary presence and relevance of the Holocaust. Are comparisons of other genocides to the Holocaust helpful or offensive? Was the Holocaust a lapse into barbarism or a dark side to the logic of modernity? We will see how thinkers such as Hannah Arendt, Emmanuel Levinas, and Martin Buber grappled with these and related questions such as the problem of evil, the meaning of suffering, and the presence of God in the death camps.

RELI275 Moral Complexity in Islam: Origins to the Present

Ethics seem straightforward, until you need to explain your choices. How do you judge actions of truth and deception, love and hate, wealth and poverty, pain and punishment, freedom and slavery? Over the long history of Islamic cultures, how did people describe a good, full life? Is there a unique Islamic ethos of action? Do Islamic thinkers tie values and decisions to divine revelation, or to reason? How do we determine the nature of good and evil? Can God do evil, and what would that even mean? In confronting these questions along with Islamic philosophers and thinkers we will find a surprising range and diversity, and some of history's most compelling answers. Diverse and creative, these answers from the Islamic past compel us to rethink some of our basic presuppositions. Blending theory with case studies from the Islamic past and present, we will approach some of the hard ethical questions that Muslims across the world have had to deal with historically and continue to address today.

RELI275F Religions Resisting Modernity (FYS)

Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of what it means to be modern.

RELI277 Magick and Her Practices, of Late

In this course we ask why paganism and Goddess worship have become "the fastest growing American religion," examining the tensions between science and society that so often provoke magic-infused social resistance movements. We explore the rise of Goddess worship in the Americas since the 1970s, considering its ties to ecofeminist, womanist, indigenous, and environmentalist movements. We examine the force of agency and its relation to ritual magic.

We then dive into the purported roots of several modern magic traditions, including Wicca, Dianic witchcraft, Feri traditions, and Haitian Vodou, among others, and ask how these cosmovisions define and/or transcend our gendered personhoods.

As we find our way back to a renewed understanding of modern paganisms, students will design individual or small group projects wherein they experience, ethnographically consider and/or perform extant manifestations of magic and ritual, bringing peoples lived experiences into conversation with course readings. This class is taught as a twice-weekly seminar designed around written assignments and engaged discussions, while inviting but not requiring students to engage in phenomenological experiences outside of class that may inform their written work. Students will produce ethnographic essays that are both analytical and personally reflective.

RELI281 Political Fantasies of Zion

Palestine, Zion, Judah, the Promised Land. A small piece of land in the Middle East has a very long and contested history full of religious meaning for Judaism, Christianity, and Islam. Some imagine the State of Israel as an island—"the only democracy in the Middle East" or the only Western state in the region—surrounded by a hostile environment. The geographical area, by contrast, has often been portrayed as a crossroad, a place where cultures clashed, merged, and exchanged ideas.

In this class, we will examine this tension between a physical and imagined space, between political reality and idea, by recovering alternative Zionist, non-Zionist, and anti-Zionist visions of the Zion. Jewish statehood is a very recent phenomenon. Throughout the modern period, the vast majority of Jews lived under empires, whether Habsburg, French, Romanov, British, or Ottoman. How did the imperial experience shape Jewish religious and political views? What role does the imagination of Zion play in today's political context? Reading political pamphlets, poetry, maps, artworks, and utopian fiction, we will pay attention to the construction of the Zionist idea not just in political Zionism but also in contrasting visions including Canaanism, cultural Zionism, diaspora nationalism, a Jewish-Arab federation, a binational state, and the rejection of statehood as heresy. In the last part of the class, we will look at recent contemporary issues from the news, e.g., the agreements between the State of Israel and the United

Arab Emirates, or government corruption in Israel, in order to see how these ideas of Zion are still present in today's discourse.

RELI282 Religion and the Scientific Imagination

Where do we get the idea that science and religion are opposed to one another? What did Darwin do to classic proofs of the existence of God and how have those proofs bounced back? What sort of evidence do theologians marshal in support of their hypotheses, and what sort of spiritualities do scientists generate in support of theirs? What do neuroscientists think they're finding when they measure the neural activity of meditating monks? What are the "new atheists" so annoyed about? How do cosmologists talk about the origins of the world, and how do climate scientists talk about its end? In this class we will explore the many ways "religion" and "science" have interacted, conflicted, collided, and combined with one another--in an effort to move beyond the frankly boring "debates" between them.

RELI289 Indigenous Religions: Politics, Land, Healing

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

RELI291 From Jerusalem to Ground Zero: Muslim, Jewish, Christian, Sioux, and Hindu Notions of Sacredness

Many Jews, Christians, and Muslims view Jerusalem as a "sacred" place. But what does this mean? How does a place--or an object or person--become sacred, holy, revered? Is Ground Zero sacred? If so, how do we compare the destruction of an office building that makes part of Manhattan sacred and Native American efforts to protect venerated sites from "development" that they describe as "desecration"? Does the term "sacred" even translate in other languages? When does a stone sculpture become an embodiment of a Hindu deity?

Using examples such as Jewish, Christian, and Muslim views of Jerusalem, Lakota Sioux recognition of revered places and wicasa wakan (medicine men), and Hindu engagements with divine images, this seminar will explore these questions.

RELI292 Reason and Revelation: An Introduction to the Philosophy of Religion

With the dawning of modernity, Europe's colonial and scientific adventures opened a distinction of mutual suspicion between theology and philosophy. Broadly speaking, "philosophy of religion" is the effort to evaluate the claims of revelation and reason in terms of one another. We will examine some of the major texts within this field, whose authors include deep skeptics, committed Christians, committed anti-Christians, secular and nonsecular Jews, feminists, ethicists, idealists, empiricists, Romantics, and liberationists. Themes include proofs of God's existence--along with refutations of those proofs and rebuttals to those refutations--the problem of evil, religious ethics, religious experience, the possibility of a universal religion, "divine" racism, the gender of God, the ecocidal tendencies of Abrahamic theology, and the role theology might or might not play in efforts toward ecological, sexual, and racial justice.

RELI295 Religion in Dungeons and Dragons

As a fantasy roleplaying game, Dungeons & Dragons has been prevalent for over 40 years. In this game, players partake in fantastical journeys, slaying beasts, completing quests, and interacting with divine beings. Though not often discussed, religion has played an important role in Dungeons & Dragons since its creation: clerics pray to their gods and invoke physical changes in the world, strange cults organize and perform perverse rites, summoning ancient beings for evil. There have been many different editions of Dungeons & Dragons, and each treats these religious elements in a different way. This course answers the questions, "What role does religion play within Dungeons & Dragons and how does the presentation of religion within Dungeons & Dragons map onto scholarly trends within Religious Studies?"

RELI299 Imagining Communities: National Religions and Political Rituals

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate

this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

RELI300 Semiotics of al-Barzakh: The Grammars of the End of Days and Horizons of Possibility

This course builds from the Islamic eschatological concept of "al-Barzakh" as it has been taken up in anthropological theories, as well as in Islamic thought more generally, with careful attention to the term's semiotic transformations and significations. It does so in order to explore both how the term describes an earthly place and an eschatological hereafter as well as a theoretical and practical alternative to the notion of the liminal personhood.

Since at least the 12th century, thinkers have explored the Islamic concept of al-Barzakh to explore the connection between the earthly present and the heavenly hereafter and the scales of judgment in between. This term, somewhat akin to Christian notion of purgatory or limbo, appears only three times in the Qur'an. It is explained as being like the productive firmament that separates salt and sweet water. In places like Morocco, this is commonly interpreted as referring to the Strait of Gibraltar and the underwater isthmus that separates and produces the waters of the Atlantic Ocean and the Strait of Gibraltar.

We will read both contemporary scholarly apprehensions of this term and its various applications in Muslim-majority contexts such as Morocco, Egypt, Sudan, and Iran--often ethnographic--as well as Islamic philosophy that attempts to bring the concept into relation with earthly personhood. In our approach, we will move through a variety of scholarly genres and epochs in order to trace the genealogies of present-day popular invocations of the term as we contrast it with other apprehensions of the eschatological and the liminal.

We will work to understand how this term contains space for both an imagination of everyday life as well as the boundary-generating difference marking here and there, then and now, by looking at how the term is evoked by artists, scholars, religious adherents, psychoanalysts, and border crossers. As we go along, we will pay special attention to the languages of belonging and difference evoked by this term and attend to how an anthropological approach to semiotics might elucidate new grammars of community and horizons of possibility that exist alongside notions of the liminal, uncanny, dreaming, the hereafter, and the imagination of the end of days.

RELI301 Jesus and the Gods: Christianity and the Religions of Antiquity

How did Jesus of Nazareth come to be understood as a god, who dies and rises, in a world brimming with gods? Why was he remembered as a philosopher and a martyr, like Socrates? How did early Christians understand their rituals of death and resurrection in terms of salvation and sacrifice? How--and with what motives--did writers throughout history compare Jesus with the priests and kings of ancient Israel or with the gods and goddesses of the "Mystery Religions"? This course will focus on the methods and politics of comparing Christianity and the religions of antiquity. Considering themes and theories of religion and sacrifice, wisdom and prophecy, ethics and philosophy, and mythmaking and cultural critique, we will ask how the politics of classification and comparison have shaped not only our understanding of Jesus and Judaism, and of ancient Greece and Rome, but also the construction of Judaism and Christianity as religions, and the very category of religion itself.

RELI302 Kierkegaard: An Advanced Seminar in Absurdity

Throughout Kierkegaard's "pseudonymous authorship"--a set of books written by different characters he dreamed up to remove the burden of authorship from himself--we encounter the possibility that, from the perspective of ethics, philosophy, and even religion, the truth will seem ridiculous. Truth, for these pseudonymous authors, takes the form of paradox, that reason and common sense can only call "absurd." Of course, it is no surprise that a paradox seems absurd; if it is not absurd, it is not a paradox. For the pseudonyms, it is therefore either the case that truth is paradoxical, exceeding the realms of ordinary thinking and existing, or that it is not. If it is not, then the absurd is simply absurd and both philosophy and religion are right to reject it. But if truth "is" paradoxical, then we are faced with the problem of thinking the unthinkable, communicating the incommunicable, and getting serious about absurdity. In this seminar, we will wrangle some of these pseudonyms' best-known, most exciting, and crankiest books, along with a few of Kierkegaard's signed, vitriolic attacks on the established church.

RELI303 Extinction/Rebellion: Christianity and the Climate Crisis

Although this course is not devoted specifically to the subject of "XR"--the decentralized environmental activist organization and global campaign of civil disobedience--it borrows the movement's self-designation as a point of departure for an exploration of the historical, conceptual, and geopolitical significance of Christianity to the "Anthropocene." How is Christianity entangled among the "historical roots of our ecologic crisis"? What is "eco-theology"? How do ancient narratives of creation and traditional Christian teachings regarding the origin of humankind continue to shape modern, scientific, and popular assumptions about the natural world and our place in it? What does the book of Genesis have to say about commercial agriculture, ethical veganism, and the relation of divinity with the more-than-human, animal-vegetal-mineral web of life? Whence this "planet of slums" and whither Paradise or the Promised Land? Which elements of the Christian imagination enabled colonization of the New World, indigenous displacement and genocide, the transatlantic slave trade, and capitalist globalization? Is another world still possible, and could Christian

thought and practice play a pivotal part in actualizing an alternative planetarity today? We will pursue these questions together by way of readings in theology, philosophy, critical science studies, ecology, geography, political economy, Black feminism, queer theory, and Indigenous studies. Ultimately, the course analyzes aspects of Christianity's intimate involvement in the history of climate change and considers how critical attention to this history may contribute to collective acts of rebellion against mass extinction.

RELI305 Pantheologies: Animal, Vegetable, Mineral, World

Pantheism teaches that the world itself is divine. The idea seems simple enough, yet it has suffered extraordinary ridicule at the hands of western philosophers and theologians, who have considered "matter" to be lifeless, dark, and feminine (which is to say, as different as possible from "God.") This course will explore this generalized panic over pantheism--in particular, the anxieties it encodes over gender, race, nationality, and class, and the contribution such anxieties have made to an unequally distributed attack on the "environment."

Seeking an alternative to our raced and gendered ecocidal metaphysic, the course then turns to contemporary pantheologies. To what extent are recent theories of cosmology, complexity, and materiality setting forth subtle pantheisms? What are the feminist, anti-racist, and ecological stakes of these theories? Properly conceived, what is pantheism; is it ultimately distinguishable from atheism; and what use are any of these platforms in developing an ethic and politic of environmental justice?

RELI306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions

Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other "other-than-human persons." Using case studies drawn from North America, Siberia, and Mongolia, and the instructor's fieldwork materials with place beings in Buryatia, we will explore the different relationships human beings have with animate and sacred landscapes and think about the ramifications these relationships have for thinking about sovereignty over and in the "natural" world. The course may involve a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during fall break (details tbd). The trip will be fully funded with no cost to the students (hence why it is still tbd). Although the trip is not yet confirmed, please be aware that the trip will be required, and in order to take the class you must be available to participate in this travel during fall break (10/19-10/22).

RELI307 Ritual

Religion can be defined through beliefs or traditions or texts, but it always takes physical form through ritual. Ritual is the one universal in religion, but the question of how to understand ritual is possibly the most contested question in the study of religion, and not all rituals are religious. Can a ritual be read like a text? How do symbols produce effects, and how should we understand these effects? What is performative speech and how does it work? How does ritual behavior reflect and shape social relationships? This course introduces students to the major approaches to the study of ritual. The readings draw heavily, but not exclusively, on anthropological approaches to ritual, both classic texts and recent innovative approaches focusing on language and embodiment. Students will pick a ritual that they are interested in and will attend that ritual several times over the semester, conducting practical fieldwork exercises and applying the theories we read in class. The assignments culminate in a paper in which students will be required to analyze "their" ritual using the theory we read together in class. For these assignments, students are encouraged to define ritual broadly and creatively. The goal of the class is to gain an understanding of theoretical approaches to ritual by applying these theories to the social world around them.

RELI308 Trump-Evangelicals: the History of Fundamentalism and Evangelicalism in America

This course examines the history of American evangelicalism, seeking to understand the nature of its support for the presidency of Donald Trump. Beginning with a brief overview of religion in the colonial and revolutionary eras, the course examines revivalism, slavery, and the emergence of fundamentalism during the 19th century. Special attention is paid to the re-emergence of evangelicalism after World War II, the establishment of the religious right, global evangelicalism, and the core evangelical support for the candidacy and presidency of Donald Trump. Students will be challenged to consider the ways issues of gender, race, and economics have shaped 21st-century evangelicalism, and reflect on how the movement's view of American history contributes to its own sense of identity and purpose.

RELI309 Scoundrels, Sinners, and Saints: Approaches to Buddhist Life Writing

This seminar will examine a variety of religious biographies and autobiographies in order to evaluate the significance of life writing in the Buddhist traditions of Asia. Materials will cover a broad range of historical periods, from early medieval to modern, and geographic regions, including South Asia, East Asia, the Himalayas, and Tibet. Topics include the structure, function, style, production, and reception of biographies and autobiographies, as well as more thematic questions of religious transmission, soteriology and praxis, formations of self-identity, gender, and the relationships of biographical literature to art and pilgrimage. Readings include primary Buddhist texts in translation supplemented by secondary scholarship on hagiography and sainthood, literary theory, narrative constructions of the self, and Buddhist history.

RELI311 Pain and Punishment in the Hebrew Bible

The Hebrew Bible has many graphic depictions of pain and punishment; some inflicted upon the Israelites and many inflicted by the Israelites themselves. Many of the laws of the Hebrew Bible describe the proper ways to inflict punishment and many of those same laws describe the ways in which someone might be absolved of punishment. This course aims to answer the questions of: What role did pain and punishment play in the ancient world? How was the physical experience of either connected to religious experience? In what ways was pain, and often disgust, utilized to either connect or separate someone from the divine? What is the relationship between divinity, power, physicality, and punishment? In asking these questions, this course will demonstrate that, much of the time, spirituality, devotion, and religiousness, need not be divorced from the physical world and need not be considered metaphysical qualities.

RELI312 Judaism in the Time of Jesus

This course is designed to help us understand the emergence of Judaism--its practices and beliefs, as a philosophy, a way of life, a religion--from the formation of the Hebrew Bible (ca. 400 BCE) to the parallel development of rabbinic Judaism and early Christianity (ca. 100 CE). We will be concerned with the creation of community and its institutions, the rise of sectarianism and claims of normativity, the creation of the Bible as scripture and various modes of its interpretation, the relationship of early Judaism to ancient Israelite religion and society, and relations between Jews and Judaism to gentiles and gentile culture. Attention will be given to the creativity of Jewish literature, its common setting in times of oppression, and its place in the religious heritage of Judaism and Christianity.

RELI313 Curating Religion: Museums, Monuments, and Memorials

Museums, monuments, and memorial sites have long been important sites for public reckoning with the past. But they are not only about the past, they represent present struggles about the meaning of history and the possibility of imagining different futures. In this multidisciplinary class, we will work as a group to examine diverse case studies in which religion and memorial culture intersect in acts such as curation, representation, conservation, and repatriation. Visiting exhibitions and working with Wesleyan's collections, some of the questions we will ask include: What are the ethics of the treatment of objects in museums and of repatriation? How does space shape religious experience in an arguably secular setting? How do monuments invoke religious imagery and symbolism in their construction of history? In what ways does placing something behind a glass case give it a religious aura, and in what ways does it drain an object of its sacrality?

RELI314 Buddhist Traditions of Mind and Meditation

This seminar surveys a range of Buddhist meditation practices in the context of traditional theories of mind, perception, and cognition, with an emphasis on the traditions of South Asia, East Asia, and the Himalaya. Beginning with canonical descriptions of the mind and its variety of mental states, the course will then examine early scriptural expositions on the two principal types of meditation techniques: tranquility or concentration meditation (samatha) and insight meditation (vipasyana). Next will be an examination of techniques for cultivating compassion and the view of emptiness that were central to the later Indian traditions of the Mahayana or Great Vehicle. The course will finally turn to the elaborate systems of Tantra that developed in India and spread through Tibet, which incorporate the visualization of deities and recitation of mantras. Readings will include both primary Buddhist canonical works and commentaries by contemporary Buddhist teachers in English translation as well as secondary scholarship on the historical context of Buddhist meditation systems, cognitive theory, and ritual practice.

RELI315 Ethics and Action in the Buddhist Cosmos

We often think about nirvana, or "enlightenment," as the ultimate goal of Buddhist practice. But the reality is much more complex. Buddhist traditions imagine a huge range of positive outcomes for moral behavior: immediate material benefits, rebirth in a better body or in a wealthier family, and enjoyment of gold-paved heavens or eternally blissful Pure Lands.

In this seminar we will read Buddhist scriptures, commentaries, biographies, narrative anthologies, and scholarly works that trace the many ways of thinking about ethics, action, and rebirth in the vast Buddhist cosmos. We will tour Buddhist heavens and hells, Pure Lands and political dystopias, as well as the complex worlds of Buddhist modernity. Along the way we will begin to think about key issues in the study of religion: narrative and ethics, magic and material culture, cosmology and sacred presence, modernity and globalization.

RELI316 Human Rights and Spiritual Ecologies of Indigenous Peoples

This seminar will explore the social, legal, and metaphysical aspects of indigenous spiritual ecologies and their relation to United Nations discourses, indigenous community media production, and land rights movements. We will consider how indigenous peoples both respond to legal frameworks and press their positions into national and international human rights standards, on issues ranging from governance to cultural survival, from environmental management to language policy.

A particular emphasis will be put on the Andean and Amazonian regions of South America, the Mesoamerican highlands (Chiapas, Guatemala), the United States, and the United Nations Permanent Forum on Indigenous Issues, but students are encouraged to pursue their research projects across Abya Yala (the Americas).

This course focuses on developing critical thinking skills and places a special emphasis on writing and thoughtfully responding to the materials presented in class. Classes will not only consist of framework lectures and discussion questions, but also a combination of student panel presentations and writing in a collaborative environment. Participation in these activities is crucial to success in this course. Opportunities for student engagement in Manhattan at the April 2024 United Permanent Forum on Indigenous Issues are currently in development.

RELI317 Colonizing Space: Exploration, Extraction, and Inhabitation

Under its "Artemis Mission," NASA plans to put "the first woman and first person of color" on the Moon to build a permanent outpost. This lunar base will allow NASA to mine the Moon, extract precious metals from asteroids, and eventually colonize Mars—hopefully before China and Russia do the same. Thanks to recent legislation, NASA will rely throughout this mission on the rocket and extractive technologies of private corporations like SpaceX, Blue Origin, Moon Express, and Deep Space Industries, whose CEOs proclaim they are saving the human race by expanding it into space. It will also rely on the backing of the newly-created sixth branch of the U.S. military: the Space Force.

This course will track the ideological and colonial history of the Apollo era before approaching the scientific, corporate, and legislative landscape of "NewSpace." It will explore the mythological underpinnings, narrative imaginings, and theological justifications for the unfettered exploitation and inhabitation of the Earth and its cosmic neighbors. Finally, it will ask whether an ethically and ecologically sustainable space program is possible.

RELI318 Awesome Cinema: Religion, Art, and the Unrepresentable

How does one represent the unrepresentable? In particular, how might a medium like cinema, founded on recording the visible world, move us to sense something beyond human experience? Various artistic, religious, and religiously artistic traditions use mystery, horror, surprise, disgust, and pleasure to evoke the uncanny, the majestic, the terrifying, and even the sublime in us. This class examines how filmmakers prompt audiences to feel awe (which might be awesome, awful, or both) and how that relates to religious engagement with the non-rational. Noting parallels in painting, ritual, architecture, and other means of expression, we consider how art structures emotion, perception, and cognition to exceed representation of the known. This class will examine how aliens, avatars, black holes, death, deities, demons, saints, saviors, superheroes, and nature have been conduits to that which appears to escape reason.

RELI320 Schemers and Redeemers: Capitalism and Christianity in the Early Republic

This course examines the intersection of two of the most significant themes in U.S. history: Capitalism and Christianity. Beginning with the Early Republic (1790s) and continuing through the mid-19th century, this course asks students to explore how Americans used their religious identities to negotiate and shape market activity and institutions (and in turn, how the marketplace shaped their religion). Students will investigate the varied ways in which religious women and men resolved tensions between gender, class, slavery, moral dogma, and market imperatives. Finally, this course will require students to reflect on how the early 19th-century U.S. experience informs our understanding of the relationship between capitalism and Christianity in 21st-century America.

RELI321 Visual Worlds of Himalayan Religions

How do Tibetan Buddhists look at religious images? What do pilgrims in Nepal see when faced with sacred monuments? Why do devotees in Bhutan display erotic caricatures in public? This seminar will explore the ubiquitous role of images and imagining in the religious traditions of the Himalayan region. Readings and viewings will examine the painting, sculpture, architecture, and performing arts of the Himalaya (including Tibet, Nepal, north India, and Bhutan), placing them in the context of local religious beliefs, ritual practices, and literary canons. The seminar aims to understand how Himalayan cultures produce religious images and the ways of seeing that invest them with meaning. Classes will address specific modes of visual representation, the relationships between text and image, and the social lives of images, as well as processes of reading and interpretation. Particular attention will be paid to representations of Buddha Sakyamuni and visual expressions of his life.

RELI322 Playing God: Race, Colonialism, and Raising Dinosaurs from the Dead

This seminar draws on the fields of religious studies, ecocriticism, philosophy of science, decolonial thought, Black studies, political anthropology, and queer theory to examine our culture's fascination with dinosaurs. Questions discussed include: What are the ethical implications of "discovering" dinosaur fossils on stolen Indigenous land? How have "philanthro-capitalists" used dinosaurs to promote the ideology of American exceptionalism? How do fossil fuels and their extraction relate to searches for fossil animals? Why do creationists believe dinosaurs still live, and how is this a remnant of European imperialism? Is the dream of resurrecting extinct species scientific or religious? How do natural history museums benefit from and contribute towards colonialism? Is the past more like a natural resource or public utility? In the process of addressing these and many more questions, students will examine what dinosaurs can teach us about humans, non-humans, post-humans, extinction, and the end of the world.

RELI323 The Black Charismatic

In this course we will explore the interplay between black politics and popular culture in the post-civil rights era. More specifically, we will examine the aesthetics of affective (commonly called "charismatic") black political leadership by attending to Tavis Smiley's yearly "State of the Black Union" address, 2000-2010. We will rely almost entirely on film, video, and digital archives in order to trace the eleven-year-long evolution of Smiley's annual event, while focusing our hermeneutic attention on the racialized and gendered performances of Louis Farrakhan, Michael Eric Dyson, Cornel West, and others. Through close readings of their televised performances, then, this course will require students to think and write about the practice and rhetoric of the black charismatic. How might the black charismatic threaten to undermine the political opportunities afforded by the success of the modern civil rights movement? How did Smiley's yearly event create the illusion of a black public sphere? What are the unintended consequences of substituting affect for political action? Similarly, what are the potential perils of a politics that results in ephemeral catharsis without dangerous political consequences? While participating in the general discussion across the semester, students will be searching out specific research topics of their own, topics relating the seminar conversation to original research questions about: the new liberalism of black politics; the crisis of the black public intellectual; the importance of technology (particularly the ways in which new media have changed, even upended the political habitus itself); and the relationship between gender (particularly black masculinity), charismatic leadership, and respectability politics. Authors will include (in no particular order): Adolph Reed, Richard Iton, Hazel Carby, Hortense Spillers, Houston Baker, Erica Edwards, Melissa Harris-Perry, and others.

RELI324 Biopolitics, Blackness and Spirit Baptism: The Birth of American Pentecostalism

American Pentecostalism is a conservative, Protestant, Evangelical revival movement that emerges in and through Black practices that constitute an exclusion in the racialized religious, social, cultural, and political formations of early 20th-century United States. Rather than examining Pentecostalism through a single lens called "religion," this course will use the themes of Biopolitics and Blackness to examine Pentecostalism through its most commonly known feature--an experience called the baptism of the Holy Spirit. Pentecostals were narrated in popular and critical accounts in the late 19th and early 20th

century as exhibiting criminality, insanity, and raced, gendered, and sexed Black pathology. These marks of abnormality were all part of a formation of power in America known as biopolitics. As an idea, biopolitics is popularized by French historian/philosopher Michel Foucault. Foucault's concept attempts to explain how different intellectual and professional disciplines emerge in nations during the late 19th and early 20th centuries to best create a thriving population, which could be made to live. The power of the nation-state had traditionally been expressed in and through the power to kill. As a revival movement, Pentecostalism rehearses these themes, as early adherents fight over what it means to be made alive when racial Blackness is almost often seen as a mark of and for death. The course will study original accounts and sources from the historical period, read critical, interpretive accounts, and use a variety of media. All resources will be provided in class or via Moodle.

RELI373 Religion, Science, and Empire: Crucible of a Globalized World

The development of modern science--and of modernity itself--not only coincided with the rise of European imperialism, it was abetted by it. Meanwhile, religion was integral to both the roots of European science and Western encounters with others. This class will explore how the intersections of religion, science, and empire have formed a globalized world with examples of European engagement with the Americas, Middle East, and, particularly, India from the age of Columbus through to the space race. We will examine how the disciplines we know today as biology, anthropology, archaeology, folklore, and the history of religions all crystallized in the crucible of imperial encounter and how non-Westerners have embraced, engaged, and resisted these epistemes.

RELI375 Relic and Image: The Archaeology and Social History of Indian Buddhism

This course investigates the social history and material culture of Indian Buddhism from the fifth century BCE through the period of the Kushan empire (first to third century CE). The course begins with the examination of the

basic teachings of Buddhism as presented in canonical texts, then turns to consideration of the organization and functioning of the early Buddhist community, or sangha. The focus then shifts to the popular practice of Buddhism in early India and the varied forms of interaction between lay and monastic populations. Although canonical texts will be examined, primary emphasis in this segment of the course is given to the archaeology and material culture of Buddhist sites and their associated historical inscriptions. Specific topics to be covered include the cult of the Buddha's relics, the rise and spread of image worship, and the Buddhist appropriation and reinterpretation of folk religious practices. Key archaeological sites to be studied include the monastic complex at Sanchi, the pilgrimage center at Bodhi Gaya (site of the Buddha's enlightenment), the city of Taxila (capital of the Indo-Greek kings and a major educational center), and the rock-cut cave monasteries along the trade routes of western India.

RELI377 Worlding the World: Creation Myths from Ancient Greece to the Multiverse

This course will focus on two questions that have thwarted and enthralled scientists, philosophers, and theologians for millennia: Where have we come from? and Where are we going? By reading ancient Greek and early Christian sources alongside contemporary astrophysicists, we will witness the reconfigured resurrection of some very old debates about the creation and unmaking of the world. Is the universe eternal, or was it created? Is it finite or infinite? Destructible or indestructible? Linear or cyclical? And is ours the only universe, or are there others?

The semester will be divided into four sections. The first will explore the dominant, or "inflationary," version of the big bang hypothesis in relation to Christian and indigenous myths of creation. The second will consider the possibility that the whole universe might be a negligible part of a vast "multiverse" in conversation with the early Greek atomists, who posited an extra-cosmic space teeming with other worlds. The third will explore contemporary cyclical cosmologies—that is, theories that posit a rebirth of the cosmos out of its fiery destruction—in relation to early Stoic philosophy and cross-cultural cyclic mythologies. The fourth will explore quantum cosmologies, in which the universe fragments into parallel branches each time a particle "decides" upon a position. We will examine these varied cosmologies of multiplicity, not with a view toward adjudicating among them, but toward pointing out their mythic and ontological genealogies and consequences.

RELI391 Religion and the Social Construction of Race

In this course we examine aspects of the intersections between race and religion in a number of historical and social contexts. We place at the center of our discussions the question of how race and religion are co-constructed categories that function as a prism through which people come to understand and experience their own identities and those of others. We will privilege interpretations that emphasize (a) the intersections of race and religion as a process in which power plays a pivotal role; and (b) the means through which communities form collective identities. We will read a range of historical analysis and primary source materials from the U.S. and the Caribbean. After a theory module, we will examine a colonial-era captivity narrative, antebellum pro-slavery document, missionary works, analyses of anti-Semitism, works on Father Divine, the Nation of Islam, Rastafari, Haitian Vodou, Jonestown, the Christian White Supremacy movement, as well as the contemporary U.S. relationship to the Middle East.

RELI393 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

RELI395 The Anthropology of Religion

What do we study when we study religion? We can observe practices, record speech, examine objects and actions—but what do these things tell us? If religion is about belief, what can we say about belief from documenting actions? Perhaps we must conclude that religion is not about belief, but if so, are in danger of "explaining away" the very phenomena we seek to understand? This course will introduce students to a cross-cultural, comparative perspective on religious practice and belief in order to critically reflect on the role of methodology and research design in the study of religion and the social sciences more broadly. How do we know what we know? How do we plan research in order to find out what we want to know? The course has a significant methods component. Students will be expected to do field research exercises in a local religious community and prepare a methodology research proposal for a fictional or real project as a final assignment. Methodological exercises will be interspersed with ethnographic texts that allow us to reflect on how religion is studied, experienced, and explained. Students planning theses or other research projects with an ethnographic component, in any social science field, may use the class and the final assignment to conceptualize and plan their projects.

RELI398 Majors Colloquium in Religious Studies

This seminar provides an opportunity for majors to reflect even more critically upon the theories, methods, and discourses that constitute the academic study of religion. We will be concerned with current studies in history and the history of religions, the interpretation of texts, anthropology, feminist theory, and post-colonial theory.

With particular emphasis on case studies, the seminar will explore how scholars operate within disciplinary communities, choose their topics, engage interlocutors, weigh issues of emic and etic interpretation, and—on good days—publish their analyses.

Each member of the seminar will choose a local religious community to engage throughout the semester as a further opportunity to consider the choices scholarship entails.

ROMANCE LANGUAGES AND LITERATURES

RL&L115F Italian Cinema, Italian Society (FYS)

This First Year Seminar on Italian cinema (taught in English) investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with popular genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Ophuls, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others.

Major Screenings will be organized for students. Students are not responsible for purchasing the films.

RL&L120F Tales of Resistance: Modernity and the Latin American Short Story (FYS)

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, as well as immigration to Europe and the United States.

RL&L123 Love, Sex, and Marriage in Renaissance Europe

This writing-intensive seminar will compare literary and artistic depictions of love, sex, and marriage during the Renaissance by authors and artists from England, Spain, France, Flanders, Germany, and Italy. We will read both male and female writers in genres ranging from poetry, the short story, and theater to the essay, the travel narrative, and the sermon. We will also examine other arts such as painting, sculpture, and the decorative arts (e.g., wedding chests). Questions we will explore include, but are not limited to, How were love and marriage related during the Renaissance? What role did sex, gender, and violence play in relationships between couples and within society? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about same-sex unions? Other topics will include virginity and celibacy, erotic literature, family and class structures, and divorce.

RL&L123F Love, Sex, and Marriage in Renaissance Europe (FYS)

This seminar compares literary depictions of love, sex, and marriage from the 14th to the 17th centuries by writers from England, France, Germany, Italy, the Low Countries, Spain, and Sweden. (Students will be able to study writings from other parts of Europe over the course of the semester should they so choose.) We will read texts composed by women and men in genres including poetry, theater, the short story, the essay, the maxim, the travel narrative, and the sermon. Though the seminar is focused on literature, we will also consider painting, engravings, sculpture, and the decorative arts (e.g., wedding chests). We will explore questions such as: How were love and marriage related during the Renaissance? What roles did sex, gender, race, class, and violence play in relationships between couples and within society, and how were they represented in literature and art? How do gender and genre affect the ways in which love, sex, and marriage are depicted? How did cultural differences influence writers' and artists' interpretations of love, sex, and marriage? And what about homosexual love, same-sex unions, and depictions of dissident sexualities and genders? Finally, how do contemporary (21st-century) writers reimagine Renaissance representations of love, sex, and marriage, and why do Renaissance texts and images matter today? Other topics will include virginity and celibacy, friendship, erotic literature and pornography, religion, family and class structures, and divorce. This seminar engages students with university-level research by navigating search engines and databases (beyond a Google search!), honing their analytical skills, and polishing their academic prose. Students will also have the opportunity to write creatively should they so choose.

RL&L125 Jungle and Desert Adventures

This course analyzes the constellation of images and sensations conjured up by the terms "jungle" and "desert" that are opposite but equally extreme. We will explore European adventure tales and travelogues, contemporary non-Western novels, children's books, and films in a quest to understand the imaginative power of these landscapes. Through our readings of such a wide range of texts, we will ask questions such as, What do these landscapes signify? How do descriptions of landscape convey a sense of individual and collective identity? What psychological terrain is explored when writing about extreme landscapes? And finally, how do we each see ourselves in relation to landscape? What is our own version of an "extreme" landscape?

RL&L126 El Greco to Picasso: Modern Art's Passion for Golden Age Spain

This course examines the life and afterlife of the Spanish artists of the Golden Age, whose achievements reached unprecedented heights in the 17th century. Centuries later, their works took on new roles as artists of other times and cultures found their own inspiration in works of the past: Manet copied Velázquez, Picasso copied El Greco, and (famously on "Project Runway") Christian Soriano copied Murillo. What allowed these complex works to resonate so strongly in another era? Is such influence automatically a sign of success? And why have the works of Francisco Goya inspired more filmmakers than any other artist? Students will be introduced to the reading of visual art for stylistic, historical, and political content and develop a critical understanding of art and society in Golden Age Spain, as well as insights into the role of art as a cultural currency.

RL&L129 Writing the French Revolution

"Liberty, equality, and fraternity" was the slogan of the French Revolution and features three concepts of enduring interest. In this seminar we will explore the French Revolution and its antecedents--and what these can mean for us today. In the process we will delve into a number of ways of thinking and modes of representation: historical thinking, of course, but we will also get a sense of the origins of sociology and political science, the power of scientific thinking, and differences between literary and visual representation (especially films). This course will also serve as a writing workshop emphasizing the nuts and bolts of good writing and experimenting with such rhetorical modes as argument, personal narrative, persuasion, and fiction-writing.

RL&L130F If This Is an Author: Primo Levi and the Politics of Authorship (FYS)

In this First Year Seminar, we look at what makes an author to help you become a better writer. Through the case study of Primo Levi, we address questions of authorship, reception, and appropriation. From his seminal Holocaust text, "If This Is a Man" (first published in 1947, also known in the States as "Survival in Auschwitz"), to the philosophical essays of "The Drowned and the Saved" (1986), Levi was a writer of many genres (memoir, poetry, short fiction, novel, non-fiction) who confronted some of the most crucial themes of the 20th century: genocide, moral choices, the uses of science and technology, the relationship between historical truth and memory, and the power of language. In this course, we reflect on what an author is in theory (Barthes, Foucault, Sedgwick, Spivak, etc.) and in practice, engaging with and reacting to Levi's writing through such questions as: what makes a literary work authentic and why should we trust the words of an author? How do authors affirm their authority in their own country and abroad, and what is the role of publishers, translators, and critics in their reception? What happens when an author becomes a character for another author, and, more generally, what are the aesthetic and ethical implications of appropriating an author's body (of work)? As we critically read a significant portion of Levi's "Complete Works", you will hone your interpretative and writing skills through class discussion, short writing assignments, in-class presentations, and ample feedback, understanding how questions of authorship do not pertain solely to a literary author like Primo Levi, but can also help you become a more confident writer.

RL&L140F Van Gogh and the Myth of Genius (FYS)

This seminar will investigate in depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth-making--both in his time and today--in which he appears as the quintessential mad genius

whose passionate and tormented emotions become the stuff of art. We will both investigate the formation of this myth and view it critically, balancing it against the artist's own account of his career in his paintings and prodigious correspondence. Van Gogh's extensive, insightful, and fascinating writing begs the question of how one should treat an artist's statements when interpreting his works. We will also examine the role of biography in art. Finally, rather than viewing the artist as an isolated creator, we will situate his work within the artistic landscape of late 19th-century Europe, and especially France, where he spent his most productive years as an artist, 1886--1890.

RL&L141 Van Gogh: Modernity, Utopia, and Nineteenth-Century Art

This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of Impressionist, Neo-impressionist, and Symbolist painters before moving to the south of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

RL&L148F Responding to Political Turmoil (FYS)

"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--including the creation of the U.S.; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The course is both academic and project-based: as we gain perspective through academic readings and assignments on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and intended to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L150F Undoing Gender in Medieval France (FYS)

In this course, we will go way back--before Stonewall and even Simone de Beauvoir--to depictions of gender diversity in multiple medieval literary genres including romances, songbooks, lais, and chantefable. We will dive deep into medieval French texts with an ability to hold ambiguous and complex representations of gender and sexuality. We will discuss canonical French literary works in translation and also in medieval manuscript, alongside contemporary works on gender, queer, and trans theory, in order to illuminate what medieval literature can teach us about gender identities and desire processes that trouble or even escape the gender binary, as it is commonly understood today. As will become clear from our explorations of medieval French texts and manuscripts, many identity categories that we take to be stable, eternal, or "natural," are contingent and simply "naturalized." Medieval genders are not ours, and our genders will not be those of future generations.

This is a writing-intensive course, and you will produce upwards of 20 pages of academic writing by the semester's end. In this class, we will consider writing a collaborative and ongoing process. In the first few weeks, you will be exposed to ideas about gender and sexuality that surprise you. Your first written assignment will be to describe something "weird" that intrigues you and that you would like to investigate more. Sparks of confusion and intrigue are often seeds that grow into ideas and ultimately arguments! As you investigate this topic, you will be encouraged to begin writing about it, and sharing your writing with your peers. In addition to reviewing drafts of your peers essays, you will produce abstracts, outlines, and short conference papers to practice different means of focusing your thought in writing and communicating your thoughts to an audience. Our course will culminate in a collaborative miniconference, where we will work collaboratively to trouble and undo commonsense notions of gender.

This course introduces the art and architecture of Romanesque and Gothic Europe, that is, later medieval Europe ca. 1100-1400, focusing especially on Germany, France, Italy, England, and Spain, as well as the wider Mediterranean. Architecture, painting, sculpture, and the luxury arts (e.g., metalwork, ivory, and textiles) will be our focus, supplemented by primary-source texts and secondary literature. Key themes will include sacred spaces, such as cathedrals and monasteries; sacred images and devotion; gender; pilgrimage and the relic; geography; the Other; the monstrous and the miraculous; courtly love and chivalry; the relationship between Christianity, Judaism, and Islam; and premodern definitions of art, the artist, the donor, craftsmanship, and value.

RL&L211 Depicting Death in Literature

This course analyzes the theme of death primarily within French and francophone writing (in English translation), tracing the evolution of death imagery over time in literary texts. The curriculum will investigate various contexts related to the environment and language usage, offering a nuanced understanding of how the portrayal of death has changed in literature.

RL&L212 Early Renaissance Art and Architecture in Italy

This course surveys key monuments of Italian art and architecture produced between ca. 1300 and 1500. Focusing on major centers such as Florence, Milan, Rome, and Venice, as well as smaller courts such as Urbino and Mantua, it considers the works and careers of the most important artists and architects of the period, among them Giotto, Brunelleschi, Donatello, Giovanni Bellini, Botticelli, and Leonardo da Vinci. Monuments are studied in their broader intellectual, political, and religious context, with particular attention paid to issues of patronage, devotion, gender, and spectatorship. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

RL&L213 Introduction to Existentialism

This course covers the wide variety of thinkers who may be considered a part of the existentialist tradition. The political and cultural phenomenon of existentialism asks questions concerning the essence of freedom in modern society, the role of emotions and passions in subjectivity, how meaning is brought to life, and the tensions between individuality and society. We will address these questions through the writings of thinkers such as Friedrich Nietzsche, Fyodor Dostoevsky, Jean-Paul Sartre, Simone de Beauvoir, Emilio Uranga, Leopoldo Zea, Gloria Anzaldúa, and Frantz Fanon. Throughout we will investigate what lessons for political life and belonging we can draw from these thinkers in our contemporary world.

RL&L217 Venice and the Renaissance

Venice -- a city built almost impossibly on a forest of stilts sunk into the mud of the lagoon and buttressed by powerful myths of divine origins, permanence, and prosperity - produced some of the most spectacular works of Renaissance art and architecture. This introductory-level course on the art and culture of Venice's "golden age" considers the works of artists such as Carpaccio, Bellini, Giorgione, Titian, Veronese, and Tintoretto, and architects such as Codussi, Sansovino, and Palladio in the context of the city's unique setting, social and governmental structure, cultural and political milieu, and larger geopolitical significance. It also positions Venice's artistic production within the broader framework of early modern Europe, exploring its connections with Byzantium and the Islamic world. The course also introduces students to key issues and methods of art history.

RL&L220 Authority and Resistance: France Since 1870

Historians suggest it may be normal for France to be always on the verge of crisis owing to the persistence of irreconcilable conflicts and a celebration and practice

of resistance. They conclude that France may be ungovernable, noting that five presidents since 1981, frustrated and resisted, have accomplished very little.

This course studies France under three republics and a dictatorship, beginning with defeat in war and revolutionary upheaval in 1870-1871 and concluding with current, sustained challenges to state authority and liberal democracy. We will survey this 150-year history, emphasizing political forms, ideologies and movements, social change, the economy, and cultural developments. Particular consideration will be given to revolutionary ideas and activities, working-class organizations, socialism and communism, conservative thought and action, extreme rightist movements, the degradation of rural life, the experiences of three wars against Germany, imperialism and decolonization, key personalities, and styles of authority and resistance. Times of emergency and crisis will command attention, specifically the Paris Commune of 1871; the Dreyfus Affair of the 1890s; the Great War of 1914-1918; the Popular Front of the 1930s; the military defeat of 1940; the drama of collaboration or resistance, 1940-1944; the early years of the Fifth Republic, 1958-1969; the extraordinary career of General de Gaulle; and the "yellow vests" in 2018-2019.

RL&L221 The Pedagogy of Second Language Teaching and Learning

This course offers a foundation for second language (L2) acquisition in the classroom and teaching approaches. Specifically:

- characteristics of L2 learning
- an understanding of the most commonly used L2 methodologies and strategies
- basic know-how for analyzing and creating materials for language learning/teaching
- L2 teaching as a profession

Classes and readings will be in English, given that the tutorial combines students of French and Spanish. However, the development of students' target language (TL) is also considered a priority in the course, supported by looking at authentic and pedagogical materials, creating pedagogical materials of their own, and by using the language in class during volunteering hours.

This course is intended for students who, being FREN, HISP, or RMST majors or advanced learners in French or Spanish, may be considering a career in education, and who commit to volunteering at the Middletown public schools while taking this course (at the very least). There is a volunteering commitment of 2 hours/week minimum during the semester. Students must take this course concurrently with a FREN or SPAN course numbered 215 or above.

RL&L223 Second Language Acquisition and Teaching

This course introduces students to the field of Second Language Acquisition (SLA) and addresses the following questions: How do humans learn additional languages after they have acquired their first? Why is there such variability

observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language?

We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting. Students of French and Spanish may also wish to enroll in RL&L 223L, a 0.5 credit service learning course in which students volunteer in the Middletown Public Schools.

RL&L223L Second Language Acquisition & Pedagogy - Teaching Romance Languages

How do humans learn additional languages after they have acquired their first? Why is there such variability observed in the rates and outcomes of second language learning? Is it possible to attain native(-like) linguistic competence in another language? This course is intended for students who may be considering a career in education. We begin with the theories and applications of SLA, and then examine major pedagogical movements in Second Language Teaching in the U.S. Students will develop the ability to critically assess current methods, materials, and techniques for teaching various language skills and will produce their own pedagogical activities to be used in a classroom setting.

In this service-learning course, students are required to volunteer a minimum of two hours per week in the Middletown Public Schools, assisting French, Italian, and Spanish teachers in their world language classes. Students will write weekly journal entries reflecting on their classroom experience, and will learn to evaluate, adapt, and create pedagogical materials. By the end of the semester, they will have created a portfolio of activities that can be used in a foreign language classroom.

RL&L224 The Good, the Bad, and the Ugly: Rethinking the Italian Renaissance

In this course we explore the intellectual achievements of the Italian Renaissance. We study the development of new secular values and the quest for the fulfillment of body and soul, glory, and exuberant pleasures. We question notions of beauty, symmetry, proportion, and order. We also unveil often-neglected aspects of Renaissance counter-cultures, such as the aesthetics of ugliness and obscenity and practices of marginalization (e.g., misogyny, homophobia). We inquire into the rediscovery of classical civilizations. We consider how the study of antiquity fundamentally changed the politics, literatures, arts, and philosophies of Italy at the dawn of the modern era. Through a close reading of texts by authors such as Francesco Petrarca, Niccolò Machiavelli, and Michelangelo, we investigate continuities and ruptures between their quest for human identity and ours. This course is conducted in English, and all primary and secondary sources are in English.

RL&L225F Writing Biography: Denis Diderot, a Case Study (FYS)

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

RL&L226 The Cosmos of Dante's "Comedy"

In 1321, Dante Alighieri completes the final cantos of the "Comedy" and breathes his last. After 700 years, the "Comedy" has not finished saying what it has to say. This course provides an in-depth introduction to Dante's masterwork as a point of entry to the history of Western literature, philosophy, and science. The core of the course consists of an intensive study of Dante's encyclopedic poem in relation to the culture and history of Medieval Europe. We examine the poem as both a product and an interpretation of the world it describes. We also observe how the "Comedy" casts its long shadow on modern culture: in Primo Levi's description of the horror of Nazi concentration camps, or in Amiri Baraka's fragmentary representation of America's infernal racist system. We investigate the challenges that Dante's text elicits when it migrates to visual and cinematic arts (from medieval illuminations to Robert Rauschenberg to David Fincher), continuously camouflaging and adapting to different media. Major topics of this course include: representations of the otherworld; the soul's relation to the divine; Dante's concepts of governance and universal peace; mythology and theology in Dante's Christian poetics; the role of the classics in the Middle Ages; intertextuality and imitation; genres and genders in medieval literature; notions of authorship and authority during the 13th and 14th centuries; the culture and materiality of manuscripts in the Middle Ages; and the reception of Dante's work from the 14th century to the present. The course combines a close analysis of Dante's inventiveness and literary strategies with exercises in analytical writing and in multimedia translation and adaptation, aimed at prompting critical reflection on the ways in which present cultural practices are built upon the practices of the past. This course is conducted in English; no previous knowledge of Italian is required.

RL&L227 Desire, Deception, Disenchantment: Five French Novels in Translation and on Screen

This course aims to study five French novels from the 17th to the 20th centuries in translation, alongside and against their respective cinematic adaptations. We will begin with Lafayette's *The Princess of Cleves* (1678), one of the Western world's first psychological novels, and then move on to Choderlos de Laclos' epistolary novel *Dangerous Liaisons* (1782). We will then read Gustave Flaubert's *Madame Bovary* (1856), Albert Camus' *The Stranger* (1942), and Marguerite Duras's *The Lover* (1984). Films will include: Jean Delannoy's 1961 adaptation of Lafayette's novel, Christophe Honoré's *The Beautiful Person* (2008), a modern-day adaptation of the story, and Rémy Sauder's 2011 documentary on how the novel is being used in a French school in Marseille; three adaptations of Laclos's novel: Roger Vadim's cutting-edge *Les Liaisons dangereuses* 1960, Miloš Forman's 1989 *Valmont*, and Stephen Frears's 1998 acclaimed *Dangerous Liaisons*; three adaptations of *Madame Bovary*: Vincent Minnelli's film (1949), Claude Chabrol's adaptation from 1991 starring Isabelle Huppert, and Sophie Barthes's version (2014); Luchino Visconti's adaptation of Camus' *The Stranger* (Lo straniero, 1967); and Jean-Jacques Annaud's *The Lover* (1992). These novels and their adaptations will allow us to think about notions of canon formation; genre and narrative; the uses of history in fiction; censorship, controversy, and crime; gender, class, race, and (post)colonialism; translation; and how these texts have been and continue to be read, used, adapted, and transformed from their time of publication up to the present day.

RL&L229 Political Turmoil

"What just happened? What's going to happen? What do we do now?" Political turmoil, while disconcerting to say the least, is nothing new. This course will look at case studies from various times and regions--the creation of the US; Fascist Spain; the 1960s in the U.S., France, and elsewhere; Brazil's military dictatorship; Italy in the 1990s; the Arab Spring; contemporary Mali and D. R. Congo, among others--to see how others have responded to periods of political oppression and upheaval. After an initial period of discussion based on readings, we will hold conversations with members of our campus community who have experienced various forms of authoritarianism. The goal of the course is ultimately project-based: as we gain perspective on the issue of political turmoil, we will turn what we learn into well-informed, measured, concrete action. In particular, we will workshop several writing exercises related to the topic and destined to make an impact (e.g., letter to the editor, letter to an elected official, public service announcement for the radio). All students (including those whose first language is not English) are welcome in the course and will receive individualized attention to their writing.

RL&L230 Between Marx and Coca-Cola: European Cinema of the 1960s and 1970s

In the 1960s and early 1970s, a growing sense of alienation and social unrest spread across Europe, making their marks in both society and cinema. Borrowing the words of New Wave director Jean-Luc Godard, these years led to the emergence of "the children of Marx and Coca-Cola." This course, taught in English, will introduce students to a multi-faceted portrait of Europe in the 1960s and 70s through avant-garde and popular cinema from France, Italy, Spain, Germany, and Eastern Europe. We will focus on films that depict global capitalism, gender relations, and government control. Some of the themes we will discuss include the critique of consumerism and materialism, the changing

role of women in society, life under socialism and dictatorship, and youth counterculture. Last but not least, students will learn how New Wave directors challenged traditional approaches to narrative cinema.

RL&L231 Mystics and Militants: Medieval Women Writers

In this class we will read a wide range of works written by European women between ca. 1100--1400, including courtly, devotional, and polemical texts. The course will explore ideologies of gender in the Middle Ages and examine the ways in which our authors confronted the antifeminist discourses of their eras with learning and imagination. We will consider such topics as constructions of sexuality and the body, "courtly love," mystical religious experience, heresies, humanism, and utopian realms. In short, we will read works by women who created their own forms of authority and in doing so, both influenced and defied the authorities of their time.

RL&L232 Obscure Enigma of Desire

This course is an introduction to the study of the ways we create meanings when we read texts. It will focus on several deliberately obscure literary texts from twelfth-century France and will examine them in the light of the classical and medieval concepts of enigma, the marvelous (wonderful), fabula, and allegory as well as some modern theoretical works about how we understand narratives. We will seek to understand why deliberate obscurity is an important part of literature and how medieval authors created narratives that seem particularly meaningful precisely because they are obscure. We will consider why we feel these texts have meaning and the ways in which we make them meaningful to us. This course will be co-taught in parallel with a course (in English) on the same subject offered at the Charles University in Prague by Professor Lucie Dolezalova. About half of the classes will be conducted together with the class in Prague through teleconferencing and Professor Dolezalova will teach one week of the course at Wesleyan and meet with students while she is here.

RL&L233 Modern Italy on the Silver Screen: 1960--2015

This course is an introduction to modern Italian culture through the lens of Italian cinema. Beginning in the postwar era, we will look at the radical transformations that have shaped contemporary Italy by examining the aesthetic and narrative trends of the silver screen. Italian cinema holds an important place in global film culture, giving rise to new artistic forms (from neorealism to spaghetti westerns and arthouse slashers) that have dramatically impacted foreign and domestic sensibilities. Among the films screened are Fellini's *La dolce vita*, Pasolini's *Mamma Roma*, De Sica's *Matrimonio all'italiana*, Leone's *Il buono, il brutto, il cattivo*, Argento's *Suspiria*, Moretti's *Caro diario*, Ozpetek's *Saturno contro*, and Giordana's *Quando sei nato non puoi più nasconderti*. Each film screening is accompanied by a brief presentation of the socio-historical context in which it was produced, allowing students to situate the artistic projects within broader Italian social and political histories. By the end of the term students will have an understanding of the last half-century of Italian national history and will

be familiar with key terms in film theory and analysis. This course is taught in English; films will be screened in Italian with English subtitles.

RL&L234 Cuneiform to Kindle: Fragments of a Material History of Literature

This course provides a theoretical and historical investigation of diverse media of literary expressions from clay tablets to digital texts. We will inquire into the history of writing through different technologies and modes of composition, circulation, and reception from antiquity to the present day. By engaging in such topics as the transition from scroll to codex, from manuscript to print, and from book to Kindle, we will consider the history of literacy in relation to other forms of expression (oral, visual, networked) and analyze different practices of organizing textual materials (punctuation, paragraphing, annotation). We will scrutinize paratextual elements (title, front matter, opening information, foreword) and various forms of verbal accretions (glosses, commentaries, editorial interventions). We will examine shifting notions of authorship and originality and explore different systems of storage (libraries, archives, museums). And by questioning the multifaceted, nondeterministic interplay between literary artifacts and the media by which they are formalized and materially formed, we will provide a critical and historical reflection on the nature of textuality, writing, and media.

Readings will set essays in the history of the book and media studies alongside key literary case studies from various periods and geographical areas. Projects will engage with textual materiality (including through the creation of book-objects of our own). The course will be conducted in English.

RL&L235B Curatorial Workshop: Art and the Ecological Imagination, 1840-1870

This course examines the emergence of an "ecological consciousness" in art during the mid-19th century through readings, discussion, and firsthand study of works in the Davison Art Center print collection. Although the term "ecology" was first coined in 1866, 19th-century thinkers had long been concerned with the interrelationship of organisms, including humans' place and impact on nature. This class examines how visual artists before Impressionism contributed to the 19th century's "ecological imagination" through their representations of landscapes. Known as the "Barbizon School," this group of artists left the metropolis of Paris to immerse themselves in the wild and rugged terrain of the Fontainebleau Forest while also embarking on journeys to remote regions of France. These members of the first artists' colony seceded from the French Academy of Fine Arts and pursued strategies of independence that were allied at the time with radical politics. In their works they experimented with new materials and approaches to composition that included but no longer prioritized humans, in order to foreground processes of transformation internal to nature itself. The consciousness that artists forged through painting and printmaking led them to become among the world's first conservationists; they successfully petitioned the French government to protect parts of the Forest of Fontainebleau some 20 years before the creation of the first National Park in the United States.

The first half of the course will be devoted to reading and discussion; the second half will center on the study of works in the Davison Art Collection, which includes a superb collection of original and experimental prints by Barbizon School artists. The final project will be the curation of a temporary exhibition of works from the collection, including a selection and arrangement of works, explanatory texts, and a public gallery talk.

RL&L236 Don Quixote: How to Read the Ultimate Novel

No novel is more celebrated than "Don Quixote," albeit in often contrary ways: touchstone at once of the modern and the post-modern; of prosaic and magical realism; of Romantic idealism and skepticism, relativism, or materialism; of a truth-telling folly; and of the competing claims of books and "life" or history and fiction. Sample superlatives: the one text that can challenge Shakespeare in the Western canon (Harold Bloom), all prose fiction is a variation on its theme (Lionel Trilling), one of the four great myths of modern individualism (Ian Watt). Each generation recognizes itself differently in it and every major literary tradition has made it its own. One secret of its lasting appeal is that, brilliantly improvisatory and encyclopedic, it resists being pinned down. Nothing quite prepares us for the hallucinatory thing itself. There is something for every taste: self-invention; the biology of personality; humor, pathos, and tragicomedy; high and low culture; prose, poetry, and theatrics; episodic variety in a long narrative arc; probing examination of the ambiguities of heroism with a parade of spirited and resourceful heroines who rival and often upstage the heroes; and the disruptive transformations of a new world order (the print, educational, and military revolutions; early modern globalization; incipient capitalism; the explosive growth of profit-driven entertainments). A celebration of the transformative power of imagination even as it casts a gimlet eye on how fantasies can go awry, what passes for "the real world" is often as nutty as the hero himself. We will read, discuss, and write about "Don Quixote" in English, together with key examples of the critical, philosophical, literary, and artistic responses it has inspired. The course assumes no familiarity with literature, history, or Spanish; it does call for an interest in grappling with this wonderful text closely, imaginatively, and historically.

RL&L237 Making New Worlds: Encounters on Turtle Island

From before the arrival of the earliest fishing ships off the coast of Newfoundland to the fall of New France at the close of the Seven Years' War, Turtle Island (North America) was the site of entangled encounters. Overlapping imperial claims and the construction of new societies took place on Indigenous homelands with deep histories. This course will examine North America as a contested and negotiated territory in which imperial plans were subjected to local contexts and contingencies. Using primary and secondary sources, we will examine major events (explorations, encounters, and wars), the rise and fall of imperial powers (French, British, Dutch, and Spanish), and the daily realities that shaped experiences in North America (trade, religion, sex, forced migrations, and disease). Throughout, we will focus on the persistence and resistance of Indigenous nations who protected (and still protect) their homelands and lifeways.

This course will investigate in-depth the career of this immensely popular and influential artist. Van Gogh has been the subject of much myth making--both in his time and today--in which he appears as the quintessential mad genius whose passionate and tormented emotions become the stuff of art. This class goes beyond the media image of the artist and looks hard at his paintings, drawings, and letters, placing them in their respective artistic, literary, and historical contexts. Van Gogh engaged with social issues, above all the plight of peasants, artisans, the poor, and the marginalized--the most vulnerable members of society. He sought to give form to their experience in ways that were mediated by Dutch and French landscape painting and French naturalist literature. Upon moving to Paris, van Gogh absorbed the lessons of impressionist, neo-impressionist, and symbolist painters before moving to the South of France, where he created his most memorable works of sun-drenched fields, bar and café interiors, and common workers. Toward the end of his life, he increasingly conceived of art as a site for utopian projections and emotional solace. We shall study the work of this immensely productive artist and along the way develop art historical skills, including visual and textual analysis, historical and contextual interpretation, how to evaluate an artist's personal correspondence in relationship to his painted oeuvre, and independent research.

This course examines the birth of modern art in the wake of the French Revolution and traces the evolution of modern art throughout what would prove to be an extraordinary century of social transformation and formal experimentation, ending in the Dreyfus Affair and Post-Impressionism. Themes this class explores include the advent of a public sphere for art-making and the relationship between artistic advance and appeals to an ever-widening public; painting and revolution in France and its colonies; the redefinition of history painting in light of the abolition of slavery and the Declaration of the Rights of Man; the expansion of France's colonial empire and the representation of racial difference; the rise of feminism and attempts on the part of women artists to find their own voice in a masculine practice; the destabilization of classicism in light of scientific discoveries and ideas of "primitivism"; and the conflict between the unabashed pursuit of artistic individualism and the need to define collective values and experience. Although these developments took place two centuries ago, they continue to define the field of modern art today.

The entanglements of Italian and Italian American cinema date to the medium's silent era. If the Taviani Brothers' 1987 film *Good Morning, Babylon* is to be believed, while filming *Intolerance* (1916) D.W. Griffith lauded and lamented the genius of Giovanni Pastrone's colossus *Cabiria* (1912), doubting that his own epic film would be able to match the virtuosity of the earlier Italian example. Flash forward to 1931-32 and the trio *Little Caesar* (1931), *Public Enemy* (1931), and *Scarface* (1932) sear into the American imaginary the cinematic representation of the Italian mobster. Beyond Italian artistry and aesthetics of the sort Griffith ostensibly applauded, and the numerous examples of the violent, lawless gangster of Italian descent, what are some other (stereo) typical intersections between Italian and Italian American cinema?

Mapping the Transatlantic transmissions of representations, stereotypes, and aesthetic values reveals how these two cinematic traditions co-articulate and condition each other, with "Hollywood on the Tiber" offering a chief example of the ways Italian and American industrial contexts invoke and implicate each other. How do Hollywood's glamorized gangsters inform Italian representations of organized crime? How do American cinematic "Latin lovers" draw on Italian models? How have representations of masculinity, men, and fathers; femininity, women, and mothers; (large) families, food, religion, class mobility, questions of race and racism, and immigration unfolded in their respective contexts and what do intersections among them reveal?

Two non-fiction films from Scorsese help draw our parameters for our discussion: *Italianamerican* (1977), for socio-cultural codes; for cinematic contexts, *My Voyage to Italy* (1999), in which the director reviews his Italian influences and which also serves as an introduction to Italian cinema. We subsequently investigate the indicated themes and topics as they range across a corpus of texts which includes, on the Italian American side: *Scarface* (Hawks, 1932), *Not Wanted* (Lupino, 1949), *The Godfather* (Coppola, 1972), *Mean Streets* (Scorsese, 1973), *Rocky* (Avildson, 1977), *Raging Bull* (Scorsese, 1980), *Moonstruck* (Jewison, 1987), *Married to the Mob* (Demme, 1988), *True Love* (Savoca, 1989), *Do the Right Thing* (Lee, 1989), *The Freshman* (Bergman, 1990), *Goodfellas* (Scorsese, 1990), *My Cousin Vinny* (Lynn, 1992), *Household Saints*

(Savoca, 1993), *The Sopranos* (Chase, 1999), *The Departed* (Scorsese, 2006), *Wendy and Lucy* (Reicherdt, 2008), *The Miracle at St. Anna* (Lee, 2008). Alongside these, we examine Italian films drawn from this list: *Cabiria* (Pastrone, 1912), *Umberto D.* (De Sica, 1952), *I Vitelloni* (Fellini, 1953), *Rocco and His Brothers* (Visconti, 1960), *Eclipse* (Antonioni, 1962), *Amarcord* (Fellini, 1974), *Kaos* (Taviani Brothers, 1984), *Mediterraneo* (Salvatores, 1990), *Johnny Stecchino* (Benigni, 1991), *Lamerica* (Amelio, 1994), *Gomorra* (film Garrone 2008, series 2014), *The Young Pope* (Sorrentino, 2016), and *The Confessions* (Andò, 2016). The films for group presentations will also be drawn from these lists.

This course has no prerequisites. We will work on students' capacity for formal film analysis as we go along and, at the beginning of the course, some students may have greater proficiency in this area. At the same time, other students may initially have a broader knowledge base of Italy and Italian society. Everyone has something to learn. Conducted in English.

RL&L243 Art and Culture of the Italian Baroque

This introduction to the arts and architecture of 17th-century Italy addresses one of the core paradoxes of the period: that startling innovation and creativity were not inconsistent with serving the purposes of patrons and ideologies that at first appear rigid and authoritarian. Supported by popes, cardinals, new religious orders, and private collectors, artists and architects such as Caravaggio, Artemisia Gentileschi, Pietro da Cortona, Gianlorenzo Bernini, and Francesco Borromini depicted saintly bodies in moments of divine rapture, opened up painted ceilings to elaborate illusionistic visions, and subjected the classical language of architecture to unprecedented levels of movement. Through lectures and discussions of key primary and secondary sources, we will explore the emotive and ideological power of Baroque art, considering the multitude of ways in which it shaped the visual, political, and religious worlds of its day.

RL&L244 European Architecture and Urbanism, 1750-1910

This course considers the history and theory of architecture and urbanism in Western Europe from the mid-18th to the early 20th century. A central theme is the relationship between historicism and modernity through the period. Topics include neoclassicism, the picturesque landscape, the Gothic Revival, the Arts and Crafts Movement, the École des Beaux-Arts, the German Rundbogenstil, international expositions, and Art Nouveau. We will focus on specific sites in major cities, including Paris, London, Berlin, Munich, Vienna, Milan, Rome, Brussels, and Barcelona, among others. New or transformed building types include museums, railway stations, apartment blocks, department stores, and theaters. Urban forms include residential squares, boulevards, arcades, and public parks. Architectural culture will be discussed as a response to changing political, economic, technical, and ideological conditions in newly modernizing societies. Urbanism includes the transformation of early modern cities due to industrialization, housing for different social classes, new towns, suburbs, utopian communities, the Garden City, and colonial centers such as Bombay (Mumbai), Algiers, and Hanoi.

RL&L245 Not Just Neorealism: Italian Cinema, Its History and Politics

This introductory course on Italian cinema, taught in English, investigates major silent and sound films and contextualizes them, their production, and the subjects they treat within a historical, cultural, and political framework. We will trace the intersection among politics, ideology, and Italian cinema, from its Golden Age of silents through fascism and neorealism (as well as its contested legacy), from a consideration of the "exquisite" examples of the auteur directors like Fellini and Sorrentino to the ways these and other directors enter into dialogue with genre cinema (the giallo, spaghetti westerns, melodrama, etc.), and beyond. Featured filmmakers will be drawn from this list: Pastrone, Rossellini, De Sica, Fellini, Bertolucci, Antonioni, Wertmuller, Cavani, Pasolini, the Taviani Brothers, Leone, Sorrentino, Rohrwacher, Nicchiarelli, Crialese, and others. Additional material includes readings in film theory and criticism, Italian history, literary sources, screenplays, and interviews. For interested students with advanced competency in Italian, there will be a .50 credit (CLAC) discussion section, ITAL245/CGST245, at a time to be determined but very likely after our second class of the week. Italian and Romance Studies Majors, please see additional comments below.

RL&L250 Integrative Learning Project 1: Crafting Your Digital Identity

Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

RL&L251 Italian Art and Architecture of the 16th Century

In addition to key monuments of 16th-century Italian art and architecture, this course seeks to introduce students to some of the most important figures of the period: artists and architects--such as Leonardo, Michelangelo, Raphael, Bronzino, Titian, and Palladio; their princely and ecclesiastical patrons--such as Cosimo I de' Medici and Pope Julius II; and their critics and biographers--such as Giorgio Vasari and Ludovico Dolce. Our aim will be to understand the complex artistic and architectural landscape of the period against the backdrop of shifting intellectual and religious trends, including the Counter-Reformation. Class discussions will be based on close readings of primary sources and scholarly texts on a wide range of topics.

RL&L254 Breaking the Waves: The Japanese and French New Wave Cinemas and Their Legacy

While the French and Japanese New Wave(s) existed as largely contemporaneous cinematic movements, rarely are they discussed together, instilling the impression of two parallel streams, never to converge or intersect. This course hopes to serve as an intervention into this perceived divide through close readings of these groundbreaking cinematic works and an examination of their revolutionary content in the interest of articulating shared philosophical concerns. In many cases, New Wave filmmakers worked as writers and critics before producing films themselves, a fact that speaks to the intensely theoretical nature of their cinema. This course will therefore examine critical writings published in the space of Cahiers du Cinema, Film Art, and other journals as a means of better understanding the thought process that underlies these films. How do these films figure as a response to that of the previous generation and how did they hope to revolutionize cinematic praxis? What was their relationship to political activism and the events of 1968? Finally, we will consider the legacy of these cinemas: What is the prevailing influence of the New Wave on Hollywood and global cinema? What aspects of the movement have been retained and what has been lost along the way?

RL&L261 Framed: Re/presenting Italian Women Filmmakers

This course trains on Italian films written and directed by women with women protagonists and their stories. Our explorations circulate around activities intended to anchor the course in the real and active and invite students to reflect on the ways these activities and stories resonate in their own lives. Some activities whose filmic representations and reimaginings we will investigate include working, loving, sexing, framing, growing, thinking, collaborating, acting, and making. Our focus on filmmakers will comprise contributions by screenwriters, actors, directors, and editors and consequently we will explore the ways in which women have been "framed" by and for the camera and how women filmmakers have helped "reframe" those representations. Seen historically, our examination will reach from Elvira Notari's films (1911 to 1929) to significant post-WWII collaborations of women actors and directors (e.g., Anna Magnani [with both Luchino Visconti and Roberto Rossellini], Monica Vitti [and Michelangelo Antonioni], Sofia Loren [and Vittorio De Sica], Claudia Cardinale [Sergio Leone and Federico Fellini]). The 1970s and especially the cinema of Liliana Cavani and Lina Wertmuller, set the stage for many of Italy's contemporary women filmmakers, including Francesca Archibugi, Francesca Bertini, Laura Bispuri, Francesca Comencini, Wilma Labate, Alina Marazzi, Susanna Nicchiarelli, Costanza Quatriglio, Alice Rohrwacher, Marina Spada, and Angela Torre. Feminist film criticism and theory will also help us "frame" and "reframe" these contributions.

RL&L275F Religions Resisting Modernity (FYS)

Why did some Native Americans turn to dance while resisting federal troops? Why do creationists reject evolution? Why do some French Muslims wear a veil when their mothers didn't? Why did Gandhi insist that Indian nationalists spin their own thread? Throughout the last century, resistance has risen to modernity, and religion has played an increasingly important role in challenging

the globalization of modern Western values. This seminar will explore how Europe transformed itself into a modern society with worldwide influence. Then it will investigate how the Lakota Sioux, Christian creationists, and Mohandas Gandhi each have used religion in an attempt to resist some aspect of modernity, either outside the Western world or within it. No background in the study of religions is necessary. Ultimately, the course will challenge our very understandings and expectations of what it means to be modern.

RL&L280 Exploring Personhood in the 20th and 21st Centuries (CLAC 1.0)

The goal of this course is to provide a thorough examination of the concept of personhood in the 20th century by studying how it has been portrayed and understood in diverse cultural contexts across Arabic, English, and Francophone cultures. Through the use of comparative analysis and an interdisciplinary approach to cultural artifacts--such as works of literature, art, and religious texts as well as current debates around AI and personhood--students will explore how different cultures have approached the question of what it means to be a person and how this has evolved over time. By the end of the course, students will have a deeper comprehension of the various ways in which personhood has been created and perceived throughout different cultural and historical contexts.

The impact of historical occurrences and cultural movements on the construction of personhood, the influence of religion and politics or the fictional writing on conceptions of personhood, the representation of personhood in literature and art, and the emergence of AI as a new frontier in the investigation of personhood are some of the major topics covered in the course. This will open up new discussion topics about posthuman beings and persona status, particularly in science fiction.

RL&L284 Comparative Politics of Western Europe

The leading nations of Western Europe--Great Britain, France, Germany, and Italy--have developed vibrant economies and stable democracies that differ in important ways from those of the U.S. and from each other. This course explores the ability of European economies to withstand pressures of globalization and the capacity of European democracies to integrate political newcomers such as women and immigrants. We address questions such as, Does New Labour provide a model for parties of the Left across the West, or is its success predicated on the foundations laid by Thatcherism? With the limited ability of the French people to influence politics, should we still consider that country a democracy? Has Germany definitively overcome its Nazi past, or does the strength of German democracy rely on a strong Germany economy? How can we make sense of the Italian "second republic"?

RL&L302 West African Literatures and Cultures in French

This course explores major texts in modern and contemporary Francophone African literature by delving into four major themes that traverse the recent cultural, literary, and political history of Francophone West Africa.

The course starts by investigating the relationships between orality and literature through the lens of often-intersecting debates around tradition and modernity; the focus will then shift to articulations of nation, liberation, and the promises of independence, war, and memory, and finally the ruptures and continuities of the post-colonial, neoliberal present.

By spending significant time with primary sources that span over a century of literary and cultural production from and about Francophone Africa, students will have a deep understanding of the urgencies animating writers wrestling with the weight of the colonial past, the violence of decolonization, the brightness of independence, and the uncertainty of the present. A thorough engagement with some of the most important authors of the last 60 years (e.g. C. H. Kane, B. Diop, Y. Ouloguem, M. Condé, among others) will allow us to deep-dive into the possibilities of literary expression, as well as questions of belonging, nation, and evolving ideas of "Africa."

RL&L311 Translation Workshop in Early Modern Spain: Topographies of Love, Arcadia, and History

This course takes a practical approach to the translation of early modern Spanish literature. We will begin by consulting various comments on the art and craft of translation made by 16th-century Spanish translators in their own works before we encounter the curious case of the "pastoral prosimetrum," a type of narrative fiction that reimagined the author and their contemporaries under literary pseudonyms in an updated version of an idyllic Arcadian landscape. From Spanish to English, from experience to poesis, we'll recontextualize these topographies of love in their own literary and historical moment in order to translate those imaginaries into contemporary English. Readings will be in English and Spanish. Discussions and translations will be in English. There are no prerequisites, but reading knowledge of Spanish is required. Please consult the instructor if you have questions about your language ability.

RL&L321 Dialogues of Love: A Close Reading

Towards the end of the fifteenth century amidst the burgeoning cultures of the Italian Renaissance in Naples, Genova, and Venice, the exiled Ibero-Sephardic philosopher and physician Judah Abravanel (Leone Ebreo) composed a philosophical work on erotic ethics as a dialogue between love (Philone) and wisdom (Sophia). "The Dialogues of Love" (1535) presented early modern readers with an erotic cosmology which drew upon Ancient and Medieval texts including Plato, Neo-Platonism, Neo-Aristotelianism, Kabbalah, and scriptural commentary. Widely translated, read, and reprinted throughout the sixteenth century, this text animated literary and cultural life throughout sixteenth-century Europe, finding its way into the work of poets and fiction writers such as Miguel de Cervantes. This course engages this unique and breathtaking work of early modern philosophy through a close reading of a Renaissance cosmos staged as a lovers' courtship.

RL&L325 Eloquent Forms: Topics in Italian Renaissance and Baroque Sculpture

Early modern Italy was a site of vibrant and wide-ranging innovations in the field of plastic arts. Fueled by fierce competition, financed by extravagant expenditures, and created for a range of religious, commemorative, and

decorative functions in both public and private realms, the sculptural medium reached a pinnacle of creative expression, material experimentation, and theoretical engagement in this period. From monumental urban commissions such as fountains to small-scale precious objects sought out by the wealthy collectors, sculptural works profoundly shaped the visual worlds of early modern Italy. This seminar on the making and meaning of sculpture in the Renaissance and Baroque periods will engage students with the works and careers of several key artists of the era, including Lorenzo Ghiberti, Donatello, Andrea del Verrocchio, Niccolò dell'Arca, Francesco Laurana, Properzia de' Rossi, Michelangelo, Benvenuto Cellini, Giambologna, Leone Leoni, Gianlorenzo Bernini, and Alessandro Algardi, among others. Seminar readings and discussions will be structured around broad themes such as: making and viewing of early modern sculpture; rhetoric of sculptural materials; verisimilitude and sculptural animation; sculpture and the senses; fragmentation and the "non-finito"; touch, desire, and the nude; representations of force and violence; antiquarianism and sculpture collecting; tombs and sculptural commemoration; and monsters and monstrosity in garden sculpture.

RL&L327 Criticism and Psychoanalysis

This course introduces some classical psychoanalytic methods of reading and interpretation, with accent on the four concepts Jacques Lacan identified as foundational: the unconscious, repetition, the transference, and the drive. We will approach psychoanalysis as a style of close reading whose influence on forms of interpretation--especially literary interpretation--has been immeasurable. One central concern will be the capacity of psychoanalysis to enable us to read ourselves reading, to make the interpretive situation itself the object of our analysis. Students with an interest in literary-critical methods will benefit from the course, as will students with an interest in the internal logic of an important body of thought.

RL&L339 Modernism and the Total Work of Art

The term "total work of art" refers to the German concept of the Gesamtkunstwerk, which took on new urgency in the 19th century amid social upheaval and revolution. Understood as the intention to reunite the arts into one integrated work, the total work of art was tied from the beginning to the

desire to recover and renew the public function of art. While there exist many approaches to totality in the modern era, this course focuses on modernist theories and practices that simultaneously critiqued existing society and posited a utopian alternative. We will begin by studying formulations of totality in response to a cultural crisis initiated by the 1789 French Revolution. From there, we turn to German idealism and to an analysis of composer Richard Wagner's ideas and compositions that made the idea of the synthesis of the arts a central focus for European modernism. Yet if Wagner's works and writings provided the dominant reference for subsequent developments from the 1880s onward, these most often consisted of a search for alternatives to his own theory and practice, particularly in the visual arts. We will examine attempts to envision totality after Wagner in Impressionist painting and German Expressionism. Ideas of totality and utopia continued to carry positive associations for modern artists until the 1930s, when they became co-opted by totalitarian governments. The course concludes by examining the perversion of modernist dreams in Nazi festivals and art exhibitions.

RL&L351 Deconstruction and Politics

Following the later work of Jacques Derrida, we will investigate the significance of the concepts of sovereignty and democracy in some important texts of 20th-century continental philosophy. We shall attempt to understand why these notions are taken at face value and yet still pose many problems for that tradition. Why did democracy and sovereignty give rise to many complications and paradoxes while, at the same time, they continue to hold a vital conceptual import within the political as such. We will thus ask why are political philosophies so invested in sovereignty and democracy? Ultimately, we will consider the possibility of a close affinity between the political and the rhetorical, and will try to understand why democracy and sovereignty tend to exceed conceptual grasp. Because our approach will be primarily deconstructive, we shall also attempt to compare it to other modern and contemporary approaches.

RL&L390 Directed Research in European Studies

This course is intended for students who wish to undertake a significant research project or get a head start on a senior essay or thesis devoted to any aspect of European civilization from 500 to 2021. The course will begin with three weeks of regular meetings devoted to the purpose of academic research in the humanities and social sciences, developing and refining a research topic, organizing one's research, bibliographies and sources, the construction of an argument, and the organization of a research paper. Students will work on their research projects individually during the rest of the semester, although the class will meet as a group from time to time so students can present and discuss the state of their work. Students will also have weekly tutorials with the instructor to discuss their progress and plan their next steps. Students who are able to do so are encouraged to engage with research materials in languages other than English.

RUSS205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, *EUGENE ONEGIN*, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RUSS208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RUSS220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RUSS221 Queering Russian Music

How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u., Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

RUSS222 Russian and American Poetic Encounters

The fascination of Russian poets with American authors, and the curiosity of Anglophone poets about the culture of Russia and the USSR, are trends that accompany the turbulent twentieth century, when the political relationships between Russia and the USA were largely inimical. But it was also a period when poetry mattered. In this course, we will focus on some of the most significant poets of the twentieth century.

We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets' dialogues with each other across cultures. For example, we will learn how Mayakovsky's "ladder" might have influenced Williams' *vers libre*, or how Joseph Brodsky learned T. S. Eliot's theory of impersonality in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost's visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

RUSS223 After Communism: Animals, Avatars, Hybrids

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RUSS224 Performing Russian Culture: From Peter the Great to the Russian Revolution

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom

cultural identities are contrived and performed. The course is conducted in English.

RUSS226 Documentary Fictions

How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of non-fiction? How does creative non-fiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

RUSS234 Introduction to Russian and Soviet Cinema (CLAC.50)

This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and

aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

RUSS235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years—whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"—have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RUSS240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

RUSS251 Dostoevsky

Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years

of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

RUSS252 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RUSS254 Nobel Laureates: The Politics of Literature

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature—Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

RUSS255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *Radetzky March*, the collapse of the Austro-Hungarian Empire is viewed

through the lens of a single heartbroken family; in Bohumil Hrabal's *I Served the King of England*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's *Mondegreen* is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's *Flights* provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's *Trans-Atlantyk* and Aleksandar Hemon's *The Question of Bruno*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

RUSS256 The Soviet Century

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RUSS260 Dostoevsky's BRAT'IA KARAMAZOVY

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each

week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of *THE BROTHERS KARAMAZOV* in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

RUSS265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction

Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as *The Empire and the Other*, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RUSS267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, *MAD* magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of *2 Live Crew / Roy Orbison* (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

Credits: **1.00**Gen Ed Area: **HA-REES**Identical With: **REES267, RULE267**Prereq: **None****RUSS276 Contemporary Russian Literature**

The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaia, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-REES**Identical With: **REES276, RULE276, WLIT266**Prereq: **None****RUSS277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses**

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-REES**Identical With: **REES277, RULE277, WLIT242**Prereq: **None****RUSS279 Chekhov: Prose vs. Drama**

This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists—the author of such classic plays as *The Seagull*, *Uncle Vanya*, *Three Sisters*, and *The Cherry Orchard*. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild's Violin," and "The Lady with a Lapdog."

As one of Chekhov's biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov's writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-REES**Identical With: **REES279, WLIT265, RULE279**Prereq: **None****RUSS290 Tolstoy Part One: War and Peace and Other Works**

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and *Childhood*) and in the narration of the experience of war (*Sevastopol Stories*). The main part of the course will be devoted to his epic *War and Peace*, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

Offering: **Crosslisting**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-REES**Identical With: **REES290, COL276, RULE290, WLIT263**Prereq: **None****RUSS291 Tolstoy Part Two: Anna Karenina and Later Works**

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece *Anna*

Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, *Resurrection*, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RUSS297 Music of Central Asia: From Throat-singing to Heavy Metal

The music of the Hu was chosen as the soundtrack to *Star Wars Jedi: Fallen Order* because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

RUSS321 Moscow/Berlin: Dreamworld and Catastrophe

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world

based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSSIAN LITERATURE IN ENGLISH (RULE)

RULE205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

RULE208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

RULE220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages)

to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

RULE222 Russian and American Poetic Encounters

The fascination of Russian poets with American authors, and the curiosity of Anglophone poets about the culture of Russia and the USSR, are trends that accompany the turbulent twentieth century, when the political relationships between Russia and the USA were largely inimical. But it was also a period when poetry mattered. In this course, we will focus on some of the most significant poets of the twentieth century.

We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets' dialogues with each other across cultures. For example, we will learn how Mayakovsky's "ladder" might have influenced Williams' vers libre, or how Joseph Brodsky learned T. S. Eliot's theory of impersonality in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost's visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

RULE223 After Communism: Animals, Avatars, Hybrids

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special

attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

RULE224 Performing Russian Culture: From Peter the Great to the Russian Revolution

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures, and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

RULE233 Introduction to Russian and Soviet Cinema

This course provides an introduction to the history and poetics of imperial Russian, Soviet, and post-Soviet Russian cinema. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of film from the Soviet and post-Soviet periods as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia, Ukraine, and Armenia.

RULE235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western

narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

RULE240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

RULE251 Dostoevsky

Dostoevsky is widely recognized as one of the world's greatest novelists. His career begins at the end of Russian Romanticism, is interrupted by nine years of prison and exile in Siberia, and resumes at the beginning of the age of the great realist novel. Dostoevsky's major works grapple with the themes of sin and crime, the disintegration of the family, and the difficulty of believing in God in a world full of evil.

Credits: **1.00**

Gen Ed Area: **HA-REES**

Identical With: **RUSS251, REES251, WLIT244**

Prereq: **None**

RULE252 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

RULE254 Nobel Laureates: The Politics of Literature

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature-Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

Offering: **Crosslisting**

RULE255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *Radetzky March*, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's *I Served the King of England*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's *Mondegreen* is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's *Flights* provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's *Trans-Atlantyk* and Aleksandar Hemon's *The Question of Bruno*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

Prereq: **None**

RULE256 The Soviet Century

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

RULE265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction

Throughout its history, the rulers of Russia--the tsarist Russian Empire, the USSR, and now the Russian Federation--have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

RULE267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various

definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

RULE276 Contemporary Russian Literature

The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

RULE277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces. Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

RULE279 Chekhov: Prose vs. Drama

This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists—the author of such classic plays as *The Seagull*, *Uncle Vanya*, *Three Sisters*, and *The Cherry Orchard*. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild's Violin," and "The Lady with a Lapdog."

As one of Chekhov's biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov's writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

RULE290 Tolstoy Part One: War and Peace and Other Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and *Childhood*) and in the narration of the experience of war (*Sevastopol Stories*). The main part of the course will be devoted to his epic *War and Peace*, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and

transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

RULE291 Tolstoy Part Two: Anna Karenina and Later Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece *Anna Karenina*, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, *Resurrection*, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

RULE321 Moscow/Berlin: Dreamworld and Catastrophe

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES)

REES121F Queering Russian Music

How have the sexuality of a Russian composer Pyotr I. Tchaikovsky and international success of a popular music duo t.A.T.u. shaped the understanding of gender, sexuality, and queerness in the Russian context? This entry-level course introduces a variety of theoretical and journalistic approaches and presents a historical overview of Russian music centered around queerness, gender, sexuality, and power. Using methodologies of queer studies and queer theory, we will examine a variety of musical genres and musicians ranging from Imperial Russia to the present-day Russian popular and film music. The topics will focus on women composers, queer genres, queer sexual and musical identity.

Selected personalities examined in the course:

Catherine II (the Great), Pyotr I. Tchaikovsky, Vaslav Nijinsky, Sofia Gubaidulina, Galina Ustvolskaya, Alla Pugacheva, Zemfira, t.A.T.u., Pussy Riot, AIGEL, Little Big, Manizha, Oxxxymiron, ICEPEAK

REES200 Histories of Ukraine

Over the course of its history, Ukraine has been a site of multiple political projects and diverse historical experiences. As a concept that encompasses a specific territory, it has also been a space where multiple communities--

Ukrainians, Russians, Jews, and Poles--have histories. This course will look at how these histories have been shaped by and alongside one another, and the kind of political programs, obstacles, and possibilities that have emerged through these encounters. It will ask why Ukraine and its history have been the subject of so much confusion and controversy, and examine the concepts (nation, state, people, culture) that transform a space into a place, a land into a home.

REES204 Entangled Sounding Objects: Musical Instruments of Central Asia

Musical instruments exist at the intersection of material, cultural, and social worlds. Entangled in webs of human and non-human relationships, they are at once tangible and symbolic sounding objects that hold significant meanings for the communities they serve. This course will explore the social roles and cultural meanings of musical instruments in Central Asia, a region once traversed by the Silk Road, which extends from the borderlands of China in the east to the Caspian Sea in the west, and from Russia in the north to the frontiers of Afghanistan in the south.

Drawing on theories and ideas derived from interdisciplinary studies of material and sound culture, the course will examine how instrument making and performance are shaped by and entangled with social systems of value and cosmology, political ideology, ecology, and economy. Class meetings will focus on case studies of bowed and plucked lutes, zithers, mouth harps, end-blown flutes, and frame drums among historically nomadic and sedentary peoples of Central Asia. Through these case studies, students will learn about the origins and historical trajectories of individual musical instruments from the pre-modern period to the Soviet and post-Soviet eras; consider the social and political connotations of various performance configurations and repertoires; discuss the status of instruments in Islam and indigenous spiritual belief-systems, and the roles of musical instruments as symbols of national identity, objects of cultural heritage, and global commodities.

REES205 Murder and Adultery: Dostoevsky, Tolstoy, and the 19th-Century Russian Novel

The 19th-century novel is widely regarded as the supreme achievement of Russian literature. This course will trace its development from Pushkin's elegant, witty novel in verse, EUGENE ONEGIN, through the grotesque comedy of Gogol, to the realist masterpieces of Dostoevsky and Tolstoy, with their complex depiction of human psychology and the philosophical struggles of late 19th-century society. We will consider the historical background in which the novels were produced and the tools developed by Russian critical theory, especially the Russian formalists and Mikhail Bakhtin, for understanding 19th-century Russian prose.

REES208F Otherness & Belonging (FYS)

One of the many haunting utterances of Fyodor Dostoevsky's most famous antihero, the Underground Man, is "I am alone, I thought, and they are everyone." Like him, the other protagonists of this course are outcasts, dissidents, and strangers - jaded office clerks and repressed misanthropes, queer activists and "enemies of the state" - who refuse to conform to societal norms, disrupt conventions by saying the unsayable, and write and make art from the margins, the realm of undesirables. Focusing mainly on Russia and Eastern Europe, we will analyze representations of otherness and belonging in fiction, non-fiction, and film. We will explore narratives of undesirability through the thematic prisms of exile and immigration; gender and sexuality; mental illness; prison writing; ethnic difference; religion; and unrequited love. The concept of undesirability will also be our point of entry for constructing arguments about community, privilege, and a society without outsiders.

REES216 Secularism: Godlessness from Luther to Lenin

Secularism is more than just the absence of religion. It is a political and ideological project with a long history that seeks to separate political and religious authority and imagines whether human life can be richer without religion. This course traces the idea and ideal of secularism as an ideological project from classic Enlightenment philosophers to contemporary critics. We begin with Martin Luther's arguments for the separation of church and state, examine utopian ideals of secular humanism in Mill, Locke, Hume, and Marx. We then trace how these philosophies were embodied in state-sponsored atheism in the Soviet Union and how secularism came to stand for religious freedom during the Cold War. Finally, we examine critiques of the secular project (such as Asad, Mahmood, and others), focusing on secularism as a realpolitik approach to governing multireligious societies and the idea of religious freedom as a universal human right. This is a seminar focused on close readings of philosophical and critical texts. Assignments include reading responses and reflective essays.

REES219 Russian and Soviet History, 1881 to the Present

Reversals of fortune have defined Russian history perhaps more so than for any other nation. Though the Russian Empire began the 19th century as an emerging European superpower that defeated Napoleon, it ended that same century as a backward state plagued by political, economic, and social strife that ultimately brought the Romanov dynasty to a revolutionary collapse. A similar trajectory describes the "short" Soviet 20th century that began with the promise of a qualitatively new political order that sought to transform social relations and human nature and concluded with a spectacular implosion that some heralded as the end of history itself.

This course will follow the story of how the Soviet Union emerged from the ruins of the Russian imperial order to become the world's first socialist society, the most serious challenge to imperialism, liberalism, and capitalism, and, arguably, modernity's greatest political experiment. We will cover the following topics: the emergence and fate of Russian national identity; the origins and dynamics of Russia's revolutions; the political, economic, and cultural challenges of the Soviet project; the role of the party and ideology in politics and everyday life; the

nationalities question and the challenges of governing a socialist empire; Soviet victory in the Great Patriotic War and the rebirth of the nation (and nationalism); the emergence of the Soviet Union as a Cold War superpower; the country's historic attempts to reform (and the frequent failure of these attempts); and the dynamics of the system's collapse.

REES220 Speak, Memory: The Russian Memoir

Memoirs offer a chance for individuals to make sense of their relationship to larger historical forces and allow writers of fiction and poetry to reflect on the tensions between biography and the creative process. We will read memoirs of prison and of Stalinist terror by Fyodor Dostoevsky and Nadezhda Mandelstam; visions of childhood by Lev Tolstoy, Vladimir Nabokov, and poets Osip Mandelstam and Marina Tsvetaeva; and works of autobiography by Viktor Shklovsky and Sergey Gandlevsky that create their own worlds of literary experimentation. The course will also consider the theoretical problems of autobiographical writing. Students will write a memoir of childhood (3-5 pages) to better understand the technical problems faced by Tolstoy in writing about his childhood. Students will also write a piece of memoiristic prose, or a parody or imitation of one of the writers in the course (minimum 10 pages), as one of their three papers. We will devote one class session to a writing workshop session on the creative project.

REES222 Russian and American Poetic Encounters

The fascination of Russian poets with American authors, and the curiosity of Anglophone poets about the culture of Russia and the USSR, are trends that accompany the turbulent twentieth century, when the political relationships

between Russia and the USA were largely inimical. But it was also a period when poetry mattered. In this course, we will focus on some of the most significant poets of the twentieth century.

We will study six Russian poets (Vladimir Mayakovsky, Boris Pasternak, Osip Mandelstam, Joseph Brodsky, Olga Sedakova, and Arkadii Dragomoshchenko), and six American poets (William Carlos Williams, Robert Frost, T. S. Eliot, Langston Hughes, John Ashbery, and Lyn Hejinian), and also one Caribbean poet (Derek Walcott).

We will learn how to analyze lyric poetry, and how to study it comparatively. We will explore the poets' dialogues with each other across cultures. For example, we will learn how Mayakovsky's "ladder" might have influenced Williams' vers libre, or how Joseph Brodsky learned T. S. Eliot's theory of impersonality in poetry even though Eliot was banned in the USSR. We will also explore where poetry and politics meet. For example, we will discuss why Langston Hughes found his visit to the USSR inspirational as an African-American poet, and we will see whether the myth that Robert Frost's visit to the USSR contributed to the Cuban Missile Crisis is true.

The course is taught in English. No knowledge of Russian is required.

REES223 After Communism: Animals, Avatars, Hybrids

During the last two decades of the 20th century, a wide array of Soviet and post-Soviet writers either replaced or merged the traditional human protagonist with another: the animal. Whether featuring a penguin avatar or disillusioned insects; a human centipede or a pack of werewolves, these literary works directly and indirectly shed light on the historical context in which they were written: the last decade before and the one immediately following the dissolution of the Soviet Union. Keeping in mind this historical and social context, we will analyze representations of hybridity, violence, sexuality, and (imagined) communities--all through texts that challenge us to consider what the animal represents and how it affects our expectations of narrative. The secondary readings will situate the animal in a broader philosophical and theoretical framework, and special attention will be paid to postmodernism as a movement in literature and art. Conducted in English.

REES224 Performing Russian Culture: From Peter the Great to the Russian Revolution

This course offers a survey of Russian culture from 1700-1917 through the perspective of performance studies. Starting with the reign of Peter the Great and ending on the eve of the revolution, we read some of the seminal works of the Russian literary canon, including plays, poems, short stories, and novels. We also consider examples from visual and material culture: paintings, sculptures,

and everyday objects. Alongside these primary sources, we discuss theoretical pieces from the field of performance studies in order to expose and reflect on the social and political mechanisms embedded in the shaping of various forms of "Russianness." The course will explore ever-relevant questions of belonging, display of power, and ideology, and ask how, why, and by whom cultural identities are contrived and performed. The course is conducted in English.

REES225F Socialist Utopias: Transcendence and Religion in Communist States (FYS)

Socialism is a political system predicated on building a better future by transcending the present. But what kind of utopias were imagined in and by actual socialist states like the Soviet Union? Why was atheism so central to Marx's vision of socialism, and what kinds of futures did communists imagine were possible, once religion was removed from society? What kinds of transcendence did communists imagine would exist once they transcended religion? What kinds of religious practices were enabled despite and sometimes because of the state's repression of organized religion? We will read some Marx, some Soviet science fiction as well as ethnographies, ranging from studies that explore how communism is and isn't like a religion, how former atheists became missionaries, how some religious communities survived communism, how mangos became Mao's relics, how Vietnamese spirit mediums channel Ho Chi Minh, and what kinds of imaginaries can flourish in post-socialist ruins like Moscow and Silicon Valley.

REES226 Documentary Fictions

How stable is the binary distinction between the documentary and the fictional? Is fiction's claim to representing reality any less valid than that of non-fiction? How does creative non-fiction conjure the sense of the Real? Can an archival document convey the depth of spiritual, emotional, and aesthetically infused intimacy on its own? What happens when the documentary and the fictional overlap to produce competing versions of the Real? What is at stake in such an overlap when the competing versions of the Real vie for a definitive, true account of events past and present? This class investigates various genres of storytelling that appeal to the documentary and the factual in pursuit of authenticity: propaganda, counter-propaganda, conspiracy theories, political and artistic manifestos, historical fiction and cinema, diary writing, autobiography and memoir, and documentary photography and film. Focusing geographically on East-Central Europe and Russia and chronologically on the last 100 years, the class will take up such thematic units as civil war, socialist realism, capitalist realism, the deaths of dictators, revolutionary hagiography, homefront narratives, and survivor testimony.

REES234 Introduction to Russian and Soviet Cinema (CLAC.50)

This course provides an introduction to the history and poetics of Soviet and Russian cinema--in Russian. From the avant-garde experimentation of Lev Kuleshov, Sergei Eisenstein, and Dziga Vertov to the masterpieces of Andrei Tarkovsky, Sergei Parajanov, and Kira Muratova, the course will explore the development of Russian film as artistic medium and as national tradition. The discussion and comparative analyses of different forms and genres, including silent cinema, propaganda films, blockbusters, and auteur cinema, will be situated within the cultural, political, and aesthetic contexts of the Soviet Union and contemporary Russia. Students will learn the key works, names, events, and concepts of the Russian cinematic tradition. They will develop skills in analyzing and interpreting films and will acquire the basic critical terminology of film studies in Russian and English. They will also learn how film form and aesthetics are conditioned by technology, ideology, economics, theory, tradition, and culture. The overarching goal is to see how cinema in Russia and the Soviet Union has created and contested narratives of history and identity, how cinema has served the interests of the state, and how it has defied them. This class consists of lectures and focused discussion of films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

REES235 Queer Russia

Russia is accustomed to playing the role of the "evil empire." The current ongoing war in Ukraine has resurrected the Cold War-era narratives about Russia as a dark, aggressive, and ruthless military power. The notorious legislation of recent years--whose functions range from barring Americans from adopting Russian orphans to criminalizing the so-called "gay propaganda"--have further solidified Russia's reputation as a country with little regard for human rights. Yet generations of Russian poets, artists, and writers have transformed the country's systematic oppression and violence into spectacular forms of protest and self-expression. This course focuses on gender and sexuality in exploring an alternative cultural history of Russia, which highlights its queer legacy from the nineteenth century to the present. We will examine poetry, fiction, art, memoirs, plays, films, performances, and discursive texts that showcase uniquely Russian conceptions of marriage, gender relations, gender expression, and sexual identity. Attention will be paid to the ways in which Russian and Western narratives of queerness align and diverge. In English. No knowledge of Russian is required or expected.

REES240F Reading Stories: Great Short Works from Gogol to Petrushevskaya (FYS)

This course is designed to help students improve their writing through the close reading and analysis of short stories and novellas by Russian masters of the form. Students will be asked to bring to each class their ideas on how to construct an argument that could be developed into a written interpretation of the work being discussed. These discussions, along with work on building logical arguments, recognizing propaganda and disinformation, and polishing grammar and style, will inform students' own writing (four 5-page papers). We will read works from the 19th century to the late 20th century that include Tolstoy's novellas of faith, adultery, and facing death; Gogol's surreal comedies and urbanistic fantasies; Chekhov's subtle psychological tales; Bunin's reflections from exile on a lost Russia; Bulgakov's sketches of life as a country doctor; and Petrushevskaya's modern stories of the tortured lives of women in the late Soviet period.

REES252 Tolstoy

During the 19th century when Tolstoy wrote his novels and stories, literature was viewed in Russia as the intelligentsia's primary medium for debating its big questions (such as how to resolve the inequalities that had been institutionalized under serfdom, or how to choose between new and old values as Russia experienced modernization). Writers like Tolstoy and Dostoevsky willingly assumed the responsibility to address a broad range of political, historical, and philosophical-religious questions in their fiction, and they wrote novels with radical formulations as well as solutions to these questions. However, they also viewed literature, particularly the novel, as a medium with rich potential for innovative formal experimentation, and so they resisted the call for conventional ideological novels. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms.

For native speakers and learners who have studied Russian for at least four semesters, a half-credit course is available in which we will read excerpts from Tolstoy's works (CGST 330).

REES254 Nobel Laureates: The Politics of Literature

The course examines key cultural and socio-historical moments in the development of twentieth-century Russian literature by focusing on the prose and poetry of authors awarded the Nobel Prize in Literature-Ivan Bunin (1933), Boris Pasternak (1958), Mikhail Sholokhov (1965), Alexander Solzhenitsyn (1970), Joseph Brodsky (1987), and Svetlana Alexievich (2015). Additionally, the students will read Lev Tolstoy, who rejected being nominated for the prize, as well as Vladimir Nabokov and Anna Akhmatova, who arguably merited the award but never received it. On the broader level, the class will ponder literature's relevance for shaping public discourse on cultural policies, national identities, and international relations.

REES255 Prague, Vienna, Sarajevo: 20th-Century Novels from Central and Eastern Europe

This course is a survey of 20th-century prose fiction of Central and Eastern Europe, with an emphasis on the Czech novel. The novels we will read make history come alive through the eyes of vividly individual characters. In Joseph Roth's *Radetzky March*, the collapse of the Austro-Hungarian Empire is viewed through the lens of a single heartbroken family; in Bohumil Hrabal's *I Served the King of England*, the Czech experience in World War II and postwar Stalinization is embodied in the figure of a diminutive hotel waiter; Volodymyr Rafeyenko's *Mondegreen* is an experimental narrative told through the eyes of a refugee from the Ukrainian Donbas region in Kyiv who struggles with language and identity; Nobel Prize-winner Olga Tokarczuk's *Flights* provides a constellation of short narratives that attempt to capture the place of the body in the world of travel and migration; in Witold Gombrowicz's *Trans-Atlantyk* and Aleksandar Hemon's *The Question of Bruno*, the main characters find themselves in a foreign land when their home countries (Poland and Yugoslavia, respectively) are torn apart by war. All the works we will read exemplify the high level of narrative

sophistication, in realist, absurdist, and experimental modes, that is a hallmark of Central and Eastern European literature.

REES256 The Soviet Century

This course begins and ends with two of the most important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the government of the Russian Empire with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to transform human beings and remake the world. On December 26, 1991, the Soviet Union collapsed into 15 European and Asian countries.

The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will move beyond the clichéd view of the Soviet Union as the Evil Empire. Instead, we will examine the ways in which socialist modernity offered an alternative to its capitalist twin.

In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the class will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider the theoretical writings of Marx, Lenin, and Trotsky in addition to poetry and prose by Babel, Mayakovsky, Akhmatova, Platonov, Pasternak, Tsvetaeva, Berggolts, and Nabokov, among others. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. All readings are in the English translation.

REES257 The Soviet Century (CLAC.50)

This course begins and ends with two crucially important dates of the 20th century. On November 7, 1917, the Bolshevik party launched a revolution against the Russian government with the aim of overthrowing not just the state but capitalism, the economic and social system that defined modern civilization. Over the coming decades, the state they created (eventually named the USSR) embarked on an unprecedented project to remake the world. On December 26, 1991, the Soviet Union collapsed into 15 countries. The Soviet project raises fundamental questions about political systems, economics, and human nature--questions that are a long way from being answered. It also shaped modern history all over the world, including in the United States, which confronted the Soviet Union as its political and ideological archenemy during the Cold War. In charting the USSR's trajectory from pariah nation after World War I to global superpower following World War II, we will explore the ways in which socialist

modernity offered an alternative to its capitalist twin. In an effort to understand the contradictions of Soviet life leading up to and during the Cold War, the course will examine how the Soviets sought to rethink issues of class struggle, family structure, education, gender dynamics, race, religion, sexuality, and patriotism. We will consider key theoretical writings in addition to poetry and prose by major Russian and Russophone authors. Particular attention will be paid to underground cultures that arose in response to the repression of free speech, ethnic discrimination, and the Gulag prison system. This class consists of lectures and focused discussion of essays and films. It will be taught in Russian and is open to students who have successfully completed RUSS202, as well as to heritage and native speakers. Students can expect to practice speaking Russian and honing their writing skills. Credit: 0.5

REES260 Dostoevsky's BRAT'IA KARAMAZOVY

A seminar devoted to close reading of the original text of Dostoevsky's 1879-80 novel. All students will be required to read the entire text in English, and each week specific passages will be read in Russian. In class we will analyze and discuss the text in Russian. Students will give presentations about critical works related to the novel and to Dostoevsky's work in general. Dostoevsky's novel enters into a great dialogue with the political, historical, philosophical, and religious discourses that were prevalent in 19th-century Russia. Study of the novel entails learning the various languages of 19th-century Russian culture. Close reading of THE BROTHERS KARAMAZOV in Russian will teach the genres and styles that Dostoevsky weaves together in his great novel. Class will be conducted in Russian.

REES265 When the Empire Strikes Back: (Post) Colonial Theory and Fiction

Throughout its history, the rulers of Russia—the tsarist Russian Empire, the USSR, and now the Russian Federation—have been focused on the expansion of Russia's territory via the conquest, subjugation, and/or assimilation of neighboring peoples. Russia's colonial condition, expressed in fiction, film, and other media, will be the focus of this course. We will discuss global postcolonial theory (Chinua Achebe, Edward Said, Gayatri Spivak) and critical works with a focus on Russian, East European, and Eurasian Studies (Ewa Thompson, Vitaly Chernetsky, Alexander Etkind), in order to see how Russia's colonial being can be compared to other empires. We will discuss such topics as The Empire and the Other, Culture and Imperialism, Language Politics, and strategies of resistance to imperial hegemony. Via specific cases in literature and art, we will see how Russian culture processes the colonization of Alaska, Siberia, and the Caucasus. We will pay special attention to the discourses of Chukchi, Tartar, Chechen, Khanty, and Ukrainian authors who write back to the Empire. The readings will include the writings of J.M. Coetzee, Joseph Conrad, Mikhail Lermontov, Yuri Rytkheu, Guzel Yakhina, Yeremey Aipin, and Viktor Astafiev. The course is taught in English. No knowledge of Russian is required.

REES267 Parody: Humor, Artistic Evolution, and Restoration of the Sacred

Parody is a form of artistic expression that has played a major role in literary history, largely through its power of critical revision. According to Russian formalist theorists of the early 20th century, parody is a driving force in literary evolution. Linda Hutcheon's formulation, that parody is "repetition with critical distance, which marks difference rather than similarity," provides perhaps the broadest and most fruitful point of departure. The course will consider various definitions of parody offered by Russian and Western theorists. After examining parody as pure humor (Woody Allen, MAD magazine, Hot Fuzz) and parody as a tool of literary evolution (Gogol and Dostoevsky), we will study the more complicated case of "restorative parody," as exemplified in the medieval practice of *parodia sacra* (sacred parody), discussed by theorists Mikhail Bakhtin and Olga Freidenberg. We will look at the modern manifestation of *parodia sacra* in Andrew Lloyd Webber and Tim Rice's *Jesus Christ Superstar*, and of restorative parody in Lin-Manuel Miranda's *Hamilton*. The course will also include discussion of legal issues raised by parody, in the case of 2 Live Crew / Roy Orbison (which led to a 1994 Supreme Court decision, *Campbell v. Acuff-Rose Music*, in which Justice David Souter offered his own definition of parody). At the end of the semester, students will present their own research or creative projects related to parody.

REES268 Nabokov

Vladimir Nabokov—brilliant writer, outrageous literary gamesman, and cosmopolitan exile—is a towering figure of 20th-century literature. His most famous novel, *"Lolita,"* propelled him to international stardom and changed the transnational literary landscape. Child of a turbulent century, Nabokov wrote exquisite and at times disturbing prose in Russian and English, balancing between imaginary worlds and harsh realities. This seminar offers a sustained exploration of Nabokov's major Russian and American writings as well as film adaptations of his *"Despair"* (Rainer Werner Fassbinder) and *"Lolita"* (Stanley Kubrick). We will consider memory, exile, trauma, nostalgia, and identity as we read Nabokov, who saw existence as a "series of footnotes to a vast, obscure, unfinished masterpiece."

REES276 Contemporary Russian Literature

The course offers a survey of contemporary Russian literature, with a focus on the post-Soviet period. We will discuss how Russian literature relates, aesthetically and anthropologically, to the dynamic historical period roughly starting in 1985: perestroika, the collapse of the Soviet Union, the liberal 1990s and the emerging market economy, ethnic conflicts, and the era of Putinism. We will read works written in different aesthetic modes: documentary genre (Svetlana Alexievich, Maria Stepanova), Russian postmodern prose (Liudmila Petrushevskaya, Viktor Pelevin, Vladimir Sorokin), realist writers (German Sadulaev), as well as the most recent popular best-sellers and movies.

The course is taught in English. No knowledge of Russian is required.

REES277 Gogol and His Legacy: Witches, Con Men, and Runaway Noses

Nikolai Gogol (1809-1852), hailed as one of Russia's greatest and most distinctive writers, created a phantasmagorical world of devils and witches coexisting with the gritty details of life in Ukraine, St. Petersburg, and the Russian provinces.

Gogol's satirical observations delighted socially conscious contemporary critics, while his linguistic experimentation and subversion of the rules of logic inspired later modernist writers. Roughly half of the course is devoted to major writers of the twentieth century. We will consider Gogol's interest in the demonic; his complex identity as a bilingual writer claimed by both Ukraine and Russia as one of their greatest cultural figures; the influence of his formal and linguistic experimentation on later writers such as Dostoevsky, Nabokov, and Bulgakov, with his vision of the Devil visiting Soviet Moscow; and Gogol's reception by modern Russian and Western writers and critics. The course is conducted in English.

REES279 Chekhov: Prose vs. Drama

This course explores the oeuvre of Anton Chekhov (1860-1904), one of the most influential modern dramatists; the author of such classic plays as *The Seagull*, *Uncle Vanya*, *Three Sisters*, and *The Cherry Orchard*. Chekhov also wrote profound prose works, such as "Ward No. 6," "The Black Monk," "Rothschild's Violin," and "The Lady with a Lapdog."

As one of Chekhov's biographers put it, "Of all the Russian 'classics' he is, to non-Russians especially, the most approachable and the least alien, whether on the stage or the printed page. He lets his reader and spectator react as they wish, draw their own conclusions. He imposes no philosophy" (Donald Rayfield).

Poetic, dense, and elusive, Chekhov's writing continues to attract readers, spectators, and theater-makers of all kinds. Some of Chekhov's admirers believe that the quality of his fiction surpasses that of his most famous plays. This course approaches Chekhov by focusing on the tension between his prose and drama: what can a Chekhov short story accomplish that a Chekhov play cannot, and vice versa? After all, a concern with the purpose of human existence undergirds his short stories and plays alike. More specifically, studying Chekhov enables a fresh understanding of happiness and joy, of grief and sorrow in a relentlessly brutal world. An extraordinary storyteller capable of spotting dramatic conflict in the most mundane situations, Chekhov allows for rich discussions of the passage of time, conflict between generations, professional failure, the pressures of gender norms, and the costs of colonialism in late Russian Imperial society.

In addition to literary analysis, the course offers an opportunity to get acquainted with the basics of Chekhov's influence on contemporary performance. Expert guest lecturers will facilitate workshops on acting and directing Chekhov.

Film adaptations and recordings of stage performances will supplement readings. All readings and discussion are in English.

REES280 Russian Politics

The course begins with a brief review of the dynamics of the Soviet system and the reasons for its collapse in 1991. The traumatic transition of the 1990s raised profound questions about what conditions are necessary for the evolution of effective political and economic institutions. The chaos of the Yeltsin years was followed by a return to authoritarian rule under President Putin, although the long-run stability of the Putin system is also open to question. Students will study the political dynamics of modern-day Russia, Putin's regime and the opposition to the regime, as well as the logic of the events that led to Putin's full-scale aggression against Ukraine. Topics include political institutions, social movements, economic reforms, and foreign policy strategies.

REES282 Modern Shamanism: Ecstasy and Ancestors in the New Age

The wise and mysterious native shaman has long held a particular fascination for Western scholars of religion, but does this figure even exist? What does it mean to be a practicing shaman today? Beginning with Eliade's definition of "archaic ecstasy," we examine the idea of the shaman, their role in the New Age movement, and the challenges faced by contemporary indigenous shamans, from negotiating international intellectual property rights law to Ayahuasca tourism and environmental activism. Course materials are supplemented by A/V materials from the instructor's fieldwork in Siberia.

REES289 Indigenous Religions: Politics, Land, Healing

From wise old shamans to heroic pipeline protestors, the media is full of romantic representations of indigenous religion, but what do you really know beyond the stereotypes? If indigenous religion is just religion practiced by indigenous people, is it a category at all? Since the first days of colonialism the question of whether or not the "natives" have or are capable of having

religion has had political consequences. This class introduces students to the historical and political contexts within which indigenous peoples practice their religions, and critically engages with popular stereotypes. Using ethnography, fiction, critical theory, and the instructor's own fieldwork materials, we will examine some of the criteria by which indigenous religious practices have been romanticized or judged lacking by outsiders: What does an oral tradition sound like? What does it mean to engage in place-based religion? What is a "noble savage," what are sacred sites, animate landscapes, and what are some of the ways indigenous peoples really do relate to the environment in radically different ways? What are some of the contradictions and complications of multiculturalism and the politics of recognition when it comes to indigenous populations? While this is not a survey course, students will be introduced to case studies of indigenous religious practices from North America, Australia, and Siberia.

REES290 Tolstoy Part One: War and Peace and Other Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. This course will deal with the first half of Tolstoy's career, beginning with his experiments in the narration of consciousness ("A History of Yesterday" and Childhood) and in the narration of the experience of war (Sevastopol Stories). The main part of the course will be devoted to his epic War and Peace, in which the Napoleonic invasion of 1812 serves as the vehicle for considering the nature of Russian nationhood, the place of the individual in large historical events, and the very essence of how history should be narrated. Each of Tolstoy's best works is an innovative formal experiment that creates an unprecedented, new type of novel. This course will study how Tolstoy's writings both responded to and transcended their times by creating new novelistic forms and new truths within those forms. The course will be conducted in English.

REES291 Tolstoy Part Two: Anna Karenina and Later Works

Lev Tolstoy (1828 -1910) lived longer than any of the other major nineteenth-century Russian writers. His career began in the 1850s, as Russian literature was moving out of the age of Romanticism, and extended into the twentieth century, as modernism was becoming the dominant mode of Russian literature. His influence in Russia went far beyond literature. By the end of his life, he was the leader of a moral movement known as Tolstoyanism, the major tenets of which were pacifism, vegetarianism, and a resistance to state power verging on anarchism. This course begins with Tolstoy's mid-career masterpiece Anna Karenina, in which Tolstoy explores the problematic nature of the Russian family through the experiences of two main characters: an adulterous wife, for whom the novel is named, and an autobiographical stand-in, Konstantin Lyovin, who is a mouthpiece for many of Tolstoy's own concerns about the post-emancipation Russian economy and the pernicious influence of the West. We will also read Tolstoy's final major novel, Resurrection, which calls into question all the bases of modern society, with the prison system as the primary embodiment of societal evil. The course will be conducted in English.

REES296 Soundscapes of Islam

From the melodious recitation of the Qur'an and Sufi-inspired sung poetry to popular soundtracks of religious revival and resistance, the world of Islam has generated myriad sonic expressions across its diverse historical and geocultural milieus. While recognized for its affective and transformative powers, music has also been the subject of a longstanding polemic in Islamic societies, its moral and ethical status being debated and contested. This course will survey the soundscapes and ideoscapes of Islam, exploring the manifold roles and meanings assigned to music among Muslim communities. It will examine a range of sound practices and related discourses to discover the ways in which locally distinct religious and social customs have shaped concepts of music and sonic articulations of Muslim identity. We will locate the varied and shifting attitudes toward music and musicians within the context of political censorship, colonialism, nationalism, and cosmopolitan modernity, and consider the impact of current conflicts and migratory processes on the local-global circulation of religious ideologies and sounds. Drawing from selected case studies of sacred and secular performance, we will explore the musical construction of gender, place, and architecture; the role of media in the formation of Muslim 'counterpublics'; and the mediation of aesthetic sensibilities through style. Topics covered will include: views on music within the Islamic tradition (the Qur'an and Sunna, shari'a law, theology, and Sufism); philosophies and cosmologies of music in Islam; music at the courts of Islamic rulers; religious chant and art singing in the Middle East; sound, healing, and exorcism in North Africa; ritual, devotional, and mystical practices in Central Asia; Islamic performing arts in Indonesia; Sufi world music and Muslim pop and hip-hop across Asia and Africa, and among immigrants and refugees in Europe and North America. Throughout the course, Islam will be encountered as a widely diverse spiritual and sociocultural system that has been a source and stimulus for creativity among Muslim peoples worldwide.

REES297 Music of Central Asia: From Throat-singing to Heavy Metal

The music of the Hu was chosen as the soundtrack to Star Wars Jedi: Fallen Order because it sounded otherworldly to Western audiences. In fact, the Hu draw on ancient musical traditions from Central Asia, one of the most culturally and musically diverse areas of the world. This course introduces students to a wide range of music practices, genres, and styles in historically nomadic and sedentary regions of Central Asia: throat-singing, sounds of shamanic and Sufi Islamic rituals, epic performance, narrative instrumental playing, oral poetry competitions, folk and art singing, Western-influenced classical and popular music genres, including Central Asian repertoires of opera and symphony, Azerbaijani jazz, Uzbek estrada, Kazakh Q-pop and crossover music, Mongolian heavy metal and hip hop. The roles and meanings of music are discussed in relation to wider aspects of culture and social life, the impact of Soviet culture policies, post-Soviet national revival, and globalization.

The course includes a performance component. Students learn to play a variety of Kazakh and Kyrgyz musical instruments, including plucked and bowed lutes, a plucked zither, clay ocarinas, jaw harps, and percussion instruments. Previous musical training is not necessary. The course draws on extensive audiovisual materials and is open to students of all levels.

REES299 Imagining Communities: National Religions and Political Rituals

From the Catholic-Protestant troubles in Northern Ireland, Christian nationalism in Serbia, Hindu-Buddhist conflict in Sri Lanka, and the Taliban in Afghanistan, religious nationalism often produces virulent and violent conflict. Yet the Virgin of Guadeloupe is a national symbol of Mexico, Catholicism was central to the Polish Solidarity movement, and America defines itself as "one nation under God." How are we to understand the relationship between religion and national identity, and how do political rituals, both religious and secular, help form communities? Popular media and political science analysis define religious nationalism as dangerous and secular nationalism as good. We will investigate this claim over the course of the semester by asking what the study of religion and ritual can bring to the topic. Are religious and secular political rituals really as different as they seem? We will read and discuss the classic social theories of Samuel Huntington, Benedict Anderson, Emile Durkheim, Victor Turner, Clifford Geertz, and Talal Asad, and these readings will be interspersed with case studies that illustrate how these theories help us understand the world. Case studies include the war in Bosnia-Herzegovina, the arrest and trial of the punk band Pussy Riot in Russia, and the Yasukuni shrine in Japan, where the souls of kamikaze pilots and World War II war criminals are enshrined. In addition, students will pick a case study of their own for a research project. This project will be conducted through multiple small assignments over the course of the semester that will be combined into a final research paper and class presentation.

REES306 Animate Landscapes: Spirits and Sovereignty in Indigenous Religions

Scientific understandings of the world are grounded in a distinction between animate beings and inanimate matter, but people all over the world have understood land and landscapes as alive and filled with agency. Indigenous religious practices often include relationships with mountains, rivers, glaciers, and other "other-than-human persons." Using case studies drawn from North America, Siberia, and Mongolia, and the instructor's fieldwork materials with place beings in Buryatia, we will explore the different relationships human beings have with animate and sacred landscapes and think about the ramifications these relationships have for thinking about sovereignty over and in the "natural" world. The course may involve a 4 day/3 night trip to Penikese Island off Cape Cod for an immersive learning experience with the Gull Island Institute during fall break (details tbd). The trip will be fully funded with no cost to the students (hence why it is still tbd). Although the trip is not yet confirmed, please be aware that the trip will be required, and in order to take the class you must be available to participate in this travel during fall break (10/19-10/22).

REES321 Moscow/Berlin: Dreamworld and Catastrophe

The October Revolution of 1917 in Russia and the November Revolution of 1918 in Germany ushered in an era of imagining and building an anti-capitalist world based on the ideals of universal equality, freedom, and comradeship. Between World War I and World War II, Soviet Moscow and Weimar Berlin developed into centers of the international leftist movement that was committed to the cause of global proletarian revolution. While the revolutionary cause proved to be unattainable and costly, the period's artistic and intellectual achievements, known as the avant-garde, offer an extraordinary archive of utopian experimentation across borders.

Focusing on Moscow and Berlin, this course maps the socialist modernist aesthetic in interwar Europe and provides a comparative review of the transnational circulation of leftist and reactionary ideas registered in a variety of -isms: dadaism, expressionism, futurism, suprematism, and constructivism, as well as the New Objectivity, Bauhaus, and the practice of factography. The alignment of art and ideology will be explored through literature, art, and film and will consider the entanglements of egalitarian aspirations with nationalist agendas and emancipatory ideals with patriarchal residues. The course will also review the cultural production of Russian exiles living in Weimar Berlin and their conception of an "off-modern" path. The course will conclude with a discussion of the revolutionary avant-garde's legacy in the East Berlin underground and post-Soviet Moscow.

REES344 "If there is no God, then everything is permitted?" Moral Life in a Secular World

In Fyodor Dostoevsky's *The Brothers Karamazov*, Dmitri Karamazov famously poses the question of what would happen to mankind "without God and immortal life," asking whether this means that "all things are permitted." Made famous by Dostoevsky, the question of whether we can be moral without God has always haunted secularism and has consistently been the most vocal criticism of unbelief. From papal condemnations of secularism and "godless Soviets," to the contemporary consensus that belief in God is evidence of moral goodness and its absence a sign of a broken ethical barometer, the assumption has been that transcendental authority is all that stands between us and moral abyss. When the atrocities committed by "totalitarian" regimes are cited as evidence of this, it is only the most radical articulation of a broader narrative of secular modernity.

One of modernity's master narratives is that people go from being under the care of the church to being under the care of the state, and our focus will be on historical cases where the question of secular values was explicitly engaged by the state. We will examine individual and collective articulations of morality in three prominent models of secularism: American civil religion, French laïcité, and Communist official atheism. What constitutes the moral foundation of a world without God? Can religion's moral and spiritual function be performed by a different kind of belief system?

REES350 Twentieth-Century Russian Poetry (CLAC .50)

Taught in Russian, this course is dedicated to the reading of 20th-century Russian poetry in the original (Blok, Mayakovsky, Mandelstam, Akhmatova, Brodsky, Prigov, etc.). The course is appropriate for native speakers, heritage speakers, advanced and intermediate learners (with the minimum of four semesters of Russian).

REES352 The Communist Experience in the Soviet Union (CLAC.50)

Like the parent course, HIST353: *The Communist Experience in the 20th Century*, this CLAC course will engage with the problem of experience through a series of themes: subjectivity; engaging in the political process of building socialism; aesthetics; travel and tourism; East and West; race and ethnicity; production and consumption; time and space; political engagement and disengagement; science and technology; and emotions. We will work with sources from oral histories, diaries, film, television, and the press. The final project would involve a close reading and paper on a theme covered in class using both primary and preapproved secondary sources in Russian. The student language background appropriate for this class is (preferably advanced) intermediate to native.

REES353 The Communist Experience in the 20th Century

Two decades have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 Revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union, but also beyond it (in Eastern Europe and Asia). In the global conflict between capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these

ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes?

REES353Z The Communist Experience in the Twentieth Century

More than thirty years have passed since the collapse of Communism, its empire, and its utopian vision of the kingdom of heaven on Earth. Indeed, the Communist collapse was heralded as not just the end of the Cold War but the end of history itself. Yet how do we understand the nature of the Communist way of life, the causes of its decline, and the meaning of its demise? This course will trace the development of Communism's answer to capitalist modernity from the 1917 revolution through the Soviet collapse. It will seek to shed light on the birth, life, and death of Communist modernity through history, literature, and art, by exploring the world socialism created as an ideological model and a way of life. The emphasis of the course will be on the lived experience of Communism, primarily within the Soviet Union but also beyond it (in Eastern Europe and Asia). In the global conflict between Capitalism and Communism, how did people understand the competing demands of ideology and reality, individual and society, private and public, production and consumption, labor and leisure? How did the state manage the contradictions that arose when lofty ideologies encountered everyday life, and how did citizens make sense of these ideological transformations? What killed Communism: bombs and diplomacy, or refrigerators and Finnish shoes? This course is an intensive reading, research, and writing seminar.

- This course is held entirely online and is a hybrid synchronous and asynchronous format.

- You should be prepared to spend at least 4-6 hours/day on class work.

- There is a class every day: on Mondays and Thursdays we will meet synchronously on Zoom at our regular class time (3:30-5:10 pm); on Tuesdays, Wednesdays, and Fridays, the format will be asynchronous (meaning you can engage with the day's materials at your own pace within a 24-hour window).

- You are expected to participate in each class having read the assigned material and reflected on them in your forum comments. Each day's online discussion will cover the topic and materials of the day.

- Each day you are expected to post at least one original comment of your own, and to respond to at least one comment by a classmate.

- The questions will be posted by 12 pm the day of the class, and the forum will be open for 24 hours, until 12 pm the following day.

- Be prepared to engage with the sources critically--to raise important issues, ask for clarification, and/or propose alternative interpretations, and to bring your own questions into the discussion. When possible, point to specific examples in the text and reference sources/page numbers to make the discussion easier to navigate for the class.

- Your active engagement in the seminar--both on the forum and in the synchronous sessions--is absolutely essential.

REES377 Perspectives in Arts as Culture: Ukrainian Arts and Language as Resistance

Throughout history, arts and language have been central to Ukrainian resilience. This course will introduce students to basic elements of the Ukrainian language as well as the rich tradition of Ukrainian arts--dance, theater, poetry, literature, visual arts and crafts--and the way they have survived and thrived despite 400 years of censorship and persecution. Each week, one class will focus on the basics of the Ukrainian language, its history as a vital element of the Ukrainian culture, as well as current national language policy and practice. The second class will explore the ways that arts in Ukraine foster psychosocial, physical, and political resilience in the face of crisis. Students will engage with traditional arts and crafts, learn about leading experimental artists (1700s-present) and their role in major art movements in history, hear from an array of guest artists from Ukraine, and complete a final creative project that explores the current political moment and conflict in Ukraine.

SCIENCE IN SOCIETY PROGRAM (SISP)

SISP127F War and Technology (FYS)

In this class, we will discuss technological changes caused by war and accompanying social changes and ethical debates in both militaries and civilian societies. Topics will include technological changes in warfare and weapons, as well as the ways in which societies have responded to new injuries and health issues resulting from war. Subjects may include the development of machine guns, trench warfare, chemical warfare, nuclear warfare, drones, cyber-warfare, and surveillance technologies, in addition to the professionalization of nursing, military psychiatry, medical experimentation, environmental contamination, and disability and health issues for veterans and civilians. We will also talk about the implementation in the civilian world of technologies developed or expanded during war. We will discuss cases from across the globe, focusing chronologically on 1850 to the present. Readings may include selections from Margaret Humphreys, John Ellis, Carol Byerly, Warwick Anderson, Beth Linker, Paul Lerner, Jessica Adler, Edmund Russell, Charles Perrow, Susan Smith, Susan Lindee, Jessica Wang, Kelly Moore, Janet Abbate, Stephen Graham, and others.

SISP135F Skin, Sex, State, Software: Surveillance & Society (FYS)

Scopophilia is the derivation of pleasure from looking. What pleasures does the surveillance state gain from looking at us? From feeling and documenting us? How do privacy activists fight back against such surveillance, and what might be wrong with privacy rights discourse? Which groups are always already surveilled? In this class, students will play with notions of surveillance—including sousveillance, lateral surveillance, and counter surveillance—as engaged by queer and feminist studies, the cultural anthropology of expertise, and social studies of science and technology. We will draw on case studies ranging from police technologies, facial recognition software, Pornhub's data collection projects, TSA airport body scanners, Facebook ads, science fiction like Black Mirror, and more to understand how bodies, races, genders, and sexualities are made known and contested by activists, artists, corporations, and governments. Students will also collect data for a creative personal surveillance project culminating at the end of the quarter.

SISP204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term "Anthropocene," questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from "capitalist ruins" to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of "non-judgmental attention" to their critical engagement with the Anthropocene.

SISP208 Technologies of Time

Tracking the rhythms, cycles, and ruptures of collective life is essential for studies of sociocultural and environmental dynamics. Yet such studies are mostly undertaken with the unquestioned assumption that Western apparatuses of time reckoning and historical periodization can be applied as universal and stable frames of reference for all kinds of phenomena. Temporal units of years, months, days, minutes are used, rendering insensible relations that do not align with such metrics. These simplifying moves limit our capacity to sense and understand continuity and change; they place many lives and landscapes at risk.

This course draws from the social and ecological sciences, humanities, and arts to reimagine such simplifications. Through readings, creative exercises, and field trips, students are invited to notice, record, and engage with multiple temporalities of more-than-human worlds. For final projects, students will

research and design speculative timekeeping devices or time machines for worlds otherwise.

SISP215 Metabolism and Technoscience

This course will investigate the scientific idea of metabolism through the lens of technoscience. Metabolism is a flexible and mobile scientific idea, one that has been applied at the micro-level of analysis within biological organisms, at the meso-level of social collectivities, and at the macro-level of global ecologies. Metabolism encompasses all of the biological and technosocial processes through which bodies (both human and not human) and societies (again, human and not) create and use nutrients, medicines, toxins, and fuels. The lens of technoscience enables us to investigate the technological and scientific practices that define and drive metabolic processes within sciences, cultures, and political economies. These processes implicate forces of production, consumption, labor, absorption, medicalization, appropriation, expansion, growth, surveillance, regulation, and enumeration. Accordingly, as we will learn, metabolism is also a profoundly political process that is inextricably linked to systems that create structural and symbolic violence as well as modes of resistance and struggle. In these contexts, we will interpret some of the most pressing metabolic crises facing human societies, including ecological disaster, industrial food regimes, metabolic health problems, and industrial-scale pollution.

SISP236 Race, Gender, and Medicine in U.S. History

This course will examine the intersections of race, gender, public health, and medicine in the United States, largely focusing on the 20th century. Topics will include the racialization of certain diseases, race and health care access, and the history of African Americans in health care professions and health care activism. Students will learn about the history of medicine and public health in the United States, African American history, and historical research methods. We will consider the built environment, the law, and federal and local politics as they relate to medical care in the United States. By the end of this course, you will gain further understanding of some of the major currents in the history of medicine and public health in the United States; you will make connections between race and health care experiences in the U.S.; you will be able to discuss

historical research methods and appraise the values and limitations of various kinds of sources. Possible readings may include selections from Sowande' Mustakeem, Rana Hogarth, Sharla Fett, Deirdre Cooper Owens, Jim Downs, Tera Hunter, Samuel K. Roberts, Susan L. Smith, Natalia Molina, Nayan Shah, Wendy Kline, Vanessa Gamble, Jonathan Metzl, Susan Reverby, Alondra Nelson, Keith Walloo, Jennifer Nelson, and Jennifer Brier.

Gen Ed Area: **SBS-SISP**

Prereq: **None**

SISP245 Ethnography and Design

Exercising humility and developing methods of meaningful engagement are essential to becoming an effective ethnographer and designer. Collaboration with users provides knowledge that allows designers to imagine artifacts, places, and systems that are thoughtfully enhanced or radically new. This course rethinks power dynamics to better understand how to design both for and with other people. With successful completion of this course students will be able to demonstrate competence in developing, refining, and communicating research interests in a committed, reflexive manner. They will gain an understanding of the strategic and tactical value of design and a sense of the practical problems involved in realizing design solutions and responses that are attuned to the needs of both an institution and individual users. Students will gain experience not only in theoretically framing social and political issues as these are expressed through design, but also in understanding the methodological tools needed to translate problems into creative interventions that are user-centered and compassionate.

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Identical With: **CSPL245**

Prereq: **None**

SISP250 Sociology of Knowledge

To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SISP300 Black Phoenix Rising: Death and Resurrection of Black Lives

The Black Lives Matter Movement has renewed our collective need to theorize the value of black lives within a deluge of death and disappearance in black communities. This movement is part of a deep transnational tradition in black radical praxis that aims to transform scholarly, activist, and public discourse and public policies concerning the systemic and epistemic effects of institutional racism and the prospects for antiracist futures. How might we envision a black radical praxis that simultaneously recognizes the vitality of black lives and challenges the cultural ideas and social practices that generate and justify black people's death and suffering? This seminar traces a genealogy of black radical praxis that interrogates the necropolitics of race and positions this system of power against the prospect of thriving black people. In doing so, the course erects an interdisciplinary theoretical framework that features scholarship in critical race science studies, intersectionality, and transnational cultural studies as they inform how a black radical praxis can contribute to the uprising and raising up of black communities.

SISP306 Precision Medicine: A Biomedical Revolution

Drawing insights from history, sociology, and anthropology, this course will examine the rise of precision medicine and its sociomedical implications. An emerging biomedical paradigm, the aim of precision medicine is to develop individually tailored approaches to disease prevention and treatment through

the integration of genomic and other molecular sciences into research and practice. The course will explore the promises that have underpinned major worldwide investments in the precision approach, interrogate the concept of "precision" and the semantic work it performs within medicine and beyond, investigate the paradigm's implications for understandings of race and other key forms of human difference, and examine the challenges it presents for the pursuit of health justice.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

SISP309 Multispecies Worldbuilding: The Chestnut Project

How do forests think (Kohn)? Do rocks listen (Povinelli)? Can insects speak (Mitchell)? How do fungi make history (Tsing)? Should trees have rights (Stone)? These are some of the most exciting questions percolating in the humanities, arts, and social/natural sciences today. They disrupt Western colonial notions of what it means to be human, while also calling for methods, theories, and apparatuses that might imagine and build more livable multispecies worlds.

This course has two goals: (1) introduce students to key texts on more-than-human, more-than-Western ontologies, particularly from the fields of multispecies/cyborg anthropology, science and technology studies, biology, and environmental humanities; (2) engage students in transdisciplinary research on the American chestnut (*Castanea dentata*), a tree species once known as the "queen of forests" from the Appalachian mountains to the Mississippi river until fungi wiped them out in the early twentieth century. This course will lay the groundwork for students to participate in current debates and projects to restore a transgenic version of the American chestnut in the eastern United States within the next five years.

Offering: **Host**

Grading: **A-F**

SISP310 Botanical STS: Plants as Nature, Capital, Empire

Interest in the social and technoscientific lives of plants has been rising. Described as the Plant Turn or Critical/Transnational Plant Studies, this multidisciplinary field of study encompasses the social and environmental sciences, experimental humanities, and visual/sonic/literary arts. In this course, we will delve into contemporary works that situate the relationship between plants and botanical studies at the center of critical analysis and creative practice. What happens to notions of agency/intelligence, property/exchange, and power/knowledge when we think with and about plants? We will explore answers to these questions by engaging in three types of activities: readings and film screenings, field visits to botanical collections and agricultural stations, and online use of global plant databases.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

SISP311 Media and Environment: In/Sensible Worlds

In this seminar, we will examine the relationship between media technologies, sensory apparatuses, and changing environments. How do various kinds of media shape perceptions and interactions with our surroundings, multispecies ecologies, and planet Earth? How might we study the environment AS media? These seemingly simple questions matter because, like never before, media

and environment co-produce who/what becomes sensible or insensible--and, ultimately, available or not available for life. This seminar will include readings from the fields of Critical Media and Communication Studies, Feminist/Postcolonial Science, and Technology Studies, Environmental/Digital Arts, and Humanities. Importantly, we will examine a range of creative media projects that explore ecology, environment, and earthly survival: films, games, sensors, and web projects.

Offering: **Host**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

SISP317 Sexuality, Gender, and Science

This course will consider how the concepts of gender and sexuality have been treated in scientific fields, focusing primarily on the 19th and 20th centuries. We will examine the history of ideas about gender and sexuality as reflected in the development of sexology, theories of homosexuality, psychology, and endocrinology. We will also discuss contraceptive and reproductive technologies, the inclusion of women in clinical trials, women in scientific professions, and recent studies that use algorithmic predictions of sex or sexual orientation. Readings may include selections from Sigmund Freud, Siobhan Somerville, Emily Martin, Sarah Igo, Laura Briggs, Ronald Bayer, Sandra Morgen, David Serlin, Allan Bérubé, Dorothy Roberts, Johanna Schoen, Jennifer Terry, Carolyn Herbst Lewis, Steven Epstein, Riley Snorton, Rebecca Jordan-Young, Mar Hicks, and Safiya Noble.

SISP325 TechnoPrisons: Corrections, Technology, and Society

The United States currently incarcerates more of its citizens than any other nation, and most of them are members of disadvantaged social groups. How does our government practically accomplish mass incarceration? This first-year seminar (FYS) examines prisons as technologies and the role that specific technologies play in the U.S. prison system. To say that prisons are technologies means that prisons operate as an architectural system that is designed to hold people captive within enclosed social spaces. At the same time, prisons are the location for multiple kinds of technological systems including surveillance systems, biomedical technologies, classification and administrative technologies, and military technologies. This seminar introduces basic concepts within science and technology studies (STS), criminology, and sociology to investigate how prison happens.

Credits: **1.00**

Gen Ed Area: **SBS-SISP**

Prereq: **None**

SISP331 Decolonizing Ecocinema: Aesthetics and Politics of Disaster

This seminar will focus on twelve experimental documentary films as critical texts that situate, theorize, and decolonize representations of disaster. What the films share is an insistence that struggles for social and environmental justice are deeply entangled and thus require "new figures and tactics" (Povinelli). We will consider how representation is composed from choices made at two levels: aesthetic forms and specialized languages articulated through the camera and editing software; and political calls for accountability and embodied, embedded, inherited praxis. We will unpack how the medium of film alters and stylizes engagements between subjects positioned behind, in front of, prior to, and after the camera frames, records, and plays back images and sounds.

The films will take us to more-than-human worlds, questioning how we engage with species and landscapes, history and technology, power and language. A partial list of characters includes wild bees in Hawaii (Swarm Season, Christman 2019); steel mines in Mongolia (Behemoth, Liang 2015); colonial waters in Tierra del Fuego (Pearl Button, Guzman 2015); shepherds in Montana (Sweetgrass, Barbash and Castaing-Taylor 2010); farmers in Thailand (Agrarian Utopia, Raksasad 2009); and stray cats in Istanbul (Kedi, Torun 2016). As companions to the films, we will read essays from post/decolonial media/science studies, visual anthropology, and environmental humanities.

SISP356 Afro-Caribbean Philosophy

This seminar focuses on the philosophical production of Afro-Caribbean thinkers since the middle of the twentieth-century. We focus on close readings of Frantz Fanon, Édouard Glissant, and Sylvia Wynter alongside others to consider a Caribbean approach to questions and problems of modernity, relationality, space, race, belonging, the human, creolization, language, anti-colonialism, and liberation. We consider the roots of some of these questions in the work of earlier thinkers such as Aimé Césaire, as well as contemporary influences of their work across and beyond the Caribbean. We will work beyond the linguistic divisions of the Francophone, Hispanophone, or Anglophone Caribbean to consider conversations in common across the archipelago, in a multiplicity of languages.

SISP357 AI, Algorithms, & Power

This course explores artificial intelligence (AI) as a cultural, sociopolitical, and literary object. Course readings will begin with the observations of anthropologists at the post-WWII Macy Conferences on cybernetics. Students will put algorithmic data mining and machine learning in historical context, exploring classification systems and intelligence testing. Students will also examine the reanimation of the artificial human in newer discourses of AI, such as big data and predictive policing, virtual reality and drone strikes in commercial and military operations, health and assistive technology, and play and labor on platforms like Mechanical Turk. Course texts will include speculative fiction on artificial life, social theories of simulation and virtuality, and new work from queer studies and critical race studies interrogating algorithmic bias and the testing and classification of humanity.

SISP366 Bodies, Machines, and Meaning: Cultural Studies of the Sciences

Cultural studies of the sciences shift the focus of interdisciplinary science studies from understanding the sciences as producing and justifying knowledge to understanding them as meaning-making and world-transforming practices. Cultural studies attend to scientific meaning-making at multiple levels, and to the interactions among them: concrete material relations among bodies, technologies, and their settings or situations; verbal, visual, corporeal, mathematical, and other expressive performances; and social, cultural, or political institutions, practices, boundaries, and movements across and within

them. Cultural studies of science also emphasizes political engagement with scientific practices and their broader cultural entanglements. This course explores what it means to do cultural studies of science, with a focus on three interrelated themes: alternative conceptions of what it means to make claims and reason about what happens in "nature"; case studies in how scientific meaning and understanding are embodied and prosthetically extended technologically; and some specific conceptual and material relations among scientific understandings of life, bodies, sex, reproduction, and being human.

 Gen Ed Area: **SBS-SOC**
 Prereq: **SOC151**

SOC206 Introduction to Journalism: Constructing the News

Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea—or ideology—these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work. Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories.

This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro's anthology *Shaking the Foundations: 200 Years of Investigative Journalism in America*. These include readings from early Black press pioneers (Ida B. Wells, Marvel Cooke), muckrakers and investigative journalists (Lincoln Steffens, Vera Connolly), and pathbreaking science journalism (Rachel Carson's *Silent Spring*). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace's *The View from Somewhere: Undoing the Myth of Journalistic Objectivity* and Ben Smith's, *Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral*.

SOC231 Sociology of Crime and Punishment

This course provides an introduction to the sociological study of crime and punishment. Crime is rarely far from news headlines or the public imagination. Every day, reports of drug dealing, muggings, and homicide fuel anxiety and debate about the problems of law and order. Here, we consider such debates in the context of both a vision for a just society and the everyday workings of the criminal justice system. The course is divided into three sections. We begin with an introduction to the historical meanings and measures of crime in society and then situate the modern U.S. within this history. In part two, we become familiar with the major ways that social scientists think about criminality and crime prevention. In part three, we turn to considerations of punishment. We ask how punishment is conceptualized in the U.S. and other nations, whether the

American system of mass imprisonment is effective, and how we might envision improvements and alternatives.

SOC234 Media and Society

This course offers an introduction to the study of media, with a focus on critical social perspectives and controversies. A variety of media formats will be considered, with particular attention to print and visual images. The course takes up questions of representation, participation, consumerism, pleasure, and power that have dominated sociological and cultural studies approaches to media since the Frankfurt School. Topics will include advertising and branding, pornography, photojournalism, alternative media, social control, stereotypes, and objectification. Students will engage historical and theoretical texts and will be asked to participate in media processes, including production, interpretation, and critique.

SOC240 Comparative Race and Ethnicity

This course is an introduction to the sociological study of race and ethnicity in comparative and historical perspective. This is not a course about the experiences of particular races or ethnic groups in any particular part of the world. Rather, this course explores how ideas about racial difference take hold in different parts of the world in different ways and with very different consequences. Through comparisons of Western and non-Western societies, we will investigate how race and ethnicity operate as markers of social exclusion in distinctive ways.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **SBS-SOC**
 Prereq: **SOC151**

SOC241 Mental Illness and Society

Psychiatric disorders are commonly viewed through a purely biomedical and/or a psychological framework. In this course, we will apply a sociological imagination to the topic and interrogate the ways in which mental illness, often seen as a supremely private "personal trouble," is also a public issue. We will read the works of classic and contemporary scholars, but we will also use memoirs and films to sensitize us to the experience of mental illness itself. We will explore mental illness as a social construction, stigma, and labeling theory and explore issues of gender, race, class, and sexual orientation in mental illness.

Offering: **Host**
 Grading: **A-F**
 Credits: **1.00**
 Gen Ed Area: **SBS-SOC**

SOC243 Being Together: Affect, Care and the Politics of Experimental Kinship

This course looks at unique and experimental forms of kinship, community, and intimacy through the implicit and explicit challenges they offer to the foundational role of the privatized family unit to civic and economic life. We will look at historical examples of collectives, communes, and intentional communities to explore the challenges and possibilities of alternative forms of being, living, and working together. This course will also focus on college as a perhaps unique context for work about and involving friendship and collaboration, and will involve students in creative and analytical projects. There

will be a specific focus on digital culture and social media, aging and vulnerability, interspecies companionship, and the politics of affect.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC244 Feminist and Queer Theories of Social Reproduction

This course will introduce students to the study of social reproduction and power with an emphasis on feminist, queer, and transnational approaches to inquiry and action. We will begin by exploring key methodologies and theoretical framings for understanding contemporary "American" cultural, social, and political formations both within and beyond the territorial U.S., focusing on the effectiveness of discursive and historical modes of critical analysis. The subsequent sections of the course will turn to three case studies of the historical routes and transnational implications of U.S.-based political discourses around (1) population control and reproductive justice, (2) abolition and the prison-industrial complex, and (3) debt and higher education. By engaging with each area of inquiry through theoretical, historical, and grounded activist texts, we will think through the possibilities for utilizing academic work in concert with movement-based engaged scholarship to address the uneven distribution of life chances and the potential of imagining the world otherwise.

Prereq: **None**

SOC246 Social Movements

How, when, and why do social movements emerge? What motivates individuals to participate? What transforms problems into grievances and grievances to action? How should movements be organized, and what tactics should they use? What factors explain movement success and failure (and how should success and failure be defined)? What is a social movement, anyway? This course seeks to introduce some of the major ways scholars have approached such questions and, at the same time, to give a sense of both the high drama and the everyday details of social movement activism, using historical and sociological case studies. Course readings concentrate on U.S. movements, including racial justice, class, gender, and sexuality-based activism.

SOC247 Drugs, Culture, and Society

This course addresses a variety of issues ranging from the social variation in and construction of drug experiences; the nature of scientific knowledge regarding drug use and the brain; the global trade in drugs and its relationship to histories of colonialism and contemporary forms of Western hegemony; notions of health, harm, and rehabilitation; and the various strategies that contemporary states rely upon in addressing issues pertaining to drug use (particularly criminal justice measures and interventions focused on harm reduction). The course places particular emphasis on the ways drug use is framed in relation to questions of freedom, justice, and the self, ultimately forming a part of a disciplinary apparatus that impacts everyone, whether we directly use drugs or not.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC255 Sociology of Knowledge

To map power-knowledge relationships, the sociology of knowledge grounds an analysis of knowledge in terms of social structures, the sets of patterned practices that define and give meaning to social life at individual, communal, and institutional levels. In the broadest sense, the sociology of knowledge is concerned with the relationship between the (epistemic) content and the social context of knowledge. How was knowledge produced and with what institutional resources? Who produced knowledge and why did they produce it? Who benefits from the circulation of knowledge? What effects in the world does knowledge engender? Our basic course objectives are to a) introduce sociology of knowledge as a form of critical inquiry, b) describe and distinguish the approaches and research methods associated with the sociology of knowledge, and c) learn how to analyze knowledge and knowledge-making practices in their social context using these methods.

SOC256 Sex Work and Sex Trafficking: Empowerment, Exploitation, and the Politics of Sex

This course explores the history, politics, and social meaning of sex work. Focusing particularly but not exclusively upon prostitution, we will pay careful attention to the diverse range of social experiences that form sex work, as well as the way in which prostitution is used as a governing metaphor within sexual relations more generally. Some questions the course will consider: How has sex work changed over time, and what do these changes tell us about both the nature of sex work and about the broader society? In what ways is sex work similar to or different from other forms of service labor or other types of intimate relationship? How do questions of race, class, sexuality, and gender alter the meaning and experience of sex work? What sorts of desires and expectations do clients bring to interactions with sex workers, and in what ways have these shifted over time? Recent controversies concerning sex trafficking and underage prostitution will also be addressed, as will the effects of various regulatory schemes that have been developed around the world.

SOC259 Cultural Studies of Health

Nothing is more fundamental to the human condition than our most basic right--the right to healthy life. Tragically, this right is inequitably distributed across human bodies and populations, especially along axes of race, gender, class, disability, age, and nationality. In fact, persons residing in the U.S. do not have a right to healthy life. Issues of health and illness are, quite literally, matters of life and death that are shaped by broader political and economic institutions in human societies. In neoliberal nation states like the U.S., the guardian of the right to live a healthy life is a highly bureaucratic and technological form of corporate medicine. Medicine comprises a network of social institutions and technoscientific practices that people have created and use to diagnose and heal our bodily and psychic ills. While the practice of medicine has produced dramatic improvements in life expectancy and quality of life for billions of people, most people on the planet do not have access to basic medical care. Who thrives, who gets sick, who dies, and why constitute core questions for social justice. This course investigates the complex embroidery of biosocial and cultural processes that shape the unequal experiences and meanings of health. Cultural studies of health document the role of medicine as a great instrument of power that both generates and alleviates suffering. As more and more areas of social life and parts of bodies are falling under the control of medicine (a process called medicalization), we must ask, What are the dynamics and implications of medicalization for human societies and cultures? Drawing on provocative readings and media from diverse fields in sociology and cultural studies of science, technology, and medicine, this course will investigate these questions and more with an emphasis on the answers to them might contribute to social justice and improve the conditions necessary for human thriving.

SOC260 Sound and Screen

This course explores contemporary developments in the study of media, focusing on three primary areas--music, video games, and the Internet--that depart from and sometimes challenge earlier frameworks rooted in visual and narrative forms. In the first unit of the course, we will examine the relation

of music to identity formation, as well as revisit media scholars' longstanding interest in questions of meaning in light of music's particular characteristics. In the second unit of the course, we will investigate the social dimensions of video game play, focusing on the often-overlooked seriousness of play and on the unique properties of games as rule-bound systems. In the third unit, we will review and "unpack" some of the social, psychological, economic, and bodily transformations thought to be instigated by Internet use. Overall, the course aims to revisit sociologists' and media scholars' preoccupation with power, inequality, freedom, autonomy, and agency in light of the contemporary prevalence and particular characteristics of sonic and interactive media.

Prereq: **SOC151**

SOC262 The Rise and Fall of the Nuclear Family

In the United States, the "American Dream" family has often been thought to include a heterosexual, two-parent household with 2.5 kids, a house in the suburbs, and a white picket fence. While this is no longer the dominant family form, this "ideal" still holds great symbolic meaning, and non-normative family forms continue to be stigmatized and pathologized or rendered illegitimate and not considered as family. This course will examine the changing dynamics of families in the US and worldwide. We will consider how families function both within and beyond the context of the nuclear family as well as the political, legal, and social implications of who counts as family. We will focus on how race, class, gender, and sexuality shape family life and we will explore themes including marriage promotion policy, the division of household labor, gender inequality, intergenerational families, non-biogenetic kinship, families of choice, and more. Course texts will include sociological, historical, and queer theory approaches, in addition to sources from popular media. Through reading and engaging with literature on diverse family forms, this course aims to use a critical lens to approach the concept of the nuclear family and to consider the future possibilities of the family as a social institution.

SOC265 From Shirtwaists to Hoodies: Fashion and Public Life

Pictured prevalently and worn close to the body, fashion is a powerful and personal means of expression and documenting public life. This course presents a loose chronology of fashion, from the twentieth century to today, through a selection of themes that will allow students to consider it in terms of its social, political, economic and aesthetic impact. Through the interplay of image, clothing, and text, each week, we will explore the fashion industry from various perspectives, examining the key role makers and consumers play in constructing fashion both historically and today. Specifically, we will question the ways we deploy dress and style to document public life, from the personal to the political, and how it informs our material and visual relationships with the world. In addition to lectures and readings discussion, class time will be allotted to students' fashion documentation projects. Fashion theory will also be introduced to ground our explorations of fashion, variously as a cultural object, embodied practice, site of technological innovation, and tool for shaping one's identity.

Prereq: **None**

SOC266 The Social Life of Data

All over the world, actions, feelings, and thoughts are becoming data. Divining future desires and anxieties, promiscuous digital networks collect and collate a wide variety of everyday data, marking populations as risky or profitable. Participation in these networks is frequently mandatory in order to access a wide variety of political, social, and economic opportunities. Even if you manage to delete your account or withdraw from these networks, digital systems leave ghostly activity traces or zombie profiles waiting to come back to life. The rise of these data systems offers profound sociological and philosophical challenges to how we understand social life, power, control, memory, conscious thought, and even the nature of humanity and the environment.

This course engages with the impact of data infrastructures and digital technologies in a non-deterministic fashion, which is to say that technical systems and structures, while powerful, do not fully determine social possibility. Focusing on historical, established, and emergent data systems, we look to understand technology as a field of affordance and prohibition, with feelings, thoughts, and politics dynamically interacting with rapidly modulating standards, norms, and methods. Course themes address a variety of theoretical topics that have been central to the social study of science and technology, including the efficacy of critique in encountering information processing systems.

SOC269 Bad Sex

In a 2003 op-ed in support of same-sex marriage, conservative New York Times columnist David Brooks writes, "Anybody who has several sexual partners in a year is committing spiritual suicide. He or she is ripping the veil from all that is private and delicate in oneself, and pulverizing it in an assembly line of selfish sensations." Brooks is far from alone in this critique of promiscuity. What is it about "casual encounters" and hookup culture that so disturbs? Why is sex a magnet for anxieties about selfishness and irresponsibility? Why do we think of anonymity and intimacy in sex as mutually exclusive? What do we make of desires that are politically troubling? On what basis are particular forms of sex and sexuality vilified or valued? Is love the antidote to sexual hedonism, or hedonism in disguise? This course will consider widespread cultural anxieties about sex, sexuality, desire, and pleasure from sociological and psychoanalytic perspectives.

SOC270 Urban Societies

This course is a study of the social construction of the city focused primarily on the U.S. context. It examines various themes related to the development of modern cities beginning with the consolidation of capitalism during the industrial revolution. The class will consider the distinct experience of urban life as opposed to other modes of existence, or what Louis Wirth calls "Urbanism as a Way of Life." In addition, students will look at forms of stratification such as race and class inequality and their relationship to spatial issues such as suburbanization and revitalization. Also considered are contemporary issues such as globalization, the revival or renewal process of many American cities, environmental issues, as well as the effect of new media on how we conceptualize the city. All of this will be done by focusing on the relationship between individual experiences and the effect of the urban environment

on issues of identity construction and interpersonal relations. In order to develop critical thinking and engagement around these urban issues, the course emphasizes weekly writings and class participation in development towards a final paper.

Offering: **Host**

Grading: **A-F**

Gen Ed Area: **SBS-SOC**

Prereq: **SOC151**

SOC277 Bored in the House: Work, Leisure, and the Domestic Mundane

For many of us, the Covid epidemic fundamentally changed our relationship to the home: extended periods of isolation and social distance have crystallized an understanding of the domestic as undergoing a period of flux or perhaps even crisis. This course considers the boundary problems of labor, home, relationships, and free time while doing historical and contemporary research on boredom, disassociation, and play.

More than ever we must engage with the vanishing material and psychic separations between work and leisure, the badly needed reimagining of public and private not anchored in a spectral domestic privacy, and the foundational dynamics of class, race, sexuality, gender, capacity, and institutionalized violence that structure where we can live, work, and play. Special topics of focus will include boredom as a technique of torture, social media and the gamification of leisure, content moderation of sex and violence, and the domestication of travel and tourism.

We will also use this course as an exercise in boredom praxis. We will do a bit of thinking about what we do when we are bored, and why, and will try to sit with and direct our boredom in gently experimental ways. This also extends to critically thinking about how we do work in this class, and our techniques and tactics of maintaining leisure time in academia.

Offering: **Host**

SOC280 Abolition and Social Praxis

This course will examine some of the analyses of society, social power, and societal reform advanced and practiced by diverse activists who organize their work around the theme of abolition. Inspired by activist efforts to eliminate prisons and policing, abolition is here understood as an attempt to link a

worldview that advocates for the disassembly of existing, oppressive social structures combined with efforts to generate new, more liberatory forms of social relationship in the here and now. As a form of activism, abolition thus brings utopian dreams to bear upon concrete practice, seeking to generate new structures of agency and pointing toward ways in which liberal notions of consent occlude deep forms of structural power and implicit constraint. Students will be asked to take on an activist project as part of the course.

SOC285 The Sociology of Reality TV: Race, Colorism, and Xenophobia

The course will explore the ways in which reality television can help us reflect on how different social identifiers such as race, skin complexion, and ethnicity operate within American culture. For many, reality TV can be easily dismissed as a guilty pleasure, escapism, or "trashy" (e.g., Dehnart, n.d.). While reality television can be labeled as an innocuous pastime, its importance and impact in American culture cannot be overlooked or denied. Moreover, the way this form of entertainment reflects American behaviors and shapes or reaffirms thinking within our society around sociological descriptors like race and culture should be studied. Through a critical lens, we will delve into the ways this genre of television portrays women of color, the audiences who watch reality TV, and whether portability exists on the networks who help create these shows.

SOC288 The Medium and the Message

Do you like to draw autobiographical comics, record bedroom pop songs, make queer zines, write ChatGPT poetry, choreograph burlesque performances, design and print ugly posters, sew avant-garde garments, create absurdist TikToks, or produce niche podcasts? This seminar is for students who want to think through the sociological content, implications, and impact of their creative work. In the course, students will develop and make substantial progress on a creative project that addresses sociological themes in its form and/or content. Students need not have any formal training, but should have demonstrated experience in their preferred medium. Course texts will address sociological issues surrounding cultural production, including representation, dissemination, and professionalization. Class sessions will be divided between discussion of readings and example work, experimental exercises, workshoping, and student presentations.

To apply for the seminar, students should submit the following: 1) a description of the specific project they wish to develop over the semester, keeping in mind that they will be expected to make and share progress each week; 2) a sample of previous work that demonstrates familiarity with any necessary technology (software, instruments, tools, recording devices, etc.); and 3) a "bibliography" of personal influences (including any relevant readings, creative work, etc.).

SOC292 Death and Dying at the End of the World

Death looms large over life. The digital has given people unprecedented access to global media focused on death and dying, from far-flung calamities killing thousands to intimate gofundme pages for your friends' cancer treatments. In an age of data-enabled prediction and preemption, death is capricious and untimely, remaining stubbornly resistant to scientific and philosophical certainty, despite ever more complex systems for death management. Meanwhile, circulating discourses of ecological and political catastrophe have proliferated thoughts of genocide, extinction, and planetary death. In this course, we look at contemporary encounters with death and dying at a variety of scales, from the search for death's meaning/a meaningful death, to understanding death as a public feeling and inspiration for political imagination.

SOC299 The Future Perfect

Sociology is typically preoccupied with the present and, to a lesser extent, the past, favoring empirical methods that aim to reveal a variety of truths: for example, the logics underlying social structures and systems, the causes of social inequality, and the mechanisms by which inequality is reproduced. Where does this leave the future? Despite the persistence of patterns of social life, the future remains always and ultimately undetermined. We cannot know it; we can only imagine, speculate, and fantasize. The future, it seems, belongs to the world of fiction: to novels, films, television shows, and music that offer visions of what it might hold. These visions are sometimes suffused with hope for a changed world and sometimes with anxiety at the prospect of change. What can we learn about the present from images of the future? Might they offer an antidote to suspicions that we are headed toward a future of increased inequality and scarcity and looming environmental catastrophe? What traps might we find ourselves in when we treat the future as a distinct category of time? This course pairs social theory with works of fiction in addressing these questions.

SOC300 Queer and Trans Aesthetics

This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms

of race, gender, sexuality, disability, class, nationality) on the one hand, and audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

SOC308 Baby Got Back: Embodiment, Gender, and Sexuality in Black Music

This multimedia course uses a sociocultural approach to explore how black bodies continue to be sized, classed, sexed, and gendered through black musical expression. We will examine black music as a cultural object, both embedded in and responsible for steering national cultures, to argue that black music is indeed a lens through which to examine the struggles, contradictions, and triumphs of black peoples in the U.S. and abroad. Connecting theoretical frameworks of race, embodiment, socioeconomic status, gender, and sexuality with: (1) visual cultures of black bodies in motion (stemming from minstrelsy and chitlin' circuits to musicals and music videos) and (2) a variety of songs written, produced, and/or performed by black musicians (that include but are not limited to: the blues, jazz, rock and roll, rhythm & blues, soul, afrobeat, hip hop, dancehall, pop, soca, hip life, and reggaeton), this class will seek to interrogate how black music creates, replicates, regulates, packages, and distributes identity through a paradigm of production and consumption. We will discuss topics such as commodification, resistance, and representation while listening to artists such as Nina Simone, Sir Mix-A-Lot, Las Cruas, former 2 Live Crew member Luke, Biggie Smalls, Mr. Killa, De La Soul, Lil' Kim, Outkast, Jill Scott, Ayisoba, Big Freedia, Alison Hinds, Nicki Minaj, and Fela Kuti to attempt to understand exactly what type of power (and magic) that music possesses.

SOC309 America's Lure: The Politics of the Transnational US University

Over the course of the last decade the number of international students traveling to the United States has more than doubled. As of 2016, over a million students travel annually to U.S. campuses. In popular culture, governmental rhetoric, and statements from university administrators, this movement has been ascribed to the "lure" of American institutions of higher education and the knowledge, prestige, and futures they are thought to provide access to while simultaneously providing evidence of the successful internationalization of the U.S. university. Students will engage queer, feminist, postcolonial, indigenous, and critical race studies as we historicize and theorize this phenomenon while grappling with the transnational dynamics of the U.S. university from its founding as a central institution of settler colonialism in the 17th century through to the current moment of the so-called global, neoliberal university.

SOC313 Time, Masks, Mirrors: Aging in America

Longevity is almost universally wished for, but its actual accomplishment may also invite fear, even dread, depending on the context in which it occurs. We will study the socio-cultural meanings of aging in the US as they are informed by history (collective and personal), cultural background, social scripts, caregiving relationships, institutional support/constraint, and current conceptualizations of the life course and the "aging" mind and body that often rely heavily on categorization and vocabulary associated with biomedicine. In addition, we will explore the idea of age in relation to sustainability and disposability as it is applied to dwellings, objects, the natural environment, and even persons. Enrolled students will be introduced to qualitative methods and analysis of qualitative data through conducting a series of interviews with an elder living in the local community that focus on the relationship between place and well-being over the life course, culminating in a record that can be shared with others.

SOC315 The Health of Communities

Our focus will be on understanding the role of social factors (e.g., income, work environment, social cohesion, food, transportation systems) in determining the health risks of individuals; considering the efficacy, appropriateness, and ethical ramifications of various public health interventions; and learning about the contemporary community health center model of care in response to the needs of vulnerable populations. In this overview, we explore the history of social medicine, the importance of language in public health efforts to conceptualize and frame health concerns, the complexity of any categorization of persons in discussions of health and illness, ethical issues related to the generation and utilization of community-based research, the role of place and the importance of administrative and cultural boundaries in the variability of health risk, and the idea of just health care. Enrolled students serve as research assistants to preceptors at Middletown's Community Health Center (CHC) & Moses Weitzman Research Institute.

SOC318 Social Science, Black Life: Wells-Barnett, Du Bois, and Hurston's Empirical Experiments

This class has two interrelated areas of focus: first, the racist habits of imag(in)ing blackness's presumed racial-sexual difference that preoccupied social science in the late 19th and early 20th centuries; and second, the formative role that social scientific research and methods played in black people's quests for institutional inclusion during this same period. In their early years, canonical sociology and anthropology consistently proved unable to capture the beauty and complexity in black life, instead lending empirical authority to cultural ways of seeing blackness as inherently pathological. A counter-discourse of black expression took shape, attempting to overcome the negative impact that dominant empirical thought might have on black peoples' struggle for normative citizenship. Focusing particularly on the careers of Ida B. Wells-Barnett, W.E.B. Du Bois, and Zora Neale Hurston, we will explore the contradictory relationship that subsequently emerged between blackness and institutional power--discernible in empiricism's primacy during the long era of postbellum black inclusion. Rather than seeking evidence of black intellectuals' departure from empiricism and its attendant violences, we will explore the messiness of their efforts to experiment with and imagine beyond their misrepresentation and erasure in dominant empirical discourses. Indeed, black artists and intellectuals sometimes recapitulated the violence of empiricist paradigms and their enabling truth claims despite their sound political intentions. In considering the nexus of social science and black life in this period, then, we will also consider the intramural politics of racialized gender, the myriad costs of institutional incorporation, and the stubborn durability of epistemological authority. Secondary texts include works by Hazel Carby, Roderick Ferguson, Kevin Gaines, Julian Go, Avery Gordon, Saidiya Hartman, Katherine McKittrick, Reiland Rabaka, Michel-Rolph Trouillot, Autumn Womack, Alexander Weheliye, Sylvia Wynter, and others.

SOC319 Theories of Capitalism

Capitalism has profoundly shaped world history, acting as one of the primary drivers of social change, and working to shape a tremendous variety of social institutions ranging from colonialism to our sense of time. This course takes a critical approach to the study of capitalism, looking at the ways capitalism has intersected with and transformed the nature of social oppression (particularly in relation to nation, race, gender, and sexuality), as well as the ways it works to shape everyday consciousness. Historical changes within capitalism will be explored, considering particularly the rise of corporate capitalism and of contemporary neoliberalism. We will examine a wide variety of theoretical approaches to capitalism, taking Marx's thought as a jumping-off point for elaboration and critique. We will conclude by considering alternatives to capitalism that have been proposed in both historical and contemporary

contexts, together with an examination of practical efforts to implement these possibilities.

SOC321 Disgusting? Revolting!

Who or what do we find utterly repugnant? Are we the nasty, vile ones? Is it possible that we are unconsciously attracted to that which disgusts us? What might it take to turn disgust into desire, and vice versa? In what ways might disgust indicate not only disruption or transgression, but some kind of threat and alternative to the status quo? What might be lost or gained when the disgusting clean up their acts, or are shown to have been respectable all along? In this course we will explore the politics of filth, particularly in terms of the desires, attitudes, identities, and behaviors that elicit disgust. We will consider how disgust infuses political ideology--i.e., how people understand and approach the social groups that disgust them (for example, racialized immigrants, queers, fat people, and drug addicts), but also the wealthy, the privileged, the "basket of deplorables." We will also explore the psychoanalytic relation of disgust to desire.

SOC322 The Sociology of Nina Simone

An artist, activist, and visionary, Nina Simone possessed both a talent and political platform that continues to permeate discussions inside and outside the walls of academia. Born Eunice Kathleen Waymon, Simone was trained as a classical pianist that would eventually travel the world to perform music that encompassed the struggles of black life. This course acknowledges that her music, with pieces such as "Mississippi Goddam" and "To Be Young, Gifted and Black" undoubtedly made social, cultural, and political contributions to American society. However, much of Simone's personal life, including her battles with racism, sexism, and mental illness, as well as her relationships with her contemporaries, like Lorraine Hansberry and Miriam Makeba, is often eclipsed by and not considered alongside with her body of work. This course will examine Nina Simone as a whole person, wrought with contradictions, that poured her life experiences into her music, often at the expense of her own success. This class will: sociologically examine the emergence of such a person by interrogating the social environments that impacted her views on social justice; deploy black feminist and womanist analytical frameworks to deeply understand how white supremacist capitalist patriarchy may have taken a toll on Simone's career, but ignited her passion to speak truth to power; and utilize cultural and sociological paradigms of framing, stratification, and symbolic interaction to fully understand the sociology of Nina Simone.

SOC323 "Racing" Across Africa

Is Africa post-racial? Have you wondered how someone becomes Black/African, white, ethnic, and/or native and its implicit hierarchies, which scholars refer to as racialization? When you think about race and racism, does Post-Independence (PI) Africa come to mind? If not, why is PI Africa removed from our understanding of race? How can we think about Africa today as always undergoing processes of racial imperialism and how does it intersect with

sexuality, gender, and class? Lastly, how do we conceptualize Post-Independence Africa in relation to the African diaspora?

We will go from Ghana to Kenya, Nigeria to South Africa, to understand how race is articulated in these spaces during colonization and after formal colonization has ended. We will also gain theoretical language needed to refute raceless logic. These processes will help us recognize why PI Africa is perpetually marginalized within a globally racialized capitalist economy. This course will contribute to thinking about forms of solidarity in our own lives toward visions of decoloniality, equity, and justice for those racialized as Black, especially in Africa.

SOC324 Black Girl Magic?: Survival and Speculative Fiction in the Social World

"Black Girl Magic?" explores and examines the sociological origins, usages, and deployments of the now-popular hashtag. Shortened from "#BlackGirlsAreMagic," coined by CaShawn Thompson in 2013, #BlackGirlMagic has seen its share of celebration and controversy. Used by and for figures such as former First Lady Michelle Obama and Janelle Monae, the hashtag appears almost everywhere to provide exemplars for the resilience of Black women and girls. However, some critics have questioned trending characteristics among those who have been branded with the hashtag--cisgender, well-to-do, fit/thin, non-disabled, and/or famous--and have asked since the beginning: To whom exactly does this phrase belong? Who does it include? And why should we use it? This course aims to survey all those questions and more. It will highlight Black women, trans and gender non-conforming writers, as well as sociologists and those not officially affiliated with the field, to deepen our understanding of Black life experiences in a global social world. We will dive into and deconstruct what we know about concepts such as "survival," "joy," "imagination," and "community" via Black feminist thought, queer/quare studies, popular culture, political science, speculative fiction, and cultural sociology.

SOC326 Race, Fantasy and Fetish

What role do fantasy and fetish play in the making and unmaking of race? How might fantasy and fetish disrupt and reinforce power differentials in surprising or unexpected ways? From comic book heroes to `race play`, this course explores how bodies, relationships, and space itself are fetishized in the racial imagination. It moves beyond the basic observation that race is socially constructed to consider how fantasy, desire, and fetish render such constructions volatile and spectacular, yet also banal and predictable.

We will discuss the historical and social context of race as both imagined and imaginary in relation to western fantasies of the self and object others. This course draws on texts from race, queer, and postcolonial theory, along with popular material, including fantasy fiction and film, to highlight the fantastical underpinnings of the everyday realities of racial difference.

SOC328 Experiments in Public Life: Creating and Presenting Socially Conscious Music

This course will revolve around examining and participating in this realm of music-making through different lenses. We will examine varied relationships a creator can have to the issue/stance to which the art relates, varied ways the art can be presented, varied ways of identifying and reaching different target audiences, and varied potential outcomes. Students will create work in response to a diverse set of prompts designed both to refine their individual goals of artistic and community engagement and to challenge them to create outside of those zones. In addition to individual and collaborative creative work, there will be readings and listening assignments encompassing a genre-diverse array of music (ranging from Olivier Messiaen to Charles Mingus to Nina Simone to Public Enemy, to name just a few) accompanied by some brief reflective writing assignments. Work created in the course will be shared with the community (defined multifacetedly) in a variety of ways online and in person, with the students bearing much of that organizational and curatorial responsibility.

SOC352 Race, Immigration, and the U.S. Empire

Did we all enter this country on equal grounds? How do our racialized ethnicities, immigration histories, gender, sexuality, and class impact our position in the United States? When you think about immigration, do black immigrants come to mind? This course provides an overview of critical assessments of immigrant communities within the U.S. empire. Theories of institutional racism, white supremacy, and ethnic fallacies are placed at the center of the conceptual framework of the course. Its aim is to demystify immigrant success narratives by relaying the historical, legal, political, and capitalist structures that affect access to upward mobility for immigrant groups and their descendants. Students will learn how black American, black immigrant, Latinx, Asian, indigenous, white eastern European, and white western European communities (including white colonial oppressors), and those at the intersection are grafted within an anti-black, global racial hierarchy that informs their current position in a settler-colonial empire.

SOC355 The Personal Is Social

How do social forces show up in our everyday lives? Which forces grab our attention, and why? When are we more inclined to see something as individual rather than social? What kinds of conclusions can we reasonably draw about the social world based on our individual experiences? In this seminar, students will read texts that use personal experience as a foundation for sociological observation, reflection, and insight. We will spend time thinking about the appeal and limitations of various methods, surveying a range of approaches to incorporating personal experience into scholarship, including memoir, autotheory, and autoethnography. Students will practice these kinds of writing throughout the semester, culminating in a final paper that blends personal writing with sociological analysis.

SOC399G Advanced Research Seminar: Introduction to Critical University Studies

The university is in crisis, or so we are often told. With college and university budgets rapidly shrinking, tuition and student debt are increasing exponentially, especially for women and students of color. And yet, we're here. Students, instructors, and staff continue to look to the university as a productive space for thinking and working. As an academic field dedicated to a collective engagement with the ways power constitutes bodies, knowledge, and ways of being in the world, sociology is a key venue for contending with these processes. This course will introduce students to the emerging field of critical university studies through a feminist, queer, and anti-racist frame. What, we will ask, does it look like to think in and about the university at this historical moment? What does it mean to consider the university's history in relationship to power and the nation-state? What are the gender, sexual, class, and racial politics of knowledge production? And how can we most productively take up the university itself as an object of scholarly inquiry?

SOC399H Hot Mamas: Black Women, Sexuality, and Body Size

Black women, no matter where they were born or currently live in the world, deploy survival strategies that propel them past perceived deviances and into discursive spaces of dynamic personhood. This is especially true for fat Black women and how they navigate their respective identities in the areas of social, physical, and mental health; socioeconomic status; and beauty culture. In this class, we will interrogate these areas alongside Blackness, womanhood, and sexuality to fully consider the implications of body size as a substantial category of intersectional analysis. By bringing medical and sociological studies into conversations with political and feminist theory, while also engaging with literary pieces and popular culture, this interdisciplinary course aims to equip all of us with a deeper understanding of sexuality and body size and their significance in the lives of Black women. We will journey our way through this course using the works of Black feminists such as Patricia Hill Collins, theorists such as Michel Foucault, sociologists such as Samantha Kwan, political scientists such as Cathy Cohen, lawyers such as Dorothy Roberts and Paul Campos, and writers such as Lucille Clifton and Alice Walker. In addition, we will bring our lived experiences and proximity to popular culture (magazines, music, films, and online resources such as personal blogs) to stake out our own truths and fill out any gaps that we believe are present in the literature. The class will mix lecture, class discussion, group presentations, and small-group work to advance mastery of the material.

SOC399K Advanced Research Seminar: Law & Society

In this course we will explore law from a sociological perspective, in relation to the historical, political, and cultural contexts within which it exists.

- We will tackle the question, what is law?

- We will talk about the relationship between law and justice.

- We will discuss social phenomena as legal constructions. Who is a person? What constitutes a religion? What is gender? What is commerce? What is free speech? These questions find myriad answers in different bodies of thought, are understood and acted upon in a variety of ways by different social groups, and gain different levels of political salience in different societies and at different times. As matters concerning the organization of public life, they are also, and inevitably, framed as "legal problems" and make their way to courts. We will examine how courts construct social phenomena through the lens of several historical cases.

- We will talk about law and American government--the historical evolution of the relationship between the branches of government, and the changing role and politicization of the Supreme Court.

- We will learn about courtroom exchanges, and how race, gender, and class play out in a typical American courthouse.

- We will explore law as a professional field, and discuss the educational and professional formations of its major actors.

This course will involve writing a research paper.

SOC399M Abolitionist University Studies

This course explores historical materialist theorizations of the practices and future possibilities of the U.S. university as a tool of social reproduction and space of potentially revolutionary thought. In so doing, the readings, assignments, and discussion will be inspired by Stefano Harney and Fred Moten's provocation to reinterpret abolitionism as "not so much the abolition of prisons but the abolition of a society that could have prisons, that could have slavery, that could have the wage, and therefore not abolition as the elimination of anything but abolition as the founding of a new society." Students will consider how conventional renderings of the university in higher education studies, critical university studies, and the popular cultural imaginary are predicated upon an often romanticized and fundamentally limited geographic and historical understanding of the work of colleges and universities. In response, the course cultivates a more capacious conceptualization of the historical and contemporary function of the university as a social form. In taking up abolitionism as both a method and critical analytic, the course will challenge students to imagine the revolutionary possibilities of an abolition university that aligns itself with movements beyond the institution, while reflecting on the particular importance and challenge of enacting such a vision in our current political moment.

SOC399R Advanced Research Seminar: I Write What I Like

Love letters, propaganda, admission essays, manifestos, research papers, memoir, profiles, invitations, journaling, tweets, and texts. We write a lot. Whether it's grammar and syntax or word counts and page limits, we do so with rules in mind that help shape what gets said. We fret over whether to write in first or third person, what type of citations to use, and whether we have enough evidence. Too often rules are imposed before we've sorted through our thoughts, let alone what we want to say about them. As we think about these formal and informal rules, we'll consider the specificities and usefulness of various forms of writing, and how each presents constraints that open up or foreclose different kinds of thoughts about society.

We'll think about how writers, activists, and academics approach writing to move us in different ways. We'll experiment with and repurpose diverse genres as we develop our own approaches to writing as an essential tool of social analysis.

SPANISH LANGUAGE AND LITERATURE (SPAN)

SPAN101 Elementary Spanish I

This introductory course is designed for students without prior Spanish language study. Students will develop basic receptive and productive language skills (reading, listening, writing, and speaking) along with an awareness of the various cultures of the Spanish-speaking world, including the United States. Note that Span 101 and Span 102 are designed as a year-long course, with each course covering half of the textbook, along with other materials. Completion of Span 102, or evidence of appropriate level, will be required to continue onto Intermediate Spanish (111-112).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN102 Elementary Spanish II

This course is the continuation of SPAN101, though students may place directly into 102 via the Wesleyan Language Placement Exam. The course further develops basic language skills (reading, listening, writing, and speaking) and incorporates readings and media from a variety of sources, allowing students to explore the cultures of the Spanish-speaking world.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN101**

SPAN103 Elementary Spanish for High Beginners

SPAN103 is intended for students with prior experience in Spanish (and is considered the same level as SPAN 102). This language course places emphasis on the development of speaking, listening, reading and writing, within a cultural framework, so students can attain an intermediate level in the language (and subsequently enroll in SPAN 110 or 111).

To enroll in this course students must have placed into SPAN 102 or SPAN 103 on Wesleyan's Placement exam. Enrollment for Juniors and Seniors is contingent upon space availability during drop/add period. This course is not linked to another class.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN110 Spanish for High Beginners

Intermediate-level language course following SPAN103, with emphasis on the development of four basic language skills (reading, listening, writing, and speaking) within a cultural framework.

This course is comparable to SPAN111 and can be followed by SPAN112. Those seeking to follow with SPAN113 require permission of instructor. A weekly electronic journal is required for this course.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN102 AND SPAN103**

SPAN111 Intermediate Spanish I

This intermediate language course places continued emphasis on the development of reading, listening, writing, and speaking skills within a strong cultural framework. The sequence SPAN111 and SPAN112 seeks to expand students' active and passive control of vocabulary and grammar and for students to gain experience in using formal and informal registers of Spanish. Note that Span 101 and Span 102 are designed as a year-long course, with each course covering half of the textbook, along with other materials. Completion of Span 112, or evidence of appropriate level, will be required to continue onto Advanced Spanish - Introduction to Hispanic Literatures (Span 221).

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN112 Intermediate Spanish II

This course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion within a cultural framework that explores an array of topics connecting to other academic disciplines. Students will experience working with written texts and other media materials and produce a variety of written pieces. The course is a continuation of Span 111, though students may place directly into the course via the Wesleyan Placement exam or an appropriate AP score.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

Prereq: **SPAN111**

SPAN113 Intermediate-Advanced Spanish

Within a cultural framework focused on the Spanish-speaking world--especially Latin America--this course leads students through a review and in-depth examination of advanced Spanish grammar issues and vocabulary expansion while providing the experience of working with written texts and other media materials. Students will explore an array of topics that connect to other academic disciplines.

SPAN201 Spanish Play

Students will be in charge of directing and staging a play in Spanish with the assistance of a Spanish professor. The workshop will take place over 10 weeks. Minimum one hour per week, which will increase to 2 as the day of the opening approaches. Rehearsals will be split between activities including reading and commenting on the dramatic text and working on diction, which can be done collectively or in smaller groups, and workshoping and rehearsing the play. Although the play will be in Spanish, we will try to allow for a wider audience by providing a brief English translation of the plot.

Grading: **Cr/U**

Credits: **0.50**

Gen Ed Area: **HA-RLAN**

Prereq: **None**

SPAN203 Spanish for Heritage Speakers

This course is designed to meet the specific needs of students who are heritage speakers of Spanish to increase their language skills and confidence. Students who take this course must have placed into SPAN112 or above. Emphasis is placed on the following: development of linguistic strategies that advance students' written and oral expression beyond the colloquial level, grammatical and orthographic norms of Spanish, critical reading (reading for understanding and analyzing what is read), and expansion of vocabulary. The linguistic work will be conducted through course materials that explore, through a variety of literary and nonliterary texts, the use of Spanish in the U.S. Materials include a textbook or manual and topics related to the experience of Spanish speakers in the U.S.

SPAN204 Teaching Spanish K-12: Second Language Pedagogy (CLAC 0.5)

This is a community engagement course in which students learn basic principles of language pedagogy and language acquisition to inform their teaching of Spanish to children at one of the Middletown public schools. Readings in English and Spanish; class discussion and assignments in Spanish. Students will familiarize themselves with characteristics of second language (L2) learning and teaching, a basic know-how on analyzing and preparing materials for language learning/teaching, and L2 teaching as a profession.

Language and course requirement: Students must have recently taken a SPAN course numbered 221 or above. Preference will be given to EDST and HISP majors, as well as juniors and seniors.

SPAN225 Creative Writing in Spanish

Taught by renowned Mexican writer Cristina Rivera Garza, Distinguished Writer in Residence for 2024-25, this seminar will offer students the tools to articulate their ideas and experiences in Spanish in narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of prose in Spanish and by working throughout the semester on crafting at least one short piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the semester students will practice extensive writing, critical reading, and peer

editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.

SPAN227 Writing Short Fiction in Spanish

This course will introduce students to the fundamentals of writing short fiction in Spanish. It will enhance their command of Spanish and their skills as effective writers through the examination and discussion of many aspects of the craft of fiction writing, which will inform students' own writing and development of their personal style. We will examine essential features of fiction (methods of constructing narrative tension, climax, ambiguity, character, dialogues, and structure), as well as various fictional styles through our discussion of the writing of our peers and a study of the texts of a number of contemporary Latin American and Latinx writers working in a genre that has been crucial to the region's intellectual production.

SPAN230 Heroes, Lovers, and Swindlers: Medieval and Renaissance Spanish Literature and History

This course is designed to develop students' ability to make informed and creative sense of four fascinating, complex, and influential medieval and Renaissance Spanish texts in their multiple (literary, historical) contexts: the "national" epic *EL CID* (12th-13th century); the bawdy and highly theatrical prose dialogue known as *LA CELESTINA* (1499); the anonymous *LAZARILLO* (1554), the first picaresque novel; and María de Zayas's proto-feminist novella *THE WAGES OF VICE* (1647). Through these and selected historical readings, the course is also intended to provide students with a basic knowledge of Spanish culture (in its plurality) from the 11th through the 17th centuries, the texture of everyday life, and the larger movements of long-term historical change. We will draw on literature and history to imagine the world of chivalry and crusade in the medieval Spain of "the three religions of the book" (Judaism, Christianity, and Islam); of mercantile values, courtly love, and prostitution in the Renaissance city; of social injustice and religious hypocrisy in imperial Spain; and of the exacerbated gender and caste tensions that followed from the political crises of the 1640s. We will reflect on the interplay of literature and history in our efforts to come to grips with a past both familiar and strange; address the crossing of linguistic, artistic, ethnic, religious, caste, and gender boundaries that has long been a conspicuous feature of Spanish society; and consider what texts and lives of the past might still have to say to us today. No prior historical or literary preparation is required, only a willingness to engage the readings closely (textually and historically).

SPAN231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage

From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence

it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

SPAN232 Dialogue of Poets: Classical and 20th-Century Poetry in Spain and Latin America

This course samples the rich tradition of Spanish-language verse from its beginnings to the present. It is organized around four primary dialogues: (1) the creative reception by leading 20th-century poets from Spain and Latin America (e.g., Neruda, Lorca, Machado, Borges, Paz, Rossetti) of classical poets (Saint John of the Cross, Góngora, Quevedo, and Sor Juana Inés de la Cruz); (2) the interplay of poetry and essays by those same poets; (3) the round-trip fertilization of popular and elite, oral and written forms of poetry; and (4) the crossing of linguistic, ethnic, religious, and gender boundaries that has shaped Spanish-language verse from its beginnings as love lyrics embedded in Hebrew and Arabic poems (jarchas) to the creative stimulus of other Romance languages (especially Galician and Catalan) in Spain, through Latin American poets open to Amerindian and African influences, and Hispanic-American poets exploring bilingualism in the U.S. We will read lyric, epic, and burlesque verse on a wide variety of themes (mysticism, sex, history, reason, travel, love, politics, sensory perception, death, and poetry itself); reflect on how poetry can best be enjoyed and understood; and consider how poetry has been produced, heard, read, and used (ritual and spontaneous song; minstrel performance of epic and ballads; courtly patronage, literary academies, and manuscript circulation; private reading of printed texts and commodification; and 20th-century singer-songwriter musical settings and politics). Although no prior expertise in poetry is

expected, a willingness to engage it closely (textually and historically) is essential.

SPAN236 Cervantes

Cervantes is known chiefly for DON QUIXOTE, often described as the first modern novel and fountainhead of one of the great modern myths of individualism. DON QUIXOTE also reimagines virtually every fashionable, popular, and disreputable literary genre of its time: chivalric, pastoral, picaresque, sentimental, adventure, and Moorish novels; the novella; verse forms; drama; and even the ways these kinds of literary entertainment were circulated and consumed, debated, celebrated, and reviled. It is a book about the life-enhancing (and endangering) power of books and reading and the interplay of fiction and history and truths and lies. Cervantes' art remains fresh and unsettling, sparing no one and nothing, including the author and his work. Distinguished by its commitment to the serious business of humor, make-believe, and play, the novel is at once a literary tour de force and a fascinating lens through which to examine the political, social, religious, and intellectual debates of its moment. Characteristic themes include social reality as artifact or fiction, the paradoxical character of truths, the irreducible diversity of taste and perception, the call for consent in politics and love, and personal identity (including gender) as a heroic quest. In this course, we will read, discuss, and write about DON QUIXOTE, along with a sampling of critical, philosophical, literary, and artistic responses it has inspired.

SPAN239 Rebels and Rebellions in Early Modern Spain

What does it mean to be a rebel? This course examines literary, visual, and historiographical representations of rebels and rebellions in early modern Spain. Students will examine the uprisings of aggrieved comuneros (proto-bourgeois revolutionaries) in Castile and of outraged moriscos (Muslims converts to Christianity) in Granada and Aragon, the covert spiritual rebellions of crypto-Jewish conversas (Jewish converts to Christianity) and crypto-Muslim moriscas, as well as texts composed by women writers who rebelled against gender norms and Spain's most famous playwright's classic rebellion play. We will analyze the scathing testimonies of expelled moriscos and paintings that reimagine the pre-expulsion revolts of Valencian moriscos alongside gripping examples of local resistance to the moriscos' banishment, an astonishing and unprecedented tragedy in Spanish history. The seminar will introduce students to a critical framework for analyzing visual and multilingual texts. Close readings of "rebellious" texts will acquaint students with both known and nameless rebels of Spain, as well as with the unresolved legacies they left behind.

SPAN250 Modern Spain: Literature, Painting, and the Arts in Their Historical Context

In this course, we study the so-called "masterpieces" of modern and contemporary Spanish literature, painting, and film (18th century to the present). The works chosen represent the major literary and cultural movements of the past three centuries: the Enlightenment, Romanticism, realism, and naturalism,

the generations of 98 and 27, the avant-garde, neorealism, and postmodernism. As masterpieces, they have achieved canonical status through either the influence they have come to exercise over successive generations or their popular reception at the time of their production. In our close analysis of these works, we will interrogate the processes and conditions of canonicity. We will emphasize the relationship between cultural production and historical context, seeking to draw analogies at all times between the short stories, novels, poems, plays, paintings, and movies under consideration and the social, political, and economic milieu from which they emerged.

SPAN251 Urban Fantasies: The City, Sexuality, and National Identity in the Modern Spanish Novel

The novel as we know it today reached maturity in Europe in the 19th century against the backdrop of a rapidly changing social and economic context, with the city emerging as a "capital" coordinate (literally and figuratively) on the map of national cultures. The rapid growth of a powerful bourgeoisie is a defining aspect of this cultural dynamic, manifesting itself as it does through demographic changes, urban expansion, and the rise of a bourgeois aesthetic that will come to influence art, literature, and all other forms of cultural expression for decades to come. In Spain, these phenomena are reflected acutely by one of the nation's greatest novelists, Leopoldo Alas ("Clarín"; 1852-1901). Through a close reading of Clarín's "La Regenta" (1884-85), a uniquely insightful and polished work of epic scope that is widely regarded as one of Europe's greatest modern novels, we will seek to evaluate how narrative and the cityscape form interlocking textualities within each of which family, the female, and the nation are protagonist, sexuality a central theme.

SPAN254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde

This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca's writing but to the potentially transformative power of language and literature in general.

Lorca's writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca's verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at <http://span254.site.wesleyan.edu/> to review in detail the materials, objectives, and modes of assessment for this course.

SPAN255 Constructing Barcelona Through Its Margins: Contemporary Spanish Culture Through Catalonia

This course seeks to examine the physical and cultural construction of Barcelona through the ways it has been understood across artistic mediums, social and historical periods, and political spectrums, especially along its margins. This marginality will allow us to look into contemporary Spanish culture from a new perspective, understanding the complexities that lie under the idea of a nation. The course also explores some of the tensions between modernization projects and cultural production during the 20th and 21st centuries, examining representations of the city in literature (poetry and prose), maps, films, performance, and photography.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-RLAN**

SPAN256 City, Mobility, and Technology: Towards the Modern City in Spain

Movements, itineraries, encounters--these are some of the elements that have characterized modern literature. From the Baudelairean figure of the flâneur to the car chases of popular movies like Bullitt, the city is described from a series of journeys that create a representation of urban space. However, these narratives reveal more than a personal account of the city: they show the urban architectures that allow the movement in those spaces (ie, paths, roads, lighting) and in doing so they portray the development of the modern city.

With this framework in mind, in this course we will analyze the construction of the modern city in Spain through literary and filmic texts. We will pay special attention to Barcelona and Madrid, but we will also look at how other international cities are perceived and represented in Spanish literature. In doing so, we will explore how these authors understand the modern city and the international connections and influences that shaped it at specific historical moments.

SPAN257 Performing Ethnicity: Gypsies and the Culture of Flamenco in Spain

In this course, we will analyze how Gypsies and flamenco are associated, in fact and in fiction, and how and why they have emerged into the limelight of Spanish national cultural discourses. Although they represent discrete realities--not all Gypsies identify with flamenco and not all flamenco artists are Gypsies--correlations between the two have nonetheless been exploited by the media and by artists as an often unwanted emblem of Spanishness. The tensions surrounding this practice seem related to an undisputed fact of Spanish cultural history: Flamenco is unique within European culture; with a population of nearly one million, Gypsies are Spain's dominant minority; yet recognition of the artistic value of the former and acceptance and assimilation of the latter have been slow to congeal within Spanish society. Our practical aim will be to analyze these important aspects of Spanish culture in their historical context. We will study how the connection between Gypsies and flamenco has emerged; we will evaluate the extent to which it is valid; and we will attempt to assess what seems to be at stake in the struggles between those who promote and those who resist this connection as distinctive of Spanish national culture. In doing so, we seek to

foster a deeper understanding of the importance of the Roma community within the framework of European and Spanish culture and a deeper appreciation for flamenco as a unique form of cultural expression. On the theoretical plane, we seek to understand how music, dance, literature, cinema, performance, and art can give expression to ethnicity; how cultural hegemonies emerge; and what role artists play in supporting or contesting those hegemonies. In general, this course is designed to help students develop critical skills of cultural analysis while increasing their proficiency in Spanish.

SPAN258 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

SPAN259 Detective Fiction: Procedure and Paranoia in Spanish Narrative

The detective genre is the point of departure for an investigation that will lead us to solve a mystery: How do fictions about the detective--a person who is generally outside the law and sometimes crazy or paranoid--help us to understand the social construction of Spain? We will follow this figure through time (from the 19th century to the present) and space (visiting many Spanish cities) to build a theory of the genre in Spain and a panorama of Spanish society and culture. Following the trail left by novellas, novels, and short stories, together with critical texts, our investigation will allow us to unravel the mysteries of a multidimensional society.

SPAN260 Between Word and World: Major Spanish Poets of the 20th Century

Our goal in this course is to study how the leading poets in 20th-century Spain use the lyric mode to negotiate the relationship between themselves and their community at key junctures in the nation's history. In doing so, we will also identify and assess the various notions of community that arise in modern Spanish poetry, attempting to evaluate how those notions evolve or are affected by such events or movements as (1) the avant-garde and the second Republic (1920-1936), (2) the Civil War and the Franco regime (1939-1975), and (3) sweeping political and social transformations of the past 30 years as signaled by the country's democratization, integration into the European Union, economic development, and by the massive influx of immigrants from Africa, Latin America, and Eastern Europe (1977-present). Key essays (critical and theoretical), some by the poets themselves, are included in the syllabus to provide critical tools for discussing how the public experience is lyricized through the intimate filter of the poet's own sensitivity. We will seek to understand the role played by context in conditioning the decisions poets make in adopting the epic, elegiac, didactic, or testimonial mode of expression, to name just a few. The image of the poet standing at the crossroads of lyrical creativity--word--and historical circumstance--world--will be central to our critical inquiry.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain**

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **THEA261**Prereq: **None****SPAN262 Through Foreign Eyes: The U.S. in Spain in the 20th Century**

Although the relationship between Spain and the U.S. has a long history that can be traced back to colonial times, during the 20th century, an extensive corpus of literature in which Spanish authors portray the U.S. prominently becomes visible. The appearance of this body of work gives rise to a series of questions: How do Spaniards see the U.S.? What are the consequences of this understanding? Why is there such interest in portraying the U.S. from a Spanish point of view?

Of course, cultural and social definitions are constructions always limited to historic, social, and cultural events, be they of a military, political, or purely commercial nature. One could think that these portraits dwell on stereotypes; nonetheless, we are before a literary production that uses the U.S. to create a narrative about how Spain enters a global economic market through a cultural exchange. These are texts about traveling, the construction of the individual, and the shaping of a nation; texts that cross the boundaries of literary genres to define Spanish identity. We are before the construction of a narrative that questions the building of alterity and shapes the identity of modern Spain. In our approach to the main historic events that define the relationship between Spain and the U.S. during the 20th century, we will examine novels, poems, and movies that result from such events to analyze questions related to identity, globalization, localism, modernity, and nation. What we will engage in is, in fact, a debate about how we define ourselves, whether we are Spanish or American, through foreign eyes.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance**

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society.

In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Hispanophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' *Antigone*, Euripides' *Oedipus* and *Medea*, Aeschylus' *Agamemnon*, as well as figures from the *Oresteia* and from such epics as Homer's *Iliad* and Virgil's *Aeneid*. This course is taught in conjunction with Italian 263 and French 263.

The final collaborative performance, scheduled during the Final Exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN264 Orientalism: Spain and Africa**

Over the past several decades, North African and Middle Eastern cultures have become conspicuously important within the Spanish cultural arena. Translations of writers from Lebanon to Morocco abound in Spanish bookstores. Spanish writers have begun addressing North African and Middle Eastern issues with greater frequency, especially in their novels. The dramatic rise in the African

immigrant population in Spain during the 1980s and 1990s, meanwhile, has been matched by a rise in press coverage of issues pertaining to Africa and the Middle East. These factors constitute the point of departure for our historical overview of the treatment of Islamic cultures in modern Spain, from early 19th century to the present. Guided by Edward Said's seminal essay, *ORIENTALISM*, we will assess the extent to which (and the process by which) Spain passes from the Orientalized subject of European Romanticism (painting, literature, music) to an Orientalizing European power in the late 20th century. In doing so, we will seek to relate the representation of Islamic cultures in Spanish literature and painting to social, political, and economic factors, most important of which was Spain's military invasion into Morocco in the late 19th and early 20th centuries. We will also survey changing attitudes among Spanish intellectuals with regard to the Islamic world and toward Spain's Islamic heritage, the result, perhaps, of 20th-century modernization and, most recently, of Spain's full integration, after Franco's death, into Europe's military and political structures. The tools for this study include works of literature primarily, but we will also focus on painting, historical essays, newspaper articles, and film.

SPAN265 History of Spanish Cinema for Spanish Speakers (CLAC.50)

Spanish 265 is designed as a discussion section for students who are enrolled simultaneously in SPAN 301 and who have advanced proficiency in Spanish. This half-credit course offers students the opportunity to master the critical vocabulary and tools of film analysis in Spanish.

Weekly student-led discussions will provide students with the unique opportunity to exercise these tools regularly and gain greater fluency in the language. Students will be responsible for the same material included on the SPAN 301 website at: <https://span301.site.wesleyan.edu/>. Students will submit their assignments in Spanish and contribute weekly posts to a blog set up for SPAN 265.

SPAN267 Image/Word: Narrative and Photography in Contemporary Spain

The objective of this course is to analyze the relationship between literature and photography, questioning the idea of representation that usually unites them. This relationship goes further than the simple representation of the environment that surrounds us: literature and photography modify not only the perception of, for example, urban space, but also its organization; that is, they have a direct effect on the built environment. This effect creates a productive linkage that challenges the limits of these disciplines and the worlds in which they are created, proving how their work aims not exclusively to describe or represent but also to build. This idea of creating is the base for this seminar, where students will develop a photographic and a narrative/analytic project in which they will test firsthand the relationships and skills seen in the class. Thus, they will be able to see the connections between disciplines and cultures that guide our everyday life. In this seminar we will work with Cuban artist and writer Jacqueline Herranz-Brooks, who will work with students in their creative project.

SPAN269 Appearing Acts: Visual Histories and Identity Construction Through Photography in Spain

In her reading of Plato's "Allegory of the Cave," Susan Sontag finds a close bond between photography and the world, our cave. Photography, she says, shows us a new visual code that constructs narratives that "alter and enlarge our notion of what is worth looking at," and in doing so can influence, guide, and condition our knowledge of the world. Keeping this in mind, when it comes to Spain, what kind of world does photography construct? How does the visual field influence and guide our knowledge of modern Spain? In this seminar, we will reflect on how photography has conceptualized social and national identities in Spain from the 19th century to the present, asking how images create, shape, and question the cultural and social archive. Through the examination of photographs, theories, and methods, we will draw a contextualized history of photography that will help us to consider its role in the interdisciplinary construction of Spanish identity.

SPAN270 Survey of Latin American Literatures, Cultures, and Ideas

A close study of texts from the colonial period to the present will serve as the basis for a discussion of some of the major ideas and cultural and political debates that have emerged in modern Latin America to this day. Thinkers include Las Casas, Sor Juana, Bolívar, Sarmiento, Martí, Neruda, Borges, García Márquez, Menchú, and Bolaño, among others. For purposes of understanding context, students will also read selected chapters from works by historians and cultural critics and will watch several films. (Please note that this course was previously called "Spanish American Literature and Civilization.")

SPAN271 Against Epistemicide: Latin American Critical Thought

This class explores seminal social and political texts that reconceptualize America Latina against the legacies of colonialism and Eurocentrism. We will focus on Liberation and Decolonial Latin American Thought in order to move from the idea of Latin America to that of Abya Yala. We will begin with the triad: La ciudad letrada by Ángel Rama, Culturas híbridas by Néstor García Canclini, and Colonialidad del poder, eurocentrismo y América Latina by Aníbal Quijano. We will then decolonize their own theories through the work of women thinkers such as María Lugones, Yuderkis Espinosa, Ofelia Schutte, Mary Louise Pratt, Linda Martín Alcoff, and Catherine Walsh.

SPAN272 Cubanidad: Diaspora, Exiles, and Cultural Identity in Cuban Literature and Film

This course will examine shifting notions of Cubaness, or "cubanidad," from the 19th century to the present times from a diasporic framework. We will discuss writings by/about African slaves, Chinese indentured laborers and migrants, and Spanish immigrants in Cuba, as well as Cuban exiles in the U.S. and Spain from the 19th century to the beginning of the 20th century. Through a variety of

literary texts and films, we will then study select cases of European exiles who visited Cuba in the 1930s and '40s, the later massive waves of Cuban migration to the U.S. after the Revolution, and the more recent immigrants who have settled in Cuba.

SPAN273 Beyond Machu Picchu & Macondo: Real and Imaginary Worlds in Latin American Letters

Latin American writers and intellectuals have long conceived of their particular literary and cultural practices in connection to individual spaces and sites, both real and imagined. In this course we will examine why and how they have done so, looking not only at well-known if not legendary ones such as Machu Picchu and Macondo, invented, respectively, by Neruda and García Márquez in certain moments of their careers, but also the América and Gran Colombia of Simón Bolívar, the New York City of the Cuban intellectual José Martí (1880s) and Nuyorican writer Tato Laviera (1970s), as well as Violeta Parra's other Chile, César Aira's Colón (Panamá), Fernando Vallejo's Medellín (Colombia), and Mayra Montero's eroticized Caribbean. In each case we will be concerned with understanding the relationship between local, national, and hemispheric history and the new imaginarios created by the author/intellectual in question in the context of north-south relations. Topics to be considered within this critical framework will include the Wars of Independence, industrialization in the late 19th-century, the construction of the Panama Canal (1904--1914), the Cold War (1947--1991), Latino identity in the context of Puerto Rico and New York City, the drug wars, and sexual identity. When possible, films and short videos will be used to help build knowledge of historical context.

SPAN274 Insular Borders of Latin(x) America

Before and at the same time the United States established itself throughout the 19th century as a major power in the Americas and the world, various Latin American republics inherited and acted upon a similar imperialist agenda to expand their borders not only to neighboring territories but also across oceans. In this class, we will study and compare these imperialist gestures, among them the Spanish Empire's control of its remaining insular colonies in the 19th century (e.g., Cuba, Puerto Rico, the Philippines, and Guam) and the United States' successive claim to these very same islands. We will analyze literary works and films that interrogate these imperialist claims as well as the trajectories of islanders: for instance, the forced migration of the Rapanui (Easter Island people) in the second half of the 19th century (first as slaves to Peru and then to the town of Hanga Roa in Easter Island) and the island-to-island "intra-colonial" (Joanna Poblete) recruitment of Filipino and Puerto Rican laborers in sugar plantations in Hawai'i at the beginning of the 20th century. Some of the questions we will explore are: Why are islands so coveted by old and new empires? How have Rapanui, Filipino, and Puerto Rican migrants and their descendants resisted authorities on the insular borders of empire? How do writers and artists tell these silenced histories? Can we speak of Latinidad and Edouard Glissant's concept of Poetics of Relation in a Pacific Ocean context? Readings will be in Spanish and English. All discussions and assignments will be in Spanish.

SPAN275 Multilingual Aesthetics in Latin America

This course examines writings by Latin American authors who are multilingual or have an intercultural awareness as a result of colonization, cosmopolitanism, migration, or bicultural upbringing. First, students will learn about a variety of Spanish American movements, such as "modernismo," "creacionismo," "negrismo," "indigenismo," "neoindigenismo," and "indianismo," all of which dialogued with diverse cultures and languages other than Spanish. Then, we will examine a series of collaborative projects, such as a quadrilingual poem co-written by Octavio Paz (Mexico), Jacques Roubaud (France), Edoardo Sanguineti (Italy), and Charles Tomlinson (UK); a selection of English-Spanish poems by Marjorie Evasco (Philippines) and Alex Fleites (Cuba); and the "Festival de poesía: lenguas de América," a bi-annual event that gathers poets from diverse multilingual regions in the Americas. Lastly, we will examine literary and scholarly work by/about Latin American writers of indigenous descent, as well as works in Spanish, English, and "Spanglish" by Chicano, U.S. Latino, and Filipino American writers. Throughout the semester students will reflect on how multilingualism can serve as a medium for aesthetic experimentation, intercultural dialogue, and/or political resistance. All discussions will be held in Spanish, and all readings will be in their original Spanish or in Spanish/English translation.

SPAN276 Body, Voice, Text: Theater and the Transmission of Experience

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

SPAN277 The Secret Life of Waste: Trash in Latin American Art & Literature

From space junk to microplastic particles found in human blood, man-made waste and pollution are ubiquitous. What are the effects of waste on the environment? What can the decomposition of waste create and/or undo? What is the afterlife of waste? Is waste apocalyptic? Through figures such as rotteness, radioactivity, mutation, and zombies, we will explore the ways in which Latin American art and literature try to answer some of these questions by imagining living amidst the remnants of hyperconsumption and by exploring the unforeseen effects that coexisting with waste could have upon the land and the body. We will study a wide range of visual and literary engagements with trash from novels, poetry, comics, and films to environmental art projects. Artists and writers may include Cecilia Vicuña, Daniel Lie, Samanta Schweblin, Fernanda Triás, Vik Muniz, H. G. Oesterheld, Javier Campos, and Alejandro Durán, among others.

SPAN278 Dangerous Plots: Fictions of the Latin American Jungle

This course is an exploration of the ways in which nature has been plotted in fiction, films, and popular culture, focusing on the tropical jungle, a space that has been central to the way Latin America has been imagined for centuries. We will investigate the construction of jungle as a cultural space where diverse anxieties about sovereignty, nationhood, race, development, gender, and subversion collide. We will evaluate this topography in relation to diverse projects of modernization and development, to the global angst over the environment and its destruction, to peasant and indigenous agency, and to a number of cultural and economic struggles that have shaped the region over the past century. Attention will be placed on literary, filmic, and visual texts.

SPAN279 Latin American Theater and Performance

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

SPAN280 Screening Youth in Contemporary Latin American Cinema

This course will examine some of the most important Latin American films to emerge in the past three decades that have cast children and teenagers as protagonists. We will analyze a large body of films that address issues of historical memory, economic inequality, social conflict, political activism, education, sexuality, cultural identity, and citizenship through the lens of the child or adolescent. These films question the roles of minors in relation to the political arena and reflect upon the constructions of childhood that operate at a social level with important political implications. Students will explore the aesthetic and social dynamics at play in the representation of young protagonists and develop interpretative filmic skills through an exploration of the connections between the technical composition of the works and the social, political, and cultural contexts that they address. Besides the varied cultural, theoretical, formal, and historical elements that this course will examine, one of the central components is a creative module in which students will develop an idea for a short film based on their own personal coming-of-age narrative.

SPAN281 "Islas sonantes": Music and Sound Technologies in Hispanic Caribbean Literature

Cuban author Alejo Carpentier once stated that the Antilles (the Caribbean islands) could easily be referred to as "islas sonantes" (sounding islands) because of their strong musical tradition. Music, according to him, is their common denominator. Inspired by this statement and extending it, in this course we will examine the role of music, as well as other sound and vocal productions in Hispanic Caribbean literature from the end of the 19th century to the present. Through close readings, we will reflect on how music and other sound media or communication devices (such as radio, audio recordings, sound magnification, and telephone) have helped reconceptualize social identities, notions of time and space, and human interaction. We will also look at their, at times, ideological, political, or purely aesthetic functions. No knowledge of music or sound technologies is required for this course.

SPAN283 The Other 9/11: Dictatorial and Post-Dictatorial Films and Literature in Chile

This course explores how poetry, novels, and films, produced during and after Chile's military regime (junta de gobierno), try to make sense of state violence and cruelty. This class suggests that by actively performing the work of memory, of remembering the violent past and the forcefully disappeared ones (detenidos desaparecidos), films and literature oppose the politics of oblivion instantiated by the post-dictatorial state while claiming for and imagining social justice. We will understand films and literature as active, ethical memory technologies which we will read against the grain of Chilean politics and history (políticas de los acuerdos).

Some of the poets we will read include Eugenia Brito, Carmen Berenguer, Teresa Calderón, Malú Urriola, Rosa Betty Muñoz, and Raúl Zurita. In addition, we will watch films by Patricio Guzmán, Cecilia Vicuña, and Pablo Larraín. Finally, we will read novels by Alejandro Zambra, Roberto Bolaño, and Nona Fernández.

Latin American writers from the early 20th century forward have regarded the short story as a vehicle through which to make their mark and engage the great cultural issues of the day. Jorge Luis Borges and Julio Cortázar, two of Latin America's most well-known literary figures, dedicated their careers almost exclusively to the genre. In this course, as we consider the privileged status of the short story in Latin American letters, we will examine the ways in which writers have used the genre to comment on important aspects of modernization, both within and outside their respective countries. Some of those aspects will concern the Mexican Revolution, bourgeois and mass culture, nationalism, globalization, and immigration to Europe and the U.S.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST254**Prereq: **None****SPAN285 Asian Latino Encounters**

In this course, students will analyze and discuss a variety of cultural productions (literary texts, films, songs, blogs, etc.) that reveal the overlooked connections between Asia and Latin/x America. We will begin examining views of Asian culture and Asian women of late 19th-century and early 20th-century Spanish American and Filipino writers (such as Darío, Tablada, Gómez Carrillo, Balmori, etc.). Then we will read various texts by Latin American writers who lived for some years in different parts of Asia throughout the twentieth century (e.g. Pablo Neruda in Southeast Asia, Octavio Paz in India, Araceli Tinajero in Japan, etc.). Finally, we will examine diverse works by writers/artists of Asian descent in Latin America as well as "Asian Latina/os" in the US. Some of the questions we will address are: How have the views towards Asia and Asians changed throughout the past century in Latin America? How does Philippine literature in Spanish produced during the US colonial period modify our conception of what is "Hispanic," "Asian," and "American"? How do Asian Latin American and Asian Latinx writers and artists represent themselves through culture?

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST241**Prereq: **None****SPAN286 Bolívar's Interpreters: Nation Construction in the Americas**

No figure has been seized upon more as a symbol of cultural and political unity in Latin America than the liberator Simón Bolívar. In this course, we will examine not only the case of contemporary Venezuela with its cult-like tradition but also several of the countless appropriations of Bolívar that have occurred across the Americas and in Europe in the 180 years since his death. From the Cuban José Martí to the Colombian García Márquez, from the Spaniard Miguel de Unamuno to the U.S. socialist Waldo Frank, from, to be sure, the powerful tradition of the Latin America essay with its identity politics to the U.S.-led Pan Americanism of the 1920s, '30s, and '40s, Bolívar has been made to serve complex and important functions in discourse about national and continental identity. To consider all this, we will study a number of rewritings of Bolívar's life and works, focusing on the dynamic process in which literary, cultural, and political traditions have been formed around him, while giving special attention to issues bearing on race, gender, and modernization. A wide range of texts will be examined, including letters, essays, poems, novels, screenplays, and films.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **LAST258**Prereq: **None****SPAN287 Constructions of the Self**

How does one define oneself? What forces are active in the creation of our personal identities? How much control do we exercise over these processes? What role do writing and literature play in the construction of notions of the self? While these questions are timeless and know no geographical boundaries, we will examine how several different Latin American and U.S. Latino authors have addressed these concerns in their art, with an eye toward understanding the cultural specificity of each of their propositions, as well as how writing itself becomes the subject of writing in the search for subjectivity.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Prereq: **None****SPAN288 Territories of Dwelling, Desire and Resistance in Latin America**

This course seeks to examine the ways in which diverse geographical spaces in Latin America have been produced, negotiated, and contested from the past century to our times through cultural practices that construct them as territories of dwelling, desire, possession, dispossession, and resistance. We will focus on texts and practices--literature, film, performance, and the visual arts--that seek to destabilize the hegemonic (colonial) gaze that has been projected onto rural spaces for centuries, which in our times manifests itself through extractivist and other capitalist practices, and pay close attention to local modes of dwelling and the relationships among community, embodiment, gender, and desire. We will trace how these texts intervene in urgent debates about the destiny of rural lands, the uses and abuses of nature, and the place of rural peoples, the struggles for peasant and indigenous rights, environmental justice, and the construction of alternative modernities. We will focus particularly on the Andean and Amazon regions (mountains, rainforests) of South America, as well as other rural tropical areas.

Often, the Amazonian region has been considered a marginal space within the territorial limits of Perú, Colombia, Venezuela, and Brazil. However, this territory is and has been key for these nations' past, present, and future. Beyond its outstanding biodiversity, the Amazon rainforest has housed for various centuries multiple and diverse native and non-native linguistic and ethnic groups. From the original Yanomami inhabitants to the contemporary European descendant citizens of Iquitos, the Amazonian territory has been a zone of contact where multiple cultural and cosmological views interact. In this class students will engage with a variety of materials, including literary works, travel diaries, films, and photographs that explore the Amazon rainforest: modern odysseys (La Vorágine), shape-shifting ghost stories (Las tres mitades de Ino Moxo), accounts of guerrilla warfare in the jungle (Naturaleza común), and apocalyptic prophecies (A queda do céu). By analyzing the literary and audiovisual archive resulting from multiethnic and multilingual interactions in the region, students will examine the role of the Amazon and its inhabitants in shaping the modern Latin American nations surrounding it. They will acquire a comprehensive understanding of the Amazonian region, its cultural diversity, and the complex issues it faces, such as racial and ethnic clashes, resource extraction, and the existential threat this poses to both human and non-human beings inhabiting it.

SPAN290 From the Muralists to the Narconovela: The Public Intellectual in Mexico

Mexican writers, intellectuals, and artists, both male and female, have long been recognized for the brilliance with which they have used their work to comment on and shape the direction of the Mexican state and to engage with the multiple traditions (indigenous, European, and mestizo) that define them. In this course, we will examine the writings and artistic and filmic work of several major figures with the goal of understanding how they see and imagine Mexico in particular historical moments. The course will cover the entirety of the 20th-century and the beginning of the 21st, extending from the Mexican Revolution (1910--1917) and the Muralists (1920s--40s), through the post-1945 period including 1968, and to the drug wars and the Zapatista movement (since 1994). Students will analyze novels, essays, art, poetry, and film.

SPAN291 Spanish American 'Modernismo' in a Global Context

The publication of Nicaraguan Rubén Darío's *AZUL...* in 1888 is often considered to be the inaugural event of "modernismo," the first Spanish-language literary movement that originated in Spanish America and spread thereafter throughout the Hispanophone world. In March 1916, about a month after Darío's death, a magazine in the Philippines claimed that Darío also belonged--at least "spiritually"--to the Philippines. Inspired by this statement, in this course students will read poems, short stories, and crónicas (short journalistic articles) by canonical Spanish American modernista writers, such as Darío, Julián del Casal, José Martí, Amado Nervo, José Enrique Rodó, Leopoldo Lugones, and Delmira Agustini, in conjunction with Filipino modernistas, including Fernando María Guerrero, Jesús Balmori, Manuel Bernabé, and Evangelina Guerrero. We will also read a selection of works of Spanish writers, such as Salvador Rueda, who visited Cuba and the Philippines in the 1910s. Some of the salient characteristics of modernismo that we will cover are the rejection of immediate reality and materialism, the search for linguistic renovation and cosmic harmony, and the celebration of Hispanism. When focusing on this last aspect, we will assess how modernismo helped to keep Spanish America connected not only to Spain but also to the Philippines, which became a U.S. territory in 1898, alongside Cuba and Puerto Rico. Thus, we will explore to what extent modernista writers responded to the spread of U.S. imperialism.

SPAN293 Writing Women's Bodies: Gender and Sexuality in Latin America

We will explore the work of the novelists Diamela Eltit (Chile), Cristina Peri Rossi (Uruguay), and Samantha Schweblin (Argentina), among the most intriguing and innovative contemporary Latin American writers. We will discuss a variety of themes such as love, sexual desire, friendship, the body, violence, and ecology. In particular, we examine the relationship between language and gender formation and explore what it means to perform feminist readings.

This course studies important and groundbreaking films, novels, and poetry by contemporary gay, lesbian, and transgender artists. It focuses on their strategies to survive, respond to, and defy the changing socio-political Latin American landscape of the last 80 years. We will introduce some key critical concepts and debates from queer theory to guide our discussions. Some of the artists we will study include: Alejandra Pizarnik, Lucía Puenzo, Manuel Puig, Pedro Lemebel, Karim Aïnouz, Lorenzo Vigas, Rosamaría Roffiel, and Norma Mosgrovejo, among others.

SPAN295 Voices, Noises, and Son: Modern Sounds in Hispanic Caribbean Cultures

What happens to our understanding of Hispanic Caribbean cultures if we think about it through the category of sound? From the recorded voices of indigenous Caribbean peoples denouncing the atrocities of neo-colonialism to the contemporary Afro-Caribbean reggaeton rhythms in San Juan, sound has been a key component for this region's expressions and literatures. In this course, students will explore how multiple kinds of sound-voices, noises, music, and rhythms-shape and define the literatures and cultures of the Caribbean basin. We will read literary works and pay attention to the "sounds" described in them in order to examine how diverse ethnic groups have contributed to the production, perception, and transformation of various Caribbean "sonorous" landscapes.

SPAN296 Cuban Literature and Film: Imagination, Revolt, and Melancholia

This course surveys the major aesthetic and socio-historical movements in modern and contemporary Cuba. Since the late 19th century, the island of Cuba has been at the center of a number of key epochal disputes: between colonialism and independence, racism and racial justice, neocolonialism and revolution, liberalism and socialism, isolationism and globalization. In the arts, the turn of the century launched a period of great imaginative invention. Considering the singular place of Cuba in Latin America, the Caribbean, and the globe, this course addresses some of the most representative works of Cuban literature and film since independence until the present time. Imagination, revolt, and melancholia are the three concepts that will orient our discussion. Imagination

refers both to artistic creation and to the collective capacity of projecting new worlds, utopias, or impossible realities. Revolt, as opposed to revolution, is not restrained to politics as usual but relates rather to a deep experience of discontent and a return (from the Latin *revolvere*) to ancient psycho-social strata. Finally, melancholia serves as a point of view to understand what happens when history does not live up to emancipatory expectations. Special attention will be given to Afrocubanismo, ethnographic literature, the avant-garde aesthetics of the group *Orígenes*, Marvelous Realism, testimony, revolution, socialist experimental film, diaspora, the Special Period, and post-Soviet life.

SPAN298 "Un pedacito de la historia negra": Afro-Latin American Literature and Culture

The significant contributions of Afro-descendent individuals to the development of Latin American culture have been frequently overlooked or torn to pieces. Yet, the experiences and bodies of racialized people have been key in shaping and transforming the region's culture. Beyond their representation in early colonial and republican works, Afro-descendent writers and characters have been crucial in the modern aesthetics of Latin American literatures. Along with musicians and other artists, they have provided a continuous challenge to the idea of Latin America and its cultural production as a product of a homogeneous cultural and racial miscegenation. Inspired by Colombian artist Joe Arroyo's opening to a famous salsa song, wherein he sets out to tell "un pedacito de la historia negra," in this seminar we will study short stories, novels, poetry, music, and film, including works that explore the experience of being racialized in Latin America, poetic experimentalism through orality, and the retelling of the history of Black resistance in the Caribbean through modern media. Engaging with historical and contemporary issues such as racial discrimination, social inequality, and cultural pride and preservation, this course invites students to critically analyze the fundamental role of Afro-Latin Americans in shaping Latin American cultures and histories.

SPAN299 Decolonizing Speculative Fiction in Latin America

This course interrogates what it means to imagine alternative futures in colonial and postcolonial settings. As the writings of conquistadors, explorers and

missionaries show, Europe envisioned the New Continent as the land of the future or utopia, to the point that contemporary decolonial theorists have observed that nothing was "discovered" by the first European travelers to America but the idea of discovery itself. Modern temporalities of progress became thus inseparable from the image of the Americas as a frontier of imperial expansion, religious conversion, and economic exploitation. If European SF (science fiction/speculative fiction) emerged hand-in-hand with positivist notions of progress and civilization, Latin American SF contested Eurocentric epistemologies by claiming the ability to imagining the future and fictionalizing worlds otherwise. The course will center on three key moments of Latin American literary history: 1) the early to mid-twentieth century experiments in fantastic literature from the Southern Cone, which broke with realist mimesis from the margins of modernity; 2) post-1989 SF novels from Bolivia, Guatemala and Chile, that address the making of neoliberal globalization from the vantage point of the Global South; and 3) contemporary Dominican and Cuban works in which Afro-Caribbean religions and gender formations engage in productive conversations with digital technologies, biomedical engineering, game cultures, and climate change.

THEATER (THEA)

THEA105 Production Laboratory

This course focuses on the technical aspects of stage and costume craft: scenery and prop building, lighting execution, and costume building. It offers a hands-on experience where students participate in making theater productions happen. All sections will participate in the backstage work of the Theater Department's productions. Forty to 60 hours (to be determined) of production crew participation outside of the regular class meetings are required. While this course is required of theater majors, it is also recommended for students wishing to explore an aspect of theatrical production and is excellent preparation for theater design courses.

THEA114 Incarcerated Stories: Documenting In/Justice

Students in "Incarcerated Stories: Documenting In/Justice" will collaborate with formerly incarcerated individuals and their families to create performances of theater and music based on interviews, trial transcripts, prison memoirs, and other texts related to mass incarceration. Students will learn how to apply their skills as writers, performers, or musicians to community service and activism as they learn about the United States' criminal justice system and its position at the heart of systemic racism in America. The class will be taught remotely and the performances generated by the students and their formerly incarcerated collaborators will be disseminated as widely as possible, with the objective of amplifying marginalized voices to raise awareness of mass incarceration's social impact and the need for carceral reform. Due to the collaborative nature of this course, and its dependence on interaction with formerly incarcerated individuals and their family members who will be visiting the class remotely via Zoom, weekly online attendance is required.

THEA118F Off-Broadway: Contemporary American Playwriting (FYS)

This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

THEA135F Documentary Performance: Theater and Social Justice (FYS)

This course will introduce students to theater as a medium for exploring issues related to social justice and political activism. We will examine techniques used by documentary theater artists such as Emily Mann, Doug Wright, Moises Kaufman, Anna Deavere Smith, and Jessica Blank, who create plays based on interviews, newspaper articles, memoirs, and other documents related to controversial social issues. The course will begin with an investigation of the issue of mass incarceration and will include visits from formerly incarcerated individuals who have agreed to recount their experiences in prison. These prison stories will be the primary sources for the course's initial writing assignments, which will consist of short performance scripts and analytical papers. Subsequent weekly assignments will include performance scripts and analytical papers based on issues that will range from gay rights and racism to sexual violence and the stereotyping of Muslim women.

THEA143 Gospel, Rap, and Social Justice

Students in this course will collaborate with formerly incarcerated individuals on the creation of theater and music performances inspired by their collective reading of Dante's Divine Comedy, Michelle Alexander's *The New Jim Crow*, Anna Devere Smith's *Notes From the Field*, and a variety of texts documenting the impact of mass incarceration on communities of color. Our work will consider the ways in which current and formerly incarcerated activists have used gospel, rap, spirituals, and other forms of music and art to survive, heal, and advocate for change in the criminal justice system. The performances generated by the class will call attention to the relevance of Dante's poem to contemporary issues of social justice with the objective of amplifying marginalized voices and raising awareness of the injustices embedded in the carceral state.

No previous performance experience is necessary to participate in the class, but students with vocal and instrumental musical skills are welcome.

THEA150 Introduction to Performance Studies

What is performance? Is it an event or an action? Is it what happens on a stage or in your living room? Furthermore, what does performance have to do with our understanding of how race, gender, sexuality or community function both historically and in the present? This course approaches theater and performance as both a critical lens for viewing social and cultural life, and as a creative practice of worldmaking. Students will be introduced to the theoretical, critical, and creative field of performance studies. Pulling from anthropology, theater, dance, queer studies, critical race theory, and linguistics, we will look at performances ranging from the play "Fairview" by Jackie Sibbles Drury, to "Fires in the Mirror" by Anna Devere Smith, to the punk performance work of Sister Spit, and the story weaving work Spiderwoman Theater. In this writing-intensive course we will pay particular attention to queer artists and artists of color.

THEA172F Staging America: Modern American Drama (FYS)

Can modern American drama--as cultural analysis--teach us to reread how America ticks? Together we will explore this question as we read and discuss some of the most provocative classic and uncanonized plays written between the 1910s and the present. Plays by Susan Glaspell, Eugene O'Neill, Mike Gold, workers theater troupes, Clifford Odets, Tennessee Williams, Arthur Miller, Amiri Baraka, Arthur Kopit, Ntozake Shange, Luis Valdez, David Mamet, Tony Kushner, Ayad Akhtar, and others will help us think about what's at stake in staging America and equip us as cultural analysts, critical thinkers, close readers of literature, and imaginative historians of culture and theater. This seminar will introduce first-year students to the kind of critical thinking developed in majors such as English; American Studies; African American Studies; Feminist, Gender, and Sexuality Studies; College of Letters; Theater Studies; and the Social and Cultural Theory Certificate.

THEA180 Reading Plays for Production: Conceiving for Performance

Propose, read, and discuss plays in consideration for production for Theater Department Mainstage. Reading a script is different than reading a novel: in this class, we will examine how to read a text for performance. Over the course of the semester, we will consider a range of plays and approaches to performance--from classics to contemporary plays to devised work. In the course, students will explore plays and performance ideas recommended by the community with an emphasis on examining how they might operate as productions within the Theater Department's Mainstage. Students will lead discussions, gain skills in text analysis, dramaturgy, and creative and practical thinking as they consider what type of work the Theater Department might produce. This class will result in a slate of scripts and performance ideas that will be offered to the Theater Department faculty for consideration for one of the Mainstage productions. This course counts towards the Theater Arts category for the THEA major. This course may count (one time only) towards the Performance Practice credit requirement for the THEA major.

THEA183 The Actor's Experience

The Actor's Experience is an introduction to the practices of acting in rehearsal with a director. It is held in conjunction with THEA281- Intro to Directing; students will be working directly with the student directors in that class. Basic

aspects of staging, collaboration, script, and character analysis will be covered. Commitment to attending scheduled rehearsals is vital. Each actor will have the opportunity to perform in both a short-form scene (mid-term) and long-form scene (final), performed in front of the class and invited guests.

This class is a chance to be in community with other students interested in theater, and practice collaboration and care. Together students will consider why theater matters, and how theater-makers can offer more care to themselves, each other, and our audience. Students will participate in in-class staging exercises, outside rehearsals with peers, reading discussions, and viewing plays.

The Actor's Experience is a half-credit class intended for majors and non-majors at varying levels of experience and is held in conjunction with the Intro to Directing class.

THEA202 Greek Drama: Theater and Social Justice, Ancient and Modern

This course introduces students to Greek drama as produced in its original setting in ancient Athens and then adapted in modern times. The majority of our readings will be drawn from classical material: tragedies by Aeschylus, Sophocles, and Euripides, comedies by Aristophanes, and selections from Aristotle's *Poetics* and Plato's *Republic*. We will look at production practices, acting and audience experience, and the role of theater in shaping cultural values. Questions will include: How does theater as art reflect the personal, social, and political life of the Athenians? What is the connection between the development of Greek drama and the growth of the first democracy? What are the emotions of tragedy for its mythic characters and for its real audience? And why have we been talking about catharsis for centuries? What is the relationship between emotions, drama, and social justice? For the last part of the semester, we will turn to adaptations of Greek tragedy in the 20th and 21st centuries by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, and Yael Farber. We will discuss how the dilemmas and emotions of tragedy are replayed in response to World War II, the South African Truth and Reconciliation Commission, PTSD, and consumer culture, among others.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-CLAS**Identical With: **CLST202**Prereq: **None****THEA203 Playing in the Theater Archive: An Introduction to Performance Studies**

This class will serve as an introduction to theatricality, performance studies, and aesthetic theories. We will analyze plays and performances as we examine classical and contemporary conceptions of the theatrical. Given the complex and varied roles theater has played throughout history, we will begin by placing pressure on the terms "theater" and "history." We will pay particular attention to the intersections between theater history, dramatic literature, cultural performance, and the role of the theater archive as we explore key moments in theatrical development. Readings will be organized geographically and diachronically, giving us a mobile and flexible account of theater, theory, and practice across a variety of cultures. At the end of this course, students will be familiar with touchstones in theater history; be able to write a critical and descriptive performance paper; demonstrate a knowledge of critical performance and aesthetic theories; and use performance as research methodology.

This counts as a Theater Methods course for the theater major.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA204 A Nation and its Theater: Cultural and National Identity in Performance**

In the wake of Black Lives Matter, the insurrection in January 2021 on our nation's capital, a global pandemic, and the Trump presidency, the very notion of what "America" is, has been, or ever was is being grappled with on a global scale. The nation is fractured in its sense of national and cultural identities and is struggling to imagine a collective future. This course examines the concept/model of a "national theater" and interrogates the cultural, historical, and political role these institutions play within their countries. It examines what role the theater can, should, or should not play within the formation, reinforcement or dismantling of national and cultural identities.

Through an examination of models such as the Teatro Nacional de Venezuela, the National Theater Company of China, the Uganda National Cultural Center, Ireland's Abbey Theater, and France's Comédie-Française, this course looks at: (1) how politics, history, and culture give rise to/craft the shape of national theater agendas; (2) the role of national theaters in building/challenging/reinforcing national and cultural identities; (3) how government agendas and public funding can affect the role that national theaters play; and (4) how the colonial legacy of a European national theater model has influenced non-Western models.

Students will engage with theoretical and non-western notions of "nation," and debate the role/responsibility of a "national theater" to provide representation and inclusive/pluralist notions of cultural identity. Students will then look at historic attempts in the United States to create national theater concepts such as the Federal Theater Project, the Living Newspaper, and the American National Theater and Academy. For their final project, students will be asked to imagine/craft a proposal for a "National Theater" for the United States.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA210 Shakespeare**

This lecture course is designed to introduce students to the often-demanding texts of Shakespeare's plays, their major genres (comedy, history, tragedy, and romance or tragicomedy), and the contexts in which they were produced. Shakespeare's career spanned a period of remarkable social, political, religious, and economic change, including the Protestant Reformation, the transition from feudalism to mercantile capitalism, early colonialism, global trade, and the rise of the first purpose-built, commercial theaters. Innovations in dramatic form and genre, which Shakespeare helped craft, sought to make sense of these momentous shifts for a diverse public theater. The lectures assume no prior knowledge of Shakespeare or his times and are designed to illuminate the texts of the plays by examining their cultural contexts.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-ENGL**Identical With: **ENGL205**Prereq: **None****THEA211 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects**

You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The

first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

THEA213 Performing Arts Videography

This course provides an introduction to shooting and editing video and sound with a particular focus on the documentation of dance, music, and theater performance. Additional consideration will be given to the integration of videographic elements into such performances. Students will work in teams to document on-campus performances occurring concurrently. Related issues in ethnographic and documentary film will be explored through viewing and discussion of works such as Wim Wenders's *Pina*, Elliot Caplan's *Cage/Cunningham*, John Cohen's *The High Lonesome Sound*, and Peter Greenaway's *Four American Composers*.

THEA215 Latinx Theater in the U.S.: Analysis & Performance

This Latinx theater study and performance class will examine American-born playwrights of the Latinx Diaspora. Playwrights who are of Mexican, Cuban, Puerto Rican, and Dominican descent are just a few of the many Latinx identities in the United States. The goal will be to examine the specific cultural identities within the United States, their origins, experiences, and stories in this country. We will analyze and explore the universal resonance of these plays as well as their current relevance to contemporary American culture, both politically and socially. Students will be required to do monologue work and scene study for the performance portion of this course.

THEA216 Performance Curation as Relational Praxis

When we hear the word "curator" we might think of the iconic fictional character of Bette Porter--someone who works in a museum or gallery with a vision for how paintings, sculptures, and wall texts are put together for a show. In this class we will expand on this idea of the curator to explore what happens when we add performance to the task of curation. Or, put differently, we will ask what happens when we remove performance from the more theatrical tradition to add it into the gallery and museum space. Thinking between performance studies, visual art, and museum studies, this course explores the role of the performance curator. Connecting performance curation to community engagement, social practice, and transformative justice, we will explore the ways in which performance might address questions of racial inequality, gender variance, class access, and dis/ability. We will ask: How does performance live in art institutions? How do you compensate a performer for a fleeting piece of work? How does performance help us reimagine the space of the art institution itself? Does performance curation make possible new genres of performance? Can, and how, might we apply its practices back to more traditional theater contexts at the university, in the art world, and beyond?

In this class students will explore theories of performance curation as a practice of not only selecting and choosing, but of building relationships. We will look at museum shows, arts organizations, and performance scholars to eventually build individual proposals for our own performance events. Artists and scholars to be discussed include Nivald Acosta, Mariana Valencia, Justin Allen, Morgan Bassichis, Jamie Shearn Coan, Ralph Lemon, Thomas Lax, Adrienne Edwards, Tourmaline, Carolyn Lazard, The Poetry Project, Center for Experimental Lectures, Wendy's Subway, Adult Contemporary, and more.

THEA217 Performing Democracy: Theater, Activism, and Community Engagement

This course will give students the opportunity to use theater as a tool for community engagement and social activism. No theater experience is required, but students will be asked to make informal presentations of texts related to issues of social justice, climate change, health care, and economic equality in a variety of community settings that may include senior citizen homes, public schools, or political campaign rallies. During election years these presentations may involve re-enactments of presidential debates and political speeches by figures from Greta Thunberg, Chief Joseph, James Baldwin, and Barack Obama to Richard Nixon, William F. Buckley, Emma Goldman, and Donald Trump. These presentations will be designed to elicit discussion and debate from community audiences and encourage those community members to vote and participate in the democratic process as advocates for the principles they believe in most strongly. Students will collaborate with their community partners in creating new performances that give voice to their experience and concerns.

THEA220 Performing Indonesia

This course will examine the theater, dance, and puppetry of Indonesia in the context of its cultural significance in Indonesia and in the West. Students will read a variety of texts related to Indonesian history, myth, and religion. Students will also read books and essays by anthropologists Hildred Geertz, Clifford Geertz, and Margaret Mead to understand how the arts are integrated into the overall life of the island archipelago. Artifacts of physical culture will also be examined, including the palm-leaf manuscripts that are quoted in many performances; the paintings that depict the relationship between humans, nature, and the spirit world that are the subject of many plays; and the masks and puppets that often serve as a medium for contacting the invisible world of the gods and ancestors. Translations of Indonesian texts will be analyzed and adapted for performance. The direct and indirect influence of Indonesian performance and history on the West will be discussed by examining the work of theater artists such as Robert Wilson, Arianne Mnouchkine, Lee Breur, and Julie Taymour, who have all collaborated with Balinese performers.

THEA221 Rescripting America for the Stage

This is a writing course for students interested in the study and practice of adapting texts for performance from a variety of source materials related to all forms of American culture from the revolution to hip hop. Initially our primary source material for adaptation will be Herman Melville's "Confidence Man." We will examine a range of performance texts adapted from nontheatrical sources, including Lin-Manuel Miranda's "Hamilton" and Dario Fo's subversive rewrite of Columbus' voyages, "Johan Padan and the Discovery of the Americas." Ancient Greek drama will also be studied for its dramatic structure and for its significance as a source for American adaptations such as Lee Breuer's "Gospel at Colonus." This course counts as a workshop and techniques course for the Writing Certificate.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA222Z Neo-Futurist Radio: Experiments in Audio**

This course will immerse students in the unique form of performance-making called Neo-Futurism as well as teach them how to create their own Neo-Futuristic work for radio. The four key principles of Neo-Futurism are (1) you are who you are, (2) you are doing what you're doing, (3) you are where you are, and (4) the time is now. These guiding principles shape honest, personal, timely, relatable stories that are crafted with compelling framing and presented in audio or on stage.

During the intensive, students will learn how to express their voice through the Neo-Futurist lens in writing exercises, study of specific works, and visits from members of the New York, Chicago, and San Francisco Neo-Futurist ensembles. Students will also be introduced to techniques of sound recording and editing (working primarily with the software Adobe Audition), in addition to expansive and experimental methods of developing sonic perspectives for their work. The course will culminate with students writing, performing, recording, and designing a small collection of Neo-Futurist audio plays to be featured in a special episode of the show "Hit Play" along with pieces from students at Oberlin College. These pieces will be developed throughout the course by methods of group critique, generative feedback, and sound designing sessions. Online Course. Special Schedule: 10 a.m.-12 p.m. + 1 p.m.-3 p.m. (1/10-1/11, 1/13, 1/16, 1/18, 1/20); 1 p.m.-5 p.m. (1/12, 1/17, 1/19, 1/23)

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA223 Femme Fashion and Culture in America: 18th to 21st century**

In this course, students will explore through a hands-on design approach the history of women's fashion and clothing in America and Europe. This history is long and diverse, with dress styles changing rapidly as the world and its expectations of women adapted and developed. In this course, you will study how social and economic change affected women's fashion in America--from the societal distinctions and separations of classes in the 18th century to the ready-to-wear era through the 21st century and the way it has shaped the female experience. We will analyze this through plays from each period, visual research, costume renderings, and materials research.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Prereq: **None****THEA231 Classic Spanish Plays: Love, Violence, and (Poetic) Justice on the Early Modern Stage**

From 1580 to 1690, Spanish and Latin American playwrights created one of the great dramatic repertoires of world literature, as inventive, varied, and influential as the classical Greek and Elizabethan-Jacobean English traditions. A distinguishing feature of this theatrical tradition is the unusual prominence it lent to actresses (and roles written for them), as well as to women in the paying audiences. This profit-driven popular entertainment of its day appealed to the learned and illiterate, to women and men, and to rich and poor alike. And the plays correspondingly mixed high and low characters, language, genres, and sources, with results regularly attacked by moralists. Vital, surprising, and ingenious, they exposed the creative tension between art and profit on a new scale, a tension that remains alive for us. We will examine five of the greatest of these plays by Cervantes, Lope de Vega, Calderón de la Barca, Tirso de Molina, and Sor Juana Inés de la Cruz (in Mexico or "New Spain") in a variety of genres and modes (history, epic, romantic comedy, tragedy, Islamic borderland, metatheater, parody, siege play, philosophical and theological drama), with their deft character portraits (the original Don Juan by Tirso; Calderón's "Spanish Hamlet" Segismundo; Lope's spitfire diva Diana, the Countess of Belflor; and Sor Juana's cross-dressing comic virtuosi) and their spirited dialogue, inventive plots, and dazzling metrical variety. We will look at the social conditions that enabled the Spanish stage to serve as a kind of civic forum, where conflicts between freedom and authority or desire and conformism could be acted out and the fears, hopes, dangers, and pleasures generated by conquest, urbanization, trade, shifting gender roles, social mobility, religious reform, regulation of matrimony and violence, and clashing intellectual and political ideals could be aired. We pay particular attention to the shaping influence of women on the professional stage (in contrast to England) and to performance spaces and traditions. Organized around the careful reading of five key play-texts in Spanish, together with historical, critical, and theoretical readings, this course assumes no familiarity with the texts, with Spanish history, or with literary analysis. However, an interest in engaging these wonderful plays closely, imaginatively, and historically is essential. There will be opportunities to pursue performance, adaptation, and translation.

This counts as a Theater Method course for the Theater Major.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **SPAN231, COL313**Prereq: **None****THEA232 Instrument-Body**

The ancient Greek word organon meant both instrument and sense organ, hence the development of a shared word in English for organ (as in a Hammond B3 organ) and organ (as in a kidney). This etymological overlap opens onto a set of generative questions into the nature of instruments: Are they inside or outside the body? Is the body an instrument? If the body is an instrument, who plays it? If an instrument is outside the body, what kind of object is it--a fetish? a prosthetic? an enhancement? an extension? a tool? a commodity? a technology?--and what does it do to the player? Can experimenting with new body-instrument relations become a pathway towards re-organ-izing the body and its relations? Instrument-Body is both a seminar and a studio course that takes these questions as a point of departure for creative and critical experimentation. We will read widely across the fields of musicology, art history, performance studies, queer studies, and critical race studies to investigate questions of instrumentality, embodiment, and technology. In addition, we will create performances across three units: "make an instrument," "break an

instrument," and "make yourself an instrument." Students who already play instruments are encouraged to enroll, as are students that have no preexisting relationship to musical instruments.

THEA233 All Ah We: Contemporary Afro-Caribbean Drama & Performance

What are the dramatic utterances of Afro-Caribbean artists? How do Afro-Caribbean playwrights and other narrative-based performance artists present "Caribbean" and/or "West Indian" subjectivities in ways that are shared, yet critically different? In what ways are Afro-Caribbean dramas and performance pieces repositories for the practical, the theoretical, the sociological, the political, the imagined, and the lost? In answering these questions and more, we examine these textual and embodied expressions from the complicated crossroads of class, creolization, diaspora, ethnicity, folklore, gender, history, indentured servitude, isolation, language, race, religion, and slavery. At all times, this course revels in the polyphony that is Afro-Caribbean drama and performance.

THEA235 Writing on and as Performance

This course focuses on developing descriptive critical and creative writing skills in relation to both witnessing and staging live performance. Through close readings of texts by authors including José Esteban Muñoz, Jennifer Doyle, Eileen Myles, Lydia Davis, Toni Morrison, Lidia Yuknavitch, Oliver Baez Bendorf, Glenn Ligon, Eve Sedgwick, Fred Moten, and Billy Ray Belcourt, this course will challenge students to craft ideas and arguments by enhancing critical and creative writing skills. We will experiment with style and form from academic arguments, to performance lectures, artist interviews, and free-form creative prose essays. Students will complete in-class writing assignments and exercises in response to written, recorded, and live performances by a range of contemporary artists. Students will also be asked to complete hybrid creative writing assignments in response to prompts that imagine writing as always in conversation with performance. More specifically, students will write pieces about embodiment, sound, and the visual. This class is particularly interested in ways in which gender, race, and sexuality are shaped by language, and how language as a performative tool can be a site for "insurrection" (Moten) and "listening in detail" (Vazquez).

This course encourages students to experiment with their writing practices. Over the course of the semester students will be asked to write four separate creative/critical pieces, all of which will be workshopped in the space of the classroom.

THEA236Z Writing the Body

How does the body write? Do we trace our words with fingers and toes, with a pen and paper, with flour or glitter or dust or the soles of our feet? Can the written word remind us that we are more than our eyes or our heads? Writing the body is an attempt to link the worlds of the written and the somatic through the act of writing. This class is both a generative creative writing course and a theoretical exploration of the ways in which the body has been rendered in literature, poetry, and philosophy. Putting queer studies, disability studies, Black studies, and Indigenous studies into conversation with prose, plays, and poetry, students will explore different strategies of embodied writing. Looking to the work of Maggie Nelson, Jean-Luc Nancy, Eileen Myles, Christina Sharpe, Aisha Sabatini Sloan, Hortense Spillers, Eve Tuck, Billy Ray Belcourt, Torrey Peters, Wendy Ortiz, Lidia Yuknavitch, Jordy Rosenberg, Gabrielle Civil, Ursula Le Guin, adrienne maree brown, and Frank O'Hara students will produce a written work that moves promiscuously between theory and creative nonfiction.

THEA238 The Intercultural Stage: Migration and the Performing Arts in the Hispanic World

Hybridity, heterogeneity, transnationalism, and interculturalism are just a few of the terms that have proliferated within the marketplace of ideas over the past several years as reflections, from within the field of critical theory, of one of

the contemporary world's dominant social realities: the massive displacement of peoples across borders and the creation of constricted multicultural zones of interaction and conflict within the confines of single nations. The Spanish-speaking world has been affected by this phenomenon in particular ways, in both Spain and North America. In this course, we will study how Spanish, Mexican, and Chicano playwrights and stage artists working in various genres have responded to this reality, how and why they have chosen to craft the collective experience of the border as performance, and how they have addressed the cultural and political tensions that are associated with this experience. The framework for our study will be comparative in both content and format. We will focus on two borders--the Strait of Gibraltar and the Río Grande (Río Bravo)--and on the two corresponding migratory experiences: from North and sub-Saharan Africa into Spain, and from Latin America into the U.S. This course will be taught simultaneously at Wesleyan and at the Universidad Carlos III in Madrid, Spain. When possible, classes will be linked through videoconferencing. Wesleyan students will collaborate with their counterparts in Spain on various projects and presentations. In general, this course is designed to help students develop skills of critical analysis while increasing their Spanish language proficiency and intercultural awareness.

THEA239 Songwriting Workshop

In this course, students will learn the basics of songwriting including form, lyric writing, chord progression, rhythm, storytelling, etc. We will focus first on "traditional" song form and its component parts (verse, chorus, bridge), and then branch out to less traditional and freer forms. We will discuss lyrics in depth and analyze lyric-writing techniques in various genres such as pop, rock, rap, musical theater, and others. As time, interest, and abilities allow, we will also delve into the world of music theory with an emphasis on function and structure. Students will be guided through practical matters such as transcription, recording, and publishing on social media platforms, so that they can apply the principles and guidelines discussed in class under real world circumstances.

THEA243 Chinese Theater and Drama

This seminar examines Chinese theater and drama from their beginnings to the late 20th-century. We engage dramatic texts as well as performance practices; thus, the course draws on material from theater history, performance and acting conventions, and the literary history of drama. Readings and discussions span major genres of dramatic writing and their different modes of performance, including the dramatic genres of zaju, chuanqi, and modern/contemporary spoken drama, and performance styles of Beijing opera, Kun opera (Kunqu), and huaju (spoken drama). Play topics range from ghost stories to romances, historical/political dramas to comedy. We explore the legacies of specific actors, including the famous Mei Lanfang; consider experiments in modern Chinese drama; and compare Chinese and "Western" ideas of theater (such as those put forth by Stanislavsky and Brecht). To the greatest extent possible, we will engage materially and physically with Chinese theater and drama history through archive visits and performance workshops.

THEA248 Ethical Design for Stage and Fashion

Now more than ever we must look at the way we as consumers and large businesses are impacting our planet as well as the future of our planet. It has been estimated that 85 percent of our clothing ends up burned or in landfills each year and that the average American throws away about 81 pounds of clothing every year, and that's just America! In this class students will tackle a variety of hands-on projects that will explore clothing, wig, hat and accessory construction using unconventional materials. Students will explore their personal habits as a consumer of "fast fashion" and the implications fast fashion has on our economy and planet, as well as inspecting the fashion, theater and film industry participation in fashion waste. Students will also explore ways in which society can embrace sustainability and become more eco-friendly. By the end of the semester students will have a new or broader understanding of ethical and sustainable fashion and how to apply it to their everyday lives moving forward as well as a range of projects to demonstrate these learned skills. Some of the questions we will explore in this class: What does sustainable fashion mean? What is ethical fashion? Do we need ethical fashion? What are small and large ways we as individuals and large businesses can lesson our fashion waste?

THEA254 The World of Federico García Lorca: Tradition and Modernity in the Spanish Avant-Garde

This course focuses on one of the most charismatic authors of the 20th century. Known primarily as a poet, playwright, and public intellectual, Federico García Lorca cultivated a literary language whose allure has proven to be timeless. By exploring the reasons for this, we will heighten our sensitivity not only to the magical power of Lorca's writing but to the potentially transformative power of language and literature in general.

Lorca's writing (1919-1936) spans a pivotal historical crossroads, when avant-garde artists sought to forge a new, revolutionary style representative of the profound social and political changes sweeping the world. Lorca, like so many

others of his day, did so fully cognizant of the national traditions within which he worked, and with a keen desire to modernize those traditions. We aim to develop a deep understanding of how Lorca's verse, plays, and high-profile initiatives intersect with his context in these terms.

Please visit the course web site at <http://span254.site.wesleyan.edu/> to review in detail the materials, objectives, and modes of assessment for this course.

THEA259 Face the Blank Page

A 13-week course for the beginning playwright. Students will read 12 plays and write essays on each one, in which they will explore the creation of the play. The why of it. Who is the main character, what do they want, what's stopping them from getting it, and finally, what is the point of no return? Students will look at the time and society in which the play is placed. What obstacles were part of their world; what did they have to overcome, and what did they have to accept? Every play will also serve as a prompt for a writing exercise that students will be responsible for. Students will take a character or situation from the play and make it their own. Also, as a group, the class will write an original play. Each student will be assigned a scene, and week by week the play will come together. This collective creation will be inspired by a song; everyone will have the same song, and each student will continue the play based on the scene that preceded it. Each student will be a part of building the structure of the play and will be able to put their own stamp on it.

THEA261 Sites of Resistance & Memory: Theater, Performance & Political Consciousness in Contemporary Spain

Compared to other literary genres, and given its essentially social (public) format, theater is an especially vulnerable mode of cultural expression and, therefore, can easily fall victim to both overt (institutionalized) and covert (social) systems of censorship. The tendency for authoritarian regimes to scrutinize stage practices is exemplified by the state censorship that prevailed under Franco (1939-1975) and that prompted Spanish playwrights to develop subtle strategies for resisting authority and for addressing the crucial social and political concerns of the day. The parliamentary regime born in the aftermath of the dictator's death in 1975 ushered in an era of experimentation unprecedented in recent Spanish cultural history. During these years, playwrights have increasingly embraced the struggle against more covert (social, market-driven) forms of censorship in attempting to craft a new social order for a new political context: a democratic mindset that will serve to solidify the foundations of the young democratic state. Our goal in this course is to trace these trends through a close reading of key works by the major Spanish playwrights active since 1950. We will focus on context, on how theater, society, and politics are intertwined, by evaluating both works of dramatic literature themselves and the place and meaning of the public, commercial, and alternative theater circuits where many of these plays were premiered. Our aim, broadly, is to understand the extent to which collective memory and national identity, as staged over the past three-quarters of a century, have become a battleground where Spaniards either seek or resist reconciliation with legacies of repression.

THEA263 Mythic & Modern: Reappropriating Classical Themes in Contemporary Drama and Performance

What does it mean to defy the authority of the patriarch, of family, or of government? How do these structures of authority intersect in contemporary society? How do we, today, understand "destiny"? How do we challenge it, and what are the consequences for doing so? How do we break the patterns of shame and disenfranchisement inherited from the shared past? These are just some of the social, political, and ethical concerns transmitted over time by playwrights, stage and performance artists, and film directors who treat classical myths as valuable constructs for interrogating our contemporary world and society. In this collaborative, project-based course we explore how classical myths have been appropriated within the modern Italian and Italophone cultural context. Just as important as our study and discussion of modern adaptations of classical models are the staged readings of key scenes incorporated strategically throughout the semester that help us develop an organic understanding of the material from the inside. Our overarching aims include: 1) exposing what persists in modern adaptations of classical myths, 2) tracking the kernels of change that the adaptations present, and 3) understanding why performers over time, working in disparate cultural milieus, continue to seek and derive inspiration from classical myths. The mythic figures we examine may include any of the following: Sophocles' *Antigone*, Euripides' *Oedipus* and *Medea*, Aeschylus' *Agamemnon*, as well as figures from the *Oresteia* and from such epics as Homer's *Iliad* and Virgil's *Aeneid*. This course is taught in conjunction with ITAL263 and FREN263. The final collaborative performance, scheduled during the final exams period, will involve students from across the Romance Languages and offers the unique opportunity for cohort building among students of French, Italian, and Spanish.

THEA265 Acting for the Camera: Film, Theater, and Television in the "Post"-Pandemic World

This studio course will explore the fundamentals of acting for the camera. A wide range of exercises and techniques will be used to cultivate a sense of ease and freedom and to develop the imagination, relaxation, concentration, focus and technical skills required to create life in front of the camera. The course will explore both film and television, and include auditioning and current industry film/tv practices, as well as how to navigate Zoom and other online platforms in professional readings, workshops, livestreams, and auditions. By the end of the course, students will have honed techniques enabling them to bring their full selves to the camera with confidence and a lack of self-consciousness, and be familiar with self-tapes, auditioning, and current industry practices and protocols in the film/TV/theater industry.

THEA266 Black Performance Theory

What does it mean to perform identity, to perform race, to perform blackness? How is blackness defined as both a radical aesthetic and an identity? In this course, we will focus on theater and performance as a resource for thinking about black history, identity, and radical politics in excess of the written word. Following recent work in Black Studies and Performance Studies, this class will pay particular attention to the doing of blackness, the visible, sonic, and haptic performances that give over to a radical way of seeing, feeling, and being in an anti-black world. Plays, films, and texts might include works by Fred Moten, Alexander Weheilye, Brandon Jacobs-Jenkins, Suzan Lori-Parks, Danai Gurira, Shane Vogel, Adrienne Kennedy, Sarah Jane Cervenak, Dee Rees, Celiné Sciamma, Saidiya Hartman, Huey P. Copeland, Darby English, Lorraine Hansberry, Hilton Als, Spike Lee, Isaac Julien, Martine Syms, Tavia Nyong'o, and Daphne Brooks.

THEA267 Revolution Girl-Style Now: Queer Performance Strategies

Looking to the rich cultural history of queer and feminist performance in the U.S, this course examines performances of gender, sexuality, obscenity, and refusal. In this class, we will ask how the terms "feminist" and "queer" come to determine a specific piece of theater or performance art. Is it the author's own political affiliation that establishes the work as feminist? Is it the audience's reading that gathers a work of art under a queer rubric? Furthermore, where does feminist performance meet queer performance? Topics will include feminist body art, AIDS activism, queer nightlife, installation and performance art, video art, and memoir. Focusing in on strategies for engaging the many meanings of the words "queer," we will pair theoretical readings with theatrical sites.

THEA269 Introduction to Performance Studies

Performance Studies is an interdisciplinary field (brushing up against anthropology, theater studies, and linguistics, critical race studies, psychoanalysis & queer theory) that orbits around conceptions of the live. This course will introduce students to the history of performance studies by looking at key texts that have defined the field. We will use the "performance" as a concept and lens to discuss art, theater, dance, music, everyday performances, and presentations of the self. Through close reading of theoretical texts, visual art works, and live performances will explore the social and cultural importance of performance and performativity, especially as they come to bear upon queer and minoritarian lives and dreams.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA273 BlaQueer Sounds: Queer Negotiations in African American Music

The term "BlaQueer," first coined by Tabais Wilson, is an invention of the intersectionality era; an acknowledgment of the unique and multifaceted experiences/identities formed at the nexus of racial, gendered, and sexual marginalization. In creating the portmanteau BlaQueer, Wilson underscores that, for people who are both Black and queer, these identities are inseparable, immutable, and irreducible. While the term BlaQueer, and by extension the concept it represents, is fairly new, there are long histories of Black queer people navigating and negotiating identity, revolutionizing and contributing to discourses on race, class, and gender. This course offers an exploration of the BlaQueer expressions, movements, and (most importantly) people that transformed American culture through music. While this course follows a historical arc, the primary aim of this course is to engage BlaQueer musical lineages through a critical interdisciplinary academic lens; accordingly, this course incorporates gender/women's studies, African American studies, performance studies, queer studies, and musicology.

THEA276 Body, Voice, Text: Theater and the Transmission of Experience

Theater can and does exist as a written text, but we all know that its existence on the page is meant as a precursor to its live performance out in the world. In this course, our approach to a series of Latin American plays will be informed by competing notions of the theater as both a field of academic inquiry (built on reading, study, research, and interpretation) and also as an art form (built on reading, rehearsal, repetition, direction, and interpretation). We will combine traditional academic study of the written dramatic text with theater workshop exercises meant to train actors for the delivery of the staged performance text. Students will thus gain an understanding of how academic study and and workshop rehearsal take different approaches to what is essentially the same goal/problem: how to interpret the text written by the dramatist, whether for meaning or performance. This course will be taught in Spanish.

THEA279 Music Theater Workshop

This class will be a collaborative, hands-on workshop for playwrights and composers who will work together throughout the semester, simulating the real-world process of writing a piece of musical theater. Students will explore standard works in the musical theater canon as well as less traditional pieces, concentrating on dramaturgical elements specific to the form (opening numbers, "I Want/I Am" songs, extended musical sequences, act one finales, 11 o'clock numbers, etc.). Students will then apply this knowledge to their own work as they generate scenes, songs, and outlines for libretti. Students will leave the class with a grasp of the classic components of this art form, hopefully inspired to follow or bend the "rules" to suit their own creative instincts.

THEA280 Award-Winning Playwrights

With textual analysis and intellectual criticism at its core, this course examines the dramatic work of award-winning playwrights through theoretical, performative, and aesthetic frames. The first half of our investigation explores companion texts written by premier playwrights. In the latter end of the course, we examine singular texts written by acclaimed newcomers. A select range of reviews and popular press publications help to supplement our discussions. In all cases, we are interested in surveying the ways in which these playwrights work within varying modes of dramatic expression and focus their plays on such topics as class, ethnicity, era, disability, gender, locale, nationality, race, and/or sexuality.

THEA281 Introduction to Directing

Intro to Directing provides an entryway into the mechanics and ethos of directing. Basic aspects of staging, script analysis, and planning the rehearsal process will be covered, as well as leading a room, working with actors, and developing the director's voice and vision. This class is also a chance to deeply consider together the role of theater in the context of our current social, political, and environmental realities. Why take this class, NOW? Why choose to direct theater, NOW? How does theater as an industry need to change, and how can theater-makers offer more care to themselves, each other, our audiences? As a director, what role do we have to play in righting wrongs, providing alternate realities, creating new futures? This course is part of the Sustainability and Environmental Justice course cluster, and we will look at these questions in part through a sustainability lens, using Adrienne Maree Brown's Emergent Strategy as our guide.

D1 is taught in conjunction with The Actor's Experience. Majors and non-majors welcome. The class is not open to first years.

THEA284 Dressing the Imagination: From Page to Stage

What does it mean to create a character in an imaginary world? How do your favorite fictional characters go from imagination and concept to the costume you see on the screen or the stage? And how does the collaborative process impact a costume designer's vision, as well as the costume maker's execution? In this course we will answer all of these questions. Throughout the semester we will look at a variety of scenes and characters from plays and musicals. Students will then apply research and design to create half-scale costumes. Working in a collaborative design environment students will have the opportunity to explore their ideas in a safe space, gain confidence in leadership, oral communication, presentation, self-management, and costume creation.

THEA290 Staging Race in Early Modern England

This course analyzes the dramatic representation of race in the plays of Shakespeare and his contemporaries. We will examine the historical emergence of race as a cultural construct in relation to related conceptions of complexion, the humoral body, gender, sexuality, and religious, ethnic, and national identity. Readings focus on three racialized groups: Moors, Jews, and Native American "Indians." After reading the play-texts in relation to the historical moment in which they were first produced (using both primary and secondary sources) we will then consider their post-Renaissance performance histories, including literary, theatrical, and film adaptations.

Grading: **A-F**

Credits: **1.25**Gen Ed Area: **HA-RLAN**Identical With: **FREN281**Prereq: **None****THEA292 Spectacles of Violence in Early Modern French Tragedy**

The French Kingdom endured decades of socio-political unrest and religious wars during the sixteenth and early seventeenth centuries. The tragedies that emerged from these bloody conflicts--many of which staged physical violence--not only reflected but also actively participated in the debates surrounding the 'troubles civils.' In this advanced seminar, we will study such tragedies in order to examine the uses, functions, and ethics of spectacular violence, in plays that adapt mythological stories (e.g., Medea), religious narratives (e.g. David and Goliath, Saint Cecilia), and current events (e.g., executions, assassinations, and regicides) for the stage. We will read the plays alongside and against the competing theoretical frameworks of violence found in various poetic treatises of the time period, yet we will also keep in mind the practical constraints and conditions of performance in early modern France. Finally, we will reflect on why we should read these plays today and how they inform our contemporary moment. Readings, written assignments, and discussion will be in French.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-RLAN**Identical With: **FREN306, COL306**Prereq: **None****THEA297 Latin American Theater and Performance**

This course will focus on the history, theory, and practice of theater and performance in Latin America in the 20th century. We will be particularly interested in the intercultural aspects of Latin American theater and performance that have reinvented and reinvigorated European dramatic forms through their constant interaction with non-Western cultural expressions in the Americas. We will examine a wide variety of performance practices, including avant-garde theater, community theater, street performance and agitprop, solo, and collective theater. The syllabus is loosely organized in a chronological fashion, structured more importantly around critical themes in Latin American history, culture, and society in the 20th century. We will take as our primary source material both readings and video recordings, when available, that will be supplemented by a wide variety of historical, critical, and theoretical background readings, including texts written by theater practitioners, theorists, and critics.

This class will serve as an introduction to Theater & Performance Studies, interdisciplinary fields that brush against anthropology, linguistics, critical race studies, psychoanalysis, queer theory, and art history. We will approach "performance" as a practice and a lens. Students will explore close reading strategies for both textual and live performance events and examine live art, theater, everyday performances, and presentations of the self. This course will pay particular attention to the social and cultural importance of performance and performativity, especially as they come to bear upon queer, black, Latinx, and indigenous lives and dreams.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **CHUM344**Prereq: **THEA105 OR THEA150 OR THEA245 OR [THEA199 or ENGL269] OR THEA185****THEA305 Lighting Design for the Theater**

This course will introduce students to the history, basic principles, and practical application of lighting design through lecture, discussion, demonstration, and practical application. Students will develop a deeper understanding of the methodology and applications of light in storytelling, which will help them communicate with collaborators.

This course counts towards the Theater Arts category for the THEA major.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-THEA**Identical With: **IDEA305**Prereq: **THEA105 OR DANC105****THEA306 Techniques of the Liar: Performance, Artifice, Fraud**

This seminar is a cultural and intellectual history of fraudulence, fiction, and faking it. We will explore both specific performance practices as well as theorizations of artifice, fraud, and authenticity. Topics will include illusion, ventriloquism, and sleight of hand; mimetic acting and the manufacture of "emotion"; dance technique and the concealment of effort; and musical improvisation and the politics of invention. We will also consider the complexities of drag, camp, and minstrelsy and historicize their surrounding discourses, centering the contributions of feminist, queer, and critical race studies. Looking at a range of (predominantly U.S.-based) practices from the mid-19th century to the present, we will consider how artifice and theatricality have been historically reviled as qualities inherent to femininity and queerness, respectively; how "authenticity" is both gendered and racialized; and how hiding, fabulation, exaggeration, and duplicity have also offered means of freedom or resistance.

Prereq: **None**

THEA308 Composition in the Arts

Composition, the manner in which elements are combined or related to form a whole in space and time, is a basic practice in all the arts. This course brings together practitioners from diverse art forms and traditions to address the basic issue of composition.

In this seminar, we will explore the compositional process through assignments that address the interacting concepts of site and information. By "site," we mean a semantic field extending through corporeal, environmental, and social dimensions. By "information," we mean representations abstracted from sites, "meaningless" when independent of any specific semantic interpretation. Participants will compose individual and collaborative interventions in a wide range of sites--public, private, physical, and electronic--in response to the problems posed.

This course is permission-of-instructor, and is intended for upper-level majors in Art, Dance, Film, Music, and Theatre, and others with sustained compositional practices suitable to the course.

Prereq: **None**

THEA311 Queer and Trans Aesthetics

This seminar will consider contemporary trans and queer theory foregrounding race, class, disability, migration, diaspora, indigeneity, and colonization alongside the work of BIPOC queer and trans artists in particular. The course's animating (and unfixable!) questions include: How do artists produce and intervene in understandings of gender and/or sexuality through their work? What does it mean for an artist or viewer to describe an image, object, or performance as "queer" or "trans"? What constitutes a "queer" or "trans" reading of visual culture? How might various formulations of "queer" and "trans" relate to, put pressure on, and/or resist "aesthetics"? What is the relationship between an artist's self-identification and/or their resistance to categorization (e.g., in terms of race, gender, sexuality, disability, class, nationality) on the one hand, and

audiences' efforts to engage and interpret their art on the other? Put another way: What, if anything, does an artist's "identity" (asserted and/or imposed) have to do with their art? And what does a viewer's "identity" (asserted and/or imposed) have to do with how they approach and interpret visual culture? Several artist talks and/or class visits (all virtual) are being organized in conjunction with the seminar.

THEA315 Stage Management

This course is intended to provide students with a basic knowledge of stage managing for theater. Students will learn the core essentials to theater collaboration: interpersonal relationships, time and self-management, industry standards, union practices, leadership roles, effective communication and observation. The role of the stage manager is foundational to every theater production. This role has the potential to lift up any collaborative work or hinder it.

Specific topics covered will include working with a director and actors, dramaturgy, managing auditions and rehearsals, props, effective communication tools across many types of theater making, stage management paperwork, technical rehearsals, and running/calling a show.

Potential projects include: Creation of a prompt book, and templates to use while stage managing, calling a pre-produced theatrical piece, and interviewing a professional working Stage Manager

THEA316 Advanced Topics in Performance Studies

What does "theory" have to do with "performance"? Furthermore, what is the relationship between thinking and doing ("theory" and "praxis")? If performance studies shifts the frame from an emphasis on being to one of doing, then what does it mean to "do" theory? In this class we will engage works that orbit "the live." We will use performance as a lens to explore questions of liveness, presence, the body, and affect. We will look to both live/recorded performances and recent work in the field of performance studies to explore the cultural significance of performance in our current moment and location. This version of Advanced Topics in Performance Studies is particularly interested in intersectional work between performance and queer of color critique, Indigenous studies, black studies, environmental justice, and transformative justice. In class students will read new work in the field of performance studies, and should be prepared to engage with the activist potential of performance.

While we will engage performance in a number of creative and experimental ways, student projects will take the shape of semester-long critical research papers. Come with or without an idea you want to work on, and we will spend the semester workshopping that idea into a developed paper. This class is

especially recommended for anyone interested in doing an honors thesis in theater.

Readings and viewings will include: José Muñoz, Ashon T Crawley, Tavia Nyong'o, Sandra Ruiz, Lou Cornum, Vick Quezada, Judit Butler, Ivan Ramos, Eve Sedgwick, Emily Johnson, The Forge Project, Walter D. Mignolo, Billy Ray Belcourt, Marquis Bey, Christina Sharpe, Morgan Bassichis, Jeremy O. Harris, Miranda Haymon, and others.

THEA322Z Sounding Stories: Developing Contemporary Radio Drama

This course will examine the almost-150-year-old form of the radio drama and ask what its future might sound like. In the 20th century, radio dramas held a place of great influence in entertainment, politics, and revolutionary action. Streaming media of the 21st century has transformed the modern listening landscape, and with it, revitalized the prominence of audio storytelling while opening access to its development. Over the summer session, we will listen to modern approaches to radio drama production, explore their themes and inspirations, and create our own new works of audio theater.

Students will be introduced to sound recording and editing, the specificities of narrative development for audio, as well as experimental applications in the medium. Students will learn to use software (Adobe Audition) and the university's foley/sound studio to craft their projects. Throughout the session, guest practitioners (WNYC, Audible, Spotify, Oral History Association) will visit the class to discuss their unique perspectives on the craft.

THEA327 Dangerous Acts: Theater, Transgression, and Social Justice, Ancient and Modern

The first plays in the history of theater feature transgressive acts: murder, illicit sex, violence, and torture. Action-packed, gory, and heart-wrenching, these spectacles of mass entertainment were also staged specifically to "train" citizens to be thoughtful legislators, jurists, and policy makers. They were deliberately crafted to make audiences grapple with demanding questions--legal, ethical, and moral: the "laws" of war; discrimination (based on gender, class, ethnic background); privacy and political participation; confession, guilt, and punishment; anger and sympathy in decision-making, and much more.

In this course, we will read a selection of Greek plays, ancient and modern critical works, and modern adaptations to consider the role of theater in politics, aesthetics, and social and emotional engineering.

Readings from antiquity will include plays by Aeschylus, Sophocles, Euripides, and Aristophanes and readings from Plato and Aristotle. Modern works will include plays and writings by Jean-Paul Sartre, Bertolt Brecht, Sarah Kane, Yael Farber, and movie adaptations.

This course will fall under the Poetry & Performance and History/Social Justice tracks.

THEA328 Breaking New Ground Residency: The Masses Are Asses Radio Play

As the inaugural recipient of the Breaking New Grounds Development Residency, WesTheater Alum Miranda Haymon '16 will workshop and direct a radio play version of Pedro Pietri's 1984 play "The Masses Are Asses." As part of this course, students will have the opportunity to work with Miranda Haymon and further explore the work of Nuyorican poet Pedro Pietri. For their production team, Haymon is looking for one assistant director, two actors, one dramaturg, and one stage manager.

THEA329 Technical Practice A

This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester. Students will work under

the tutelage of a faculty member, learning skills and techniques through a hands-on, project-based production process.

Student stage managers will have the opportunity to lead or assist the rehearsal process. Student technical directors and master carpenters will assist in bringing the production from the idea and scenic design phase into reality and construction. Student scenic charges will be responsible for the painting of sets. Student master electricians will execute the lighting design of a production. Student prop managers will acquire, build, and source properties for a production. Student assistant costume shop supervisors will assist the costume shop manager with the daily running and operations. Student lead wardrobe and lead run crew positions will supervise the wardrobe and run crews of productions. Student crew members will work on the run crew for projects, such as light board operations, scenic run crew and fly persons, wardrobe, and sound board operations. Student house managers will work with the stage manager and ticket sales to run the front of house for productions. Student program designers will build and maintain digital programs for productions.

The students interested in enrolling in this class should apply for team positions in the production such as stage manager, technical director, master electrician, or crew.

THEA337 Insubstantial Pageants: Late Shakespeare

This seminar examines the Center for the Humanities' Spring 2020 theme of "Ephemerality" through the lens of four late plays by Shakespeare ("Hamlet," "King Lear," "The Winter's Tale," "The Tempest") and their preoccupation with the time, temporality, belatedness, and the ephemerality of theater (and the world-as-stage).

In addition to considering the mutability of the play-texts themselves (several of which exist in multiple versions), we will consider how they refashion their sources, and how they are themselves refashioned in later productions and adaptations.

THEA341 Social Media for Theater Marketing

The use of social media in today's arts industry is ubiquitous and ever-changing. The study of this communication medium through this course will involve current trend research, content creation, assessment of impact and application of lessons learned. Students will research relevant topics for weekly discussion and apply findings to content creation, which will be subject to critical analysis

through quantitative and qualitative assessments. Through this study and field work at events and interviews, students will gain basic working knowledge of this interactive arts marketing and its effectiveness. In addition to regular class meetings (schedule to be determined), the majority of the work for this course will be through field work, including researching and attending events, interviewing faculty and students, photo/video editing, and collaborating with graphic design team members. Students will work in Canva or Adobe Design Suite.

THEA346 Shakespeare's Islands

How did England's insularity and expansionist ambitions on the world's stage shape Shakespearean dramaturgy in his many plays with island settings? This course, taught in conjunction with the Center for the Humanities' spring 2022 theme of "Islands as Metaphor and Method" considers how Shakespeare's island locales (e.g., in ancient and medieval Britain, the Mediterranean, and the Americas) transformed the Globe theater into a physical and conceptual site for imagining the utopian and dystopian potential of early English nation-building and colonial expansion, and for exploring the poetics of relation and alterity, peripherality and centrality, archaism and futurity. In addition to studying the play-texts themselves, we will consider how their island settings are explored in subsequent theatrical and film productions and adaptations.

THEA347 Plague and Care-Work in Shakespeare's England

Plague exerted an enormous influence on the plays of Shakespeare and his contemporaries, and indeed on theater as a commercial enterprise. Pandemic theater closures and quarantines were frequent throughout his career, and it is likely that his son Hamnet died of plague. This seminar examines four Shakespeare plays (Romeo and Juliet, Hamlet, King Lear, The Winter's Tale) and their preoccupations with time, temporality, belatedness, mortality and ephemerality (of theater and the world-as-stage) and with an ethics and recognition of the work of care, as these are shaped by the recurrence of plague—a perspective that will allow us to draw connections and discern differences between Shakespeare's time and our own.

THEA351 Melodrama Since 1700

Although today melodrama calls up ideas related to film, the term has musical origins: it originally indicated a work in which melos (music) and spoken drama were united in one multimedia format. Eighteenth-century melodrama admitted of many manifestations, encompassing everything from comic operas (like Mozart's *Magic Flute*, which alternated singing with spoken dialogue) to experimental symphonic works (in which a narrator's declaimed monologue was emotionally painted by the accompanying orchestra). Melodrama in this musical sense persisted through to the twentieth century, and included notable works such as Schoenberg's *Pierrot Lunaire*. But slowly melodrama as a term began to take on connotations relating to one of comic opera's central conceits: hyperbole and exaggeration. Melodrama became synonymous with comic excesses of emotional portrayal. Eventually, during the twentieth century, this meaning fastened onto a constellation of generic implications within the domain of film (think, for example, of Joan Crawford in *Mildred Pierce*). In its afterlife during the twenty-first century, melodrama has sometimes been used pejoratively: it can be employed as an epithet to disqualify the performance of emotion as inappropriately intense, or to designate emotion connected to an ostensibly inappropriate subject. But even in this new sense, melodrama retains an element of its early history insofar as it can be appropriated within subcultures in order to comically mock the traditions of mass culture. This course examines the long history of melodramatic art forms from the eighteenth century through to the present day. Together we will perform close readings of the objects within this rich tradition, supplemented by readings in queer theory, critical theory, and performance studies.

THEA352 Following Fornés: Creativity, Intimacy, and Imagination

This course undertakes an investigation and application of the creative process of visionary iconoclast Maria Irene Fornés: a queer, Latinx playwright whose wildly idiosyncratic plays defied both convention and categorization. Fornés'

legendary workshops shaped a generation of playwrights, including Nilo Cruz, Caridad Svich, and Sarah Ruhl.

Students will engage with Fornés' own creative process via her ephemera: in this case, the spoken fragments, outtakes, and audio marginalia left behind from the filming of her documentary collaboration with director Michelle Memran, "The Rest I Make Up." As I work to compile and cohere this material into a book, the class will be applying it, directly, to the conception and creation of their own performance works.

Students who are interested in writing/directing/devising live works of performance are best suited to this class. No former experience necessary, but a willingness to create and share live work and writing on a weekly basis is required. Our work will be contextualized by assigned research and writing into Fornés as a key figure of the American theater, and will culminate in the presentation of our creative projects.

THEA353 Destroying the Audience: Limits of Performance and Representation in the Theater of (Non) Being

Young Jean Lee's Theatre Company, active between 2003 and 2016, is most known for a series of "racial-identity plays," written and directed by Lee, which adopt an experimental approach to the critique of racial politics, driven by the motto "destroy the audience." On the one hand, this course will explore literary and artistic works that express an ambivalent, if not antagonistic, relationship to the presence of an audience. On the other hand, this course will consider the role and function of the audience as a social category by considering how the concept of audience (broadly understood) contributes to cultural production about race and gender as a potentially active element in the creative process. Students can expect to read and/or view drama, visual art, performance, film, and self-writing (autobiography and memoir) which, explicitly or implicitly, address the presence of the audience as a way of tackling larger social and cultural problems related to race and ethnicity. The goal will be to foster an understanding of the politics of gender, sexuality, ability, language, and class that determine how these issues are conceptualized and articulated. This course will employ an interdisciplinary approach to the discussion of primary and secondary texts, engaging audience studies, performance studies, ethnic studies, and disability studies, in addition to queer/trans of color, postcolonial, and legal theory, to historically contextualize and theoretically ground a cultural understanding of the relation between audience and racial performance.

THEA354 Improvisation: Diasporic Modalities

Freestyle, groove, jam: Improvisation has always been a key tool in the creation and evolution of dances of the African Diaspora. This movement-based course will deepen the inquiry of the Africanist aesthetic in dance through an improvisatory experiential framework. What movement conversations are created through a deep listening to self and our impulses to engage with sound/music, the environment, and our community? How do we honor the self in

collective experiences? Students will embody explorations of the improvisatory concepts, sequences, and modalities that are rooted in the dances of: West African, Afro-Beats, Afro-Brazilian, Jamaican Dancehall, Capoeira, Jazz, African American Social Dances, House, and Bomba. We will use the foundational improvisational principles of these dance forms through a balance of play, investigation, and rigor. Studio work will be supplemented with readings, video, and homework assignments geared toward creating new improvisational scores. The course will also include visits from guest artists.

THEA355 Voice & Movement for Actors: Embodying Imagery and Language into Acting Text

In this advanced acting course students will approach acting text through a physical theatre lens, engaging with voice and movement pedagogies involving abstract imaginative use of the voice and body. These techniques will be used to connect the voice and body to image and text, and to build a physical vocal practice as a tool for professional actors. Personal exploratory and imaginative work will be applied to poetry and to contemporary scene work.

Offering: **Host**

Grading: **A-F**

Credits: **1.00**

Gen Ed Area: **HA-THEA**

Prereq: **THEA245**

THEA357Z Space and Materiality: Performing Place

Scenography explores and shapes the material world in and through the performative event. In site-specific performances, it transforms place and time to create an alternative reality in which the materiality of the artistic design and the performer's body intervene in the architecture of a place and the spectator's reception of meaning. In this course, we will study site interventions through the lens of street performance, immersive theater, and the theatrical apparatus to build a theoretical and direct understanding of the material potential and limitations of the four key elements involved in the scenographic project -- artistic design, the actor's body, local architecture, and time.

This course is divided into three units: (1) site-specific; (2) street performance; and (3) immersive theater. Each unit includes scholarly readings, assignments in performance and scenography, and specific showings. There will be two written responses for the course (5-to-7-page papers) on two of the works experienced at the festival that demonstrate the student's cumulative grasp of site specificity, scenography, and materiality. There will also be a final media journal showing.

Gen Ed Area: **HA-DANC**

Identical With: **DANC357Z**

Prereq: **None**

THEA359 Space Design for Performance

In this course, students will study, construct, and deconstruct the performative space, whether in the theater or site-based, by analyzing the space as a context to be activated by the body of the performer and witnessed by an audience. Through practical assignments, the class will learn the aesthetic history of the theatrical event (considering plays, rituals, street parades, and digital performances, among others), while developing and discovering the student's own creative process (visual, kinetic, textual, etc.). Students will be guided

through each step of the design process, including close reading, concept development, visual research, renderings or drawings, model making and drafting.

In this course, special emphasis is given to contemporary performance as a mode of understanding cultural processes as a relational system of engagement within our ecosystem, while looking at environmental and sustainable design, materials, and the environmental impacts of processing. Students will create and design performance spaces, while realizing scale models and drawings and integrating the notions of design and environmental principles and elements.

Students will have the opportunity to develop skills using 3D-drafting and 3D-modeling software.

This course counts towards the Theater Arts category for the THEA major.

THEA362 Visualizing Black Remains

This advanced seminar engages African Diaspora critical thought and aesthetic production (visual art, performance, film, literature) that grapple with the appetite, effects, and stakes of representing Black remains. What does this visual reproduction make possible or obscure, and what is its relationship to violence? The class will also encourage students to think about the ethics of reparation/repatriation in relation to forms of loss and dispossession that can neither be repaired/repatriated nor visually evidenced (in conventional ways). In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, objecthood, violence, empathy, and reparation?

THEA363 (Un)Popular Performances/Performances (Im)Populaires

In 1607, a young Scotsman named William Drummond was studying law in Bourges, France, a popular "study-abroad destination" for Scottish students as well as an important stopover city on the routes of itinerant professional and

amateur actors. While in Bourges, these actors performed a variety of different kinds of plays, including tragedies, comedies, tragicomedies, pastorals, and farces. Although these performances were often met with hostility from the city's religious authorities, Drummond attended several plays during his stay and, lucky for us, took rather detailed notes about them. His observations from the 1607 "season" are preserved in his personal papers in the National Library of Scotland. This course will use Drummond's notes as a guide to discover and examine other forms of evidence--both traditional and nontraditional--that help us understand what was at stake in theater, performance, and (un)popular culture in late 16th- and early 17th-century France. We will study the ways the past has been organized and cataloged, how traditional sources and research have shaped our view of the past, and how unconventional methodologies can help us locate new sites of knowledge and culture. Written assignments, class discussions, and (most) readings will be in French.

THEA364 Friendship and Collaboration: In Theory, In Practice

How do we conceive of friendship, collaboration, love, and collectivity? In an interview, Michel Foucault stated that the relational task of the homosexual was to "invent, from A to Z, a relationship that is still formless, which is friendship: that is to say, the sum of everything through which they can give each other pleasure." This course considers theories and performances of relationality, queer belonging, and friendship with an emphasis on forms of belonging and recognition that exceed normative protocols. We will ask how queer practices, Black thought, and Indigenous epistemologies inform our own imaginings of collaborative projects. Beginning with philosophical determinations of friendship, we will branch out to imagine ways in which artists, lovers, friends, and/or co-habitators enact togetherness. This class will focus on theoretical readings and creative exercises and will culminate in a collaborative project.

This counts as an Expanded Field of Theater course for the Theater Major.

THEA365 Greek Tragedy: Euripides

Euripides is well known for being experimental and controversial, in his own time and beyond. Aristophanes famously accuses him of corrupting his audience by bringing too much of a democratic sentiment to his plays--women and slaves having way too much to say. Nietzsche much later will attribute to him the very death of tragedy. In this course, we will explore this legacy by reading one of his plays in the original along with diverse approaches to his work. The selection of the play will be determined by the composition of the student-group and previous exposure to Greek drama.

THEA369 Performance Remains: Slavery in the Black Dramatic Imagination

As sociologist Orlando Patterson notes, "In the absence of historical records, one way to explore the inner lives of slaves is to exercise one's literary imagination" (Slavery and Social Death, 2018). Taking direction from Patterson, this course is interested in mining the literary imagination of contemporary Black playwrights who are interested in recovering, reconstructing, rewriting, repairing and, in some cases, revolting against the fragmented and muted histories of the African slave trade and the lost experiences of the Black lives therein. From Aimé Césaire's *A Tempest* (1969), a bold postcolonial adaptation of Shakespeare's *Tempest*, to Winsome Pinnock's *Rockets and Blue Lights* (2020), an examination of British history inspired by two 19th-century paintings by the English romantic painter J.M.W. Turner, our plays originate from the Caribbean, England, and the United States. As African diasporic texts, these plays are exercises in the dramatic power of Sankofa, a principle derived from the Akan people of Ghana, meaning that the plays become the vessels through which audiences, readers, and characters return to the past in order to better understand and move forward in the present. We will engage in a thorough exploration of form, region, dialect, adaptation, and aesthetics, among other aspects, as we align lost and documented histories with dramatic conjuring.

THEA371 Sister Acts: Black Feminist/Womanist Theater of the African Diaspora

This course surveys the dynamism and scope of contemporary feminist/womanist drama written by black women playwrights of the African Diaspora. Reading select plays from Africa, Canada, the Caribbean, England, and the United States, alongside theory and criticism, we examine the impact of race, gender, identity, and sexuality politics on black feminist/womanist theater. Throughout our study of these dramatic texts, their performances, and their subsequent critiques, we are equally invested in the bridges and the gaps, the audibles and the silences, and the overlaps and the divides, as they are formed. Significantly, this analytic undertaking involves a simultaneous critique of the role of the playwright, the spectator, and the critic of black feminist/womanist theater. At all times, consideration is given to the ways in which these playwrights collectively use theater as a platform to explore black and female and diasporic subjectivities across regional, national, and, at times, linguistic differences.

THEA373 Afro-pessimism, Gender, and Performance

This class engages African and African diaspora critical thought and aesthetic production (dance, visual art, performance art, installation, film) to think about colonial dispossession, objectification, and reparation. We will address topics such as the repatriation of artifacts and other ephemera taken from Europe's colonies that are housed in the archives of European cultural institutions. The objects in question have been described as either artwork, artifacts, or anthropological fetish objects (depending on which field one engages with). How can we rethink our understanding of objecthood as irreducible to "inanimate" things but as also signaling a regime of imperial domination and enslavement that violently turned African personality into a status of objecthood? What does it mean to think about the object (broadly defined) in relation to loss and the (im)possibilities of repatriation and reparation? How does the Black performer's body's disappearance/remains endow the Western art institution? The course will encourage students to think about repatriation as well as certain losses that can neither be repaired/repatriated nor evidenced in conventional ways. In those instances, how do contemporary critical thinkers and/as contemporary artists help us rethink loss, mourning, as well as the promises and ends of reparation? The assigned readings offer ways to think about colonial archives not merely as neutral repositories of past events, but also as performances; as enactments of power, aesthetic value judgment, and hierarchical arrangements of knowledge production. The theoretical, art historical, psychoanalytic, philosophical, and creative reading materials engage contemporary scholars', artists', and activists' response to both the recorded and ephemeral archives of Black dispossession. Students are encouraged to engage in events and workshops outside of the classroom, such as visiting library archives, attending performances, gallery exhibits, and film screenings.

THEA384 Advanced Costume Design & Construction

In this course students will work in a collaborative environment exploring costume construction and costume design. Students develop designs that emerge through a process of character analysis, based on the script and directorial concept. Period research, design, and rendering skills are fostered through practical exercises. Instruction in basic costume construction, including drafting and draping, provides tools for students to produce final projects.

THEA385 The Working Theatermaker: Acting Beyond the University

This course is geared toward those students venturing into the earliest stages of an acting career. Emphasis will be placed on auditioning for film, television, and theater, finding opportunities in NYC, LA, and regional markets, cultivating a network, self-tapes, clarifying a mission statement, and logistics of the business (headshots, agents, casting directors, unions). The course will include talks with industry professionals, and students will leave the course with a tentative plan of action, including audition material and resources to facilitate the transition from the classroom into the professional world. If interested, please contact the instructor via email ASAP to set up individual conferences.

THEA386 Musical Theater Performance

This studio course will explore the fundamentals of musical theater performance: how to analyze a script and song applying concepts such as given circumstances, actions, objectives, etc., based in Michael Chekhov and Stanislavski techniques; how to use dramaturgical research and original context to illuminate and create character; and how to prime the instrument for optimal performance. A wide range of vocal and physical exercises will be used to develop relaxation, concentration, and the imagination, and to free the body and voice of tension. We aim to expand the performer's potential for transformation and expression, so that they may enter into any genre, style, or period of musical theater with ease and confidence.

Emphasis will be placed on building confidence, cultivating each artist's individual voice, and approaching the work with a deep sense of curiosity, generosity, joy, and serious play. This course will include exploring, analyzing, and performing solo songs and duets, and a module on the current state of the industry—including talks with professional artists, casting directors, and musical theater collaborators—culminating in a showcase, with potential collaborations with original work by fellow students and guest artists.

Course will also require supplemental viewings, independent rehearsals, and attendance at two live performances TBD.

THEA390 Performance Ensemble

Since theater is an act of collaboration, this course will offer advanced acting, directing, design, and playwriting students an opportunity to practice collaborative creation in an ensemble environment. Using impactful American ensembles (Tectonic Theater, Rude Mechs, the Team, PearlDamour) as a guide, students will experiment with techniques of research, generation, storytelling, and performance. We will explore dynamic use of space, negotiate differences in communication, and create text, action, image, and object as we collaboratively develop a coherent theatrical event to be shared for an invited audience in a workshop setting.

This course will NOT fulfill an advanced directing requirement for students interested in pursuing senior theses in directing. This course provides an additional level of performance training beyond the core courses in acting, directing, and playwriting.

NOTE: Ensemble creation is rigorous play. Come prepared to be physical, take risks, step into the unknown, and make discoveries

This course counts towards the Theater Arts category for the THEA major.

THEA391 The Live Event: Politics and Practice of Creating Site-Specific Performance

In this course students will consider the role of site in performance-making. We start the semester with the assumption that there is no site that is not specific: every place carries with it a political, social, and historical identity, as well as an aesthetic and an architecture. At the same time, we as artists and makers are driven by our own values and interests. How do we enter into a collaboration with a site to create a live event with meaning and impact, both for ourselves and for our audiences? From architect Maya Lin, whose interactive Vietnam War Memorial rewrote the function of a monument to be about personal encounter and shared reckoning, to artist Paul Ramirez Jonas, whose "Key to the City" project gave thousands of people access to private spaces across New York, to "Haircuts by Kids," a project of the Canadian theater company Mammalian Diving Reflex, in which third-graders are trained to offer haircuts to adults, artists across disciplines are devising diverse answers to this question.

This class combines seminar-style discussion with studio-style making. Students will engage with scholarship by Miwon Kwon, Paul Smith, Tania Bruguera, Claire Bishop, and Shannon Jackson among others, in order to contextualize the making of our own sited live event works that explore how space, place, and architecture play into questions of narrative, performance, and community. Short written responses to reading will be turned in throughout the semester. The class culminates in either a final paper or final, sited project (individual or collaborative) on campus or in Middletown.

THEA393 Afterparty: End Times, Pleasure, and Clean Up

What do we do in end times, or "after the party" as Joshua Chambers Letson would have it? Already exhausted, with streamers and confetti scattered on the ground, what happens after the party is over? How do we pick up the pieces and move on? Can narratives of perpetual end times create new beginnings and new horizons? Beginning at the end, this course will engage conversations in science fiction, Black studies, art and performance, Indigenous studies, queer of color critique, and environmental justice to explore the work of endings and beginnings, of hope and hopelessness, of destruction and desire. We will pay particular attention to questions of futurity and pleasure as they are manifest in the aesthetic. Writers and artists to be discussed will include N.K. Jemisin, Sylvia Winter, Ursula Le Guin, Katherine McKittrick, Ohan Breiding, Franny Choi, Saeed Jones, Calvin Warren, Joshua Chambers Letson, Dana Luciano, David Wojnarowicz, adrienne maree brown, Autumn Brown, José Esteban Muñoz, Nick Estes, Dionne Brand, Samuel Delany, Tourmaline, Allison Akootchook Warden

(AKU MATU), Jordan Peele, and M.E. O'Brien & Eman Abdelhadi. Students will be invited to craft both creative and theoretical responses to class assignments.

THEA428 Theater Projects - Performance Practice

This course offers students the opportunity to participate in a wide variety of Theater Department produced works each semester, such as projects approved as part of our Senior Capstone program. This usually includes both single-semester senior projects, Honors Thesis productions, and guest artist collaborations.

Student performers will work under a project director, learning skills and techniques through a hands-on, project-based process. Student stage managers will have the opportunity to lead or assist the rehearsal process, with faculty advisement. Student assistant directors will hone their skills by close collaboration with the project directors. Student dramaturges will embark in a variety of deep-research tasks and close-reading of the production materials and/or text(s), as guided by the instructor. This is a recommended course for students that are considering pursuing their own capstone projects in theater.

Students interested in enrolling in this class should audition for acting roles, or apply for stage management, dramaturge, or assistant directing positions.

THEA434 Applied Scenography: From Idea to the Stage

This course may be repeated for credit. In this course, students will develop a specific design for the stage by doing close reading and analysis of the text for their specific projects. Students will be guided through each step of these processes in a formal approach: concept development, visual research, renderings or drawings, model-making, and/or drafting. The course will have a special emphasis on the collaborative process and on the designer's role to fulfill the needs for the actual construction of their projects. Students will create and design set, media, or costumes for their projects, integrating the notions of design principles and performance elements. This course counts toward the Theater Major as Performance Practice (in Design) only.

WRITING (WRCT)

WRCT105F Literature and Memory in Contemporary Latin America: Creative Writing Workshop

For many Latin American authors, personal memory is also a collective memory. Delving into childhood, family secrets, or past trauma in their literary works reveals how writing may become a form of personal reparation and a way to participate in a general sentiment experienced in the social fabric. In this course, students will analyze contemporary Latin American authors in translation to compare different approaches to memory as a resource for imagination and social commentary. This class, designed as a seminar and a creative writing workshop, will encourage students to experiment with their writing and develop a conversation with Latin American authors about memory through direct experience with creativity and the crafting of a literary text. Authors include

Reinaldo Arenas, Camila Villada Sosa, and Diamela Eltit, among others. Two US-based Latin American authors will visit the class at different times to discuss their work and their experience with writing and memory as source of inspiration. This course is a creative writing workshop.

WRCT109F Writing About Your First Year in the United States (FYS)

This course is designed for incoming international students who would like to reflect on their first year in the United States while exploring U.S. academic writing formats, the philosophies of liberal arts education, their own bilingual identities, and other topics related to U.S. academia. Assignments will involve keeping a journal, reading and writing a variety of essays, pre-writing activities, academic vocabulary exercises, and advanced grammar analysis. The reading will focus on essays about immigrant experiences. Authors such as Amy Tan, Maxine Hong Kingston, Alain Mabanckou, and Ariel Dorfman will be included as examples of excellent essay writing and to provide materials for discussion. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the U.S. after middle school, and students whose dominant language is not English.

WRCT110F Academic Writing in the US for International Students (FYS)

This course explores United States culture and history through the art of writing essays. Students will analyze renowned works by US authors while concurrently writing their own essays and focusing on essay structure, analytical writing, cohesiveness, conciseness, and the mechanics of grammar. The course is designed to prepare international students for the expectations their US professors will have for their academic writing. Assignments will involve reading

and writing a variety of essays, pre-writing activities, journal entries, academic vocabulary exercises, and advanced grammar analysis. As models for their own work, students will study exemplary essays from a variety of essay genres by authors such as Martin Luther King Jr., Thomas Jefferson, Abraham Lincoln, and Reginald Rose. The workshop-style format of the class will encourage academic exchanges, critical analysis, and peer editing. The course is recommended for international students, students who immigrated to the US after middle school, and students whose dominant language is not English.

WRCT111F Writing About Culture (FYS)

In the age of social media, pithy critiques and quick reads circulate quickly. Whether on Twitter, Facebook, Instagram, or Reddit, the Internet provides a space for everyone to share their opinions on popular culture and current events. This course asks us to slow down and rewind a bit to consider what scholars in cultural studies might teach us when it comes to writing about culture. We will ask the following: What is culture? What can culture teach us about the powerful structures and ideologies that shape our worlds? How might this understanding of culture help us fashion our selves and imagine new realities and ways of being?

To address these questions, students will read theory alongside contemporary cultural criticism both for content and for style and method of analysis. In addition to reading and discussion, students will practice writing about culture through multiple lenses, discovering and developing their own writerly values in order to produce a publishable piece of cultural criticism to be submitted to a publication of their choice by the end of the semester.

WRCT112F The Logistics of Climate Change (FYS)

According to the World Bank, an increase in global temperatures of more than 2°C by the year 2100 will likely submerge coastal cities from New York to Shanghai beneath rising seas. Yet as many theorists note, the global supply chains the World Bank helps facilitate also fuel global warming. How do we make sense of economic institutions warning us of disasters their actions may hasten? Why is there so much disagreement among scholars concerning the quickening pace of climate change alongside the emergence of supposedly postindustrial economies in the developed world? And what can we do about that pace today? This class surveys two sweeping transformations of social life in recent decades to pose such questions. Climate change, we will wager, can't be understood apart from the logistics revolution that made globalization possible: The massive freeway systems, ports, algorithms, microprocessors, and container ships transporting goods and money from one corner of the globe to another. Along the way we will pay particular attention to the uneven racial and gender dynamics governing who lives where, who acquires what they need to survive, and how they survive in a world arranged by the logistics revolution driving climate change today.

WRCT114F Why You Can't Write (FYS)

Institutions of higher education have required first-year students to take writing courses for well over a century. In doing so, they have made it clear that educational and professional success are deeply tied to writing skills. But why is this? This class asks what it means to teach students how to write by probing seemingly stable concepts and practices like language and communication. We will discuss the history of writing studies in higher education before taking up debates over literacy, language standardization, education as imperialism and colonialism, theories of writing instruction, assignment design, and assessment practices. In addition to introducing students to the field of composition, rhetoric, and writing studies, so, too, will this course center the practice of writing. As such, students can expect to write, revise, and comment on classmates' writing regularly. Assignments will include a personal literacy narrative, response papers, weekly journals, and creative projects like assignment and rubric design.

WRCT115 Writing Mentoring

Have you ever wanted a personal writing collaborator? Someone who would meet with you privately to help you with your writing?

Your writing mentor will work with you on your particular writing concerns, whether you need help generating ideas, structuring your essay, improving sentence clarity and grammar, or managing your time. As mentors and mentees meet on a weekly basis, this program is designed for students who enjoy regular

collaboration. If you participate, you will enroll in a 0.25-credit tutorial and have a peer assigned to meet with you throughout the semester.

We work with students of all writing abilities and in all disciplines. All services are free.

For more information, contact the Ford Fellow at writingworks@wesleyan.edu. Applications will be live at the start of the semester and will close five days before the end of add/drop. Students will be selected based on their applications and enrolled in the course after add/drop.

WRCT115F Diffusion of Innovation (FYS)

Most inventions never make it out of the laboratory. Few reach the public. Why? Innovations and great ideas are not self-evident. Rather, inventors must persuade their fellow citizens that their ideas have merit and are worth adopting. This course will survey the broad field of "Diffusion of Innovations." Through case studies from around the globe and discussions of diffusion theory, students will learn how innovations ranging from vaccines to the world's largest particle accelerator gained acceptance through analog and digital communication. Students will also learn about diffusion failures ranging from water boiling to the DVORAK keyboard. They will then design a strategy for disseminating an existing but underappreciated scientific or technological innovation to United States adopters. The strategy will demonstrate a keen appreciation of scientific merit, diffusion of innovation theory, and the nuances of U.S. culture. This first year seminar course will also familiarize students with the methods used to collect, interpret, analyze, and present evidence in the social sciences, particularly in the field of communication.

WRCT116F The Literature of Travel (FYS)

Travel literature has been one of the most fundamental subgenres of writing since humans first began to explore and record their thoughts. Much of what was first known about the world as we know it comes down to us from travelogues of early explorers, and this rich subgenre explores issues of identity and race, knowledge and power, while also often being alternately infused with longing for home or longing for difference. The literature of travel, exploration, and foreign milieus actually falls under various categories including journalism, nonfiction writing, and fiction. Any study of travel literature prompts us to ponder the theoretical problem of understanding people and places that are alien to us. This seminar will expose students to a wide variety of 'travel literature,' including novels, essays, travelogues, and documentaries. Throughout this course, we will compare received, conventional notions of particular places with what we discover through our readings. Come prepared to read and write intensively.

WRCT117F Instances of Collective Memory (FYS)

Both history and fiction tell stories. They evaluate facts, construct contexts, and foreground patterns and associations--all using language as their primary tool. In this course, we will analyze key moments in the formation of collective and cultural memories in 20th-century history, philosophy, and literature. We will think about how individual memory and collective remembrance connect, how larger stories are built up from archives and personal stories, and how these narratives are shaped by changes in the world around them. We'll pay special attention to how the World Wars and the Cold War are memorialized and to the importance of these narratives to contemporary Jewish identity and remembrance in Germany, Israel, and the United States.

WRCT118F Off-Broadway: Contemporary American Playwriting (FYS)

This writing course focuses on plays by contemporary American writers from 1995 to the present and asks students to begin thinking deeply about how plays work. How are they constructed? How can story, plot, character, dialogue, spectacle, and theme work together to create magic onstage? What are plays trying to do? Focusing on work by women, queer artists, and writers of color, we will respond to plays that have appeared Off-Broadway in recent years. Playwrights we consider will include Suzan-Lori Parks, Branden Jacobs-Jenkins, Kristoffer Diaz, Lucy Thurber, Adam Bock, Hansol Jung, Mashuq Mushtaq Deen, Jaclyn Backhaus, Thomas Bradshaw, and Diana Son.

WRCT120F Uncertainty and the Future (FYS)

The world we live in is full of risk and uncertainty. Science, politics, and economics all tell us that this is a hazardous era in which great changes are inevitable and catastrophes are possible. How do people manage living in such an uncertain world? This first-year seminar introduces students to research and writing in the social sciences by studying a driving factor in the human search for knowledge: the uncertainty of the unknown future. We will consider how the ways in which humans define, relate to, and experience uncertainty influence social well-being and the production of the future. We begin with the anthropological study of uncertainty, which is rooted in the study of ritual and magic, and then consider perspectives in psychology, economics, and ecology. While we will reflect on the "negative" side of uncertainty, such as risk, precariousness, and insecurity, we will also examine the way the creative management of uncertainty is sometimes romanticized and consider the opportunities for creativity, adaptation, resilience, and imagination in uncertain times.

WRCT121F Are You a Feminist? (FYS)

Taking our cue from Beyoncé and the debates her music has produced, this First Year Seminar investigates the meaning of feminism by considering how writers, artists, activists, academics, and public intellectuals discuss the topic. Students' curiosity about feminism - as topic, politics, identity, and practice - will guide class meetings where we will discuss readings by prominent feminist

writers, scholars, and critics. Students will leave the course with a clear sense of themselves as writers and thinkers, as well as an understanding of the ways in which gender and sexuality intersect with race, class, and other social identities and of the multiplicities of feminisms in our contemporary moment.

WRCT130F Living within the Bio-Logical (FYS)

How do biology and society relate to each other? This first-year seminar provides an introductory overview of how the biosciences have been entangled in social contexts, from the Enlightenment to the current technoscience era. We will examine contemporary case studies where society impacts biology and biology impacts society, particularly those that show the complex interplay between the body and the environment. We will look at how rates of obesity relate to inequality and insecurity, consider the impact of toxins on the body and environment, and discuss emergent research that challenges longstanding beliefs about medical science. This anthropologically informed course provides ethnographic accounts that give crosscultural context to the questions posed. Throughout the course, students will learn to discuss the interrelation of the biological with the social, political, and economic, and we will critically reflect on the influence of politics and economics on human biological agency.

WRCT135 Writing about Research: U.S. Style

This course is designed to prepare non-native speakers of English to write about research in U.S. academia. Students will focus on the structure, cohesive devices, citation styles, and academic vocabulary commonly used in literature reviews, theoretical papers, and primary research studies. As a topic of common interest, example readings will focus on language research including statistical analyses of language learners; anthropology studies of how gender, race, and socioeconomic group affect language; and overviews of theories about language acquisition. Throughout the course, students will learn organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

WRCT135F How Language Works: The Beliefs and Bias that Affect our Social World (FYS)

This first-year seminar takes an in-depth look at how we communicate. What do we believe about language? How does that affect our interactions on personal and societal levels? Drawing on readings from the fields of linguistics and anthropology, we will challenge common language myths and beliefs related to multilingualism, language and dialectal stereotypes, gendered language, and language learning. To synthesize those ideas, students will write reflectively and discuss their own oral and written language, conduct short research projects, and synthesize their ideas into a final paper related to a topic in the course.

WRCT136F TV as Cultural Touchstone (FYS)

Why do we watch TV? What makes a good show good? What does television do for us? This writing course focuses on television as a sociocultural phenomenon. We will scan TV history, from its precursors and twentieth-century origins through the present moment. Areas of focus will include the game show, the MTV music video, the soap opera, the half-hour sitcom, the late-night show, the hour-long drama, and reality TV (Real Housewives, RuPaul's Drag Race). We'll read some accompanying cultural and anthropological writing as well as story theory and TV criticism.

WRCT140L Teaching English to Speakers of Other Languages

This course explores theories and teaching methods related to learning English as a second language (ESL). Students will critically examine current and past "best practices" for teaching ESL and the seminal theories they are based on. In addition, we will discuss the various needs of English language learners coming from a variety of social and cultural backgrounds, at varying levels and varying ages. As a service-learning course, students will have the opportunity to actively work with ESL students at SAWA, a refugee organization, or Beman Middle School. They will be asked to apply the theories and pedagogical techniques they are learning to their sessions at the school and reflect on their experience. They will also critique ESL textbooks, give teaching demonstrations, and add resources to the Wesleyan English Language Learners (ELL) Program.

WRCT145F Bad Ideas About Writing: Introduction to Writing Studies

Writing can be a divisive subject. Some people love writing poetry, fantasy, or romance in their free time but start biting their nails at the mention of an assigned writing project in class. Many have grown up hearing their writing is not good enough, that they need to "learn proper English," or that they "can't say that" in a school paper. Bad Ideas About Writing: An Introduction to Writing Studies provides a venue for reflection on writing education and personal literacy. We will analyze attitudes and practices around writing that stem from cultural movements and systemic discrimination. Additionally, students can expect to participate in peer review sessions to develop skills in giving and receiving feedback. This course is ideal for students interested in writing/literacy education as well as those who seek a better understanding of the process and theory of writing to benefit their own practice.

WRCT200 Integrative Learning Project 1: Crafting Your Digital Identity

Wondering about how you will explain your Wesleyan experience to someone who doesn't get what it is like to attend an eclectic liberal arts institution? Worried about how your experiences at Wesleyan will translate to your post-graduate life? Want to practice talking about yourself so you are ready to enter the job market or apply for graduate school? This course is for you! Throughout the semester, you will practice writing about yourself and will ultimately place what you write in WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about you. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT201 Writing Theory and Practice

Writing is central to education in the U.S., but how does someone learn to write? In this course, students will consider this question by reading theories of composition, debating key concepts of writing such as reflection, transfer, and translanguaging, as well as discussing scholarship out of cultural studies, literacy studies, genre studies, technical and professional writing, and public writing. Together we will explore the potential of writing education, carefully considering how we, as educators, can foster just and innovative writing education. As we read about writing instruction, literacy, and assessment, students will be expected to bring scholarship in dialogue with lived experience. To do so, they will engage in a number of praxis-based assignments, including group work to develop assignments, assessment practices, and curricular recommendations. The course will culminate in a final project of each students' design, that tackles the practicalities of teaching writing.

WRCT202 Pedagogy for Teaching English to Speakers of Other Languages Tutors

This course offers an introduction to pedagogical techniques and theories for teaching English to Speakers of Other Languages (TESOL). The class is ideal for students considering a career in K-12 education, as the number of students whose first language is not English is rising in the US every year. Students enrolled in this course will gain practical experience by committing to volunteer with an organization working with English Language Learners (options will be provided). They are encouraged, but not required, to continue their service afterward with the Wes ELL Program. There is a volunteering commitment of two hours/week, or 20 hours a semester, minimum during the semester.

WRCT203 Investigative Storytelling

This creative writing workshop is designed for students who aim to craft new narrative work through investigative or documentary research. Students might create a play, a screenplay, poetry, fiction, creative nonfiction, a digitally driven project, or something else. We will study some existing investigative artworks—dramatic pieces by Moises Kaufman, nonfiction by Leslie Jamison, poetry by Robin Coste Lewis, documentary film by the Maysles brothers, long-form journalism by Nikole Hannah-Jones, and podcasts by Brian Reed. We will cover interview techniques, research strategies, issues of rights and intellectual property use, and structure/dramaturgy as we plan, research, write, and workshop material together. Class members will regularly share work-in-progress and offer feedback to one another. By the end of the semester, students will be well acquainted with best practices for crafting investigation-based pieces and will have completed full or partial drafts of their projects, depending on project scope. Students are expected to have some workshop experience.

WRCT204 Extreme Landscapes of the Anthropocene

The "Anthropocene," a term coined to categorize the current geological epoch, has become a way in which social scientists can critically and creatively engage with the impact of humanity on the ecological well-being of the Earth. The interdisciplinary and uncertain nature of this subject matter provides space for experimental writing styles, innovative approaches to storytelling, and critical discussion and debate. This course is designed to explore and challenge the term "Anthropocene," questioning how narrative and drama are entangled in the dissemination of complex truths, for better or worse.

In this course, we will consider texts, short films, and other mixed media that investigate the everydayness of extreme landscapes, from "capitalist ruins" to the depleting seas. We will dive into the social, political, economic, and scientific power-scapes that influence narratives about the environment, from late liberal ideology to corporate influence on science and the news. Through the course materials and activities, we will question how to communicate complex information with a broad range of people, particularly surrounding issues of climate change, sustainability, and environmental justice. Each student will build their own writing portfolio of short essays for specific audiences. The class will collectively build and design a storytelling website where they can share their work. Students are encouraged to apply an ethics of care and the art of "non-judgmental attention" to their critical engagement with the Anthropocene.

WRCT205 English Language Learners and US Language Policy

This course explores how explicit and implicit language policies in institutions of power affect businesses, schools, and the legal system. More specifically, the course investigates how language choices, translations, and the policies regarding both affect ESL programs in K-12 education, bilingual businesses, immigration policies, and the US legal system. We will also discuss the recommendations of scholars for increasing multilingualism in business and education, improving education for English-language learners, and efforts to improve non-native English speakers' ability to navigate the legal system. The course is recommended for non-native speakers of English and anyone considering working with English-language learners such as teachers, tutors, NGO personnel, and legal or business professionals.

WRCT207 ELL Literacy Development

In 2021, in the state of Connecticut, approximately 14% of the K-12 population were English Language Learners (ELL) (<https://portal.ct.gov/-/media/SDE/Performance/Research-Library/EL-DEMOGRAPHICS-10012020.pdf>). This growing population includes students whose written languages vary considerably from English, students whose education has been interrupted due to the chaos of war and resettlement in the U.S., and students who have undiagnosed learning disabilities. This service-learning course focuses on an area of great need for this population -- English literacy. This course will offer students an opportunity to tutor ELLs for 20 hours during the semester while studying and applying the theories and best practices of ELL literacy development. In addition, this course

will discuss best practices for teaching math to ELLs, lesson planning, classroom management, and other necessary skills for successful teachers in any field.

WRCT209 Learning to Write

Ask any writer and they'll tell you: writing is a process. In college, however, writing is often reduced to a rapid act of drafting before an imminent deadline. The question for most college writers, then, is this: If you want to learn to write, and if writing is a process, when do you get to practice your process? In this course, students will do just that: practice, practice, practice. We will read what scholars and practitioners say about writing to frame our own thinking about our relationships to writing and our practices as writers. Most importantly, students will write regularly, revise often, and review/workshop their peers' work just as often as they process feedback from the instructor. This course is especially appropriate for students who want to develop their writing skills and bolster their agency as writers particularly in academic settings. Assignments will include weekly reflections, a variety of writing assignments including personal writing, response papers, and two formal argumentative essays, regular writing workshops (peer review), and final writing project based on each student's individual disciplinary interests.

WRCT210 Translation in Theory and Practice

This seminar is a workshop devoted to helping students from a range of disciplines and departments hone their practices of translation. Translation is part of a wide range of academic, publishing, and creative activities: humanities and social science scholars read texts in translation, translate while doing field work and archival research, and include translations in their articles and books; translation is an engine of creativity for many writers, bilingual or not. This course will begin by looking at various alternate translations of the same texts, to expand our sense of options and possibilities. The next five weeks of reading will introduce students to some of the main debates, theories, and practices of translation into English.

The second half of the course will focus on students' own translation projects. While you are welcome to pursue a project you already have in mind, most students will be choosing and starting a new project, guided by the discussions and topics in the first half of the course. The scope can be small (a single short

story, a chapter of a novel or biography, a few poems or song lyrics), or you can have an eye to a bigger project you want to pursue after the end of the semester (a senior thesis, a short-story submission for publication, a book pitch). Week by week, all students will respond in class and in writing to translations-in-progress. In the last week, we will get to see and respond to everyone's revisions.

Facility in a language other than English is required; perfect fluency is not required.

WRCT210Z Contemporary Short Stories in Translation

This course will introduce students to a wide range of contemporary short stories from around the world, translated into English. We will read fiction from four geographical clusters--Nordic Europe, Latin America, East Asia, Western Europe--as well as from outside these relatively well-defined categories. Along with exploring the fiction itself, we will consider how the English-language publishing industry treats these different zones, as we acknowledge the risk of ending up with national or regional stereotypes. We will also keep in mind the translator's role as an active creator of the works we are reading. In week two, we will pay special attention to the crucial professional role of the translator in getting these authors published and recognized, and there will be in-class visits from one translator in each cluster. The objective of the course is to get a basic overview of different contemporary trends and traditions, and their various paths to publication in English, as well as hopefully finding one or two new favorite writers.

WRCT211 Calderwood Seminar in Public Writing: Legal Advocacy for Disabled Veterans

The public rarely understands what it takes to fight for one's legal rights or benefits. Good writers can translate those battles in ways that teach, empower, and (re)build community support for struggling individuals. This course is a study in the translation of legal challenges into civic advocacy.

In this course, students will write about real plaintiffs and legal cases for public audiences. As part of their journey, students will delve into the military and medical files of a disabled veteran applying for a discharge upgrade from the military. Most discharge upgrade applicants suffer from addiction and/or mental health issues, the same issues that cut short the veterans' military careers. Using academic legal writing, news sources, and confidential personnel and medical files, students will describe issues facing veterans in general, and our veteran client specifically. Students will write for a disability blog, a legal services organization (LSO) website, a middle school social studies magazine, a podcast, and a newspaper. Students' writings will inform the instructor's writing--as the veteran's pro bono legal counsel--of a discharge upgrade brief.

WRCT213 Pitch It: Persuading Diverse Audiences to Support Original Theater Projects

You have a script, some songs, and a production design...but you need support to make your project happen. Inspiring people to support original ideas requires research, skill, and craft. This course will offer students the insight, skills, and judgment needed to pitch their projects to writers, producers, donors, designers, and audiences. We will examine a range of creative projects launched in New York City and smaller arts communities to answer the questions: Where did these start? What made them captivating? And who brought them to life? We will then discuss best practices for communicating future projects orally and in writing.

Ideally, students should come to the first class with several ideas for arts projects that they would like to pitch. These can be students' own creations or others' work that students believe should be seen by a wider audience. The first half of the semester will focus on successfully-launched theater projects. In the second half of the semester, students will conceptualize and develop an arts idea they are passionate about. They will learn what makes arts proposals competitive, and will practice pitching to classmates and others. Students will have the opportunity to revise and expand their ideas and work. Students will be graded on a written portfolio and an end-of-semester pitch to the class.

WRCT225 Creative Writing in Spanish

Taught by renowned Mexican writer Cristina Rivera Garza, Distinguished Writer in Residence for 2024-25, this seminar will offer students the tools to articulate their ideas and experiences in Spanish in narrative forms. The course is designed to achieve this in two ways: learning specific techniques through readings of prose in Spanish and by working throughout the semester on crafting at least one short piece. The professor will make in-class observations and written suggestions on student texts as drafts of their work are presented. During the semester students will practice extensive writing, critical reading, and peer editing. The course introduces students to literary terminology and places significant emphasis on vocabulary building.

WRCT225F Writing Biography: Denis Diderot, a Case Study (FYS)

How does one re-create someone else's life, in words? How does one conjure up the historical context that surrounds a far away existence? How does one bring together different forms of evidence--from the archive, primary sources, secondary sources, and written shreds of a life--to create the illusion of knowing the dead? In this course, we will ask these questions about the most fascinating figure of the French Enlightenment, Denis Diderot (1713--1784). In addition to editing the greatest encyclopedia of the 18th century, this would-be priest turned atheist also dreamt of natural selection before Darwin, the Oedipus complex before Freud, and a form of genetic manipulation centuries before Dolly the Sheep was born, all the while making significant contributions to art criticism, dramaturgy, natural history, and political philosophy. His private life, which includes affairs and prison, is also worthy of scrutiny and examination. While reading about his existence and studying a selection of his works, students in this class will undertake a series of biography-related written exercises that seek to resurrect various aspects of this intriguing thinker or members of his cohort. This course and readings are in English.

WRCT226 Ethnographies in Medicine

Biomedicine looks different in different places. Biotechnologies change under new moral frameworks. The same pharmaceutical pill can offer freedom to some and evoke colonialism in others. And in some contexts hunger is more pressing than curing a specific disease. How do we go about challenging our biomedical assumptions and understanding medicine in context? Medical anthropologists have relied on the art and science of ethnography to provide cross-cultural accounts of health and healing that are accessible, provocative, and timely. In this writing-intensive course, we will read exemplary ethnographies in medical anthropology to explore the intersection of medicine, culture, and narrative text. We will explore four themes that cover provocative discourses in the field: the challenges of participant observation during vulnerable encounters with sickness and disease; regimes of power; local-global encounters; and food, eating, and the gendered body.

This course will examine both the power and the complexities of writing that derives from personal experience. Topics to be addressed, in turn, are memory (and its reliability); experience (authoritative/reportorial vs. interpretative/symbolic); identity and voice of the narrator; and agency (the degree to which the narrator is in control, or not in control, of the narrative). Types of life writing that will be explored are coming-of-age narratives, illness and trauma narratives, confessional narratives, autobiographical poetry and song lyrics, and interviews/oral histories. Readings and materials include William Styron, Mary Karr, Ta-Nehisi Coates, Malcolm X, Donna Tartt, and others.

WRCT228 The Art of the Personal Essay

The personal essay is short-form, first-person, narrative nonfiction that encompasses many genres: memoir, reflection, humor, familial and social history, and cultural criticism. Yet even these boundaries often blur within a single essay, and the personal essay can expand to include almost any topic. Writing personal essays--what author and critic Philip Lopate calls "the self-interrogative genre"--helps us find out what we think, often makes us change our minds, and, ideally, leads us to new insights. In class, we will discuss the assigned readings, participate in group responses to each others' writing (workshops), and write in response to prompts. We will study both traditional and unconventional techniques of nonfiction, focusing on the elements of craft: structure, voice, clarity, the use of descriptive detail, and revision.

WRCT228Z The Art of the Personal Essay

We all have stories to tell. But there is hard work in the act of transforming our intimate experiences into meaningful and captivating stories. This course dives into this labor by focusing on the craft of essay writing. Quite specifically, students will practice a variety of creative nonfiction writing techniques as a means of critically reflecting and analyzing personal experiences in order to produce essays that speak to readers in and outside of our immediate communities and contexts. Course assignments will include a writer's journal, workshop letters to classmates, three short personal essays, and a final essay whose subject and style is decided by the writer. Readings will include essays published in the past 30 years by authors such as (but not limited to) Kiese Laymon, Jesmyn Ward, Jose Antonio Vargas, Zadie Smith, and Karla Villavicencio.

WRCT229 Introduction to Writing Fiction

Fiction is a lie--a beautiful lie that holds inside it a human truth. In this class, we will explore this apparent contradiction and learn how to craft truthful lies. Over the course of the semester, we will read selected contemporary fiction, with a special emphasis on the craft of writing. We'll discuss characterization, point of view, plot, structure, dialogue, fictional time, and fictional space. You'll write one short story and bring it to class for your peers to critique, in a format commonly

known as the "workshop." You will also revise this story, using techniques discussed in class. The aims of this course are: (a) to refine your understanding of the attributes, techniques, and styles of fiction; and (b) to help you improve your own writing through effective use of reader feedback and revision strategies. Readings may include work by Franz Kafka, Alifa Rifaat, J.M. Coetzee, Louise Erdrich, Julie Otsuka, Gabriel García Márquez, and others.

WRCT235 Calderwood Seminar in Public Writing: Radical Sustainability

The environmental challenges widely known and discussed for the past 50 years not only remain: they have grown. Maybe we haven't worked hard enough, or maybe we've been going about sustainability the wrong way. Radical sustainability explores the intersection of these now-critical challenges--extinction, climate change, and many others--as well as the physical and social constraints on action to address them. Our aim is to identify the pressure points for an effective response within the geo-ecosystem and the human systems embedded within it, and then to focus on making change through writing.

Calderwood Seminars in Public Writing are writing-intensive courses that emphasize writing for general audiences about expert subject matters. Students work with their peers to hone the skills that enable them to translate scientific understanding of sustainability for the public. Using an intensive author/editor model, students will explore public communication in a variety of forms, including news articles, radio features, and editorials. The goal is prose that is polished and persuasive. Course readings are chosen to highlight the physical nature of human systems as they relate to natural systems. While there is no prerequisite, the course is intended for upper-level students with experience in environmental and sustainability studies.

WRCT237 Communicate for Good: Public Speaking and Persuasion for Social Mobilization and Change

The world needs more...democracy, justice, equality, civility, love. Diagnosing that need is only the first step in changing society. To achieve social good, you must persuade your fellow citizens that the change is worthwhile and the path to change is worth it. In this public speaking and persuasion seminar, you will learn how to communicate for good. In the first half of the seminar, you will adopt the persona of a public organizer and develop mass media messages and public speeches to promote your public good. In the second half of the seminar, you will assume the mantle of leadership and produce a short speech and video storyboard for the leader of a nonprofit organization closely associated with your public good. In both halves of the course, you will be graded on your speech preparation and implementation (i.e., writing and speech).

WRCT250 An Introduction to Data Journalism

This course is designed to familiarize students with the basic principles and tools of data journalism and to provide a wider understanding of the role of basic data analysis in society. To that end, the course will focus on developing a solid familiarity with basic data analysis and visualization software. It will also focus on developing the tools of journalism: retrieving public data, interviewing people and databases, and the basic principles of journalistic writing. By the end of the course, students will be able to analyze data, identify stories within the data, and create a news story complete with data visualizations of publishable quality--a skill transferable to many fields and disciplines. Both online and traditional print platforms will be covered.

WRCT250M Science Journalism: Why Animals Matter

This is a writing intensive course on journalistic and nonfiction writing about animals. The reading will cover the importance of animals in the study of climate change, disease and environmental degradation, and the evolution of human nature. It will also consider animals as independent beings worth attention as subjects in their own right. Writing projects will emphasize basic journalistic skills and the techniques needed to translate technical material on science and public health to make it accessible and appealing to the public.

WRCT250N Writing Reality: Journalism in an Era of Polarization and "Fake News"

How should the news media cover Donald Trump? How did the Internet, the 24-hour news cycle, and rising polarization help change the nature of journalism itself, but also lead to an era of "Fake News" accusations in which Americans exposed to different sources of information come away with completely different sets of facts? This class will explore our new digital and highly partisan media landscape, grounded in a close study of current events. We will study the impact and consequences of today's media -- both how to consume it, and how to write for it.

WRCT250P "It's a Mess": An Academic and Practical Look at Digital Media in the Late 2010s

Hot mess. Dumpster fire. Steaming turd pile. Commentators, journalists, and the public have all used these terms to describe the state of American digital media in 2018. While the profession of journalism is more noble in this era than in previous decades, the world of media creation and consumption is far more complicated than ever before. For young people hoping to get their start in the world of digital media in the late 2010s, catching a break is even harder.

The purpose of this class is twofold: It will introduce students to the larger issues spanning digital media--from a lack of diversity and inclusion to problems with monetization and "Fake News"--while also giving them the chance to walk through what it's actually like to pitch, write, and edit for an internet publication. Students will have the opportunity to write for a class blog using strategies that the digital media world uses today, and they'll spend time giving and receiving feedback on writing.

WRCT250R First Person Singular

This course will examine the techniques and skills of first person reportage, where the writer is present and part of the story. We will find and hone your own voices and points of view. We will examine the myth of objectivity; issues of fairness, accuracy, and moral relativity; the perils of cultural appropriation; the savior complex; and exoticism.

The course will include several short essays and one longer final project. It will draw on readings from The London Review of Books, The New York Times magazine, National Geographic magazine, Granta, Paris Review, The New Yorker, and the following authors: Lyn Freed, Rian Malan, Jonny Steinberg, Doris Lessing, Ryszard Kapuscinski, W.G. Sebald, Bruce Chatwin, VS Naipaul, Justice Malala, George Orwell, Zawe Ashton, Julian Sayararer, Cathy Renzenbrink, Sisonke Msimang, Thomas Paige McBee, Ahmet Altan, and Peter Godwin.

This course is offered by 2019 Koeppel Journalism Fellow, Peter Godwin. He is the author of five nonfiction books and is an award-winning journalist, war correspondent, and documentary filmmaker. Godwin's bio can be found here: <https://petergodwin.com/about/>

WRCT250V The Voice(s) of Expertise: How Podcasting Is Changing the Way We Listen and Learn

In this course, students will examine the changing nature of audio news and storytelling, and the extent to which traditional understanding of the voice of expertise is being disrupted by the rise of podcasting and other on-demand audio forms. The evolving digital media landscape has brought about an historic shift in the delivery of news and information. The shift has been celebrated--"the media has been democratized"--and reviled--"the media is too fractured and people are living in information bubbles." The shift is, at the very least, unsettling, in particular for journalists who find themselves working in an environment where the old rules and training seem outdated. But it also presents significant opportunities, especially in audio and broadcast journalism. The rise of podcasting, in particular, may challenge norms on how journalists explore and explain complex issues, and on who we hear as voices of expertise. This course will be a combination of media criticism, a study of best practices in journalism, and design thinking. As students examine the impact of new media on news and journalism, they will also develop their own ideas for on-demand audio (including podcast design) throughout the semester, working on an individual project, and in collaboration with other students.

WRCT250W Topics in Journalism: The Art and Craft of Journalistic Nonfiction

Journalistic nonfiction uses the tools of the newsroom to create long-form stories that read like novels. Students will learn the skills to ensnare readers in any medium of narrative nonfiction writing, from articles and books to screenplays and teleplays. Journalists excel in conducting interviews and marshaling facts. But few journo's ever master the art of narrative storytelling. Nonfiction book writers can wield a narrative arc to tell a story. But many book writers are weak on basic reporting. We will read the work of newspaper reporters who learned to write long-form narratives, and magazine writers who learned the skills of the newsroom. By semester's end, students will know tools of both trades. We will hear from some of the writers about their work. To keep the focus on journalism, we will mostly skirt the genres of history and memoir. Students will write mostly in the third person, and primarily about events in living memory.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-WRCT**Identical With: **CSPL250W**Prereq: **None****WRCT256 Writing for Television**

This demanding, writing-intensive course focuses on (1) the creative development of a script, individually and collaboratively; (2) scene structure, character development, plot, form and formula, dialogue, and the role of narrative and narrator; and (3) understanding the workings and business of television. Each student will conceive of, synopsise, and pitch a story idea with their "producing partners" to "network executives." Each student will also serve as producer and as an executive for others. After absorbing the feedback, students will construct a detailed beat outline and will turn in an original script at the end of the semester.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-FILM**Identical With: **FILM455**Prereq: **None****WRCT262 Practical Criticism**

In the early twentieth century, I.A. Richards, an instructor in English Literature at Cambridge, ran an experimental class he called "practical criticism." Each week, he distributed a single poem to his students without revealing the poem's title, author, and date of publication. He asked students to take the poem home, read it as many times as they felt necessary, and write a brief essay that simultaneously judged and interpreted the poem. This course revives Richards's experiment for the twenty-first century. We will follow Richards's protocols for a different set of twelve poems, which students must read, judge, and interpret. (Students must vow not to use Google to identify the authors.) The first half of seminar will be spent discussing the poems and the students' judgments of them; the second half will be spent reflecting on the discussions in the first half, with the help of theoretical writings by Immanuel Kant, Jeremy Bentham, Theodor Adorno, Frank Sibley, John Guillory, and Sianne Ngai.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-COL**Identical With: **COL267, ENGL297**Prereq: **None****WRCT265 Creating Children's Books I**

The goal of the course is to develop the skills necessary to create stories and sequential art specifically aimed at young readers. In an industry that welcomes unique voices and styles, there are underlying guidelines that inform children's literature and typically apply to most picture books. The course covers the

creation, style, layout, and pacing of sequential art as well as the structure, content, and specific considerations for writing manuscripts for children.

In addition to studying the craft of effective storytelling and visual narration, we'll take a look at the business of publishing that will familiarize students with practices in the industry.

Offering: **Host**Grading: **OPT**Credits: **1.00**Gen Ed Area: **HA-WRCT**Prereq: **None****WRCT267 Reporting on Global Issues: International Journalism in Action**

This course is designed to introduce students to various mediums of international reporting beyond the traditional print format, like video and podcasting. Visual and auditory formats have gained widespread prominence, making journalism more accessible to diverse audiences. After delving into sourcing, research, and reporting techniques, students will engage in discussions with accomplished innovative journalists, hosts, and reporters who possess extensive experience in covering international issues. Throughout the semester, students will gain valuable insights from these conversations and collaborate in teams to produce a podcast episode for a class series focused on migration.

Offering: **Crosslisting**Grading: **A-F**Credits: **1.00**Gen Ed Area: **SBS-ALLB**Identical With: **CSPL268, CGST261**Prereq: **None****WRCT270 Writing Fiction**

Chinua Achebe was famous for his quote "If you don't like another person's story, write your own." Although disliking another's story could inspire creative writing, there are various reasons why people write, ranging from the basic human desire to understand the world through storytelling down to the desire to respond to the issues of the day--be it moral, political, religious--through fiction. The course is designed to help students gain skills in writing fiction; recognizing the literary conventions of fiction; reading and critiquing published work from a writer's perspective; making deliberate creative choices; engaging the work of others in a workshop setting; and revising their work using feedback from their peers and other writing strategies. As such, our reading list will be diverse in scope, cutting across various continents, races, and creeds. We will hope to use the work on the reading list as stepping points for creating our own stories whether in response to various prompts or as original stories to be discussed in workshops. At the end of the semester, you will not only have read a good chunk of fiction and have a good sense of how fiction works, you will also have produced--and substantially revised--some of that writing.

Offering: **Host**Grading: **A-F**Credits: **1.00**Gen Ed Area: **HA-WRCT**Identical With: **AFAM281, COL370, ENGL277**Prereq: **None****WRCT272 Knowing Their Place: Two Centuries of Women Generating Wonder in the Natural World**

This seminar will examine the intersection of natural science, women's history, and poetic prose through the writings of Rachel Carson, author of the groundbreaking environmental manifesto *Silent Spring*, and the women who both preceded and succeeded her. What does it mean to know a landscape or an ecosystem intimately? How does a sense of place become political? How does gender affect perspective on the natural world and environmental stewardship?

In addition to Carson, we will read authors including Susan Fenimore Cooper, Mary Treat, Anna Botsford Comstock, Terry Tempest Williams, Robin Wall Kimmerer, Camille Dungy, and Margaret Renkl. Writing assignments will include both textual analysis and personal nature writing.

WRCT288 Introduction to Journalism: Constructing the News

Champions of journalism are fond of talking about bedrock values: fairness, objectivity, transparency. But like any idea—or ideology—these keywords have their own genealogies, and their own constructed natures; in other words, they came from somewhere. This course aims to pull apart our received notions of facticity, objectivity, and transparency in news/journalism/nonfiction, tracing their roots, understanding their historical context, and considering how we deploy them in our own work. Students will learn the fundamentals of reporting in hands-on assignments that pull them out into the world to gather stories. This journalistic work will occur alongside class discussions of canonical (and neglected) strands of journalism history, drawn in part from Bruce Shapiro's anthology *Shaking the Foundations: 200 Years of Investigative Journalism in America*. These include readings from early Black press pioneers (Ida B. Wells, Marvel Cooke), muckrakers and investigative journalists (Lincoln Steffens, Vera Connelly), and pathbreaking science journalism (Rachel Carson's *Silent Spring*). Readings will also include criticism that examines our present media situation, including selections from Raven Lewis Wallace's *The View from Somewhere: Undoing the Myth of Journalistic Objectivity* and Ben Smith's, *Traffic: Genius, Rivalry, and the Billion-Dollar Race to Go Viral*.

WRCT300 Integrative Learning Project 2: Website Incubator

Have you developed knowledge or expertise about a topic through an internship, engagement in a student organization, time studying abroad, or through some other experience that you would now like to share with the world? This is the class for you! Throughout out the semester, you will work to translate your experience into a website. I will help you do this by asking you to think about the content you would like to share, the audience with whom you would like to share it, and the goal you have for that audience. Ultimately, you will share your experience through WordPress, the world's most popular platform for website design. Along the way, you will learn about user experience (UX) design principles and research methodologies, so that the website you create draws in your audience and makes them want to learn more about your chosen topic. Throughout the semester, we will meet once a week to do all of these things in a relaxed, collaborative environment. Join us and bring along some friends!

WRCT301 Promoting Early Civic Engagement: The Middle School Debate Project

Civic participation starts early. Students begin to find their place in public life in middle school. Debate can provide students with tools and a platform for expressing their ideas in public. Through debate, students learn to critically analyze texts, see multiple perspectives, and advocate for change to the status quo. This service-learning course pairs civically-engaged Wesleyan students with

middle and high school teachers and students. Wesleyan students will design and test parliamentary debate training materials on our campus. Then, the class will help to implement the training materials at public schools in Middletown and Hartford. Our class will also mentor high school student apprentices who will help to run two interscholastic debate competitions. Wesleyan students will be assessed on their: 1. contributions to training materials, 2. preparation for mentoring and coaching sessions, 3. contributions to middle school debate competitions and campus trips, 4. reflection papers/presentations on effectiveness in working with public school partners, and 5. contribution to the class report: "Supporting Middle School Debate Collaborations in Connecticut."

WRCT302 All the Feels: Affect Theory and Cultural Studies

Butterflies in your chest. Perspiration on your upper lip. A racing heart. Every day we witness and manage sensorial experiences; quite often these negotiations illuminate the ways in which powerful norms and institutions shape our daily lives. This course explores the relationship between the seemingly individualized experience of feeling and the social world of power by introducing students to the vibrant field of affect studies. A recent "turn" in critical theory, affect theory is interested in embodiment, the senses, and sensorial experience, questioning the dominance of rationality and cognition by exploring the role emotions and feelings play in our social worlds. This course will focus predominantly on affect theory as it emerged from queer, feminist, and racialized minoritarian discourses in order to ultimately contemplate the ways theories of affect, feeling, sensation, embodiment, and emotion open up literary and cultural texts.

WRCT303 Post Cold War Narratives of Migration to the U.S.

In this course, we will study post-cold war U.S. immigrant literature. Published in a period of shifting politics, particularly for racialized migrants, these texts illuminate new iterations of what it means to be and belong in a world where capital, labor, materials, products, and people were experiencing new forms of global im/mobility. We will read a variety of diasporic fiction from a range of localities to consider the ways imperialism, colonialism, militarism, religious proselytizing, and racial capitalism are in dialogue with the murky experiences of family, desire, loss, home, mobility, culture, trauma, and belonging. In doing so, we seek to understand how macro, micro, interpersonal, and intrapsychic experiences and institutions shape migratory routes and the stories that emerge across them. We will address literature through an interdisciplinary lens by reading fiction alongside sociology, history, economics, political theory, and more in order to consider what the world of the fictive can tell us about migration that other disciplines may not be able to articulate with such emphasis and attunement as literature.

WRCT305 The Critic and Her Publics

The critic and her public are difficult concepts to define or fix. The critic is not a creative writer, an academic, a journalist, or a reporter, yet criticism borrows from the protocols of all four professions. The critic's publics are not made up exclusively of scholars, specialists, artists, or lay readers, but span these divisions. The aim of this course is to trace the evolution of the critic, her function, her style, and her publics from the seventeenth century to the present. Readings will include essays by Jane Anger, Margaret Cavendish, Joseph Addison, Richard Steele, Eliza Haywood, John Dryden, Samuel Johnson, Matthew Arnold, Henry James, T.S. Eliot, Virginia Woolf, Walter Benjamin, José Ortega y Gasset, Jorge Luis Borges, Clement Greenberg, James Baldwin, Mary McCarthy, Roland Barthes, Susan Sontag, Elizabeth Hardwick, Edward Said, Toni Morrison, Renata Adler, Michael Warner, Anne Carson, Margo Jefferson, and Elif Batuman. The class will be linked with the Shapiro Center talk series, "The Critic and Her Publics," and the Shapiro Center Master Classes.

WRCT306 Foundations of Playwriting from the Global South

Cimientos (Spanish for "foundations") is a play development program run by NYC-based Latinx theater company IATI Theater. Since 2001, this program has showcased authors from around the world. However, in most recent years, the experience of working with playwrights from Argentina, Chile, Colombia, Mexico, Kenya, and Uganda has opened up the possibility of addressing playwriting as a deterritorialized praxis in which political, thematic, and historical discussions intertwine with shared aesthetics and new forms to understand theater in the Global South. In this workshop-seminar, students will analyze canonical texts and unpublished plays from contemporary authors based in the Global South to participate in the discussion of decolonizing playwriting. Students will analyze critical scholarship on the Global South to trace a contemporary South-South relationship within playwriting as a literary and political device. Authors from the Cimientos program will join the class as guest speakers to prompt students to develop creative writing techniques. Students will present a draft of a short play that integrates the material covered in class.

WRCT308 Ancestral Writings: (Re)Tracing AfroCaribbean and Indigenous Frameworks for Creative Writing

Coined by Puerto Rican author Mayra Santos-Febres, "ancestral writing" elicits a reconceptualization of creative writing and its techniques from the point of view of our ancestors in Latin America, more particularly, the Afro-diasporic and indigenous. In this course, students will explore theoretical, literary, and

cinematic material that encourages decentralizing creativity and writing as a political praxis. Concepts such as the ch'ixi in Aymara culture and biocultural memories from Andean indigenous nations will work as points of departure to develop decolonizing, anti-imperialist, and anti-racist writing techniques. Guest speakers, who include specialists in the Quechua language and Afro-Caribbean folklore, will encourage students to (re)formulate techniques for their creative writing. Students will analyze texts by Silvia Rivera Cusicanqui, Mayra Santos-Febres, Odi Gonzales, Frantz Fanon, Guaman Poma, Elicura Chihuailaf, and Solimar Otero, among others. Students will present a creative writing piece that puts into practice the material studied in class.

WRCT309 The 21st Century Novel

This course is designed to introduce you to some great works of contemporary fiction. The reading list is not meant to be comprehensive, nor do I claim that these are the very best of all the contemporary novels in the world, but the course should provide an orienting overview of various contemporary styles and themes, as well as, ideally, give you one or two new favorite books. We will experiment with organizing our study by time rather than nation or language (Does the category of "the 2010s novel" make as much or more sense than, say, "the American novel" or "the Francophone novel"?)--the reading list includes work from eight countries, half in translation. In exploring what if anything makes the 21st Century novel different, I don't have a particular theoretical perspective in mind, but if you are interested in one you can bring it up in discussion and apply it in your final paper.

We will neither ignore nor treat as an unfortunate if indispensable crutch the fact that four of our books will be read in translation. No one can read all books in their respective original languages; translation is how we experience international literature--we always read books from language contexts outside our own with a double focus, as texts produced by a doubled authorship. This dynamic is worthy of attention and appreciation in its own right. I am a translator, including of one book on the reading list; I will bring my translation experience into our discussions, but even when none of us knows the original language, we can engage more fully with the work by remembering the translator's role in the creation of what we're reading and considering the translator's choices.

WRCT310 Literary Movements: Conceptual and Experimental Fiction

The course seeks to examine the modern novel by focusing on fiction structured around a concept ("conceptual fiction") and fiction which deviates from the traditional modes of storytelling in a coherent enough way ("experimental fiction"). Together, we will examine novels and short stories in which an idea, an image, or metaphor directly informs the structure, plot, characterization, or all of the above of the work. We will also look at works of formal invention and/or subtle experimentation as far as they are constructed around a discernible and coherent pattern. There have been countless such works in the modern/contemporary period and some of the notable practitioners include Virginia Woolf, Moshin Hamid, George Saunders, Cormac McCarthy, Carlos Fuentes, Toni Morrison, and John McGregor, amongst others have work in this "movement."

We will also look at critical essays around these books including from David Lodge, James Baldwin, and Victor Schlovsky, amongst others.

We will study texts from some of these writers (Woolf, Hamid, Saunders, McCarthy) closely and try to determine what it means to create fiction around a "concept." Implicit in this inquiry would be the broader question of form, formal invention, and the vagaries of experimentation. What makes a novel unique? What new grounds does this novel or story break? Does the experimental mode help or hinder meaning? What makes a novel unique? How does structure distinguish a novel rather than plot or characterization, or, for that matter, ideas? What are the ways by which a novel can subvert the traditional form of the novel? What are the strictures of genre and how do they constrain or help expand the art of storytelling?

WRCT317 Writing and Drawing Comics

This is an intensive workshop course for students interested in making comics. We will read comic strips and books that vary widely in genre and style, and learn to identify and emulate cartooning techniques. This is a permission of instructor course. No comic experience is necessary, but students will be expected to create work each week, so some comfort with drawing/artmaking is encouraged. To apply, please email srwarren@wesleyan.edu with 2-3 samples that show both writing and drawing/artmaking (e.g., a creative essay and a selection of sketches, a painting and a poem, etc.).

WRCT330 The Craft of Criticism

This seminar will explore the craft of writing criticism for magazines and newspapers. Over the course of the semester, we will look at different genres of the form--the book review and the "briefly noted," the 4,000-word review-essay and the blurb, memorial essays and "braided" criticism--to consider the protocols of writing for different publications and publics. Students will be assigned to write four works of criticism of varying lengths and will be asked to select a different object for each assignment (e.g. novel, film, album, exhibition). A series of shorter reflections will also be assigned on questions of rhetoric, affect, and style in response to weekly readings. The course will be offered in conjunction with the Shapiro Center's "The Art of Editing" series and its master classes on editing and fact-checking taught by members of The New Yorker staff.

WRCT350 Literature in the Age of Social Media

What does it mean to write, and to read, when the predominant form of self-expression for many of us resides in social media? What does it mean to construct a digital self, separate and apart from the selves that exist IRL? To interact primarily through the mediation of screens? In what ways do we commodify ourselves, and are we commodified? What risks do we run in revealing our inner most thoughts and feelings in an age of autocratic and

capitalist surveillance, in which algorithms direct the attention once guided by more organic social forces? And how do all these issues affect the core mission of literature, which is to tell stories that reflect both the public self and the private one? We'll examine all these questions through a collection of texts, ranging from novels (Megha Majumdar's *A Burning*, Patricia Lockwood's *No One Is Talking About This*, Tao Lin's *Taipei*), essays (Jia Tolentino's *Trick Mirror*, Samantha Irby's *wow, no thank you*), and poems (Emily Berry's "Paris," Tommy Pico's "Junk"). We'll also consider these questions through some short writing assignments that ask students to engage in the creative act through the lens of social media.

WRCT357 Saving the Republic: Lessons from Plato for our Time

More than two thousand years ago, Plato addressed the pressing issues of the day: the rise of the oligarchy, dwindling of public deliberation, increasing political factionalism, and erosion of credible information. Some argue that the lessons of his Socratic exchanges, captured in *The Republic*, are valuable to this day. In this course, students will immerse themselves in 403 B.C.E., a crucial moment in Athenian democracy. Following a close reading of *The Republic*, the classroom will become the Athenian state. Each member of the class will assume a particular place in Athenian society and in the factions of the day using highly-developed roles from the *Reacting to the Past* curriculum. As members of the gathered assembly, students will debate divisive issues such as citizenship, elections, re-militarization, and the political process. Then, students will develop, rehearse, and publicly perform a one-act play at the Russell Library in Middletown. The play will be set in ancient Athens and will demonstrate factionalism, information asymmetry, political brokering, and other political issues of that era. Following the performance, the students will engage the audience in a Q&A about the relevance of the play's themes for today. Students will be assessed in five ways: 1. Content quizzes on *The Republic*, 2. Written preparation for debates/assemblies, 3. Oral presentations in debates/assemblies, 4. Contribution to the class public performance, and 5. A short paper analyzing *The Republic's* relevance for contemporary United States.

WRCT413 The Fact: Master Class on Fact Checking

How do you identify a fact? How do you verify it? In this master class, the head of the fact-checking department at The New Yorker, Fergus McIntosh, introduces students to the bizarre, delightful, and contentious world of fact checking. Across three sessions, students will learn what the roles and responsibilities of a fact checker are, how to approach the practice of checking, sourcing, and editing, and where to draw the line between fake news and the truth.

WRCT500 Writing as a Multilingual Graduate Student

This course is designed to support graduate students who do not speak English as their first language while writing about research in their graduate programs. Students will learn about the process of writing academic journal articles including writing an abstract, literature review, and methods, results, and discussion sections. They will also focus on sentence- and paragraph-level issues in their writing and elements of writing style such as conciseness, ambiguity, and clarity. Throughout the course, students will review and practice organizational skills for longer papers, summarize numerical and theoretical data, and practice the mechanics of writing.

PRIZES

George H. Acheson and Grass Foundation Prize in Neuroscience • Established in 1992 by a gift from the Grass Foundation, this prize is awarded to an outstanding undergraduate in the Neuroscience and Behavior Program who demonstrates excellence in the program and who also shows promise for future contributions in the field of neuroscience.

Alumni Prize in the History of Art • Established by Wesleyan alumni and awarded to a senior who has demonstrated special aptitude in the history of art and who has made a substantive contribution to the major.

American Chemical Society Connecticut Valley Section Award • Awarded for outstanding achievement to a graduating chemistry major.

American Chemical Society Undergraduate Award in Analytical Chemistry • Awarded for excellence in analytical chemistry.

American Chemical Society Undergraduate Award in Inorganic Chemistry • Awarded to an undergraduate student in inorganic chemistry to recognize achievement and encourage further study in the field.

American Chemical Society Undergraduate Award in Organic Chemistry • Awarded to a senior who has displayed a significant aptitude for organic chemistry.

American Chemical Society Undergraduate Award in Physical Chemistry • Awarded in recognition of outstanding achievement by undergraduate students in physical chemistry, and to encourage further pursuits in the field.

American Institute of Chemists Award • Awarded for outstanding achievement to a graduating chemistry major.

American Society for Biochemistry and Molecular Biochemistry Honor Society • The ASBMB Honor Society recognizes exceptional undergraduate juniors and seniors pursuing a degree in the molecular life sciences. Students are recognized for their scholarly achievement, research accomplishments, and outreach activities in the molecular life sciences.

Ayres Prize • The gift of Daniel Ayres, Class of 1842, to the first-year student who attains the highest academic standing in the first semester.

Baden-Württemberg—Connecticut Sister State Exchange • A grant for one academic year's study at a university in the German state of Baden-Württemberg, administered by the Connecticut Department of Higher Education.

Baldwin Fellowship • Established in 1952 by family and friends of Horace Reed Baldwin, Class of 1947, and awarded annually for study at law school to the member of the senior class who, in the opinion of the committee, shows the most promise of becoming an outstanding lawyer and public-spirited citizen.

Beinecke Scholarship • Awarded by the Sperry Fund for graduate study in the arts, humanities, and social sciences.

Bertman Prize • Established in memory of Bernard T. Bertman, associate professor of physics, by gifts from his colleagues, family, and friends, in 1970. Awarded to a senior majoring in physics who displays a particularly resourceful and creative approach to physics research.

Best Honors Thesis in Sociology Award • Established by the Department of Sociology to honor Herbert H. Hyman, distinguished scholar, pioneer in survey research methodology, and Professor Emeritus in the Department of Sociology.

Awarded annually to students, whether sociology majors or not, who in the opinion of the faculty have written outstanding theses on a sociological topic.

Best Paper Prize in Sociology • Awarded annually to students who have written the best scholarly papers in sociology in the previous year.

Blankenagel Prize • Income from the John C. Blankenagel Fund, established in 1970, awarded at the discretion of the Department of German Studies to enrich educational offerings in the area of humanistic studies, or to assist a superior student in completing a project in German studies.

Boylan Award • Given by Jennifer Boylan in honor of her classmate, Annie Sonnenblick, the award recognizes an outstanding piece of creative nonfiction, journalistic work, or writing for general readers.

Bradley Prize • The gift of Stanley David Wilson, Class of 1909, in memory of Professor Walker Parke Bradley, to the senior or junior who excels in chemistry and particularly in special original work.

Bridge Builder Award • Awarded to a student and student group who have succeeded in strengthening the relationship between Wesleyan and the greater Middletown community.

Briggs Prize • Established in 1900 by the gift of James E. Briggs, to the student who has done the most effective work in intercollegiate debating.

Professor Samuel Hugh Brockunier Prize • Awarded for the best final essay on a social studies topic by a student in the Graduate Liberal Studies program.

Christopher Brodigan Fund Award • Established in memory of Christopher Brodigan, a Wesleyan student who died in an accident in his freshman year. The fund pays tribute to Christopher's deep interest in Africa and to the public service he provided through teaching in Botswana prior to entering Wesleyan. Awarded to graduating seniors and recent graduates who plan to pursue public service or research in Africa.

Erness Brody Prize • Established in 2002 by Ann duCille in honor of Professor Erness Bright Brody, former chair of the African American Studies Program. Awarded annually to a senior African American Studies Program major for excellence in written expression.

Bruner Freshman Improvement Prize • The gift of William Evans Bruner, Class of 1888, to the student whose second-semester first-year record shows the greatest relative improvement over that of the first semester.

Butler Prize • The Butler Prize, established in 1991 in honor of retiring colleague Jeffrey D. Butler, is awarded for the best Honors thesis in African, Asian, or Latin American history.

Butterfield Prize • Established by the Class of 1967 and awarded to the graduating senior who has exemplified those qualities of character, leadership, intellectual commitment, and concern for the Wesleyan community shown by Victor Lloyd Butterfield, eleventh president of the University.

Camp Prize • Established in 1905 by the Board of Trustees in memory of Samuel T. Camp, trustee 1880–1903. Awarded for excellence in English literature.

Nancy Campbell/National Trust for Historic Preservation Summer Internship Program • Established by friends and admirers in honor of Nancy Campbell, wife of former Wesleyan University President Colin Campbell, in recognition of her national leadership in historic preservation, and awarded to rising juniors or rising seniors.

Frank Capra Prize • Established in 1983 to honor Frank Capra, Hon. 1981, the great American film director whose collected papers are in the Wesleyan Cinema

Archives. Best film to exemplify Capra's skill in telling a human story that contains both humor and pathos.

Cardinal Crest Award • Awarded to the member of the WSA who has given honor to his/her post on the WSA or one of its committees through his/her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Chadbourne Prize • The gift of George Storrs Chadbourne, Class of 1858, to that member of the first-year class outstanding in character, conduct, and scholarship.

Citation of Citizenship in the Department of Mathematics and Computer Science • Recognizes those students studying mathematics or computer science, whose contributions both aid the educational mission of the department and foster a sense of community that encourages and supports all members of the department.

Clark Fellowship • Established in memory of John Blanchard Clark by his parents, Mr. and Mrs. Donald L. Clark of Pittsford, New York; his sister, Catherine; relatives; and friends. Awarded annually to a qualified graduating senior of Wesleyan University for graduate study in a school of medicine. Recipients are judged by members of the Health Professions Panel on their potential for outstanding achievement, their promise of community leadership and public-spirited citizenship, and their scholastic record at Wesleyan.

Clee Scholarship • Established by friends and associates of Gilbert Harrison Clee, Class of 1935, late president of the Board of Trustees. Awarded annually to a member of the junior class, who will remain a Clee Scholar throughout his or her junior and senior years, who will have demonstrated high standards of leadership, a deep commitment to Wesleyan University, an interest in the broad implications of multinational business enterprises, a sensitivity to the need for a creative balance between the public and private sectors, and an intention to pursue a career in business. A specific objective will be to select individuals who exemplify the qualities that characterized Gilbert Harrison Clee as a humane person and as a leader.

Dr. Neil Clendeninn Prize • Established in 1991 by George Thornton, Class of 1991, and David Derryck, Class of 1993, for the African American student who has achieved academic excellence in biology and/or molecular biology and biochemistry. This student must have completed his or her sophomore year and in that time have exemplified those qualities of character, leadership, and concern for the Wesleyan community as shown by Dr. Neil Clendeninn, Class of 1971.

Cole Prize • Established through the gift of George Henry Walker, Class of 1881, in the memory of Charles Edward Cole. Awarded to the first-year student who shows the greatest ability in fiction or nonfiction writing.

Congress-Bundestag Youth Exchange for Young Professionals • This fellowship funded by the German Bundestag and U.S. Department of State, that annually provides 75 American and 75 German young professionals, between the ages of 18 -24, the opportunity to spend one year in each other's countries, studying, interning, and living with hosts on a cultural immersion program.

Connecticut Higher Education Community Service Award • Established in 1993 by the Connecticut Department of Higher Education to promote community service leadership and activities by students at Connecticut's institutions of higher education. This award recognizes outstanding student contributions to the promotion of community service through projects that increase student participation in their college community and projects that develop a unique approach to effective community service.

Herbert Lee Connelly Prize • Given in 1980 by Mabel Wells Connelly in the name of her husband, a member of the Class of 1909 and alumni secretary, 1924–56. Supplemented by friends, relatives, and sons Hugh Wells and Theodore Sample '48, the fund provides income to be awarded annually to a deserving undergraduate who demonstrates an interest in English literature and an unusual ability in nonfiction writing.

CRC Award for Outstanding First-Year Chemistry Students • Awarded to an outstanding first-year chemistry student, based on grades in organic chemistry over the interval of the current academic year.

Critical Language Scholarship • An intensive summer program of overseas language and cultural immersion in one of 15 languages deemed critical to U.S. national security.

Christina Crosby Award for Social Justice Feminism • Awarded each year to a FGSS major who epitomizes Christina's dedication to social justice activism and scholarship (expressed in multiple ways - through thesis or essay writing, through activism on and/or off campus etc.).

Davenport Prize • Established in 1948 by the gift of Ernest W. Davenport in honor of his brother, Frederick Morgan Davenport, Class of 1889, for excellence shown by seniors in the field of government and politics.

Dorchester Prize • Established through the gift of Daniel Dorchester IV, Class of 1874. Awarded for the best thesis submitted to the English department.

W. E. B. Du Bois Prize • Awarded annually for academic excellence to a student majoring in African American studies.

Dutcher Prize • Established by gift of Arthur A. Vanderbilt, Class of 1910, in honor of Professor George Matthew Dutcher, for highest excellence in the history department.

Kevin Echart Memorial Book Prize • Awarded to the graduating College of Letters senior who best exemplifies the intellectual curiosity and range, the pleasure in colloquy, the capacity for admiration and skepticism, and the moral seriousness and love of books that we honored in our late colleague Kevin Echart and seek to foster in the students of the College of Letters.

Exceptional Program of the Year Award • Awarded to the coordinator(s) of an exceptional program, cultural event, speaker, or production that has had positive campus-wide impact.

William Firshein Prize • Awarded to the graduating MB&B student who has contributed the most to the interests and character of the Molecular Biology and Biochemistry Department.

First-Year Leadership Award • Awarded to a first-year student who has demonstrated outstanding leadership or involvement in the Wesleyan community.

Susan Frazer Prize • Awarded annually to the student (or students) who has done the most distinguished work in the elementary and intermediate French language sequence.

Freeman Prize • Established in 1975 by Mansfield Freeman, Class of 1916. Awarded annually to a senior for excellence in East Asian studies.

French Government Teaching Assistantship • One-year assistantship for teaching English at a *lycée* in France, administered by the Institute for International Education (New York).

Beulah Friedman Prize • This prize recognizes work of outstanding achievement by a student in the history of art. The prize is awarded to a member of the senior class.

Friends of the Wesleyan Library Undergraduate Research Prize • Established in 2017 to recognize research projects in any field (besides honors theses) in any field that demonstrate outstanding and creative use of Wesleyan's library collections and resources.

Fulbright Fellowship • These grants are funded by the United States government under the Mutual Educational and Cultural Exchange Act of 1961 (Fulbright-Hays Act) and by many foreign countries. The grants, administered by the Institute for International Education, provide for one year of study at a university abroad.

Fulbright-Hays Doctoral Dissertation Research Abroad Grant • Awarded by the United States Department of Education to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of six to twelve months.

Fulbright Teaching Assistantship • Placement abroad providing classroom assistance to English-language teachers who also serve as cultural ambassadors for the United States.

Gay, Lesbian, and Sexuality Studies Prize • Donated by the Wesleyan Gay and Lesbian Alumni Association (GALA), this prize is awarded annually to the undergraduate who has done the best research and writing on a subject in gay, lesbian, and sexuality studies.

German Academic Exchange Service Fellowship • At least one fellowship per year for study at a German university. The German Academic Exchange Service is a private, self-governing organization of German universities, which promotes international exchange among institutions of higher learning.

German Pedagogical Exchange Service Assistantship/Fulbright Grant • A one year teaching apprenticeship in Germany.

Giffin Prize • Established in 1912 by a gift of Mrs. Charles Mortimer Giffin, in memory of her husband, an honorary graduate of the Class of 1875. Awarded for excellence in the Department of Religion.

Akiva Goldsman Prize in Screenwriting • Awarded to the graduating film studies major who has written the best full-length screenplay in the Department of Film Studies.

Barry M. Goldwater Scholarship • Awarded by the Barry M. Goldwater Scholarship and Excellence in Education Foundation to a college student who has outstanding potential and intends to pursue a career in mathematics, the natural sciences, or engineering.

Graduate Student of the Year Award • Awarded to a graduate student who has proven to be a vital and dynamic member of the Wesleyan community through taking on an active leadership role in campus life.

Graham Prize • The gift of James Chandler Graham, Class of 1890, awarded to a member of the graduating class for excellence in natural science.

Grant/Wilcox Prize • Awarded in honor of Connecticut filmmakers Ellsworth Grant and Roy Wilcox to the senior whose work in film and video best addresses significant environmental, social, or artistic issues.

James T. Gutmann Field Studies Scholarship • Established in 2007 by Lisette Cooper '81, to honor her former professor and mentor, James T. Gutmann. Awarded to an especially promising major in earth and environmental sciences to support geologic field research expected to lead to a senior honors thesis.

Hallowell Prize • Established by friends and associates of Burton C. Hallowell, Class of 1936, former professor of economics and executive vice president of the University. Awarded annually to an outstanding senior in the study of social science, as determined by the governing board of the Public Affairs Center.

Sarah Hannah Prize • Offered in memory of Sarah Hannah '88, in association with the Academy of American Poets, and awarded for an outstanding poem.

Hawk Prize • The gift of Philip B. Hawk, Class of 1898, as a memorial to his wife, Gladys, to the students who have done the most effective work in biochemistry.

Health Education Prize • Awarded annually to the graduating senior who best exemplifies the goals of Wesleyan's Health Education Program, which are the promotion of healthy lifestyles and disease prevention. The student who is chosen for this prize has demonstrated commitment not only to his or her personal well-being but has also served as a role model to peers in the Wesleyan community and beyond.

Heideman Award • Established in 1972, in honor of Enid and Walter Heideman. Awarded annually to an undergraduate who has helped others in the Wesleyan community, in the tradition of the Heidemans.

Rachel Henderson Theater Prize • Awarded annually to that student who, in the estimation of the theater faculty, has contributed most to theater at Wesleyan over the course of his or her undergraduate career.

Holzberg Fellowship • Established in memory of Jules D. Holzberg, professor of psychology, by gifts of his colleagues and friends. Awarded to a senior who intends to pursue graduate study in clinical or community psychology in recognition of the commitment to research and applied work on the resolution of social problems on the individual and collective level that is consistent with Professor Holzberg's lifelong professional interests and humanitarian concerns.

Horgan Prize • Established by the Department of English in honor of Paul Horgan, professor emeritus and writer-in-residence. Awarded to the student who has written the best short story of the year.

Ingraham Prize • The gift of Robert Seney Ingraham, Class of 1888, and his wife, for excellence in New Testament Greek or, in years when a course in that subject is not given, for excellence in a course in Greek elective for juniors and seniors.

Jessup Prize • Awarded to two undergraduates each year who are deemed to show the greatest talent and promise for even greater excellence in sculpture, printmaking, architecture, photography, painting, or drawing. The prize is given in memory of Pauline Jessup, a noted interior designer, who practiced her craft for over 60 years throughout the United States. Mrs. Jessup was noted for her unerring eye, her extraordinarily refined taste, and her steadfast commitment to her clients—many of whom she served over three generations. The award is determined by the Department of Art and Art History.

Johnston Prize • The gift of David George Downey, Class of 1884, in memory of Professor John Johnston. Awarded to those first-year students or sophomores whose performance in their first two semesters of physics shows exceptional promise.

Keasbey Memorial Scholarship • Awarded by the Keasbey Memorial Foundation on the basis of academic excellence and a strong record of extracurricular participation for two years of graduate study in England.

P. L. Kellam Prize • Established in memory of Priscilla L. Kellam '83, by her husband. Awarded annually to a senior woman, under the age of 25, who has majored in East Asian studies and has traveled or plans to travel to China to further her studies.

Barry Kiefer Prize • In memory of Barry I. Kiefer to celebrate outstanding graduating PhD students in biology and molecular biology and biochemistry.

Leavell Memorial Prize—Film • Awarded annually to a senior film student who has done outstanding work in the major, and who best reflects the departmental goals of citizenship, scholarship, and the wedding of theory and practice.

Leavell Memorial Prize—Music • Awarded annually to a senior who has done outstanding work in music, and whose work manifests the ideals of the World Music Program in the Department of Music.

Lebergott-Lovell Prize • In honor of Professors Emeritus of Economics Stanley Lebergott and Michael Lovell. To be awarded to the best paper written in the current academic year that uses econometric techniques to analyze an economic problem. Established in 2011 by Bruce Greenwald; first awarded in 2012.

Leonard Prize • Given in 1917 in memory of William Day Leonard, Class of 1878, by his friends. Awarded annually to the member of the WSA who has given honor to his or her post on the WSA or one of its committees through his or her leadership, and has selflessly served the greater interest of the Wesleyan student body.

Levy-Spira Prize • Awarded for distinction in Latin American studies. Established in 1992 in memory of Eduardo Levy-Spira '82, by his family and friends.

Limbach Prize • Established in 1966 by Russell T. Limbach, professor of art, in memory of his wife, Edna Limbach. Awarded annually to the student who has contributed the most imaginative, generous, thoughtful, and understanding social service to the people of the city of Middletown and/or the Wesleyan community.

Lipsky Prize • The gift of the Reverend and Mrs. Bailey G. Lipsky in memory of their son, Francis Jules Lipsky, Class of 1931, to the member of the choir possessing in the highest degree unflinching kindness, quiet dignity, and brilliant scholarship.

Littell Prize • The gift of Franklin Bowers Littell, Class of 1891, for excellence in one or more advanced courses in astronomy.

Luce Scholarship • The Henry Luce Foundation selects 18 graduates to spend a year in an Asian country and provides an experience that will broaden the participant's perspective on his or her chosen career field.

Macmillan Scholar of Saint Andrew's Society of the State of New York • Awarded by the Saint Andrew's Society of the State of New York, this scholarship enables outstanding college graduates of Scottish descent to engage in a year of graduate study in Scotland.

John W. Macy Summer Internship in Public Administration • Established by friends and colleagues of John W. Macy, Class of 1938. Awarded to the junior who most clearly exemplifies, in the decision of the selection committee, the characteristics associated with John Macy: high intellectual ability, a capacity for sustained effort in difficult tasks, strong ethical standards, an ingrained sense of duty, and a commitment to public service as a worthy career.

Mann Prize • Established in memory of Albert Mann, Class of 1906, devoted alumnus and faculty member, by his daughters and their families. Awarded annually to the senior(s) showing the most outstanding achievements in the Romance languages.

George C. Marshall Scholarship • Awarded annually for two years of study at any university in the United Kingdom, on the basis of distinction of intellect and character as evidenced by both scholastic attainments and other activities and achievements; strong motivation and seriousness of purpose; and the potential to make a significant contribution to one's own society.

Martius Yellow Award • Awarded for excellence in organic synthesis.

Roger Maynard Award • A memorial award to that senior scholar-athlete who best exemplifies the spirit, accomplishments, and humility of Roger Maynard, Class of 1937, former trustee.

James L. McConaughy Writing Prize • Awarded for a piece of nonfiction writing, on a topic in the social sciences or sciences, that is designed to interest general readers. Funds for this award were given originally by members of the Class of 1936 in honor of their classmate, James L. McConaughy, a former governor of Connecticut and president of Wesleyan University.

Richard McLellan Prize • Awarded annually to a junior who exemplifies those qualities that characterize the late Richard McLellan, director of the Career Planning Center and associate dean of the college: character, leadership, commitment to public service and diversity, wide cultural interests, and a sense of humor.

Priscilla Meyer Fund • Established in honor of Professor Priscilla Meyer's teaching career at Wesleyan. Awarded to Wesleyan students who are the most dedicated to the study of topics related to Russia, Eastern Europe, or Eurasia.

Meyer Prize • Established in 1991 in honor of retiring colleague Donald A. Meyer, and awarded for the best honors thesis in American History.

Joan W. Miller Prize • Established by Professor Miller in 2008. It is awarded for the outstanding honors thesis in the College of Social Studies.

Richard A. Miller Summer Internship Grant • Awarded in honor of Woodhouse/Sysco Professor of Economics Richard A. Miller to students pursuing summer internships related to potential business careers.

George J. Mitchell Scholarship • Awarded annually for one year of graduate study in any discipline offered by an institution of higher learning in Ireland or Northern Ireland on the basis of superior records of academic excellence, leadership, and public service.

Monroe Prize • Established in 1985 by the Center for African American Studies in memory of John G. Monroe, director, scholar, and teacher in the Center for African American Studies and in the Theater Department. This prize is to be awarded annually to the Wesleyan sophomore or junior who, in the opinion of the review committee, submits the best scholarly essay in the field of African American studies.

Janina Montero Prize • Awarded annually to a Latino student who has promoted the health, visibility, and participation of the Latino community at Wesleyan. The individual should best exemplify personal integrity, leadership, and motivation; a strong interest in and knowledge of his or her background; and have maintained a high level of commitment to Wesleyan's academic and intellectual enterprise.

David Morgan Prize • To be awarded annually to the senior major or majors in the College of Social Studies (CSS) and/or the history department who best demonstrated the integrity and commitment to community that characterized David's 37 years of service to the CSS, his department, and to the University.

Peter Morgenstern-Clarren Social Justice Award • Awarded to a sophomore or junior with a demonstrated commitment to social justice issues.

Mosaic Award • This award recognizes the contribution(s) of a person or organization that has brought about cultural awareness and education on one or more of the following issues: race, ethnicity, culture, and/or sexual orientation.

Geraldine J. Murphy Prize • Established in memory of Geraldine J. Murphy, who was the first woman hired as a full-time instructor at Wesleyan (1957), the first woman promoted to a tenured position, and the first woman promoted to the rank of full professor. The prize is endowed by alumni of the Wesleyan Master of

Arts in Teaching program. Awarded to a student who has written an outstanding critical essay that focuses on short fiction or novels.

Needler Prize • Established by Sophie Needler, in memory of her husband, Bennett Needler. Awarded annually to one or two graduating seniors who have demonstrated excellence in Hebrew or Jewish studies.

NNK Award • Awarded for the best screenplay for an undergraduate film.

Carol B. Ohmann Memorial Prize • Awarded for excellence in feminist, gender, and sexuality studies.

Olin Fellowship • Founded in 1854 by the wife of Stephen Olin, president, 1839–41 and 1842–51. Later increased by gifts of their son, Stephen Henry Olin, Class of 1866 and acting president, 1922–23, and his wife, Emeline. Awarded in recognition of achievement in English. The fellowship supports supervised work in English outside of the Wesleyan course structure.

Outreach and Community Service Award • Awarded to the senior theater major who, through his or her work in the Theater Department, has done a significant service in the community.

Outstanding Collaboration Award • Awarded for a program that was successfully planned in the spirit of partnership and teamwork.

Parker Prize • Established in 1870 by the Reverend John Parker, trustee 1859–71. Awarded to a sophomore or junior who excels in public speaking.

Peirce Prize • Awarded in successive years for excellence in biology, chemistry, and geology.

Emily White Pendleton Scholarship • Established in 1979 by Ralph Darling Pendleton, founder of the Theater Department, in memory of his wife. Awarded annually to a dance major or to a student who is significantly involved in dance and who shows outstanding promise in the field.

Peterson Fellowship • Established in 1963 by bequest of William Harold Peterson, Class of 1907, for graduate study in biochemistry at Wesleyan.

Plukas Prize • Established in 1986 by John Plukas, Class of 1966, this prize is awarded to graduating economics seniors to be applied toward summer expenses, during which period each student will work under the supervision of a faculty advisor to convert an honors project into a publishable article.

Plukas Teaching Apprentice Award • Established in 1986 by John Plukas, Class of 1966, this prize is awarded for excellent service to the economics department as a teaching apprentice.

Gwen Livingston Pokora Prize • Established in 1993, awarded annually to the outstanding undergraduate student in music composition.

Prentice Prize • The gift of Mrs. Elizabeth Brooks Prentice in memory of Professor George Prentice to that junior or senior who excels in German. This prize is given in alternate years.

The Wallace C. Pringle Prize for Research in Chemistry • Gift of Eleanor and Wallace Pringle and their family and friends. This prize is to be awarded annually by the chemistry department to a student for excellence in research.

Sophie and Anne Reed Prize • Established in 1968 by Leon Reed and his sons, S. Chadwick '41 and Dr. Victor Reed, in memory of Mrs. Sophie Reed, for the best poem or group of poems.

Damain Garth Reeves Memorial Book Prize • Awarded to the first-year student who best embodies the personal and intellectual qualities of Damain Reeves, Class of 2000.

Rhodes Scholarship • Two years of study at Oxford University, awarded on the basis of high academic achievement, integrity of character, a spirit of unselfishness, respect for others, potential for leadership, and physical vigor.

Rice Prize • Awarded for excellence in mathematics to a senior.

Michael Rice Prize in Computer Science • Endowed in 2008 by the Fernando and Appapillai families in honor of Dr. Michael D. Rice and awarded to a senior for excellence in computer science.

Rich Prize • The gift of Isaac Rich, trustee 1849–72, in memory of his wife, and later supplemented by appropriations from the Board of Trustees. Awarded to those seniors whose orations are judged best in composition and delivery.

Robertson Prize • Awarded to a sophomore for excellence in mathematics.

Robins Memorial Prize • Established in 1969, in memory of George D. Robins (Class of 1898), by Frank D. Robins '34 and Douglas H. Robins '66, for excellence in history.

Steven J. Ross Prize • Established in 1979 as a gift of Steven J. Ross of Warner Communications. Awarded annually for the best undergraduate film, digital and/or virtual, made in the Film Studies Department.

Juan Roura-Parella Prize • Established in 1984 to be awarded annually to an undergraduate whose work represents the kind of catholic curiosity and general learning that Professor Juan Roura-Parella exemplified.

Rulewater Prize • Awarded for outstanding reflection and writing on an interdisciplinary topic in the Graduate Liberal Studies program.

Robert Schumann Distinguished Student Award • Established in 2007 by a gift from the Robert Schumann Foundation. Awarded to an outstanding student who demonstrates academic accomplishment and excellence in environmental stewardship through work at Wesleyan or the greater Middletown community.

Scott Biomedical Prize • Awarded to a member(s) of the molecular biology and biochemistry senior class who has demonstrated excellence and interest in commencing a career in academic or applied medicine.

Scott Prize • Established by Charles Scott Jr., MA, Class of 1886, and trustee 1905–22, in memory of John Bell Scott, Class of 1881, for excellence in modern languages.

Mary and John Sease Prize • Awarded for outstanding work in environmental science.

Sehlinger Prize • Established by the Class of 1965 in memory of Charles Edward Sehlinger III, who died in 1964. The award of a medical dictionary is given to a premedical student for excellence of character, community spirit, and academic achievement.

Senior Legacy Award • Awarded to a senior who has consistently demonstrated outstanding leadership throughout his or her four years in the Wesleyan community.

Frances M. Sheng Prize • Awarded for excellence in Chinese language and excellence in Japanese language.

Sherman Prize—Classical Studies • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Sherman Prize—Math • Established by David Sherman, DD, Class of 1872. Two prizes awarded annually, one for excellence in first-year mathematics and the other for excellence in classics.

Rae Shortt Prize • Established in memory of Rae M. Shortt. Awarded to a junior for excellence in mathematics.

Samuel C. Silipo Prize • Awarded annually for the most valuable player(s) of the Wesleyan orchestra.

Silverman Prize • Established by gift of Elisha Adelbert Silverman, Class of 1922, and awarded to a member of the junior or senior class for excellence in chemistry.

Skirm Prize • Established by members of the Class of 1931 in memory of their classmate, Thomas H. Skirm, this prize is awarded to a government major early in his or her senior year, to recognize the best research or writing project done during the junior year.

Social Activist Award • Awarded to the individual or student group who best exemplifies the spirit of social activism and through whose efforts constructive social change ensued.

Annie Sonnenblick Writing Award • Established by the family of the late Annie Sonnenblick, Class of 1980, in 1992 as a complement to the annual Annie Sonnenblick Lecture. The prize provides financial support for a student who wishes to undertake an independent writing project during the summer between his or her junior and senior years.

Spinney Prize • The gift of Joseph S. Spinney, trustee 1875–82 and 1888–93, for excellence in Greek. Awarded for the best original essay on some aspect of Greek or Roman civilization.

Spurrier Award • The William A. Spurrier Ethics Award, established by Dr. James Case, given to the student who demonstrates in the field of ethics: sensitivity, insight, depth, and humor. Given in memory of William Spurrier III, chaplain and Hedding Professor of Moral Science and Religion.

Student Organization of the Year • Awarded to a student organization that has excelled in sustaining leadership, an active membership, and programmatic efforts that contribute to the larger Wesleyan community.

Studio Art Program Prize • Awarded to one or more students who show particular promise for success as demonstrated through performance in classes and general contributions to the department.

Taylor Scholarship • Awarded to a history major based on outstanding academic achievement and other qualities such as fine character, good fellowship, leadership, and service to the Wesleyan community.

Thorndike Prize • Established by a gift of Elizabeth Moulton Thorndike in memory of her husband, Edward Lee Thorndike, Class of 1895, for excellence in psychology.

Tishler Teaching Award • Established by the family and friends of Dr. Max Tishler, professor emeritus of chemistry and University Professor of the Sciences, emeritus. Awarded annually in his memory to the best graduate teaching assistant in chemistry.

Elizabeth Verveer Tishler Prize—Art • Established in 1981 by a gift from Mrs. Tishler. Awarded annually for an outstanding senior exhibition in painting, drawing, printmaking, sculpture, photography, or architecture.

Elizabeth Verveer Tishler Prize—Music • Established in 1981 by a gift from Mrs. Tishler. Expanded in 1989 for excellence in piano performance. Two prizes are given annually: one for Western classical piano performance and the other for jazz piano performance.

David A. Titus Memorial Prize • Established by family, friends, and students in memory of Professor David Titus to support the summer studies of a deserving

Wesleyan junior majoring in government, East Asian studies, or the College of Social Studies.

Shu Tokita Prize • Established by friends and relatives of Shu Tokita, Class of 1984, and awarded to students of color studying literature and in area studies with a focus on literature. The recipient will be selected on the basis of his or her application essay and commitment to the study of literature.

Töölöyan Fund for the Study of Diasporas and Transnationalism • Established in 2008 by Bruce Greenwald, professor of economics at Columbia Business School, in honor of Wesleyan Professor Khachig Töölöyan. The award funds the summer research of a junior with the best proposal for a thesis on the study of diasporic or transnational issues.

Trench Prize • The gift of Miss Grace A. Smith, in memory of William James Trench, trustee 1835–67, for excellence in the Department of Religion.

Truman Scholarship • A national competition funded by the United States government that provides scholarships for graduate study to juniors who have outstanding leadership potential and intend to pursue careers in public service.

Kenneth W. Underwood Prize in Social Ethics • Awarded to the College of Social Studies (CSS) student selected to discuss a paper on the subject of social ethics delivered by a guest scholar at one of the two annual CSS banquets.

United States Teaching Assistantship in Austria • One-year assistantship for teaching English in Austria, funded by the Austrian government.

Karl Van Dyke Prize • Awarded each year to one or more students majoring in physical science or having a predominant interest in physical science and technology and who show outstanding achievement in academic work and a promise of productivity in a professional career.

Vanguard Prize • Established by black alumni in tribute to the black members of the Class of 1969, whose perseverance and pioneering leadership earned them designation as the Vanguard Class. The prize is awarded annually to a graduating senior who has achieved academic excellence and contributed significantly to maintaining Wesleyan's racial diversity.

Walkley Prize • Two prizes, the gift of Webster Rogers Walkley, Class of 1860, in memory of David Hart Walkley, Class of 1878, for excellence in psychology. Awarded to those juniors and seniors who present the best reports or work embodying original research.

Watson Fellowship • Awarded by the Thomas J. Watson Foundation, to enable college graduates of unusual promise to engage in an initial postgraduate year of independent study and travel abroad.

Weidenfeld Scholarship • The Weidenfeld Scholarship supports all tuition fees and living costs associated with graduate study at Oxford University. It fosters European networks and promotes the post-university careers of its scholars through work placements, long-term mentoring, and engagement in leadership and conferences.

Weller Prize • The gift of Mrs. LeRoy Weller, in memory of her husband, LeRoy Weller, Class of 1899, to the student having the highest academic average for the sophomore year.

Wesleyan Animal Studies Prize • Awarded for the best thesis or senior essay on a subject in animal studies.

Wesleyan Black Alumni Council Memorial Prize • Established in 1986 by the Wesleyan Black Alumni Council in memory of deceased black alumni. The prize provides a summer stipend to support a deserving student engaged in independent study or community service related to the concerns of black people.

Wesleyan Fiction Award • A gift from Norman Mailer to the Wesleyan Writing Program, this award recognizes an outstanding piece of fiction written by a Wesleyan student.

Wesleyan Global Fellowship • Funded and administered by the Fries Center for Global Studies, this pilot one-year program supports several weeks of independent exploration in one or two countries outside the U.S. The prizes go to graduating seniors whose passion, imagination, and independence led to their being selected as university-wide nominees for the Watson Fellowship.

Wesleyan Memorial Prize • The gift of undergraduates in the Class of 1943 in memory of fellow students who made the supreme sacrifice in the Second World War, to the members of the junior class outstanding in qualities of character, leadership, and scholarship.

White Fellowship—Government • Awarded for excellence in government to a graduate or an advanced undergraduate in government.

White Fellowship—History • Awarded for excellence in history.

White Prize • Established in 1942 by Horace Glenn White Jr., Class of 1933, and increased in 1943 by friends in his memory. Awarded for advanced undergraduate study in economics.

M. G. White Prize • The Marni Goldstein White Award recognizes the best Honors Thesis written in American Studies each year.

Wilde Prize • Established in 1963 by Frazer B. Wilde, LL.D., Class of 1958, awarded to a junior or senior for excellence in economics.

Winchester ENGL 201 Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best essay written in a section of ENGL 201 in the preceding calendar year.

Winchester Fellowship • Established in 1938, in memory of Professor Caleb Thomas Winchester, by his widow. Awarded to Wesleyan graduates for postgraduate work in English.

Winchester First-Year Essay Prize • In honor of Caleb Thomas Winchester, this prize is awarded to the best scholarly essay written by a first-year student in any English department course in the preceding calendar year.

Wise Prize • The gift of Daniel Wise, DD, Class of 1859, for excellence in the philosophy department; for the best essay on moral science or on some subject in the field or values.

Assistant Professor, Medieval Studies; Assistant Professor of Music; Assistant Professor, Russian, East European, and Eurasian Studies

Anthony P. Davis

BS, U.S. Coast Guard Academy; MS, Ohio State University; PHD, Wesleyan University
Professor of the Practice in Chemistry; Professor of the Practice, CPE; Professor of the Practice, Integrative Sciences

Lucy De Souza

BA, Wesleyan University; MA, Wesleyan University; MA, University British Columbia
Assistant Professor of Psychology

Anita Deeg-Carlin

Visiting Instructor of Global Studies

Liana DeMarco

MA, Yale University; PHD, Yale University
Mellon Postdoctoral Fellow in African American Studies

Jason Di Resta

Art History Visual Arts Librarian; Art History Visual Arts Librarian, Art History

Carolina Diaz

BA, Universidad Catolica de Chile; MA, Rutgers University; PHD, Rutgers University
Assistant Professor of Spanish; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, Latin American Studies

Daniel A DiCenzo

BA, Williams College
Adjunct Professor of Physical Education; Head Coach of Football

Lisa C. Dierker

BA, Ohio State University; MA, University of Connecticut; PHD, University of Connecticut
Professor, Education Studies; Professor of Psychology; Walter Crowell University Professor of Social Sciences; Chair, Psychology

Lindsay R Dolan

BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Government

Lisa A. Dombrowski

BA, Wesleyan University; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Professor of East Asian Studies; Professor, Film Studies

Royette Dubar

MS, Brock University; PHD, Brock University
Assistant Professor of Psychology

Zora Duncan

Visiting Assistant Professor of Feminist, Gender, and Sexuality Studies

Cem Duruoz

Guitar Instructor

E

Sierra Eckert

BA, Swarthmore College; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of English

Craig Edwards

Traditional Fiddle Styles Instructor

Gabriel Eggers

BA, Princeton University; PHD, Georgia Tech
Visiting Assistant Professor of Earth Environmental Sciences

Marc A. Eisner

BA, University of Wisconsin at Madison; MA, Marquette University; MBA, University of Connecticut; PHD, University of Wisconsin at Madison
Professor, Environmental Studies; Tutor, College of Social Studies; Professor of Government; Henry Merritt Wriston Chair in Public Policy

Douglas Elkins

BFA, SUNY Purchase; MFA, Hollins College
Associate Professor of the Practice in Dance

Benjamin Ross Elling

BA, Cornell University; PHD, Stanford University
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences

Perry Elliot

Violin Instructor

Ren Ellis Neyra

BA, Freed Hardeman College; PHD, SUNY at Stony Brook
Coordinator, Social, Cultural, and Critical Theory; Associate Professor, African American Studies; Associate Professor of English

Merve Gul Emre

BA, Harvard University; MA, Yale University; PHD, Yale University
Shapiro-Silverberg University Professor of Creative Writing; Director, Shapiro Writing Center

Paul Erickson

BA, Harvard University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Associate Professor, Environmental Studies; Associate Professor, Science in Society; Associate Professor of History

Kaisha Esty

BA, University of Nottingham; MA, University of Nottingham; PHD, Rutgers University
Assistant Professor of African American Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, History

Demetrius L. Eudell

BA, Dartmouth College; PHD, Stanford University
Professor of History; Coordinator, Mellon Humanities

F

Clarissa F. Cavarsan Muller

BA, Universidade Federal De Sao Paulo; PHD, Universidade Federal De Sao Paulo
Visiting Assistant Professor of Neuroscience and Behavior; Continuing Studies Instructor, Wesleyan; Visiting Assistant Professor, Continuing Studies

Chlo   Samala Faux

Provost's Postdoctoral Equity Fellow of Anthropology

Hafiz FazaleHaq

MA, University Of New Mexico; PHD, University Of New Mexico
Assistant Professor of the Practice in South Asian Language; Assistant Professor of the Practice, Global South Asian Studies

Ni Ye Feng

BS, University of California, Los Angeles; PHD, Cornell University
Assistant Professor of Biology; Assistant Professor, Neuroscience and Behavior

Oriana Fisher

BS, Brandeis University; MS, Brandeis University; PHD, Yale University
Assistant Professor of Molecular Biology and Biochemistry

Joseph J. Fitzpatrick

BA, Harvard University; PHD, Duke University
Associate Professor of the Practice in Letters; Associate Professor of the Practice, Russian, East European, and Eurasian Studies

Octavio Flores-Cuadra

BA, Universidad Americas; MA, Universidad Americas; PHD, University of Pittsburgh
Adjunct Professor of Spanish

Joseph Fonseca

92' Theater Manager; Visiting Instructor of Theater

Douglas Foyle

AB, Stanford University; MA, Duke University; PHD, Duke University
Associate Professor of Government

Erika Franklin Fowler

BA, St Olaf College; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Professor of Government; Director, Wesleyan Media Project

Michael A Fried

BA, Brown University
Adjunct Professor of Physical Education; Head Coach of Tennis (Men's Women's)

Harris Friedberg

BA, Harvard University; PHD, Yale University
Associate Professor of English

Richard John Friswell

Co-Director, Wasch Center Seminars; Visiting Scholar

Courtney Fullilove

BA, Columbia University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Associate Professor of History; Associate Professor, Environmental Studies; Associate Professor, Science in Society

Susanne Grace Fusso

BA, Lawrence University; MA, Yale University; PHD, Yale University
 Professor of Russian, East European, and Eurasian Studies; Chair, Russian, East European, and Eurasian Studies; Marcus L. Taft Professor of Modern Languages

G

Leslie Gabel-Brett

BA, Wesleyan University; PHD, City College
 Distinguished Visiting Professor of Public Policy

Priscilla Gale

Voice Instructor

Giulio Gallarotti

BA, Hunter College; PHD, Columbia University
 Professor of Government; Professor, Environmental Studies

Elaine Gan

BA, Wellesley College; MFA, University of California, Santa Cruz; PHD, University of California, Santa Cruz
 Assistant Professor of Science and Technology Studies; Assistant Professor of Science in Society; Assistant Professor, Feminist, Gender, and Sexuality Studies

Daniella Gandolfo

BA, Pontificia Universidad Catolica del Peru; MA, University of Texas Austin; PHD, Columbia University
 Associate Professor of Anthropology; Co-Coordinator, Urban Studies; Chair, Anthropology; Associate Professor, Latin American Studies

Noel R Garrett

Visiting Assistant Professor, Liberal Studies; Continuing Studies Instructor, Non-Wesleyan

Matthew Carl Garrett

BA, Bard College; MA, Stanford University; MPHIL, Cambridge University; PHD, Stanford University
 Associate Professor, American Studies; Associate Professor of English

Courtney Gaston

BA, Centenary College La; MFA, University of Iowa
 Assistant Professor of Theater; Assistant Professor, Design and Engineering Studies

Giacomo Gates

Jazz Vocal Instructor

Martha S. Gilmore

BA, Franklin & Marshall College; MSC, Brown University; PHD, Brown University
 Dean of the Natural Sciences and Mathematics; Co-Coordinator, Planetary Science; Professor of Earth and Environmental Sciences; Joshua Boger University Professor of the Sciences and Mathematics

Megan H. Glick

BA, Northwestern University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
 Coordinator, Disability Studies; Associate Professor of American Studies; Chair, American Studies; Associate Professor, Science in Society; Associate Professor, Feminist, Gender, and Sexuality Studies

Jeffrey Goetz

Associate Director, Continuing Studies; Staff Instructor

Greg Goldberg

BA, New York University; PHD, CUNY The Graduate Center

Associate Professor of Sociology

Wei Gong

BA, Beijing Language and Culture U; MA, The University of Hong Kong
 Associate Professor of the Practice in East Asian Studies

Natalia Gonzalez-Pech

PHD, Rice University
 Assistant Professor of Chemistry

Maryam Gooyabadi

BA, Baruch College; BS, University of Colorado Boulder; MA, University of California, Irvine
 Assistant Professor of the Practice in Quantitative Analysis

Martin Gosman

BBA, University of Wisconsin at Madison; MBA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
 Visiting Scholar in Economics

Peter S. Gottschalk

BA, College of the Holy Cross; MA, University of Wisconsin at Madison; PHD, University of Chicago
 Professor of Religion; Academic Secretary; Professor, Education Studies; Professor, Science in Society; Professor, Global South Asian Studies; Professor, History

Claire Grace

BA, Brown University; MA, Middlebury College; PHD, Harvard University
 Associate Professor of Art History; Associate Professor, American Studies; Program Director, Art History

Roger Mathew Grant

BM, Ithaca College; PHD, University of Pennsylvania
 Dean of the Arts and Humanities; Professor of Music

Laura Grappo

BA, Wesleyan University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
 Associate Professor of American Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Nathanael Greene

BA, Brown University; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University
 Professor of History

James Greenwood

BS, SUNY at Binghamton; MS, Brown University; PHD, Brown University
 Associate Professor of Earth and Environmental Sciences

Amy Grillo

AB, Brown University; EDD, Harvard University; EDM, Harvard University
 Associate Professor of the Practice in the Allbritton Center for the Study of Public Life; Associate Professor of the Practice, Environmental Studies

Erik Grimmer-Solem

BA, Brigham Young University; DPHIL, Oxford University; MPHIL, Cambridge University; MSC, London School of Economics and Political Science
 Professor of History; Tutor, College of Social Studies; Ezra and Cecile Zilkha Professor in the College of Social Studies; Professor, German Studies

Richard S. Grossman

AB, Harvard University; MA, Harvard University; MSC, London School of Economics and Political Science; PHD, Harvard University

Tutor, College of Social Studies; Professor of Economics; Andrews Professor of Economics

Lori Gruen

BA, University of Colorado Boulder; PHD, University of Colorado Boulder
Coordinator, Animal Studies; Professor, CPE; Professor, Science in Society;
Professor, Feminist, Gender, and Sexuality Studies; Professor of Philosophy;
William Griffin Professor of Philosophy

Matthew Guberman-Pfeffer

PHD, University of Connecticut
Visiting Scholar in Chemistry

H

Benjamin Haber

BA, New College of Florida; MPHIL, CUNY The Graduate Center; PHD, CUNY The Graduate Center
Assistant Professor of Sociology

Mary Alice Haddad

BA, Amherst College; MA, University of Washington; PHD, University of Washington
Professor of Government; Professor, Environmental Studies; Professor, East Asian Studies; John E. Andrus Professor of Government; Chair, Government

Nina Hagel

BA, Johns Hopkins University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Tutor, College of Social Studies; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor of Government

Gebremedhin Gebremeskel Haile

PHD, Chinese Academy of Scienc
Visiting Assistant Professor of Earth Environmental Sciences

Hrissi Haldezos

Associate Director of Student Accounts and Loan Services; Adjunct Instructor in Modern Greek

Carolyn F. Halsted

Piano Instructor

Geoffrey Hammerson

Continuing Studies Instructor, Non-Wesleyan; Visiting Scholar in the College of the Environment

Kolby Hanson

BA, Stanford University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Assistant Professor of Government; Assistant Professor, Global South Asian Studies

I. Harjito

MA, Akademi Seni Karavitan
University Professor of Music

Ilana Yacine Harris-Babou

BA, Yale University; MFA, Columbia University
Assistant Professor of Art

Miyuki Hatano-Cohen

BA, Tohoku Gakuin University

Assistant Professor of the Practice in East Asian Studies

Anthony Ryan Hatch

AB, Dartmouth College; MA, University of Maryland College Park; PHD, University of Maryland College Park
Professor of Science and Technology Studies; Professor, African American Studies; Professor, Environmental Studies; Professor of Science in Society; Chair, Science in Society; Professor, Sociology

Rachel Heng

BA, Columbia University; MFA, University of Texas Austin
Assistant Professor of English

Elizabeth (Beth) Hepford

BA, University Of Kansas; MA, Arizona State University; PHD, Temple University
Associate Professor of the Practice, Education Studies; Associate Professor of the Practice, English; Associate Professor of the Practice in TESOL

Tony Hernandez

Visiting Instructor of Theater

Daniel Hernandez

BA, Institution Pontificia Universidad Javeriana; PHD, Stanford University
Visiting Assistant Professor of Spanish

Gordana Herning

PHD, Princeton University
Visiting Assistant Professor of Design Engineering Studies

April Hickman

AA, Casper College; MFA, Yale University
Assistant Professor of the Practice in Theater

Scott Higgins

BA, Oakland University; MA, Univ of Wisconsin Madison; PHD, Univ of Wisconsin Madison
Professor of Film Studies; Chair, Film Studies; Charles W. Fries Professor of Film Studies; Curator of the Wesleyan Cinema Archives; Director, College of Film and the Moving Image

Cameron Hill

BA, Yale University; PHD, University of California, Berkeley
Associate Professor of Mathematics; Associate Professor, Integrative Sciences

Manju Hingorani

BS, University of Bombay; PHD, Ohio State University
Distinguished Research Professor in Molecular Biology Bioc; Distinguished Research Professor in Molecular Biology Biochemistry

Christiaan Hogendorn

BA, Swarthmore College; PHD, University of Pennsylvania
Professor of Economics; Chair, Economics

Jay Clinton Hoggard

BA, Wesleyan University; MA, Wesleyan University
Professor of Music; Professor, African American Studies

Scott G. Holmes

BS, College of William and Mary; PHD, University of Virginia
Professor, Integrative Sciences; Professor of Molecular Biology and Biochemistry; Chair, Molecular Biology and Biochemistry

Abigail S. Hornstein

AB, Bryn Mawr College; MPHIL, New York University; PHD, New York University
Professor of Economics; Woodhouse/Sysco Professor of Economics

Steven W. Horst

BA, Boston University; PHD, University of Notre Dame
Coordinator, Christianity Studies; Professor, Science in Society; Professor of Philosophy

Mark A. Hovey

BS, Ohio State University; PHD, Massachusetts Institute of Technology
Associate Provost; Professor, Integrative Sciences; Professor of Mathematics;
Associate Provost for Budget and Personnel

Robert Hoyle

French Horn Instructor

Yu-ting Huang

BA, National Taiwan University; MA, National Taiwan University; PHD, University of California, Los Angeles
Assistant Professor of East Asian Studies

Elijah Huge

BA, Yale University; MAR, Yale University
Associate Professor of Art; Associate Professor, Environmental Studies; Associate Professor, Design and Engineering Studies; Director, College of Design and Engineering Studies

Meredith Hughes

BS, Yale University; PHD, Harvard University
Associate Professor of Astronomy; Chair, Astronomy Department; Associate Professor, Integrative Sciences

Lutz Hüwel

PHD, University of Gottingen
Professor of Physics

Masami Imai

BA, U. of Wisconsin Eau Claire; PHD, University Calif Davis
Professor of Economics; Professor, East Asian Studies; Director, Fries Center for Global Studies

Tushar Irani

BA, Colgate University; PHD, Northwestern University
Professor, Education Studies; Professor of Letters; Faculty Director, Mellon Mays Undergraduate Fellowship; Professor of Philosophy

Ryuichiro Izumi

BA, Keio University; PHD, Rutgers University
Assistant Professor of Economics

Anuja Jain

BA, University of Delhi; MA, University of Delhi; PHD, New York University
Assistant Professor of Film Studies; Assistant Professor, Global South Asian Studies

Sunny Jain

BM, Rutgers University; MA, New York University
Visiting Scholar in the Center for the Arts

Hadel Jarada

BA, University of California, Berkeley; PHD, Harvard University

Assistant Professor of Letters; Assistant Professor, Medieval Studies

Ronald S. Jenkins

BA, Haverford College; EDD, Harvard University
Professor of Theater

Carlos Alberto Jimenez Hoyos

MA, Rice University; PHD, Rice University
Assistant Professor of Chemistry

Khalil Anthony Johnson

BA, University of Georgia Athens; MPIL, Yale University; PHD, Yale University
Assistant Professor of African American Studies; Assistant Professor, Education Studies

Ruth Johnson

BS, University of Witwatersrand; PHD, Cambridge University
Associate Professor of Biology; Associate Professor, Integrative Sciences; Science Facilities Liaison

William D. Johnston

BA, Elmira College; MA, Harvard University; PHD, Harvard University
Professor, Environmental Studies; Professor, East Asian Studies; Professor, Science and Technology Studies; Professor of History; John E. Andrus Professor of History

Darius Aston Jones

BM, Virginia Commonwealth University; MA, New York University
Assistant Professor of Music

Barbara Jean Juhasz

BA, Binghamton University; MA, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Professor of Psychology; Coordinator, Civic Engagement; Professor, Education Studies; Professor, Integrative Sciences; Professor, Neuroscience and Behavior; Jeffrey L. Shames Professor of Civic Engagement

K**Robert Ira Kabacoff**

BA, University of Connecticut; PHD, University of Missouri, St. Louis
Professor of the Practice in Quantitative Analysis

Emmanuel Kaparakis

Director of Centers for Advanced Computing; Adjunct Assistant Professor of Quantitative Analysis; Director, Center of Quantitative Analysis

Natasha Karageorgos

MA, Tomsk State University; PHD, CUNY The Graduate Center
Assistant Professor of the Practice in Russian, East European, and Eurasian Studies

Indira Karamcheti

BA, University Calif Santa Bar; MA, University Calif Santa Bar; PHD, University Calif Santa Bar
Coordinator, Caribbean Studies; Associate Professor, Education Studies; Associate Professor of Global South Asian Studies; Co-Chair, Global South Asian Studies

Hasan Karatas

BA, Bogazici University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Visiting Assistant Professor of History

Dalit Katz

BA, Hebrew University; MA, Hebrew University
University Professor of Jewish Studies; Director, Center for Jewish Studies;
University Professor, Fries Center for Global Studies

Kerwin Kaye

BA, University of Colorado Boulder; MA, University San Francisco; PHD, New York University
Associate Professor of Feminist, Gender, and Sexuality Studies; Associate Professor, American Studies; Tutor, College of Social Studies; Chair, Feminist, Gender, and Sexuality Studies

Anthony Bruno Keats

BA, Macalester College; MA, Tufts University; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Associate Professor of Economics

Alex Keegan

BA, Brown University; MFA, Yale University
Visiting Assistant Professor of Theater

Camille Keeler

Manager of Scientific Facilities and Instrumentation; Research Affiliate in Chemistry

Christine Kemp

BA, Skidmore College; MA, Bridgewater State College
Adjunct Associate Professor of Physical Education; Head Coach of Field Hockey

Shona Kerr

BMU, Cardiff University
Adjunct Professor of Physical Education; Head Coach of Squash (Men's Women's)

Melanie Khamis

BS, London School of Economics and Political Science; MS, University of Warwick; PHD, London School of Economics and Political Science
Professor of Economics; Professor, Latin American Studies; Chair, Latin American Studies

Yu Nong Khew

MAR, Southern California Institute of Architecture
Assistant Professor of Art; Assistant Professor, Design and Engineering Studies

Roy Kilgard

BA, Valdosta St University; PHD, University of Leicester
Associate Professor of the Practice in Astronomy; Associate Professor of the Practice, Integrative Sciences

Kyungmi Kim

MA, Yonsei University; MPHIL, Yale University; MS, Yale University; PHD, Yale University
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Ethan Kleinberg

BA, University of California, Berkeley; MA, University of California, Los Angeles; PHD, University of California, Los Angeles
Professor of History; Executive Editor, History and Theory; Editor-in-Chief, History and Theory; Professor of Letters; Class of 1958 Distinguished Professor

Carrie L. Koffman

Saxophone Instructor

Katja Kolcio

MA, University of Georgia Athens; MA, Ohio State University; PHD, Ohio State University

Associate Professor of Dance; Associate Professor, Environmental Studies; Associate Professor, Education Studies; Chair, Dance; Associate Professor, Russian, East European, and Eurasian Studies

Alexander Samuel Kollias

BM, Grand Valley St University; DMA, University of Hartford; MM, University of Hartford
Clarinet Instructor

Natasha Korda

BA, Columbia University; PHD, Johns Hopkins University
Director, Center for the Humanities; Professor of English; Professor, Feminist, Gender, and Sexuality Studies

Tsampikos Kottos

BA, University of Crete; MS, University of Crete; PHD, University of Crete
Professor of Physics; Professor, Integrative Sciences; Professor, Mathematics; Lauren B. Dachs Professor of Science and Society

Erica Kowsz

Assistant Staff Professor

Hari Krishnan

BA, University of Manitoba; MFA, York University; PHD, Texas Womans University
Professor of Dance; Professor, Feminist, Gender, and Sexuality Studies; Professor, Global South Asian Studies

Daniel Krizanc

BS, University of Toronto; PHD, Harvard University
Professor of Computer Science; Co-Coordinator, Informatics and Modeling; Professor, Environmental Studies; Professor, Integrative Sciences; Edward Burr Van Vleck Professor of Computer Science

Alex Kruckman

PHD, University of California, Berkeley; SB, Brown University
Assistant Professor of Mathematics

Timothy Ku

BS, University of Rochester; MS, University of Michigan; PHD, University of Michigan
Associate Professor of Earth and Environmental Sciences; Associate Professor, Integrative Sciences

David Kuenzel

DIP, University of Tübingen; MA, University of Washington; PHD, University of Washington
Associate Professor of Economics

Katherine M. Kuenzli

BA, Yale University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Art History; Chair, Art and Art History; Professor, German Studies

Ronald J. Kuivila

BA, Wesleyan University; MFA, Mills College
Professor of Music; Chair, Music; Director, Electronic Music and Recording Studios

Matthew Kurtz

BA, Reed College; MA, Princeton University; PHD, Princeton University
Professor of Psychology; Professor, Neuroscience and Behavior

Basak Kus

BA, Bogazici University; MA, SUNY at Stony Brook; PHD, University of California, Berkeley
Associate Professor of Government

L**Jennifer Lane**

BA, Amherst College; MS, Smith College
Adjunct Professor of Physical Education; Head Coach of Softball

Robert P. Lane

BA, Colgate University; PHD, California Institute Tech
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences

Salvatore LaRusso

BMU, Eastman School Of Music; MS, Fairfield University
Director, Wesleyan Wind Ensemble

Constance Leidy

BS, Tulane University; PHD, Rice University
Associate Professor of Mathematics

Jeffers Lennox

BA, University of Toronto; MA, Dalhousie University; PHD, Dalhousie University
Professor of History

Typhaine Leservot

BA, University of Caen; MA, University of North Carolina at Chapel Hill; PHD, University of North Carolina at Chapel Hill
Associate Professor of French; Associate Professor, Letters

Han Li

BS, Nankai University; PHD, Yale University
Associate Professor of Mathematics

Chongyi Liang

BA, Peking University; MA, Peking University
Visiting Instructor of Chinese

Dan Licata

BS, Brown University; PHD, Carnegie Mellon University
Associate Professor of Computer Science; Vice-Chair, Mathematics and Computer Science

James Lipton

BS, U Nebraska Lincoln; MSC, Cornell University; PHD, Cornell University
Professor of Computer Science; Professor, Integrative Sciences

Ewelina Dorota Liszczyk

BA, University of Wroclaw
Visiting Scholar in Molecular Biology and Biochemistry

Mengjun Liu

BA, Beijing Normal University; MA, Nanjing Normal University
Associate Professor of the Practice in Chinese; Associate Professor of the Practice in East Asian Studies

Tony Lombardozi

Jazz/Blues Guitar Instructor

Marc Robert Longenecker

BA, Wesleyan University; MA, Wesleyan University

Associate Professor of the Practice in Film Studies

Valeria Lopez Fadul

BA, Yale University; MA, Princeton University; PHD, Princeton University
Assistant Professor of History; Assistant Professor, Latin American Studies

Rachel Lowe

Visiting Scholar in Chemistry

Chia-Yu Joy Lu

BFA, National Taiwan Normal University; MA, University of Sheffield; PHD, Wesleyan University
Director, Chinese Music Ensemble

Joshua Daniel Lubin-Levy

BA, Wesleyan University; MA, New York University
Director, Center for the Arts; Visiting Assistant Professor of Dance

M**Antonio J. Machado Allison**

MS, Central University of Venezuela; PHD, George Washington University
University Professor in the College of the Environment

Randall M. MacLowry

BA, Wesleyan University
University Professor of Film Studies and Co-Director of the; University Professor of Film Studies and Co-Director of WesDocs

Amy MacQueen

BA, Columbia University; PHD, Stanford University
Associate Professor of Molecular Biology and Biochemistry; Associate Professor, Integrative Sciences

Victoria Ursula Manfredi

BA, Smith College; MS, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Associate Professor, Integrative Sciences; Associate Professor of Computer Science

Tommaso Manfredini

BA, Universita Ca' Foscari; MA, Universite Paris 7; MPHIL, Columbia University; PHD, Columbia University
Frank B. Weeks Visiting Assistant Professor of French

Alyx Mark

BA, Southern Illinois Univer; MA, George Washington University; PHD, George Washington University
Associate Professor of Government

Douglas Arthur Martin

BA, University of Georgia Athens; MFA, The New School; PHD, CUNY The Graduate Center
Associate Professor of English; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Director, Creative Writing

Anne Martin

Chief Investment Officer; Adjunct Professor of Public Life

Caitlin Ann Martin-Wagar

Visiting Scholar in Psychology

Naho Maruta

MA, University of Wisconsin at Madison

Associate Professor of the Practice in East Asian Studies; Associate Professor of the Practice, Fries Center for Global Studies

Ioana Emy Matesan

MA, Arizona State University; PHD, Syracuse University
Associate Professor of Government; Tutor, College of Social Studies

Paula Matthusen

BM, University of Wisconsin at Madison; MA, New York University; PHD, New York University
Professor of Music; Director of Graduate Studies

Alexis May

BA, Wesleyan University; MA, University British Columbia; PHD, University British Columbia
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

Leo Mayo

BS, Central Connecticut State University; MED, American Intl College
Adjunct Associate Professor of Physical Education; Head Coach of Cross Country

Robin Mazzola

BFA, Paier College Of Art
Adjunct Assistant Professor of Theater; Costume Shop Manager

Elizabeth McAlister

BA, Vassar College; MA, Yale University; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Professor of Religion; Director of Academic Writing; Professor, African American Studies; Professor, American Studies; Professor, Feminisit, Gender, and Sexuality Studies

Sean McCann

BA, Georgetown University; PHD, CUNY The Graduate Center
Professor of English; Kenan Professor of the Humanities

James W. McGuire

BA, Swarthmore College; MA, University of California, Berkeley; PHD, University of California, Berkeley
Professor of Government; John E. Andrus Professor of Government; Professor, Latin American Studies

Jodi McKenna

BA, Brown University; MED, St. Lawrence University
Adjunct Professor of Physical Education; Head Coach of Women's Ice Hockey

Grace McKenzie-Smith

BA, Bowdoin College; PHD, Princeton University
Assistant Professor of Physics

Rashida Z. Shaw McMahon

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Associate Professor, African American Studies; Associate Professor of English; Associate Professor, Theater

Chelsie McPhlimy

BA, University of Wisconsin at Madison; MFA, Ohio State University
Assistant Professor of the Practice in Dance

Michael Meere

BA, Northwestern University; MA, University of Virginia; MA, Universite Lumiere Lyon 2; MA, Universite of Paris - Sorbonne; PHD, University of Virginia
Associate Professor, Medieval Studies; Associate Professor of French

Laverne Melon

BA, Middlebury College; MS, SUNY at Binghamton University; PHD, Purdue University W Lafayette

Assistant Professor of Biology; Assistant Professor, Integrative Sciences; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor, Neuroscience and Behavior

Maaza Mengiste

BA, University of Michigan; MFA, New York University
Professor of English; Director of Creative Writing

Eva Meredith

BA, Franklin Pierce College
Adjunct Professor of Physical Education; Head Coach of Women's Soccer

Giovanni Miglianti

BA, University of Udine; MPHIL, University of Cambridge; MPHIL, Yale University; PHD, Yale University
Visiting Assistant Professor of Italian

Cecilia Miller

BA, LeTourneau College; DPHIL, Oxford University; MPHIL, University of St Andrews
Professor of History; Tutor, College of Social Studies; Professor, Medieval Studies

Kathleen (Kate) E Miller

BA, Tufts University; MA, Yale University; PHD, Wesleyan University
Visiting Assistant Professor of Environmental Studies

Jennifer Mitchel

PHD, Brown University; SB, Massachusetts Institute of Technology
Assistant Professor of Biology; Assistant Professor, Integrative Sciences

Daniel Moller

MS, Louisiana Technical University; PHD, Louisiana Technical University
Associate Professor of the Practice in Design and Engineering

Marichal B Monts

BA, Wesleyan University
Conductor, Ebony Singers

Steven Moore

BA, University of South Carolina; PHD, University of Michigan
Assistant Professor of Government

Edward C. Moran

BS, Pennsylvania State University; MA, Columbia University; MPHIL, Columbia University; PHD, Columbia University
Professor of Astronomy; Director of Graduate Studies; Co-Coordinator, Planetary Science; Director, Graduate Studies; Director, Van Vleck Observatory; John Monroe Van Vleck Professor of Astronomy; Professor, Integrative Sciences

Jill G. Morawski

BA, Mount Holyoke College; MA, Carleton University; MAA, Wesleyan University; PHD, Carleton University
Professor of Psychology; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Willbur Fisk Osborne Professor of Natural Science

Melisa Moreno Garcia

Visiting Scholar in Chemistry

Ishita Mukerji

AB, Bryn Mawr College; PHD, University of California, Berkeley
Professor of Molecular Biology and Biochemistry; Co-coordinator, Molecular Biophysics; Coordinator, Health Studies; Professor, Environmental Studies; Professor, Integrative Sciences; Fisk Professor of Natural Science

Kate Mullen

BS, Central Connecticut State University; MA, Springfield College Ma; MED, Springfield College Ma
Adjunct Professor of Physical Education; Senior Woman Administrator; Head Coach of Women's Basketball

Michelle Aaron Murolo

BS, Clarion University of Pennsylvania; PHD, Yale University
Professor of the Practice in Biology

Wendi Field Murray

BS, Bridgewater State College; MA, University of Arizona; PHD, University of Arizona
Adjunct Assistant Professor, Archaeology; Adjunct Assistant Professor of East Asian Studies; Archaeology Collections Manager

N**Christian Hart Nakarado**

BA, Yale University; MAR, Yale University
Assistant Professor of Art; Assistant Professor, Design and Engineering Studies

Jesse Nasta

BA, Wesleyan University; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of the Practice in African American Studies

Valerie Nazzaro

BA, University of Connecticut; MA, University of Connecticut; MS, University of Connecticut; PHD, University of Connecticut
Professor of the Practice in Quantitative Analysis; Professor of the Practice in Quantitative Analysis

Louise Neary

BA, Boston College; MA, Boston College; PHD, University of Illinois Urbana
Adjunct Professor of Spanish; Adjunct Professor, Education Studies; Co-Chair, College of Education Studies; Section Head

Andrea Negrete

BA, University of Washington; MED, University of Washington; PHD, University of Virginia
Assistant Professor of Psychology; Assistant Professor, Integrative Sciences

David Paul Nelson

BA, Kalamazoo College; MFA, California Institute of Arts; PHD, Wesleyan University
Adjunct Associate Professor of Music; Adjunct Associate Professor, Global South Asian Studies

Ellen Nerenberg

AB, Stanford University; PHD, University of Chicago
Professor of Italian; Hollis Professor of Romance Languages and Literatures

Aleksandra Katarzyna Newland

BA, Grazyna and Kiejstut Bacewicz University of Music; MA, Grazyna and Kiejstut Bacewicz University of Music
Flute Instructor

Tammy Vo Nguyen

BFA, The Cooper Union; MFA, Yale University
Assistant Professor of Art

Thanh Nguyen

BA, University of Houston; DBA, Case Western Reserve Univ; LLM, University of Pennsylvania; MA, Yale Divinity School; MA, Brown University; MBA, Northwestern University; MPA, Columbia University
Visiting Assistant Professor of Public Policy

Marguerite Nguyen

BA, Duke University; PHD, University of California, Berkeley
Associate Professor of English; Associate Professor, Environmental Studies; Associate Professor, East Asian Studies

Ruth Nisse

BA, Columbia University; PHD, University of California, Berkeley
Professor of English; Professor, Medieval Studies

Brian Hale Northrop

BA, Middlebury College; PHD, University of California, Los Angeles
Professor of Chemistry; Chair, Chemistry; E. B. Nye Professor of Chemistry; Professor, Integrative Sciences

Okechukwu Nwafor

BA, University of Nigeria; MFA, Nnamdi Azikiwe University; PHD, University of Western Cape
Assistant Professor of Art History

Nkiruka Jane Nwafor

BA, University of Nigeria; MA, University of Ibadan; PHD, University of Nigeria
Visiting Scholar in Art History

O**Alison O'Neil**

BS, Binghamton University; PHD, Montana State University
Assistant Professor of Chemistry; Assistant Professor, Biology; Assistant Professor, Integrative Sciences; Assistant Professor, Neuroscience and Behavior

Kristin Oberiano

BA, Occidental College; MA, Harvard University; PHD, Harvard University
Assistant Professor of History

Suzanne OConnell

BA, Oberlin College; MS, SUNY at Albany; PHD, Columbia University
Professor, Integrative Sciences; Professor of Earth and Environmental Sciences; Chair, Earth and Environmental Sciences; Harold T. Stearns Professor of Earth Science

Jesse Moses Ofgang

BA, Western Connecticut State Univ; MA, Royal Conservatoire of Scotland
Bagpipes Instructor

Pavel V Oleinikov

Associate Professor of the Practice in Quantitative Analysis

Donald B. Oliver

BS, Brandeis University; MAA, Wesleyan University; PHD, Tufts University
Professor of Molecular Biology and Biochemistry; Professor, Integrative Sciences; Daniel Ayres Professor of Biology

Maria-Christina Oliveras

BA, Yale University; MFA, National Theatre Conservatory
Assistant Professor of Theater

Rich Olson

BA, Cornell University; PHD, Columbia University

Associate Professor, Integrative Sciences; Associate Professor of Molecular Biology and Biochemistry

Allison Diane Orr

BA, Wake Forest University; MFA, Mills College
Research Fellow of the College of the Environment

Maria Ospina

BA, Brown University; MA, Harvard University; PHD, Harvard University
Professor of Spanish; Professor, Latin American Studies; Chair, Romance Languages and Literatures

Rosemary Elizabeth Ostfeld

BA, Wesleyan University; MA, Wesleyan University; MPHIL, University of Cambridge; PHD, University of Cambridge
Assistant Professor of the Practice in Environmental Studies

Eiko Otake

BA, SUNY Empire State College
Visiting Artist-in-Residence

Marcela Oteiza

BFA, University of Chile; MFA, California Institute of Arts
Associate Professor of Dance; Associate Professor, College of the Environment;
Associate Professor, Design and Engineering Studies; Associate Professor, Latin American Studies; Associate Professor, Theater; Chair, Theater

P

Tom Packet

MA, Vrije Universiteit Brussel
Visiting Scholar in Art History

Teresita Padilla-Benavides

BS, Escuela Nacional de Ciencias B; MS, Centro de Investigacion y Estu; PHD, Centro de Investigacion y Estu
Assistant Professor, Integrative Sciences; Assistant Professor of Molecular Biology Biochemistry

George Mathew Paily

MSC, Indian Institute of Technology; PHD, Pennsylvania State University
Associate Professor of the Practice in Physics

Tyrone S. Palmer

BA, Brooklyn College; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of English

Emmanuel Paris-Bouvret

Director, Language Resources and Technology; Coordinator, Less Commonly Taught Languages; Adjunct Instructor in Romance Languages and Literatures

Paula Park

BA, Rutgers, the State University; MA, University of Texas Austin; PHD, University of Texas Austin
Associate Professor, Latin American Studies; Associate Professor of Spanish

Jahyon Park

PHD, Cornell University
Visiting Assistant Professor of Korean

Richard Parkin

BA, University of California, Berkeley; MFA, University of California, Los Angeles

Associate Professor of the Practice in Film Studies

Christopher Parslow

BA, Grinnell College; MA, University of Iowa; PHD, Duke University
Professor of Classical Studies; Professor, Archaeology; Professor, Art History;
Robert Rich Professor of Latin; Chair, Classical Studies

Pedro Pascual

Assistant Professor of the Practice in American Sign Language

Andrea Patalano

BA, Brown University; MA, University of Michigan; PHD, University of Michigan
Professor of Psychology; Professor, Neuroscience and Behavior

Rehana Patel

BA, Cambridge University; MA, Cambridge University; MS, University South Carolina; PHD, Wesleyan University
Visiting Associate Professor of Mathematics

Courtney Patterson-Faye

BA, University of Pennsylvania; MA, Northwestern University; PHD, Northwestern University
Assistant Professor of Sociology

Mary Paul

BFA, University of Connecticut; MALS, Wesleyan University
Assistant Professor of the Practice in Theater

Katie Pearl

BA, University of Washington; MFA, Brown University
Assistant Professor of Theater

Justin Craig Peck

BA, Brandeis University; MA, University of Virginia; PHD, University of Virginia
Assistant Professor of Government

Michael Perez

BA, University Texas Arlington; PHD, Texas A&M University
Assistant Professor, Integrative Sciences; Assistant Professor of Psychology

Ana Perez-Girones

BA, University of Seville; MA, Cornell University
Adjunct Professor of Spanish; Adjunct Professor, Education Studies

Joel Pfister

BA, Columbia University; MA, University of Sussex; MA, University College, University of London; PHD, Yale University
Professor of English; Professor of American Studies; Olin Professor of English

Earl W. Phillips

BA, Wesleyan University; JD, The Catholic University of America
Distinguished Teaching Professor in Environmental Sciences

Kathleen Marie Pike

BA, Johns Hopkins University; MA, Yale University; PHD, Yale University
Visiting Scholar in Psychology

William R. Pinch

BA, University of Virginia; MA, University of Virginia; PHD, University of Virginia
Associate Editor, History and Theory; Professor, Environmental Studies; Co-Chair, Global South Asian Studies; Professor, Global South Asian Studies;
Professor of History

Victoria Pitts-Taylor

BA, Ohio University; PHD, Brandeis University

Professor, Science in Society; Professor of Feminist, Gender, and Sexuality Studies; Professor, Sociology

Ulrich Plass

MA, University of Michigan; PHD, New York University
Professor of German Studies; Professor, Letters; Chair, German Studies

Juan Esteban Plaza

PHD, Stanford University
Visiting Assistant Professor of Spanish; Andrew W. Mellon Postdoctoral Fellow

Scott L. Plous

BA, University Minnesota Mpls; PHD, Stanford University
Professor of Psychology

Catherine Poisson

BA, Sorbonne; MA, New York University; PHD, New York University
Associate Professor of French; Associate Professor, Feminist, Gender, and Sexuality Studies

David Pollack

MA, Harvard University; PHD, Harvard University; SB, University of Chicago
Associate Professor of Mathematics; Chair, Mathematics and Computer Science

Gabrielle Ponce-Hegenauer

BA, University of Illinois Urbana; MFA, Johns Hopkins University; PHD, Johns Hopkins University
Associate Professor of Letters; Associate Professor, Feminist, Gender, and Sexuality Studies

Stephanie Ponsavady

MA, University of Provence; MA, New York University; MPHIL, New York University; PHD, New York University
Associate Professor of French

Morgan Baylie Pope

BM, Middle Tennessee State Univrs; MM, New Eng Conserv Music
Bassoon Instructor

Tyler Porter

BA, Kent State University; MA, Cornell University; PHD, Cornell University
Assistant Professor of the Practice in Economics

Nadya Potemkina

DMA, The University of Memphis; MM, University Nthrn Iowa; MM, Ball State University
Adjunct Associate Professor of Music; Director of Private Music Lessons; Adjunct Associate Professor, Russian, East European, and Eurasian Studies

Christopher Potter

BA, University of Connecticut; MA, University of Connecticut
Adjunct Professor of Physical Education; Head Coach of Men's Ice Hockey

Helen Mills Poulos

BS, Pepperdine University; MPHIL, Yale University; MS, Pennsylvania State University; PHD, Yale University
Distinguished Associate Professor of the College of the Environment and Earth and Environmental Sciences

Joya Powell

BA, Columbia University; MA, New York University
Assistant Professor of the Practice in Dance; Assistant Professor of the Practice, African American Studies

Joyce Powzyk

BS, Principia College; PHD, Duke University

Associate Professor of the Practice in Biology

James John Praznik

Assistant Professor of the Practice in Music and Technical Director

Liana Pshevorska

BA, University of Arizona; MA, University of Arizona; PHD, Princeton University
Associate Professor of the Practice in French; Associate Professor of the Practice, Fries Center for Global Studies

Q

Justine Quijada

BA, University of Chicago; MA, Columbia University; PHD, University of Chicago
Associate Professor of Religion; Associate Professor, Environmental Studies; Associate Professor, Russian, East European, and Eurasian Studies

Andrew H Quintman

BA, Hampshire College; MA, University of Michigan; PHD, University of Michigan
Associate Professor of Religion; Associate Professor, East Asian Studies; Associate Professor, Global South Asian Studies; Chair, Religion

R

John Raba

BS, University of New Haven; MED, University of New Haven
Adjunct Professor of Physical Education; Head Coach of Men's Lacrosse

Arshia Rahmati

Visiting Scholar in Music

Hari Ramesh

BA, Williams College; MA, Yale University; MPHIL, Yale University; PHD, Yale University
Assistant Professor of Government; Assistant Professor, Global South Asian Studies

Valentina Ramia

MA, New School for Social Research; MS, The New School
Research Fellow, Center for the Humanities

Felipe Ramirez

BS, Colorado St University; PHD, University of Michigan
Associate Professor of Mathematics

Julia A. Randall

BFA, Washington University; MFA, Rutgers University
Associate Professor of Art; Program Director, Studio Art

Christopher Rasmussen

BA, University of Virginia; MS, University of Virginia; PHD, University of Arizona
Associate Professor of Mathematics

Wendy Rayack

BA, Oberlin College; MA, University of Wisconsin at Madison; PHD, University of Wisconsin at Madison
Tutor, College of Social Studies; Associate Professor of Economics

Seth Redfield

BM, New Eng Conserv Music; BS, Tufts University; MS, University of Colorado Boulder; PHD, University of Colorado Boulder

Co-Coordinator, Planetary Science; Professor of Astronomy; Professor, Integrative Sciences; Director, College of Integrative Sciences

Joseph Reilly

BA, Trinity College; MBA, University of Rhode Island
Adjunct Professor of Physical Education; Head Coach of Men's Basketball

Phillip G. Resor

AB, Dartmouth College; MS, University of Wyoming; PHD, Stanford University
Professor of Earth and Environmental Sciences; Professor, Education Studies

Julie Ribchinsky

Cello Instructor

Jeff Rider

BA, Yale University; MA, University of Chicago; PHD, University of Chicago
Professor of French; Professor, Medieval Studies

Andrea Roberts

BS, Cornell University; MS, Polytechnic University; PHD, Wesleyan University
Professor of the Practice in Chemistry

Sonia Roberts

BA, Vassar College; PHD, University of Pennsylvania
Assistant Professor, Design and Engineering Studies; Assistant Professor of Computer Science

Patricia Rodriguez Mosquera

BA, Autonomia University of Madrid; MA, Autonomia University of Madrid; PHD, University of Amsterdam
Professor, Feminist, Gender, and Sexuality Studies; Professor of Psychology

Robert Rose

BA, Lamar University; MA, Louisiana State University; PHD, Indiana University
Bloomington
Postdoctoral Fellow in Computer Science

Jennifer S. Rose

BA, University of Rhode Island; MA, University of Rhode Island; PHD, University of Rhode Island
Director, Institutional Review Board; Professor of the Practice in Quantitative Analysis; Professor of the Practice, Education Studies

Michael S. Roth

BA, Wesleyan University; MA, Princeton University; PHD, Princeton University
University Professor; President

Joseph T. Rouse

BA, Oberlin College; MA, Northwestern University; MAA, Wesleyan University; PHD, Northwestern University
Professor of Philosophy; Professor, Environmental Studies; Professor of Science and Technology Studies; Hedding Professor of Moral Science

Dana Royer

BA, University of Pennsylvania; PHD, Yale University
Professor of Earth and Environmental Sciences; Professor, Environmental Studies; George I. Seney Professor of Geology

Mary-Jane Victoria Rubenstein

BA, Williams College; MA, Columbia University; MPHIL, Cambridge University; MPHIL, Columbia University; PHD, Columbia University
Professor of Religion; Dean of the Social Sciences; Professor, Science in Society; Professor, Feminist, Gender, and Sexuality Studies; Professor, Philosophy

Mirko Rucnov

BA, University Nevada Las Vegas; MFA, Columbia University

Associate Professor of the Practice in Film Studies

Sasha Rudensky

BA, Wesleyan University; MFA, Yale University
Associate Professor of Art; Associate Professor, Russian, East European, and Eurasian Studies

Ashraf Rushdy

BA, University of Alberta; MA, University of Alberta; PHD, Cambridge University
Professor of English; Professor of African American Studies; Chair, African American Studies; Benjamin Waite Professor of the English Language; Professor, Feminist, Gender, and Sexuality Studies

Matthew Francis Russo

BM, University of Hartford; DMA, University of Hartford; MM, Yale University
Trombone Instructor

Peter Rutland

BA, Oxford University; DPHIL, York University
Tutor, College of Social Studies; Professor of Government; Colin and Nancy Campbell Professor in Global Issues and Democratic Thought; Professor, Russian, East European, and Eurasian Studies

S

Iddrisu Saaka

DIPL, University of Ghana; MFA, University of California, Los Angeles
Associate Professor of Dance

Roberto Saba

BA, University of S?o Paulo; MA, University of S?o Paulo; PHD, University of Pennsylvania
Associate Professor of American Studies; Associate Professor, History

Lily Leopold Saint

BA, University of Pennsylvania; PHD, CUNY The Graduate Center
Associate Professor of English; Coordinator, African Studies

Alejandro Salinas-Albrecht

BA, California State University, Northridge; MFA, University of California, Los Angeles
Assistant Professor of the Practice in Film Studies

Edwin Sanchez

CER, Yale University
Associate Professor of Theater

Charles A. Sanislow

BS, Northrn Michigan Univ; MA, Ball State University; PHD, Duke University
Professor of Psychology; Professor, Neuroscience and Behavior; Chair, Neuroscience and Behavior

Brenda Nallely Santos Ocampo

Visiting Scholar in Molecular Biology Biochemistry

Amrita Sanyal

BS, University of Calcutta; MA, Jadavpur University; MS, Purdue University W Lafayette; PHD, Purdue University W Lafayette
Visiting Assistant Professor of Economics

Hirsh Sawhney

BA, University of Michigan; MFA, Rutgers University
Associate Professor of English; Associate Professor, Global South Asian Studies

Stanley A. Scott

Banjo/Mandolin/North Indian Vocal/Guitar Instructor

Olga Sendra Ferrer

BA, Universitat Autònoma de Barcelona; MA, North Carolina State University; MA, Princeton University; PHD, Princeton University
Associate Professor of Spanish

Petra Sertic

BA, Metropolitan State College; MA, University of Denver; PHD, University of Colorado Boulder
Teaching Fellow

Megan Sesma

Harp Instructor

Guillermo Severiche

BA, Universidad Nacional de Cuyo; MA, Louisiana State University; MFA, New York University; PHD, Louisiana State University
Visiting Associate Professor, Continuing Studies

Francois Seyler

PHD, Université Laval
Assistant Professor of Economics

Malvika Sharma

PHD, Jawaharlal Nehru University
Visiting Scholar in Religion

Anu (Aradhana) Sharma

BA, Eugene Lang College; MA, Columbia University; MA, Stanford University; PHD, Stanford University
Professor of Anthropology; Professor, Environmental Studies; Professor, Feminist, Gender, and Sexuality Studies; Professor, Global South Asian Studies

Avner Shavit

PHD, Sorbonne Nouvelle University Paris 3
Assistant Professor of the Practice; Gittel and Mervin Silverberg Scholar in Jewish Studies

Gary Shaw

BA, McGill University; DPHIL, Oxford University
Professor of History; Associate Editor, History and Theory; Chair, History; Professor, Medieval Studies

Damien Francis Sheehan-Connor

BA, Amherst College; MD, Tufts University; PHD, University of California Santa Barbara
Associate Professor of Economics

Sadia Quraeshi Shepard

BA, Wesleyan University; MA, Stanford University; MFA, Hunter College
Assistant Professor of Film Studies; Assistant Professor, Global South Asian Studies

Meng-ju Renee Sher

BA, Wesleyan University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Physics; Assistant Professor, Environmental Studies; Assistant Professor, Integrative Sciences

Sanford Shieh

AB, Cornell University; BA, Cornell University; BA, Oxford University; PHD, Harvard University
Professor of Philosophy; Chair, Philosophy

Keiji Shinohara

Artist-in-Residence, Art; Artist-in-Residence, East Asian Studies

Anna Shusterman

PHD, Harvard University; SB, Brown University
Professor of Psychology; Co-Chair, College of Education Studies; Professor, Education Studies

Lauren Silber

BA, University of Connecticut; MA, University of Massachusetts at Amherst; PHD, University of Massachusetts at Amherst
Associate Professor of the Practice, American Studies; Associate Professor of the Practice, Education Studies; Associate Professor of the Practice, English; Associate Professor of the Practice, Feminist, Gender, and Sexuality Studies; Associate Professor of the Practice in Academic Writing; Assistant Director of Academic Writing

Yaya Simakov

BA, Connecticut College; MFA, Temple University
Assistant Professor of Film Studies

Zaira Simone-Thompson

BA, The New School; MA, New York University; PHD, CUNY The Graduate Center
Assistant Professor of African American Studies

Michael Singer

BS, University of Southern California; PHD, University of Arizona
Professor of Biology; Professor, Environmental Studies

Joseph M. Siry

BA, Princeton University; MAA, Wesleyan University; MAR, University of Pennsylvania; PHD, Massachusetts Institute of Technology
Professor of Art History; Co-Coordinator, Urban Studies; Kenan Professor of the Humanities

Gilbert L. Skillman

BA, University of Kentucky; MA, University of Michigan; PHD, University of Michigan
Professor of Economics; Tutor, College of Social Studies; Co-Chair, College of Social Studies

Joseph Slaughter

BS, U.S. Naval Academy; MA, University of Maryland College Park; MA, U.S. Naval War College; PHD, University of Maryland College Park
Assistant Professor of History; Associate Director, Center for the Study of Guns and Society; Assistant Professor, Religion

Michael James Slowik

BA, Wesleyan University; MA, University of Chicago; MA, University of Iowa; PHD, University of Iowa
Vice Chair, Film Studies; Professor of Film Studies

Colin A. Smith

BA, New York University; PHD, University of California, San Francisco
Assistant Professor of Chemistry; Assistant Professor, Integrative Sciences; Assistant Professor, Molecular Biology and Biochemistry

Courtney Weiss Smith

BA, University of Dayton; MA, Washington University; PHD, Washington University
Associate Professor of English; Associate Professor, Science in Society; Chair, English

Victoria Smolkin

BA, Sarah Lawrence College; PHD, University of California, Berkeley

Associate Professor of History; Tutor, College of Social Studies; Associate Professor, Russian, Eastern European, and Eurasian Studies

Daniel Smyth

BA, University of Chicago; MA, University of Chicago; PHD, University of Chicago
Associate Professor of Letters; Associate Professor of Letters; Associate Professor, German Studies; Associate Professor, Philosophy

Ben Somera

BA, University Southern Calif
Adjunct Professor of Physical Education; Head Coach of Volleyball

Elise Springer

BA, Wesleyan University; MA, University of Connecticut; PHD, University of Connecticut
Associate Professor of Philosophy; Associate Professor, Feminist, Gender, and Sexuality Studies

Nicole Lynn Stanton

BA, Antioch College; MFA, Ohio State University
Provost; Professor, African American Studies; Professor, Environmental Studies; Professor of Dance; Provost and Senior Vice President for Academic Affairs

Emily Stark

BA, Pomona College; MA, Tufts University; PHD, Tufts University
Assistant Professor of Mathematics

Francis W. Starr

BS, Carnegie Mellon University; MS, Boston University; PHD, Boston University
Professor of Physics; Professor, Design and Engineering Studies; Associate Director, College of Design and Engineering Studies; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry; Foss Professor of Physics; Chair, Physics

Daniel Steinmetz-Jenkins

BA, Concordia College Or; MA, Reed College; PHD, Columbia University
Assistant Professor in the College of Social Studies; Assistant Professor, History

Steven E. Stemler

BS, University of Washington; MED, Boston College; PHD, Boston College
Professor of Psychology; Professor, Education Studies

Brian A. Stewart

BS, Stanford University; PHD, Massachusetts Institute of Technology
Professor of Physics; Professor, Environmental Studies; Professor, Integrative Sciences

Tracy Strain

AB, Wellesley College; EDM, Harvard University
Professor of Film Studies and Co-Director of WesDocs; Corwin-Fuller Professor of Film Studies; Associate Director, College of Film and the Moving Image; Professor Professor of Film Studies and Co-Director of WesDocs

Shirley L Sullivan

Visiting Instructor of Dance; Program Coordinator Cheshire CI, Center for Prison Education

Sonia Sultan

BA, Princeton University; MA, Harvard University; PHD, Harvard University
Professor, Environmental Studies; Professor of Biology; Alan M. Dachs Professor of Science

Prof. Sumarsam

BA, Akademi Seni Karavitan; MA, Wesleyan University; PHD, Cornell University
Professor of Music; Winslow-Kaplan Professor of Music

Andrew Szegedy-Maszak

BA, University of Michigan; MA, Princeton University; MAA, Wesleyan University; PHD, Princeton University
Professor of Classical Studies; Professor, Environmental Studies; Jane A. Seney Professor of Greek

T

Ying Jia Tan

BA, University of California, Berkeley; MA, Stanford University; MPHIL, Yale University; PHD, Yale University
Associate Professor, East Asian Studies; Associate Professor, Science in Society; Associate Professor of History

Amy Cynthia Tang

BA, Harvard University; PHD, Stanford University
Associate Professor of English; Associate Professor, American Studies; Douglas J. and Midge Bowen Bennet Associate Professor of English

Erika Taylor

BS, University of Michigan; PHD, University of Illinois Urbana
Professor of Chemistry; Professor, Environmental Studies; Professor, Integrative Sciences; Professor, Molecular Biology and Biochemistry

Tula Telfair

BFA, Moore College Of Art; MFA, Syracuse University
Professor of Art; Professor, Environmental Studies

Kate TenEyck

BFA, Rhode Island School of Design; MFA, University of Hartford
Adjunct Assistant Professor of Art

David Teva

Director of Religious and Spiritual Life and University Jewish Chaplain; Adjunct Instructor of Public Policy

Boris Tezak

Assistant Professor of Biology

Mitali Thakor

BA, Stanford University; PHD, Massachusetts Institute of Technology
Assistant Professor, Anthropology; Assistant Professor of Science in Society; Assistant Professor, Feminist, Gender, and Sexuality Studies; Assistant Professor of Science and Technology Studies

Kelly M. Thayer

BA, Regis College; PHD, Wesleyan University
Associate Professor of the Practice in Integrative Sciences

Damon Austin Tomlin

BE, Vanderbilt University; PHD, Baylor College of Medicine
Visiting Assistant Professor of Psychology

Jesse Wayne Torgerson

BA, Biola University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Associate Professor of Letters; Chair, College of Letters; Associate Professor, History; Associate Professor, Medieval Studies

Edward Torres

BA, Roosevelt University
Assistant Professor of the Practice in Theater

Elizabeth G. Traube

BA, Radcliffe College; MA, Harvard University; MAA, Wesleyan University; PHD, Harvard University

Professor of Anthropology; Professor, Feminist, Gender, and Sexuality Studies

Helen Treloar

BS, University of Melbourne; PHD, University of Melbourne

Professor of the Practice in Neuroscience and Behavior

Yvonne Troxler

Piano Instructor

Min-Feng Tu

BS, National Tsing Hua University; MS, California Institute Tech; PHD, California Institute Tech

Associate Professor of the Practice in Physics; Associate Professor of the Practice in Physics

Jennifer Tucker

BA, Stanford University; MPHIL, Cambridge University; PHD, Johns Hopkins University

Professor of History; Director, Center for the Study of Guns and Society; Professor, Environmental Studies; Professor, Science and Technology Studies; Tutor, College of Social Studies; Professor, Feminist, Gender, and Sexuality Studies

Laura Ann Twagira

BA, Wellesley College; MA, Sarah Lawrence College; PHD, Rutgers University Associate Professor of History; Associate Professor, Science and Technology Studies; Tutor, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies

Patrick Tynan

BS, University of Massachusetts at Amherst

Adjunct Professor of Physical Education; Head Coach of Women's Crew

U

Roman Utkin

MA, Kazan State University; MPHIL, Yale University; PHD, Yale University

Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, German Studies; Associate Professor of Russian, East European, and Eurasian Studies

V

Sanaz Vajedian

Assistant Professor of the Practice in Earth and Environmental Sciences;

Assistant Professor of the Practice in Quantitative Analysis

Alexander David Van Abel

BA, University of Wisconsin-Milwaukee; BFA, University of Wisconsin-Milwaukee; MS, University of Wisconsin-Milwaukee

Teaching Fellow

Libby Van Cleve

Oboe Instructor

Lauren Elaine van Haaften-Schick

BA, Hampshire College; MA, Cornell University; PHD, Cornell University Andrew W. Mellon Postdoctoral Fellow

Emily Elizabeth Vasquez

MPH, Columbia University; MPHIL, Columbia University; PHD, Columbia University

Assistant Professor of Science and Technology Studies

Eirene Visvardi

BA, University of Crete; MPHIL, Cambridge University; PHD, Stanford University

Associate Professor of Classical Studies; Associate Professor, Letters

Danielle Vogel

BA, Dowling College; MA, Naropa University; PHD, University of Denver

Associate Professor of English, Creative Writing

Greg A. Voth

BS, Wheaton College; MS, Cornell University; PHD, Cornell University

Professor of Physics; Professor, Integrative Sciences; Associate Director, College of Design and Engineering Studies

W

Phillip B. Wagoner

BA, Kenyon College; PHD, University of Wisconsin at Madison

Professor, Archaeology; Professor of Art History; Professor, Global South Asian Studies

Tanner Ethan Walker

BA, University Calif Santa Crz; MA, Yale Divinity School; PHD, Brown University

Visiting Assistant Professor of Religion

Leslie A. Warren

BA, University of Vermont

Visiting Instructor in American Sign Language

Marvin Warshaw

Viola Instructor

Henry Washington, Jr.

BA, Duke University; MA, Stanford University; PHD, Stanford University

Assistant Professor of Feminist, Gender, and Sexuality Studies

Takeshi Watanabe

BA, Yale University; PHD, Yale University

Associate Professor of East Asian Studies; Chair, College of East Asian Studies

Clifton Nathaniel Watson

BA, University of Connecticut; MA, North Carolina Central Univ; PHD, Fordham University

Director, Jewett Center for Community Partnerships; Adjunct Assistant Professor of Public Policy

Kari Weil

BA, Cornell University; MA, Princeton University; PHD, Princeton University

University Professor of Letters; University Professor, Environmental Studies; University Professor, Feminist, Gender, and Sexuality Studies

Stephanie Kuduk Weiner

BA, University Minnesota Mpls; PHD, Stanford University

Professor of English; Coordinator, Writing Certificate

Michael P. Weir

BS, University of Sussex; PHD, University of Pennsylvania

Co-Coordinator, Informatics and Modeling; Professor of Biology; Professor, Integrative Sciences

Joseph Weiss

BA, University British Columbia; MA, University of Chicago; PHD, University of Chicago
Associate Professor of Anthropology; Associate Professor, Science in Society

Margot Weiss

BA, University of Chicago; MA, Duke University; PHD, Duke University
Coordinator, Queer Studies; Associate Professor of American Studies; Associate Professor of Anthropology; Associate Professor, Feminist, Gender, and Sexuality Studies

Sarah Wellons

AB, Princeton University; MA, Harvard University; PHD, Harvard University
Assistant Professor of Astronomy; Assistant Professor, Integrative Sciences

T. David Westmoreland

BS, Massachusetts Institute of Technology; PHD, University of North Carolina at Chapel Hill
Associate Professor of Chemistry; Associate Professor, Integrative Sciences

Michael F. Whalen

BA, Wesleyan University; MS, Springfield College
Adjunct Professor of Physical Education; Frank V. Sica Director of Athletics and Chair, Physical Education

Geoffrey H. Wheeler

BA, Dartmouth College
Adjunct Professor of Physical Education; Head Coach of Men's Soccer

James White II

BS, Birmingham Sthrn College; MA, Indiana University Bloomington; PHD, Indiana University Bloomington
Visiting Scholar in Astronomy

Nicholas Whittaker

BA, Harvard University
Assistant Professor of Philosophy

Duncan Wickel

Visiting Scholar in Music

Sarah Wiliarty

BA, Harvard University; MA, University of California, Berkeley; PHD, University of California, Berkeley
Associate Professor of Government; Tutor, College of Social Studies; Co-Chair, College of Social Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor, German Studies

Steven Douglas Wilkinson

DMA, University of Hartford
Tuba Instructor

Kim Williams

BA, C.W. Post Campus, LIU
Adjunct Professor of Physical Education; Head Coach of Women's Lacrosse

Vanessa French Williamson

BA, Bates College
Adjunct Assistant Professor of Physical Education; Head Swim Coach of Swimming Diving/Aquatics Director

Jon C. Wilson

Adjunct Assistant Professor of Physical Education; Head Coach of Men's and Women's Golf

Krishna R. Winston

BA, Smith College; MAA, Wesleyan University; MPHIL, Yale University; PHD, Yale University

Visiting Scholar; Co-Director, Wasch Center Seminars; Director, Susan B. and William K. Wasch Center for Retired Faculty; Professor, Environmental Studies, Emerita; Marcus L. Taft Professor of German Language and Literature,

Roy Wiseman

Bass Instructor

Pippin Wolfe

BA, Brown University; BS, Brown University; PHD, University of Massachusetts at Amherst
Postdoctoral Fellow in Computer Science

Adam Wolfsdorf

MPL, Columbia University Teachers; PHD, Columbia University Teachers
Visiting Assistant Professor in Liberal Studies

Antonina Griecci Woodsum

BA, University of Massachusetts at Amherst; MS, University of Massachusetts at Amherst; PHD, Columbia University
Assistant Professor of American Studies

Mark A. Woodworth

BA, Wesleyan University; MALS, Wesleyan University
Adjunct Professor of Physical Education; Head Coach of Baseball

Y

Jeffrey Samuel Reisman Yelton

BS, University of Florida; PHD, Pennsylvania State University
Van Vleck Postdoctoral Fellow in Mathematics

Lauren Murphy Yeoman

BA, Tufts University; MFA, Columbia University
Assistant Professor of Theater

Iris Yoon

BA, Swarthmore College; PHD, University of Pennsylvania
Assistant Professor of Mathematics

Chai-lun Yueh

Voice Instructor

Z

Camilla Zamboni

MA, Ohio State University
Adjunct Associate Professor in Italian; Associate Professor of the Practice, Education Studies; Associate Professor of the Practice, Fries Center for Global Studies; Section Head; Associate Professor of the Practice in Italian

Yared Zeleke

MFA, New York University
Visiting Assistant Professor, CPE; Visiting Assistant Professor of Film Studies

Balazs Zelity

BA, Budapest Business School; MA, Universite Catholique de Louvain; PHD, Brown University
Assistant Professor of Economics

Meiqing Zhang

MA, University of Chicago; MA, University Southern Calif; MS, University Southern Calif; PHD, University Southern Calif
Postdoctoral Research Fellow, Wesleyan Media Project

Xiaoxue Zhao

BA, Yale University; PHD, Yale University
Assistant Professor of Economics

Su Zheng

BA, Central Conservatory of Music; MA, New York University; PHD, Wesleyan University
Associate Professor, East Asian Studies; Associate Professor, Feminist, Gender, and Sexuality Studies; Associate Professor of Music; Director of Graduate Studies

Sebastian Zimmeck

LLM, University of California, Berkeley; MS, Columbia University; PHD, University of Kiel; PHD, Columbia University
Fellow in Applied Computational Data Analysis; Assistant Professor of Computer Science

WESLEYAN UNIVERSITY CATALOG DISCLAIMERS

A copy of the lists of officers and faculty, as well as academic regulations, for the 2023-2024 issue of the Wesleyan University Catalog was prepared as of August, 2023. Information about fees and expenses, financial aid, and scholarships applies to the academic year 2023-2024. However, plans of study, course titles, fees, expenses, and other matters described herein are subject to change at the discretion of the University. Such changes may apply to matriculated students. University policies and guidelines for their implementation are published online at wesleyan.edu (<https://wesleyan.edu>).

As required by law, a copy of the Wesleyan University security report is available upon request. This report includes statistics for three previous years on specific reported crimes that occurred on campus, on property that is owned or controlled by the University, and public property within a reasonably contiguous geographic area to campus. The report also includes institutional policies concerning campus security, crime prevention, the reporting of crimes, University policy on alcohol and drugs, and many other related matters. A copy of this report is available at the Office of Admission, the Office of Public Safety, or the Public Safety website located at wesleyan.edu/publicsafety (<http://wesleyan.edu/publicsafety>).

STATEMENT OF NONDISCRIMINATION

Wesleyan University admits students without regard to race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression, to all rights, privileges, programs, and activities generally accorded or made available to students at the University. It does not discriminate on the basis of race, color, religion, national or ethnic origin, age, disability, veteran status, sex, marital status, sexual orientation, gender identity or gender expression in admission to, access to, employment in, or treatment in its programs and activities.
